Sadly, however, Casey's fears are realized. When he presents the check to the bank teller, she informs him that Shane's account is overdrawn. Casey snatches the check off the counter and hurries over to Shane's shop. It makes no difference that Casey forgot to let the teller stamp "Insufficient Funds" on the check—notice of dishonor can be made orally. Once the bank has refused to pay, the check has been dishonored. Casey has informed Shane, who must now pay the $10,000.

Drawee

Drawee
The bank on which a check is drawn.

The **drawee** is the bank on which a check is drawn. Since the draw*er* of a check is only secondarily liable, logically you might expect the drawee bank to be primarily liable. That is not the case, however. When a drawer signs a check, the instrument enters a kind of limbo. **The bank is not liable to the holder and owes no damages to the holder for refusing to pay the check.**[11] The bank may be liable to the *drawer* for violating their checking account agreement, but this contract does not extend to the holder of the check.

When a holder presents a check, the bank can do one of the following:

- Pay the check. In this case, the holder has no complaints.
- Dishonor the check. In this case, the holder must pursue remedies against the drawer.

Certified check
A check that the issuer's bank has signed, indicating its acceptance of the check.

Cashier's check
A check drawn on the bank itself. It is a promise that the bank will pay out of its own funds.

What if Casey is afraid to take a check from Shane? After all, even if Shane has enough money in his account at the moment, it may be gone by the time Casey deposits the check and his bank presents it for payment. To protect himself, Casey can insist that Shane give him a certified check or a cashier's check. A **certified check** is one that the issuer's bank has signed, indicating its acceptance of the check. The bank then becomes primarily liable. A **cashier's check** is drawn on the bank itself and is a promise that the bank will pay out of its own funds. In either case, Casey is sure to be paid so long as the bank stays solvent.[12] To protect itself once it issues either check, Shane's bank will immediately remove that money from his account.

In the following case, the real estate lawyer relied on written and oral promises, but not on a certified check. As the court pointed out, he was "bamboozled."

Harrington v. MacNab

163 F. Supp. 2d 583; 2001 U.S. Dist. LEXIS 15314
United States District Court for the District of Maryland, 2001

Facts: The MacNabs purchased a piece of property from Richard Harrington's client. Although Harrington was an experienced attorney, he made a bad mistake. The MacNabs came to the closing with a personal check drawn on their Merrill Lynch cash management account for $150,128.70. The check had not been certified. Harrington should have refused to close, but instead called Merrill Lynch and spoke with a

[11] UCC §3-408.
[12] UCC §3-104.

Ms. Ruark. She told him there were sufficient funds in the MacNabs' account to cover the check and that she would put a hold on the account in the amount of the check. When asked to confirm this promise in writing, Ruark sent the following fax to Harrington: "This letter is to verify that the funds are available in the Merrill Lynch account. There is a pend on the funds for the check that was given you."

In fact, the MacNabs' account did not contain sufficient *cleared* funds to cover the check, which bounced. The MacNabs repeatedly promised to make the check good, but never did. Harrington paid his clients the amount owing and then sued the MacNabs. Although he eventually obtained a judgment against them, they did not pay him the full amount. He also sought recovery from Merrill Lynch.

Issue: ***Is Merrill Lynch liable to Harrington as the drawee of the check?***

Excerpts from Judge Smalkin's Decision: [T]he Court of Appeals of Maryland has been careful, in cases of negligent misrepresentation resulting in economic loss, to confine the tort claim to situations where the giver and the recipient of the negligently made misrepresentation or promise have an "intimate nexus," such as contractual privity or its equivalent. Here, there is simply no contractual privity or its equivalent between Mr. Harrington and Merrill Lynch, which was in a position equivalent to that of the drawee on the MacNabs' check.

That is, to hold that an "intimate nexus" relationship existed in this case would lead to the result that any payee on a check who makes inquiry is in the equivalent of contractual privity with the drawee, a proposition that would place substantial and potentially unlimited liability on drawees for uncertified checks, in contravention of the basic policies underlying the checking system in the United States as codified in the Uniform Commercial Code. U.C.C. §3-408 specifically provides that a drawee is not liable as an assignee of the drawer on a check.

Even more to the point, a drawee has no contract liability on a check to a payee unless and until it has accepted the check, *viz.*, certified it. Acceptance requires, as it has since Lord Mansfield's day, the formality of the drawee's signature on the check. To recognize a cause of action under the circumstances of this case essentially would create a tort remedy allowing suit to be brought for oral certification of checks, in clear violation of the policies of the Commercial Code and hundreds of years of commercial law.

Accordingly, an Order will be entered granting Merrill Lynch's motion for summary judgment.

Indorser

An **indorser** is anyone, other than an issuer or acceptor, who signs an instrument. Shane gives Hannah a check to pay her for installing new shelves in his bookstore. On the back of Shane's check, Hannah writes, "Pay to Christian," signs her name, and then gives the check to Christian in payment for back rent. Underneath Hannah's name, Christian signs his own name and gives the check to Trustie Car Lot as a deposit on his new Prius. Hannah and Christian are both indorsers. This is the chain of ownership:

Indorser
Anyone, other than an issuer or acceptor, who signs an instrument.

Indorsers are *secondarily* liable; they must pay if the issuer does not. But indorsers are liable only to those who come *after* them in the chain of ownership, not to those who held the instrument beforehand.[13] If Shane refuses to pay Trustie, the auto dealership can

[13]UCC §3-415.

demand payment from Christian or Hannah. If Christian pays Trustie, Christian can then demand payment from Hannah. If, however, Hannah pays Trustie, she has no right to go after Christian because he is not liable to a previous indorser.

There are some exceptions to this rule. **Indorsers are not liable if:**

1. they write the words "without recourse" next to their signature on the instrument,
2. a bank certifies the check,
3. the check is presented for payment more than 30 days after the indorsement, or
4. the check is dishonored and the indorser is not notified within 30 days.[14]

Christian has doubts about the creditworthiness of Hannah and Shane, so he writes the words "without recourse" when he indorses the check to Trustie. This sounds like a good idea, and perhaps every indorser should try it. However, if the manager of Trustie Car Lot is familiar with the UCC, he will not accept an instrument that has been indorsed without recourse because he wants to make sure that Christian is also liable, not just Shane and Hannah. After all, Christian is the person he knows.

Accommodation Party

Accommodation party
Someone other than an issurer, acceptor, or indorser, who adds her signature to an instrument for the purpose of being liable on it.

Accommodated party
Someone who receives a benefit from an accommodation party.

An **accommodation party** is someone—other than an issuer, acceptor, or indorser—who adds her signature to an instrument for the purpose of being liable on it.[15] The accommodation party typically receives no direct benefit from the instrument but is acting for the benefit of the **accommodated party**. Shane wants to buy a truck from the Trustie Car Lot. Trustie, however, will not accept a promissory note from Shane unless his father, Walter, also signs it. Shane has no assets, but Walter is wealthy. When Walter signs, he becomes an accommodation party to Shane, who is the accommodated party. The accommodation party can sign for an issuer, acceptor, or indorser. Anyone who signs an instrument is deemed to be an accommodation party unless it is clear that he is an issuer, acceptor, or indorser.

An accommodation party has the same liability to the holder as the person for whom he signed. The holder can make a claim directly against the accommodation party without first demanding payment from the accommodated party. Walter is liable to Trustie, whether or not Trustie first demands payment from Shane. If forced to pay Trustie, Walter can try to recover from Shane.

An accommodation party sounds like what non-lawyers would call a "guarantor," but under the UCC these terms sometimes have a different meaning. Someone who writes "I guarantee this *instrument*" is an accommodation party. But someone who writes "I guarantee *collection*" is not liable until the accommodated party fails to pay. If Walter had written "to guarantee collection" before signing his name, Trustie could not have collected from him until Shane refused to pay the note.

In an earlier example, Shane's supplier, Alexis, had signed a note as co-maker. What is the difference between a co-maker and an accommodation party? The co-maker is liable both to the holder and to the other co-maker. The accommodation party is liable only to the holder, not to the other maker. If Shane pays the note on which Alexis is co-maker, then Alexis is liable to him for half the payment. But if Shane pays the note on which Walter is the accommodation party, Walter has no liability to Shane.

In the following case, an accommodation party argued that she was not liable because she did not receive the proceeds from the loan. Was she correct in her interpretation of the UCC?

[14] UCC §3-415.
[15] UCC §3-419.

In Re Couchot

169 B.R. 40, 1994 Bankr. LEXIS 899
United States Bankruptcy Court, Southern District of Ohio, 1994

Facts: Kathy J. Couchot and her mother-in-law, Jean Couchot, borrowed $6,317.48 from Star Bank to pay the funeral expenses of Kathy's husband. Jean executed a note to the bank, and Kathy signed as an accommodation party. To disburse the proceeds of the loan, Star Bank issued a check payable to "Kathy *and* Jean Couchot." Somehow this check was altered to read "Kathy *or* Jean Couchot." Jean cashed the check and used the loan proceeds to pay her son's funeral expenses and some of Kathy's back taxes and insurance premiums. Jean did not repay the loan to the bank; Kathy made six payments before defaulting.

Issues: ***Is an accommodation party liable for the full amount of a note when she received only a small portion of the proceeds? Is an accommodation party liable even though the check was altered?***

Excerpts from Judge Clark's Decision: [Kathy Couchot]'s contention that she is only liable to Star Bank for the consideration she directly received from the loan is incorrect and misconstrues the nature of an accommodation party. It is basic hornbook law that consideration does not have to be received by an accommodation party to support her obligation. Time and again sureties respond to a holder's suit by arguing, "I am a surety and I did not receive consideration for my contract." This is a losing argument. Regardless whether the surety signs gratuitously or receives compensation, his obligation is supported by the consideration which moves from the creditor to the principal debtor.

Also unavailing is [Kathy Couchot]'s argument that the check issued by Star Bank relieves her from the terms of the [note]. [Kathy Couchot] relies on U.C.C. 3-407 which provides that: "(A) Any alteration of an instrument is material which changes the contract of any party thereto in any respect...." While it is clear that the check was materially altered, there is absolutely no evidence that the check was fraudulently altered. [Kathy Couchot]'s own testimony established that the loan proceeds were used precisely as envisioned by the parties. In any event, finding no fraud in this case, it is unnecessary to further examine the effects of the altered check. The court finds that [Kathy Couchot] cosigned the promissory note to Star Bank and that the loan proceeds were used as anticipated by [her].

[Kathy Couchot was ordered to pay the note.]

Agent

Many business transactions are conducted by agents acting on behalf of a principal. A corporation, for example, cannot sign an instrument itself; all of its transactions must be conducted by company employees. When signing for a principal, the agent must be careful to ensure that only the principal is liable.

To avoid personal liability when signing an instrument, an agent must (1) indicate that she is signing as an agent and (2) give the name of the principal.[16] An agent who fails to follow these two simple steps will be *personally* liable on the instrument to any holder in due course who did not know that the agent was acting for someone else. The agent will not be liable to holders who are not in due course if she can prove that the original parties did not intend for her to be liable. An agent who signs her name, "Harley Calhoun, as agent for Slippery Corp." is safe; she is not liable on the instrument. But if Harley simply signs the note, "Harley Calhoun, Agent," then she will be personally liable to Ralph, a holder in due course, unless she can prove that Ralph knew she

[16]UCC §3-402.

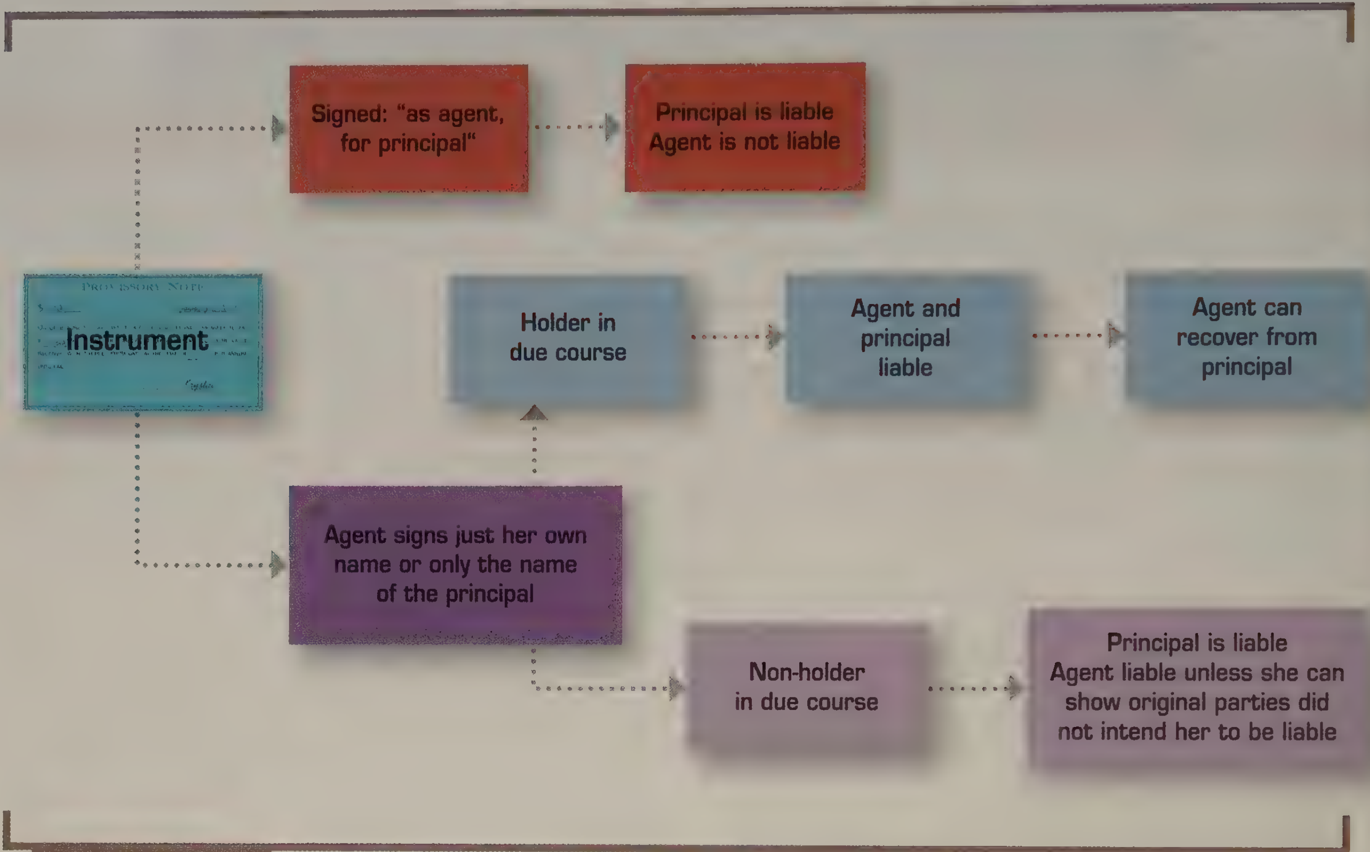

EXHIBIT 26.2

was acting for someone else when he acquired the note. (That is a great deal of trouble easily avoided by simply including the name of the principal.) Even if Ralph is not a holder in due course, Harley will be liable unless she can prove that the original parties never intended her to be.

Will Maude have to pay for Harold's dreamboat?

The principal is liable if the agent signs correctly, the agent signs just her own name, or the agent signs only the name of the principal. Thus, if Harley signs the note, "Harley Calhoun" or "Slippery Corp.," the corporation is liable to Ralph (and so is Harley). He can sue either. If Ralph recovers from Harley, she can try to recover from Slippery; but if the company goes out of business, Harley will find herself in a sticky situation. Exhibit 26.2 illustrates the liability of agents and principals.

Checks are an exception to this general rule on agent liability. If an agent is authorized to sign a check on the principal's bank account, the agent is not personally liable even if she forgets to indicate that she is simply an agent. Because the check is probably printed with the principal's name anyway, no one is likely to think that the check is coming out of the agent's personal funds.

EXAM Strategy

Question: Harold wants to buy a power catamaran for the low, low price of $175,000. He offers to give the dealer a promissory note, but the dealer will not make the sale unless Harold's significant other, Maude, also signs the note. She writes her name across the top front. When and to whom is Maude liable?

Strategy: Whenever a case involves the liability of someone who has signed an instrument, you must start by reviewing the rules on signature liability. Ask first what kind of signer Maude is. Then determine the liability for someone who signs in that capacity.

Result: If Maude had signed the note in the lower-right-hand corner, she would be a co-maker. An indorser signs on the back. An acceptor is a drawee bank. Maude is none of these things. But we know that unless a signer is clearly a co-maker, acceptor, or indorser, she is deemed to be an accommodation party. So that is what Maude is. The dealer can seek payment from her without first demanding payment from Harold, although if she has to pay, Harold would be liable to her. However, if Harold pays the note, she is not liable to him.

WARRANTY LIABILITY

Warranty liability rules apply when someone receives payment on an instrument that is invalid because it has been forged, altered, or stolen.

Basic Rules of Warranty Liability

1. **The wrongdoer is always liable.** If a forger signs someone else's name to an instrument, that signature counts as the forger's, not as that of the person whose name she signed. The forger is liable for the value of the instrument plus any other expenses or lost interest that subsequent parties may experience because of the forgery. If Hope signs David's name on one of his checks, Hope is liable, but not David. Although this is a sensible rule, the problem is that forgers are difficult to catch and, even when found, often do not have the money to pay what they owe.
2. **The drawee bank is liable if it pays a check on which the *drawer's* name is forged. The bank can recover from the payee only if the payee had reason to suspect the forgery.**[17] If a bank cashes David's forged check, it must reimburse him whether or not it ever recovers from Hope. Suppose that Hope forged the check to pay for a new tattoo. If Gus, the owner of the tattoo parlor, deposits the check and the bank pays it, the bank can recover from Gus only if he had reason to suspect the forgery. Perhaps Gus did suspect because "David" was the name on the check and Hope does not look much like a David.

   Why hold the bank liable for something that is not its fault? In theory, the bank has David's signature on file and can determine that Hope's version does not match. As the saying goes, the drawee bank must know the drawer's signature as a mother knows her own child. Such a rule may have been appropriate in an era when people went to their

[17] UCC §3-418.

neighborhood bank to cash checks and a teller would indeed recognize dear Miss Plotkin's signature. In this day and age, most checks—especially those for small amounts—are handled by machine, so perhaps this rule makes less sense. Nonetheless, the rule stands, for good reason or bad.

3. **In any other case of wrongdoing, a person who first acquires an instrument from a wrongdoer is ultimately liable to anyone else who pays value for it.** These rules are based on the provisions in Article 3 of the UCC that establish transfer and presentment warranties.

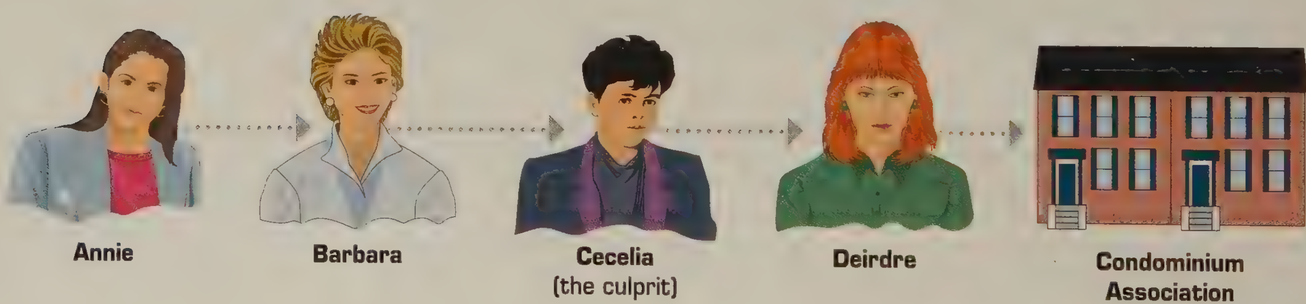
Transfer Warranties

When someone transfers an instrument, she warrants that:

- She is a holder of the instrument—in other words, she is a legitimate owner,
- All signatures are authentic and authorized,
- The instrument has not been altered,
- No defense can be asserted against her, and
- As far as she knows, the issuer is solvent.[18]

When someone transfers an instrument, she promises that it is valid. The wrongdoer—the person who created the defective instrument in the first place—is always liable, but if he does not pay what he owes, the person who took it from him is liable in his place. She may not be that much at fault, but she is more at fault than any of the other innocent people who paid good value for the instrument.

Suppose that Annie writes a check for $100 to pay for a fancy dinner at Barbara's Bistro. Cecelia steals the check from Barbara's cash register, indorses Barbara's name, and uses the check to buy a leather jacket from Deirdre. In her turn, Deirdre takes the check home and indorses it over to her condominium association to pay her monthly service fee. Barbara notices the check is gone and asks Annie to stop payment on it. Once payment is stopped, the condominium association cannot cash the check. Who is liable to whom? The chain of ownership looks like this:



Cecelia is the wrongdoer and, of course, she is liable. Unfortunately, she is currently studying at the University of the Azores and refuses to return to the United States. The condominium association makes a claim against Deirdre. When she transferred the check, she warranted that all the signatures were authentic and authorized, but that was not true

[18] UCC §3-416.

because Barbara's signature was forged. (Deirdre should have asked Cecelia for identification.) Deirdre cannot make a claim against Annie or Barbara because neither of them violated their transfer warranties—all the signatures at that point were authentic and authorized.

There are a few additional wrinkles to the transfer warranty rules:

- When someone violates the transfer warranties, she is liable for the value of the instrument, plus expenses and interest. If the condominium association is charged a fee by the bank for the returned check, Deirdre must pay it.
- Transfer warranties flow to all subsequent holders in good faith who have indorsed the instrument. If the condominium association indorses the check over to its maintenance company, Deirdre is liable to the condo association when the maintenance company makes a claim against it.
- If the instrument is *bearer* paper, the transfer warranties extend only to the first transferee. If Annie had made her check out to cash, it would have been bearer paper, and her transfer warranties would have extended only to Barbara. If Barbara transfers the check to Hannah, Barbara's transfer warranties extend to Hannah; Annie's do not.
- If a warranty claim is not made within 30 days of discovering the breach, damages are reduced by the amount of harm that the delay caused. Suppose that the condominium association waits two months to tell Deirdre the check is invalid. Cecelia has been into Deirdre's store several times to try on matching leather pants. By the time Deirdre finds out the check is bad, Cecelia has again left town. Deirdre may not be liable on the check at all because the delay has prevented her from making a claim against Cecelia.
- Transfer warranties apply only if the instrument has been transferred for consideration. Suppose Deirdre gives the check to an employee, Emily, as a birthday present. When the check turns out to be worthless, Emily has no claim against Deirdre.

The following sad case illustrates how important transfer warranties are and how easy it is to be conned, even if you are a careful person. Think about what Quimby could have done to protect himself.

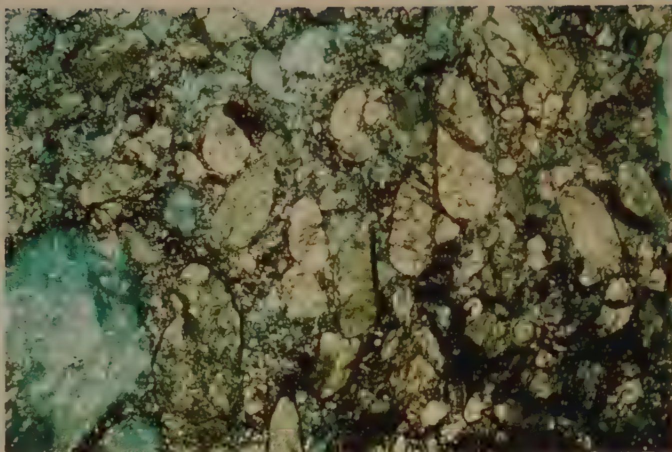
You be the Judge

Quimby v. Bank of America

2009 U.S. Dist. LEXIS 98575
United States District Court for the District of Oregon, 2009

Facts: Steve Szabo, a Venezuelan resident, had a checking account with the Bank of America in Palm Beach Gardens, Florida. Someone with an Internet address in Nigeria hacked into Szabo's accounts online, called the bank's customer service department to change the telephone number listed on his account, and ordered blank checks.

Someone then wrote a check on Szabo's account for $120,000 to pay for an investment in Freddie Quimby's gold mine. On February 20, Quimby presented the check for payment at the Bank of America's branch in Osburn, Idaho. At Quimby's request, the branch manager verified through Bank of America's records that Szabo's account had sufficient funds to cover the check. The branch manager also called the telephone number in Szabo's account records and spoke to someone claiming to be Szabo, who confirmed that the check was valid.



© Brooks Kraft/Corbis

The culprit's real aim was not to buy gold, but to steal money from Quimby.

Quimby indorsed the check to the bank and received in return a cashier's check for $120,000, which he deposited to his account at Bank of America in Baker City, Oregon. (You remember that a cashier's check is a check drawn on the bank itself.) "Szabo" then contacted Quimby, stating that he had changed his mind about the gold mine investment and asking Quimby to return the funds. On February 22, Quimby wired $111,000.00 from his account with Bank of America to an account in Hong Kong. Those funds disappeared, and Bank of America has been unable to reclaim them.

On March 3, the real Szabo reported to the bank that his signature on the Quimby check was a forgery. The bank repaid Szabo and then filed suit against Quimby, seeking repayment on the cashier's check it had issued to him, with interest. The bank argued that Quimby had violated his transfer warranties when he indorsed the forged check to it.

You be the Judge: ***Did Quimby violate his transfer warranties? Is he liable to the Bank of America for $120,000?***

Argument for the Bank: When Quimby indorsed the check to the bank, he warranted that all signatures were authentic and authorized. That was not true—the signature was a forgery and the check was invalid. Moreover, he waited only two days before wiring the funds. If he had waited longer, the fraud might have been discovered in time.

The bank had to refund $120,000 to Szabo. Quimby must repay the bank.

Argument for Quimby: This whole problem is the bank's fault. Let us count the ways: the bank (1) permitted a thief to hack into Szabo's account; (2) issued blank checks to the thief; (3) assured Quimby that there were good funds to pay the check; (4) issued a cashier's check to Quimby; and (5) wired funds to Hong Kong that it cannot trace.

In short, the bank was repeatedly negligent and now it seeks to recover from Quimby, who did all he could to ensure that the check was valid. That is unfair and preposterous.

Comparison of Signature Liability and Transfer Warranties

Transfer warranties fill in holes left by the signature liability rules:

- A forged signature is invalid and therefore creates no signature liability on the part of the person whose name was signed. However, someone who receives a forged instrument may recover under transfer warranty rules, which provide that anyone who transfers a forged instrument is liable for it.
- The signature liability rules do not apply to the transfer of bearer paper. Bearer paper can be negotiated simply by delivery; no indorsement is required. No signature means no signature liability (for anyone other than the issuer—who is the only person actually signing the instrument). Transfer warranties apply to each transfer of bearer paper (although the transferor of bearer paper is liable only to the person to whom he gives the instrument, not to any transferees further down the line).
- Under the signature liability rules, the holder of an instrument cannot make a claim until the indorser or drawer has been notified that the instrument was presented and dishonored.[19] Under the transfer warranty rules, the holder need not wait for presentment or dishonor before making a claim against the transferor.

[19] UCC §3-503(a).

Presentment Warranties

Transfer warranties impose liability on anyone who sells a negotiable instrument, such as Deirdre. **Presentment warranties** apply to someone who demands payment for an instrument from the maker, drawee, or anyone else liable on it. Thus, if the condominium association cashes Annie's check, it is subject to presentment warranties because it is demanding payment from her bank, the drawee. In a sense, transfer warranties apply to all transfers *away* from the issuer; presentment warranties apply when the instrument *returns* to the maker or drawee for payment. As a general rule, payment on an instrument is final, and the payer has no right to a refund, unless the presentment warranties are violated.

Anyone who presents a *check* for payment warrants that:

- She is a holder;
- The check has not been altered; and
- She has no reason to believe the drawer's signature is forged.[20]

If any of these promises is untrue, the bank has a right to demand a refund from the presenter. Suppose that Adam writes a $500 check to pay Bruce for repairing his motorcycle. Bruce changes the amount of the check to $1,500 and indorses it over to Chip as payment for an oil bill. When Chip deposits the check, the bank credits his account for $1,500 and deducts the same amount from Adam's account. When Adam discovers the alteration, the bank credits his account for $1,000. Chip violated his *presentment* warranties when he deposited an altered check (even though he did not *know* it was altered). Although Chip was not at fault, he must still reimburse the bank for $1,000. But Chip is not without recourse—Bruce violated his *transfer* warranties to Chip (by transferring an altered check). Bruce must repay the $1,000. Chip loses out only if he cannot make Bruce pay.

The presentment warranty rules for a promissory note are different from those for a check. **Anyone who presents a *promissory note* for payment makes only one warranty—that he is a holder of the instrument.** Someone presenting a note does not need to warrant that the note is unaltered or the maker's signature is authentic because a note is presented for payment to the issuer himself. The issuer presumably remembers the amount of the note and whether he signed it. Suppose Adam gives a promissory note to Bruce to pay for a new motorcycle. If Bruce increases the note from $5,000 to $10,000 before he presents it for payment in six months' time, Adam will almost certainly realize the note has been changed and refuse to pay it.

The presenter of a note warrants that he is a holder. A forged signature prevents subsequent owners from being a holder, so anyone who presents a note with a forged signature is violating the presentment warranties. Suppose that Bruce is totally honest and does not alter the note, but Chip steals it and forges Bruce's indorsement before passing the note on to Donald, who presents it to Adam for payment. Donald has violated his *presentment* warranties because he is not a holder. Adam can refuse to pay him. For his part, Donald can claim repayment from Chip, who violated his *transfer* warranties by passing on a note with a forged signature.

EXAM Strategy

Question: Hillary owed Evan $500. She gave Evan's roommate John a check made out to Evan. John indorsed the check to Mike by signing Evan's name. Mike deposited the check in his account at the Amstel Bank. Amstel removed $500 from Hillary's account. Are John and Mike liable on this check?

[20] UCC §3-417.

Strategy: Whenever an instrument goes astray, begin by asking which warranties have been violated and by whom.

Result: Transfer warranties apply to all transfers *away* from the issuer; presentment warranties apply when the instrument *returns* to the maker or drawee for payment. John violated transfer warranties because Evan's signature is neither authentic nor authorized. When Mike deposited the check, he violated presentment warranties because he is not a holder. Remember from Chapter 25 that a holder is anyone in possession of an instrument if it is payable to or indorsed to him. This check was not properly indorsed to Mike because Evan has not signed it. John and Mike are liable. In the next section, we will see that Amstel is also liable.

Other Liability Rules

This section contains other UCC rules that establish liability for wrongdoing on instruments.

Conversion Liability

Conversion
(1) Someone has stolen an instrument or
(2) A bank has paid a check that has a forged indorsement.

Conversion means that (1) someone has stolen an instrument or (2) a bank has paid a check that has a forged indorsement.[21] The rightful owner of the instrument can recover from either the thief or the bank.

For example, Glenn Altman was a lawyer representing Barbara Kirchoff. He settled her case for $12,000, but when he received the check, he forged her indorsement and deposited the check in his own account without telling her. He gave her the money four months later, but by then she had discovered his dishonesty. What claims do the various parties have?

> ... he forged her indorsement and deposited the check in his own account without telling her.

Kirchoff has a claim against the bank because it paid a check with a forged indorsement. If the bank pays Kirchoff, then it can recover from Altman because he violated his presentment warranties. Note, however, that Kirchoff could not sue Altman for violating presentment warranties because he had not presented the check to her for payment. Nor could she sue him for violating transfer warranties because he had not transferred the check *to* her. To the contrary, he had transferred the check *away* from her.

Kirchoff does have a claim against Altman for conversion because he stole the check from her.[22] What about the issuer of the check—can it also sue Altman for conversion? No, an action for conversion cannot be brought by an issuer because the check technically belongs to the payee (Kirchoff). The issuer can bring a claim only against the bank that pays the forged check.

---

[21] UCC §3-420.

[22] A payee (i.e., Kirchoff) cannot bring a claim for conversion unless she first *receives* the check. In this case, Altman was Kirchoff's agent and he received the check for her, so she could bring a conversion action against him.

Impostor Rule

If someone issues an instrument to an impostor, then any indorsement in the name of the payee is valid as long as the person (a bank, say) who pays the instrument does not know of the fraud.[23] A teenager knocks on your door one afternoon. He tells you he is selling magazine subscriptions to pay for a school trip to Washington, D.C. After signing up for *Career* and *Popular Accounting*, you make out a check to "Family Magazine Subscriptions." Unfortunately, the boy does not represent Family Magazine at all. He does cash the check, however, by forging an indorsement for the magazine company. Is the bank liable for cashing the fraudulent check?

No. The teenager was an impostor—he said he represented the magazine company, but he did not. If anyone indorses the check in the name of the payee (Family Magazine Subscriptions), you must pay the check and the bank is not liable. Does this rule seem harsh? Maybe, but you were in the best position to determine if the teenager really worked for the magazine company. You were more at fault than the bank, and you must pay. Of course, the teenager would be liable to you, if you could ever find him.

Fictitious Payee Rule

If someone issues an instrument to a person who does not exist, then any indorsement in the name of the payee is valid as long as the person (a bank, say) who pays the instrument does not know of the fraud.[24] The *impostor* rule applies if you give a check with a real name to the wrong person. The *fictitious payee* rule applies if you write a check to someone who does not exist. This type of fraud can be very difficult to prevent. Even a large law firm was stung. Dennis Masellis, the manager of payroll for Baker & McKenzie's New York office stole more than $7 million from the firm by creating fictitious employees and then depositing their salaries in his own account.

Employee Indorsement Rule

If an employee with responsibility for issuing instruments forges a check or other instrument, then any indorsement in the name of the payee, or a similar name, is valid as long as the person (a bank, say) who pays the instrument does not know of the fraud.[25] A dishonest employee, especially one with the authority to issue checks, has the opportunity to steal a great deal of money. The employer cannot shift blame (and liability) onto the bank that unknowingly cashes the forged checks because the employer was more to blame—it not only hired the thief, it failed to supervise him carefully.

Dennis M. Hartotunian had a major gambling problem—he owed nearly $10 million. Unfortunately, he was also the controller and accountant for the Aesar Group, a precious metals company. Over the course of three years, he wrote himself 154 checks worth $9.24 million. Any check for more than $500 required the signature of Aesar's general manager, but Hartotunian forged it. After an internal audit revealed that millions were missing, company officers asked to talk with Hartotunian. When he heard they were coming, he walked out and never came back.

It is always a bad sign when the company controller disappears. If an employee is generally authorized to prepare or sign checks, then the bank is not liable on checks that the employee forges. Hartotunian was clearly covered by this rule because he was the company controller. If he had been a mailroom employee without authority to sign checks, the bank would have been liable. The employee indorsement rule applies to both single and double forgeries. In a **single forgery**, the employee writes a check to himself, signs his employer's name, and cashes the check. In a **double forgery**, the employee writes a check to someone else, forges his employer's name, and also forges the name of the payee.

---

[23]UCC §3-404(a).
[24]UCC §3-404(b).
[25]UCC §3-405.

Negligence

Regardless of the impostor rule, the fictitious payee rule, and the employee indorsement rule (the "three rules"), **anyone who behaves negligently in creating or paying an unauthorized instrument is liable to an innocent third party**. If two people are negligent, they share the loss according to their negligence. Here are two examples:

- **Anyone who is careless in paying an unauthorized instrument is liable, despite the three rules.**[26] Suppose that the boy selling bogus magazine subscriptions goes into the bank and indorses the check: "Family Magazine Subscriptions, by Butch McGraw." The teller peers over her counter and sees a 13-year-old boy standing there with torn jeans and a baseball cap on backwards. She may be negligent if she cashes the check without asking for further identification.
- **Anyone who is careless in allowing a forged or altered instrument to be created is also liable, whether or not he has violated one of the three rules.** The classic case establishing this rule is more than 200 years old. In it, a businessman who was going abroad signed five checks and gave them to his wife with instructions that they were to be used for business expenses. A clerk in the company helpfully showed the missus how to fill out the checks, carefully instructing her to leave a blank space in front of the number. The clerk used this space to add a "3" in front of a "50" and then cashed the £350 check. The court held that the drawee bank was not liable because, "If Young, instead of leaving the check with a female, had left it with a man of business, he would have guarded against fraud in the mode of filling it up."[27] Today, we hiss at the sexist sentiment, but it illustrates the point. Anyone who carelessly creates a situation that facilitates the forgery or alteration of an instrument cannot recover against a party who pays the instrument in good faith.

In the following case, the Professional Golf Association had a bad lie. Who must take penalty strokes—the PGA or its bank?

---

[26]UCC §§3-404(d), 3-405(b).

You be the Judge

Gulf States Section, PGA, Inc. v. Whitney National Bank of New Orleans

689 So.2d 638, 1997 La.App. LEXIS 167
Court of Appeal of Louisiana, Fourth Circuit, 1997

Facts: As executive director of the Gulf States Section of the Professional Golf Association (PGA), Robert Brown was responsible for paying bills and handling the bank account. Brown used Quicken, a software program, to write checks. These checks were kept in a box beneath the printer stand in his office.

Adrenetti Collins was a secretary who worked in the PGA office with Brown. During a four-month period, she forged 18 PGA checks totaling $22,699.81. To avoid detection, she intercepted two of the bank statements sent by Whitney National Bank and replaced them with forged statements that left out the numbers of the checks she had stolen. The usual Whitney statement was printed on vanilla-colored paper measuring a nonstandard 6¾ × 11 inches. The forged statements were on standard 8½ × 11-inch white paper. They were not dated, but they did contain the Whitney logo. Brown received two forged statements and then no statements at all for two months. Shortly thereafter, Collins asked for a leave of absence.

Whitney's policy was to verify signatures on checks equal to or greater than $5,000. One of the forged checks was in the amount of $5,000, but Whitney did not verify

Brown's signature before paying it. Brown's signature was a semi-legible letter or two and a long loop. The forged signature on the check looked very similar to the real one.

You Be the Judge: ***Is Whitney liable to the PGA for the forged checks it paid?***

Argument for the PGA: The general rule is that a person is not liable on an instrument unless his signature appears on it. Brown's signature did not appear on these checks, so only the bank is liable on them.

As for the PGA's alleged negligence, Brown traveled extensively and was not available to supervise the office staff carefully. If this is negligence, then half the companies in America are negligent, too. Do not forget that Brown stored the checks in his private office. Whitney admits that it did not verify the signatures on any of the checks, even the one for $5,000. This is in direct violation of its own policies. If Whitney had simply followed its policies, the forgeries would have been detected months earlier.

Argument for Whitney: Generally, a bank is liable for forged checks unless it can show that (1) the customer was negligent; (2) the negligence substantially contributed to the forgery; and (3) the bank paid the forged instruments in accordance with reasonable commercial banking industry standards.

The PGA was clearly negligent in this case. The checks should have been locked up, not sitting under the printer in an open box. Brown should have realized that checks were missing, and he should have noticed that the bank statements were forged. Without his negligence, Collins could never have committed the forgeries. In any event, she would have been caught much earlier—when the first bank statement was received, not four months later.

As for the bank's failure to verify Brown's signature, the forgery was close enough to his sloppy writing that no one could have realized the signature was a fake.

EXAM Strategy

Question: Jonathan is the head of payroll at Yearbook. He issues checks to his sister, Elizabeth, who happens *not* to work for Yearbook. She does, however, deposit the checks into her bank account. A teller at the bank knows that Elizabeth does not work for Yearbook, but he deposits the checks for her without raising any questions. Is the bank liable for the fraudulent checks?

Strategy: Whenever fraudulent checks are signed by an authorized employee, you will naturally think first of the Employee Indorsement Rule. However, it is important to remember that the bank's negligence overrides the Employee Indorsement Rule.

Result: If the bank was not negligent, then under the Employee Indorsement Rule, it would not be liable because Jonathan was authorized to sign checks. However, because the bank was negligent in paying the checks, it must share the loss with Yearbook. The amount each would have to pay depends upon their share of the blame.

Crimes

It is beyond the scope of this chapter to catalog all of the crimes that can be committed with negotiable instruments, but students should be aware of these.

Bouncing a Check

It is illegal to write a check on an account that has insufficient funds. Generally, no serious penalties are imposed if sufficient funds are immediately deposited. (This is a good thing, considering that hundreds of *millions* of checks bounce each year.) However, both banks and merchants impose substantial fees for their trouble. People who make a career of bouncing checks may find they have plenty of time to bone up on UCC Article 3 in the prison library.

Check Kiting

Check kiting
Moving funds between bank accounts to take advantage of the float.

Check **kiting** means moving funds between bank accounts to take advantage of the float. It is possible because banks start paying interest before deposits clear. But it is illegal. E. F. Hutton was a thriving brokerage firm until ambitious branch managers began boosting profits with a check-kiting scheme. A Hutton manager would overdraw an account in Bank A and deposit that check in Bank B. Bank B would begin paying interest on the funds before the check had cleared. The manager would then write a check on Bank B to cover the deficit in Bank A, in the process overdrawing Bank B. One Hutton account in a Virginia bank was overdrawn by an average of $9 million a day. Interest earned on these overdrafts accounted for as much as 70 percent of the Washington office's gross income. In 20 months, Hutton made at least $8 million, but the resulting scandal drove the firm out of business.

Forgery

Utter
To pass on an instrument that one knows to be forged.

It is illegal to forge an instrument or to pass on (**utter**) an instrument that one knows to be forged. In the United States, billions of dollars of checks are forged each year.

Discharge

Discharge of the Obligor

Discharge
Liability on an instrument terminates.

Discharge means that liability on an instrument terminates. Article 3 establishes five different ways to discharge an instrument:[28]

- **By Payment.** Payment discharges an instrument, as long as the payment is *from* someone obliged to pay and goes *to* the holder. If you mail a check to the wrong bank when paying off a promissory note, you obviously have not discharged the note. Or if you ask an employee to take money to the bank to pay off the note, but she goes to Hawaii instead, no discharge has occurred. Similarly, payment does not discharge an instrument if the payor knows that the instrument is stolen. Suppose you have given a promissory note to Lou. He complains to you that his employee Stephanie stole it. If you pay Stephanie when she presents the note, you have not discharged it.
- **By Agreement.** The parties to the instrument can agree to a discharge, even if the instrument is not paid. The discharge, however, must be in writing; it cannot be oral. You give a promissory note to your company to pay for company stock. The company president tells you that the company will forgive the loan and discharge the note as a reward for your fabulous performance. A few months later the president is ousted. Your agreement was not in writing and you are liable on the note. (You may have a contract claim against the company, but the note itself is still valid.)
- **By Cancellation.** Cancellation means the intentional, voluntary surrender, destruction, or disfigurement of an instrument. If Ted accidentally forgets to take a check out of his pocket before throwing his shirt in the wash, he has not canceled the check (even though it was destroyed) because the destruction was unintentional. If, while arguing with his business partner, he takes her promissory note and tears it into a thousand pieces while screaming, "This is what I think of you and your business skills," he has canceled the note. He could achieve the same result less dramatically by simply writing "canceled" on it or by giving it back to her.

[28] UCC Article 3, Part 6.

- **By Certification.** When a bank certifies or accepts a check, the drawer and all indorsers of the check are discharged, and only the bank is liable.
- **By Alteration.** An instrument is discharged if its terms are intentionally changed. Laura gives Todd a promissory note. Thinking he is being very clever, Todd changes the amount of her note from $200 to $2,000. He has actually done Laura a favor because he has discharged the note.

Keep in mind, however, that no discharge is effective against a holder in due course who acquires the instrument without knowledge of the discharge. If Todd sells Laura's note to Max, who does not know of the discharge, Max can enforce the instrument against Laura, but only for the original amount of $200.

© Stockbyte/Getty Images

One way to cancel an instrument.

Discharge of an Indorser or Accommodation Party

Article 3 provides that virtually any change in an instrument that harms an indorser or accommodation party also discharges them unless they consent to the change. These fatal changes include an extension of the due date on the instrument, a material modification of the instrument, or any impairment of the collateral that secures the instrument. When Chelsea borrows money from Jordan, she issues a promissory note due on December 24. Helena signs the note as an accommodation party. Chelsea cannot pay, but Jordan does not have the nerve to declare Chelsea in default on Christmas Eve. He generously extends the due date for another week. Helena is no longer liable, even secondarily, because Jordan has granted an extension of the due date.

Chapter Conclusion

It is never wise to play an important game without understanding the rules. As you can see from the cases in this chapter, real harm can come to those who do not know the rules of negotiable instruments.

Exam Review

1. **PRIMARY V. SECONDARY LIABILITY** Someone who is primarily liable on a negotiable instrument must pay unless he has a valid defense. Those with secondary liability only pay if the person with primary liability does not. (p. 620)

2. **PAYMENT PROCESS** The payment process for a negotiable instrument comprises as many as three steps:

   - Presentment. The holder makes a demand for payment to the issuer.
   - Dishonor. The instrument is due, but the issuer does not pay.

- Notice of Dishonor. The holder of the instrument notifies those who are secondarily liable that the instrument has been dishonored. (pp. 620–621)

3. **PRIMARY SIGNATURE LIABILITY** The maker of a note is primarily liable. (p. 621)

4. **SECONDARY SIGNATURE LIABILITY**

   a. The drawer of a check has secondary liability: he is not liable until he has received notice that the bank has dishonored the check.

   b. Indorsers are secondarily liable; they must pay if the issuer does not. But an indorser is only liable to those who come after him in the chain of ownership, not to those who held the instrument before he did. (pp. 621–622)

EXAM Strategy

Question: Sidney entered into a contract for $35,000 with MacDonald Roofing Co., Inc., to reroof his building. Sidney made his initial payment by writing a check for $17,500 payable to "MacDonald Roofing Company, Inc., and Friendly Supply Company." MacDonald took the check to Friendly and requested an indorsement, which Friendly provided. When MacDonald failed to complete the roofing work, Sidney filed suit for damages against Friendly. Sidney argued that Friendly was liable as an indorser. Do you agree?

Strategy: Whenever you are faced with an issue of indorser liability, remember that indorsers are liable only to those who come after them in the chain of ownership. (See the "Result" at the end of this section.)

5. **SIGNATURE LIABILITY FOR AN ACCOMMODATION PARTY** The accommodation party signs an instrument to benefit the accommodated party. By signing the instrument, an accommodation party agrees to be liable on it, whether or not she directly benefits from it. (pp. 624–625)

6. **SIGNATURE LIABILITY OF AN AGENT** To avoid personal liability when signing an instrument, an agent must indicate that he is signing as an agent and must give the name of the principal. (pp. 626–627)

7. **WARRANTY LIABILITY** The basic rules of warranty liability are as follows:

   - The wrongdoer is always liable.
   - The drawee bank is responsible if it pays a check on which the drawer's name is forged.
   - In any other case of wrongdoing, a person who initially acquires an instrument from a wrongdoer is ultimately liable to anyone else who pays value for it. (pp. 627–630)

8. **TRANSFER WARRANTIES** When someone transfers an instrument, she warrants that:

- She is a holder of the instrument
- All signatures are authentic and authorized
- The instrument has not been altered
- No defense can be asserted against her, and
- As far as she knows, the issuer is solvent. (pp. 628–630)

9. **PRESENTMENT WARRANTIES FOR A CHECK** Anyone who presents a check for payment warrants that:

- She is a holder
- The check has not been altered, and
- She has no reason to believe the drawer's signature is forged. (p. 631)

10. **PRESENTMENT WARRANTIES FOR A NOTE** The presenter of a note only warrants that he is a holder. (p. 631)

11. **CONVERSION** Conversion means that (1) someone has stolen an instrument or (2) a bank has paid a check that has a forged indorsement. (p. 632)

EXAM Strategy

Question: Marie hired an attorney, James, to collect money owed her on a mortgage. When James received the check payable to Marie for $26,676.16, he forged her indorsement and deposited the check in his own account at the bank. He later withdrew the entire amount. Is the bank liable to Marie?

Strategy: Checks go astray in two ways: either someone transfers the check on purpose (to the wrong person or for the wrong reason, but nonetheless, on purpose) or someone steals the check. Whenever the check is stolen, it is conversion. In the case of conversion, the rightful owner can recover from either the bank that pays the check or the thief. (See the "Result" at the end of this section.)

12. **IMPOSTOR RULE** If someone issues an instrument to an impostor, then any indorsement in the name of the payee is valid as long as the person who pays the instrument is ignorant of the fraud. (p. 633)

13. **FICTITIOUS PAYEE RULE** If someone issues an instrument to a person who does not exist, then any indorsement in the name of the payee is valid as long as the person who pays the instrument does not know of the fraud. (p. 633)

14. **EMPLOYEE INDORSEMENT RULE** If an employee with responsibility for issuing instruments forges a check or other instrument, then any indorsement in the name of the payee is valid as long as the person who pays the instrument is ignorant of the fraud. (p. 633)

15. **LIABILITY FOR NEGLIGENCE** Anyone who behaves negligently in creating or paying an unauthorized instrument is liable to an innocent third party. (pp. 634–635)

16. **DISCHARGE** Discharge means that liability on an instrument terminates. An instrument may be discharged by payment, agreement, cancellation, certification, or alteration. (pp. 636–637)

EXAM Strategy

CPA Question: Vex Corp. executed a negotiable promissory note payable to Tamp, Inc. The note was collaterized by some of Vex's business assets. Tamp negotiated the note to Miller for value. Miller indorsed the note in blank and negotiated it to Bilco for value. Before the note became due, Bilco agreed to release Vex's collateral. Vex refused to pay Bilco when the note became due. Bilco promptly notified Miller and Tamp of Vex's default. Which of the following statements is correct?

a. Bilco will be unable to collect from Miller because Miller's indorsement was in blank.

b. Bilco will be able to collect from either Tamp or Miller because Bilco was a holder in due course.

c. Bilco will be unable to collect from either Tamp or Miller because of Bilco's release of the collateral.

d. Bilco will be able to collect from Tamp because Tamp was the original payee.

Strategy: For this question, you can save time by quickly identifying the one right answer and not agonizing over each possibility. You know that if an indorser is in any way harmed by the acts of a subsequent holder, the indorser is discharged. (See the "Result" at the end of this section.)

4. Result: In this case, Sidney issued the check and came *before* Friendly in the chain of ownership. Friendly is not liable.

11. Result: Marie can recover from the bank.

16. Result: In this case, Bilco has released Vex's collateral, thereby harming the two indorsers because now there are fewer assets that can be used to pay the note. The correct answer is c.

Multiple-Choice Questions

1. ***CPA QUESTION*** A check has the following indorsements on the back:

   Paul Frank
   without recourse
   George Hopkins

payment guaranteed
Ann Quarry
Collection guaranteed
Rachel Ott

Which of the following conditions occurring subsequent to the indorsements would discharge all of the indorsers?

(a) Lack of notice of dishonor
(b) Late presentment
(c) Insolvency of the maker
(d) Certification of the check

2. *CPA QUESTION* Which of the following actions does not discharge a prior party to a commercial instrument?
   (a) Good-faith payment or satisfaction of the instrument
   (b) Cancellation of that prior party's indorsement
   (c) The holder's oral renunciation of that prior party's liability
   (d) The holder's intentional destruction of the instrument

3. What is the difference between a co-maker and an accommodation party?
   (a) A co-maker is liable both to the holder and the other co-maker, while an accommodation party is liable only to the holder.
   (b) A co-maker is liable to subsequent indorsers, while an accommodation party is not.
   (c) A co-maker is liable only to the other co-maker, while the accommodation party is liable to the holder.
   (d) A co-maker is not liable once a bank certifies a check, while an accommodation party is still liable even after certification.

4. Karim writes a check to Lew but Karim's bank accidently refuses to pay the check, despite the fact that Karim's account has sufficient funds. As a result, Lew bounces many checks from his own account and has to pay substantial fees to his bank. Which of the following statements is true?
   (a) Lew can recover damages from both Karim and Karim's bank.
   (b) Lew can recover damages only from Karim.
   (c) Lew can recover damages only from Karim's bank.
   (d) Lew cannot recover any damages.

5. Nan forges Mina's name on a check to buy a television set from Costmart. The store deposits that check into its account at Bank, but Bank does not credit Costmart's account for the amount of the check. From whom can Costmart recover?
   (a) Nan
   (b) Mina
   (c) The bank
   (d) All of the above

Essay Questions

1. Regions Bank refused to lend money to ZLM, Inc. unless its owner, Stewart, signed the note as an accommodation party. He did, and, sadly, ZLM did not repay the loan. But because the note was due on February 16, which that year happened to be Mardi Gras Day (a major festival in Louisiana), the bank waited until the next day to declare the note in default. Stewart alleged that he was not liable on the note because the extension had discharged his liability. Do you agree?

2. Before Parris's lawsuit against Railroad had settled, he left town and closed out his account with Bank. Railroad then issued a check to him which somehow came to be in Eddy's possession.. Eddy indorsed the check "Railroad Eddy" and deposited it in his own account at Bank. Parris sued Bank, alleging that it was liable to him for having paid the check over an unauthorized indorsement. Is Bank liable to Parris? On what theory?

3. ***YOU BE THE JUDGE* WRITING PROBLEM** Melco, Inc., issued a promissory note for $12,000, payable to the order of Marjorie. On the back of the note, Charles had signed the following statement: "For and in consideration of funds advanced herein to Melco, Inc., we irrevocably guarantee Marjorie against loss by reason of non-payment of this note." After the instrument was overdue, Marjorie sued Charles to enforce the note before demanding payment from the issuer. Is Charles liable on the note before demand is made on the issuer? **Argument for Marjorie:** Charles was an accommodation party and, as such, was liable on the instrument even if no demand had been made on the issuer. **Argument for Charles:** If the accommodation party writes, "I guarantee collection," he is not liable until the issuer fails to pay. In this case, the words Charles wrote are the equivalent of "I guarantee collection." **Marjorie's response:** To avoid liability in this case, Charles had to comply with the exact requirements of the statute. How was she to know that he thought he was writing the equivalent of "I guarantee collection"?

4. Arnold and Palmer signed two promissory notes for a total of $25,000 payable to the Banking Co. The two men argued that they were not liable on the notes because they had signed as agents for Sunshine Sales. The notes made no reference to Sunshine, but the men alleged that an officer at Banking had promised to type "Sunshine Sales Corporation" above their signatures on the notes. Are the men liable on the notes?

5. Merlyn borrowed money from Finance Co. to buy equipment for his farm. He promised Finance that he would accept payment for his crops only with checks that named him and Finance as co-payees. This way, Merlyn could not cash the checks without Finance's indorsement. Merlyn sold corn to Farmer's Co-op, which paid by check made out to "Merlyn, Finance Co." When Merlyn deposited this check, the comma between Merlyn and Finance appeared as "or." Only Merlyn had indorsed the check. When Finance sued Bank for having paid this check, Bank in turn filed suit against Merlyn, demanding indemnification for Finance's claims. What claim did Bank make against Merlyn?

Discussion Questions

1. Recall the *Quimby* case. This type of fraud is increasingly common. What could Quimby have done to protect himself?

2. Using her company's check-signing machine, Doris forged $150,000 of checks on the account of her employer, Winkie, Inc. One of Doris's jobs at the company was to prepare checks for the company president, Willie, to sign. He did not (1) look at the sequence of check numbers; (2) examine the monthly account statements; or (3) reconcile company records with bank statements. Willie's bank, as a matter of policy, did not check indorsements on checks with a face value of less than $1,000. By accident, it paid a forged check that had not even been indorsed. Is the bank liable to Winkie, Inc., for the forged checks?

3. ***ETHICS*** When Steven was killed in an automobile accident, he left his wife, Debra, a life insurance policy for $60,000. She decided to move from Bunkie to Sulphur, Louisiana. Debra executed a document authorizing her mother-in-law, Helen, to sign checks on Debra's account at the bank. Debra also signed several blank checks and gave them to Helen with instructions to use them to pay off the remaining debt on Debra's trailer. When Helen received the life insurance checks, she deposited them in Debra's account. So far, so good. But then she immediately withdrew $50,000 from the account by using one of the blank checks Debra had left her. She did not use these funds to pay off the trailer debt. When Debra discovered the theft, she sued the bank for having paid an unauthorized check. How would you rule in this case? Debra has suffered a grievous loss—her husband died tragically in an automobile accident. She trusted her mother-in-law and counted on her help. Should the bank show compassion? If the bank made good on the forged checks, how great would be the injury to the bank's shareholders, compared with the harm to Debra if she loses this entire sum?

4. Banks are liable for forged checks except in the case of the three rules (Imposter Rule, Fictitious Payee Rule, and the Employee Indorsement Rule). Do you think this is the proper allocation of liability? Why, in this era of automated check machines, should banks be liable for forged checks? Alternatively, could you argue that the three rules provide too much protection to banks?

5. As the court discusses in the *Couchot* case, many accommodation parties and guarantors do not understand their liability when they sign an instrument. (As the saying goes, "Nothing is more dangerous than a fool with a pen.") Should the UCC require that some sort of disclosure be made to an accommodation party or guarantor before they sign, or that their obligations be clearly spelled out? What language would you require for a guaranty to be valid?

CHAPTER 27

ACCOUNTANTS' LIABILITY

© neelsky/Shutterstock.com

The accounting firm Arthur Andersen prided itself on its ethics. Old-timers would tell new recruits the legend of the firm's founder: how in 1914, the young Arthur Andersen had refused a client's request to certify a dubious earnings report. Although Andersen knew his firm would be fired, and he might not be able to meet payroll, he nonetheless stood on principle. He was vindicated a few months later when the client went bankrupt. This emphasis on ethics continued—the firm later established a program to train business school faculty to teach ethics. This was a company that walked the talk. Or so everyone thought.

The firm collapsed in disgrace, the first major accounting firm ever to be convicted of a crime.

The firm that began its life as the exemplar of ethical behavior, the firm whose audits were considered the gold standard in the industry, died ignominiously—convicted of obstructing a government investigation into the infamous Enron case.[1] How did this once noble firm go so wrong? And what lessons does this sad fable teach about the accounting profession?

For its first 35 years, Andersen was primarily in the business of auditing public companies. Although its partners did not become rich, they made a good living. In the 1960s, a typical Andersen partner made the equivalent of $160,000 a year in today's dollars. Then, one of the partners had a breakthrough, which at the time seemed marvelous but ultimately started the firm down a dangerous and slippery slope. This fellow figured out how to take one of those newfangled devices—a computer—out of the science lab and into the bookkeeping department. Soon, Andersen was earning huge profits advising companies on how to automate their bookkeeping.

[1]Enron is discussed at the beginning of Chapter 35. Although the Supreme Court overturned Andersen's conviction, the damage was already done. It was too late to resurrect the firm.

The technology consultants in the firm began generating much greater profits—and earning much higher salaries—than the auditors. Competition in the auditing field was driving income down anyway. Audits were fast becoming loss leaders to attract consulting business. Lower costs led to lower quality as Andersen (and other auditors) felt they could not afford to invest as many hours in their audits. And the audits were becoming less effective because partners were increasingly afraid to deliver bad news for fear of losing both audit and consulting fees.

Across the industry, major accounting firms earned only about one-quarter of their revenues from auditing; the rest came from consulting. Like its competitors, Andersen drove its auditors to bring in revenues from other sources such as tax advising or technology consulting. The firm began offering internal bookkeeping services to its audit clients—thereby creating a situation in which it was auditing itself. Audit partners who could not bring in enough revenue from other sources faced termination. The Andersen website described its mission as "Convergence: We help you navigate the forces of change." There was no mention of "We carefully audit your books."

To save money, the firm began to force partners to retire at 56. These actions drove salaries up, but reduced the general level of experience and expertise. At the same time, accounting was becoming more complicated.

Predictably, mistakes happened, lawsuits were filed, settlements were made. Andersen's pristine name was soiled by its role in financial disasters at Boston Market, Sunbeam, Waste Management, Global Crossing, and WorldCom. And then there was Enron. Andersen opened an office in Enron's headquarters staffed with more than 150 Andersen employees, who dressed like, acted like, and partied with Enron employees. In some cases, Enron failed to fix problems in its accounts, but Andersen certified them anyway. The company paid Andersen $23 million a year for auditing services and $29 million for its consulting advice.

When the federal government began investigating Enron's bankruptcy, panicked Andersen employees shredded documents, leading the government to file a criminal charge of obstructing justice. And so, the firm that began as a model of ethics in the accounting profession collapsed in disgrace, the first major accounting firm ever to be convicted of a crime.[2]

Worse was to come. As more accounting irregularities came to light involving other companies and other auditors, and as scores of major

[2]Based in part on information in Ken Brown and Ianthe Jeanne Dugan, "Andersen's Fall from Grace Is a Tale of Greed and Miscues," *Wall Street Journal*, June 7, 2002, p.1.

companies restated (i.e., lowered reports of) their earnings, investors doubted they could rely on public financial statements. The stock market went into a tailspin, losing 20 percent of its value in the month following the Andersen verdict.

INTRODUCTION

To begin our study of the accounting industry, it is important to understand what accountants do. Many of the cases in this chapter involve audits that went awry, so we start there.

Audits

Traditionally, auditors were primarily a watchdog for management, charged with detecting and anticipating financial problems. As the public ownership of stocks increased, however, investors began to need reliable financial information for evaluating their investments. Whereas the accountant had traditionally been a watchdog *for* management, investors needed a watchdog to keep an eye *on* management. Now, one of the accountant's most important roles is to serve as an independent evaluator of the financial statements issued by management to investors and creditors. The audit report of a CPA firm, particularly one of the Big Four,[3] is practically required as an admission ticket to the capital markets—investors will not put up their money without it. In a very real sense, accountants serve two masters—company management and the investing public. It is sometimes difficult for auditing firms to forget, however, that of the two masters, management pays the fees.

When conducting an audit, accountants verify information provided by management. Since it is impossible to check each and every transaction, they verify a sample of various types of transactions. If these are accurate, they assume all are. To verify transactions, accountants use two mirror image processes—vouching and tracing. In **vouching**, they choose a transaction listed in the company's books and check backwards to make sure that there are original data to support it. They might, for example, find in accounts payable a bill for the purchase of 1,000 reams of photocopy paper. They would check to ensure that all the paper had actually arrived and that the receiving department had properly signed and dated the invoice. The auditors would also check the original purchase order to ensure the acquisition was properly authorized in the first place. In **tracing**, the accountant begins with an item of original data and traces it forward to ensure that it has been properly recorded throughout the bookkeeping process. For example, the sales ledger might report that 1,000 copies of a software program were sold to a distributor. The accountant checks the information in the sales ledger against the original invoice to ensure that the date, price, quantity, and customer's name all match. The auditor then verifies each step along the paper trail until the software leaves the warehouse.

Vouching
An auditor chooses a transaction listed in a company's books and checks backwards for original data to support it.

Tracing
An auditor takes an item of original data and tracks it forward to ensure that it has been properly recorded throughout the bookkeeping process.

Since accountants do not check every transaction, the process of selecting those items to verify requires skill and experience. Auditors must continually modify their original plan to reflect discoveries they make during the audit. If they find that one aspect of the company's accounting system seems weak, they need to check those results more carefully.

In performing their duties, accountants must follow two sets of rules: (1) generally accepted accounting principles **(GAAP)** and (2) generally accepted auditing standards **(GAAS)**. GAAP are the rules for preparing financial statements, and GAAS are the rules for conducting audits. These two sets of standards include broadly phrased general principles

GAAP
"Generally accepted accounting principles," these are the rules for preparing financial statements.

GAAS
"Generally accepted auditing standards," these are the rules for conducting audits.

[3] The Big Four are Deloitte Touche Tohmatsu, Ernst & Young, KPMG, and PricewaterhouseCoopers.

as well as specific guidelines and illustrations. The application and interpretation of these rules require acute professional skill.

The Securities and Exchange Commission (SEC) has proposed a set of rules that would ultimately require U.S. companies to use **international financial reporting standards (IFRS)** instead of GAAP.[4] As businesses become more international, there is something to be said for a worldwide, consistent set of accounting rules. If everyone used IFRS (as more than 100 countries now do), cross-country comparisons would be easier. For instance, IFRS and GAAP treat research and development costs differently, which affects a company's operating income and net profit. It may be, too, that foreign companies would be more willing to invest in the United States if they could use international accounting rules. Accounting firms have urged adoption of IFRS in the United States.

IFRS
"International financial reporting standards," a set of international standards being proposed for U.S. companies to follow.

The downside? In general, some of the IRFS standards are less detailed; for example, they provide less direction about the way in which companies report earnings. Generally, earnings under IFRS are 6 to 8 percent higher than under GAAP. In particular, GAAP and IFRS take different approaches to valuing financial assets. GAAP regulators prefer so-called *marked to market* valuations, meaning that these assets are reported at fair market value. IFRS supports greater flexibility on this issue. Because IFRS rules generally offer more flexibility, some commentators worry that cross-company comparisons will be *more* difficult because observers will not know how each company interpreted the guidelines. Some experts worry that allowing the use of IFRS is the equivalent of outsourcing financial safety standards. Also, companies must report financial information to other places besides the SEC—to parties with whom they have contracted, such as banks and other regulators. Unless everyone accepts IFRS, companies could end up having to prepare two sets of financials.

Opinions

After an audit is complete, the accountant issues an opinion that indicates how accurately the financial statements reflect the company's true financial condition. The auditor has four choices:

- **Unqualified opinion.** Also known as a **clean** opinion, this is the most favorable report an auditor can give. It indicates that the company's financial statements fairly present its financial condition in accordance with GAAP. A less-than-clean opinion is a warning to potential investors and creditors that something may be wrong.
- **Qualified opinion.** This opinion indicates that although the financial statements are generally accurate, there is nonetheless an outstanding, unresolved issue. This may be a violation of GAAP or perhaps some important issue whose ultimate impact is uncertain. For example, the company may face potential liability from environmental law violations but the liability cannot yet be accurately estimated. Depending upon the reason for the qualification, this type of opinion does not necessarily prevent a company from borrowing money or selling stock.
- **Adverse opinion.** This opinion is definitely bad news. In the auditor's view, the company's financial statements do not accurately reflect its financial position. In other words, the company is lying about its finances (or to put it more politely, is "materially misstating certain items on its financial statements"). A company with an adverse opinion is generally unable to sell stock or borrow money.
- **Disclaimer of opinion.** Although not as damning as an adverse opinion, a disclaimer is still not good news. It is issued when the auditor does not have enough information to form an opinion. If the auditor knows that the statements are inaccurate, she cannot hide behind a disclaimer of opinion; she must issue an adverse opinion.

[4]IFRS are established by the International Accounting Standards Board, a privately funded organization located in London.

Congress Responds to Enron: Sarbanes-Oxley

As the stock market tumbled after the Andersen verdict, Congress acted to restore investor confidence by passing the Sarbanes-Oxley Act of 2002 (SOX). The major provisions of this act as it relates to auditors are as follows.

The Public Company Accounting Oversight Board

Congress established the **Public Company Accounting Oversight Board** (PCAOB) to ensure that investors receive accurate and complete financial information. The board has the authority to regulate public accounting firms, establishing everything from audit rules to ethics guidelines. All accounting firms that audit public companies must register with the board, and the board must inspect them regularly. The PCAOB has the authority to revoke an accounting firm's registration or prohibit it from auditing public companies.

In an effort to keep the foxes out of the henhouse, the statute provides that no more than two of the five PCAOB board members may be certified public accountants. This board has the authority and, it is hoped, will have the political will to revise lax accounting rules that contributed to the Enron financial earthquake. The PCAOB's first inspection of the Big Four accounting firms found audit and accounting problems at all of them but the board still expressed confidence in the general quality of their work.

Reports to Audit Committee

Traditionally, auditors reported to the senior management of a client. This reporting relationship created obvious conflicts of interest—the auditors were reporting concerns to the very people who could be causing, or at least benefiting from, these problems. Under SOX, auditors must report to the audit committee of the client's board of directors, not to senior management. The accountants must inform the audit committee of any: (1) significant flaws they find in the company's internal controls; (2) alternative options that the firm considered in preparing the financial statements; and (3) accounting disagreements with management.

Consulting Services

As we saw in the chapter opening, Enron paid Arthur Andersen more for its consulting services than for its auditing efforts. SOX prohibits accounting firms that audit public companies from providing consulting services to those clients on topics such as bookkeeping, financial information systems, human resources, and legal issues (unrelated to the audit). Any consulting agreements must be approved by a client's audit committee. Auditing firms cannot base their employees' compensation on sales of consulting services to clients. Some observers argue that these conflict of interest rules are too lenient—that auditors should do nothing but audit. They argue that even providing advice on taxes or internal control systems, as SOX permits, could warp an accountant's objectivity about auditing issues. Also, SOX rules on these issues apply only in the United States. Globally, the Big Four earn between a sixth and a quarter of their income from consulting.

Even with existing rules, some large companies are finding compliance with this SOX provision difficult. Sun Microsystems, for instance, has used all the Big Four firms: KPMG (internal controls); Deloitte Touche Tohmatsu (tax); PricewaterhouseCoopers (internal audits), and Ernst & Young (external audits).[5]

---

[5] "The future of auditing," *The Economist*, November 20, 2004, p. 71; and "A conflict of interest?" *The Economist*, October 16, 2010, p. 81.

Conflicts of Interest

An accounting firm cannot audit a company if one of the client's top officers has worked for that accounting firm within the prior year and was involved in the company's audit. In short, a client cannot hire one of its auditors to ensure a friendly attitude.

Term Limits on Audit Partners

After five years with a client, the lead audit partner must rotate off the account for at least five years. Other partners must rotate off an account every seven years for at least two years.

Consolidation in the Accounting Profession

Congress noted that since 1989, the Big Eight accounting firms had become the Big Four (sometimes called the Final Four). It ordered the Government Accountability Office (GAO) to prepare a study on the factors that have caused this consolidation, the potential impact, and possible methods for increasing competition within the industry.

In its study, the GAO found that the accounting industry is so concentrated that the largest firms do, in theory, have substantial market power. The Big Four audit 97 percent of all public companies in the United States that have sales over $250 million. However, the GAO did not find any evidence of collusion among the top firms. Nor was there conclusive evidence that consolidation had led to an increase in audit fees or a decline in quality or independence. However, smaller audit firms face substantial barriers to entry, so that it seems unlikely that the Big Four will increase in number.

The GAO concluded with a warning that further consolidation would be harmful and additional study was warranted. Ten months after this report was released, Ernst & Young was banned for six months from accepting any new audit clients in the United States. The firm was being punished for violating rules on auditor independence by entering into business with a client to sell both consulting and tax services.

Liability to Clients

When financial matters go wrong, as they sometimes do, clients are tempted to sue their accountants, who often have deep pockets. While some lawsuits filed against large firms are frivolous, this section discusses the bases for legitimate litigation.

Contract

Contracts between accountants and their clients are either written or oral. A written contract is often called an **engagement letter**. The contract has both express and implied terms. The accountant *expressly* promises to perform a particular project by a given date. The accountant also *implies* that she will work as carefully as an ordinarily prudent accountant would under the circumstances. When an accountant enters into a contract to prepare, say, tax returns, she is making two promises—to complete the returns on time and to prepare them accurately. If she fails to do either, she has breached her contract and may be liable for any damages that result.

Engagement letter
A written contract by which a client hires an accountant.

Negligence

An accountant is liable for negligence to a client who can prove both of the following elements:

- **The accountant breached his duty to his client by failing to exercise the degree of skill and competence that an ordinarily prudent accountant would under the circumstances.** For example, if the accountant fails to follow GAAP or GAAS, he has almost certainly breached his duty. But the reverse is not true—compliance with GAAP and GAAS does not necessarily protect an accountant from liability.

- **The accountant's violation of duty caused harm to the client.** To recover damages, the client must be able to show that the accountant's misdeeds injured her.

In the following case, the accounting firm was clearly negligent. But had its wrongdoing actually caused harm to the client?

Oregon Steel Mills, Inc. v. Coopers & Lybrand, LLP

336 Ore. 329, 83 P.3d 322, 2004 Ore. LEXIS 55
Supreme Court of Oregon, 2004

Facts: Oregon Steel Mills, Inc., was a publicly traded company whose financial statements were audited by Coopers & Lybrand, LLP, for many years. When Oregon sold the stock in one of its subsidiaries, Coopers advised Oregon that the transaction should be reported as a $12.3 million gain. This advice was wrong, and Coopers was negligent in giving it.

Two years later, Oregon began a public offering of additional shares of stock. It intended to sell these shares to the public around May 2. Shortly before Oregon filed the stock offering with the SEC, it found out from Coopers that the sale of its subsidiary had been misreported and that it would have to revise its financial statements. As a result, the offering was delayed from May 2 to June 13. During this period of delay, the price of the stock fell from $16 to $13.50.

Oregon filed suit against Coopers, seeking as damages the difference between what Oregon actually received for its stock and what it would have received if the offering had occurred on May 2, an amount equal to approximately $35 million.

The trial court granted Coopers motion for summary judgment, but the court of appeals reversed. Coopers appealed.

Issue: ***Did Coopers' negligence cause the loss to Oregon?***

Excerpts from Justice Balmer's Decision:[6] [T]he critical issue is whether Oregon's market losses were a reasonably foreseeable result of Coopers' wrongful conduct. [N]o one could foresee, at the time of Coopers' accounting errors, the risk that Oregon would suffer a loss because its securities would be sold at market-determined prices on June 13, rather than on May 2.

Oregon argues that it is foreseeable that stock prices will fluctuate, and that is certainly true. It also is foreseeable that negligent conduct by an accounting firm may harm a client by impairing its ability to raise capital. Coopers' conduct caused the delay in the offering that led to an unintended adverse result. However, the intervening action of market forces on the price of Oregon's stock was the harm-producing force, and Coopers' actions did not cause the decline in the stock price so as to support liability for that decline. As a matter of law, the risk of a decline in Oregon's stock price in June was not a reasonably foreseeable consequence of Coopers' negligent acts.

Oregon argues that the losses in this case were foreseeable because Coopers knew that Oregon intended to enter the market and sell its securities at a specific and favorable time. However, the record does not support Oregon's assertion. First, Oregon's complaint does not allege that the securities offering was scheduled to occur at a specific, advantageous time. Although Coopers knew that Oregon

Was Coopers liable when Oregon Steel Mills got burned in the stock market?

[6] For readability, we have changed "defendant" and "plaintiff" to "Coopers" and "Oregon."

contemplated a public offering at some point, the timing of that offering was known only in the most general sense at the time of Coopers' wrongful conduct. Nor does the record contain any other suggestion by Oregon that it expected that market conditions would be favorable at the time the offering was originally planned, why those conditions were favorable, or why conditions would be any less favorable six weeks later. On the contrary, the uncontroverted evidence in the record shows that the increase and then decrease in steel company stock prices, including Oregon's, between April and June was due to market forces unrelated to Oregon's financial condition or to Coopers' conduct.

For the reasons discussed above, we conclude that, although Coopers breached its duty to Oregon by failing to provide competent accounting services, Coopers had no duty to protect Oregon against market fluctuations in Oregon's stock price. The trial court correctly granted Coopers' motion for summary judgment.

Common-law Fraud

An accountant is liable for fraud if (1) she makes a false statement of a material fact, (2) she either knows it is not true or recklessly disregards the truth, (3) the client justifiably relies on the statement, and (4) the reliance results in damages. For example, William deliberately inflated numbers in the financial statements he prepared for Tess so that she would not discover that he had made some disastrous investments for her. Because of these distortions, Tess did not realize her true financial position for some years. William committed fraud.

A fraud claim is an important weapon because it permits the client to ask for punitive damages. In negligence or contract cases, a client is typically entitled only to compensatory damages. Punitive damages can be several times higher than a compensatory claim.

Breach of Trust

Accountants occupy a position of enormous trust because financial information is often sensitive and confidential. Clients may put as much trust in their accountants as they do in their lawyers, clergy, or psychiatrists. **Accountants have a legal obligation to (1) keep all client information confidential and (2) use client information only for the benefit of the client.** For example, Alexander Grant & Co. did accounting work for Consolidata Services, Inc. (CDS), a company that provided payroll services. The two firms had a number of clients in common. When Alexander Grant discovered discrepancies in CDS's client funds accounts, it notified those companies that were clients of both firms. Not surprisingly, these mutual clients fired CDS, which then went out of business. The court held that Alexander Grant had violated its duty of trust to CDS.[7]

Clients may put as much trust in their accountants as they do in their lawyers, clergy, or psychiatrists.

Fiduciary Duty

In a **fiduciary relationship**, one party has an obligation (1) to act in a trustworthy fashion for the benefit of the other person and (2) to put that person's interests first. As a general rule, accountants do *not* have a fiduciary duty to their clients. However, clients often do put great faith in their accountants, and sometimes accountants take on responsibilities that extend beyond the typical scope of an accountant-client relationship. As the following case illustrates, in such situations, accountants may be deemed a fiduciary and held to a high standard of accountability.

---

[7]*Wagenheim v. Alexander Grant & Co.*, 19 Ohio App. 3d 7, 482 N.E.2d 955, 1983 Ohio App. LEXIS 11194 (App. Ct. Ohio 1983).

LEBER V. KONIGSBERG

2010 U.S. Dist. Lexis 128910
United States District Court for the Southern District of Florida, 2010

Facts: Steven Leber (Leber) was the trustee of the Steven E. Leber Charitable Remainder Unitrust (Trust) which, at its peak, had assets of $4 million. The defendant, Paul Konigsberg (Konigsberg), was a certified public accountant and the named partner of Konigsberg Wolf & Co., P.C. (the firm).

Leber invested all of the Trust's assets with Bernard Madoff (Madoff), who, it turns out, was running a $65 billion Ponzi scheme.[8] Ultimately, Madoff's sons revealed the fraud, and investors around the world learned that all of their investments were gone. [A trustee has been appointed to recover assets, but that process will be long and the results uncertain.]

Leber alleges that he made this disastrous investment on the advice of Konisberg, who not only recommended Madoff but promised that he would personally supervise, monitor, and provide due diligence for the Trust's account with Madoff.

Leber filed suit against Konigsberg and the firm on the grounds that they breached their fiduciary duty to him and the Trust. He sought payment of $4 million. Defendants filed a motion for summary judgment, alleging that accountants do not owe their clients a fiduciary duty.

Issue: ***Do accountants owe a fiduciary duty to their clients?***

Excerpts from Judge Marra's Decision: Defendants assert that under New York law, accountants do not owe fiduciary duties to their clients. Defendants' contention is generally true ("general rule").

A fiduciary relationship arises when one has reposed trust or confidence in the integrity or fidelity of another who thereby gains a resulting superiority of influence over the first, or when one assumes control and responsibility over another.

Leber avers [that] Konigsberg talked about how he and his firm provided financial advisory services and helped place clients in certain investments. Konigsberg advised that he thought that as a result of his role as a financial advisor to the [Trust,] that it was expected that the [Trust] would retain Konigsberg Wolf as its tax accountants as well. Konigsberg indicated that [Leber] must hire Konigsberg Wolf in order to get the proper analysis of the Madoff account of the [Trust] and that if this was done, [their] relationship could continue. It was clear that if [Leber] didn't hire Konigsberg Wolf, that Konigsberg would no longer be the [Trust's] financial advisor and that the [Trust's] account at Madoff would be jeopardized. [Konigsberg's bills indicated] that he was charging not only for "tax analysis" but also for analysis of the monthly reports of Madoff for the [Trust].

Under circumstances such as those listed above, a breach of fiduciary duty claim against an accountant pursuant to New York law may proceed. [An accountant] may be found to have assumed additional duties of care when acting as a financial advisor. [In a prior case,] the plaintiff sufficiently stated a cause of action for breach of fiduciary duty where it was alleged that plaintiff had placed total trust and reliance upon an accountant's investment advice, and that the accountant concealed pertinent information about those investments, such as the nature of the risk involved.

As a result, summary judgment on Leber's claims against Defendants for breach of fiduciary duty cannot be granted.

EXAM Strategy

Question: Zapper, Inc. hired the accounting firm PriceTouche to determine if constructing an apartment building was financially feasible. After PriceTouche determined that the building would be profitable, Zapper started construction. Before

[8]In a Ponzi scheme, the fraudster uses money from new investors to pay large returns to prior victims. The scheme can be very profitable for all involved until the fraudster runs out of new "investors." Indeed, investors often attract new victims for the fraudster by bragging about their incredible returns (which are, indeed, incredible). For years, Madoff had been well known in the investment community as someone who earned implausibly steady returns, no matter the market conditions.

the structure was complete, it burned to the ground. Although Zapper rebuilt it, the apartment building turned out not to be profitable, at least in part because of the delay in construction. Is PriceTouche liable to Zapper?

Strategy: There are four potential bases for liability—contract, negligence, breach of trust, and violation of a fiduciary duty. Which apply here?

Result: If PriceTouche did not perform as carefully as an ordinarily prudent accountant would under the circumstances, then it has violated its contract with Zapper and would be liable under contract law. It would also be negligent. But it would be liable only if its negligence caused the harm. It might be that the apartment building was not profitable because it burned down during construction. If this is the case, PriceTouche would not be liable for negligence. There is no breach of trust because it has not violated client confidentiality. It has not violated a fiduciary duty because there was no evidence that PriceTouche gave bad advice or that Zapper had placed particular trust in PriceTouche's advice.

Liability to Third Parties

Suppose that a professional basketball team signs a star college player to a three-year contract. A leading cardiologist examines the player and pronounces him "in perfect health." Relying on this assertion, you purchase stock in the team. Unfortunately, the cardiologist is wrong, and the player collapses in his first pro game. His career is over, and the team's future is bleak. The value of your stock plummets. Although you feel the doctor has singlehandedly wiped out your investment, you cannot recover from him because he owes you no duty.

Suppose, on the other hand, that you had purchased stock in the team because you were impressed with its financial prospects as revealed in its audited financial statements. Unfortunately, the auditors had failed to detect that the company had overstated its income. The value of the stock dives when the mistake comes to light. You may be able to recover from the auditors. Why are accountants different from doctors or other professionals?

No issue in the accounting field is more controversial than liability to third parties. Plaintiffs argue that auditors owe a duty to a trusting public that doctors (and other professionals) do not. The job of the auditor, they say, is to provide an independent, professional source of assurance that a company's audited financial statements are accurate. If the auditors do their job properly, they have nothing to fear.

The accounting profession rebuts, however, that if everyone who has ever been harmed even remotely by a faulty audit can recover damages, there will soon be no auditors left. In return for a limited fee on the upside, auditors face potentially unlimited liability when things go wrong. Big Four firms spend between 10 and 20 percent of their revenues on litigation (including settlements and insurance).

One observation before beginning: accountants are generally not liable to third parties in *contract* because there is no *privity of contract* between the parties.[9] Most third parties are incidental beneficiaries who are not entitled to enforce a contract. (We discuss third-party beneficiaries in Chapter 16.)

[9]Two parties are in "privity of contract" if they have entered into a contract with each other. If two parties enter into a contract that affects a third party, that third party is not in privity.

Negligence

Accountants' liability for negligence to third parties is determined by state law. Most states follow one of the following rules: the *Ultramares* doctrine, the foreseeable doctrine, or the Restatement doctrine.

Ultramares *Doctrine*

Fred Stern & Co. asked the Ultramares Corp. for a loan to finance its rubber imports. As a condition of any loans, Ultramares insisted upon an audited balance sheet. The auditors, Touche, Niven, & Co., were never told exactly who would see the financial statements, but they knew a number of potential creditors might. On the basis of a balance sheet listing a net worth of $1 million, Ultramares loaned money to Stern. In reality, however, management had falsified the books and the company was insolvent. The auditors failed to follow paper trails leading to "off-the-books" transactions that, if properly analyzed, would have revealed the company's insolvency. When Stern failed to repay the loans, Ultramares sued Touche for negligence. The jury awarded Ultramares $187,576.32. (The case was decided in 1931, at the height of the Great Depression. That was real money.)

In an opinion written by Benjamin Cardozo, the appeals court in New York overturned the jury's verdict. If third parties were able to recover for negligence against an accounting firm, then "[a] thoughtless slip or blunder, the failure to detect a theft or forgery beneath the cover of deceptive entries, may expose accountants to a liability in an indeterminate amount for an indeterminate time to an indeterminate class." Cardozo thought this hazard too extreme. **Under the *Ultramares* doctrine, accountants who fail to exercise due care are liable to a third party only if they know that the third party (1) will see their work product and (2) will rely on the work product for a particular, known purpose.** To be liable, the accountants must know the identity of the third party.[10]

Consider an example of a later case in which a court found an accountant liable under the *Ultramares* doctrine: a limited partner sued an accountant who failed to disclose in an audit report that the general partners were withdrawing funds in violation of the partnership agreement. The limited partnership agreement contained an express provision requiring an annual audit by a CPA, and the auditor had also prepared the partnership's tax returns on which the limited partners relied in preparing their personal returns. The accountant knew that his work product would be shown to the limited partners, and he knew their identity.[11]

Foreseeable Doctrine

The courts in a limited number of states have held that accountants are liable to any *foreseeable* users who suffer harm as a result of their carelessness. For example, Harry and Barry (we are not making this up) Rosenblum sold their business to Giant Stores Corp. in return for Giant common stock. In assessing the value of this stock, the two men relied on an audit by Touche Ross & Co. (which had the bad luck to be the accounting firm in the landmark cases that established both the *Ultramares* doctrine and the foreseeable doctrine). You will not be surprised to learn that Giant's financial statements turned out to be fraudulent and the stock worthless. Giant had manipulated its books by falsely recording assets that it did not own and omitting substantial amounts of accounts payable. **The court held that an accountant who fails to exercise due care is liable to a third party if (1) it was foreseeable that the third party would receive financial statements from the accountant's**

---

[10] *Ultramares Corp. v. Touche*, 255 N.Y. 170, 174 N.E. 441, 1931 N.Y. LEXIS 660 (1931). Cardozo later served on the Supreme Court.

[11] *White v. Guarente*, 43 N.Y.2d 356, 372 N.E.2d 315, 1977 N.Y. LEXIS 2470 (1977).

client, and (2) the third party relied on these statements.[12] This standard creates greater liability for accountants than the *Ultramares* doctrine.

Restatement Doctrine

The majority of state courts have rejected the *Ultramares* doctrine as too narrow and the foreseeable doctrine as too broad. They prefer, instead, a middle ground that was adopted by the Restatement (Second) of Torts.[13] **According to the Restatement doctrine, accountants who fail to exercise due care are liable to (1) anyone they knew would rely on the information and (2) anyone else in the same class.**

Suppose, for example, that Adrienne knows she is preparing financial statements for the BeachBall Corp. to use in obtaining a bank loan from the First National Bank of Tucson. If Adrienne is careless in preparing the statements and BeachBall bursts, she will be liable to First Bank *under all three tests:* the *Ultramares* doctrine, the foreseeable doctrine, and the Restatement doctrine.

Suppose, however, that the company takes its financial statements to the Last National Bank of Tucson instead. Under the *Ultramares* doctrine, Adrienne would not be liable because she did not prepare the documents for the Last Bank. She would be liable under the foreseeable doctrine because it was foreseeable that the Last Bank would receive the financial statements from the client and rely on them. She would also be liable under the Restatement doctrine because the Last Bank is in the *same class* as the First Bank. Once Adrienne knows that a bank will rely on the statements she has prepared, the identity of the particular bank should not make any difference to her when doing her work.

Suppose that BeachBall uses the financial statements to persuade a landlord to rent it a manufacturing facility. In this case, Adrienne would be liable under the foreseeable doctrine because this was a foreseeable use of the financial statements. She would not be liable under the Restatement doctrine, however, because the landlord is not in the same class as the First Bank, for whom Adrienne knew she was preparing the documents. Finally, if a major shareholder of BeachBall uses the financial statements to convince her boyfriend to marry her, Adrienne is not liable under any doctrine. The following table summarizes the three doctrines:

Under this doctrine:	**Accountants who fail to exercise due care are liable to a third party if:**
Ultramares Doctrine	They know the identity of the third party who: • Will see their work product, and • Will rely on the work product for a particular, known purpose
Foreseeable Doctrine	• It is foreseeable that the third party will receive financial statements from the accountant's client, and • The third party relies on these statements
Restatement Doctrine	• The accountants knew the third party would rely on the information, or • The third party was in the same class as someone who the accountant knew would rely on the information

[12] *H. Rosenblum, Inc. v. Adler,* 93 N.J. 324, 461 A.2d 138, 1983 N.J. LEXIS 2717 (N.J. 1983).

[13] The American Law Institute, an organization of legal scholars, prepares the Restatement of Torts (and other restatements). It is not a statute, but a summary of the common law that courts often rely on.

In the following case, a potential employee relied on audited financial statements that proved to be faulty. Was the accounting firm liable?

Gary Ellis v. Grant Thornton

2008 U.S. App. LEXIS 13379
United States Court of Appeals for the Fourth Circuit, 2008

Facts: For five years, the First National Bank of Keystone issued a lot of risky mortgage loans on which the borrowers defaulted. Keystone management turned bad into worse by lying about the value of the loans. When the Office of the Comptroller of the Currency (OCC) first began to smell trouble, it required Keystone to hire a nationally recognized independent accounting firm to audit its books. The bank hired Grant Thornton. Stan Quay was the lead partner on the account. On a theory of what can go wrong will go wrong, he was negligent in conducting the audit and failed to notice a discrepancy of $515 million between the reported and actual value of the loans.

As Quay was finishing his audit, the board began talking with Gary Ellis about becoming president of the bank. Ellis already had a perfectly good job, so he was understandably reluctant to move to a bank that the OCC was investigating. To reassure him, the Keystone board suggested he talk with Quay and look at the bank's financials. Quay told Ellis that Keystone would receive a clean, unqualified opinion. Ellis attended a shareholders' meeting that month at which Quay announced that his opinion would be unqualified.

Quay did ultimately issue a clean opinion reporting shareholders' equity of $184 million when, in fact, the bank was insolvent. The first page of the report stated: "This report is intended for the information and use of the Board of Directors and Management of The First National Bank of Keystone and its regulatory agencies and should not be used by third parties for any other purpose." A week later, the Board voted to hire Ellis, who then quit his job elsewhere to join Keystone. Five months later, the OCC declared Keystone insolvent and shut it down. Ellis was out of work. He filed suit against Grant Thornton, seeking compensation for his lost wages. The district court ruled in favor of Ellis and granted him $2,419,233 in damages. Grant Thornton appealed.

Issue: ***Was Grant Thornton liable to Ellis for its negligence in preparing Keystone's financial statements?***

Excerpts from Judge Hamilton's Decision: [Under] the Restatement approach, a finding of liability requires the injured party to prove (1) inaccurate information, (2) negligently supplied, (3) in the course of an accountant's professional endeavors, (4) to a third person or limited group of third persons for whose benefit and guidance the accountant actually intends or knows will receive the information, (5) for a transaction (or for a substantially similar transaction) that the accountant actually intends to influence or knows that the recipient so intends, (6) with the result that the third party justifiably relies on such misinformation to his detriment.

With regard to the fourth element, it is clear that Ellis failed to show that Grant Thornton knew (or intended) that potential employees, like Ellis, were intended to receive the audit report for their benefit and guidance. The audit report plainly states that the audit report was *not* intended for use by third parties. Rather, the audit report was prepared for the benefit of Keystone and the OCC. Thus, Ellis, or any other potential employee, was not a member of any limited group of persons for whose benefit the audit report was prepared.

Perhaps recognizing the tenuousness of relying on the audit report itself, Ellis relies heavily on Quay's statements indicating that Grant Thornton was going to give Keystone a clean audit opinion. Of course, reliance on Quay's statements improves the position of Ellis, as Quay's statements did not include a disclaimer. However, the Restatement approach instructs that we should assess cases in light of the ordinary practices and attitudes of the business world. Viewed in this light, it is clear that Grant Thornton was not hired to go over with each potential employee the soundness of Keystone's financial condition. Grant Thornton was not aware of the existence of the potential employment transaction between Ellis and Keystone until *after* Grant Thornton reached its decision to give Keystone a clean audit opinion. If the scope of the audit involved potential employees, one would expect at least some knowledge on the part of Grant Thornton *before* they formed their audit opinion.

If the accountant is unaware of a potential risk, then liability cannot attach. To the extent that Ellis relied on Quay's statements, it cannot be said that Grant Thornton was assuming the risk of being liable for Ellis' future lost earnings. [W]hen the character of the transaction materially changes, there is no liability.

For the reasons stated herein, the judgment of the district court is reversed.

EXAM Strategy

Question: Tara bought stock in Flying Feet. In doing so, she relied on financial statements prepared by YoungPrice. The accounting firm was negligent and Flying Feet crashed into bankruptcy. Can Tara recover from Young?

Strategy: The answer depends on which standard the court applies.

Result: Young would not be liable under the *Ultramares* doctrine because Young did not know Tara. It could certainly foresee that investors would rely on the financial statements, so it would be liable under the foreseeable doctrine. Young would not be liable to Tara under the Restatement doctrine because it did not know that Tara would rely and she was not in the same class as someone who Young knew would rely. The statements were prepared for the company, not for Tara.

Fraud

Under common law, courts consider fraud to be much worse than negligence because it is intentional. Therefore, the penalty is heavier. **An accountant who commits fraud is liable to any *foreseeable* user of the work product who justifiably relied on it.** This rule applies in all jurisdictions, even those that have adopted the *Ultramares* doctrine. For example, consider TechDisk, a manufacturer of disk drives. Customers were buying disk drives faster than the company could make them. Afraid that the stock price would plummet if investors found out about the shortage, company officers helped their sales numbers by shipping out bricks wrapped up to look like disk drives. Company accountants altered the financial statements to pretend that the bricks were indeed computer parts. These accountants would be liable to any foreseeable users—including investors, creditors, and customers.

Liability for Qualified Opinions

Auditors can, under some circumstances, protect themselves from liability by issuing a less than clean opinion; that is, a qualified adverse or disclaimer of opinion. To avoid liability, the less- than-clean opinion must be issued for the right reasons. For example, if the auditor indicates that it has issued a qualified opinion because of uncertainty about environmental litigation, then it is not liable when that lawsuit bankrupts the company. But if the company runs into financial trouble because of some other problem that the auditors should have discovered, they are liable, despite their qualified opinion. For example, if the company survives its environmental lawsuit unscathed but runs into trouble because of inventory thefts that the auditors should have caught, the auditors would be liable.

Securities Act of 1933

Third parties who have been injured by an accountant's error often file suit under the securities laws. Chapter 36, on securities regulation, provides a general overview of the liability provisions for both the Securities Act of 1933 (1933 Act) and the Securities Exchange Act of 1934 (1934 Act). This chapter offers a summary of these liability provisions as they affect accountants.

The 1933 Act requires an issuer to register securities before offering them for sale to the public. To do this, the issuer files a registration statement with the SEC. This registration statement must include audited financial statements. **Under §11 of the 1933 Act, auditors are liable for any material misstatement or omission in the financial statements that they prepare for a registration statement.**

To prevail under §11, the plaintiff must prove only that (1) the registration statement contained a material misstatement or omission and (2) she lost money. Ernst & Young served as the auditor for FP Investments, Inc., a company that sold interests in tax shelter partnerships. These partnerships were formed to cultivate tropical plants in Hawaii. The prospectus for this investment neglected to mention that the partnerships did not have enough cash on hand to grow the plants. A jury found that Ernst & Young violated §11 and awarded damages of $18.9 million to the investors.[14]

However, auditors can avoid liability under §11 by showing that they made a reasonable investigation of the financial statements and had reasonable grounds to believe the statements did not contain material omissions or misstatements. This investigation is called **due diligence**. Typically, auditors will not be liable if they can show that they complied with GAAP and GAAS.

Due diligence
An investigation of a registration statement.

In the following case, auditors certified inaccurate financial statements. Are they liable to investors who purchased stock in the company?

[14]*Hayes v. Haushalter*, 1994 U.S. App. LEXIS 23608 (9th Cir. 1994).

You be the Judge

Amorosa v. Ernst & Young LLP

672 F. Supp. 2d 493; 2009 U.S. Dist. LEXIS 112633
United States District Court for the Southern District of New York, 2009

Facts: When America Online, Inc. (AOL), announced its merger with Time Warner, Inc., Dominic Amorosa bought stock in AOL. After the merger, he exchanged his shares in AOL for stock in AOL Time Warner (AOLTW). Ernst & Young (EY) was the auditor for all three companies and certified the financial statements that were used in the merger.

Within a year, newspaper articles began to appear that expressed doubts about the company's financial health and business model (the "first newspaper articles"). After each of these articles, the price of AOLTW stock declined. Then, a year and a half after the merger, the *Washington Post* published an article exposing widespread fraud at AOL and AOLTW (the "WP article"). After this article, the share price of AOLTW rose. Ultimately, AOLTW filed three restatements of its financial statements with the SEC.

Amorosa filed suit against EY, alleging that it had violated §11 of the 1933 Act when it issued audited financial statements at the time of the merger. According to Amorosa, EY knew that AOL was using non-GAAP accounting methods to book revenues fraudulently and conceal losses.

You Be the Judge: ***Is EY liable to Amorosa for the misstatements in AOL's financial statements?***

Argument for Amorosa: EY is liable to Amorosa for three reasons:

1. The financial statements that EY certified as part of the AOLTW merger contained material misstatements. Without those financial statements, Amorosa would never have purchased stock in AOL, and indeed, the merger would never have taken place.

2. The stock price went down, causing Amorosa to lose money.

3. To win a suit under §11, Amorosa does not have to prove that EY's misbehavior caused his loss; he just has to show that there were material misstatements and/or omissions in the financial statements and that he suffered a loss. By making restatements, the company has admitted that its financial statements were flawed.

Argument for EY: Amorosa is right that he does not have to prove that EY's error *caused* his loss. However, he does have to show that he suffered a loss and that there was some connection between EY's wrongdoing and his loss. Accountants cannot be held liable every time a company makes bad business decisions. The fact that the stock price dropped after the appearance of the first newspaper articles, without more information, does not prove that EY's negligence in certifying the *merger financial statements*

had any relationship with the drop, especially where these articles made no mention of EY or its audit. The articles were simply reporting on the current business situation.

It was not until the WP article was published that issues involving AOL's financial statements became public. But Amorosa incurred all of his losses before the WP article. Indeed, the stock price went *up* after that article. Amorosa has not shown any connection between his loss and the inaccuracies in the company's financial statements. EY is not liable.

Securities Exchange Act of 1934

A company that is subject to the 1934 Act must file with the SEC an annual report containing audited financial statements and quarterly reports with unaudited financials.

Liability for Inaccurate Disclosure in a Required Filing

Under §18 of the 1934 Act, an auditor who makes a false or misleading statement in a required filing is liable to any buyer or seller of the stock who has acted in reliance on the statement. The auditors can avoid liability by showing that they acted in *good faith* and did not know the information was misleading.

Fraud

Primary Liability. Most securities litigation against accountants is brought under §10(b) and Rule 10b-5 of the 1934 Act. **Under §10(b), an auditor is liable for making (1) a misstatement or omission of a material fact (2) knowingly or recklessly (3) that the plaintiff relies on in purchasing or selling a security.** This is called primary liability because the accountants are liable for statements that they make themselves. Accountants are liable under §10(b) only if they know their statement is wrong or they are reckless in checking the accuracy of their reports.

The following case is famous for its landmark interpretation of §10(b).

Landmark Case

Ernst & Ernst v. Hochfelder

425 U.S. 185; 96 S. Ct. 1375; 1976 U.S. LEXIS 2
Supreme Court of the United States, 1976

Facts: For 19 years, Ernst & Ernst audited a small brokerage firm, First Securities Company of Chicago (First Securities). Leston B. Nay was president of the firm and owned 92 percent of its stock. He convinced some customers to invest funds in "escrow" accounts that would yield a high rate of return. And, indeed, from 1942 through 1966, they did. The investments were unusual in that the customers wrote their checks to Nay personally, not to First Securities. None of these escrow accounts appeared in First Securities' records.

As you perhaps have guessed, there were no escrow accounts. Nay was spending much of customers' money on himself. The fraud came to light when Nay killed himself, leaving a note that described First Securities as bankrupt and the escrow accounts as "spurious."

In investigating the fraud, customers discovered that Nay had had a rigid rule prohibiting anyone else from ever opening mail addressed to him, even if it arrived in his absence. The customers alleged that if Ernst had done a proper audit, they would have found out about this mail rule, which would have led to an investigation of Nay and discovery of the fraud.

The customers filed suit against Ernst under §10(b). The accounting firm filed a motion for summary judgment,

alleging that liability under §10(b) requires **scienter;** that is, an intent to deceive, manipulate, or defraud. Ernst admitted that it had been negligent but denied any intentional wrongdoing. The trial court granted Ernst's motion, the Court of Appeals reversed, and the Supreme Court granted *certiorari.*

Issue: ***Was Ernst liable under §10(b) when it acted negligently but not intentionally?***

Excerpts from Justice Powell's Decision: Section 10(b) makes unlawful the use or employment of "any manipulative or deceptive device or contrivance" in contravention of Commission rules. The words "manipulative or deceptive" used in conjunction with "device or contrivance" strongly suggest that §10(b) was intended to proscribe knowing or intentional misconduct. In view of the language of §10(b), which so clearly connotes intentional misconduct, and mindful that the language of a statute controls when sufficiently clear in its context, further inquiry may be unnecessary.

We turn now, nevertheless, to the legislative history of the 1934 Act. The most relevant exposition of the provision that was to become §10(b) was by Thomas G. Corcoran, a spokesman for the drafters. Corcoran indicated: §10(b) says, "Thou shalt not devise any other cunning devices. The Commission should have the authority to deal with new manipulative devices." It is difficult to believe that any lawyer, legislative draftsman, or legislator would use these words if the intent was to create liability for merely negligent acts or omissions.

The judgment of the Court of Appeals is *Reversed.*

Aiding and Abetting. For a *primary* violation of §10(b), the defendant must have made a knowing or reckless omission or misstatement. It is clear that **the *SEC* has the right to sue anyone who aids and abets others in making untrue statements in connection with the purchase or sale of a security.**[15] Until recently, it was unclear whether injured *private parties* could recover from aiders and abettors. In the *Stoneridge* case discussed in Chapter 36, the Supreme Court has made aiding and abetting cases very difficult for plaintiffs to win.[16] Stoneridge involved two suppliers, not accountants, but it indicates the Supreme Court's general hostility towards aiding and abetting cases. As a result, accountants will likely lose less sleep over aiding and abetting liability.

© Gary Blakeley/Shutterstock.com

Arthur Andersen jumped ship when the Cronos Group refused to explain a mysterious payment.

Whistleblowing

Under §10A of the 1934 Act, auditors who suspect that a client has committed an illegal act must ensure that the client's board of directors is notified. If the board fails to take appropriate corrective action, the auditors must issue an official report to the board. If the board receives such a report from its auditors, it must notify the SEC within one business day (and send a copy of this notice to its accountant). If the auditors do not receive this copy, they must notify the SEC themselves.

The scope of §10A is broad, covering insider trading, price fixing, and any other violations of state and federal law. While doing an audit of the Cronos Group, Arthur Andersen questioned a $1.5 million "disbursement." When the shipping company refused either to provide an explanation or to investigate this mysterious payment, the accounting firm filed an official report with the board of directors and resigned as Cronos's auditor. Cronos then filed the Andersen report with the SEC, which investigated the incident. Not surprisingly, many

[15]Private Securities Litigation Reform Act, Pub. L. No. 104-67, 109 Stat. 737 (1995).

[16]*Stoneridge Investment Partners, LLC v. Scientific-Atlanta, Inc.,* 128 S. Ct. 761; 2008 U.S. LEXIS 1091.

auditors are unenthusiastic about this statute. It is not a pretty choice—the wrath of the SEC if they fail to cooperate or the anger of their clients if they do comply.

Joint and Several Liability

Traditionally, liability under the 1934 Act was **joint and several**. When several different participants were potentially liable, a plaintiff could sue any one defendant or any group of defendants for the full amount of the damages. If a company committed fraud and then went bankrupt, its accounting firm might well be the only defendant with assets. Even if the accountants had caused only, say, 5 percent of the damages, they could be liable for the full amount.

Joint and several liability
All members of a group are liable. They can be sued as a group, or any of them can be sued individually for the full amount owing. But the plaintiff may not recover more than 100 percent of her damages.

Congress has amended the 1934 Act to provide that accountants are liable jointly and severally only if they knowingly violate the law. Otherwise, the defendants are proportionately liable, meaning that they are liable only for the share of the damages that they themselves caused.

Criminal Liability

Thus far, the discussion has focused on civil liability. The penalty for a civil offense is the payment of monetary damages. However, some offenses are criminal acts for which the punishment is a fine and imprisonment:

- The Justice Department has the right to prosecute willful violations under either the 1933 Act or the 1934 Act.
- The Internal Revenue Code imposes various criminal penalties on accountants for wrongdoing in the preparation of tax returns.
- Many states prosecute violations of their securities laws.

EXAM Strategy

Question: When Benjamin hired Howard to prepare financial statements for American Equities, he gave Howard a handwritten sheet of paper entitled "Pro Forma Balance Sheet." It contained a list of real estate holdings and the balance sheets of two corporations that Benjamin claimed were owned by American Equities. From this one piece of paper, and without any examination of books and records, Howard prepared an Auditor's Report for the company. Benjamin used the Auditor's Report to sell stock in American Equities. Has Howard committed a criminal offense?

Strategy: Willful violations of the securities laws are criminal offenses.

Result: A court held that Howard's actions were willful. He was found guilty of a criminal violation.

Other Accountant-Client Issues

The Accountant-Client Relationship

The SEC has long been concerned about the relationship between accountants and the companies they audit. Its rules require accountants to maintain independence from their clients. The accountant must be "capable of exercising objective and impartial judgment on

all issues...."[17] To this general guideline, the SEC also adds specific rules. An auditor or her family must not, for example, maintain a financial or business relationship with the client.

SEC rules on independence specifically prohibit accountants or their families from owning stock in a company that their firm audits. To take one woeful example, during an investigation the SEC discovered that most of PricewaterhouseCoopers' partners were in violation, including half of the partners who were charged with enforcing the rule. All told, firm employees had committed more than *8,000* violations. Although the firm had been caught violating the same rule only a few years before, it nonetheless had a trifecta in place: many partners pleaded ignorance of the rule, the firm made little effort to enforce it, and, as a result, violations were widespread. In response to this second infraction, the firm fired 10 employees, including 5 partners. The SEC notified 52 of the firm's clients that there were potential concerns about the integrity of their financial statements and even requested that some of the companies select a new auditor.

SEC rules of practice specify that an accountant who engages in "unethical or improper professional conduct" may be banned from practice before the SEC.[18] Auditors who are banned or suspended cannot perform the audits that are required by the 1933 and 1934 Acts—quite a professional blow.

Accountant-Client Privilege

Traditionally, an accountant-client privilege did not exist under federal law. Accountants were under no obligation to keep confidential any information they received from their clients. In one notorious case, the IRS suspected that the owner of a chain of pizza parlors was underreporting his income. The agency persuaded the owner's CPA, James Checksfield, to spy on him for eight years. (The IRS agreed to drop charges against Checksfield, who had not paid his own taxes for three years.) Thanks to the information that Checksfield passed to the IRS, his client was indicted on criminal charges of evading taxes.

Congress passed the Internal Revenue Service Restructuring and Reform Act to reduce abuse of taxpayers by the Internal Revenue Service (IRS). This statute provides limited protection for confidential communications between accountants and clients. That is the good news. The bad news is the word "limited." This new privilege applies only in civil cases involving the IRS or the U.S. government. It does not apply to criminal cases, civil cases not involving the U.S. government, or cases with other federal agencies such as the SEC. Nor does it apply to the preparation of tax returns. Thus, for example, this new accountant-client privilege would not have protected Checksfield's client because he was charged with a criminal offense.

Around 30 states do recognize an accountant-client privilege, but a state privilege applies only to issues of state law and provides no protection against federal charges. The Checksfield case took place in Missouri, which does have an accountant-client privilege. However, because the IRS filed suit, federal law applied and Checksfield's information could be used in court. In the end, however, the IRS dropped the tax evasion charges out of concern that a jury would not believe Checksfield's testimony. Ironically, Checksfield suffered worse punishment than his client—the Missouri state board of accountancy revoked his CPA license for violating state law.

Working Papers

When working for a client, accountants use the client's own documents and also prepare working papers of their own—notes, memoranda, and research. In theory, each party owns whatever it has prepared itself. Thus, accountants own the working papers they have

---

[17] 17 CFR §210.2-01(b).
[18] 17 CFR §201.102(e)(1)(iv).

created. In practice, however, the client controls even the accountant's working papers. The accountant (1) cannot show the working papers to anyone without the client's permission (or a valid court order) and (2) must allow the client access to the working papers. Under SOX, accountants for public companies must keep all audit work papers for at least seven years.

Chapter Conclusion

Accountants serve many masters and, therefore, face numerous potential conflicts. Clients, third parties, and the government all rely on their work. Privy to clients' most intimate financial secrets, accountants must decide which of these secrets to reveal and which to keep confidential. The wrong decision may destroy the client, impoverish its shareholders, and subject its auditors to substantial penalties.

Exam Review

1. **SARBANES-OXLEY** The Sarbanes-Oxley Act (SOX):
   - Establishes the Public Company Accounting Oversight Board.
   - Requires an accounting firm to make regular and complete reports to the audit committees of its clients.
   - Prohibits accounting firms that audit public companies from providing consulting services to those companies on certain topics, such as bookkeeping, financial information systems, human resources, and legal issues (unrelated to the audit).
   - Prohibits an accounting firm from auditing a company if one of the company's top officers has worked for the firm within the last year and was involved in the company's audit.
   - Provides that a lead audit partner cannot work for a client in any auditing role for more than five years. (pp. 648–649)

2. **LIABILITY TO CLIENTS FOR NEGLIGENCE** Accountants are liable to their clients for negligence if:
   - They breach their duty to their clients by failing to exercise the degree of skill and competence that an ordinarily prudent accountant would under the circumstances, and
   - The violation of this duty causes harm to the client. (pp. 649–651)

3. **LIABILITY TO CLIENTS FOR FRAUD** Accountants are liable to their clients for fraud if:
   - They make a false statement of a material fact,
   - They know it is not true or recklessly disregard the truth,
   - The client justifiably relies on the statement, and
   - The reliance results in damages. (p. 651)

4. **CLIENT INFORMATION** Accountants have a legal obligation to:
   - Keep all client information confidential, and
   - Use client information only for the benefit of the client. (p. 651)

5. **FIDUCIARY DUTY** As a general rule, accountants do *not* have a fiduciary duty to their clients. However, accountants sometimes take on responsibilities that extend beyond the typical scope of an accountant-client relationship, such as when they serve as a financial advisor. In these situations, they may have a fiduciary duty. (pp. 651–652)

6. **LIABILITY TO THIRD PARTIES FOR NEGLIGENCE** State law determines an accountant's liability for negligence to third parties. Most states follow one of the following three rules:
   - *Ultramares* doctrine. Accountants who fail to exercise due care are liable to a third party only if they know the identity of the third party who:
     - Will see their work product, and
     - Will rely on the work product for a particular, known purpose.
   - Foreseeable doctrine. Accountants who fail to exercise due care are liable to a third party if:
     - It is foreseeable that the third party will receive financial statements from the client, and
     - The third party relies on these statements.
   - Restatement doctrine. Accountants who fail to exercise due care are liable to:
     - Anyone they knew would rely on the information, and
     - Anyone else in the same class. (pp. 654–656)

EXAM Strategy

Question: Krouse made errors in its audit of Summit Power. Toro Co. relied on Krouse's faulty financial statements when making loans to Summit. Krouse did not know that Toro would rely on these reports. Indiana adheres to the *Ultramares* doctrine. Is Krouse liable to Toro?

Strategy: Whenever there is an issue of liability to a third party, it is important to apply the correct rule because the outcome is very different under the various rules. (See the "Result" at the end of this section.)

7. **LIABILITY TO THIRD PARTIES FOR FRAUD** An accountant who commits fraud is liable to any foreseeable user of the work product who justifiably relies on it. (p. 656)

EXAM Strategy

Question: When Jeff told one of the general partners of Edge Energies that he did not wish to invest in these ventures, the general partner suggested he call Jackson, the partnerships' accountant. Jackson told Jeff that Edge Energies partnerships were a "good deal," that they were "good moneymakers," and "they were expecting something like a two-year payoff." In fact, Jackson knew that the operators were mismanaging these ventures and that the partnerships were bad investments. Jeff relied on Jackson's recommendation and invested in Edge Energies. He subsequently lost his entire investment. Is Jackson liable to Jeff? Does it matter which negligence doctrine applies?

Strategy: Whenever there is intentional wrongdoing, think fraud. (See the "Result" at the end of this section.)

8. **SECURITIES ACT OF 1933** Under §11 of the 1933 Act, auditors are liable for any material misstatement or omission in the financial statements that they provide for a registration statement if investors lose money. (pp. 657–659)

EXAM Strategy

Question: To be successful in a civil action under §11 of the Securities Act of 1933 concerning liability for a misleading registration statement, the plaintiff must prove:

Defendant's Intent to Deceive	Plaintiff's Reliance on the Registration Statement
(a) No	Yes
(b) No	No
(c) Yes	No
(d) Yes	Yes

Strategy: §11 of the 1933 Act has a lower liability standard that the 1934 Act. In other words, a successful plaintiff has to show less wrongdoing on the part of the accountant.

9. **SECURITIES EXCHANGE ACT OF 1934**

- Under §10(b) of the 1934 Act, an auditor is liable for making (1) any misstatement or omission of a material fact in financial statements (2) knowingly or recklessly (3) that the plaintiff relies on in purchasing or selling a security.
- The SEC can prosecute those who aid and abet others in making untrue statements in connection with the purchase or sale of a security.
- Under §10A of the 1934 Act, auditors who suspect that a client has committed an illegal act must ensure that the client's board of directors is notified.
- Accountants are liable jointly and severally only if they knowingly violate the law. Otherwise, they are proportionately liable. (pp. 659–660)

10. CRIMINAL LIABILITY

- The Justice Department has the right to prosecute willful violations under either the 1933 Act or the 1934 Act.
- The Internal Revenue Code imposes various criminal penalties on accountants for wrongdoing in the preparation of tax returns.
- Many states prosecute violations of their securities laws. (p. 661)

11. CONFLICT OF INTEREST The SEC prohibits auditors or their families from owning stock in companies that their firm audits. (p. 662)

12. ACCOUNTANT-CLIENT PRIVILEGE A *limited* accountant-client privilege exists under federal law. Some states also recognize this privilege and apply it in matters involving state law. (p. 662)

6. Result: Krouse was not liable because he did not know that Toro would rely on the reports.

7. Result: Fraud is different from negligence, so it does not matter which negligence doctrine applies. Jackson was liable to Jeff for fraud because Jeff was a foreseeable user of the information and justifiably relied on it.

8. Result: B is the correct answer.

Multiple-Choice Questions

1. **CPA Question** A CPA's duty of due care to a client most likely will be breached when a CPA:
   (a) Gives a client an oral instead of a written report
   (b) Gives a client incorrect advice based on an honest error of judgment
   (c) Fails to give tax advice that saves the client money
   (d) Fails to follow GAAS

2. ***CPA QUESTION*** One of the elements necessary to hold a CPA liable to a client for conducting an audit negligently is that the CPA:
   (a) Acted with *scienter* or guilty knowledge
   (b) Was a fiduciary of the client
   (c) Failed to exercise due care
   (d) Executed an engagement letter

3. One of the elements necessary to hold a CPA liable under §10(b) is that the CPA
   (a) Acted with *scienter* or guilty knowledge
   (b) Was a fiduciary of the client
   (c) Failed to exercise due care
   (d) Executed an engagement letter

4. An accountant has a fiduciary duty:
   (a) To a client when conducting an audit
   (b) To an investor who buys stock in company the accountant has audited
   (c) To any third party that the accountant knows will be relying on an audit
   (d) Only for services that go beyond routine accounting work

5. Accountants who commit fraud in the preparation of financial statements are liable to any third party who uses those statements if:
   (a) That person is a foreseeable user
   (b) The accountant knows that person's identity
   (c) It is foreseeable that that person will receive the financial statements
   (d) That person is in the same class as someone who the accountant knew would rely on the statements

ESSAY QUESTIONS

1. ***ETHICS*** Wayne and Arlene Selden invested in Competition Aircraft, a fraudulent company that pretended to sell airplanes. After the company went bankrupt, the Seldens sought to recover from accountant William Burnett. He had recommended the investment to several of his clients, who communicated his recommendation to the Seldens. The Seldens were not Burnett's clients. The court adopted the Restatement doctrine. Is Burnett liable? Whether or not Burnett faces legal liability, was it a good idea for him to recommend investments to his clients? Does it create any potential conflicts of interest?

2. After reviewing Color-Dyne's audited financial statements, the plaintiffs provided materials to the company on credit. These financial statements showed that Color-Dyne owned $2 million in inventory. The audit failed to reveal, however, that various banks held secured interests in this inventory. The accountant did not know that the company intended to give the financial statements to plaintiffs or any other creditors. Color-Dyne went bankrupt. Is the accountant liable to plaintiffs under the Restatement doctrine?

3. ***YOU BE THE JUDGE*** **WRITING PROBLEM** James and Penelope Monroe purchased securities offered by Hughes Homes, Inc., a retailer of manufactured housing in Tacoma, Washington. During its audit, Deloitte & Touche found that the internal controls of Hughes Homes had flaws. As a result, the accounting firm adjusted the scope of its audit to perform independent testing to verify the accuracy of the company's financial records. Satisfied that the internal controls were functional, Deloitte issued a clean opinion. After Hughes Homes became insolvent, the Monroes sued Deloitte for violating §11 of the 1933 Act. They alleged that Deloitte's failure to disclose that it had found flaws in Hughes's internal control system was a material omission. GAAS did not require disclosure. Is Deloitte liable? **Argument for the Monroes:** Under §11, auditors are liable for any material omission. If the Monroes had known about the flaws in the internal controls, they would never have invested. **Argument for Deloitte:** This omission could not be material if GAAS does not require it to be reported.

4. The British Broadcasting Corp. (BBC) broadcast a TV program alleging that Terry Venables, a former professional soccer coach, had fraudulently obtained a £1 million loan by misrepresenting the value of his company. Venables had been a sportscaster for the BBC but had switched to a competing network. The source of the BBC's story was "confidential working papers" from Venables's accountant. According to the accountant, the papers had been stolen. Who owns these working papers? Does the accountant have the right to disclose the content of working papers?

5. Medtrans, an ambulance company, was unable to pay its bills. In need of cash, it signed an engagement letter with Deloitte & Touche to perform an audit that could be used to attract investors. Unfortunately, the audit had the opposite effect. The unaudited statements showed earnings of $1.9 million, but the accountants calculated that the company had actually lost about $500,000. While in the process of negotiating adjustments to the financials, Deloitte resigned. Some time passed before Medtrans found another auditor, and, in that interim, a potential investor withdrew its $10 million offer. Is Deloitte liable for breach of contract?

Discussion Questions

1. Should the IFRS be adopted in the United States?

2. Are the SOX rules on consulting services sufficiently strict? Should auditing firms be prohibited from performing any consulting services to companies that they audit?

3. Which of the three negligence doctrines—*Ultramares*, Foreseeable or Restatement—is the most reasonable and appropriate?

4. Accountants do not have a fiduciary duty to their clients when performing accounting services. Why not?

5. A partnership of doctors in Billings, Montana, sought to build a larger office building. They decided to finance this project using industrial revenue bonds under a complex provision of the Internal Revenue Code. They hired Peat Marwick to do the required financial work. The deal was all set to close when it was discovered that the accountants had made an error in structuring the deal. As a result, the partnership was forced to pay a significantly higher rate of interest. When the partnership sued Peat for breach of contract, the accounting firm asked the court to dismiss the claim on the grounds that the client could only sue in tort. Peat argued that it had performed its duties under the contract. The statute of limitations had expired for a tort case, but not for a contract case. Should the doctors' case be dismissed?

Agency and Employment Law

CHAPTER 28

AGENCY LAW

© Ivan Cholakov Gostock-dot-net/Shutterstock.com

The first time Bella walked into the store, my heart flipped. A lot of hot girls just know you can't keep your eyes off them. But not Bella. She had the shyest, sweetest smile you ever saw. From the beginning, I knew she was out of my league. But it didn't matter. Just to be in the same room with her was awesome. I would have folded shirts forever if I could do it standing next to her. She smelled like flowers, and her skin was beautiful.

Of course, she didn't last long at the store. How could she? All she had to do was walk down the street and good things would happen to her. She got picked to be on one of those reality shows.

Being on TV and all, she had to look good, so a couple of weeks after she left, she texted me: "Need clothes 4 show. Can u help?"

I like to think I wouldn't have murdered someone if Bella had asked me to, but I guess it depends on who the someone was. So I came up with a pretty good idea. I issued merchandise credits made out to fake people, which she used to buy clothes. I also let her use my employee discount. Look, Anthropologie is a big company—it's not like they would miss the clothes or anything. Besides, having Bella wear them on that TV show was great advertising.

> I like to think I wouldn't have murdered someone if Bella had asked me to, but I guess it depends on who the someone was.

But you know what those guys at corporate did? Sued me for violating my duty of loyalty! To some big company! Are they kidding?? Like they would ever be loyal to me.

To find out who is in the right here, read the *Otsuka* case later in the chapter. It deals with a similar situation.

Thus far, this book has primarily dealt with issues of individual responsibility: what happens if *you* knock someone down or *you* sign an agreement? Agency law, on the other hand, is concerned with your responsibility for the actions of others. What happens if your agent assaults someone or signs a contract in your name? Agency law presents a significant trade-off: if you do everything yourself, you have control over the result. But the size and scope of your business (and your life) will be severely limited. Once you hire other people, you can accomplish a great deal more, but your risks increase immensely. Your agents may violate your instructions, and still you could be liable for what they have done. Although it might be safer to do everything yourself, that is not a practical decision for most business owners (or most people). The alternative is to hire carefully and to limit the risks as much as possible by understanding the law of agency.

Creating an Agency Relationship

Let us begin with two important definitions:

- **Principal**: A person who has someone else acting for him.
- **Agent:** A person who acts for someone else.

Principal
In an agency relationship, the person for whom an agent is acting.

Agent
In an agency relationship, the person who is acting on behalf of a principal.

Principals have substantial liability for the actions of their agents.[1] Therefore, disputes about whether an agency relationship exists are not mere legal quibbles but important issues with potentially profound financial consequences.

In an agency relationship, someone (the agent) agrees to perform a task for, and under the control of, someone else (the principal). **To create an agency relationship, there must be:**

- A **principal** and
- An **agent**
- Who mutually **consent** that the agent will act on behalf of the principal and
- Be subject to the principal's **control**
- Thereby creating a **fiduciary** relationship.

Consent

To establish consent, the principal must ask the agent to do something, and the agent must agree. In the most straightforward example, you ask a neighbor to walk your dog, and she agrees. Matters were more complicated, however, when Steven James met some friends one evening at a restaurant. During the two hours he was there, he drank four to six beers. (It is probably a bad sign that he cannot remember how many.) From then on, one misfortune piled upon another. After leaving the restaurant at about 7:00 p.m., James sped down a highway and crashed into a car that had stalled on the road, thereby killing the driver. James told the police at the scene that he had not seen the parked car (another bad sign). Evidently, James's lawyer was not as perceptive as the police in recognizing drunkenness. In a misguided attempt to help his client, James's lawyer took him to the local hospital for a blood test. Unfortunately, the test confirmed that James had indeed been drunk at the time of the accident.

[1] The word "principal" is always used when referring to a person. It is not to be confused with the word "principle," which refers to a fundamental idea.

The attorney knew that if this evidence was admitted at trial, his client would soon be receiving free room and board from the Massachusetts Department of Corrections. So at trial, the lawyer argued that the blood test was protected by the client-attorney privilege because the hospital had been his agent and therefore a member of the defense team. The court disagreed, however, holding that the hospital employees were not agents for the lawyer because they had not consented to act in that role.

The court upheld James's conviction of murder in the first degree by reason of extreme atrocity or cruelty.[2]

Control

Principals are liable for the acts of their agents because they exercise control over the agents. If principals direct their agents to commit an act, it seems fair to hold the principal liable when that act causes harm. How would you apply that rule to the following situation?

William Stanford was an employee of the Agency for International Development. While on his way home to Pakistan to spend the holidays with his family, his plane was hijacked and taken to Iran, where he was killed. Stanford had originally purchased a ticket on Northwest Airlines but had traded it for a seat on Kuwait Airways (KA). The airlines had an agreement permitting passengers to exchange tickets from one to the other. Stanford's widow sued Northwest on the theory that KA was Northwest's agent. The court found, however, that no agency relationship existed because Northwest had no control over KA.[3] Northwest did not tell KA how to fly planes or handle terrorists; therefore, it should not be liable when KA made fatal errors. Not only must an agent and principal consent to an agency relationship, but the principal also must have control over the agent.

Fiduciary Relationship

In a **fiduciary relationship**, a trustee acts for the benefit of the beneficiary, always putting the interests of the beneficiary before his own. A fiduciary relationship is a special relationship with high standards. The beneficiary places special confidence in the fiduciary who, in turn, is obligated to act in good faith and candor, putting his own needs second. The purpose of a fiduciary relationship is for one person to benefit another. **Agents have a fiduciary duty to their principals.**

All three elements—consent, control, and a fiduciary duty—are necessary to create an agency relationship. In some relationships, for example, there might be a *fiduciary duty* but no *control*. A trustee of a trust must act for the benefit of the beneficiaries, but the beneficiaries have no right to control the trustee. Therefore, a trustee is not an agent of the beneficiaries. *Consent* is present in every contractual relationship, but that does not necessarily mean that the two parties are agent and principal. If Horace sells his car to Lily, they both expect to benefit under the contract, but neither has a *fiduciary duty* to the other and neither *controls* the other, so there is no agency relationship.

Elements Not Required for an Agency Relationship

Consent, control, and a fiduciary relationship are necessary to establish an agency relationship. The following elements are *not* required:

Equal dignities rule
If an agent is empowered to enter into a contract that must be in writing, then the appointment of the agent must also be written.

- *A Written Agreement.* In most cases, an agency agreement does not have to be in writing. An oral understanding is valid, except in one circumstance—the **equal dignities rule**. According to this rule, if an agent is empowered to enter into a contract that must be in writing, then the appointment of the agent must also be written.

---

[2] *Commonwealth v. James*, 427 Mass. 312, 693 N.E.2nd 148, 1998 Mass. LEXIS 175. (S.J.C. MA, 1998)
[3] *Stanford v. Kuwait Airways Corp.*, 648 F. Supp. 1158, 1986 U.S. Dist. LEXIS 18880 (S.D.N.Y. 1986).

For example, under the statute of frauds, a contract for the sale of land is unenforceable unless in writing, so the agency agreement to sell land must also be in writing.

- *A Formal Agreement.* The principal and agent need not agree formally that they have an agency relationship. They do not even have to think the word "agent." So long as they act like an agent and a principal, the law will treat them as such.
- *Compensation.* An agency relationship need not meet all the standards of contract law. For example, a contract is not valid without consideration, but an agency agreement is valid *even if the agent is not paid.*

Duties of Agents to Principals

Agents owe a fiduciary duty to their principals. There are four elements to this duty.

Duty of Loyalty

An agent has a fiduciary duty to act loyally for the principal's benefit in all matters connected with the agency relationship.[4] The agent has an obligation to put the principal first, to strive to accomplish the principal's goals. As the following case illustrates, this duty applies to all employees, no matter how lowly.

Otsuka v. Polo Ralph Lauren Corporation

2007 U.S. Dist. LEXIS 86523
United States District Court for the Northern District of California, 2007

Facts: Justin Kiser and Germania worked together at a Ralph Lauren Polo store in San Francisco. After she left the job, he let her buy clothing using merchandise credits made out to nonexistent people. He also let her use his employee discount. Not surprisingly, both of these activities were against store policies. Polo sued Kiser, alleging that he had violated his duty of loyalty.

Kiser filed a motion to dismiss on the grounds that he was such a low-level employee that he did not owe a duty of loyalty to Polo.

Issue: ***Do all employees owe a duty of loyalty to their employer?***

Excerpts from Judge Illston's Decision: Kiser moves to dismiss this cause of action, contending that a lower-level employee owes no fiduciary duty to his employer. In response, [Polo] argues that there is a duty of loyalty akin to a fiduciary duty that all employees owe to their employers.

The Court agrees with Kiser that the cases cited by [Polo] address the duty of loyalty with respect to higher-ranking employees than Kiser, who worked as a sales clerk in a retail store. [But t]he Third Restatement provides that all employees are agents, and that "[a]s agents, all employees owe a duty of loyalty to their employers." Restatement (Third) of Agency §1.01. This is true regardless of how ministerial or routinized a work assignment may be.

Accordingly, the Court DENIES Kiser's motion to dismiss the cause of action.

[4]Restatement (Third) of Agency §8.01.

The various components of the duty of loyalty follow.

Outside Benefits

An agent may not receive profits unless the principal knows and approves. Suppose that Hope is an employee of the agency Big Egos and Talents, Inc. (BEAT). She has been representing Will Smith in his latest movie negotiations.[5] Smith often drives her to meetings in his new Maybach. He is so thrilled that she has arranged for him to star in the new movie *Little Men* that he buys her a Maybach. Can Hope keep this generous gift? Only with BEAT's permission. She must tell BEAT about the Maybach; the company may then take the vehicle itself or allow her to keep it.

Confidential Information

The ability to keep secrets is important in any relationship, but especially a fiduciary relationship. Agents can neither disclose nor use for their own benefit any confidential information they acquire during their agency. As the following case shows, this duty continues even after the agency relationship ends.

ABKCO MUSIC, INC. V. HARRISONGS MUSIC, LTD.

722 F.2d 988, 1983 U.S. App. LEXIS 15562
United States Court of Appeals for the Second Circuit, 1983

Facts: Bright Tunes Music Corp. (Bright Tunes) owned the copyright to the song "He's So Fine." The company sued George Harrison, a Beatle, alleging that the Harrison composition "My Sweet Lord" copied "He's So Fine." At the time the suit was filed, Allen B. Klein handled the business affairs of the Beatles.

Klein (representing Harrison) met with the president of Bright Tunes to discuss possible settlement of the copyright lawsuit. Klein suggested that Harrison might be interested in purchasing the copyright to "He's So Fine." Shortly thereafter, Klein's management contract with the Beatles expired. Without telling Harrison, Klein began negotiating with Bright Tunes to purchase the copyright to "He's So Fine" for himself. To advance these negotiations, Klein gave Bright Tunes information about royalty income for "My Sweet Lord"—information that he had gained as Harrison's agent.

The trial judge in the copyright case ultimately found that Harrison had infringed the copyright on "He's So Fine" and assessed damages of $1,599,987. After the trial, Klein purchased the "He's So Fine" copyright from Bright Tunes and with it, the right to recover from Harrison for the breach of copyright.

© AP Photo

George Harrison, a few months after writing "My Sweet Lord."

Issue: ***Did Klein violate his fiduciary duty to Harrison by using confidential information after the agency relationship terminated?***

Excerpts from Judge Pierce's Decision: There is no doubt that the relationship between Harrison and [Klein]

---

[5]Do not be confused by the fact that Hope works as an agent for movie stars. As an employee of BEAT, her duty is to the company. She is an agent of BEAT, and BEAT works for the celebrities.

prior to the termination of the management agreement was that of principal and agent, and that the relationship was fiduciary in nature. [A]n agent has a duty not to use confidential knowledge acquired in his employment in competition with his principal. This duty exists as well after the employment is terminated as during its continuance. On the other hand, use of information based on general business knowledge or gleaned from general business experience is not covered by the rule, and the former agent is permitted to compete with his former principal in reliance on such general publicly available information. The evidence presented herein is not at all convincing that the information imparted to Bright Tunes by Klein was publicly available.

While the initial attempt to purchase [the copyright to "He's So Fine"] was several years removed from the eventual purchase on [Klein]'s own account, we are not of the view that such a fact rendered [Klein] unfettered in the later negotiations. Taking all of these circumstances together, we agree that [Klein's] conduct did not meet the standard required of him as a former fiduciary.

To listen to the two songs involved in this case, google "benedict copyright."

Ethics Klein was angry that the Beatles had failed to renew his management contract. Was it reasonable for him to think that he owed no duty to the principal who had fired him? Why kind of world would it be if everyone acted like Klein? Why would George Harrison prefer to owe money to Bright Tunes rather than to Klein?

Competition with the Principal

Agents are not allowed to compete with their principal in any matter within the scope of the agency business. If Allen Klein had purchased the "He's So Fine" copyright while he was George Harrison's agent, he would have committed an additional sin against the agency relationship. Owning song rights was clearly part of the agency business, so Klein could not make such purchases without Harrison's consent. Once the agency relationship ends, however, so does the rule against competition. Klein was entitled to buy the "He's So Fine" copyright after the agency relationship ended (so long as he did not use confidential information).

Conflict of Interest Between Two Principals

Unless otherwise agreed, an agent may not act for two principals whose interests conflict. Suppose Travis represents both director Steven Spielberg and actor Amy Adams. Spielberg is casting the title role in his new movie, *Nancy Drew: Girl Detective*, a role that Adams covets. Travis cannot represent these two clients when they are negotiating with each other unless they both know about the conflict and agree to ignore it. The following example illustrates the dangers of acting for two principals at once.

EXAM Strategy

Question: The Sisters of Charity was an order of nuns in New Jersey. Faced with growing health care and retirement costs, they decided to sell off a piece of property. The nuns soon found, however, that the world is not always a charitable place. They agreed to sell the land to Linpro for nearly $10 million. But before the deal closed, Linpro signed a contract to resell the property to Sammis for $34 million. So, you say, the sisters made a bad deal. There is no law against that. But it turned out that the nuns' law firm also represented Linpro. Their lawyer at the firm, Peter Berkley, never

told the sisters about the deal between Linpro and Sammis. Was that the charitable—or legal—thing to do?

Strategy: Always begin by asking if there is an agency relationship. Was there consent, control, and a fiduciary relationship? *Consent*: Berkley had agreed to work for the nuns. *Control*: they told him what he was to do—sell the land. The purpose of a *fiduciary relationship* is for one person to benefit another. The point of the nuns' relationship with Berkley is for him to help them. Once you know there is an agency relationship, then ask if the agent has violated his duty of loyalty.

Result: You know that an agent is not permitted to act for two principals whose interests conflict. Here, Berkley is working for the nuns, who want the highest possible price for their land, and Linpro, who wants the lowest price. Berkley has violated his duty of loyalty.

Secretly Dealing with the Principal

If a principal hires an agent to arrange a transaction, the agent may not become a party to the transaction without the principal's permission. Matt Damon became an overnight sensation after starring in the movie *Good Will Hunting*. Suppose that he hired Trang to read scripts for him. Unbeknownst to Damon, Trang has written her own script, which she thinks would be ideal for him. She may not sell it to him without revealing that she wrote it herself. Damon may be perfectly happy to buy Trang's script, but he has the right, as her principal, to know that she is the person selling it.

Appropriate Behavior

An agent may not engage in inappropriate behavior that reflects badly on the principal. This rule applies even to *off-duty* conduct. For example, a coed trio of flight attendants went wild at a hotel bar in London. They kissed and caressed each other, showed off their underwear, and poured alcohol down their trousers. The airline fired two of the employees and gave a warning letter to the third.

Other Duties of an Agent

Before Taylor left for a five-week trip to England, he hired Angie to rent his vacation house. Angie never got around to listing his house on the Multiple Listing Service used by all the area brokers, nor did she post it on the Web herself, but when the Fords contacted her looking for rental housing, she did show them Taylor's place. They offered to rent it for $750 per month.

Angie called Taylor in England to tell him. He responded that he would not accept less than $850 a month, which Angie thought the Fords would be willing to pay. He told Angie to call back if there was any problem. The Fords decided that they would go no higher than $800 a month. Although Taylor had told Angie that he could not receive text messages in England, she texted him the Fords' counteroffer. Taylor never received it, so he never responded. When the Fords pressed Angie for an answer, she said she could not get in touch with Taylor. Not until Taylor returned home did he learn that the Fords had rented another house. Did Angie violate any of the duties that agents owe to their principals?

Duty to Obey Instructions

An agent must obey her principal's instructions unless the principal directs her to behave illegally or unethically. Taylor instructed Angie to call him if the Fords rejected the offer. When Angie failed to do so, she violated her duty to obey instructions. If, however, Taylor

had asked her to say that the house's basement was dry when in fact it looked like a swamp every spring, Angie would be under no obligation to follow those illegal instructions.

Duty of Care

An agent has a duty to act with reasonable care. In other words, an agent must act as a reasonable person would, under the circumstances. A reasonable person would not have texted Taylor while he was in England.

Under some circumstances, an agent is held to a higher—or lower—standard than usual. **An agent with special skills is held to a higher standard because she is expected to use those skills.** A trained real estate agent should know enough to post all listings on the Web.

But suppose Taylor had asked his neighbor, Jed, to help him sell the house. Jed is not a trained real estate agent, and he is not being paid, which makes him a *gratuitous agent*. A gratuitous agent is held to a lower standard because he is doing his principal a favor and, as the old saying goes, you get what you pay for—up to a point. **Gratuitous agents are liable if they commit *gross* negligence, but not *ordinary* negligence.** If Jed, as a gratuitous agent, texted Taylor an important message because he forgot that Taylor could not receive these messages in England, he would not be liable for that ordinary negligence. But if Taylor had, just that day, sent Jed an email complaining that he could not get any text messages, Jed would be liable for gross negligence and a violation of his duty.

Duty to Provide Information

An agent has a duty to provide the principal with all information in her possession that she has reason to believe the principal wants to know. She also has a duty to provide accurate information. Angie knew that the Fords had counteroffered for $800 a month. She had a duty to pass this information on to Taylor.

EXAM Strategy

Question: Jonah tells his friend Derek that he would like to go parasailing. Derek is very enthusiastic and suggests that they try an outfit called Wind Beneath Your Wings because he has heard good things about them. Derek offers to arrange everything. He makes a reservation, puts the $600 fee on his credit card, and picks Jonah up to drive him to the Wings location. What a friend! But the day does not turn out as Jonah had hoped. While he is soaring up in the air over the Pacific Ocean, his sail springs a leak, he goes plummeting into the sea and breaks both legs. During his recuperation in the hospital, he learns that Wings is unlicensed. He also sees an ad for Wings offering parasailing for only $350. And Derek is listed in the ad as one of the company's owners. Is Derek an agent for Jonah? Has he violated his fiduciary responsibility?

Strategy: There are three issues to consider in answering this question: (1) Was there an agency relationship? This requires consent, control, and a fiduciary relationship. (2) Is anything missing—does it matter if the agent is unpaid or the contract is not in writing? (3) Has the agent fulfilled his duties?

Result: There is an agency relationship: Derek had agreed to help Jonah; it was Jonah who set the goal for the relationship (parasailing); the purpose of this relationship is for one person to benefit another. It does not matter if Derek was not paid or the agreement not written. Derek has violated his duty to exercise due care. He should not have taken Jonah to an unlicensed company. He has also violated his duty to provide information: he should have told Jonah the true cost for the lessons and also revealed that he was a principal of the company. And he violated his duty of loyalty when he worked for two principals whose interests were in conflict.

Principal's Remedies when the Agent Breaches a Duty

A principal has three potential remedies when an agent breaches her duty:

- The principal can recover from the agent any **damages** the breach has caused. Thus, if Taylor can rent his house for only $600 a month instead of the $800 the Fords offered, Angie would be liable for $2,400—$200 a month for one year.
- If an agent breaches the duty of loyalty, he must turn over to the principal any **profits** he has earned as a result of his wrongdoing. Thus, after Klein violated his duty of loyalty to Harrison, he forfeited profits he would have earned from the copyright of "He's So Fine."
- If the agent has violated her duty of loyalty, the principal may **rescind** the transaction. When Trang sold a script to her principal, Matt Damon, without telling him that she was the author, she violated her duty of loyalty. Damon could rescind the contract to buy the script.[6]

Duties of Principals to Agents

In a typical agency relationship, the agent agrees to perform tasks for the principal, and the principal agrees to pay the agent. The range of tasks undertaken by an agent is limited only by the imagination of the principal. Because the agent's job can be so varied, the law needs to define an agent's duties carefully. The role of the principal, on the other hand, is typically less complicated—often little more than paying the agent as required by the agreement. Thus, the law enumerates fewer duties for the principal. Primarily, the principal must reimburse the agent for reasonable expenses and cooperate with the agent in performing agency tasks. The respective duties of agents and principals can be summarized as follows:

Duties of Agents to Principals	Duty of Principals to Agents
Duty of loyalty	Duty to compensate as provided by the agreement
Duty to obey instructions	Duty to reimburse for reasonable expenses
Duty of care	Duty to cooperate
Duty to provide information	

As a general rule, the principal must indemnify (i.e., reimburse) the agent for any expenses she has reasonably incurred. These reimbursable expenses fall into three categories:

- **A principal must indemnify an agent for any expenses or damages reasonably incurred in carrying out his agency responsibilities.** For example, Peace Baptist Church of Birmingham, Alabama, asked its pastor to buy land for a new church. He paid part of the purchase price out of his own pocket, but the church refused to reimburse him. Although the pastor lost in church, he won in court.[7]

---

[6] A principal can rescind his contract with an agent who has violated her duty, but, as we shall see later in the chapter, the principal might not be able to rescind a contract with a third party when the agent misbehaves.

[7] *Lauderdale v. Peace Baptist Church of Birmingham*, 246 Ala. 178, 19 So. 2d 538, 1944 Ala. LEXIS 508 (S. Ct. AL, 1944).

- **A principal must indemnify an agent for tort claims brought by a third party if the principal authorized the agent's behavior and the agent did not realize he was committing a tort.** Marisa owns all the apartment buildings on Elm Street, except one. She hires Rajiv to manage the units and tells him that, under the terms of the leases, she has the right to ask guests to leave if a party becomes too rowdy. But she forgets to tell Rajiv that she does not own one of the buildings, which happens to house a college sorority. One night, when the sorority is having a rambunctious party, Rajiv hustles over and starts ejecting the noisy guests. The sorority is furious and sues Rajiv for trespass. If the sorority wins its suit against Rajiv, Marisa would have to pay the judgment, plus Rajiv's attorney's fees, because she had told him to quell noisy parties and he did not realize he was trespassing.
- **The principal must indemnify the agent for any liability she incurs from third parties as a result of entering into a contract on the principal's behalf, including attorney's fees and reasonable settlements.** An agent signed a contract to buy cucumbers for Vlasic Food Products Co. to use in making pickles. When the first shipment of cucumbers arrived, Vlasic inspectors found them unsuitable and directed the agent to refuse the shipment. The agent found himself in a pickle when the cucumber farmer sued. The agent notified Vlasic, but the company refused to defend him. He settled the claim himself and, in turn, sued Vlasic. The court ordered Vlasic to reimburse the agent because he had notified them of the suit and had acted reasonably and in good faith.[8]

Duty to Cooperate

Principals have a duty to cooperate with their agent:

- **The principal must furnish the agent with the opportunity to work.** If Lewis agrees to serve as Ida's real estate agent in selling her house, Ida must allow Lewis access to the house. It is unlikely that Lewis will be able to sell the house without taking anyone inside.
- **The principal cannot unreasonably interfere with the agent's ability to accomplish his task.** Ida allows Lewis to show the house, but she refuses to clean it and then makes disparaging comments to prospective purchasers. "I really get tired of living in such a dark, dreary house," she says. "And the neighborhood children are vicious thugs." This behavior would constitute unreasonable interference with an agent.
- **The principal must perform her part of the contract.** Once the agent has successfully completed the task, the principal must pay him, even if the principal has changed her mind and no longer wants the agent to perform. Ida is a 78-year-old widow who has lived alone for many years in a house that she loves. Her asking price is outrageously high. But lo and behold, Lewis finds a couple happy to pay Ida's price. There is only one problem. Ida does not really want to sell. She put her house on the market because she enjoys showing it to all the folks who move to town. She rejects the offer. Now there is a second problem. The contract provided that Lewis would find a willing buyer at the asking price. Because he has done so, Ida must pay his real estate commission even if she does not want to sell her house.

Terminating an Agency Relationship

Either the agent or the principal can terminate the agency relationship at any time. In addition, the relationship terminates automatically if the principal or agent no longer can perform their required duties or a change in circumstances renders the agency relationship pointless.

[8] *Long v. Vlasic Food Products Co.*, 439 F.2d 229, 1971 U.S. App. LEXIS 11455 (4th Cir. 1971).

Termination by Agent or Principal

The two parties—principal and agent—have three choices in terminating their relationship:

- *Term Agreement.* If the principal and agent agree in advance how long their relationship will last, they have a term agreement. For example:
  - *Time.* Alexandra hires Boris to help her add to her collection of guitars previously owned by rock stars. If they agree that the relationship will last two years, they have a term agreement.
  - *Achieving a Purpose.* The principal and agent can agree that the agency relationship will terminate when the principal's goals have been achieved. Alexandra and Boris might agree that their relationship will end when Alexandra has purchased 10 guitars.
  - *Mutual Agreement.* No matter what the principal and agent agree at the start, they can always change their minds later on, so long as the change is mutual. If Boris and Alexandra originally agree to a two-year term, but Boris decides he wants to go back to business school and Alexandra runs out of money after only one year, they can decide together to terminate the agency.
- *Agency at Will.* If they make no agreement in advance about the term of the agreement, either principal or agent can terminate at any time.
- *Wrongful Termination.* An agency relationship is a personal relationship. Hiring an agent is not like buying a book. You might not care which copy of the book you buy, but you do care which agent you hire. If an agency relationship is not working out, the courts will not force the agent and principal to stay together. **Either party always has the *power* to walk out. They may not, however, have the *right*.** If one party's departure from the agency relationship violates the agreement and causes harm to the other party, the wrongful party must pay damages. Nonetheless, he will be permitted to leave. If Boris has agreed to work for Alexandra for two years but he wants to leave after one, he can leave, provided he pays Alexandra the cost of hiring and training a replacement.

  If the agent is a **gratuitous** agent (i.e., is not being paid), he has both the power and the right to quit any time he wants, regardless of the agency agreement. If Boris is doing this job for Alexandra as a favor, he will not owe her damages when he stops work.

Principal or Agent Can No Longer Perform Required Duties

If the principal or the agent is unable to perform the duties required under the agency agreement, the agreement terminates.

- **If either the agent or the principal fails to obtain (or keep) a license necessary to perform duties under the agency agreement, the agreement ends.** Caleb hires Allegra to represent him in a lawsuit. If she is disbarred, their agency agreement terminates because the agent is no longer allowed in court. Alternatively, if Emil hires Bess to work in his gun shop, their agency relationship terminates when he loses his license to sell firearms.
- **The bankruptcy of the agent or the principal terminates an agency relationship only if it affects their ability to perform.** Bankruptcy rarely interferes with an agent's responsibilities. After all, there is generally no reason why an agent cannot continue to act for the principal whether the agent is rich or poor. If Lewis, the real estate agent, becomes bankrupt, he can continue to represent Ida or anyone else who wants to sell a house. The bankruptcy of a principal is different, however, because after filing for

bankruptcy, the principal loses control of his assets. A bankrupt principal may be unable to pay the agent or honor contracts that the agent enters into on his behalf. Therefore, the bankruptcy of a principal is more likely to terminate an agency relationship.

- **An agency relationship terminates upon the death or incapacity of either the principal or the agent.** Agency is a personal relationship, and when the principal dies, the agent cannot act on behalf of a nonexistent person.[9] Of course, a nonexistent person cannot act either, so the relationship also terminates when the agent dies. Incapacity has the same legal effect because either the principal or the agent is at least temporarily unable to act.
- **If the agent violates her duty of loyalty, the agency agreement automatically terminates.** Agents are appointed to represent the principal's interest; if they fail to do so, there is no point to the relationship. Louisa is negotiating a military procurement contract on behalf of her employer, Missiles R Us, Inc. In the midst of these negotiations, she becomes very friendly with Sam, the government negotiator. One night over drinks, she tells Sam what Missiles' real costs are on the project and the lowest bid it could possibly make. By passing on this confidential information, Louisa has violated her duty of loyalty, and her agency relationship terminates.

Change in Circumstances

After the agency agreement is negotiated, circumstances may change. If these changes are significant enough to undermine the purpose of the agreement, the relationship ends automatically. Andrew hires Melissa to sell his country farm for $100,000. Shortly thereafter, the largest oil reserve in North America is discovered nearby. The farm is now worth 10 times Andrew's asking price. Melissa's authority terminates automatically.

Other changes in circumstance that affect an agency agreement are:

- *Change of Law.* If the agent's responsibilities become illegal, the agency agreement terminates. Oscar has hired Marta to ship him succulent avocados from California's Imperial Valley. Before she sends the shipment, Mediterranean fruit flies are discovered, and all fruits and vegetables in California are quarantined. The agency agreement terminates because it is now illegal to ship the California avocados.
- *Loss or Destruction of Subject Matter.* Andrew hired Damian to sell his Palm Beach condominium, but before Damian could even measure the living room, Andrew's creditors attached the condo. Damian is no longer authorized to sell the real estate because Andrew has "lost" the subject matter of his agency agreement with Damian.

Effect of Termination

Once an agency relationship ends, the agent no longer has the authority to act for the principal. If she continues to act, she is liable to the principal for any damages he incurs as a result. The Mediterranean fruit fly quarantine ended Marta's agency. If she sends Oscar the avocados anyway and he is fined for possession of a fruit fly, Marta must pay the fine.

The agent loses her authority to act, but some of the duties of both the principal and agent continue even after the relationship ends:

- *Principal's Duty to Indemnify Agent.* Oscar must reimburse Marta for expenses she incurred before the agency ended. If Marta accumulated mileage on her car during her search for the perfect avocado, Oscar must pay her for gasoline and depreciation. But he owes her nothing for her expenses after the agency relationship ends.

---

[9] Restatement (Third) of Agency §§3.05, 3.06, 3.07, 3.08.

- *Confidential Information.* Remember the "He's So Fine" case earlier in the chapter? George Harrison's agent used confidential information to negotiate on his own behalf the purchase of the "He's So Fine" copyright. An agent is not entitled to use confidential information even after the agency relationship terminates.

LIABILITY

Thus far, this chapter has dealt with the relationship between principals and agents. Although an agent can dramatically increase his principal's ability to accomplish her goals, an agency relationship also dramatically increases the risk of legal liability to third parties. A principal may be liable in tort for any harm the agent causes and also liable in contract for agreements that the agent signs. Indeed, once a principal hires an agent, she may be liable to third parties for his acts, even if he disobeys instructions. Agents may also find themselves liable to third parties.

PRINCIPAL'S LIABILITY FOR CONTRACTS

Many agents are hired for the primary purpose of entering into contracts on behalf of their principals. Salespeople, for example, may do little other than sign on the dotted line. Most of the time, the principal wants to be liable on these contracts. But even if the principal is unhappy (because, say, the agent has disobeyed orders), the principal generally cannot rescind contracts entered into by the agent. After all, if someone is going to be penalized, it should be the principal who hired the disobedient agent, not the innocent third party.

The principal is liable for the acts of an agent if (1) the agent had *authority,* or (2) the principal *ratifies* the acts of the agent.

To say that the principal is "liable for the acts" of the agent means that the principal is as responsible as if he had performed the acts himself. It also means that the principal is liable for statements the agent makes to a third party. Thus, when a lawyer lied on an application for malpractice insurance, the insurance company was allowed to void the policy for the entire law firm. It was as if the firm had lied. In addition, the principal is deemed to know any information that the agent knows or should know.

Authority

A principal is bound by the acts of an agent if the agent has authority. There are three types of authority: express, implied, and apparent. Express and implied authority are categories of actual authority because the agent is truly authorized to act for the principal. In apparent authority, the principal is liable for the agent's actions even though the agent was *not* authorized.

Express Authority

The principal grants **express authority** by words or conduct that, reasonably interpreted, cause the agent to believe the principal desires her to act on the principal's account.[10] In other words, the principal asks the agent to do something and the agent does it. Craig calls his stockbroker, Alice, and asks her to buy 100 shares of Banshee Corp. for his account. She has *express authority* to carry out this transaction.

[10]Restatement (Third) of Agency §2.01.

Implied Authority

Unless otherwise agreed, authority to conduct a transaction includes authority to do acts that are reasonably necessary to accomplish it.[11] The principal does not have to micromanage the agent. David has recently inherited a house from his grandmother. He hires Nell to auction off the house and its contents. She hires an auctioneer, advertises the event, rents a tent, and generally does everything necessary to conduct a successful auction. After withholding her expenses, she sends the tidy balance to David. Totally outraged, he calls her on the phone, "How dare you hire an auctioneer and rent a tent? I never gave you permission! I absolutely *refuse* to pay these expenses!"

Did Nell have the authority to hire this auctioneer?

David is wrong. A principal almost never gives an agent absolutely complete instructions. Unless some authority is implied, David would have had to say, "Open the car door, get in, put the key in the ignition, drive to the store, buy stickers, mark an auction number on each sticker ..." and so forth. To solve this problem, the law assumes that the agent has authority to do anything that is reasonably necessary to accomplish her task.

Apparent Authority

A principal can be liable for the acts of an agent who is not, in fact, acting with authority if the *principal's* conduct causes a third party reasonably to believe that the agent is authorized.[12] In the case of *express* and *implied* authority, the principal has authorized the agent to act. Apparent authority is different: the principal has *not* authorized the agent, but has done something to make an innocent third party *believe* the agent is authorized. As a result, the principal is every bit as liable to the third party as if the agent did have authority.

For example, Zbigniew Lambo and Scott Kennedy were brokers at Paulson Investment Co., a stock brokerage firm in Oregon. The two men violated securities laws by selling unregistered stock, which ultimately proved to be worthless. Kennedy and Lambo were liable, but they were unable to repay the money. Either Paulson or its customers would end up bearing the loss. What is the fair result? The law takes the view that the principal is liable, not the third party, because the principal, by word or deed, allowed the third party to believe that the agent was acting on the principal's behalf. The principal could have prevented the third party from losing money.

Although the two brokers did not have *express* or *implied* authority to sell the stock (Paulson had not authorized them to break the law), the company was nonetheless liable on the grounds that the brokers had *apparent* authority. Paulson had sent letters to its customers notifying them when it hired Kennedy. The two brokers made sales presentations at Paulson's offices. The company had never told customers that the two men were not authorized to sell this worthless stock.[13] Thus the agents *appeared* to have authority, even though they did not. Of course, Paulson had the right to recover from Kennedy and Lambo, if it could ever compel them to pay.

Remember that the issue in apparent authority is always what the *principal* has done to make the *third party* believe that the *agent* has authority. Suppose that Kennedy and Lambo never worked for Paulson but, on their own, printed up Paulson stationery. The company would not be liable for the stock the two men sold because it had never done or said anything that would reasonably make a third party believe that the men were its agents.

[11]Restatement (Third) of Agency §2.02.
[12]Restatement (Third) of Agency §2.03.
[13]*Badger v. Paulson Investment Co.*, 311 Ore. 14, 803 P.2d 1178, 1991 Ore. LEXIS 7 (S. Ct. OR, 1991).

Ratification

If a person accepts the benefit of an unauthorized transaction or fails to repudiate it, then he is as bound by the act as if he had originally authorized it. He has *ratified* the act.[14] Many of the cases in agency law involve instances in which one person acts *without* authority for another. To avoid liability, the alleged principal shows that he had not authorized the task at issue. But sometimes after the fact, the principal decides that he approves of what the agent has done even though it was not authorized at the time. The law would be perverse if it did not permit the principal, under those circumstances, to agree to the deal the agent has made. The law is not perverse, but it is careful. Even if an agent acts without authority, the principal can decide later to be bound by her actions so long as these requirements are met:

- The "agent" indicates to the third party that she is acting for a principal.
- The "principal" knows all the material facts of the transaction.
- The "principal" accepts the benefit of the whole transaction, not just part.
- The third party does not withdraw from the contract before ratification.

A night clerk at the St. Regis Hotel in Detroit, Michigan, was brutally murdered in the course of a robbery. A few days later, the *Detroit News* reported that the St. Regis management had offered a $1,000 reward for any information leading to the arrest and conviction of the killer. Two days after the article appeared, Robert Jackson turned in the man who was subsequently convicted of the crime. But then it was Jackson's turn to be robbed—the hotel refused to pay the reward on the grounds that the manager who had made the offer had no authority. Jackson still had one weapon left: he convinced the court that the hotel had ratified the offer. One of the hotel's owners admitted he read the *Detroit News*. The court concluded that if someone reads a newspaper, he is sure to read any articles about a business he owns; therefore, the owner must have been aware of the offer. He accepted the benefit of the offer by failing to revoke it publicly by, say, announcing to the press that the reward was invalid. This failure to revoke constituted a ratification, and the hotel was liable.[15]

Subagents

Many of the examples in this chapter involve a single agent acting for a principal. Real life is often more complex. Daniel, the owner of a restaurant, hires Michaela to manage it. She in turn hires chefs, waiters, and dishwashers. Daniel has never even met the restaurant help, yet they are also his agents, albeit a special category called **subagent.** Michaela is called an **intermediary agent**—someone who hires subagents for the principal.

As a general rule, an agent has no authority to delegate her tasks to another unless the principal authorizes her to do so. But when an agent is authorized to hire a subagent, the principal is as liable for the acts of the subagent as he is for the acts of a regular agent. Daniel authorizes Michaela to hire a restaurant staff, so she hires Lydia to serve as produce buyer. When Lydia buys food for the restaurant, Daniel must pay the bill.

Agent's Liability for Contracts

The agent's liability on a contract depends upon how much the third party knows about the principal. Disclosure is the agent's best protection against liability.

[14] Restatement (Third) of Agency §4.01.
[15] *Jackson v. Goodman*, 69 Mich. App. 225, 244 N.W.2d 423, 1976 Mich. App., LEXIS 741 (Mich. Ct. App., 1976).

Fully Disclosed Principal

An agent is not liable for any contracts she makes on behalf of a *fully* disclosed principal. A principal is fully disclosed if the third party knows of his *existence* and his *identity*. Augusta acts as agent for Parker when he buys Tracey's prize-winning show horse. Augusta and Tracey both grew up in posh Grosse Pointe, Michigan, where they attended the same elite schools. Tracey does not know Parker, but she figures any friend of Augusta's must be OK. She figures wrong—Parker is a charming deadbeat. He injures Tracey's horse, fails to pay the full contract price, and promptly disappears. Tracey angrily demands that Augusta make good on Parker's debt. Unfortunately for Tracey, Parker was a fully disclosed principal—Tracey knew of his *existence* and his *identity*. Although Tracey partly relied on Augusta's good character when contracting with Parker, Augusta is not liable because Tracey knew who the principal was and could have (should have) investigated him. Augusta did not promise anything herself, and Tracey's only recourse is against the principal, Parker (wherever he may be).

To avoid liability when signing a contract on behalf of a principal, an agent must clearly state that she is an agent and also must identify the principal. Augusta should sign a contract on behalf of her principal, Parker, as follows: "Augusta, as agent for Parker" or "Parker, by Augusta, Agent."

Unidentified Principal

In the case of an *unidentified* principal, the third party can recover from either the agent or the principal. (An unidentified principal is also sometimes called a "partially disclosed principal.") A principal is unidentified if the third party knew of his *existence* but not his *identity*. Suppose that, when approaching Tracey about the horse, Augusta simply says, "I have a friend who is interested in buying your champion." Any friend of Augusta's is a friend of Tracey's—or so Tracey thinks. Parker is an unidentified principal because Tracey knows only that he exists, not who he is. She cannot investigate his creditworthiness because she does not know his name. Tracey relies solely on what she is able to learn from the agent, Augusta. Both Augusta and Parker are liable to Tracey. (They are jointly and severally liable, which means that Tracey can recover from either or both of them. However, she cannot recover more than the total she is owed: if her damages are $100,000, she can recover that amount from either Augusta or Parker, or partial amounts from both, but in no event more than $100,000.)

Undisclosed Principal

In the case of an *undisclosed* principal, the third party can recover from either the agent or the principal. A principal is undisclosed if the third party did not know of his existence. Suppose that Augusta simply asks to buy the horse herself, without mentioning that she is purchasing it for Parker. In this case, Parker is an undisclosed principal because Tracey does not know that Augusta is acting for someone else. Both Parker and Augusta are jointly and severally liable. As Exhibit 28.1 illustrates, the principal is always liable, but the agent is not unless the principal's identity is a mystery.

In some ways, the concept of an undisclosed principal violates principles of contract law. If Tracey does not even know that Parker exists, how can they have an agreement or a meeting of the minds? Is such an arrangement fair to Tracey? No matter—a contract with an undisclosed principal is binding. The following incident illustrates why.

William Zeckendorf was a man with a plan. For years, he had been eyeing a six-block tract of land along New York's East River. It was a wasteland of slums and slaughterhouses, but he could see its potential. The meat packers had refused to sell to him, however, because they knew they would never be permitted to build slaughterhouses in Manhattan again. Finally, he got the phone call he had been waiting for. The companies were willing to sell—at more than three times the market price of surrounding land. Undeterred, Zeckendorf immediately put down a $1 million deposit. But to make his investment worthwhile, he needed to buy the neighboring property—once the slaughterhouses were gone, the other land would be much more valuable. Zeckendorf was well known as a wealthy developer; he

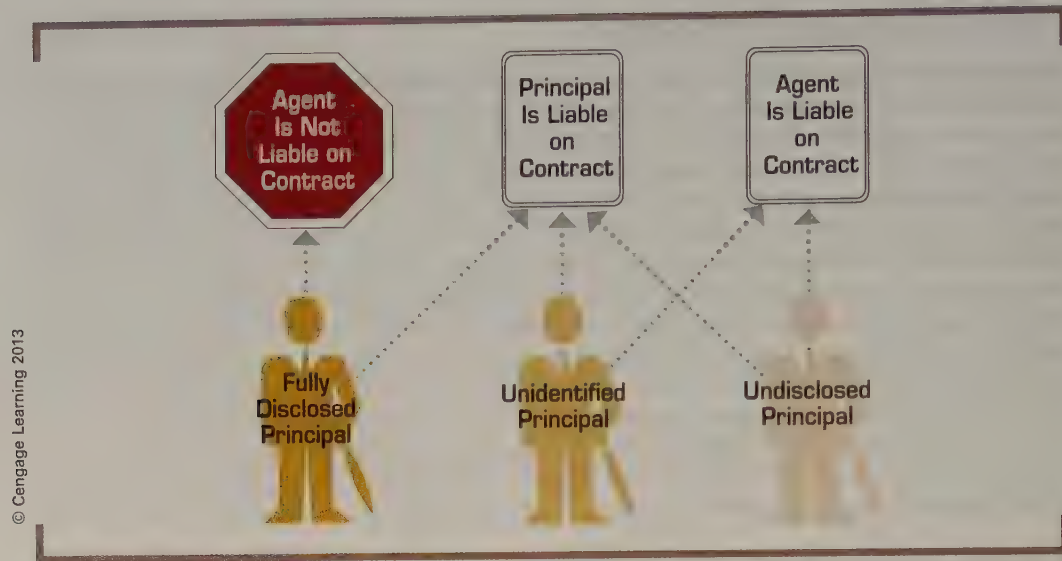

EXHIBIT 28.1

had begun his business career managing the Astor family's real estate holdings. If he personally tried to negotiate the purchase of the surrounding land, word would soon get out that he wanted to put together a large parcel. Prices would skyrocket, and the project would become too costly. So he hired agents to purchase the land for him. To conceal his involvement further, he went to South America for a month. When he returned, his agents had completed 75 different purchases, and he owned 18 acres of land.

Shortly afterwards, the United Nations (UN) began seeking a site for its headquarters. President Truman favored Boston, Philadelphia, or a location in the Midwest. The UN committee suggested Greenwich or Stamford, Connecticut. But John D. Rockefeller settled the question once and for all. He purchased Zeckendorf's land and donated it to the UN (netting Zeckendorf a 25 percent profit). Without the cooperation of agency law, the UN headquarters would not be in New York today.

> Without the cooperation of agency law, the UN headquarters would not be in New York today.

Because of concerns about fair play, there are some exceptions to the rule on undisclosed principals. **A third party is not bound to the contract with an undisclosed principal if (1) the contract specifically provides that the third party is not bound to anyone other than the agent, or (2) the agent lies about the principal because she knows the third party would refuse to contract with him.** Suppose that a large university is buying up land in an impoverished area near its campus. An owner of a house there wants to make sure that if he sells to the university, he gets a higher price than if he sells to an individual with more limited resources. A cagey property owner, when approached by one of the university's agents, could ask for a clause in the contract providing that the agent was not representing someone else. If the agent told the truth, the owner could demand a higher price. If the agent lied, then the owner could rescind the contract when the truth emerged.

Unauthorized Agent

Thus far in this section, we have been discussing an agent's liability to a third party for a transaction that was authorized by the principal. Sometimes, however, agents act without the authority of a principal. **If the agent has no authority (express, implied, or apparent), the**

principal is not liable to the third party, and the agent is. Suppose that Augusta agrees to sell Parker's horse to Tracey. Unfortunately, Parker has never met Augusta and has certainly not authorized this transaction. Augusta is hoping that she can persuade him to sell, but Parker refuses. Augusta, but not Parker, is liable to Tracey for breach of contract.

Principal's Liability for Torts

An employer is liable for a tort committed by its employee acting within the scope of employment or acting with authority.[16] This principle of liability is called ***respondeat superior,*** which is a Latin phrase that means "let the master answer." Under the theory of *respondeat superior*, the employer (that is, the principal) is liable for misbehavior by the employee (that is, the agent) whether or not the employer was at fault. Indeed, the employer is liable even if he *forbade* or tried to *prevent* the employee from misbehaving. Thus a company could be liable for the damage a worker causes while driving and talking on her cell phone, even if she is violating company policy at the time. This sounds like a harsh rule. The logic is that because the principal controls the agent, he should be able to *prevent* misbehavior. If he cannot prevent it, at least he can *insure* against the risks. Furthermore, the principal may have deeper pockets than the agent or the injured third party and thus be better able to *afford* the cost of the agent's misbehavior.

To apply the principle of *respondeat superior*, it is important to understand each part of the rule.

Employee

There are two kinds of agents: (1) *employees* and (2) *independent contractors*. **A principal *may be* liable for the torts of an employee but generally is *not* liable for the torts of an independent contractor.** Because of this rule, the distinction between an employee and an independent contractor is important.

Employee or Independent Contractor?

The more control the principal has over an agent, the more likely that the agent will be considered an employee. Therefore, when determining if agents are employees or independent contractors, courts consider whether:

- The principal supervises details of the work.
- The principal supplies the tools and place of work.
- The agents work full time for the principal.
- The agents receive a salary or hourly wages, not a fixed price for the job.
- The work is part of the regular business of the principal.
- The principal and agents believe they have an employer-employee relationship.
- The principal is in business.[17]

Suppose, for example, that Mutt and Jeff work 40 hours a week at Swansong Media preparing food for the company's onsite dining room. They earn a weekly salary. Swansong provides food, utensils, and kitchen. This year, however, Swansong decides to go all out for its holiday party, so it hires FiFi LaBelle to prepare special food. She buys the food, prepares it in her own kitchen, and delivers it to the company in time for the party. She is an independent contractor, while Mutt and Jeff are employees.

---

[16]Restatement (Third) of Agency §7.07.
[17]Ibid.

Negligent Hiring

Principals prefer agents to be considered independent contractors, not employees, because, as a general rule, principals are not liable for the torts of an independent contractor. There is, however, one exception to this rule: **the principal is liable for the torts of an independent contractor *if* the principal has been negligent in hiring or supervising her.** Remember that, under *respondeat superior*, the principal is liable *without fault* for the torts of employees. The case of independent contractors is different: the principal is liable only if he was *at fault* by being careless in his hiring or supervising.

Exhibit 28.2 illustrates the difference in liability between an employee and an independent contractor.

Scope of Employment

Principals are liable only for torts that an employee commits within the *scope of employment*. If an employee leaves a pool of water on the floor of a store and a customer slips and falls, the employer is liable. But if the same employee leaves water on his own kitchen floor and a friend falls, the employer is not liable because the employee is not acting within the scope of employment. An employee is acting within the scope of employment if the act:

- Is one that employees are generally responsible for
- Takes place during hours that the employee is generally employed
- Is part of the principal's business
- Is similar to the one the principal authorized
- Is one for which the principal supplied the tools; and
- Is not seriously criminal.

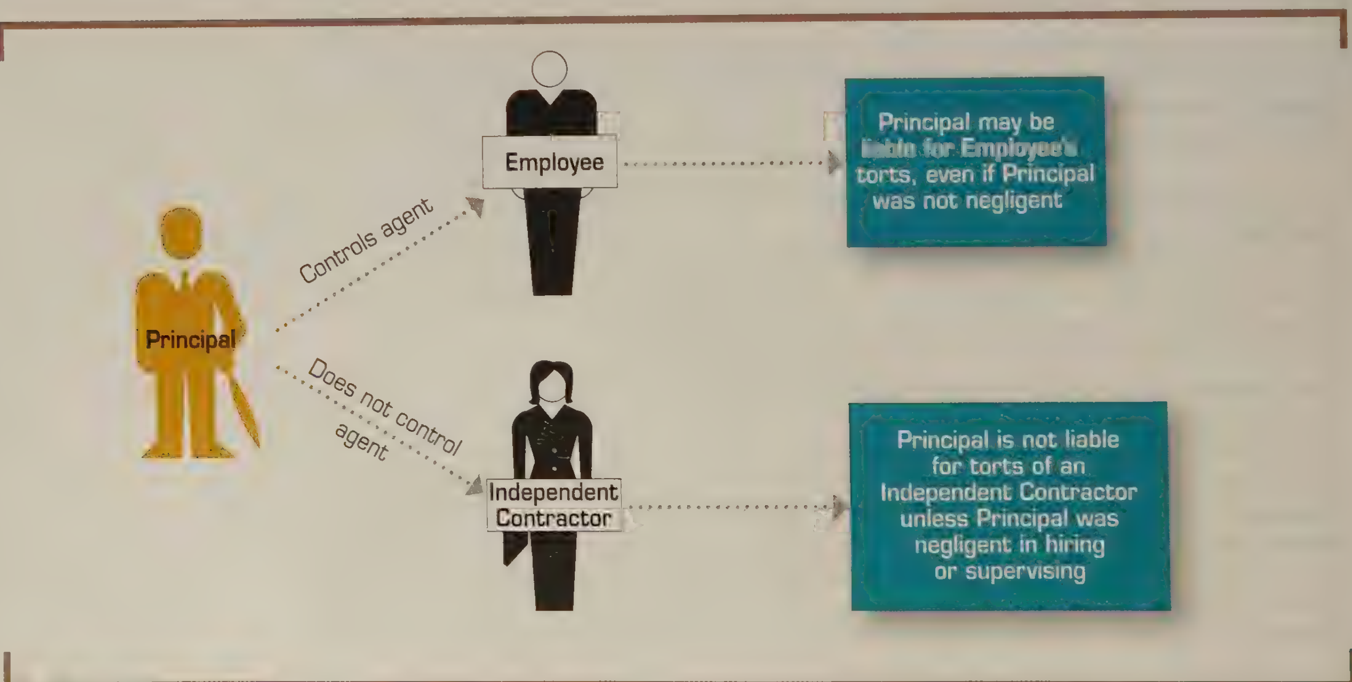

EXHIBIT 28.2

Scope of employment cases raise two major issues: authorization and abandonment.

Authorization

In authorization cases, the agent is clearly working for the principal but commits an act that the principal has not authorized. Although Jane has often told the driver of her delivery van not to speed, Hank ignores her instructions and plows into Bernadette. At the time of the accident, he is working for Jane, delivering flowers for her shop, but his act is not authorized. **An act is within the scope of employment, even if expressly forbidden, if it is of the same general nature as that authorized or if it is incidental to the conduct authorized.** Hank was authorized to drive the van, but not to speed. However, his speeding was of the same general nature as the authorized act, so Jane is liable to Bernadette.

Abandonment

The second major issue in a *scope of employment* case involves abandonment. **The principal is liable for the actions of the employee that occur while the employee is at work, but not for actions that occur after the employee has abandoned the principal's business.** Although the rule sounds straightforward, the difficulty lies in determining whether the employee has in fact abandoned the principal's business. The employer is liable if the employee is simply on a *detour* from company business, but the employer is not liable if the employee is off on a *frolic of his own*. Suppose that Hank, the delivery van driver, speeds during his afternoon commute home. An employee is generally not acting within the scope of his employment when he commutes to and from work, so his principal, Jane, is not liable. Or suppose that, while on the way to a delivery, he stops to view his favorite movie classic, *Dead on Arrival*. Unable to see in the darkened theater, he knocks Anna down, causing grave harm. Jane is not liable because Hank's visit to the movies is outside the scope of his employment. On the other hand, if Hank stops at the Burger Box drive-in window en route to making a delivery, Jane is liable when he crashes into Anna on the way out of the parking lot because this time, he is simply making a detour.

Was the employee in the following case acting within the scope of his employment while driving to work? You be the judge.

You be the Judge

Zankel v. United States of America

2008 U.S. Dist. LEXIS 23655
United States District Court for the Western District of Pennsylvania, 2008

Facts: Staff Sergeant William E. Dreyer was a recruiter for the United States Marine Corps. Driving to work one morning at 6:40 a.m., in a government-owned car, he struck and killed 12-year-old Justin Zankel. The child's parents sued the federal government, claiming that it was liable for Dreyer's actions because he had been acting within the scope of his employment at the time of the accident.

The Marine Corps had provided Dreyer with a car to drive while on government business, but he was not permitted to use this car while commuting to and from home unless he had specific authorization from his boss, Major Michael Sherman. However, Sherman was flexible in giving authorization and even permitted his soldiers simply to leave a message on his voicemail. Indeed, he had denied only about a dozen such requests over a three-year period.

Each month, Dreyer was expected to meet specific quotas for the number of contracts signed and recruits shipped to basic training. However, despite working 16 to 18 hours every day of the week, Dreyer had not met his recruiting quotas for months. Sherman had formally reprimanded him and increased his target for the following month.

On the day before the accident, Dreyer left home at 6:30 a.m., driving his own car. At the office, he switched to

a government car and worked until 10:45 p.m. He then discovered that his personal car would not start. He did not want to call Sherman that late, so he drove his government car home without permission. He believed that, had he called, Sherman would have said it was OK.

Dreyer arrived home at midnight. He was under orders to attend an early-morning training session the next day. So he awoke early and left home at 6:35 a.m. At 6:40 a.m., his car hit Justin Zankel.

You Be the Judge: ***Was Dreyer within the scope of employment when he killed Zankel?***

Argument for the Zankels: At the time of the accident, Dreyer was driving a government vehicle. Although he had not requested permission to drive the car, if he had done so, permission certainly would have been granted.

Moreover, even if Dreyer was not authorized to drive the Marine Corps car, the government is still liable because his activity was of the same general nature as that authorized and it was incidental to the conduct authorized. Driving the car was part of Dreyer's work. Indeed, he could not perform his job without it. In addition, Dreyer was on the road early so that he could attend a required training session. He was exhausted from trying to reach impossible goals. The Marine Corps must bear responsibility for this tragic accident.

Argument for United States: The government had a clear policy stating that recruiters were not authorized to drive a government car without first requesting permission. Dreyer had not done so. Therefore, he was not authorized to drive the government car at the time of the accident.

Moreover, it is well established that an employee commuting to and from work is not within the scope of employment. If Dreyer had been driving from one recruiting effort to another, that would be a different story. But in this case, he had not yet started work for the Marine Corps, and therefore the government is not liable.

Intentional Torts

A principal is *not* liable for the *intentional* torts of an employee unless (1) the employee intended to serve some purpose of the employer; or (2) the employer was negligent in hiring or supervising this employee.

During an NBA basketball game, Kobe pushes LeBron into some chairs under the basket to prevent him from scoring a breakaway layup. Kobe's team is liable for his actions because he was motivated, at least in part, by a desire to help his team. But if Kobe hits LeBron in the parking lot after the playoffs are over, Kobe's team is *not* liable because he is no longer motivated by a desire to help the team. His motivation now is personal revenge or frustration.

In the following case, a priest did wrong. Was he serving some purpose of the Church? Was the Church liable for his criminal acts?

Doe v. Liberatore

478 F. Supp. 2d 742; 2007 U.S. Dist. Lexis 19067
United States District Court for the Middle District of Pennsylvania, 2007

Facts: A number of priests wrote to James Timlin, the Bishop of Scranton, warning him that Father Albert Liberatore was engaging in a sexual relationship with one of his male students. Bishop Timlin transferred Liberatore from the school to a parish church.

Fourteen year-old John Doe was a member of Liberatore's parish. Liberatore befriended Doe, taking him on outings and giving him expensive gifts. Doe routinely slept in Liberatore's bed. A number of priests told Bishop Timlin that they feared Liberatore was sexually abusing Doe. One witness reported that she had seen Doe put his hand down Liberatore's pants. Eventually, Doe himself told a priest that he was being sexually abused. The priest instructed Doe to forgive Liberatore and not to tell other people because it would ruin Doe's life and the lives of others.

Only after Liberatore pleaded guilty to multiple counts of sexual abuse did the Church dismiss him from

the priesthood. Doe filed suit against the Church and Bishop Timlin, alleging that they were liable for the torts committed by Liberatore. The defendants filed a motion to dismiss.

Issues: ***Was Liberatore acting within the scope of his employment? Was the Church liable for his criminal acts?***

Excerpts from Judge Caputo's Decision: Under Pennsylvania law, an employer is held liable for the negligent acts of his employee which cause injuries to a third party, provided that such acts were committed during the course of and within the scope of the employment.

The conduct of an employee is considered within the scope of employment if: (1) it is of a kind and nature that the employee is employed to perform; (2) it occurs substantially within the authorized time and space limits; (3) it is actuated, at least in part, by a purpose to serve the employer; and (4) if force is intentionally used by the employee against another, the use of force is not unexpected by the employer.

Here, it is clear that Liberatore's sexual molestation of Plaintiff was not within the scope or nature of his employment as a priest. Indeed, the activity of which Plaintiff now complains is wholly inconsistent with the role of one who is received into the Holy Orders as an ordained priest of the Roman Catholic Church. Moreover, the acts of sexual abuse perpetrated by Liberatore were both outrageous and certainly not actuated by any purpose of serving the Diocese, Sacred Heart, or Bishop Timlin. Therefore, the Court will grant summary judgment in favor of the Diocese, Sacred Heart, and Bishop Timlin as to [this issue].

Plaintiff next claims that the Diocese, Sacred Heart, and Bishop Timlin are liable for negligence in their hiring, supervision, and retention of Liberatore as a Diocesan priest. [A]n employer owes a duty to exercise reasonable care in selecting, supervising and controlling employees. The Supreme Court of Pennsylvania has held that, to fasten liability on an employer, it must be shown that the employer knew or, in the exercise of ordinary care, should have known of the necessity for exercising control of his employee.

In the instant case, the Diocese, Sacred Heart, and Bishop Timlin may be liable if they knew or should have known that Liberatore had a propensity for committing sexual abuse and his employment as Pastor at Sacred Heart might create a situation where his propensity would harm a third person, such as Plaintiff. [A] reasonable jury could conclude that the Diocese, Sacred Heart, and Bishop Timlin were negligent or reckless in supervising and retaining Liberatore. However, the Court concludes that a reasonable jury could not find that the Diocese, Sacred Heart, and Bishop Timlin were negligent or reckless in hiring Liberatore because there is no evidence suggesting that Liberatore was or would become a child sex predator when he was hired.

Physical or Non-Physical Harm

In the case of *physical* torts, a principal is liable for the negligent conduct of a employee that occurs within the scope of employment. The rule for *nonphysical* torts (that is, torts that harm only reputation, feelings, or wallet) is different. **Nonphysical torts are treated more like a contract claim, and the principal is liable if the employee acted with express, implied, or apparent authority.**[18] For example, suppose that Dwayne buys a house insurance policy from Andy, who is an agent of the Balls of Fire Insurance Company. Andy throws away Dwayne's policy and pockets his premiums. When Dwayne's house burns down, Balls of Fire is liable because Andy was acting with apparent authority.

EXAM Strategy

Question: Daisy was the founder of an Internet start-up company. Mac was her driver. One day, after he had dropped her at a board meeting, he went to the car wash. There, he told an attractive woman that he worked for a money management firm. She gave him money to invest. On the way out of the car wash, he was so excited that he hit another customer's expensive car. Who is liable for Mac's misdeeds?

Strategy: In determining a principal's liability, begin by figuring out whether the agent has committed a physical or non-physical tort. Remember that the principal is liable for physical torts within the scope of employment, but for nonphysical torts, she is liable only if the employee acted with authority.

Result: In this case, Daisy is liable for the damage to the car because that was a physical tort within the scope of employment. But she is not liable for the investment money because Mac did not have authority (express, implied, or apparent) to take those funds.

Agent's Liability for Torts

The focus of the prior section was on the *principal's* liability for the agent's torts. But it is important to remember that **agents are always liable for their own torts.** Agents who commit torts are personally responsible, whether or not their principal is also liable. Even if the tort was committed to benefit the principal, the agent is still liable. So the sailor who got into a fistfight while rousting a shipmate from bed is liable even though he thought he was acting for the benefit of his principal.

This rule makes obvious sense. If the agent were not liable, he would have little incentive to be careful. Imagine Hank driving his delivery van for Jane. If he were not personally liable for his own torts, he might think, "If I drive fast enough, I can make it through that light even though it just turned red. And if I don't, what the heck, it'll be Jane's problem, not mine." Agents, as a rule, may have fewer assets than their principal, but it is important that their personal assets be at risk in the event of their negligent behavior.

If the agent and principal are *both* liable, which does the injured third party sue? The principal and the agent are *jointly and severally liable*, which means, as we have seen, that the injured third party can sue either one or both, as she chooses. If she recovers from the principal, he can sue the agent.

Chapter Conclusion

When students enroll in a business law course, they fully expect to learn about torts and contracts, corporations and partnerships. They probably do not think much about agency law; many of them have not even heard the term before. Yet it is an area of the law that affects us all because each of us has been and will continue to be both an agent and a principal many times in our lives.

Exam Review

1. **CREATING AN AGENCY RELATIONSHIP** A principal and an agent mutually consent that the agent will act on behalf of the principal and be subject to the principal's control, thereby creating a fiduciary relationship. (pp. 671–672)

2. **ELEMENTS NOT REQUIRED** An agency relationship can exist without either a written agreement, a formal agreement, or compensation. (pp. 672–673)

3. **AN AGENT'S DUTIES TO THE PRINCIPAL** An agent owes these duties to the principal: duty of loyalty, duty to obey instructions, duty of care, and duty to provide information. (pp. 673–677)

4. **THE PRINCIPAL'S REMEDIES IN THE EVENT OF A BREACH** The principal has three potential remedies when the agent breaches her duty: recovery of damages the breach has caused, recovery of any profits earned by the agent from the breach, and rescission of any transaction with the agent. (p. 678)

5. **THE PRINCIPAL'S DUTIES TO THE AGENT** The principal has three duties to the agent: to compensate as provided by the agreement, to reimburse legitimate expenses, and to cooperate with the agent. (pp. 678–679)

6. **POWER AND RIGHT TO TERMINATE** Both the agent and the principal have the power to terminate an agency relationship, but they may not have the right. If the termination violates the agency agreement and causes harm to the other party, the wrongful party must pay damages. (pp. 679–682)

7. **AUTOMATIC TERMINATION** An agency relationship automatically terminates if the principal or agent no longer can perform the required duties or if a change in circumstances renders the agency relationship pointless. (pp. 680–681)

8. **A PRINCIPAL'S LIABILITY FOR CONTRACTS** A principal is liable for the contracts of the agent if the agent has express, implied, or apparent authority. (pp. 682–684)

9. **EXPRESS AUTHORITY** The principal grants express authority by words or conduct that, reasonably interpreted, cause the agent to believe that the principal desires her to act on the principal's account. (p. 682)

10. **IMPLIED AUTHORITY** Implied authority includes authority to do acts that are incidental to a transaction, usually accompany it, or are reasonably necessary to accomplish it. (p. 683)

11. **APPARENT AUTHORITY** Apparent authority means that a principal is liable for the acts of an agent who is not, in fact, acting with authority if the principal's conduct causes a third party reasonably to believe that the agent is authorized. (p. 683)

EXAM Strategy

Question: Dr. James Leonard wrote Dr. Edward Jacobson to offer him the position of chief of audiology at Jefferson Medical College in Philadelphia. In the letter, Leonard stated that this appointment would have to be approved by the promotion and appointment committee. Jacobson believed that the appointment committee acted only as a "rubber stamp," affirming whatever recommendation Leonard made. Jacobson accepted Leonard's offer and proceeded to sell his house and quit his job in Colorado. You can guess what happened next. Two weeks later, Leonard sent Jacobson another letter, rescinding his offer because of opposition from the appointment committee. Did Leonard have apparent authority?

Strategy: In cases of apparent authority, begin by asking what the principal did to make the third party believe that the agent was authorized. What did the Medical College do? (See the "Result" at the end of this section.)

12. **AN AGENT'S LIABILITY FOR A CONTRACT** An agent is not liable for any contract she makes on behalf of a fully disclosed principal. The principal is liable. In the case of a unidentified or undisclosed principal, both the agent and the principal are liable on the contract. (pp. 684–687)

13. **A PRINCIPAL'S LIABILITY FOR TORTS** An employer is liable for a tort committed by its employee acting within the scope of employment or acting with authority. (pp. 687–692)

EXAM Strategy

Question: While drunk, the driver of a subway car plows into the back of the car ahead of him, killing a passenger. It was against the rules for the driver to be drunk. Is the subway authority liable for the negligence of its employee?

Strategy: With a tort case, always determine first if the agents are employees or independent contractors. This worker was an employee. Then ask if the employee was acting within the scope of employment. Yes, he was driving a subway car, which is what he was hired to do. Does it matter than he had violated subway rules? No, his violation of the rules does not eliminate his principal's liability. (See the "Result" at the end of this section.)

14. **INDEPENDENT CONTRACTOR** The principal is liable for the physical torts of an independent contractor only if the principal has been negligent in hiring or supervising him. (p. 687)

15. **INTENTIONAL TORTS** A principal is not liable for the intentional torts of an employee unless (1) the employee intended to serve some purpose of the employer; or (2) the employer was negligent in hiring or supervising the employee. (pp. 690–691)

EXAM Strategy

Question: What if the subway driver mentioned above had stabbed a passenger?

Strategy: In the case of an intentional tort, the principal is liable only if the agent was intending to serve some purpose of the employer or the employer was negligent in hiring or supervising him. (See the "Result" at the end of this section.)

16. **AGENT'S LIABILITY FOR TORTS** Agents are always liable for their own torts. (p. 692)

17. **NONPHYSICAL TORTS** A principal is liable only for the nonphysical torts of an employee who is acting with express, implied or apparent authority. (p. 691)

11. Result: No. Indeed, Leonard had told Jacobson that he did not have authority. If Jacobson chose to believe otherwise, that was his problem.

13. Result: The subway authority is liable.

15. Result: When he stabbed a passenger, the driver was not serving the purpose of the employer, so the subway authority would not be liable. There was no evidence that the subway authority had been negligent in its hiring or supervising of employees.

Multiple-Choice Questions

1. At Business University, semester enrollment begins at midnight on April 1. Jasper asked his roommate, Alonso, to register him for an important required course as a favor. Alonso agreed to do so but then overslept. As a result, Jasper could not enroll in the required course he needed to graduate and had to stay in school for an additional semester. Is Alonso liable to Jasper?
   (a) No, because an agency agreement is invalid unless the agent receives payment.
   (b) No, because Alonso was not grossly negligent.
   (c) No, because the cost of the extra semester is unreasonably high.
   (d) Yes, because Alonso disobeyed his instructions.

2. Finn learns that, despite his stellar record, he is being paid less than other salespeople at Barry Co., so he decides to start his own company. During his last month on the Barry payroll, he tells all of his clients about his new business. He also tells them that Barry is a great company, but his fees will be lower. After he opens the doors of his new business, most of his former clients move with him. Is Finn liable to Barry?
   (a) No, because he has not been disloyal to Barry—he praised the company.
   (b) No, because Barry was underpaying him.
   (c) No, because his clients have the right to hire whichever company they choose.
   (d) Yes, Finn has violated his duty of loyalty to Barry.

3. Kurt asked his car mechanic, Quinn, for help in buying a used car. Quinn recommends a Ford Focus that she has been taking care of its whole life. Quinn was working for the seller. Which of the following statements is true?
   (a) Quinn must pay Kurt the amount of money she received from the Ford's prior owner.
   (b) After buying the car, Kurt finds out that it needs $1,000 in repairs. He can recover that amount from Quinn, but only if Quinn knew about the needed repairs before Kurt bought the car.
   (c) Kurt cannot recover anything because Quinn had no obligation to reveal her relationship with the car's seller.
   (d) Kurt cannot recover anything because he had not paid Quinn for her help.

4. Figgins is the dean of a college. He appointed Sue as acting dean while he was out of the country and posted an announcement on the college website announcing that she was authorized to act in his place. He also told Sue privately that she did not have the right to make admissions decisions. While Figgins was gone, Sue overruled the admissions committee to admit the child of a wealthy alumnus. Does the child have the right to attend this college?
   (a) No, because Sue was not authorized to admit him.
   (b) No, because Figgins did not ratify Sue's decision.
   (c) Yes, because Figgins was a fully disclosed principal.
   (d) Yes, because Sue had apparent authority.

5. ***CPA QUESTION*** A principal will not be liable to a third party for a tort committed by an agent:
   (a) unless the principal instructed the agent to commit the tort.
   (b) unless the tort was committed within the scope of the agency relationship.
   (c) if the agency agreement limits the principal's liability for the agent's tort.
   (d) if the tort is also regarded as a criminal act.

6. ***CPA QUESTION*** Cox engaged Datz as her agent. It was mutually agreed that Datz would not disclose that he was acting as Cox's agent. Instead, he was to deal with prospective customers as if he were a principal acting on his own behalf. This he did and made several contracts for Cox. Assuming Cox, Datz, or the customer seeks to avoid liability on one of the contracts involved, which of the following statements is correct?
   (a) Cox must ratify the Datz contracts to be held liable.
   (b) Datz has no liability once he discloses that Cox was the real principal.
   (c) The third party can avoid liability because he believed he was dealing with Datz as a principal.
   (d) The third party may choose to hold either Datz or Cox liable.

Essay Questions

1. An elementary school custodian hit a child who wrote graffiti on the wall. Is the school district liable for this intentional tort by its employee?

2. What if the custodian hit one of the schoolchildren for calling him a name? Is the school district liable?

3. A soldier was drinking at a training seminar. Although he was told to leave his car at the seminar, he disobeyed orders and drove to a military club. On the way to the club, he was involved in an accident. Is the military liable for the damage he caused?

4. One afternoon while visiting friends, tennis star Vitas Gerulaitis fell asleep in their pool house. A mechanic had improperly installed the swimming pool heater, which leaked carbon monoxide fumes into the house where he slept, killing him.

His mother filed suit against the owners of the estate. On what theory would they be liable?

5. **YOU BE THE JUDGE WRITING PROBLEM** Sarah went to an auction at Christie's to bid on a tapestry for her employer, Fine Arts Gallery. The good news is that she purchased a Dufy tapestry for $77,000. The bad news is that it was not the one her employer had told her to buy. In the excitement of the auction, she forgot her instructions. Fine Art refused to pay, and Christie's filed suit. Is Fine Arts liable for the unauthorized act of its agent? **Argument for Christie's:** Christie's cannot possibly ascertain in each case the exact nature of a bidder's authority. Whether or not Sarah had actual authority, she certainly had apparent authority, and Fine Arts is liable. **Argument for Fine Arts:** Sarah was not authorized to purchase the Dufy tapestry, and therefore Christie's must recover from her, not Fine Arts.

Discussion Questions

1. **ETHICS** Mercedes has just begun work at Photobook.com. What a great place to work! Although the salary is not high, the company has fabulous perks. The dining room provides great food from 7 a.m. to midnight, five days a week. There is also a free laundry and dry-cleaning service. Mercedes's social life has never been better. She invites her friends over for Photobook meals and has their laundry done for free. And because her job requires her to be online all the time, she has plenty of opportunity to stay in touch with her friends by g-chatting, tweeting, and checking Facebook updates. She is, however, shocked that one of her colleagues takes paper home from the office for his children to use at home. Are these employees behaving ethically?

2. Kevin was the manager of a radio station, WABC. A competing station lured him away. In his last month on the job at WABC, he notified two key on-air personalities that if they were to leave the station, he would not hold them to their noncompete agreements. What can WABC do?

3. Jesse worked as a buyer for the Vegetable Co. Rachel offered to sell Jesse 10 tons of tomatoes for the account of Vegetable. Jesse accepted the offer. Later, Jesse discovered that Rachel was an agent for Sylvester Co. Who is liable on this contract?

4. The Pharmaceutical Association holds an annual convention. At the convention, Brittany, who was president of the association, told Luke that Research Corp. had a promising new cancer vaccine. Luke was so excited that he chartered a plane to fly to Research's headquarters. On the way, the plane crashed and Luke was killed. Is the Pharmaceutical Association liable for Luke's death?

5. Betsy has a two-year contract as a producer at Jackson Movie Studios. She produces a remake of the movie *Footloose*. Unfortunately, it bombs, and Jackson is so furious that he fires her on the weekend the movie opens. Does he have the power to do this?

CHAPTER 29

EMPLOYMENT LAW

© Ivan Cholakov Gostock-dot-net/Shutterstock.com

"On the killing beds you were apt to be covered with blood, and it would freeze solid; if you leaned against a pillar, you would freeze to that, and if you put your hand upon the blade of your knife, you would run a chance of leaving your skin on it. The men would tie up their feet in newspapers and old sacks, and these would be soaked in blood and frozen, and then soaked again, and so on, until by nighttime a man would be walking on great lumps the size of the feet of an elephant. Now and then, when the bosses were not looking, you would see them plunging their feet and ankles into the steaming hot carcass of the steer.... The cruelest thing of all was that nearly all of them—all of those who used knives—were unable to wear gloves, and their arms would be white with frost and their hands would grow numb, and then of course there would be accidents."[1]

... you would see them plunging their feet and ankles into the steaming hot carcass of the steer.

[1]From Upton Sinclair, *The Jungle* (New York: Bantam Books, 1981), p. 80, a 1906 novel about the meat-packing industry.

Introduction

For most of history, the concept of career planning was unknown. By and large, people were born into their jobs. Whatever their parents had been—landowner, soldier, farmer, servant, merchant, or beggar—they became, too. People not only knew their place, they also understood the rights and obligations inherent in each position. The landowner had the right to receive labor from his tenants, but he also cared for them if they fell ill. Certainly, there were abuses, but at a time when people held religious convictions about their position in life and workers had few expectations that their lives would be better than their parents', the role of law was limited. The primary English law of employment simply established that, in the absence of a contract, an employee was hired for a year at a time. This rule was designed to prevent injustice in a farming society. If an employee worked through harvest time, the landowner could not fire him in the unproductive winter. Conversely, a worker could not stay the winter and then leave for greener pastures in the spring.

In the 18th and 19th centuries, the Industrial Revolution profoundly altered the employment relationship. Many workers left the farms and villages for large factories in the city. Bosses no longer knew their workers personally, so they felt little responsibility toward them. The old laws that had suited an agrarian economy with stable relationships did not fit the new employment conditions. Instead of duties and responsibilities, courts emphasized the freedom to contract. Since employees could quit their factory jobs whenever they wanted, it seemed only fair for employers to have the same freedom to fire a worker. That was indeed the rule adopted by the courts: unless workers had an explicit employment contract, they were employees at will. **An *employee at will* could be fired for a good reason, a bad reason, or no reason at all.** For nearly a century, this was the basic common law rule of employment. A court explained the rule this way:

> Precisely as may the employee cease labor at his whim or pleasure, and, whatever be his reason, good, bad, or indifferent, leave no one a legal right to complain; so, upon the other hand, may the employer discharge, and, whatever be his reason, good, bad, or indifferent, no one has suffered a legal wrong.[2]

However evenhanded this common law rule of employment may have sounded in theory, in practice, it could lead to harsh results. The lives of factory workers were grim. It was not as if they could simply pack up and leave; conditions were no better elsewhere. For the worker, freedom to contract often meant little more than freedom to starve. Courts and legislatures gradually began to recognize that individual workers were generally unable to negotiate fair contracts with powerful employers. Since the beginning of the 20th century, employment law has changed dramatically. Now, the employment relationship is more strictly regulated by statutes and by the common law.

Note well, though: **in the absence of a specific legal exception, the rule in the United States is that an employee at will can be fired for any reason.** But there *are* many exception*s* to this rule. They take the form of statutes and common law. Many of the statutes discussed in this chapter were passed by Congress and therefore apply nationally. The common law, however, comes from state courts and only applies locally. We will look at a sampling of cases that illustrates national trends, even though the law may not be the same in every state.

This chapter covers four topics in employment law: (1) employment security, (2) safety and privacy in the workplace, (3) financial protection, and (4) employment discrimination.

[2] *Union Labor Hospital Assn. v. Vance Redwood Lumber Co.*, 112 P.886, 888, 1910 Cal. LEXIS 417 (Cal., 1910).

Employment Security

National Labor Relations Act

Without unions to represent employee interests, employers could simply fire any trouble-making workers who complained about conditions in factories or mines. By joining together, workers could bargain with their employers on more equal terms. Naturally, the owners fought against the unions, firing organizers and even hiring goons to beat them up. Distressed by anti-union violence, Congress passed the **National Labor Relations Act** in 1935. Known as the **NLRA** or the **Wagner Act**, this statute:

- Created the National Labor Relations Board to enforce labor laws;
- Prohibits employers from penalizing workers who engage in union activity (for example, joining a preexisting union or forming a new one); and
- Requires employers to "bargain in good faith" with unions.

Family and Medical Leave Act

The Family and Medical Leave Act (FMLA) guarantees both men and women up to 12 weeks of *unpaid* leave each year for childbirth, adoption, or a serious health condition of their own or in their immediate family. A family member is a spouse, child, or parent—but not a sibling or an in-law. An employee who takes a leave must be allowed to return to the same or an equivalent job with the same pay and benefits. The FMLA applies only to companies with at least 50 workers and to employees who have been with the company full time for at least a year. This is about 60 percent of all employees.

Kevin Knussman was the first person to win a lawsuit under the FMLA. While a Maryland state trooper, he requested eight weeks of leave to care for his pregnant wife, who was suffering severe complications. His boss granted only two weeks. After Knussman's daughter was born, his boss again denied leave, saying that "God made women to have babies." Knussman ultimately recovered $40,000.[3]

The Department of Labor has issued regulations to resolve disputes under the FMLA. These regulations provide that:

- Before a worker returns from FMLA leave, an employer may require a "fitness for duty" evaluation to confirm that the worker can perform the essential functions of the job.
- An employer may consider FMLA absences when awarding bonuses.
- Employers are not permitted to seek medical certification directly from the employee's doctor.

Although the FMLA offers important protections, the United States is the only rich country that does not provide mandatory *paid* maternity leave.

Health Insurance

Companies are *not* required to provide their employees with health insurance. However, current legislation specifies that, starting in 2014, employers who have more than 50 full-time employees must pay a penalty if they do not provide basic health insurance. In addition, company insurance policies must cover employees' children up to the age of 26. At this

[3]Eyal Press, "Family-Leave Values," *New York Times*, July 29, 2007.

writing, however, some judges have found this statute to be unconstitutional, while others have upheld it. Almost inevitably, the Supreme Court will decide the statute's fate. (For updates, visit bizlawupdate.com.)

Losing your job does not mean that you must also give up your health insurance—at least not right away. Under the Consolidated Omnibus Budget Reconciliation Act (COBRA), **former employees must be allowed to continue their health insurance for 18 months after being terminated from their job.** The catch is that employees must pay for it themselves, up to 102 percent of the cost. (The extra 2 percent covers administrative expenses.) COBRA applies to any company with 20 or more workers.

Common-Law Protections

The employment-at-will doctrine was created by the courts. Because that rule has sometimes led to absurdly unfair results, the courts have now created a major exception to the rule—**wrongful discharge**.

Wrongful discharge
An employer may not fire a worker for a reason that violates basic social rights, duties or responsibilities.

Wrongful Discharge: Violating Public Policy

Olga Monge was a schoolteacher in her native Costa Rica. After moving to New Hampshire, she attended college in the evenings to earn U.S. teaching credentials. At night, she worked at the Beebe Rubber Co. During the day, she cared for her husband and three children. When she applied for a better job at her plant, the foreman offered to promote her if she would be "nice" and go out on a date with him. When she refused, he assigned her to a lower-wage job, took away her overtime, made her clean the washrooms, and generally ridiculed her. Finally, she collapsed at work, and he fired her.[4]

Imagine that you are one of the judges who decided this case. Olga Monge has been treated abominably, but she was an employee at will and, as you well know, could be fired for any reason. But how can you let the foreman get away with this despicable behavior? The New Hampshire Supreme Court decided that even an employee at will has rights:

> We hold that a termination by the employer of a contract of employment at will which is motivated by bad faith or malice or based on retaliation is not in the best interest of the economic system or the public good and constitutes a breach of the employment contract.[5]

The *Monge* case illustrates the concept of wrongful discharge, which prohibits **an employer from firing a worker for a *bad reason*.**

How do the courts define a "bad reason"? It is a reason that violates public policy. Unfortunately, this **public policy rule** is easier to name than it is to define because its definition and application vary from state to state. **In essence, the public policy rule prohibits an employer from firing a worker for a reason that violates basic social rights, duties, or responsibilities.** Almost every employee who has ever been fired feels that a horrible injustice has been done. The difficulty, from the courts' perspective, is to distinguish those cases of dismissal that are offensive enough to affront the community at large from those that outrage only the employee. The courts have primarily applied the public policy rule when an employee refuses to violate the law, performs a legal duty, exercises a legal right, or supports basic societal values.

Refusing to Violate the Law. Larry Downs went to Duke Hospital for surgery on his cleft palate. When he came out of the operating room, the doctor instructed a nurse, Marie Sides, to give Downs enough anesthetic to immobilize him. Sides refused because she thought the anesthetic was wrong for this patient. The doctor angrily administered the anesthetic himself. Shortly thereafter, Downs stopped breathing. Before the doctors could

---

[4] *Monge v. Beebe*, 114 N.H. 130, 316 A.2d 549, 1974 N.H. LEXIS 223 (NH S. Ct., 1974).
[5] *Id.* at 133.

resuscitate him, he suffered permanent brain damage. When Downs's family sued the hospital, Sides was called to testify. A number of Duke doctors told her that she would be "in trouble" if she testified. She did testify, and after three months of harassment, she was fired. When she sued Duke University, the court held:

> It would be obnoxious to the interests of the state and contrary to public policy and sound morality to allow an employer to discharge any employee, whether the employment be for a designated or unspecified duration, on the ground that the employee declined to commit perjury, an act specifically enjoined by statute. To hold otherwise would be without reason and contrary to the spirit of the law.[6]

As a general rule, employees may not be discharged for refusing to break the law. For example, courts have protected employees who refused to participate in an illegal price-fixing scheme, falsify pollution control records required by state law, pollute navigable waters in violation of federal law, or assist a supervisor in stealing from customers.[7]

Performing a Legal Duty. **Courts have consistently held that an employee may not be fired for serving on a jury.** Employers sometimes have difficulty replacing employees who are called up for jury duty and, therefore, prefer that their workers find some excuse for not serving. But jury duty is an important civic obligation that employers are not permitted to undermine.

Exercising a Legal Right. **As a general rule, an employer may not discharge a worker for exercising a legal right if that right supports public policy.** Dorothy Frampton injured her arm while working at the Central Indiana Gas Co. Her employer (and its insurance company) paid her medical expenses and her salary during the four months she was unable to work. When she discovered that she also qualified for benefits under the state's workers' compensation plan, she filed a claim and received payment. One month later, the company fired her without giving a reason. In her suit against the gas company, the court held:

> The [Workers' Compensation] Act creates a duty in the employer to compensate employees for work-related injuries and a right in the employee to receive such compensation. If employers are permitted to penalize employees for filing workmen's compensation claims, a most important public policy will be undermined. Employees will not file claims for justly deserved compensation—opting, instead, to continue their employment without incident. The end result, of course, is that the employer is effectively relieved of his obligation.[8]

Supporting Societal Values. Courts are sometimes willing to protect employees who do the right thing, even if they violate the boss's orders. Kevin Gardner had just parked his armored truck in front of a bank in Spokane, Washington, when he saw a man with a knife chase the manager out of the bank. While running past the truck, the manager looked directly at Gardner and yelled, "Help me, help me." Gardner got out of his truck and locked the door. By then, the suspect had grabbed another woman, put his knife to her throat, and dragged her into the bank. Gardner followed them in, tackled the suspect, and disarmed him. The rescued woman hailed Gardner as a hero, but his employer fired him for violating a "fundamental" company rule that prohibited drivers from leaving their armored

trucks unattended. However, the court held for Gardner on the grounds that, although he had no affirmative legal duty to intervene in such a situation, society values and encourages voluntary rescuers when a life is in danger.[9] This issue is, however, one on which the courts are divided. Not all would have made the same decision.

In the following case, two employees objected when their company supplied defective human tissue for transplantation into live patients. Should the court protect them from termination?

Kozloski v. American Tissue Services Foundation

2006 U.S. Dist. LEXIS 95435
United States District Court for the District of Minnesota, 2006

Facts: American Tissue Services Foundation (ATSF) was in the business of supplying human tissue from cadavers for transplantation into live patients. Mike Slack, an employee of ATSF, revealed to his boss that he had falsified a donor medical record and changed the donor's blood type on the form. This falsification was not only dangerous to recipients of the tissue, it violated Food and Drug Administration (FDA) regulations. Slack was fired and the infractions were reported to the FDA, as required by law.

It turned out, however, that Slack was the foster child of the company's chairman. And, in this case, (foster) blood was thicker than water. The chairman not only hired Slack at another company as a quality assurance specialist (believe it or not), but he fired Slack's boss and the two men who had reported the problem to the FDA. The men filed suit against ATSF for wrongful discharge, but the company filed a motion to dismiss on the grounds that the public policy doctrine in Minnesota applied only to employees who had refused to violate the law.

Issue: ***Does the public policy doctrine in Minnesota apply only if the employee has been fired for refusing to violate the law?***

Excerpts from Judge Graham's Decision: Plaintiffs claim their terminations occurred as a direct result of and in retaliation for their reporting to their employer and the FDA concerns about public safety, violations of federal regulations and federal law, and related concerns regarding quality control issues that may directly affect public safety. [T]he Court rejects Defendant's contention that the *only* common law wrongful discharge claim in Minnesota is one based on allegations that termination was in retaliation for refusing to violate the law. Instead the Court concludes the Minnesota Supreme Court has recognized a common law wrongful discharge claim when a discharge is for a reason that *clearly* violates public policy. In other words, it is the clarity of the violation of public policy that defines the existence of the common law claim.

[T]he FDA regulations concerning the safe transfer of tissues from cadavers for use in live patients emphasize the public safety and protection of citizens, and thus encompass *clear* public policy regarding [the] public's safety. Plaintiffs' allegations that they were required by law to report the violations to the FDA for ATSF to remain in compliance also bolsters this determination. [T]he Court concludes Plaintiffs have sufficiently alleged common law claims for wrongful discharge.

Contract Law

Traditionally, many employers (and employees) thought that only a formal, signed document qualified as an employment contract. Increasingly, however, courts have been willing to enforce an employer's more casual promises, whether written or oral. Sometimes courts have also been willing to *imply* contract terms in the absence of an *express* agreement.

Truth in Hiring. **Oral promises made during the hiring process can be enforceable, even if not approved by the company's top executives.** When the Tanana Valley Medical-Surgical Group, Inc., hired James Eales as a physician's assistant, it promised him that so long as he

[9] *Gardner v. Loomis Armored, Inc.*, 913 P.2d 377, 1996 Wash. LEXIS 109 (1996).

did his job, he could stay there until retirement age. Six years later, the company fired him without cause. The Alaska Supreme Court held that the clinic's promise was enforceable.[10]

Employee Handbooks. The employee handbook at Blue Cross & Blue Shield stated that employees could be fired only for just cause and then only after warnings, notice, a hearing, and other procedures. Charles Toussaint was fired summarily five years after he joined the company. Although this decision was ultimately reviewed by the personnel department, company president, and chairman of the board of trustees, Toussaint was not given the benefit of all of the procedures in the handbook. The court held that **an employee handbook creates a contract.**[11]

Covenant of Good Faith and Fair Dealing. A covenant of good faith and fair dealing prohibits one party to a contract from interfering with the other's right to benefit under the contract. All parties are expected to behave in a fair, decent, and reasonable manner. **In almost all states, courts will imply a covenant of good faith and fair dealing in an at-will employment relationship.** These cases, however, have all arisen in situations in which an employer fires a worker to avoid paying promised income or benefits.

When Forrest Fleming went to work for Parametric Technology Corp., the company promised him valuable stock options if he met his sales goals. He would not be able to *exercise* the options (that is, purchase the stock), however, until several years after they were granted, and then only if he was still employed by the company. During his four years with Parametric, Fleming received options to purchase about 18,000 shares for a price as low as 25 cents each. The shares ultimately traded in the market for as much as $50. Although Fleming exercised some options, the company fired him three months before he became eligible to purchase an additional 1,000 shares. The jury awarded him $1.6 million in damages. Although Parametric had not violated the explicit terms of the option agreement, the jury believed it had violated the covenant of good faith and fair dealing by firing Fleming to prevent him from exercising his remaining options.[12]

Tort Law

Workers have successfully sued their employers under the following tort theories.

Defamation. **Employers may be liable for defamation when they give false and unfavorable references about a former employee.** In his job as a bartender at the Capitol Grille restaurant, Christopher Kane often flirted with customers. After he was fired from his job, his ex-boss claimed that Kane had been "fired from every job he ever had for sexual misconduct." In fact, Kane had never been fired before. He recovered $300,000 in damages for this defamation.

More than half of the states, however, recognize a qualified privilege for employers who give references about former employees. A **qualified privilege** means that employers are liable only for false statements that they know to be false or that are primarily motivated by ill will. After Becky Chambers left her job at American Trans Air, Inc., she discovered that her former boss was telling anyone who called for a reference that Chambers "does not work good with other people," is a "troublemaker," and "would not be a good person to rehire." Chambers was unable, however, to present compelling evidence that her boss had been primarily motivated by ill will. Neither Trans Air nor the boss was held liable for these statements because they were protected by the qualified privilege.[13]

Qualified privilege
Employers who give references are liable only for false statements that they know to be false or that are primarily motivated by ill will.

---

[10] *Eales v. Tanana Valley Medical-Surgical Group, Inc.*, 663 P.2d 958, 1983 Alas. LEXIS 430 (Alaska 1983).
[11] *Toussaint v. Blue Cross & Blue Shield*, 408 Mich. 579, 292 N.W.2d 880, 1980 Mich. LEXIS 227 (1980).
[12] *Fleming v. Parametric Tech. Corp.*, 1999 U.S. App. LEXIS 14864.
[13] *Chambers v. American Trans Air, Inc.*, 577 N.E.2d 612, 1991 Ind. App. LEXIS 1413 (Ind. Ct. App. 1991).

Even if the employer wins, a trial is an expensive and time-consuming undertaking. Not surprisingly, companies are leery about offering any references for former employees. The company gains little benefit from giving an honest evaluation and may suffer substantial liability. As a matter of policy, many companies instruct their managers to reveal only a person's salary and dates of employment and not to offer an opinion on job performance.

On the flip side, do employers have any obligation to warn about risky workers? **Generally, courts have held that employers do *not* have a legal obligation to disclose information about former employees.** For example, while Jeffrey St. Clair worked at the St. Joseph Nursing Home, he was disciplined 24 times for actions ranging from extreme violence to drug and alcohol use. When he applied for a job with Maintenance Management Corp., St. Joseph refused to give any information other than St. Clair's dates of employment. After he savagely murdered a security guard at his new job, the guard's family sued, but the court dismissed the case.[14]

In some recent cases, however, courts have held that, when a former worker is potentially dangerous, employers do have an obligation to disclose this information. For example, officials from two junior high schools gave Robert Gadams glowing letters of recommendation without mentioning that he had been fired for inappropriate sexual conduct with students. While an assistant principal at a new school, he molested a 13-year-old. Her parents sued the former employers. The court held that the writer of a letter of recommendation owes to third parties (in this case, the student) "a duty not to misrepresent the facts in describing the qualifications and character of a former employee, if making these misrepresentations would present a substantial, foreseeable risk of physical injury to the third persons."[15] As a result of cases such as this, it makes sense to disclose past violent behavior.

To assist employers who are asked for references, Lehigh economist Robert Thornton has written "The Lexicon of Intentional Ambiguous Recommendations" (LIAR). For a candidate with interpersonal problems, he suggests saying, "I am pleased to say that this person is a former colleague of mine." For a candidate with drug or alcohol problems, there are several possibilities: "She was always high in my opinion," "We remember the hours she spent working with us as happy hours," or "I would say that her real talent is getting wasted at her current job."[16]

Ethics All joking aside, what if someone calls you to check references on a former employee who had a drinking problem? The job is driving a van for junior high school sports teams. What is the manager's ethical obligation in this situation? Many managers say that, in the case of a serious problem such as alcoholism, sexual harassment, or drug use, they will find a way to communicate that an employee is unsuitable. What if the ex-employee says she is reformed? Aren't people entitled to a second chance? Is it right to risk a defamation suit against your company to protect others from harm?

Intentional Infliction of Emotional Distress. **Employers who condone cruel treatment of their workers face liability under the tort of intentional infliction of emotional distress.** For example, when a 57-year-old social-work manager at Yale–New Haven Hospital

[14]*Moore v. St. Joseph Nursing Home, Inc.*, 184 Mich. App. 766, 459 N.W.2d 100, 1990 Mich. App. LEXIS 285 (Mich. Ct. App. 1990).

[16]Robert J. Thornton, *Lexicon of Intentionally Ambiguous Recommendations*, Barnes and Noble Books, 2005.

was fired, she was forced to place her personal belongings in a plastic bag and was escorted out the door by security guards in full view of gaping coworkers. A supervisor told her that she would be arrested for trespassing if she returned. A jury awarded her $105,000.

Whistleblowing

No one likes to be accused of wrongdoing even if (or, perhaps, especially if) the accusations are true. **This is exactly what whistleblowers do: they are employees who disclose illegal behavior on the part of their employer.** Not surprisingly, many companies, when faced with such an accusation by an employee, prefer to shoot the messenger. Here is one such story.

Although FMC Corp. sold 9,000 Bradley Fighting Vehicles to the U.S. Army, there had been doubts about the Bradley from the beginning. Its purpose was to ferry soldiers across rivers during a land war in Europe, but whenever a prototype was driven into water, it leaked as badly as any car would have done. When testing supervisor Henry Boisvert refused to sign a report stating that the Bradley functioned well, FMC fired him. A jury ultimately agreed with his version of events and awarded him $171 million.

The law on whistleblowers varies across the country. As a general rule, however, whistleblowers are protected in the following situations:

- *The False Claims Act.* Boisvert recovered under the federal False Claims Act, a statute that permits lawsuits against anyone who defrauds the government. The recovery is shared by the government (who receives 75 percent to 85 percent) and the whistleblower (who gets the rest). The Act prohibits employers from firing workers who file suit under the statute.
- *The Dodd-Frank Wall Street Reform and Consumer Protection Act.* Anyone who provides information to the government about violations of securities or commodities laws is entitled to a payout of from 10 to 30 percent of whatever award the government receives, provided that the award tops $1 million. If a company retaliates against tipsters, they are entitled to reinstatement, double back pay, and attorney's fees. The whistleblowing provision is intended to encourage tips to the government, but companies fear it may also discourage employees from reporting wrongdoing to corporate compliance offices—why report a problem for free when you could get paid a lot of money?
- *Sarbanes-Oxley Act of 2002.* This act protects employees of publicly traded companies who provide evidence of fraud to investigators (whether in or outside the company). A successful plaintiff is entitled to reinstatement, back pay, and attorney's fees.
- *Constitutional protection for government employees.* Employees of federal, state, and local governments have a right to free speech under the United States Constitution. Therefore, the government cannot retaliate against public employees who blow the whistle, so long as the employee is speaking out on a matter of public concern. For example, a New York City social worker complained on TV that the city child welfare agency was not adequately protecting children from horrible abuse. When the city suspended the social worker from her job, she sued. The court ruled that the government has the right to prohibit some employee speech, but if the employee speaks on matters of public concern, the government bears the burden of justifying any retaliation. In this case, the court held for the social worker.[17]
- *Statutory protection for federal employees.* The Civil Service Reform Act and the Whistleblower Protection Act prevent retaliation against federal employees who

[17] *Harman v. City of New York,* 140 F.3d 111, 1998 U.S. App. LEXIS 5567 (2d Cir. 1998).

report wrongdoing. They also permit the award of back pay and attorney's fees to the whistleblower. This statute was used to prevent the National Park Service from disciplining two managers who wrote a report expressing concern over development in Yellowstone National Park.

- *State laws*. The good news is that all 50 states have laws that protect whistleblowers from retaliation by their employers. The bad news is that the scope of this protection varies greatly from state to state. Most courts, however, prohibit the discharge of employees who report illegal activity. For example, a Connecticut court held a company liable when it fired a quality control director who reported to his boss that some products had failed quality tests.[18]

EXAM Strategy

Question: When Shiloh interviewed for a sales job at a medical supply company, the interviewer promised that she could work exclusively selling medical devices and would not have to be involved in the sale of drugs. Once she began work (as an employee at will), Shiloh discovered that the sales force was organized around regions, not products, so she had to sell both devices and drugs. When she complained to her boss over lunch in the employee lunchroom, he said in a loud voice, "You are a big girl now—it's time you learned that you don't always get what you want." That afternoon, she was fired. Does she have a valid claim against the company?

Strategy: We know that Shiloh is an employee at will. We also know that she is not protected by any statute we have studied. What about the *common law*? Shiloh has had two interactions with the company—being hired and being fired. What protections does the common law provide during the hiring process? The employer's promises are enforceable. Here, the company is liable because the interviewer clearly made a promise that the company did not keep. What about the way in which Shiloh was fired? Is it intentional infliction of emotional distress? Was this treatment cruel? Probably not cruel enough to constitute intentional infliction of emotional distress.

Result: The company is liable to Shiloh for making false promises to her during the hiring process, but not for the manner in which she was fired.

Safety and Privacy in the Workplace

Workplace Safety

In 1970, Congress passed the Occupational Safety and Health Act (OSHA) to ensure safe working conditions. Under OSHA:

- Employers must comply with specific health and safety standards. For example, health care personnel who work with blood are not permitted to eat or drink in areas where the blood is kept and must not put their mouths on any instruments used to store blood. Protective clothing—gloves, gowns, and laboratory coats—must be impermeable to blood.

[18] *Smith v. Calgon Carbon Corp.*, 917 F.2d 1338, 1990 U.S. App. LEXIS 19193 (3rd Cir. 1990).

- Employers are under a general obligation to keep their workplace "free from recognized hazards that are causing or are likely to cause death or serious physical harm" to employees.
- Employers must keep records of all workplace injuries and accidents.
- The Occupational Safety and Health Administration (also known as OSHA) may inspect workplaces to ensure that they are safe. OSHA may assess fines for violations and order employers to correct unsafe conditions.

OSHA has done a lot to make the American workplace safer. In 1900, roughly 35,000 workers died at work. A century later, the workforce had grown five times larger, but the number of annual deaths had fallen to about 5,500.

Employee Privacy

Upon opening the country's first moving assembly line in the early 1900s, Henry Ford issued a booklet, "Helpful Hints and Advice to Employees," that warned against drinking, gambling, borrowing money, taking in boarders, and practicing poor hygiene. Ford also created a department of 100 investigators for door-to-door checks on his employees' drinking habits, sexual practices, and housekeeping skills. It may be surprising, but in modern times, employees have been fired or disciplined for such extracurricular activities as playing dangerous sports, dating coworkers, or even having high cholesterol.

The right to hire, fire, and make an honest profit is enshrined in American tradition. But so is the right to privacy. Justice Louis D. Brandeis called it the "right to be let alone—the most comprehensive of rights and the right most valued by civilized men." Employees are entitled under the common law to a **reasonable expectation of privacy**. This protection means that an employer could not, for instance, search an employee's home even if looking for items that the employee might have stolen from the company. What other protection do workers have against intrusive employers?

Off-Duty Conduct

A worker's off-duty conduct may affect her employer. For instance, a smoker may have lower productivity and higher healthcare expenses. The federal government estimates that it costs $3,400 a year to employ a worker who smokes. As a result, some employers refuse to hire smokers or even threaten to fire current workers who smoke. (Nicotine can be detected in a smoker's urine for a week or more.)

These bans on smokers affect a considerable number of people—roughly 20 percent of Americans. As a result, more than half of the states have passed statutes prohibiting job bans on smokers. Indeed, some states have passed laws that protect the right of employees to engage in any *lawful* activity when off duty, including smoking, drinking socially, having high cholesterol, being overweight, or engaging in dangerous hobbies—bungee jumping or rollerblading, for instance. In the absence of such a statute, however, an employer does have the right to fire an employee for off-duty conduct.

Alcohol and Drug Testing

Traditionally, employers primarily tested for illegal drugs, but increasingly, they have been concerned that prescription medications may impair workers as well. For example, in one study, workers who were tested after accidents in the workplace were four times more likely to have opiates in their system than job applicants.

Under federal law, private employers are permitted to test for alcohol and illegal drugs. However, the Equal Employment Opportunity Commission (EEOC), the federal agency charged with enforcing federal employment laws, prohibits testing for prescription drugs unless a worker seems impaired. The EEOC has filed suit against a company that randomly

tested for prescription drugs (that were being used legally), but the court has not yet issued an opinion.[19] State laws on drug testing vary widely.

Public safety workers, such as police and firefighters, can be required to report legal drug use that might compromise their ability to perform their jobs. They can be randomly tested for illegal use. Other government employees can be randomly tested only if they show signs of impairment.

Lie Detector Tests

Under the Employee Polygraph Protection Act of 1988, employers may not require, or even *suggest,* that an employee or job candidate submit to a lie detector test, except (1) as part of an "ongoing investigation" into crimes that have occurred or (2) for jobs in pharmaceutical firms that deal with controlled substances. Before the test is administered, employees are entitled to written notice of their rights.

Electronic Monitoring of the Workplace

Technological advances in communications have raised a host of new privacy issues. Many companies monitor employee use of electronic equipment in the workplace: telephone calls, voicemail, email, and Internet usage. **The Electronic Communications Privacy Act of 1986 (ECPA) permits employers to monitor workers' telephone calls and email messages if (1) the employee consents, (2) the monitoring occurs in the ordinary course of business, or (3) in the case of email, the employer provides the email system.** However, bosses may not disclose any private information revealed by the monitoring.

Sending personal emails through a company server is dangerous. In one case, the court permitted an employer to fire two workers who exchanged (they claimed) joking emails threatening violence to sales managers. The company had an explicit policy stating that emails were confidential and would not be intercepted or used against an employee.[20] On the other hand, a New Jersey court recently held that unless company policy explicitly informs workers otherwise, the company does not have the right to monitor a personal, password-protected, web-based email account.[21]

Unless you enjoy the prospect of engaging in years of litigation to clarify this issue, it is still good advice to consider all email you send through a company server to be public.

Social Media

Social media are the newest challenge facing both employers and workers. On the one hand, employers may find themselves liable for statements that their workers make electronically. For example, Cisco Systems Inc., has settled two lawsuits brought against the company for statements made by a company lawyer on his blog. Not surprisingly, employers have fired workers who posted inappropriate information in cyberspace. But companies may find themselves liable for violations of employee privacy if a boss reads workers' Facebook or MySpace pages. A high school teacher in Georgia sued her school district after she was forced to resign because of vacation photos on Facebook that showed her holding a glass of wine.

Could he be fired for posting this photo on his Facebook page?

[19] *Bates v. Dura Auto Sys*, District Court of Tennessee.
[20] *Smyth v. Pillsbury*, 914 F. Supp. 97, 1996 U.S. Dist. LEXIS 776, (Fed. Dist. Ct., 1996).
[21] *Stengart v. Loving Care Agency, Inc.*, 201 N.J. 300, 2010 N.J. LEXIS 241, (S.Ct. NJ, 2010).

In short, the law is uncertain and varies by state, so employees at will should err on the side of caution and remember that the law does not currently protect their electronic lives from employer prying. They should consider anything they publish on the Internet to be public.

As for companies, it makes sense to establish policies providing that:

1. Employees should never reveal their company's name on a blog or social website such as Facebook.
2. In addition, all employees' personal blogs must contain a disclaimer that "All postings on this blog are my opinion and not those of my employer, who has neither vetted nor approved them." The blogger should not reveal the company's name.
3. Blog comments should never be offensive, impolite, or reflect badly on the employer. Nor should they reveal confidential or proprietary information.
4. Supervisors have the right to read and take action based on any electronic information posted by an employee.

Immigration

Because of discrimination laws, employers should not ask about an applicant's country of origin, but they are permitted to inquire if the person is authorized to work in the United States. If the applicant says, "Yes," the interviewer cannot ask for evidence until the person is hired. At that point, the employer must complete an I-9 form—Employment Eligibility Verification—within three days. This form lists the acceptable documents that can be used for verification. Employees have the right to present whichever documents they want from the list of acceptable items. The employer may not ask for some other document. The I-9 forms must be kept for three years after the worker is hired or one year after termination.

EXAM Strategy

Question: To ensure that its employees did not use illegal drugs in or outside the workplace, Marvel Grocery Store required all employees to take a lie detector test. Moreover, managers began to screen the company email system for drug references. Jagger was fired for refusing to take the polygraph test. Jonathan was dismissed when a search of his email revealed that he had used marijuana during the prior weekend. Has the company acted legally?

Strategy: First: As employees at will, are Jagger and Jonathan protected by a statute? The Employee Polygraph Protection Act permits employers to require a lie detector test as part of ongoing investigation into crimes that have occurred. Here, Marvel has no reason to believe that a crime occurred, so it cannot require a polygraph test.

Second: What about Jonathan's marijuana use? The ECPA permits Marvel to monitor email messages on its own system. But can the company fire Jonathan for illegal off-duty conduct? Some statutes protect employees for *legal* behavior outside the workplace, but no state protects employees for behavior that violates the law.

Result: The company is liable to Jagger for requiring him to take the lie detector test, but not to Jonathan for monitoring his email or firing him for illegal drug use.

Financial Protection

Congress and the states have enacted laws that provide employees with a measure of financial security. All of the laws in this section were created by statute, not by the courts.

Fair Labor Standards Act: Minimum Wage, Overtime, and Child Labor

Passed in 1938, the Fair Labor Standards Act (FLSA) regulates wages and limits child labor nationally. It provides that hourly workers must be paid a minimum wage of $7.25 per hour, plus time and a half for any hours over 40 in one week. These wage provisions do not apply to salaried workers, such as managerial, administrative, or professional staff. More than half the states set a higher minimum wage, so it is important to check state guidelines as well.

Today, the biggest issue that employers face under the FLSA is: "What counts as work, and how do you keep track of it?" What if a worker answers email during lunch or takes a phone call on the train ride home? Although these activities count as work, how can the employer keep track of it? Carla Bird, an assistant at Oprah Winfrey's production company, submitted timesheets showing 800 hours of overtime in 17 weeks. She said she had worked 12 or 13 hours a day, seven days a week, for four months. The company paid her $32,000 in overtime.[22] If employees work all the time, or even if they are just on call, they are entitled to be paid for those hours.

The FLSA also prohibits "oppressive child labor," which means that children under 14 may work only in agriculture and entertainment. Fourteen- and fifteen-year-olds are permitted to work *limited* hours after school in nonhazardous jobs. Sixteen- and seventeen-year-olds may work *unlimited* hours in nonhazardous jobs.

Workers' Compensation

Workers' compensation statutes ensure that employees receive payment for injuries incurred at work. Before workers' comp, injured employees could recover damages only if they sued their employer. It is the brave (or carefree) worker who is willing to risk a suit against his own boss. Lawsuits poison the atmosphere at work. Moreover, employers frequently won these suits by claiming that (1) the injured worker was contributorily negligent, (2) a fellow employee had caused the accident, or (3) the injured worker had assumed the risk of injury. As a result, seriously injured workers (or their families) often had no recourse against the employer.

Workers' comp statutes provide a fixed, certain recovery to the injured employee, no matter who was at fault for the accident. In return, employees are not permitted to sue their employers for negligence. The amounts allowed (for medical expenses and lost wages) under workers' comp statutes are often less than a worker might recover in court, but the injured employee trades the certainty of some recovery for the higher risk of rolling the dice at trial. Payments are approved by an administrative board that conducts an informal hearing into each claim.

Social Security

The federal social security system began in 1935, during the depths of the Great Depression, to provide a basic safety net for the elderly, ill, and unemployed. **Currently, the social security system pays benefits to workers who are retired, disabled, or temporarily**

[22]Lisa Belkin, "O.T. Isn't as Simple as Telling Time." *The New York Times*, September 20, 2007.

Fox Photos/Hulton Archive/Getty Images

Before Social Security, breadlines were often the only safety net available to the unemployed.

unemployed and to the spouses and children of disabled or deceased workers. It also provides medical insurance to the retired and disabled. The social security program is financed through a tax on wages that is paid by employers, employees, and the self-employed.

Although the social security system has done much to reduce poverty among the elderly, many worry that it cannot survive in its current form. The system was designed to be "pay as you go"; that is, when workers pay taxes, the proceeds do not go into a savings account for their retirement, but instead are used to pay benefits to current retirees. In 1940, there were 40 workers for each retiree; currently, there are 3.3. As a result, the system now pays out more in benefits each year than it receives in tax revenues. By 2025, when the last baby boomers retire, there will be only 2 workers to support each retiree—a prohibitive burden. No wonder baby boomers are often cautioned not to count on social security when making their retirement plans.

The Federal Unemployment Tax Act (FUTA) is the part of the social security system that provides support to the unemployed. FUTA establishes some national standards, but states are free to set their own benefit levels and payment schedules. A worker who quits voluntarily or is fired for just cause is ineligible for benefits. While receiving payments, she must make a good-faith effort to look for other employment.

Pension Benefits

In 1974, Congress passed the Employee Retirement Income Security Act (ERISA) to protect workers covered by private pension plans. Under ERISA, employers are not required to establish pension plans, but if they do, they must follow these federal rules. The law was aimed, in particular, at protecting benefits of retired workers if their companies subsequently go bankrupt. The statute also prohibits risky investments by pension plans. In addition, the statute sets rules on the vesting of benefits. (An employer cannot cancel *vested* benefits; *nonvested* benefits are forfeited when the employee leaves.) Before ERISA, retirement benefits at some companies did not vest until the employee retired—if he quit or was fired before retirement, even after years of service, he lost his pension. Under current law, employee benefits normally must vest within five years of employment.

Employment Discrimination

In the last five decades, Congress has enacted important legislation to prevent discrimination in the workplace.

Equal Pay Act of 1963

Under the Equal Pay Act, an employee may not be paid at a lesser rate than employees of the opposite sex for equal work. "Equal work" means tasks that require equal skill, effort, and responsibility under similar working conditions. If the employee proves that she is not being paid equally, the employer will be found liable unless the pay difference is based on merit, productivity, seniority, or some factor other than sex. A "factor other than sex" includes prior wages, training, profitability, performance in an interview, and value to the company. For example, female agents sued Allstate Insurance Co. because its salary for new agents

was based, in part, on prior salary. The women argued that this system was unfair because it perpetuated the historic wage differences between men and women. The court, however, held for Allstate.[23]

Title VII

Before 1964, it was legal to treat men and women, whites and people of color, differently in the workplace. Women, for example, could be paid less than men for the same job and could be fired if they got married or pregnant. Newspapers had different pages for men's and women's job ads and, no matter their education, women were prohibited from applying for the most desirable jobs. They could be secretaries but not writers, lawyers, or bankers. Indeed, in 1952, when Sandra Day O'Connor graduated from Stanford Law School with high honors, law firms only offered her secretarial jobs. She went on to become the first woman justice on the Supreme Court of the United States. This discrimination was a terrible waste of resources—so many talented people who were unable to use their skills. Partly as a result of Title VII, women now make up a majority of the American workforce, although they are still underrepresented at the top of many organizations.

Under Title VII of the Civil Rights Act of 1964, it is illegal for employers to discriminate on the basis of race, color, religion, sex, or national origin. More specifically, Title VII prohibits (1) discrimination in the workplace, (2) sexual harassment, and (3) discrimination because of pregnancy. It also permits employers to develop affirmative action plans.

Proof of Discrimination

Discrimination under Title VII means firing, refusing to hire, failing to promote, or otherwise reducing a person's employment opportunities because of race, color, religion, sex, or national origin. This protection applies to every stage of the employment process, from job ads to postemployment references, and includes placement, wages, benefits, and working conditions.

Plaintiffs in Title VII cases can prove discrimination two different ways: disparate treatment and disparate impact.

Disparate Treatment. To prove a disparate treatment case, the plaintiff must show that she was *treated* differently because of her sex, race, color, religion, or national origin. The required steps in a disparate treatment case are:

Step 1. The plaintiff presents evidence that the defendant has discriminated against her because of a protected trait. This is called a ***prima facie* case**. The plaintiff is not required to prove discrimination; she need only create a *presumption* that discrimination occurred.

Suppose that Louisa applies for a job coaching a boys' high school ice hockey team. She was an All-American hockey star in college. Although Louisa is obviously qualified for the job, Harry, the school principal, rejects her and continues to interview other people. This is not proof of discrimination because Harry may have a perfectly good, nondiscriminatory explanation. However, his behavior *could have been* motivated by discrimination.

Step 2. The defendant must present evidence that its decision was based on *legitimate, nondiscriminatory* reasons. Harry might say, for example, that he wanted someone with prior coaching experience. Although Louisa is clearly a great player, she has never coached before.

[23] *Kouba v. Allstate Insurance Co.*, 691 F.2d 873, 1982 U.S. App. LEXIS 24479 (9th Cir. 1982).

Step 3. To win, the plaintiff must now prove that the employer discriminated. She may do so by showing that the reasons offered were simply a *pretext*. Louisa might show that Harry had recently hired a male tennis coach who had no prior coaching experience. Or Harry's assistant might testify that Harry said, "No way I'm going to put a woman on the ice with those guys." If she can present evidence such as this, Louisa wins.

In the following case, was the bartender treated differently because of her sex? You be the judge.

You be the Judge

Jespersen v. Harrah's

444 F.3D 1104, 2006 U.S. APP. LEXIS 9307
United States Court of Appeals for the Ninth Circuit, 2006

Facts: Darlene Jespersen was a bartender at the sports bar in Harrah's Casino in Reno, Nevada. She was an outstanding employee, frequently praised by both her supervisors and customers.

When Jespersen first went to work for Harrah's, female bartenders were encouraged, but not required, to wear makeup. Jespersen tried it for a short period of time, but she did not like it. Moreover, she felt that wearing makeup interfered with her ability to deal with unruly, intoxicated guests because it "took away [her] credibility as an individual and as a person."

After Jespersen had been at Harrah's for almost 20 years, the casino implemented a program that required bartenders to be "well groomed, appealing to the eye." More explicitly, for men:

- Hair must not extend below top of shirt collar. Ponytails are prohibited.
- Hands and fingernails must be clean and nails neatly trimmed at all times.
- No colored polish is permitted.
- Eye and facial makeup is not permitted.
- Shoes will be solid black leather or leather type with rubber (non-skid) soles.

The rules for women were:

- Hair must be teased, curled, or styled. Hair must be worn down at all times, no exceptions.
- Nail polish can be clear, white, pink, or red color only. No exotic nail art or length.
- Shoes will be solid black leather or leather type with rubber (non-skid) soles.
- Makeup (foundation/concealer and/or face powder, as well as blush and mascara) must be worn and applied neatly in complimentary colors, and lip color must be worn at all times.

An expert was brought in to show the employees (both male and female) how to dress. The workers were then photographed and told that they must look like the photographs every day at work.

When Jespersen refused to wear makeup, Harrah's fired her. She sued under Title VII. The district court granted Harrah's motion for summary judgment. Jespersen appealed.

You Be The Judge: ***Did Harrah's requirement that women wear makeup violate Title VII?***

Argument for Jespersen: Jespersen refused to wear makeup to work because the cost—in time, money, and personal dignity—was too high.

Employers are free to adopt different appearance standards for each sex, but these standards may not impose a greater burden on one sex than the other. Men were not required to wear makeup, but women were. That difference meant a savings for men of hundreds of dollars and hours of time. Harrah's did not have the right to fire Jespersen for violating a rule that applies only to women, with no equivalent for men.

Argument for Harrah's: Employers are permitted to impose different appearance rules on women than on men so long as the overall burden on employees is the same. For example, it is not discriminatory to require men to wear their hair short. On balance, Harrah's rules did not impose a heavier burden on women than on men.

Disparate Impact. Disparate impact applies if the employer has a rule that, *on its face*, is not discriminatory, but *in practice* excludes too many people in a protected group. The following landmark case illustrates this principle.

The steps in a disparate impact case are:

Landmark Case

Griggs v. Duke Power Co.

401 U.S. 424, 91 S. Ct. 849, 1971 U.S. LEXIS 134
United States Supreme Court, 1971

Facts: Before Title VII, Duke Power hired black employees only in the Labor department, where the highest pay was less than the lowest earnings in the other departments. After Title VII, the company required all new hires for jobs in the desirable departments to have a high school education or satisfactory scores on two tests that measured intelligence and mechanical ability. Neither test gauged the ability to perform a particular job. The pass rate for whites was much higher than for blacks, and blacks were also less likely than whites to have a high school diploma. The new policy did not apply to the (exclusively white) employees who were already working in the preferred departments. These "unqualified" whites all performed their jobs satisfactorily.

Black employees sued Duke Power, alleging that this hiring policy violated Title VII. The trial court dismissed the case. The Court of Appeals ruled that the policy was not in violation of Title VII because Duke Power did not have a discriminatory purpose. The Supreme Court granted *certiorari*.

Issue: ***Does a policy violate Title VII if it has a discriminatory impact but no discriminatory purpose?***

Excerpts from Chief Justice Burger's Decision: Congress did not intend by Title VII to guarantee a job to every person regardless of qualifications. What is required by Congress is the removal of artificial, arbitrary, and unnecessary barriers to employment when the barriers operate invidiously to discriminate on the basis of racial or other impermissible classification.

The Act proscribes not only overt discrimination but also practices that are fair in form, but discriminatory in operation. The touchstone is business necessity. If an employment practice which operates to exclude Negroes cannot be shown to be related to job performance, the practice is prohibited.

On the record before us, neither the high school completion require-ment nor the general intelligence test is shown to bear a demonstrable relationship to successful performance of the jobs for which it was used. Both were adopted without meaningful study of their relationship to job-performance ability. Rather, the requirements were instituted on the Company's judgment that they generally would improve the overall quality of the work force. The evidence, however, shows that employees who have not completed high school or taken the tests have continued to perform satisfactorily and make progress in departments for which the high school and test criteria are now used.

[G]ood intent or absence of discriminatory intent does not redeem employment procedures or testing mechanisms that operate as "built-in headwinds" for minority groups and are unrelated to measuring job capability. Congress directed the thrust of the Act to the *consequences* of employment practices, not simply the motivation. More than that, Congress has placed on the employer the burden of showing that any given requirement must have a manifest relationship to the employment in question.

History is filled with examples of men and women who rendered highly effective performance without the conventional badges of accomplishment in terms of certificates, diplomas, or degrees. Diplomas and tests are useful servants, but Congress has mandated the commonsense proposition that they are not to become masters of reality.

Nothing in the Act precludes the use of testing or measuring procedures; obviously they are useful. What Congress has commanded is that any tests used must measure the person for the job and not the person in the abstract.

The judgment of the Court of Appeals is reversed.

Step 1. The plaintiff must present a *prima facie* case. The plaintiff is not required to prove discrimination; he need only show a disparate impact—that the employment practice in question excludes a disproportionate number of people in a protected group (women and minorities, for instance). In the *Griggs* case, a far higher percentage of whites than blacks passed the tests required for a job in one of the good departments. The EEOC defines a disparate impact as one in which the pass rate for minorities is less than 80 percent of that for whites.

Step 2. The defendant must offer some evidence that the employment practice was a *job-related business necessity*. Duke Power would have to show that the tests predicted job performance.

Step 3. To win, the plaintiff must now prove either that the employer's reason is a *pretext* or that other, *less discriminatory*, rules would achieve the same results. The plaintiffs in *Griggs* showed that the tests were not a job-related business necessity—after all, whites who had not passed any of these tests performed the jobs well. Duke Power could no longer use them as a hiring screen. If the power company wanted to use tests, it would have to find some that measured an employee's ability to perform particular jobs.

Hiring tests remain controversial. In a recent case, a group of white firefighters sued the city of New Haven, Connecticut, for discarding promotion tests on which they performed better than blacks. Twice as many whites as blacks passed the test. The Supreme Court upheld the use of the examination on the grounds that it was job-related, consistent with business necessity, and there was no strong evidence that an equally valid, less-discriminatory test existed.[24] In short, the mere existence of a disparate impact does not mean that an employment practice violates the law.

Color

Title VII prohibits discrimination based on both race and color. Although many people assume that they are essentially the same, that is not necessarily the case. For example, Dwight Burch alleged that his coworkers at an Applebee's restaurant called him hateful names because of his dark skin color. These colleagues were also African American but were lighter-skinned. Burch sued on the basis of "color discrimination."

Title VII prohibits the type of treatment that Burch allegedly suffered. While denying any wrongdoing, Applebee's settled the case by paying Burch $40,000 and agreeing to conduct antidiscrimination training.

Transgender

David Schroer was in the Army for 25 years, including a stint tracking terrorists. The Library of Congress offered him a job as a specialist in terrorism. (Who knew that libraries needed terrorism specialists?) However, when he revealed that he was in the process of becoming Diane Schroer, the Library of Congress withdrew the offer. As you can guess, he sued under Title VII.

Traditionally, courts took the view that sex under Title VII applied only to how people were born, not what they chose to become. Employers could and did fire workers for changing sex. However, a federal court recently found the Library of Congress in violation of Title VII for withdrawing Schroer's offer.[25] Only time will tell if other federal courts will follow this lead.

[24] *Ricci v. DeStefano*, 129 S. Ct. 2658, 2009 U.S. LEXIS 4945 (S. Ct. 2009).

[25] *Schroer v. Billington*, 577 F. Supp. 2d 293, 2008 U.S. Dist. LEXIS 71358, (U.S. Dt. Ct. 2008).

Retaliation

Title VII not only prohibits discrimination, it also penalizes employers who retaliate against workers for *complaining* about discrimination. Retaliation means that the employer has done something so bad it would deter a reasonable worker from complaining about discrimination.[26] For example, when a woman was demoted to a less-desirable job after she complained about sexual harassment by her boss, the company was liable.

Religion

Employers must make *reasonable accommodation* for a worker's religious beliefs unless the request would cause *undue hardship* for the business. What would you do in the following cases if you were the boss:

1. A Christian says he cannot work at Wal-Mart on Sundays—his Sabbath. It also happens to be one of the store's busiest days.
2. A Jewish police officer wants to wear a beard and yarmulke as part of his religious observance. Facial hair and headgear are banned by the force.
3. Muslim workers at a meat-packing plant want to pray at sundown, but break times were specified in the labor contract and sundown changes from day to day. The workers begin to take bathroom breaks at sundown, stopping work on the production line.

Disputes such as these are on the rise and are not easy to handle fairly. In the end, Wal-Mart fired the Christian, but when he sued on the grounds of religious discrimination, the company settled the case. A judge ruled that the police officer could keep his beard because the force allowed other employees with medical conditions to wear facial hair, but the headcovering had to go. The boss at the meat-packing plant fired the Muslim employees who walked off the job.

Defenses to Charges of Discrimination

Under Title VII, the defendant has three possible defenses.

Merit. A defendant is not liable if he shows that the person he favored was the most qualified. Test results, education, or productivity can all be used to demonstrate merit, provided they relate to the job in question. Harry can show that he hired Bruce for the coaching job instead of Louisa because Bruce has a master's degree in physical education and seven years of coaching experience. On the other hand, the fact that Bruce scored higher on the National Latin Exam in the eighth grade is not a good reason to hire him over Louisa.

Seniority. A legitimate seniority system is legal even if it perpetuates past discrimination. Suppose that Harry has always chosen the most senior assistant coach to take over as head coach when a vacancy occurs. Because the majority of the senior assistant coaches are male, most of the head coaches are, too. Such a system does not violate Title VII.

Bona Fide Occupational Qualification. An employer is permitted to establish discriminatory job requirements if they are *essential* to the position in question. The business must show that it cannot fulfill its primary function unless it discriminates. Such a requirement is called a **bona fide occupational qualification (BFOQ)**. Catholic schools may, if they choose, refuse to hire non-Catholic teachers; clothing companies may refuse to hire men to model women's attire. Generally, however, courts are not sympathetic to claims of BFOQ. They have, for example, almost always rejected BFOQ claims that are based on customer preference. Thus, airlines could not refuse to hire male flight attendants even though they

Bona fide occupational qualification (BFOQ)
An employer is permitted to establish discriminatory job requirements if they are essential to the position in question.

[26] *Burlington Northern v. White*, 126 S. Ct. 2405, 2006 U.S. LEXIS 4895, (S. Ct., 2006).

believed that travelers prefer female attendants.[27] The major exception to this customer preference rule is sexual privacy: an employer may refuse to hire women to work in a men's bathroom, and vice versa.

Affirmative Action

Affirmative action is a hot political issue: white males protest that such programs constitute reverse discrimination against them; political candidates campaign on anti–affirmative action platforms.

Affirmative action is not required by Title VII, nor is it prohibited. Affirmative action programs have three different sources:

- *Litigation.* Courts have the power under Title VII to order affirmative action to remedy the effects of past discrimination.
- *Voluntary action.* Employers can voluntarily introduce an affirmative action plan to remedy the effects of past practices or to achieve equitable representation of minorities and women.
- *Government contracts.* In 1965, President Johnson signed Executive Order 11246, which prohibits discrimination by federal contractors. This order had a profound impact on the American workplace because one-third of all workers are employed by companies that do business with the federal government. If an employer found that women or minorities were underrepresented in its workplace, it was required to establish goals and timetables to correct the deficiency.

In 1995, however, the Supreme Court dramatically limited the extent to which the government can *require* contractors to establish affirmative action programs. The Court ruled that these programs are permissible only if they serve a "compelling national interest" and are "narrowly tailored" so that they minimize the harm to white males. The government must be able to show that (1) the programs are needed to overcome specific past discrimination, (2) they have time limits, and (3) nondiscriminatory alternatives are not available.[28] This case led to a sharp decrease in the number of federal contracts awarded to companies owned by women and minorities.

Sexual Harassment

When Professor Anita Hill accused Supreme Court nominee Clarence Thomas of sexually harassing her, people across the country were glued to their televisions, watching the Senate hearings on her charges. Thomas was ultimately confirmed to the Supreme Court, but "sexual harassment" became a household phrase. The number of cases—and the size of the damage awards—skyrocketed.

> Everyone has heard of sexual harassment, but few people know exactly what it is.

Everyone has heard of **sexual harassment**, but few people know exactly what it is. Men fear that a casual comment or glance will be met with career-ruining charges; women claim that men "just don't get it." So what is sexual harassment anyway? **Sexual harassment involves unwelcome sexual advances, requests for sexual favors, and other verbal or physical conduct of a sexual nature.** There are two major categories of sexual harassment: (1) *quid pro quo* and (2) hostile work environment.

---

[27] *Diaz v. Pan American World Airways, Inc.*, 442 F.2d 385, 1971 U.S. App. LEXIS 10920 (5th Cir. 1971).
[28] *Adarand Constructors, Inc. v. Pena*, 515 U.S. 200, 115 S. Ct. 2097, 1995 U.S. LEXIS 4037 (1995).

Quid Pro Quo. From a Latin phrase that means "one thing in return for another," *quid pro quo* harassment occurs if any aspect of a job is made contingent upon sexual activity. In other words, when a banker says to an assistant, "You can be promoted to teller if you sleep with me," that is *quid pro quo* sexual harassment.

Quid pro quo
A Latin phrase that means "one thing in return for another."

Hostile Work Environment. This is a more subtle claim and the one that managers worry about most. **An employee has a valid claim of sexual harassment if sexual talk and innuendo are so pervasive that they interfere with her (or his) ability to work.** Courts have found that offensive jokes, comments about clothes or body parts, and public displays of pornographic pictures can create a hostile environment.

Text messages have become a new frontier in sexual harassment—so-called *textual harassment*. In behavior that can only make you ask, "What were they thinking?" bosses have sent wildly inappropriate text messages to their subordinates—offering promotions for sex or providing evidence of a sexual relationship. News flash: text messages can be recovered, and juries can read. "She said, he said" cases are a lot harder to win than "She said, he texted."

In the following case, the Supreme Court defined the standard for a hostile work environment.

Teresa Harris v. Forklift Systems, Inc.

510 U.S. 17, 114 S. CT. 367, 1993 U.S. LEXIS 7155
United States Supreme Court, 1993

Facts: Teresa Harris was a manager at Forklift Systems; Charles Hardy was its president. Hardy frequently made inappropriate sexual comments to Harris and other women at the company. For example, he said to Harris, in the presence of others, "You're a woman, what do you know?" and "We need a man as the rental manager." He called her "a dumb-ass woman" and suggested that the two of them "go to the Holiday Inn to negotiate her raise." He also asked Harris and other female employees to get coins from his front pants pocket. He insisted that Harris and other women pick up objects he had thrown on the ground. When Harris complained to Hardy, he apologized and claimed he was only joking. A month later, while Harris was arranging a deal with one of Forklift's customers, he asked her, in front of other employees, "What did you do, promise the guy some sex Saturday night?"

Harris sued Forklift, claiming that Hardy had created an abusive work environment. The federal trial court ruled against Harris on the grounds that Hardy's comments might offend a reasonable woman, but they were not severe enough to have a serious impact on Harris's psychological well-being. The appeals court confirmed, and the Supreme Court granted *certiorari*.

Issue: ***To be a violation of Title VII, must sexual harassment seriously affect the employee's psychological well-being?***

Excerpts from Justice O'Connor's Decision: Title VII of the Civil Rights Act of 1964 makes it "an unlawful employment practice for an employer to discriminate against any individual with respect to his compensation, terms, conditions, or privileges of employment, because of such individual's race, color, religion, sex, or national origin." [T]his language is not limited to economic or tangible discrimination. The phrase "terms, conditions, or privileges of employment" evinces a congressional intent to strike at the entire spectrum of disparate treatment of men and women in employment, which includes requiring people to work in a discriminatorily hostile or abusive environment. When the workplace is permeated with discriminatory intimidation, ridicule, and insult that is sufficiently severe or pervasive to alter the conditions of the victim's employment and create an abusive working environment, Title VII is violated.

This standard takes a middle path between making actionable any conduct that is merely offensive and requiring the conduct to cause a tangible psychological injury. [M]ere utterance of an epithet which engenders offensive feelings in an employee does not sufficiently affect the conditions of employment to implicate Title VII. Conduct that is not severe or pervasive enough to create an objectively hostile or abusive work environment—an environment that a reasonable person would find hostile or abusive—is beyond Title VII's purview. Likewise, if the victim does not subjectively perceive the environment to be abusive, the conduct has not actually altered the conditions of the victim's employment, and there is no Title VII violation.

But Title VII comes into play before the harassing conduct leads to a nervous breakdown. A discriminatorily abusive work environment, even one that does not seriously affect employees' psychological well-being, can and often will detract from employees' job performance, discourage employees from remaining on the job, or keep them from advancing in their careers. Moreover, even without regard to these tangible effects, the very fact that the discriminatory conduct was so severe or pervasive that it created a work environment abusive to employees because of their race, gender, religion, or national origin offends Title VII's broad rule of workplace equality.

We therefore believe the [trial court] erred in relying on whether the conduct "seriously affected plaintiff's psychological well-being" or led her to "suffer injury." So long as the environment would reasonably be perceived, and is perceived, as hostile or abusive, there is no need for it also to be psychologically injurious.

Employees who commit sexual harassment are liable for their own misdeeds. But is their company also liable? The Supreme Court has held that:

- If the victimized employee has suffered a "tangible employment action" such as firing, demotion, or reassignment, the company is liable to her for sexual harassment by a supervisor.
- If the victimized employee has not suffered a tangible employment action, the company is not liable if it can prove that (1) it used reasonable care to prevent and correct sexually harassing behavior, and (2) the employee unreasonably failed to take advantage of the complaint procedure or other preventive opportunities provided by the company.[29]

In an effort to develop practical guidelines for its employees, Corning Consumer Products Co. asks them to apply four tests in determining whether their behavior constitutes sexual harassment:

- Would you say or do this in front of your spouse or parents?
- What about in front of a colleague of the opposite sex?
- Would you like your behavior reported in your local newspaper?
- Does it need to be said or done at all?

Procedures and Remedies

Before a plaintiff in a Title VII case brings suit, she must first file a complaint with the EEOC. Note, however, that the plaintiff must file within 180 days of the wrongdoing. But if the plaintiff is alleging that she was paid less than she should have been, each paycheck she receives starts the statute of limitations all over again. The EEOC has the right to sue on behalf of the plaintiff. This arrangement is favorable for the plaintiff because the government pays the legal bill. If the EEOC decides *not* to bring the case, or does not make a decision within six months, it issues a **right to sue letter**, and the plaintiff may proceed on her own in court. Many states also have their own version of the EEOC.

Remedies available to the successful plaintiff include hiring, reinstatement, retroactive seniority, back pay, reasonable attorney's fees, and damages of up to $300,000. Two recent trends, however, have reduced employees' chances of taking home substantial damages. Concerned about a rise in discrimination lawsuits, employers now often require new hires to agree in advance to arbitrate, not litigate, any future employment claims. The Supreme

[29] *Burlington Industries, Inc. v. Ellerth*, 524 U.S. 742, 118 S. Ct. 2257, 1998 U.S. LEXIS 4217 (1998); *Faragher v. Boca Raton*, 524 U.S. 775, 118 S. Ct. 2275, 1998 U.S. LEXIS 4216 (1998).

Court has upheld the employers' right to do so.[30] Typically, employees receive worse results in the arbitrator's office than in the courtroom, largely because arbitrators tend to favor repeat customers (such as management) over one-time users (such as employees). But even if a case does go to trial, plaintiffs in job discrimination cases have a much worse track record than other types of plaintiffs—they win less often at trial, and they lose more often on appeal. Discrimination plaintiffs win only about 30 percent of the time, and they eventually lose nearly half of those cases on appeal.

Pregnancy

Lucasfilm Ltd. (owned by filmmaker George Lucas) offered Julie Veronese a job as a manager on his California estate, but then it withdrew the offer when she revealed she was pregnant. Is that a problem? Under the Pregnancy Discrimination Act of 1978, an employer may not fire, refuse to hire, or fail to promote a woman because she is pregnant. An employer must also treat pregnancy as any other temporary disability. If, for example, employees are allowed time off from work for other medical disabilities, women must also be allowed a maternity leave. A jury ordered Lucasfilm to pay Veronese $113,800.

The Pregnancy Discrimination Act also protects a woman's right to terminate a pregnancy. An employer cannot fire a woman for having an abortion.[31]

Parenthood

Suppose that you are in charge of hiring at your company. You receive applications from four people: a mother, a father, a childless woman, and a childless father. All have equivalent qualifications. Which one would you hire? In studies, participants repeatedly rank mothers as less qualified than other employees and fathers as most desirable, even when their credentials are exactly the same.

An employer cannot discriminate because of pregnancy, but what about when the new mother goes back to work? Is parenthood protected by Title VII? Increasingly, courts have held that unequal treatment of mothers is a violation of Title VII. For example, after Dawn Gallina, an associate at the Mintz, Levin law firm, revealed to her boss that she had a young child, he began to treat her differently from her male colleagues and spoke to her "about the commitment differential between men and women." The court ruled that her belief of illegal discrimination was reasonable.[32] The EEOC has issued guidelines indicating that stereotypes are not a legitimate basis for personnel decisions.

Age Discrimination

The Age Discrimination in Employment Act (ADEA) of 1967 prohibits age discrimination against employees or job applicants who are at least 40 years old. An employer may not fire, refuse to hire, fail to promote, or otherwise reduce a person's employment opportunities because he is 40 or older. Under this statute, an employer may not require a worker to retire at any age. (These retirement rules do not apply to police and top-level corporate executives.)

The procedure for an age-bias claim is similar to that under Title VII—plaintiffs must first file a charge with the EEOC. If the EEOC does not take action, they can file suit themselves. However, the standard of proof is tougher in an age discrimination case than in Title VII litigation. Under the ADEA, the plaintiff must show that *but for* his age, the

---

[32] *Gallina v. Mintz, Levin, Cohn, Ferris, Glovsky, and Popeo*; 2005 U.S. App. LEXIS 1710 (4th Cir., 2005).

employer would not have taken the action it did. In other words, to win a case, the plaintiff must show that age was not just one factor, it was the *deciding* factor.[33]

Another issue in age discrimination cases: what happens if a company fires older workers because they are paid more? As a general rule, people in their 60s earn 50 percent more than workers in their early 30s. The older folks are more efficient, but not 50 percent more. What can a company do? Circuit City Stores fired 8 percent of its employees because they could be replaced with people who would work for less. The fired workers were more experienced—and older. This action is legal under the ADEA. Courts have held that an employer is entitled to prefer *lower-paid* workers even if that preference results in the company also choosing *younger* workers. As the court put it in one case, "An action based on price differentials represents the very quintessence of a legitimate business decision."[34] Indeed, economists argue that the U.S. economy's strength is based at least in part on its flexibility—an American employer can hire workers without fear of being stuck with them until retirement.

What protection does the ADEA provide? In passing this statute, Congress was particularly concerned about employers who relied on unfavorable stereotypes rather that job performance. The following case illustrates this issue.

Reid v. Google, Inc.

50 Cal. 4th 512, 2010 Cal. LEXIS 7544
Supreme Court of California, 2010

Facts: Google's vice-president of engineering, Wayne Rosing (aged 55), hired Brian Reid (52) as director of operations and director of engineering. Reid had a Ph.D. in computer science and had been a professor of electrical engineering at Stanford University. At the time, the top executives at Google were CEO Eric Schmidt (47), vice-president of engineering operations Urs Hölzle (38), and founders Sergey Brin (28), and Larry Page (29).

During his two years at Google, Reid's only written performance review stated that he had consistently met expectations. The comments indicated that Reid had an extraordinarily broad range of knowledge, an aptitude and orientation towards operational and IT issues, an excellent attitude, and that he projected confidence when dealing with fast-changing situations, was very intelligent and creative, and was a terrific problem solver. The review also commented that "Adapting to Google culture is the primary task. Right or wrong, Google is simply different: younger contributors, inexperienced first-line managers, and the super-fast pace are just a few examples of the environment."

According to Reid, even as he received a positive review, Hölzle and other employees made derogatory age-related remarks such as his ideas were "obsolete," "ancient," and "too old to matter," that he was "slow," "fuzzy," "sluggish," and "lethargic," an "old man," an "old guy," and an "old fuddy-duddy," and that he did not "display a sense of urgency" and "lacked energy."

Fifteen months after Reid joined Google, cofounder Brin emailed several executives about Google's payroll: "We should avoid the tendency towards bloat here, particularly with highly paid individuals." A month later, Reid's duties were assigned to two men who were 15 and 20 years younger. Google asked Reid to develop two in-house educational programs but did not give him a budget or a staff.

Three months later, Reid was fired. Google says it was because of his poor performance and the termination of the educational programs. Reid alleges he was told it was not related to the educational programs or his performance but rather was based on a lack of "cultural fit."

Reid sued Google for age discrimination. The trial court granted Google's motion for summary judgment on the grounds that Reid did not have enough evidence of discrimination. The Court of Appeal overruled the trial court. The California Supreme Court agreed to hear the case.

Issues: ***Did Reid have enough evidence of age discrimination to warrant a trial? Should the summary judgment motion be granted?***

---

[33] *Gross v. FBL Financial Services, Inc.*, 129 S. Ct. 2343; 2009 U.S. LEXIS 4535 (S. Ct., 2009).
[34] *Marks v. Loral Corp.*, 57 Cal. App. 4th 30, 1997 Cal. App. LEXIS 611 (Cal. Ct. App., 1997).

Excerpts from Justice Chin's Decision expressing the unanimous view of the court: Reid offered discriminatory comments that coworkers and decision makers made and evidence that Google demoted Reid to a nonviable position before terminating him and advanced changing rationales for his termination. Google contends that the Court of Appeal should have applied the stray remarks doctrine, i.e., should have categorized the alleged statements by Hölzle and Rosing as irrelevant stray remarks and disregarded them in reviewing the merits of the summary judgment motion.

[Justice O'Connor of the Supreme Court of the United States has] stated that "'stray remarks'—statements by nondecisionmakers, or statements by decisionmakers unrelated to the decisional process itself"—do not constitute direct evidence of decision makers' illegitimate criterion in reaching their decision." However, Justice O'Connor explained that stray remarks can be probative of discrimination.

Google contends that we should adopt the stray remarks doctrine so that California courts can disregard discriminatory comments by co-workers and nondecisionmakers, or comments unrelated to the employment decision to ensure that unmeritorious cases principally supported by such remarks are disposed of before trial.

[S]trict application of the stray remarks doctrine, as urged by Google, would result in a court's categorical exclusion of evidence even if the evidence was relevant. An age-based remark not made directly in the context of an employment decision or uttered by a non-decision-maker may be relevant, circumstantial evidence of discrimination. In a later decision authored by Justice O'Connor, the United States Supreme Court indicates that even if age-related comments can be considered stray remarks because they were not made in the direct context of the decisional process, a court should not categorically discount the evidence if relevant; it should be left to the factfinder to assess its probative value.

[T]he stray remarks cases merely demonstrate the common-sense proposition that a slur, in and of itself, does not prove actionable discrimination. A stray remark alone may not create a triable issue of age discrimination. But when combined with other evidence, an otherwise stray remark may create an ensemble [that] *is* sufficient to defeat summary judgment.

For the reasons stated above, we affirm the judgment of the Court of Appeal.

Americans with Disabilities Act

The Americans with Disabilities Act (ADA) prohibits employers from discriminating on the basis of disability. As with Title VII, a plaintiff under the ADA must first file a charge with the EEOC. If the EEOC decides not to file suit, the individual may do so himself.

A **disabled person** is someone with a physical or mental impairment that substantially limits a major life activity, or someone who is regarded as having such an impairment. The definition of major life activity includes the following tasks: caring for oneself, performing manual tasks, seeing, hearing, eating, sleeping, walking, standing, lifting, bending, speaking, breathing, learning, reading, concentrating, thinking, communicating, and working. Cell growth and digestive, bowel, bladder, neurological, brain, respiratory, circulatory, endocrine, reproductive, and immune system functions are also considered major life activities. And the definition protects *recovered* drug addicts or alcoholics but does not include the *current* use of drugs, sexual disorders, pyromania, exhibitionism, or compulsive gambling.

Disabled person
Someone with a physical or mental impairment that substantially limits a major life activity, or someone who is regarded as having such an impairment.

Suppose an employee has a disabling illness, but one that can be successfully treated. The employee is still considered to be disabled, even if the illness is well controlled. Thus, someone with diabetes is disabled, even if the illness is managed so well that it does not interfere with major life activities. There is one important exception—someone whose vision is normal when wearing glasses or contact lenses is not disabled for purposes of the ADA.

An employer may not disqualify an employee or job applicant because of disability so long as she can, with *reasonable accommodation*, perform the *essential functions* of the job. An accommodation is not reasonable if it would create *undue hardship* for the employer. In

one case, a court held that a welder who could perform 88 percent of a job was doing the essential functions. Reasonable accommodation includes buying necessary equipment, providing readers or interpreters, or permitting a part-time schedule. In determining undue hardship, *relative* cost, not *absolute* cost, is the issue. Even an expensive accommodation—such as hiring a full-time reader—is not considered an undue hardship unless it imposes a significant burden on the overall finances of the company.

An employer may not ask about disabilities before making a job offer. The interviewer may ask only whether an applicant can perform the work. Nor can an employer require applicants to take a medical exam unless the exam is (1) job-related and (2) required of all applicants for similar jobs. However, drug testing is permitted.

After a job offer has been made, an employer may require a medical test, but it must be related to the *essential functions* of the job. For example, an employer could not test the cholesterol of someone applying for an accounting job because high cholesterol is no impediment to good accounting.

An employer may not discriminate against someone because of his *relationship* with a disabled person. For example, an employer cannot refuse to hire an applicant because he has a disabled child or a spouse with cancer.

Under EEOC rules, physical and mental disabilities are to be treated the same. The difficulty is that physical ailments such as diabetes and deafness may be easy to diagnose, but what does a supervisor do when an employee is chronically late, rude, or impulsive? Does this mean that the worker is mentally disabled or just a lazy, irresponsible jerk? Among other accommodations, the EEOC rules indicated that employers should be willing to put up barriers to isolate people who have difficulty concentrating, provide detailed day-to-day feedback to those who need greater structure in performing their jobs, or allow workers on antidepressants to come to work later if they are groggy in the morning.

While lauding the ADA's objectives, many managers have been apprehensive about its impact on the workplace. Most acknowledge, however, that society is better off if every member has the opportunity to work. And as advocates for the disabled point out, we are all, at best, only temporarily able-bodied. Even with the ADA, only 29 percent of the disabled population who are of working age are actually employed, whereas 79 percent of able-bodied persons have jobs.

Genetic Information Nondiscrimination Act

Suppose you want to promote someone to chief financial officer, but you know that her mother and sister both died young of breast cancer. Is it legal to consider that information in making a decision? Not since Congress passed the Genetic Information Nondiscrimination Act (GINA). **Under this statute, employers (with 15 or more workers) may not require genetic testing or discriminate against workers because of their genetic makeup.** Nor may health insurers use such information to decide coverage or premiums. Thus, neither employers nor health insurers may require you to provide your family medical history—who has died of cancer or heart disease, for instance. And if they find this information out from another source (such as a newspaper obituary), they may not use it in making an employment decision.

Every applicant feels slightly apprehensive before a job interview, but now the interviewer may be even more nervous—fearing that every question is a potential land mine of liability. Most interviewers (and students who have read this chapter) would know better than Delta Airlines interviewers who allegedly asked applicants about their sexual preference, birth control methods, and abortion history. The following list provides guidelines for interviewers.

Don't Even Consider Asking	Go Ahead and Ask
Can you perform this function with or without reasonable accommodation?	Would you need reasonable accommodation in this job?
How many days were you sick last year?	How many days were you absent from work last year?
What medications are you currently taking?	Are you currently using drugs illegally?
Where were you born? Are you a United States citizen?	Are you authorized to work in the United States?
How old are you?	What work experience have you had?
How tall are you? How much do you weigh?	Could you carry a 100-pound weight, as required by this job?
When did you graduate from college?	Where did you go to college?
How did you learn this language?	What languages do you speak and write fluently?
Have you ever been arrested?	Have you ever been convicted of a crime that would affect the performance of this job?
Do you plan to have children? How old are your children? What method of birth control do you use?	Can you work weekends? Travel extensively? Would you be willing to relocate?
What is your corrected vision?	Do you have 20/20 corrected vision?
Are you a man or a woman? Are you single or married? What does your spouse do? What will happen if your spouse is transferred? What clubs, societies, or lodges do you belong to?	Talk about the weather instead!

The most common gaffe on the part of interviewers? Asking women about their child-care arrangements. That question assumes the woman is responsible for child-care.

EXAM Strategy

Question: Pippa became pregnant the week she started work as an administrator at Awesome University. Her supervisor was so annoyed at her that he would not consider her for promotion to another job within the university. Under the university's maternity leave policy, Pippa was not entitled to any time off from work because she had not been an employee for at least a year by the time her baby was born. When she quit her job, the university cancelled her health insurance coverage. Has the university violated the law?

Strategy: First: Is Pippa protected by any statutes? The possibilities are: the FMLA, COBRA, and the Pregnancy Discrimination Act.

Second: How do these statutes apply? Under the Pregnancy Discrimination Act, an employer cannot deny a promotion to a woman because she is pregnant. Also, if employees are allowed time off for illness, they must also be allowed time off for pregnancy. Thus, if men who have heart attacks are permitted paid time off from work, women must also be paid while they recuperate from delivery.

Third: The FMLA guarantees at least 12 weeks of unpaid leave each year for childbirth but only for workers who have been employed for at least one year. Therefore, the university's maternity leave policy is legal. Finally, under COBRA, Pippa has the right to continue her health insurance for 18 months (provided she pays for it).

Result: The university has violated two statutes.

Chapter Conclusion

Although managers sometimes feel overwhelmed by the long list of laws that protect workers, the United States guarantees its workers fewer rights than virtually any other industrialized nation. For instance, Japan, Great Britain, France, Germany, and Canada all require employers to show just cause before terminating workers. Although American employers are no longer insulated from minimum standards of fairness, reasonable behavior, and compliance with important policies, they still have great freedom to manage their employees.

Exam Review

1. **TRADITIONAL COMMON LAW RULE** The traditional common law rule of employment provided that an employee at will could be fired for a good reason, a bad reason, or no reason at all. (p. 699)

2. **NLRA** The National Labor Relations Act prohibits employers from penalizing workers for union activity. (p. 700)

3. **FMLA** The Family and Medical Leave Act guarantees workers up to 12 weeks of unpaid leave each year for childbirth, adoption, a serious health condition of their own or in their immediate family. (p. 700)

4. **HEALTH INSURANCE** Starting in 2014, employers who have more than 50 full-time employees must pay a penalty if they do not provide basic health insurance. (pp. 700–701)

5. **COBRA** Under the Consolidated Omnibus Budget Reconciliation Act, former employees must be allowed to continue their health insurance for 18 months after being terminated from their job, but they must pay for it themselves. (p. 701)

6. **WRONGFUL DISCHARGE** An employer who fires a worker for a bad reason is liable under a theory of wrongful discharge. (pp. 701–704)

7. **PUBLIC POLICY** Generally, an employee may not be fired for refusing to violate the law, performing a legal duty, exercising a legal right, or supporting basic societal values. (pp. 701–703)

EXAM Strategy

Question: When Theodore Staats went to his company's "Council of Honor Convention," he was accompanied by a woman who was not his wife, although he told everyone she was. The company fired him. Staats alleged that his termination violated public policy because it infringed upon his freedom of association. He also alleged that he had been fired because he was too successful—his commissions were so high, he outearned even the highest-paid officer of the company. Has Staat's employer violated public policy?

Strategy: Is Staats protected by a statute? No. Is he being asked to break the law? No. Is he trying to perform a legal duty? No. Is he being denied a legal right? (See the "Result" at the end of this section.)

8. **PROMISES MADE DURING THE HIRING PROCESS** Promises made during the hiring process may be enforceable, even if not approved by the company's top executives. (pp. 703–704)

EXAM Strategy

Question: When Phil McConkey interviewed for a job as an insurance agent with Alexander & Alexander, the company did not tell him that it was engaged in secret negotiations to merge with Aon. When the merger went through soon thereafter, Aon fired McConkey. Was Alexander liable for not telling McConkey about the possible merger?

Strategy: Was McConkey protected by a statute? No. Did the company make any promises to him during the hiring process? (See the "Result" at the end of this section.)

9. **HANDBOOKS** An employee handbook may create a contract. (p. 704)

10. **COVENANT OF GOOD FAITH AND FAIR DEALING** In almost all states, courts will imply this covenant in an at-will employment relationship. (p. 704)

11. **IMMIGRATION** After hiring a worker, employers must complete an I-9 form—Employment Eligibility Verification—within three days. This form lists the acceptable documents that can be used for verification. Employees have the right to present whichever documents they want from the lists of acceptable items. (p. 710)

12. **DEFAMATION** Employers may be liable for defamation if they give false and unfavorable references. (pp. 704–705)

13. **WHISTLEBLOWERS** Whistleblowers receive some protection under both federal and state laws. (pp. 706–707)

14. **OSHA** The goal of the Occupational Safety and Health Act is to ensure safe conditions in the workplace. (pp. 707–708)

15. **EMPLOYEE PRIVACY** An employer may not violate a worker's reasonable expectation of privacy. However, unless a state has passed a statute to the contrary, employers may monitor many types of off-duty conduct (even legal activities such as smoking). Most states permit private employers to administer alcohol and drug tests. But employers may not require lie detector tests, except as (1) part of an investigation into a crime or (2) for jobs in pharmaceutical firms that deal with controlled substances. (pp. 708–710)

16. **WORKERS' COMPENSATION** Workers' compensation statutes ensure that employees receive payment for injuries incurred at work. (p. 711)

17. **SOCIAL SECURITY** The social security system pays benefits to workers who are retired, disabled, or temporarily unemployed and to the spouses and children of disabled or deceased workers. (pp. 711–712)

18. **ERISA** The Employee Retirement Income Security Act regulates private pension plans. (p. 713)

19. **EQUAL PAY ACT** Under the Equal Pay Act, an employee may not be paid at a lesser rate than employees of the opposite sex for equal work. (pp. 713–714)

20. **TITLE VII** Title VII of the Civil Rights Act of 1964 prohibits employers from discriminating on the basis of race, color, religion, sex, or national origin. (pp. 713–721)

21. **RETALIATION** Title VII penalizes employers who retaliate against workers for complaining about discrimination. (p. 717)

22. **BFOQ** Under the bona fide occupational qualification standard, an employer is permitted to establish discriminatory job requirements if they are *essential* to the position in question. (pp. 717–718)

23. **PREGNANCY DISCRIMINATION ACT OF 1978** Under the Pregnancy Discrimination Act, an employer may not fire, refuse to hire, or fail to promote a woman because she is pregnant. An employer must also treat pregnancy as any other temporary disability. (p. 721)

24. **ADEA** The Age Discrimination in Employment Act prohibits age discrimination against employees or job applicants who are age 40 or older. (pp. 721–723)

25. **ADA** The Americans with Disabilities Act prohibits employers from discriminating on the basis of disability. (pp. 723–724)

EXAM Strategy

Question: When Thomas Lussier filled out a Postal Service employment application, he did not admit that he had twice pleaded guilty to charges of disorderly conduct. Lussier suffered from Post Traumatic Stress Disorder (PTSD) acquired during military service. Because of this disorder, he sometimes had panic attacks that required him to leave meetings. He was also a recovered alcoholic and drug user. During his stint with the Postal Service, he had some personality conflicts with other employees. Once, another employee hit him. He also had one episode of "erratic emotional behavior and verbal outburst." In the meantime, a postal employee in Ridgewood, New Jersey, killed four colleagues. The postmaster general encouraged all supervisors to identify workers who had dangerous propensities. Lussier's boss discovered that he had lied on his employment application about the disorderly conduct charges and fired him. Is the Postal Service in violation of the law?

Strategy: Was Lussier disabled under the ADA? He had a mental impairment (PTSD) that substantially limited a major life activity. Could Lussier, with reasonable accommodation, perform his job? Yes. Was his firing illegal? (See the "Result" at the end of this section.)

26. GINA Under the Genetic Information Nondiscrimination Act, employers with 15 or more workers may not require genetic testing or discriminate against workers because of their genetic makeup. (pp. 724–725)

7. Result: The court held that freedom of association is an important social right and should be protected. However, being fired for bringing a lover to an employer's convention is not a threat to public policy. Nor is discharge for being too successful.

8. Result: The court held that when Alexander hired him, it was making an implied promise that he would not be fired immediately. The company was liable for not having revealed the merger negotiations.

25. Result: The court held that the Postal Service was in violation of the law because Lussier had been dismissed solely as a result of his disability.

Multiple-Choice Questions

1. Brook moved from Denver to San Francisco to take a job with an advertising agency. His employment contract stated that he was "at will and could be terminated at any time." After 28 months with the company, he was fired without explanation. Which of the following statements is true?
   (a) His contract implied that he could only be fired for cause.
   (b) Because he had a contract, he was not an employee at will.
   (c) He could only be fired for a good reason.
   (d) He could be fired for any reason.
   (e) He could be fired for any reason except a bad reason.

2. ***CPA QUESTION*** An unemployed CPA generally would receive unemployment compensation benefits if the CPA:
   (a) Was fired as a result of the employer's business reversals
   (b) Refused to accept a job as an accountant while receiving extended benefits
   (c) Was fired for embezzling from a client
   (d) Left work voluntarily without good cause

3. During a job interview with Venetia, Jack reveals that he and his wife are expecting twins. Venetia asks him if he is planning to take a leave once the babies are born. When Jack admits that he would like to take a month off work, he can see her face fall. She ultimately decides not to hire him because of the twins. Which of the following statements are true?
   (a) Venetia has violated the FMLA.
   (b) Venetia has violated the Pregnancy Discrimination Act.
   (c) Venetia has violated Title VII.
   (d) All of the above.
   (e) None of the above.

4. Ralph has worked as a model builder at Snowdrop Architects for 30 years. The firm replaces him with Charlotte, who is only 24 and willing to work for 30 percent less than his salary. The firm never offered to let him stay for less pay. When he left, one of the partners told him, "Frankly, it's not a bad thing to have a cute young person working with the clients." Which of the following statements is true?
   (a) Snowdrop is liable because it had an obligation to offer Ralph the lower salary before firing him.
   (b) Snowdrop is liable because it is illegal to replace an older worker with a younger one just to save money.
   (c) Snowdrop is liable because age was a factor in Ralph's firing.
   (d) Snowdrop is liable under Title VII because it replaced an old man with a young woman.
   (e) Snowdrop is not liable because age was not the deciding factor in Ralph's firing.

5. During chemotherapy for bone cancer, a delivery person is exhausted, nauseous, and weak. He has asked permission to come in later, work a shorter day, and limit his lifting to 10 pounds. Delivery people typically carry packages of up to 70 pounds. Does Vulcan, his employer, have the right to fire him?
   (a) Vulcan must create a new position so that the employee can do something else.
   (b) Vulcan must transfer the employee to another position, but only if one is vacant and he is able to perform it.
   (c) Vulcan can fire the man because none of his major life activities has been affected.
   (d) Vulcan can fire the man because he cannot perform the essential functions of his job.
   (e) Vulcan can fire him because he is not disabled—once the chemotherapy treatments end, he will feel fine again.

ESSAY QUESTIONS

1. Reginald Delaney managed a Taco Time restaurant in Portland, Oregon. Some of his customers told Mr. Ledbetter, the district manager, that they would not be eating there so often because there were too many black employees. Ledbetter told Delaney to fire Ms. White, who was black. Delaney did as he was told. Ledbetter's report on the incident said: "My notes show that Delaney told me that White asked him to sleep with her and that when he would not, that she started causing dissension within the crew. She asked him to come over to her house and that he declined." Delaney refused to sign the report because it was untrue, so Ledbetter fired him. What claim might Delaney make against his former employer?

2. Debra Agis worked as a waitress in a Ground Round restaurant. The manager informed the waitresses that "there was some stealing going on." Until he found out who was doing it, he intended to fire all the waitresses in alphabetical order, starting with the letter "A." Dionne then fired Agis. Does she have a valid claim against her employer?

3. The Lillie Rubin boutique in Phoenix would not permit Dick Kovacic to apply for a job as a salesperson. It hired only women to work in sales because fittings and alterations took place in the dressing room or immediately outside. The customers were buying expensive clothes and demanded a male-free dressing area. Has the Lillie Rubin store violated Title VII? What would its defense be?

4. **YOU BE THE JUDGE WRITING PROBLEM** FedEx gave Marcie Dutschmann an employment handbook stating that (1) she was an at-will employee, (2) the handbook did not create any contractual rights, and (3) employees who were fired had the right to a termination hearing. The company fired Dutschmann, claiming that she had falsified delivery records. She said that FedEx was retaliating against her because she had complained of sexual harassment. FedEx refused her request for a termination hearing. Did the employee handbook create an implied contract guaranteeing Dutschmann a hearing? **Argument for FedEx:** The handbook could not have been clearer—it did not create a contract. Dutschmann is an employee at will and is not entitled to a hearing. **Argument for Dutschmann:** FedEx intended that employees would rely on the handbook.The company used promises of a hearing to attract and retain good employees. Dutschmann was entitled to a hearing.

5. After the terrorist attacks of 9/11, the United States tightened its visa requirements. In the process, baseball teams discovered that 300 foreign-born professional players had lied about their age. (A talented 16-year-old is much more valuable than a 23-year-old with the same skills.) In some cases, the players had used birth certificates that belonged to other (younger) people. To prevent this fraud, baseball teams began asking for DNA tests on prospects and their families, to make sure they were not lying about their identity. Is this testing legal? What if a team wanted to test players to see if they were susceptible to certain diseases?

Discussion Questions

1. When Walton Weiner interviewed for a job with McGraw-Hill, Inc., he was assured that the company would not terminate an employee without "just cause." Weiner also signed a contract specifying that his employment would be subject to the provisions of McGraw-Hill's handbook. The handbook said, "[The] company will resort to dismissal for just and sufficient cause only, and only after all practical steps toward rehabilitation or salvage of the employee have been taken and failed. However, if the welfare of the company indicates that dismissal is necessary, then that decision is arrived at and is carried out forthrightly." After eight years, Weiner was fired suddenly for "lack of application." Does Weiner have a valid claim against McGraw-Hill?

2. **ETHICS** Mary Ann Singleton was the librarian at a maximum-security prison located in Tazewell County, Virginia. About four times a week, Gene Shinault, assistant warden for operations, persistently complimented Singleton and stared at her breasts when he spoke to her. On one occasion, he measured the length of her skirt to judge its compliance with the prison's dress code and told her that it looked "real good"; constantly told her how attractive he found her; made references to his physical fitness, considering his advanced age; asked Singleton if he made her nervous (she answered "yes"); and repeatedly remarked to Singleton that if he had a wife as attractive as Singleton, he would not permit her to work in a prison facility around so many inmates. Shinault told Singleton's supervisor in her presence, "Look at her. I bet you have to spank her every day." The supervisor then laughed and said, "No. I probably should, but I don't." Shinault replied, "Well, I know I would." Shinault also had a security camera installed in her office in a way that permitted him to observe her as she worked. Singleton reported this behavior to her supervisor, who simply responded, "Boys will be boys." Did Shinault sexually harass Singleton? Whether or not Shinault violated the law, what *ethical* obligation did Singleton's superviser have to protect her from this type of behavior?

3. Ronald Lockhart, who was deaf, worked for FedEx as a package handler. Although fluent in American Sign Language, he could not read lips. After 9/11, the company held meetings to talk about security issues. Lockhart complained to the EEOC that he could not understand these discussions. FedEx fired him. Has FedEx violated the law?

4. Gregg Young, the CEO of BJY Inc. insisted on calling Mamdouh El-Hakem "Manny" or "Hank." Does this behavior violate the law?

5. Once again, FedEx was in the news when it refused to promote José Rodriguez to a supervisor's position because of his accent and "how he speaks." Is FedEx in violation of the law?

CHAPTER 30

© Ivan Cholakov Gostock-dot-net/Shutterstock.com

LABOR LAW

A strike! For five weeks, the union workers have been walking picket lines at JMJ, a manufacturer of small electrical engines. An entire town of 70,000 citizens, most of them blue-collar workers, is sharply divided, right down to the McNally's kitchen table. Buddy, age 48, has worked on the assembly lines at JMJ for more than 25 years. Now he's sipping coffee in the house where he grew up. His sister Kristina, age 46, is a vice president for personnel at JMJ. The two have always been close. In high school, Kristina idolized her older brother, the football and track star. Buddy was immensely proud of his kid sister's academic triumphs, boasting to the world that she would "be the first lady president." Today, though, conversation is halting.

An entire town of 70,000 citizens, most of them blue-collar workers, is sharply divided, right down to the McNallys' kitchen table.

"It's time to get back together, Buddy," Kristina murmurs. "The strike is hurting the whole company—and the town."

Not the *whole* town, Kristina," he replies. "Your management pals still have fat incomes and nice houses."

"Oh yeah? You haven't seen our porch lately."

"Go talk to Tony Falcione. He can't pay his rent."

"Talk to the Ericksons," Kristina snaps back. "They don't even work for JMJ. Their sandwich shop is going under because none of you guys stop in for lunch. Come back to work."

"Not with that clause on the table."

That clause is management's proposal for the new union contract—one that Kristina helped draft. The company officers want the right to subcontract work—that is, to send it out for other companies to perform.

"Buddy, we need the flexibility. K-Ball is underselling us by 35 percent. If we can't compete, there won't be *any* jobs or *any* contract!"

"The way to save money is not by sending our jobs overseas, where people will work for 50 bucks a month."

"O.K., fine. Tell me how we *should* save money."

"How you can sit at this table and say these things? In this house? You never would have gone to college if Dad hadn't made union wages."

"If we can't cut costs, we're out of business. *Then* what's your union going to do for you? All we're asking is the right to subcontract some of the smallest components. Everything else gets built here."

"This is just the start. Next it'll be the wiring, then the batteries, then you'll assemble the whole thing over there—and that'll be it for me. You take that clause off the table, we'll be back in 15 minutes."

"You know I can't do that."

Buddy stands up. They stare silently, sadly, at each other, and then Kristina says, in a barely audible voice, "I have to tell you this. My boss is starting to talk about hiring replacement workers."

Buddy walks out.

Some Americans revere unions, believing that organized labor has pulled the working class up from poverty and shielded it from exploitative management. Others loathe organized labor, convinced that unions foment mindless conflicts, decrease productivity, increase costs, and harm corporations and the economy generally. In the next section, we begin at the beginning: why do unions exist?

Unions Develop ... and the Law Responds

During the 19th century, as industrialization spread across America, workers found employment conditions increasingly unbearable. Here is an account of mining in the American West:

> View their work! Descending from the surface in the shaft-cages, they enter narrow galleries where the air is scarce respirable. By the dim light of their lanterns a dingy rock surface, braced by rotting props, is visible. The stenches of decaying vegetable matter, hot foul water, and human excretions intensify the effects of the heat. The men throw off their clothes at once. Only a light breech-cloth covers their hips, and thick-soled shoes protect their feet from the scorching rocks and steaming rills of water that trickle over the floor. Except for these coverings they toil naked, with heavy drops of sweat starting from every pore.[1]

Temperatures in the mines were well over 100 degrees. Miners drank more than three gallons of water every day. Some suddenly collapsed, with swollen veins, purple faces, and glazed eyes. Within minutes, they were dead, but even before they died, their places in the mine were taken by other workers desperate for pay.

---

[1] Eliot Lord, *Comstock Mining and Miners* (Washington: G.P.O., 1883), p. 386, quoted in Richard E. Lingenfelter, *The Hardrock Miners* (Berkeley: University of California Press, 1974), p. 13.

Conditions were also oppressive in the new factories back east. Workers, often women and sometimes children, worked 60 to 70 hours per week and sometimes more, standing at assembly lines in suffocating, dimly lit factories, performing monotonous and dangerous work with heavy machinery. A visitor to a factory in Lowell, Massachusetts, in 1855 was shocked by the degrading conditions and the exhausting hours required of all workers:

> I inquired of the agent of a principal factory whether it was the custom of the manufacturers to do anything for the physical, intellectual, and moral welfare of their work-people. "We never do," he said. "As for myself, I regard my work-people just as I regard my machinery. So long as they can do my work for what I choose to pay them, I keep them, getting out of them all I can. What they do or how they fare outside my walls I don't know, nor do I consider it my business to know. When my machines get old and useless, I reject them and get new, and these people are part of my machinery."[2]

Because of the intolerable conditions and impoverishing wages, workers began to band together into unions. But early in the 19th century, American courts regarded any coordinated effort by workers as a criminal conspiracy. Courts convicted workers merely for the *act of joining together*, even if no strike took place. In 1842, the Massachusetts high court became the first to reject this use of the criminal law. The court ruled that workers could join together for legitimate economic goals; their efforts would become criminal only if the workers used illegal means to achieve them.[3] Other courts came to agree, and so management resorted to the civil law to curtail unions.

In 1890, Congress passed the Sherman Act to outlaw monopolies.[4] But for the next 40 years, courts relied on this statute to issue injunctions, declaring that *strikes* illegally restrained trade. A company could usually obtain an immediate injunction merely by alleging that a strike *might* cause harm. Courts were so quick to issue injunctions that most companies became immune to union efforts. But with the economic collapse of 1929 and the vast suffering of the Great Depression, public sympathy shifted to the workers. Congress responded with the first of several landmark statutes.

Norris-LaGuardia Act
Prohibits federal court injunctions in peaceful labor disputes.

National Labor Relations Act (NLRA)
Ensures the right of workers to form unions and encourages management and unions to bargain collectively.

Pro-Union Statutes

In 1932, Congress passed the **Norris-LaGuardia Act,** which prohibited federal court injunctions in nonviolent labor disputes. No longer could management stop a strike merely by mentioning the word "strike." By taking away the injunction remedy, Congress was declaring that workers should be permitted to organize unions and to use their collective power to achieve legitimate economic ends. The statute led to explosive growth in union membership.

In 1935, Congress passed the Wagner Act, generally known as the **National Labor Relations Act (NLRA)**. This is the most important of all labor laws. A fundamental aim of the NLRA is the establishment and maintenance of industrial peace, to preserve the flow of commerce. The NLRA ensures the

As industry changes, labor changes with it. Do these changes spell the end of unionization, or are unions merely undergoing a transition as labor catches up with the modern economy?

[2]Massachusetts Senate Dock. no. 21, 1868, p. 23, quoted in Norman Ware, *The Industrial Worker* (Chicago: Quadrangle Books, 1964), p. 77.
[3]*Commonwealth v. Hunt,* 45 Mass. 111, 4 Met. 111 (1842).
[4]See Chapter 38, on antitrust law.

right of workers to form unions and encourages management and unions to bargain collectively and productively. For our purposes, Sections 7 and 8 of the NLRA are the most important.

Section 7 guarantees employees the right to organize and join unions, bargain collectively through representatives of their own choosing, and engage in other concerted activities. This is the cornerstone of union power. With the enactment of the NLRA, Congress put an end to any notion that unions were inherently illegal by explicitly recognizing that workers could join together, bargain as a group, and use their collective power to seek better conditions.

Section 8 prohibits employers from engaging in the following unfair labor practices (ULPs):

- Interfering with union organizing efforts,
- Dominating or interfering with any union,
- Discriminating against a union member, or
- Refusing to bargain collectively with a union.

National Labor Relations Board (NLRB)
Administers and interprets the NLRA and adjudicates labor cases.

The NLRA also established the **National Labor Relations Board (NLRB)** to administer and interpret the statute and to adjudicate labor cases. For example, when a union charges that an employer has committed an unfair labor practice—say, by refusing to bargain—the claim goes first to the NLRB.

The NLRB has two primary tasks:

- *Representation.* The Board decides whether a particular union is entitled to represent a group of employees.
- *Unfair labor practices.* The Board adjudicates claims by either the employer or workers that the other side has committed a ULP.

To accomplish these tasks, the NLRB has several divisions. Although the agency is headquartered in Washington, it performs the greatest volume of its work in local offices. Regional offices, each headed by a regional director, are located throughout the country. Each has a General Counsel to investigate ULP claims. If the General Counsel's office believes that a party has committed an unfair labor practice, it prosecutes the case. The Board itself, which sits in Washington, has five members, all appointed by the president. The Board makes final agency decisions about representation and ULP cases.

Throughout the 1930s and 1940s, unions grew in size and power. As strikes became more common, employers complained loudly of union abuse. Unions coerced unwilling workers to join and engaged in *secondary boycotts,* picketing an innocent company to stop it from doing business with an employer the union was fighting. In 1947, Congress responded with the Taft-Hartley Act, also known as the **Labor-Management Relations Act**, designed to curb union abuses. The statute amended §8 of the NLRA to outlaw certain unfair labor practices *by unions.*

Labor-Management Relations Act
Is designed to curb union abuses.

Section 8(b) makes it an unfair labor practice for a union to:

- Interfere with employees who are exercising their labor rights under §7,
- Encourage an employer to discriminate against a particular employee because of a union dispute,
- Refuse to bargain collectively, or
- Engage in an illegal strike or boycott, particularly secondary boycotts.

Finally, in the 1950s, the public became aware that certain labor leaders were corrupt. Some officers stole money from large union treasuries, rigged union elections, and stifled

opposition within the organization. In response, in 1959 Congress passed the Landrum-Griffin Act, generally called the **Labor-Management Reporting and Disclosure Act (LMRDA).** The LMRDA requires union leadership to make certain financial disclosures and guarantees free speech and fair elections within a union.

These landmark federal labor laws are outlined below:

Four Key Labor Statutes	
Norris-LaGuardia Act (1932)	Prohibits federal court injunctions in peaceful strikes.
National Labor Relations Act (1935)	Guarantees workers' right to organize unions and bargain collectively. Prohibits an employer from interfering with union organizing or discriminating against union members. Requires an employer to bargain collectively.
Labor-Management Relations Act (1947)	Prohibits union abuses such as coercing employees to join. Outlaws secondary boycotts.
Labor-Management Reporting and Disclosure Act (1959)	Requires financial disclosures by union leadership. Guarantees union members free speech and fair elections.

Today, labor abuses are less visible—but as ugly as ever. From New York City to Los Angeles, desperately poor, frightened immigrants cut and sew about half of all the garments this country produces, often working in appalling sweatshops where conditions are little better than in 19th-century factories. Frequently, the employees are undocumented immigrants who speak no English, know nothing of their rights, and fear that any complaints they make will lead to deportation. Owners force the workers to toil 50 to 60 hours a week, with few breaks, in cramped rooms with weak lighting, no ventilation, and inadequate sanitation. Pay is below the minimum wage.

Labor Unions Today

Organized labor is in flux in the United States. In the 1950s, about 1 in 4 workers belonged to a union. Today, only about 1 in 8, or 15 million total U.S. workers, are union members. Employers point to this figure with satisfaction and claim that it shows that unions have failed their memberships. In an increasingly high-tech, service-oriented economy, employers argue, there is no place for organized labor. Union supporters respond that although the country has shed many old factories, workers have not benefited. Throughout the last 20 years, they assert, compensation for executives has soared into the stratosphere while wages for the average worker, in real dollars, have fallen.

Unions continue to attract political attention. In 2011, legislators in Wisconsin voted to strip most collective bargaining rights from schoolteachers and other state government workers. Public employees are five times more likely to be union members than private sector workers, but they are generally not protected by the NLRA. Instead, state labor laws apply, which tend to provide less protection than federal statutes.

Crowds of as many as 100,000 gathered in Madison, Wisconsin, to protest the proposed legislation, but it passed nonetheless. Commentators on the left forecast significant political consequences for the Wisconsin lawmakers, while editorialists on the right predict that many states will soon follow the Wisconsin model.

Although overall membership is down, unions still matter.

ORGANIZING A UNION

Exclusivity

It is difficult to organize a union. When a worker starts to talk about collective action, or when an organizer appears from a national union, many employees are suspicious or fearful; some may be hostile. Management will generally be opposed—sometimes fiercely opposed—to any union organizing effort. The fight can become ugly, and all because of one principle: *exclusivity*.

Under §9 of the NLRA, a validly recognized union is the *exclusive* representative of the employees. This means that the union will represent all of the designated employees, regardless of whether a particular worker *wants* to be represented. The company may not bargain directly with any employee in the group, nor with any other organization representing the designated employees.

Collective bargaining unit
The precisely defined group of employees represented by a particular union.

A **collective bargaining unit** is the precisely defined group of employees who will be represented by a particular union. Suppose a hotel workers' union attempts to organize the Excelsior Hotel. The union will seek to represent some of Excelsior's employees, but not all. The union may represent, for example, all maids, busboys, and bellhops. Those employees are in the collective bargaining unit. Many other people who work for the hotel will *not* be in the collective bargaining unit. Managers who run the hotel, reservation agents who work in other cities, launderers who work in separate facilities for a different employer—all of these people are *outside* the collective bargaining unit and will be unaffected by the union's bargaining.

It is the union's *exclusive* right to bargain for the unit that gives the organization its power. But some employees may be unhappy with the way a union exercises this power. Along with a union's exclusive bargaining power goes a duty of fair representation, which requires that a union treat all members fairly, impartially, and in good faith. A union is not entitled to favor some members over others. No union may discriminate against a member based on characteristics such as race or gender.

In the following case, workers believed the union was failing to represent them on a vital issue. Should they be allowed to bargain on their own behalf? You be the judge.

You be the Judge

EMPORIUM CAPWELL CO. V. WESTERN ADDITIONAL COMMUNITY ORGANIZATION

420 U.S. 50, 95 S. Ct. 977, 1975 U.S. LEXIS 134
United States Supreme Court, 1975

Facts: Emporium Capwell operated a department store in San Francisco. The Department Store Employees Union represented all stock workers. Several black union members complained to the union about racial discrimination in promotions, asserting that highly qualified black workers were routinely passed over in favor of less-qualified whites. The union promised to pursue the issue with management, but the black employees were not satisfied with the union's effort. The unhappy workers demanded to speak with top management of the store and then, without the union's permission, picketed the store and handed out leaflets accusing the company of discrimination. Emporium Capwell fired the picketing employees. The resulting case went all the way to the Supreme Court.

In most labor cases, the union is on one side and management is on the other. In this case, the black employees were on one side, with the union on the other. The union argued that exclusivity prohibited any group of workers from demanding to meet separately with management. It claimed that the disgruntled workers violated the NLRA by insisting on separate

bargaining and that it was proper for the company to fire the workers. In other words, the union placed a higher value on exclusivity than on maintaining the jobs of those employees. The black workers, on the other hand, argued that eliminating discrimination was more important than union exclusivity. They insisted that management had no right to fire them and that they were entitled to get their jobs back and to bargain independently.

You Be the Judge: ***Did the picketing employees violate the NLRA by demanding to bargain directly with management?***

Argument for the Union: Your honors, exclusivity is the core of a union's strength. If management is free to talk with employees individually—or if it can be *compelled* to talk with them—the union has no leverage. An astute manager will quickly use worker conflicts as a tool to divide the union and destroy it. By cutting deals with favored employees, management could demonstrate to all workers that affiliation with the union is a losing tactic and that the smart worker bargains for himself—and then does what management tells him to do.

Racial discrimination is a terrible evil. It must be eradicated from the workplace. This union is committed to fighting prejudice. But the union must do it *collectively*. If an exception to the principle of exclusivity can be carved out for one important issue, such as race discrimination, then an exception can be carved out for other important issues, such as gender bias, age discrimination, language differences, retirement pay, health benefits ... and on and on. To allow this group of picketers to pursue a worthy goal with separate bargaining would be to destroy the union—and ensure that *no* valuable goals are obtained.

Argument for the Picketing Workers: Congress granted employees the right to organize *for their mutual benefit*, not to advance the cause of unions. A labor organization is a means to an end, not an end in itself. When a union fails to support its members on a vital issue, employees must be free to fend for themselves. Race discrimination is not a simple bargaining issue; it is a vital matter of human dignity. This union failed to act promptly and vigorously to protect its African American members and end discrimination. It makes no difference *why* the union failed to protect its members. Weak-kneed, docile union leadership can be just as devastating to the cause of racial equality as bad faith. We are not asking that union members be free to pursue every petty complaint directly with management. To equate racial justice with retirement benefits is to ignore the significance of discrimination. We merely ask that, when a union fails to protect its members concerning a profound issue such as this, the injured employees be allowed to speak for themselves.

Organizing: Stages

A union organizing effort generally involves the following pattern.

Campaign

Union organizers talk with employees—or attempt to talk—and interest them in forming a union. The organizers may be employees of the company, who simply chat with fellow workers about unsatisfactory conditions. Or a union may send nonemployees of the company to hand out union leaflets to workers as they arrive and depart from work.

Authorization Cards

Union organizers ask workers to sign authorization cards, which state that the particular worker requests the specified union to act as her sole bargaining representative.

If a union obtains authorization cards from a sizable percentage of workers, it seeks **recognition** as the exclusive representative for the bargaining unit. The union may ask the employer to recognize it as the bargaining representative, but most of the time, employers refuse to recognize the union voluntarily.

Petition

Assuming that the employer does not voluntarily recognize a union, the union generally petitions the NLRB for an election. It must submit to the NLRB regional office authorization cards signed by at least 30 percent of the workers. The regional office verifies whether

there are enough valid cards to warrant an election and looks closely at the proposed bargaining unit to make sure that it is appropriate. If the regional director determines that the union has identified an appropriate bargaining unit and has enough valid cards, it orders an election.

Election

The NLRB closely supervises the election to ensure fairness. All members of the proposed bargaining unit vote on whether they want the union to represent them. If more than 50 percent of the workers vote for the union, the NLRB designates that union as the exclusive representative of all members of the bargaining unit. When unions hold representation elections in private corporations, they win about half the time.

Labor organizations claim that management typically uses company time to campaign against the union. Employers respond that labor loses elections because workers fear that a union will hurt them, not help.

The "Card-Check" Debate

Before becoming president, then-U.S. Senator Barack Obama co-introduced a bill called the Employee Free Choice Act. This bill provides that when more than 50 percent of workers sign an authorization card, the NLRB must immediately designate that union as the exclusive representative of all members in the bargaining unit *without an election*.

Supporters argue that, if a majority of workers return authorization cards, an election is unnecessary and only gives companies an opportunity to intimidate workers. Those who dislike the bill argue that workers may feel bullied into signing an authorization card and should always have the right to a final vote by secret ballot.

The bill has generated much debate but has not passed Congress at the time of this writing.

Organizing: Actions

These are some of the issues that most commonly arise during an organizing effort: (1) What may a union do during its organizing campaign? (2) What may the employer do to defeat the campaign? (3) What is an appropriate bargaining unit?

What Workers May Do

The NLRA guarantees employees the right to talk among themselves about forming a union, to hand out literature, and ultimately to join a union.[5] Workers may urge other employees to sign authorization cards and may vigorously push their cause. When employees hand out leaflets, the employer generally may not limit the content. In one case, a union distributed leaflets urging workers to vote against political candidates who opposed minimum-wage laws. The employer objected to the union distributing the information on company property, but the Supreme Court upheld the union's right. Even though the content of the writing was not directly related to the union, the connection was close enough that the NLRA protected the union's activity.[6]

There are, of course, limits to what union organizers may do. The statute permits an employer to restrict organizing discussions if they interfere with discipline or production. A worker on a moving assembly line has no right to walk away from his task to talk with other employees about organizing a union; the employer may insist that the worker stay at his job and leave discussions until lunch or some other break.[7]

[5]NLRA §7.
[6]*Eastex, Inc. v. NLRB*, 434 U.S. 1045, 98 S. Ct. 888, 1978 U.S. LEXIS 547 (1978).
[7]*NLRB v. Babcock & Wilcox Co.*, 351 U.S. 105, 76 S. Ct. 679, 1956 U.S. LEXIS 1721 (1956).

What Employers May Do

As mentioned above, an employer may prohibit employees from organizing if the efforts interfere with the company's work. In a retail store, for example, management may prohibit union discussions in the presence of customers because the discussions could harm business.

May the employer speak out against a union organizing drive? Yes. Management is entitled to communicate to the employees why it believes a union will be harmful to the company. But the employer's efforts must be limited to explanation and advocacy. **The employer may vigorously present anti-union views to its employees but may not use either threats or promises of benefits to defeat a union drive.**[8] Notice that the employer is prohibited not only from threatening reprisals, such as firing a worker who favors the union, but also from offering benefits designed to defeat the union. A company that has vigorously rejected employee demands for higher wages may not suddenly grant a 10 percent pay increase in the midst of a union campaign.

It is an unfair labor practice for an employer to interfere with a union organizing effort. Normally, a union claiming such interference will file an unfair labor practice charge. If the Board upholds the union's claim, it will order the employer to stop its interference and permit a fair election. In some cases, though, management's interference is so pervasive and intrusive that the Board may conclude an election would be pointless. **When an employer outrageously interferes with a union organizing campaign, the NLRB may forgo the normal election, certify the union as the exclusive representative, and order the company to bargain.** This *bargaining order* is an extreme measure, and the Board uses it only when an employer has shown extreme anti-union animus.

Here is a case illustrating the tensions and crude language that so often arise during organizing efforts.

Progressive Electric, Inc. v. National Labor Relations Board

453 F.3d 538
District of Columbia Court of Appeals, 2006

Facts: Progressive Electric, Inc. was a non-union electrical contractor. The International Brotherhood of Electrical Workers (IBEW) targeted the company for organizing. Progressive did not go quietly.

Progressive advertised in the local paper that it was accepting applications for electrician/technicians. Without revealing his IBEW membership, David Cousins responded to the ad and was hired. A month later, eight more union members went as a group to Progressive to apply. They carried video and tape recording equipment. Randy Neeman, Progressive's president, realized that they were union members and told them, "You guys, we are not hiring. We are not taking no [sic] applications. We hired a couple of people and filled the spots. So I would love to put you all on and as soon as I get an opening, I will give you guys a call." The union members filled out job applications, and Neeman said he would call when there was an opening. In fact, he immediately threw away the applications.

Don Hildreth, a Progressive foreman, told Cousins and one other employee that Neeman "didn't want any union crap around here." Hildreth continued, "If the unions got into Progressive, Progressive would lose contracts and would go out of business because Progressive couldn't afford the union wages and benefits."

Neeman held a company meeting, where he told the assembled employees: "All right, I've been quiet up 'til now, which is strange for me, I know. But now we're

[8] *NLRB v. Gissel Packing Co.*, 395 U.S. 575, 89 S. Ct. 1918, 1969 U.S. LEXIS 3172 (1969).

gonna talk about this dirty word – *union*." Neeman's presentation was punctuated by phrases such as "Mr. Asshole Union Rep" and "bunch of dummies." At some point in the presentation, Neeman wrote the word "union" on the board, drew a circle around it, and put a slash through it.

Progressive later filled various positions with non-union members, never advertising the jobs nor contacting the IBEW applicants.

The IBEW filed charges with the NLRB, which concluded that Progressive had committed an unfair labor practice by threatening job loss and plant closure if the union organized the company. Progressive appealed.

Issue: ***Did the company commit a ULP?***

Excerpts from Judge Brown's Decision: Under Section 8(a)(3), it is an unfair labor practice for an employer to encourage or discourage membership in any labor organization. An employer violates this provision by refusing to consider or hire job applicants on account of their union affiliation. This protection extends even to applicants that are union "salts," or union members sent in ostensibly to obtain employment but with the objective of inducing union organization.

The Board's finding is reasonable. After Neeman accepted a sheet containing the Union Applicants' information, he lied to them, assuring them he would call them "as soon as [there is] an opening" when in fact he had no such intention. In the ALJ's words, this falsehood had the "effect of luring the applicants into complacency." The Board also pointed to various events over the course of the subsequent year, including multiple Union letters, which Progressive received via fax but refused via certified mail; the decision to use blind advertisements; and the failure to hire the Union Applicants to any of the seven suitable positions that became available. While we doubt any of these actions—including the initial misrepresentation—would be independently sufficient, the Board reasonably found they were collectively "part and parcel of [Progressive's] overall scheme to refuse to consider and hire" the Union Applicants.

The record before us, however, permits a finding that the actions in question were motivated by anti-union animus. The evidence includes [Neeman's] deliberate misrepresentation to the Union Applicants and his admission that he never intended to hire them; his overt hostility at the meeting; and his failure to contact or hire any of the Union Applicants over the time period in question. The contrary evidence—such as Neeman's friendly relationships with union members [and] his hiring of a small number of union members in the past—does not compel a contrary conclusion in this case.

[We will enforce the Board's order.]

EXAM Strategy

Question: We Haul is a trucking company. The Teamsters Union is attempting to organize the drivers. Workers who favor a union have been using the lunchroom to hand out petitions and urge other drivers to sign authorization cards. The company posts a notice in the lunchroom: "No Union Discussions. Many employees do not want unions discussed in the lunchroom. Out of respect for them, we are prohibiting further union efforts in this lunchroom." Comment.

Strategy: The NLRA guarantees employees the right to talk among themselves about forming a union and to hand out literature. Union workers may vigorously push their cause. Management is entitled to communicate to the employees why it believes a union will be harmful to the company, but the employer's efforts must be limited to explanation and advocacy.

Result: We Haul has violated the NLRA. The company has the right to urge employees not to join the union. However, it is not entitled to block the union from its organizing campaign. Even assuming the company is correct that some employees do not want unions discussed, it has no right to prohibit such advocacy.

Appropriate Bargaining Unit

When a union petitions the NLRB for an election, the Board determines whether the proposed bargaining unit is appropriate. **The Board generally certifies a proposed bargaining unit if and only if the employees share a "community of interest."** Employers frequently assert that the bargaining unit is inappropriate. If the Board agrees with the employer and rejects the proposed bargaining unit, it dismisses the union's request for an election. The Board pays particular attention to two kinds of employees: managerial and confidential.

Managerial employees must be excluded from the bargaining unit.[9] An employee is managerial if she is so closely aligned with management that her membership in the bargaining unit would create a conflict of interest between her union membership and her actual work. Courts generally find such a conflict only if *the employee is substantially involved in the employer's labor policy.*

For example, a factory worker who spends one-third of his time performing assembly work but two-thirds of his time supervising a dozen other workers is so closely aligned with management that he could not fairly be part of the bargaining unit. There would be constant tension between his supervisory work and his advocacy on behalf of the union. By contrast, an engineer who analyzes production methods and merely reports her findings to management may not be closely aligned with the employer. Unless the engineer has actual control over personnel decisions, she can probably be included in a bargaining unit of other engineers.[10]

Confidential employees are generally excluded from the bargaining unit.[11] A confidential employee is one who works so closely with executives or other management employees that there would be a conflict of interest if the employee were in the bargaining unit. An executive assistant may be so intimately acquainted with his boss's ideas, plans, and other confidential information that it would be unfair to allow him to join a bargaining unit of other administrative assistants.

Once the Board has excluded managerial and confidential employees, it looks at various criteria to decide whether the remaining employees should logically be grouped in one bargaining unit; that is, whether they share a **community of interest.** The Board looks for:

- Rough equality of pay and benefits and methods of computing both,
- Similar total hours per week and type of work,
- Similar skills and training, and
- Previous bargaining history and the number of authorization cards from any different groups within the unit.

Having applied these criteria to all members of the proposed unit, the Board either certifies the bargaining unit or rejects the unit and dismisses the union's petition. Suppose the employees in a public high school decide to organize. The Board will probably find that an appropriate bargaining unit includes all academic teachers and physical education teachers because they do roughly similar work and are paid similarly. The principal and vice principal will not be included in the unit because their work is supervisory and administrative and they are paid on a separate scale.

Collective Bargaining

Collective bargaining agreement (CBA)
A contract between a union and management.

The ultimate goal of bargaining is to create a new contract, which is called a **collective bargaining agreement (CBA)**. But problems can arise as union and employer advocate their respective positions. Three of the most common conflicts are (1) whether an issue is a mandatory subject of bargaining, (2) whether the parties are bargaining in good faith, and (3) how to enforce the agreement.

Subjects of Bargaining

The NLRA *permits* the parties to bargain almost any subject they wish, but it only *requires* them to bargain certain issues. **Mandatory subjects include wages, hours, and other terms and conditions of employment.**

Management and unions often disagree as to whether a particular topic is mandatory or not. Typically, unions attempt to expand the number of mandatory subjects while the company argues that many subjects are not mandatory and are none of the union's business. In general, a court is likely to find a given issue mandatory when it *directly relates* to individual workers. Courts generally find these subjects to be mandatory: pay, benefits, order of layoffs and recalls, production quotas, work rules (such as safety practices), retirement benefits, and onsite food service and prices. Courts usually consider these subjects to be nonmandatory: product type and design, advertising, sales, financing, corporate organization, and location of plants.

Today, some of the most heated disputes between management and labor arise from a company's desire to subcontract work and/or to move plants to areas with cheaper costs. **Subcontracting** means that a manufacturer, rather than producing all parts of a product and then assembling them, contracts for other companies, frequently overseas, to make some of the parts. Is a business free to subcontract work? That depends on management's motive. **A company that subcontracts in order to maintain its economic viability is probably *not* required to bargain first; however, bargaining *is* mandatory if the subcontracting is designed to replace union workers with cheaper labor.**

Dorsey Trailers manufactured dump trucks. During a period of heavy sales, Dorsey subcontracted some of its production work to Bankhead Enterprises, which agreed to manufacture two trucks per week and split the profits. The union filed a ULP charge, claiming that subcontracting was a mandatory subject of bargaining, and that Dorsey had no right to make the deal before negotiating with the union.

The court noted that Dorsey was losing business because it could not fill orders fast enough. The dump truck industry was cyclical, and in a period of strong demand, the company had to be able to manufacture its goods quickly. Dorsey had been unable to hire enough welders and other skilled workers to keep up with demand. The court stated that Dorsey could not survive without the subcontracting. Further, the company had not reduced union jobs; it had simply failed to add more union workers—through no fault of its own. Dorsey was free to subcontract without bargaining the issue.[12]

Plant closings, which can result in hundreds or thousands of lost jobs, are also a volatile issue. Although the job losses are potentially greater than those that result from subcontracting, management is not obligated to bargain such a decision. **An employer is not required to bargain over the closing of a plant, only the *effects* of the closing.**[13]

---

[12] *Dorsey Trailers, Inc. Northumberland PA Plant v. NLRB*, 134 F.3d 125, 1998 U.S. App. LEXIS 764 (3rd. Cir. 1998).

[13] *First National Maintenance Corp. v. NLRB*, 452 U.S. 666, 101 S. Ct. 2573, 1981 U.S. LEXIS 117 (1981).

The reasoning behind this rule is basic: the company that opened a plant ought to be able to close it. Further, having concluded that the employer has the right to shut down a facility, courts also allow the employer to do so fairly quickly. Management may need speed and flexibility in effecting such major business changes. In contrast, the union will want to slow down or prevent the closing. The two sides will have few things to discuss, and mandated bargaining will gain little for employees while potentially costing the company time and money. When a plant closing will cost jobs, management must bargain such things as the order of layoffs, but it need not bargain the closing itself.

Employer and Union Security

Both the employer and the union will seek clauses making their positions more secure. Management, above all, wants to be sure that there will be no strikes during the course of the agreement. For its part, the union tries to ensure that its members cannot be turned away from work during the CBA's term, and that all newly hired workers will affiliate with the union. We look at several union security issues.

No Strike/No Lockout. Most agreements include some form of no-strike clause, meaning that the union promises not to strike during the term of the contract. In turn, unions insist on a no-lockout clause, meaning that in the event of a labor dispute, management will not prevent union members from working. **No-strike and no-lockout clauses are both legal.**

Closed Shops. A closed shop means the employer must hire only union members. Though obviously very attractive to a union, effectively giving it veto power over new hires, a closed shop is not possible. **A closed shop is illegal.** Indeed, for a union to bargain for a closed shop violates the NLRA.

Union and Agency Shops. In a union shop, membership in the union becomes compulsory *after* the employee has been hired. Thus management retains an unfettered right to hire whom it pleases, but all new employees who fit into the bargaining unit must affiliate with the union. **A union shop is generally legal.** There are two limitations, however. First, new members need not join the union for 30 days. Second, the new members, after joining the union, can only be required to pay initiation fees and union dues. If the new hire decides he does not want to participate in the union, the union may not compel him to do so, and management may not terminate him (pursuant to a CBA) for his refusal. This is a compromise, designed to protect workers from having to play an active role in a union while ensuring that the union receives normal dues from all employees, whether they participate in union affairs or not. If employees could avoid dues, they would be "free riders," benefiting from the union's bargaining without paying for it.

An **agency shop** is similar to a union shop. Here, the new hire must pay union fees but need not actually join the organization. In both a union shop and an agency shop, the worker may insist on paying only the percentage of dues that is devoted to collective bargaining, contract administration, and grievances. An employee may refuse to pay, for example, the percentage of union dues devoted to organizing other companies.[14]

Some states have passed so-called **right to work** laws, which restrict or even outlaw union shop and agency shop agreements. These statutes typically prohibit a labor organization from demanding that all employees join the union or pay dues.

Hot Cargo Clause. A hot cargo clause would prohibit an employer from doing business with a specified company. A union might like such a clause to put pressure on the *other* company, where the union already has a dispute. But the effort must fail: **hot cargo clauses are illegal.**

---

[14] *Communications Workers of America v. Beck*, 487 U.S. 735, 108 S. Ct. 2641, 1988 U.S. LEXIS 3030 (1988).

Duty to Bargain

Both the union and the employer must bargain in good faith. However, they are *not* obligated to reach an agreement. In the end, this means that the two sides must meet with open minds and make a reasonable effort to reach a contract. Each side must listen to the other's proposals and consider possible compromises.

In the following case, the Supreme Court examined the requirements of bargaining in good faith.

Landmark Case

NLRB v. Truitt Manufacturing Co.

351 U.S. 149
United States Supreme Court, 1956

Facts: A union representing workers at Truitt Manufacturing Company requested a raise of 10 cents per hour for all members. The company offered an additional 2.5 cents per hour and argued that a larger increase would bankrupt the company. The union demanded to examine Truitt's books, and when the company refused, the union complained to the National Labor Relations Board.

The NLRB determined that the company had failed to bargain in good faith and ordered it to allow union representatives to examine its finances. A court of appeals found no unfair labor practice and refused to enforce the Board's order. The Supreme Court granted certiorari.

Issue: ***Did the company refuse to bargain in good faith?***

Excerpts from Justice Black's Decision: We think that in determining whether the obligation of good-faith bargaining has been met, the Board has a right to consider an employer's refusal to give information about its financial status. While Congress did not compel agreement between employers and bargaining representatives, it did require collective bargaining in the hope that agreements would result. [T]he Act admonishes both employers and employees to exert every reasonable effort to make and maintain agreements.

In their effort to reach an agreement here, both the union and the company treated the company's ability to pay increased wages as highly relevant. Claims for increased wages have sometimes been abandoned because of an employer's unsatisfactory business condition; employees have even voted to accept wage decreases because of such conditions.

Good-faith bargaining necessarily requires that claims made by either bargainer should be honest claims. This is true about an asserted inability to pay an increase in wages. If such an argument is important enough to present in the give and take of bargaining, it is important enough to require some sort of proof of its accuracy.

The Board concluded that under the facts and circumstances of this case, the respondent was guilty of an unfair labor practice in failing to bargain in good faith. We see no reason to disturb the findings of the Board.

Reversed.

Sometimes an employer will attempt to make changes without bargaining the issues at all. However, **management may not unilaterally change wages, hours, or terms and conditions of employment without bargaining the issues to impasse**. "Bargaining to impasse" means that both parties must continue to meet and bargain in good faith until it is clear that they cannot reach an agreement. The goal in requiring collective bargaining is to bring the parties together to reach an agreement that brings labor peace. In one case, the union won an election, but before bargaining could begin, management changed the schedule from five 8-hour days to four 10-hour days a week. The company also changed its layoff policy from one of strict seniority to one based on ability and began laying off employees based on alleged poor

performance. The court held that each of these acts violated the company's duty to bargain. The employer ultimately might be allowed to make every one of these changes, but first it had to bargain the issues to impasse.[15]

For the same reasons, though the employer may implement new policies after impasse, it may *implement only what it has proposed at the table*. Again, it would defeat the purpose of the NLRA if a company were free to implement a business decision that it had never proposed; the two sides *could not* have discussed plans that were never offered at the table.

EXAM Strategy

Question: The Clerical Workers Union (CWU) represents office workers at General Contracting. International Plumbers Union (IPU) represents plumbers at the same company. Both unions are bargaining new contracts. General Contracting offers the CWU a 2 percent raise, but the union asks for 7 percent. The two sides bargain for five months, but the company never raises its offer. At the same time, General refuses the IPU's demand for an 11 percent raise, stating such a raise would bankrupt the company. General offers the IPU a 3 percent raise. Both unions file ULP charges. What are the outcomes of these cases?

Strategy: What are the two sides obligated to do during bargaining? What are they *not* obligated to do? A company that states it is financially unable to meet a union demand incurs an additional obligation. Make sure you know what that is.

Result: Both sides are obligated to bargain in good faith. However, they are not required to reach agreement. So long as General listened to the CWU demands and responded in good faith, it has done all the NLRA requires. When a company claims financial inability to meet a demand, it must show the union its financial records. If General failed to provide the IPU with such data, it has committed a ULP.

Enforcement

Virtually all collective bargaining agreements provide for their own enforcement, typically through **grievance-arbitration**. Suppose a company transfers an employee from the day shift to the night shift, and the worker believes the contract prohibits such a transfer for any employee with her seniority. The employee complains to the union, which files a grievance, that is, a formal complaint with the company notifying management that the union claims a contract violation. Generally, the CBA establishes some kind of informal hearing, usually conducted by a member of management, at which the employee, represented by the union, may state her case and respond to the company's assertions. The manager has a limited time period—say, seven days—to decide the grievance.

Grievance
A formal complaint alleging a contract violation.

Arbitration
A formal hearing before a neutral party to resolve a contract dispute between a union and a company.

If, after the manager's decision, the employee is still dissatisfied, the union normally has the right to appeal to a more formal hearing, perhaps before a top company executive or committee. If this hearing still fails to satisfy the employee, the union typically may file for arbitration, that is, a formal hearing before a neutral arbitrator. In the arbitration hearing, each side is represented by its lawyer. The arbitrator is required to decide the case based on the CBA. An arbitrator finds either for the employee, and orders the company to take certain corrective action, or for the employer, and dismisses the grievance. A CBA also permits the company to file a grievance. Its complaint normally goes directly to arbitration. In the vast majority of grievances, the arbitrator's decision is final. Courts generally do not examine the

[15] *Adair Standish Corp. v. NLRB*, 912 F.2d 854, 1990 U.S. App. LEXIS 14670 (6th Cir. 1990).

merits of an arbitrator's decision. The idea of all contracts, including CBAs, is to give the parties a chance to control their own destiny. Of course, a rule would hardly be a rule without an exception. A court may refuse to enforce an arbitrator's award that is contrary to public policy. So if an arbitrator's decision encourages either party to violate the law or engage in clearly immoral conduct, a court may nullify the award. The following case demonstrates how reluctant courts are to interfere with an arbitrator's decision.

Brentwood Medical Associates v. United Mine Workers of America

396 F.3d 237
United States Court of Appeals for the Third Circuit, 2005

Facts: Brentwood Medical Associates operated a hospital. The United Mine Workers of America represented one unit of employees, which included Denise Cope, a phlebotomist (someone who draws blood). Exercising her seniority rights, Cope changed jobs to Charge Entry Associate. A year and a half later, BMA announced it was terminating the position. Cope asked to return to her old job. This would have required "bumping" the least-senior phlebotomist out of a job. BMA refused, claiming that bumping was not allowed under the collective bargaining agreement (CBA). Cope filed a grievance, which an arbitrator heard.

The arbitrator ruled in Cope's favor. In his decision, he asked rhetorically why, if the CBA disallowed bumping, did it include the following language:

> … employees who exercise seniority rights and bump must have the skill to perform all of the work [in the new job].

The problem with the quoted language was that it did not in fact exist anywhere in the CBA. BMA filed suit, asking a federal court to overturn the arbitration decision. The trial court upheld the award and BMA appealed.

Issue: ***Should the arbitration award be affirmed even though the arbitrator relied on language that cannot be found in the CBA?***

Excerpts from Judge Van Antwerpen's Decision: The narrow issue before us is whether the arbitrator's conclusion is supported, in any way, by a rational interpretation of the collective bargaining agreement. We ask merely whether the parties to the collective bargaining agreement got what they bargained for, namely an arbitrator who would first provide an interpretation of the contract that was rationally based on the language of the agreement, and second would produce a rational award. BMA contends that the arbitrator's reference to the language not found in the collective bargaining agreement fatally taints the award, because this reference is essential to the arbitrator's ultimate conclusion and is inseparable from the remainder of the award. As such, our focus must be on whether the arbitrator's discussion can still support the award if we excise the anomalous language.

In additional support for his conclusion, the arbitrator cited several provisions of the agreement. For example, Section 1 defines seniority as "bargaining unit–wide" and not within classification. Section 2 provides that the principle of seniority is a factor in layoffs, recalls, and certain types of promotional opportunities provided the employee is fully qualified. Section 5 specifies that in filling vacancies when the qualifications of two or more applicants are relatively equal, preference will be based on seniority.

After reviewing the totality of the arbitrator's decision, we are confident that his award does not rest solely upon the aberrant language added by the arbitrator. Faced with what he perceived as an incongruity between BMA's position and the bargaining unit–wide seniority rights of employees, the arbitrator attempted to construe together, and then give effect to, all provisions of the agreement. While BMA may take issue with his contractual interpretation, this is not sufficient to justify [overturning] the award.

Full-blown judicial review of the arbitrator's decision would annul the bargain between BMA and UMWA for an arbitrator's construction of their agreement and replace it with a judicial interpretation that was not bargained for. Only where there is manifest disregard for the agreement can we override an arbitrator. Because the remainder of the justification for the award offered by the arbitrator was capable of separation from the aberrant language, his decision reflects an interpretation of the contract that is at least minimally rooted in the collective bargaining agreement, and not his own brand of industrial justice.

For the foregoing reasons, we affirm the decision of the District Court.

Devil's Advocate It is one thing to respect an arbitrator's award and presume it final; it is quite another to rubber-stamp a decision. This arbitrator based his opinion in large part on alleged "CBA language" that in fact came out of thin air. The court blithely suggests that the imaginary language was not of overriding importance—but the *arbitrator* thought so! This is the rare, even bizarre case in which a court should say, "Not good enough. We are taking over."

Concerted Action

Concerted action refers to any tactics union members take in unison to gain some bargaining advantage. It is this power that gives a union strength. **The NLRA guarantees the right of employees to engage in concerted action for mutual aid or protection.**[16] The most common forms of concerted action are strikes and picketing.

Concerted action
Tactics taken by union members to gain bargaining advantage.

Strikes

The NLRA guarantees employees the right to strike, but with some limitations.[17] A union has a guaranteed right to call a strike if the parties are unable to reach a collective bargaining agreement. A union may call a strike to exert economic pressure on management, to protest an unfair labor practice, or to preserve work that the employer is considering sending elsewhere. Note that the right to strike can be waived. Management will generally insist that the CBA include a **no-strike clause**, which prohibits the union from striking while the CBA is in force. A strike is illegal in several other situations as well; here, we mention the most important.

No-strike clause
A clause in a CBA that prohibits the union from striking while the CBA is in force.

Cooling Off Period

Once the union agrees to a CBA, it may not strike to terminate the agreement, or modify it, without giving management 60 days' notice. Suppose a union contract expires July 1. The two sides attempt to bargain a new contract, but progress is slow. The union may strike as an economic weapon, but it must notify management of its intention to do so *and then must wait 60 days*. This cooling off period is designed to give both sides a chance to reassess negotiations and to decide whether some additional compromise would be wiser than enduring a strike.

Statutory Prohibition

Many states have outlawed strikes by public employees. In some states, the prohibition applies to selected employees, such as firefighters or teachers. In other states, all public employees are barred from striking, whether or not they have a contract. The purpose of these statutes is to ensure that unions do not use the public health or welfare as a weapon to secure an unfair bargaining advantage. However, even employees subject to such a rule may find other tactics to press their cause.

---

[16]NLRA §7.
[17]NLRA §13.

Ethics Jen has worked hard throughout high school, achieving a 3.8 GPA, and now she is ready to apply to some of the best colleges in the country. Her teachers think she is an extraordinary student—yet no one will write her a letter of recommendation.

The teacher's union has been bargaining for a new contract for a year and a half. The teachers seek a 4 percent raise; the school board has offered 1 percent. There will be no strike—state law prohibits that—but the teachers have decided they will "work to rule," meaning that they will do only what their (expired) contract requires: teach classes, issue grades, and so forth.

"This stinks," wails Jen. "I've never asked for extra assistance. I've tried to be helpful in class, and a lot of times, I've tutored other kids. This is the one time in my life I really need my teachers to be there for me, and they're turning their backs."

"My heart goes out to Jen," responds her American history teacher, "but our problem is simple: as long as we quietly ask for decent pay, no one listens. Students and parents notice us only when they suffer inconvenience."

"This is an outrage!" shouts Jen's father. "These so-called teachers have no right to hurt my child over their pay disputes. If they were serious about their profession, they would do everything they could to help the children who are entrusted to them."

"If the parents were serious about education," the history teacher retorts, "or truly concerned about their children's welfare, they would demand that the town pay respectable salaries. They prefer lower taxes so they can spend more on fancy cars."

Who is right? Is the teachers' refusal to perform any "extras" a reasonable tactic?

Violent Strikes

The NLRA prohibits violent strikes. Violence does sometimes occur on the picket line when union members attempt to prevent other workers from entering the job site. Or a union may stage a **sit-down strike**, in which members stop working but remain at their job posts, physically blocking replacement workers from taking their places. Any such action is illegal.

Partial Strikes

A partial strike occurs when employees stop working temporarily, then resume, then stop again, and so forth. This tactic is particularly disruptive because management cannot bring in replacement workers. A union may either walk off the job or stay on it, but it may not alternate.

Replacement Workers

When employees go on strike, management generally wants to replace them to keep the company operating. When replacement workers begin to cross a union picket line, tempers are certain to explode, and entire communities may feel the repercussions. Are replacement workers legal? Yes. **Management has the right to hire replacement workers during a strike.** May the employer offer the replacement workers *permanent* jobs, or must the company give union members their jobs back when the strike is over? It depends on the type of strike.

After an *economic strike,* an employer may not discriminate against a striker, but the employer is *not* obligated to lay off a replacement worker to give a striker his job back. An economic strike is one intended to gain wages or benefits. When a union bargains for a pay raise but fails to get it and walks off the job, that is an economic strike. During such a strike, an employer may hire permanent replacement workers. When the strike is over, the company has no obligation to lay off the replacement workers to make room for the strikers. However, if the company does hire more workers, it may not discriminate against the strikers.

After a *unfair labor practices strike,* a union member is entitled to her job back, even if that means the employer must lay off a replacement worker. Suppose management refuses to bargain

in good faith, by claiming poverty without producing records to substantiate its claim. The union strikes. Management's refusal to bargain was an unfair labor practice, and the strike is a ULP strike. When it ends, the striking workers must get their jobs back. The following case raises the pivotal distinction concerning a strike: was this one sparked by a ULP—or by money?

Citizens Publishing and Printing Company v. National Labor Relations Board

263 F.3d 224
United States Court of Appeals for the Third Circuit, 2001

Facts: Citizens Publishing was a family-owned corporation that published the *Ellwood City Ledger* and another local newspaper. Bud Dimeo had been the company's sole photographer for over 35 years. When the needs for daytime photography declined, Citizens began requiring Dimeo to work at night and on weekends as well. Citizens also occasionally employed stringers, meaning freelance photographers who were paid per photo.

Teamsters Local No. 261 was certified as the representative for certain Citizens' employees, including photographers but excluding stringers. While the company and union were negotiating a contract, Dimeo retired, and Citizens assigned most of the night/weekend photography to stringers. The union filed a ULP charge with the NLRB, claiming that Citizens had unilaterally changed the terms and conditions of employment without bargaining, by giving to stringers work previously done by Dimeo, a bargaining unit member.

On July 23, fully 18 months after contract negotiations had started, the union met with employees and informed them that the NLRB intended to issue a complaint based on Citizens' use of stringers. The members voted to strike, and they walked out on July 24. The paper continued to publish, using family members, supervisors, and non-striking employees. The following February, six months into the strike, Citizens reassured the union that that none of the replacement workers were considered permanent; the strikers could return if they wished.

The parties met to bargain on March 14. The union representative indicated the union was prepared to return to work. Company representatives took a break to caucus; when they returned, they informed the union that all replacements were permanent. In other words, the strikers had lost their jobs. The next day, Citizens informed the replacement workers that they were permanent. The NLRB found that the union's job action was a ULP strike and ordered Citizens to offer the union members their jobs back. Citizens appealed.

Issue: ***Was the job action a ULP strike?***

Excerpts from Judge Fuentes's Decision: An employer violates § 8(a)(5) if, without bargaining to impasse, it effects a unilateral change of an existing term or condition of employment. By unilaterally changing the employees' terms and conditions of employment, an employer minimizes the influence of organized bargaining and emphasizes to the employees that there is no necessity for a collective bargaining agent.

Here, substantial evidence supports the Board's finding that Citizens Publishing's night/weekend work became an integral part of the regular full-time photographer's work, and thus, became bargaining unit work. When Citizens Publishing assigned the night/weekend work to Dimeo, that work became a necessary and integral part of the full-time photographer's position. Additionally, Dimeo did not receive any additional remuneration for his night/weekend work. Thus, at the time of the Union's certification, the status quo included a full-time photographer's position with night/weekend work. Accordingly, substantial evidence supports the determination that Citizens Publishing violated the Act when it unilaterally subcontracted the bargaining unit work during the negotiations over the initial collective-bargaining agreement.

We next address whether the strike was an "unfair labor practice strike," as opposed to a mere economic strike. Unfair labor practice strikers are entitled to immediate reinstatement upon their unconditional offers to return to work; any replacements hired during the strike must be dismissed, if necessary, to effect reinstatement of the strikers.

Here, substantial evidence supports the Board's finding that the strike was an unfair labor practice strike. The Union convened a meeting of bargaining unit members on the day before the strike began. After learning of Citizens Publishing's action, numerous employees indicated their desire to go on strike, and the membership held a strike vote. These facts support the Board's finding that its decision to issue a complaint galvanized the bargaining unit members' belief that an unfair labor practice

had been committed and served as the flashpoint for discussion about calling a strike.

Moreover, even if Citizens Publishing's subcontracting of night/weekend work did not constitute an unfair labor practice, its discharge of the striking employees on March 14 converted the strike into an unfair labor practice strike because it prolonged the strike. Citizens Publishing's false declaration that it had permanently replaced the strikers prolonged the strike by thwarting the Union's attempt to make an unconditional offer to return to work that day. Indeed, the Union informed Citizens Publishing at the March 14 bargaining session of its intent to make an unconditional offer to return to work. Before the Union could make its offer, however, Citizens Publishing preemptively notified the Union that it had permanently replaced the strikers, thereby effectively informing the Union that any unconditional offer to return to work would be futile.

We will enforce the Board's order in its entirety.

Picketing the employer's workplace in support of a strike is generally lawful.

The workers have bargained with management for weeks, and discussions have turned belligerent.... as 150 employees arrive for work, they are amazed to find the company's gate locked and armed guards standing on the other side.

Picketing

Picketing the employer's workplace in support of a strike is generally lawful. Striking workers are permitted to establish picket lines at the employer's job site and to urge all others—employees, replacement workers, and customers—not to cross the line. But the picketers are not permitted to use physical force to *prevent* anyone from crossing the line. The NLRA does not authorize or protect violence on the picket line. The company may terminate violent picketers and permanently replace them, regardless of the nature of the strike.

Secondary boycotts are generally illegal. A secondary boycott is a picket line established not at the employer's premises, but at the workplace of a *different* company that does business with the union's employer. Such a boycott is designed to put pressure on the union's employer by forcing other companies to stop doing business with it. Suppose Union is on strike against Truck Co. Union is free to picket Truck Co.'s office or terminal. If Truck Co. hires replacement workers, the trucks will be back on the road, making deliveries. Now Union wants to put additional pressure on Truck Co., so it sets up picket lines at a *supermarket* where Truck Co. delivers. Union attempts to persuade customers not to shop at the store and other workers, including delivery drivers, not to enter the premises. If allowed, the picketing might result in the supermarket demanding that Truck Co. compromise with Union. But this is a secondary boycott, so it is illegal. Truck Co. and the supermarket will obtain an injunction prohibiting the secondary boycott. See Exhibit 30.1.

Lockouts

The workers have bargained with management for weeks, and discussions have turned belligerent. It is 6:00 a.m., the start of another day at the factory. But as 150 employees arrive for work, they are amazed to find the company's gate locked and armed guards standing on the other side. What is this? A lockout.

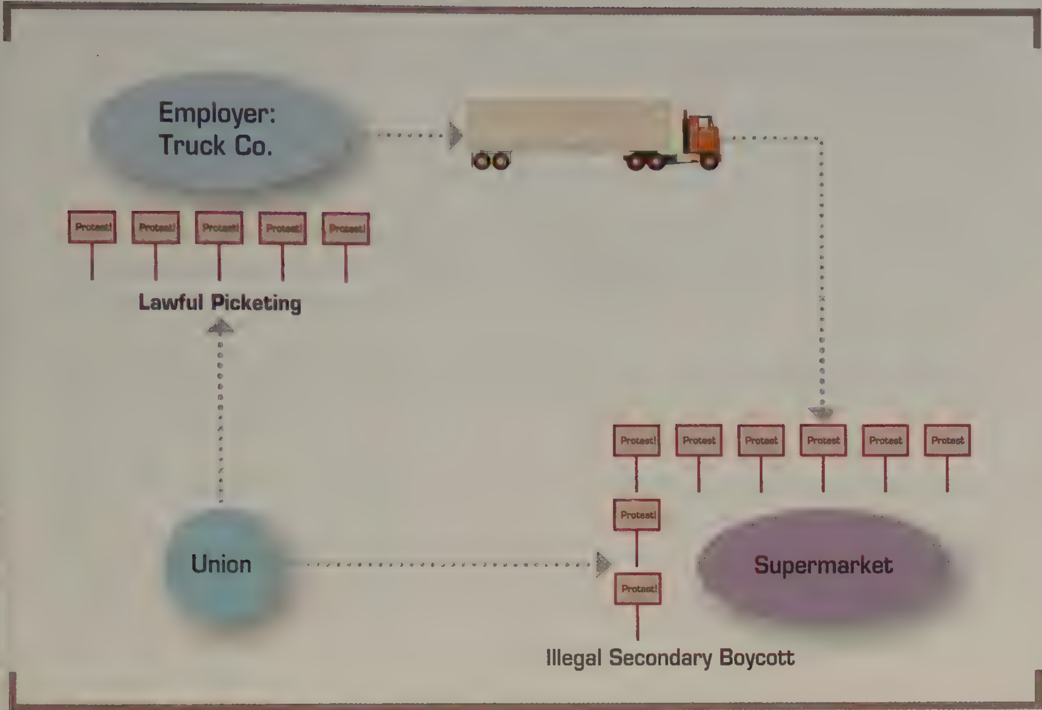

EXHIBIT 30.1 A union striking against Truck Co. may lawfully picket the employer, using peaceful means to urge all others to stay away. But if the union attempts to put indirect pressure on Truck Co. by picketing one of the company's customers, it is engaging in an illegal secondary boycott.

The power of a union comes ultimately from its potential to strike. But management, too, has weapons. In a lockout, management prohibits workers from entering the premises, denying the employees work and a chance to earn a paycheck. Most, but not all, lockouts are legal.

A defensive lockout is almost always legal. It is one way management can respond to union pressure such as a sit-down strike or a **whipsaw strike,** which may occur when a union is simultaneously bargaining with various employers. Suppose a machinists' union is simultaneously bargaining a contract with three engine manufacturers, attempting to obtain an identical contract from all of the companies. To pressure the companies, the union might choose to strike against only *one* of the manufacturers. This is a whipsaw strike, and it can be very effective because the struck company, losing money while the others profit, will push strongly for a compromise. But management of all three companies may respond by locking out the workers from *all* factories, even those where no strike is under way. That is a defensive lockout, and it is legal.

An offensive lockout is legal if the parties have reached a bargaining impasse. Management, bargaining a new CBA with a union, may wish to use a lockout to advance its position. It is allowed to do so *provided the parties have reached an impasse.* If there is no impasse, a lockout will *probably* be illegal. Most courts consider that a lockout before impasse indicates hostility to the union. That kind of general antagonism to a union is illegal because the NLRA guarantees employees the right to organize. In addition, management usually *must notify the union before locking it out.* Again, the purpose of the NLRA is to bring the parties together through bargaining. A lockout is a legitimate method to pressure a union into compromise, but it can have that effect only if the union is warned and given a chance to bargain.

EXAM Strategy

Question: Union workers are striking at Cheesey, a restaurant, forming picket lines in front of the restaurant during the lunch and dinner hours but at no other times. The union members chant slogans denouncing their wages and working conditions, urging diners not to enter. There is no violence, but the picketers cause many prospective customers to stay away, and Cheesey suffers a substantial drop in business. The restaurant files a charge with the NLRB, claiming that the union has committed a ULP by (1) deliberately harming its business and (2) engaging in a secondary boycott. Who will win?

Strategy: Striking workers are allowed to picket. May they *urge* non-union members to stay out of the business? May they *prohibit* others from entering? Secondary boycotts are illegal. Is this one?

Result: Striking workers may urge the public not to cross the picket line. The union may not use violence to keep people out, but this union has not done so. This is not a secondary boycott, which is a picket line established at a *different* company that does business with the employer. The company's loss of business is one possible—and legal—consequence of a strike. The union has not committed a ULP.

Chapter Conclusion

Workers first attempted to organize unions in this country about 200 years ago in response to appalling working conditions. These conditions are generally much better today, and contemporary clashes between union and management are less likely to stem from sweltering temperatures in a mine than from a management decision to subcontract work. But although the flash points have changed, labor law is still dominated by issues of organizing, collective bargaining, and concerted action.

Exam Review

1. **RIGHT TO ORGANIZE** Section 7 of the National Labor Relations Act (NLRA) guarantees employees the right to organize and join unions, bargain collectively, and engage in other concerted activities. (pp. 735–736)

2. **INTERFERENCE WITH ORGANIZING** Section 8(a) of the NLRA makes it an unfair labor practice for an employer to interfere with union organizing, discriminate against a union member, or refuse to bargain collectively. (p. 736)

3. **DISCRIMINATION** Section 8(b) of the NLRA makes it an unfair labor practice for a union to interfere with employees who are exercising their rights under §7, to encourage an employer to discriminate against an employee because of a labor dispute, to refuse to bargain collectively, or to engage in an illegal strike or boycott. (p. 738)

4. **EXCLUSIVITY** Section 9 of the NLRA makes a validly recognized union the *exclusive* representative of the employees. Along with exclusivity comes a duty of fair representation, which requires that a union treat all members fairly, impartially, and in good faith. (pp. 738–739)

EXAM Strategy

Question: Douglas Kuroda worked for the Hertz Corp. He and his supervisor had a heated argument in which Kuroda told his boss, "You may have a master's degree, but you don't know s***." The supervisor instructed Kuroda to punch out for the day, but Kuroda refused to leave until security officers escorted him off the premises. Hertz fired him, and Kuroda filed a grievance. The union represented Kuroda at an arbitration hearing. During the hearing, the union made no objection to certain evidence that the company offered to demonstrate why it fired Kuroda. The arbitrator ruled in favor of the company. Kuroda sued his union. What kind of claim is he making against the union? Is he likely to win his claim?

Strategy: The duty of fair representation requires that a union represent all members fairly, impartially, and in good faith. (See the "Result" at the end of this section.)

5. **EMPLOYER OPPOSITION** During a union organizing campaign, an employer may vigorously present anti-union views to its employees, but it may not use threats or promises of benefits to defeat the union effort. (pp. 741–742)

EXAM Strategy

Question: Power, Inc., which operated a coal mine, suffered financial losses and had to lay off employees. The United Mine Workers of America (UMWA) began an organizing drive. Power's general manager warned miners that if the company was unionized, it would be shut down. An office manager told one of the miners that the company would get rid of union supporters. Shortly before the election was to take place, Power laid off 13 employees, all of whom had signed union cards. A low-seniority employee who had not signed a union card was not laid off. The union claimed that Power had committed ULPs. Comment.

Strategy: Section 7 of the NLRA guarantees employees the right to organize. An employer may vigorously advocate against a union organizing campaign. However, Section 8 (a) makes it a ULP to interfere with union organizing or discriminate against a union member. (See the "Result" at the end of this section.)

6. **CERTIFICATION** The NLRB will certify a proposed bargaining unit only if the employees share a community of interest. (p. 743)

7. **BARGAINING** The employer and the union *must* bargain over wages, hours, and other terms and conditions of employment. They *may* bargain other subjects, but neither side may insist on doing so. (pp. 744–749)

8. **GOOD FAITH** The union and the employer must bargain in good faith, but they are not obligated to reach an agreement. Management may not unilaterally change wages, hours, or terms and conditions of employment without bargaining to impasse. (p. 746)

EXAM Strategy

Question: Concrete Company was bargaining a CBA with the drivers' union. Negotiations went on for many months. Concrete made its final offer of $9.50 per hour, with step increases of $0.75 per hour in a year, and the same the following two years. The union refused to accept the offer and the two sides reached an impasse. Concrete then implemented its plan, minus the step increases. Was its implementation legal?

Strategy: Management may unilaterally change wages and so forth only if the parties have reached an impasse. At all stages, the two sides must bargain in good faith. The goal of the NLRA is to achieve labor peace through productive negotiations. (See the "Result" at the end of this section.)

9. **STRIKES** The NLRA guarantees employees the right to strike, with some limitations. (pp. 749–753)

10. **ECONOMIC STRIKES** After an *economic* strike, an employer is not obligated to lay off replacement workers to give a striker her job back, but it may not discriminate against a striker. After a *ULP* strike, the striking worker must get her job back. (p. 750)

11. **PICKETING** Picketing the employer's workplace in support of a strike is generally lawful; a secondary boycott is generally illegal. (p. 752)

12. **LOCKOUTS** An employer may lock out workers, but only after giving them notice. (pp. 752–754)

13. **MULTI-EMPLOYER BARGAINING** Multi-employer bargaining and implementation do not violate antitrust laws. (p. 753)

4. Result: Kuroda is claiming that the union violated its duty of fair representation. A union violates this duty if its actions are arbitrary or discriminatory. However, courts give unions wide latitude in deciding how to represent members. The union lawyer made a reasonable tactical determination about the evidence. Even if other lawyers might have been more aggressive, this is not evidence of discrimination or bad faith. Kuroda lost.

5. Result: Each of the acts described was a ULP. Threatening layoffs or company closure are classic examples of ULPs. Laying off those who had signed union cards but not those who refused was clear discrimination. The NLRB found the violations so extreme it certified the union and issued an order to bargain.

8. Result: The implementation was illegal. Because the parties had reached an impasse, the company was entitled to implement the last proposal it had made at the bargaining table. But it did not do so. By implementing a reduced plan that it had never proposed, management showed bad faith. To allow the company to implement something that it had never offered would defeat the whole purpose of bargaining.

Multiple-Choice Questions

1. Which of the following statutes prohibits federal court injunctions in nonviolent labor disputes?

(a) The Norris-LaGuardia Act

(b) The National Labor Relations Act

(c) The Labor-Management Relations Act

(d) The Labor-Management Reporting and Disclosure Act

2. Which of the following statutes defines unfair labor practices and ensures workers' right to form a union?

(a) The Norris-LaGuardia Act

(b) The National Labor Relations Act

(c) The Labor-Management Relations Act

(d) The Labor-Management Reporting and Disclosure Act

3. Which of the following type(s) of worker will usually be excluded from a bargaining unit?

(a) Managerial employees

(b) Confidential employees

(c) Both A and B

(d) None of the above

4. When an employer is forced to hire only union members, a ____________ shop exists. This kind of arrangement ____________ legal under the NLRA.

(a) closed; is

(b) closed; is not

(c) union; is

(d) union; is not

5. Alpha Company's workers walk out on strike. The company hires replacement workers so that it can continue to operate its business. When the strike ends, Alpha must rehire the original workers if the strike was over ____________.

(a) wages

(b) an unfair labor practice

(c) Both A and B

(d) None of the above

Essay Questions

1. Triec, Inc., is a small electrical contracting company in Springfield, Ohio, owned by its executives, Yeazell, Jones, and Heaton. Employees contacted the International Brotherhood of Electrical Workers, which began an organizing drive. Six of the

11 employees in the bargaining unit signed authorization cards. The company declined to recognize the union, which petitioned the NLRB to schedule an election. The company then granted several new benefits for all workers, including higher wages, paid vacations, and other measures. When the election was held, only 2 of the 11 bargaining unit members voted for the union. Did the company violate the NLRA?

2. Q-1 Motor Express was an interstate trucking company. When a union attempted to organize Q-1's drivers, it met heavy resistance. A supervisor told one driver that if he knew what was good for him, he would stay away from the union organizer. The company president told another employee that he had the right to fire everybody, close the company, and then rehire new drivers after 72 hours. He made numerous other threats to workers and their families. Based on the extreme nature of the company's opposition, what exceptional remedy did the union seek before the NLRB?

3. Gibson Greetings, Inc., had a plant in Berea, Kentucky, where the workers belonged to the International Brotherhood of Firemen & Oilers. The old CBA expired, and the parties negotiated a new one but were unable to reach an agreement on economic issues. The union struck. At the next bargaining session, the company claimed that the strike violated the *old* CBA, which had a no-strike clause and which stated that the terms of the old CBA would continue in force as long as the parties were bargaining a *new* CBA. The company refused to bargain until the union at least agreed that by bargaining, the company was not giving up its claim of an illegal strike. The two sides returned to bargaining, but meanwhile the company hired replacement workers. Eventually, the striking workers offered to return to work, but Gibson refused to rehire many of them. In court, the union claimed that the company had committed a ULP by (1) insisting the strike was illegal and (2) refusing to bargain until the union acknowledged the company's position. Why is it very important to the union to establish the company's act as a ULP? *Was* it a ULP?

4. Eads Transfer, Inc., was a moving and storage company with a small workforce represented by the General Teamsters, Chauffeurs, and Helpers Union. When the CBA expired, the parties failed to reach agreement on a new one, and the union struck. As negotiations continued, Eads hired temporary replacement workers. After 10 months of the strike, some union workers offered to return to work, but Eads made no response to the offer. Two months later, more workers offered to return to work, but Eads would not accept any of the offers. Eventually, Eads notified all workers that they would not be allowed back to work until a new CBA had been signed. The union filed ULP claims against the company. Please rule.

5. Olivetti Office U.S.A., Inc., was located in Newington, Connecticut, and its workers were represented by the United Automobile, Aerospace, and Agriculture Implement Workers of America. The company's president reported to the union that Olivetti was losing money. He insisted that unless the union renegotiated certain wage increases in the current CBA, Olivetti would subcontract work to cheaper parts of the country to save money. The union requested to bargain over the proposed subcontracting, and Olivetti agreed. But when the sides met, the company would not permit the union to see the financial data that supported its arguments. After several meetings, the company declared an impasse, implemented its subcontracting proposal, and laid off workers in Connecticut. The union claimed this was a ULP. Was it?

Discussion Questions

1. Once a union is recognized, it acts as the exclusive representative for all workers in a bargaining unit, even if some of them do not want the union to represent them. Is this reasonable? Should individual employees be able to "opt out," or would it be unfair for workers to get all the benefit of the union without having to pay dues?

2. Union workers earn an average of $200 per week more than non-union workers. Many people believe that unions are an essential part of creating a broad middle class, while others argue that they create undeserved windfalls for members. Do you have a favorable or unfavorable view of unions?

3. Union membership has fallen steadily in recent decades, in part because many unionized manufacturing jobs have been shipped overseas. Do you believe that unions will make a comeback in new industries? Would you prefer to be a member of a union if you had a choice? Why or why not?

4. Weigh in on the "card check" controversy. Imagine a company with 100 workers. After union organizers talk to the employees, 55 of them sign an authorization card. Should that be enough to establish the union, or should the employees also have to vote in a secret ballot before the union is designated as the employees' representative?

5. Strikes and lockouts frequently make the news, especially when a professional sports league is involved. Pro athletes tend to be highly compensated. Does that fact change your opinions about labor disputes? In the recent NFL lockout, did you side with the players or the owners?

Business Organizations

CHAPTER 31

Starting a Business: LLCs and Other Options

© Evan Meyer/Shutterstock.com

Poor Jeffrey Horning. If only he had understood business law. Horning owned a thriving construction company which operated as a corporation—Horning Construction Company, Inc. To lighten his crushing workload, he decided to bring in two partners to handle more day-to-day responsibility. It seemed a good idea at the time.

Horning transferred the business to Horning Construction, LLC and then gave one-third ownership each to two trusted employees, Klimowski and Holdsworth. But Horning did not pay enough attention to the legal formalities—the new LLC had no operating agreement.

Jeffrey Horning was stuck in purgatory, with two business partners he loathed and no way out.

Nothing worked out as he had planned. The two men did not take on extra work. Horning's relationship with them went from bad to worse, with the parties bickering over every petty detail and each man trying to sabotage the others. It got to the point that Klimowski sent Horning a letter full of foul language. At his wit's end, Horning proposed that the LLC buy out his share of the business. Klimowski and Holdsworth refused. Really frustrated, Horning asked a court to dissolve the business on the grounds that Klimowski despised him, Holdsworth resented him, and neither of them trusted him. In his view, it was their goal "to make my remaining time with Horning, LLC so unbearable that I will relent and give them for a pittance the remainder of the company for which they have paid nothing to date."

Although the court was sympathetic, it refused to help. Because Horning, LLC did not have an operating agreement that provided for a buyout, it had to depend upon the LLC statute, which only permitted dissolution "whenever it is not reasonably practicable to carry on the business." Unfortunately, Horning, LLC was very successful, grossing over $25 million annually. Jeffrey Horning was stuck in purgatory, with two business partners he loathed and no way out.[1]

Every business, no matter how large, was at one point little more than a gleam in an entrepreneur's eye. The goal of the law is to balance the rights, duties, and liabilities of entrepreneurs, managers, investors, and customers. Time and again in these next chapters, we will see that legal issues can have as profound an impact on the success of a company as any business decision. The law affects virtually every aspect of business. Wise (and successful) entrepreneurs know how to use the law to their advantage. Think of the grief Jeffrey Horning could have saved himself if he had understood the implications of the LLC statute.

To begin, entrepreneurs must select a form of organization. The correct choice can reduce taxes, liability, and conflict while facilitating outside investment. If entrepreneurs do not make a choice for themselves, the law will automatically select a (potentially undesirable) default option.

Sole Proprietorships

Sole proprietorship
An unincorporated business owned by one person.

Sole proprietorships are the most common form of business, so we begin there. A **sole proprietorship** is an unincorporated business owned by one person. For example, Linda runs ExSciTe (which stands for Excellence in Science Teaching), a company that helps teachers prepare hands-on science experiments in the classroom using such basic items as vinegar, lemon juice, and red cabbage.

If an individual runs a business without taking any formal steps to create an organization, she automatically has a sole proprietorship. It is, if you will, the default option. She is not required to hire a lawyer or register with the government. The company is not even required to file a separate tax return—because the business is a *flow-through* tax entity. In other words, Linda must pay *personal* income tax on the profits, but the *business* itself does not pay income taxes. A very few states, and some cities and towns, require sole proprietors to obtain a business license. And states generally require sole proprietors to register their business name if it is different from their own. Linda, for example, would file a "d/b/a" or "doing business as" certificate for ExSciTe.

Sole proprietorships also have some serious disadvantages. First, the owner of the business is responsible for all of the business's debts. If ExSciTe cannot pay its suppliers or if a student is injured by an exploding cabbage, Linda is *personally* liable. She may have to sell her house and car to pay the debt. Second, the owner of a sole proprietorship has limited options for financing her business. Debt is generally her only source of working capital because she has no stock or memberships to sell. If someone else brings in capital and helps with the management of the business, then it is a partnership, not a sole proprietorship. For this reason, sole proprietorships work best for small businesses without large capital needs.

[1] *In the Matter of Jeffrey M. Horning*, 816 N.Y.S.2d 877; 2006 N.Y. Misc. LEXIS 555.

CORPORATIONS

Corporations are the dominant form of organization for a simple reason—they have been around for a long time and, as a result, they are numerous and the law that regulates them is well developed.

The concept of a corporation is very old indeed—it began with the Greeks and spread from them through the Romans into English law. At the beginning, however, corporations were viewed with deep suspicion. A British jurist commented that they had "neither bodies to be punished nor souls to be condemned." And what were shareholders doing that they needed limited liability? Why did they have to cower behind a corporate shield? For this reason, shareholders originally had to obtain special permission to form a corporation. In England, corporations could be created only by special charter from the monarch or, later, from Parliament. But with the advent of the Industrial Revolution, large-scale manufacturing enterprises needed huge amounts of capital from investors who were not involved in management and did not want to be personally liable for the debts of an organization that they were not managing. In 1811, New York became the first jurisdiction in the United States to permit routine incorporation.[2]

Despite the initial suspicion with which corporations were viewed, economists now suggest that this form of organization, combined with technological advances such as double-entry bookkeeping and stockmarkets, provided the West with an enormous economic advantage. In particular, corporations permitted the investment of outside capital and were more likely than partnerships to survive the death of their founders. In short, corporations permitted the development of large, enduring businesses.

Corporations in General

As is the case for all forms of organization, corporations have their advantages and disadvantages.

Limited Liability

If a business flops and cannot pay its bills, shareholders lose their investment in the company but not their other assets. Likewise, if an employee is in an accident while driving a company van, the business is liable for any harm to the other driver, but its shareholders are not personally liable. Be aware, however, that limited liability does not protect against all debts. Individuals are always responsible for their *own* acts. Suppose that the careless employee who caused the accident was also a company shareholder. Both he and the company would be liable. If the company did not pay the judgment, the employee would have to, from his personal assets. **A corporation protects managers and investors from personal liability for the debts of the corporation and the actions of others, but not against liability for their *own* negligence (or other torts and crimes).**

Transferability of Interests

Corporations provide flexibility for enterprises small (with one owner) and large (with thousands of shareholders). As we will see, partnership interests are not transferable without the permission of the other partners, whereas corporate stock can be bought and sold easily.

Duration

When a sole proprietor dies, legally so does the business. But corporations have perpetual existence: they can continue without their founders.

---

[2]An Act Relative to Incorporation for Manufacturing Purpose, 1811 N.Y. Laws, ch. 67, §111.

Logistics

Corporations require substantial expense and effort to create and operate. The cost of establishing a corporation includes legal and filing fees, not to mention the cost of the annual filings that states require. Corporations must also hold meetings for both shareholders and directors. Minutes of these meetings must be kept indefinitely in the company minute book.

Taxes

Because corporations are taxable entities, they must pay taxes and file returns. This is a simple sentence that requires a complex explanation. Originally, there were only three ways to do business: as a sole proprietorship, a partnership, or a corporation. The sole proprietor pays taxes on all the business's profits. A partnership is not, as we say, a taxable entity, which means it does not pay taxes itself. All income and losses are passed through to the partners and reported on their personal income tax returns. Corporations, by contrast, are taxable entities and pay income tax on their profits. Shareholders must then pay tax on dividends from the corporation. Thus a dollar is taxed only once before it ends up in a partner's bank account, but twice before it is deposited by a shareholder.

Exhibit 31.1 compares the single taxation of partnerships with the double taxation of corporations. Suppose, as shown in the exhibit, that a corporation and a partnership each receives $10,000 in additional income. The corporation pays tax at a top rate of 35 percent.[3]

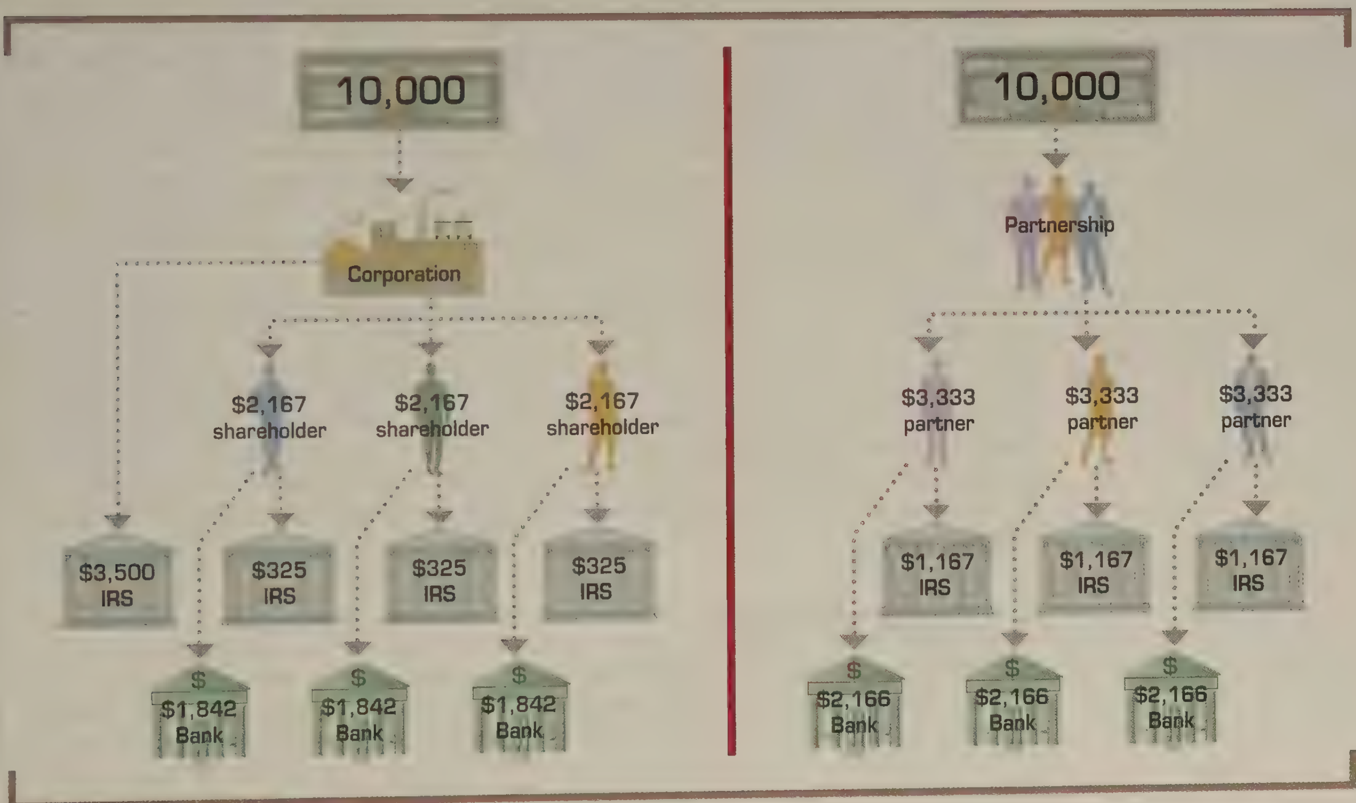

EXHIBIT 31.1 Partners pay lower taxes than shareholders.

[3]This is the federal tax rate; most states also levy a corporate tax.

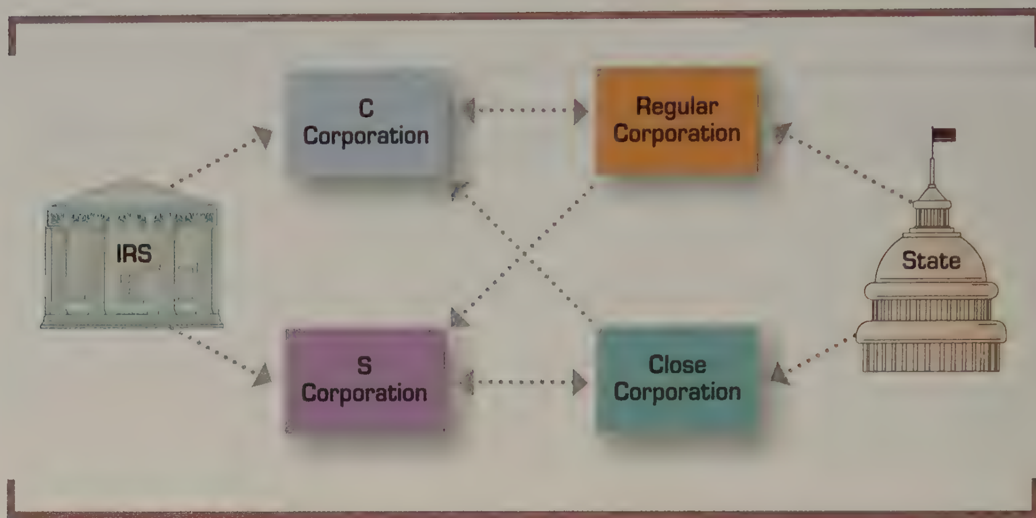

EXHIBIT 31.2 Both a regular and a close corporation can be either a C or an S corporation.

Thus the corporation pays $3,500 of the $10,000 in tax. The corporation pays out the remaining $6,500 as a dividend of $2,167 to each of its three shareholders. Then the shareholders are taxed at the special dividend rate of 15 percent, which means they each pay a tax of $325. They are each left with $1,842. Of the initial $10,000, almost 45 percent ($4,475) has gone to the Internal Revenue Service (IRS).

Compare the corporation to a partnership. The partnership itself pays no taxes, so it can pass on $3,333 to each of its partners. At a 35 percent individual rate, each partner pays an income tax of $1,167. As partners, they pocket $2,166, which is $324 more than they could keep as shareholders. Of the partnership's initial $10,000, 35 percent ($3,501) has gone to the IRS, compared with the corporation's 45 percent.

One further tax issue. Corporations are created and regulated by state law but must pay both federal and state taxes. Federal law gives favorable tax treatment to some small corporations, which it calls "S corporations." Many states also treat small corporations differently but calls them "close corporations." Federal tax law and state corporation statutes are completely independent. Thus, an organization could be a close corporation under state law and not qualify as an S corporation or, conversely, could be an S corporation under federal law but may or may not be a close corporation for state purposes. Exhibit 31.2 illustrates the difference between state corporate law and federal taxation of corporations.

S Corporations

Although entrepreneurs are often optimistic about the likely success of their new enterprise, in truth, the majority of new businesses lose money in their early years. Congress created S corporations (aka "S corps") to encourage entrepreneurship by offering tax breaks. The name "S corporation" comes from the provision of the Internal Revenue Code that created this form of organization.[4] **Shareholders of S corps have both the limited**

[4] 26 U.S.C. §1361.

liability of a corporation and the tax status of a partnership. Like a partnership, an S corp is not a taxable entity—all the company's profits and losses pass through to the shareholders, who pay tax at their individual rates. It avoids the double taxation of a regular corporation (called a "C corporation"). If, as is often the case, the startup loses money, investors can deduct these losses against their other income.

S corps do face some major restrictions:

- There can be only one class of stock (although voting rights can vary within the class).
- There can be no more than 100 shareholders.
- Shareholders must be individuals, estates, charities, pension funds, or trusts, not partnerships or corporations.
- Shareholders must be citizens or residents of the United States, not nonresident aliens.
- All shareholders must agree that the company should be an S corporation.

Although *most* states follow the federal lead on S corporations, a small number require these companies to pay state corporate tax.

Close Corporations

Close corporation
A company whose stock is not publicly traded. Also known as a *closely held corporation*.

Originally, the terms ***close corporation*** and ***closely held corporation*** referred simply to a company whose stock was not publicly traded (in other words, a "privately held" company). Most close corporations are small, although some privately held corporations, such as Hallmark Cards, Inc., and Mars, Inc. (maker of Mars candy bars), are huge. Beginning in New York in 1948, some states amended their corporation statutes to make special provisions for entrepreneurs. In some cases, a corporation must affirmatively elect to be treated as a close corporation; in others, any corporation can take advantage of these special provisions. Now when lawyers refer to "close corporations," they usually mean not merely a privately held company, but one that has taken advantage of the close corporation provisions of its state code.

Although the provisions of close corporation statutes vary from state to state, they tend to have certain common themes:

- **Protection of minority shareholders.** As there is no public market for the stock of a close corporation, a minority shareholder who is being mistreated by the majority cannot simply sell his shares and depart. Therefore, close corporation statutes often provide some protection for minority shareholders. For example, the charter of a close corporation could require a unanimous vote of all shareholders to choose officers, set salaries, or pay dividends. It could grant each shareholder veto power over all important corporate decisions.
- **Transfer restrictions.** The shareholders of a close corporation often need to work closely together in the management of the company. Therefore, statutes typically permit the corporation to require that a shareholder first offer shares to the other owners before selling them to an outsider. In that way, the remaining shareholders have some control over who their new co-owners will be.
- **Flexibility.** Close corporations can typically operate without a board of directors, a formal set of bylaws, or annual shareholder meetings.
- **Dispute resolution.** The shareholders are allowed to agree in advance that any one of them can dissolve the corporation if some particular event occurs or, if they choose, for any reason at all. If the shareholders are in a stalemate, the problem

can be solved by dissolving the corporation. Even without such an agreement, a shareholder can ask a court to dissolve a close corporation if the other owners behave "oppressively" or "unfairly."

EXAM Strategy

Question: Consider these two entrepreneurs: Judith formed a corporation to publish a newsletter that will not generate substantial revenues. Drexel operated his construction and remodeling business as a sole proprietorship. Were these forms of organization right for these businesses?

Strategy: Prepare a list of the advantages and disadvantages of each form of organization. Sole proprietorships are best for businesses without substantial capital needs. Corporations can raise capital but are expensive to operate.

Result: Judith would be better off with a sole proprietorship—her revenues will not support the expenses of a corporation. Also, her debts are likely to be small, so she will not need the limited liability of a corporation. And no matter what her form of organization, she would be personally liable for any negligent acts she commits, so a corporation would not provide any additional protection. But for Drexel, a sole proprietorship could be disastrous because his construction company will have substantial expenses and a large number of employees. If an employee causes an injury, Drexel might be personally liable. And if his business fails, the court would liquidate his personal assets. He would be better off with a form of organization that limits his liability, such as a corporation or a limited liability company.

Limited Liability Companies

An LLC offers the limited liability of a corporation and the tax status of a partnership.

Limited liability companies (LLCs) are a relatively new form of organization. Wyoming passed the first LLC statute in 1977, but most states did not follow suit until after 1991. An LLC is an extremely useful form of organization increasingly favored by entrepreneurs. It is not, however, as simple as it perhaps should be. Owing to a complex history that involves painful interaction between IRS regulations and state laws (the details of which we will spare you), the specific provisions of state laws vary greatly. An effort to remedy this confusion—the Uniform Limited Liability Company Act—has not at this point been widely accepted. Indeed, it was so heavily criticized that it was revised, but the revised statute has been adopted by only a handful of states. Thus, we can discuss only general trends in state laws. Before forming an LLC, you should review carefully the laws in your particular state.

Limited Liability

Members are not personally liable for the debts of the company. They risk only their investment, as if they were shareholders of a corporation. Are the members of the LLC liable in the following case? You be the judge.

You be the Judge

Ridgaway v. Silk

2004 Conn. Super. LEXIS 548
Superior Court of Connecticut, 2004

Facts: Norman Costello and Robert Giordano were members of Silk, LLC, which owned a bar and adult entertainment nightclub in Groton, Connecticut, called Silk Stockings. Anthony Sulls went drinking there one night—and drinking heavily. Although he was obviously drunk, employees at Silk Stockings continued to serve him. Costello and Giordano were working there that night. They both greeted customers (who numbered in the hundreds), supervised employees, and performed "other PR work." When Sulls left the nightclub at 1:45 a.m. with two friends, he drove off the highway at high speed, killing himself and one of his passengers, William Ridgaway, Jr.

Ridgaway's estate sued Costello and Giordano personally. The defendants filed a motion for summary judgment seeking dismissal of the complaint.

You Be the Judge: ***Are Costello and Giordano personally liable to Ridgaway's estate?***

Argument for Costello and Giordano: The defendants did not own Silk Stockings; they were simply members of an LLC that owned the nightclub. The whole point of an LLC is to protect members against personal liability. The assets of Silk, LLC, are at risk, but not the personal assets of Costello and Giordano.

Argument for Ridgaway's Estate: The defendants are not liable for being *members* of Silk, LLC, they are liable for their own misdeeds as *employees* of the LLC. They were both present at Silk Stockings on the night in question, meeting and greeting customers and supervising employees. It is possible that they might actually have served drinks to Sulls, but in any event, they did not adequately supervise and train their employees to prevent them from serving alcohol to someone who was clearly drunk. The world would be an intolerable place to live if employees were free to be as careless as they wished, knowing that they were not liable because they were members of an LLC.

Tax Status

As in a partnership, income flows through the company to the individual members, avoiding the double taxation of a corporation.

Formation

To organize an LLC, you must have a charter and you should have an operating agreement. The charter is short, containing basic information such as name and address. It must be filed with the Secretary of State in the jurisdiction in which it is being formed. An operating agreement sets out the rights and obligations of the owners, who are called "members." If an LLC does not adopt its own operating agreement, LLC statutes provide a default option. However, these standardized provisions may not be what members would choose if they thought about it. Therefore, it is often better for an LLC to prepare its own personalized operating agreement. The Horning case that began this chapter illustrates one of the many things that can go wrong when an LLC does not have an operating agreement.

On this issue, corporations have an advantage over LLCs. Corporations are so familiar that the standard documents (such as a charter, by-laws, and shareholder agreement) are well established and widely available. Lawyers can form a corporation easily, and the Internet offers a host of free forms. This is not the case with LLCs. As yet, the law is so unsettled that standard forms may be dangerous, while customized forms can be expensive. The following case illustrates the importance of a well-drafted operating agreement.

Wyoming.com, LLC v. Lieberman

2005 WY 42; 109 P.3d 883; 2005 Wyo. LEXIS 48
Supreme Court of Wyoming, 2005

Facts: Lieberman was a member of an LLC called Wyoming.com. After he withdrew, he and the other members disagreed about what his membership was worth. Wyoming.com filed a lawsuit asking the court to determine the financial rights and obligations of the parties, if any, upon the withdrawal of a member.

The Supreme Court of Wyoming reached a decision that may have sounded logical but left Lieberman in a sad twilight zone—neither in nor out of the LLC. The court ruled that Lieberman still owned part of the business despite his withdrawal as a member. So far, so good. But neither the LLC statute nor the company's operating agreement required the LLC to pay a member the value of his share. Therefore, neither party had any further rights or obligations. In other words, Lieberman was still an owner, but he was not entitled to any payment. Not quite understanding the implications of this ruling, Lieberman filed a motion seeking financial information about the company. The original trial court denied the request on the theory that since Lieberman had no right to a payout, the company had no obligation to give him financial data.

Issue: ***Does Lieberman have a right to any financial data about Wyoming.com?***

Excerpts from Justice Golden's Decision: [The prior Lieberman case] held that no provision exists either in Wyoming statutes or the operating agreements of Wyoming.com requiring any particular disposition of a member's equity interest upon his withdrawal as a member. Thus, Wyoming.com could not legally force Lieberman to sell his equity interest at any particular value, and Lieberman could not force Wyoming.com to buy his equity interest at any particular value.

This answered the question presented by Wyoming.com in its [lawsuit]. While not explicitly stated in the opinion, with the question answered, nothing remains but to dismiss the [case]. No further proceedings are required to resolve this action. As specifically applied to this case, Lieberman simply retains his equity interest and nothing further is required of either party as a direct result of Lieberman's withdrawal as a member.

Excerpts from Justice Kite's Concurring Decision: I concur with the result reached by the majority in this matter solely because it is mandated by [the prior Lieberman case]. I joined [the] dissenting opinion in that case because I found it more appropriate to allow a minority interest owner in an LLC a mechanism to realize the value of his equity interest. Given the majority's ruling that Mr. Lieberman owns an equity interest, but neither the operating agreement nor the statute provide a method for him to realize the value of that interest, there is nothing left for the district court to order Wyoming.com LLC to do. [The court should consider that] those rights and responsibilities in the context of other forms of business organizations are well developed and may provide guidance in the realm of the LLC.

Flexibility

Unlike S corporations, LLCs can have members that are corporations, partnerships, or nonresident aliens. LLCs can also have different classes of stock. Unlike corporations, LLCs are not required to hold annual meetings or maintain a minute book.

Transferability of Interests

Unless the operating agreement provides otherwise, the members of the LLC must obtain the unanimous permission of the remaining members before transferring their ownership rights. This is yet another reason to have an operating agreement.

LLCs cannot issue stock options, which is potentially a serious problem because options may be an essential lure in attracting and retaining top talent.

Duration

It used to be that LLCs automatically dissolved upon the withdrawal of a member (owing to, for example, death, resignation, or bankruptcy). The current trend in state laws, however, is to permit an LLC to continue in operation even after a member withdraws.

Going Public

Once an LLC goes public, it loses its favorable tax status and is taxed as a corporation, not a partnership.[5] Thus, there is no advantage to using the LLC form of organization for a publicly traded company. And there are some disadvantages: unlike corporations, publicly traded LLCs do not enjoy a well-established set of statutory and case law that is relatively consistent across the many states. For this reason, privately held companies that begin as LLCs usually change to corporations when they go public.

It is worth noting, too, that because of securities laws, it is important for an LLC to have an operating agreement that permits managers the right to convert the LLC into a corporation at the time of a public offering without the consent of the members.[6]

Changing Forms

Some companies that are now corporations might prefer to be LLCs. However, the IRS would consider this change to be a sale of the corporate assets and would levy a tax on the value of these assets. For this reason, few corporations have made the change. However, switching from a partnership to an LLC or from an LLC to a corporation is not considered a sale and does not have the same adverse tax impact.

Piercing the LLC Veil

It has long been the case that, if corporate shareholders do not comply with the technicalities of the law, they may be held personally liable for the debts of the corporation (an issue that will be discussed in more depth in Chapter 33). As the following case illustrates, members of an LLC can also be held liable under the same circumstances.

BLD Products, LTC. v. Technical Plastics of Oregon, LLC

2006 U.S. Dist. LEXIS 89874
United States District Court for the District of Oregon, 2006

Facts: Mark Hardie was the sole member of Technical Plastics of Oregon, LLC (TPO). He operated the business out of an office in his home. Hardie regularly used TPO's accounts to pay such expenses as landscaping and housecleaning. TPO also paid some of Hardie's personal credit card bills, loan payments on his Ford truck, the cost of constructing a deck on his house, his stepson's college bills, and the cost of family vacations to Disneyland, as well as miscellaneous bills from GI Joe's, Wrestler's World, K-Mart, and Mattress World. At the same time, Hardie deposited cash advances from his personal credit cards into the TPO checking account. Hardie did not take a salary from TPO. When TPO filed for bankruptcy, it owed BLD Products approximately $120,000 for goods that it had purchased.

In some cases, a court will "pierce the veil" of a corporation and hold its shareholders personally liable for the debts of the business. BLD argued that the same doctrine should apply to LLCs and the court should hold Hardie personally liable for TPO's debts.

---

[5] 26 U.S.C. §7704.

[6] In this way, under Rule 144 (which is discussed in Chapter 36 on securities regulation), members can include the time during which they owned interests in the LLC when calculating their holding period for stock.

BLD filed for summary judgment.

Issues: ***Does the corporate doctrine of piercing the corporate veil apply to LLCs? Should Hardie be personally liable for TPO's debts?***

Excerpts from Judge King's Decision: I conclude that the piercing doctrine may be applied to LLCs under the same circumstances in which it is applied to corporations. We have characterized that formulation [for piercing a corporate veil] as a three-part test:

1. the defendant controlled the debtor corporation;
2. the defendant engaged in improper conduct; and
3. as a result of that improper conduct plaintiff was unable to collect on a debt against the insolvent corporation.

There is no issue that Hardie, as the sole member and manager of TPO, controlled the company. Turning to the second prong of the test, there is substantial evidence of improper conduct, particularly in the nature of commingling of assets and a general disregard of TPO's LLC form and status as a separate legal entity. Hardie frequently and in significant amounts paid his personal expenses from the TPO business account. The amounts are well beyond small dips into petty cash. There is inadequate documentation about how funds flowed between Hardie, as an individual, and TPO. I realize that Hardie elected to be paid in a manner other than by a regular salary but that does not excuse the lack of documentation. Hardie treated TPO and its assets as his personal funds.

That leaves the third prong of the test, whether Hardie's improper conduct resulted in BLD being unable to collect on its approximately $120,000 debt. I cannot determine as a matter of law that the inability to pay the entire $120,000 debt was due to Hardie's improper conduct over the years. Consequently, I grant partial summary judgment that BLD is entitled to pierce the corporate veil, making Hardie personally liable, but that the amount for which Hardie is personally liable will have to be determined by the jury.

Legal Uncertainty

As we have observed, LLCs are a relatively new form of organization without a consistent and widely developed body of law. As a result, members of an LLC may find themselves in the unhappy position of litigating issues of law which, although well established for corporations, are not yet clear for LLCs. Win or lose, lawsuits are expensive in both time and money.

An important area of legal uncertainty involves managers' duties to the members of the organization. For example, it is not clear in many jurisdictions if managers of an LLC have a legal obligation to act in the best interest of members. Delaware courts have recently ruled that an LLC's managers do have a fiduciary duty to its members unless the operating agreement provides otherwise. (In that state, an operating agreement can limit any duty except the requirement of good faith and fair dealing.) However, this uncertainty means that, before becoming a member of an LLC, it is important to understand both state law and the terms of the operating agreement.

Furthermore, when managers of a corporation violate their duty to the organization by, say, approving a merger without sufficient investigation, shareholders are allowed to bring a so-called **derivative lawsuit** in the name of the corporation against the managers. This right was established by common law. It is unclear, however, if members of an LLC have the same right, especially in a state such as New York where the LLC statute does not explicitly authorize derivative lawsuits. The following case resolves this issue, but only for New York state.

Tzolis v. Wolff

884 N.E.2d 1005; 855 N.Y.S.2d 6; 2008 N.Y. LEXIS 226
Court of Appeals of New York, 2008

Facts: Soterios Tzolis owned 25 percent of Smith Pennington Property Co. LLC, which owned a Manhattan hotel. Herbert Wolff managed the LLC. Tzolis alleged that Wolff first leased and then sold the hotel to family and friends at a price below market value. Tzolis filed a derivative suit against Wolff on the grounds that the man had violated his duties to the LLC.

The trial court ruled that members of an LLC had no right to bring a derivative action because the statute had not explicitly permitted such suits. Tzolis appealed.

Issue: ***Do members of an LLC have the right to bring a derivative suit against managers of the company?***

Excerpts from Justice Smith's Decision: The derivative suit has been part of the general corporate law of this state at least since 1832. It was not created by statute, but by case law. [The judge in a 1832 case said:]

> "no injury the stockholders may sustain by a fraudulent breach of trust, can, upon the general principles of equity, be suffered to pass without a remedy. I will never determine that a court cannot lay hold of every such breach of trust. I will never determine that frauds of this kind are out of the reach of courts of law; for an intolerable grievance would follow from such a determination."

We now consider whether to recognize derivative actions on behalf of the LLC, as to which no statutory provision for such an action exists. In addressing the question, we continue to heed the realization: When fiduciaries are faithless to their trust, the victims must not be left wholly without a remedy. [T]o determine that frauds of this kind are out of the reach of courts of law would lead to "an intolerable grievance."

To hold that there is no remedy when corporate fiduciaries use corporate assets to enrich themselves was unacceptable in 1832, and it is still unacceptable today. Derivative suits are not the only possible remedy, but they are the one that has been recognized for most of two centuries, and to abolish them in the LLC context would be a radical step.

[C]ourts have repeatedly recognized derivative suits in the absence of express statutory authorization. In light of this, it could hardly be argued that the mere absence of authorizing language in the Limited Liability Company Law bars the courts from entertaining derivative suits by LLC members.

We therefore hold that members of LLCs may sue derivatively.

In its reasoning, this court relied on corporate law precedents. However, in a recent case also involving derivative actions, a Delaware court did not follow that approach. The Delaware LLC statute clearly provides that *members* can bring derivative actions. That bit of clarity is helpful. But what about *creditors* of an LLC? We know that creditors of a *corporation* have that right. Does the same rule apply to LLCs?

In the case in question, the board of JetDirect Aviation LLC approved four major acquisitions, all the while knowing that its financials were inaccurate. The company ultimately went bankrupt and, thus, was unable to repay a $34 million loan to CML. The lender filed a derivative action against JetDirect's careless board members. But, much to everyone's surprise, two Delaware courts ruled that CML could *not* bring a derivative action because the Delaware LLC statute had not explicitly authorized such lawsuits. CML was simply out of luck. The lower court observed, "[T]here is nothing absurd about different legal principles applying to corporations and LLCs."

CML would not necessarily agree. And the lower court itself acknowledged that commentators had all assumed that such suits were permitted. It turned out they were wrong. This result may make lenders less willing to finance LLCs and therefore render LLCs a less-desirable form of organization.[7] In short, many issues of law that are well established for corporations still reside in foggy territory when it comes to LLCs.

Choices: LLC v. Corporation

When starting a business, which form makes the most sense—LLC or corporation? The tax status of an LLC is a major advantage over a corporation. Although an S corporation has the same tax status as an LLC, it also has all the annoying rules about classes of stock and number of shareholders. Once an LLC is established, it does not have as many housekeeping rules as corporations—it does not, for example, have to make annual filings or hold annual meetings. However, the LLC is not right for everyone. If done properly, an LLC is more expensive to set up than a corporation because it needs to have a thoughtfully crafted

[7] *CML V, LLC v. Bax*, 2011 Del. LEXIS 480 (S. Ct. Del, 2011).

operating agreement. Also, venture capitalists almost always refuse to invest in LLCs, preferring C corporations instead. There are four reasons for this preference: (1) arcane tax issues, (2) C corporations are easier to merge, sell, or take public, (3) corporations can issue stock options, and (4) the general legal uncertainty involving LLCs.

EXAM Strategy

Question: Hortense and Gus are each starting a business. Hortense's business is an Internet startup. Gus will be opening a yarn store. Hortense needs millions of dollars in venture capital and expects to go public soon. Gus has borrowed $10,000 from his girlfriend, which he hopes to pay back soon. Should either of these businesses organize as an LLC?

Strategy: Sole proprietorships may be best for businesses without substantial capital needs and without significant liability issues. Corporations are best for businesses that will need substantial outside capital and expect to go public shortly.

Result: An LLC is not the best choice for either of these businesses. Venture capitalists will insist that Hortense's business be a corporation, especially if it is going public soon. A yarn store has few liability issues, and Gus does not expect to have any outside investors. Hence, a sole proprietorship would be more appropriate for Gus's business.

Benefit Corporations and LLCs

The benefit organization, known as a B corporation or B LLC, is one that has pledged to behave in a socially responsible manner, even as it pursues profits. (Thus, it is *not* a non-profit.) The Benefit company's focus is on the triple bottom line: "people, planet and profits." Currently, a handful of states (such as Maryland, New Jersey, New York, Vermont and Virginia) permit B organizations.

Almost 500 businesses nationwide, including King Arthur Flour Company, Inc. and Seventh Generation, have become Benefit organizations. To obtain B status, shareholders must first give their approval. Then the company has to obtain certification from an independent third party, such as B Lab. Companies with B status must prepare an annual benefit report that includes an assessment of their societal and environmental impact.

General Partnerships

Partnership
An unincorporated association of two or more co-owners who operate a business for profit.

A **partnership** is an unincorporated association of two or more co-owners who carry on a business for profit.[8] Each co-owner is called a *general partner*.

Liability

Each partner is personally liable for the debts of the enterprise whether or not she caused them. Thus, a partner is liable for any injury that another partner or an employee causes while on partnership business as well as for any contract signed on behalf of the partnership.

[8]Uniform Partnership Act §6(1).

This form of organization can be particularly risky if the group of owners is large and the partners do not know each other.

Daniel Matter knows firsthand about the risks of a partnership. A former partner in the accounting firm Pannell Kerr Foster, he thought he had heard the last of the firm when he resigned his partnership. He was wrong. *Seven* years later, he and 260 other former partners of the California firm were served with a 78-page lawsuit seeking $24 million in damages. The lawsuit alleged that Pannell Kerr had been negligent in preparing financial reports for a bankrupt Tennessee savings and loan. Although Daniel Matter had never worked for that particular client, he was potentially liable because he had been a partner when the audit was done. At age 53, Matter feared losing everything he owned.

At age 53, Matter feared losing everything he owned.

Management

As many law, accounting, and consulting firms have grown larger, they have discovered another disadvantage to partnerships: management can be difficult. In theory, all partners in a firm are equal and have an equal right to share in management. When two sisters-in-law form a small accounting firm, they can easily discuss business issues—from hiring a new associate to choosing a photocopy machine. But when the partnership has 1,000 accountants speaking four different languages on three continents, consultation becomes difficult. Although most large firms authorize a management committee to make day-to-day decisions, other partners may still expect to be consulted. One partner in a law firm complained bitterly when all 163 partners were assembled to vote on the style of ceiling tile for the conference room. Yet, to be fair, the managing partner had called for the vote because everyone had complained when he changed the typeface on the firm's stationery without consulting them.

Transfer of Ownership

Financing a partnership may be difficult because the firm cannot sell shares as a corporation does. The capital needs of the partnership must be provided by contributions from partners or by borrowing. Likewise, a partner only has the right to transfer the *value* of her partnership interest, not the interest itself. She cannot, for example, transfer the right to participate in firm management. Take the case of Evan and his mother. She is a partner in the immensely profitable McBain Consulting firm. She dies, leaving him an orphan with no siblings. He overcomes his grief as best he can and goes to her office on the next Monday to take over her job and her partnership. Imagine his surprise when her partners tell him that, as her sole heir, he can inherit the *value* of her partnership but he has no right to be a partner. He is out on the sidewalk within the hour. The partners have promised him a check in the mail.

Dissociation

When a partner quits, that event is called a *dissociation*. A dissociation is a fork in the road: the partnership can either buy out the departing partner(s) and continue in business or wind up the business and terminate the partnership. Most large firms provide in their partnership agreement that, upon dissociation, the business continues.

Formation

Given the disadvantages, why does anyone do business as a partnership? Like sole proprietorships, partnerships are easy to form. Although a partnership should have a written agreement, it is perfectly legal without one. In fact, nothing is required in the way of forms

or filings or agreements. If two or more people do business together, sharing management, profits and losses, they have a partnership, whether they know it or not, and are subject to all the rules of partnership law.

A partnership has an important advantage over a sole proprietorship—partners. Sole proprietors are on their own; partners have colleagues to help them and, equally important, to supply capital for the business. Sole proprietorships sometimes turn into partnerships for exactly this reason.

Taxes

As we have seen above, partnerships are not a taxable entity, which means that profits flow through to the owners.

Limited Liability Partnerships

A limited liability partnership (LLP) is a type of general partnership that most states now permit. There is a very important distinction, however, between LLPs and general partnerships: **in an LLP, the partners are not liable for the debts of the partnership.**[9] They are, naturally, liable for their own misdeeds, just as if they were a member of an LLC or a shareholder of a corporation.

To form an LLP, the partners must file a statement of qualification with state officials. LLPs must also file annual reports. The other attributes of a partnership remain the same. Thus, an LLP is not a taxable entity, and it has the right to choose its duration (that is, it can, but does not have to, survive the dissociation of a member).

Although an LLP can be much more advantageous for partners than a general partnership, it is absolutely crucial to comply with all the technicalities of the LLP statute. Otherwise, partners lose protection against personal liability. Note the sad result for Michael Gaus and John West, who formed a Texas LLP. Unfortunately, they did not renew the LLP registration each year, as the statute required. Four years after its initial registration, the partnership entered into a lease. When the partners ultimately stopped paying rent and abandoned the premises, they were both were held personally liable for the rent because the LLP registration had expired. As the court pointed out, the statute did not contain a "substantial compliance" section, nor did it contain a grace period for filing a renewal application. In short, close only counts in horseshoes and hand grenades, not in LLPs.

Limited Partnerships and Limited Liability Limited Partnerships

Although limited partnerships and limited liability limited partnerships sound confusingly similar to limited liability partnerships and general partnerships, like many siblings, they operate very differently. And truth to tell, limited partnerships and limited liability limited partnerships are relatively rare—they are generally used only for estate planning purposes (usually, to reduce estate taxes) and for highly sophisticated investment vehicles. You

[9]UPA §306(c).

should be aware of their existence, but you may not see them very often in your business life. Here are the major features:

Structure

Limited partnerships must have at least one *limited* partner and one *general* partner.

Liability

Limited partners are not *personally* liable, but general partners are. Like corporate shareholders, limited partners risk only their investment in the partnership (which is called their "capital contribution"). In contrast, general partners of the limited partnership are personally liable for the debts of the organization.

However, the revised version of the Uniform Limited Partnership Act permits a limited partnership, in its certificate of formation and partnership agreement, simply to declare itself a *limited liability* limited partnership.[10] **In a limited liability limited partnership, the general partner is not personally liable for the debts of the partnership.** This provision effectively removes the major disadvantage of limited partnerships. Although, at this writing, fewer than half the states have actually passed the revised version of the Uniform Limited Partnership Act, this revision would seem to indicate the trend for the future.

Taxes

Limited partnerships are not taxable entities. Income is taxed only once before landing in a partner's pocket.

Formation

The general partners must file a **certificate of limited partnership** with their Secretary of State. Although most limited partnerships do have a partnership agreement, it is not required.

Management

General partners have the right to manage a limited partnership. Limited partners are essentially passive investors with few management rights beyond the right to be informed about the partnership business. Limited partnership agreements can, however, expand the rights of limited partners.

Transfer of Ownership

Limited partners have the right to transfer the *value* of their partnership interest, but they can sell or give away the interest itself only if the partnership agreement permits.

Duration

Unless the partnership agreement provides otherwise, limited partnerships enjoy perpetual existence—they continue even as partners come and go.

EXAM Strategy

Question: In which one or more of the following forms of organization is it true that none of the partners are liable for the debts of the partnership?

[10]ULPA §102(9).

1. General partnership
2. Limited liability partnership
3. Limited partnership
4. Limited liability limited partnership

Strategy: All these partnerships sound similar, but they are in fact very different, so it is important to keep them straight!

Result: In a general partnership, all the partners are liable. In a limited liability partnership, none are liable. In a limited partnership, the general partners are liable. In a limited liability limited partnership, none of the partners are liable. The correct answers are 2. and 4.

Professional Corporations

Traditionally, most professionals (such as lawyers and doctors) were not permitted to incorporate their businesses, so they organized as partnerships. Now professionals are allowed to incorporate, but in a special way. These organizations are called "professional corporations" or "PCs." **PCs provide more liability protection than a general partnership.** If a member of a PC commits malpractice, the corporation's assets are at risk, but not the personal assets of the innocent members. If Drs. Sharp, Payne, and Graves form a *partnership*, all the partners will be personally liable when Dr. Payne accidentally leaves her scalpel inside a patient. If the three doctors have formed a *PC* instead, Dr. Payne's Aspen condo and the assets of the PC will be at risk, but not the personal assets of the two other doctors.

Generally, the shareholders of a PC are not personally liable for the contract debts of the organization, such as leases or bank loans. Thus, if Sharp, Payne, & Graves, P.C. is unable to pay its rent, the landlord cannot recover from the personal assets of any of the doctors. As partners, the doctors would be personally liable.

PCs have some limitations. First, all shareholders of the corporation must be members of the same profession. For Sharp, Payne, & Graves, P.C., that means all shareholders must be licensed physicians. Other valued employees cannot own stock. Second, like other corporations, the required legal technicalities for forming and maintaining a PC are expensive and time-consuming. Third, tax issues can be complicated. A PC is a separate taxable entity, like any other corporation. It must pay tax on its profits, and then its shareholders pay tax on any dividends they receive. *Salaries*, however, are deductible from firm profits. Thus, the PC can avoid paying taxes on its profits by paying out all the profits as salary. But any profits remaining in firm coffers *at the end of the year* are taxable. To avoid tax, PCs must be careful to calculate their profits accurately and pay them out before year's end. This chore can be time-consuming, and any error may cause unnecessary tax liability.

Joint Ventures

Imax Corp. decided that it would like to partner with cinema operators—it would supply its big screens in return for a share of the box office revenue. The arrangement that Imax is describing is not like the other partnerships we have discussed in this chapter—it is a joint

venture. A **joint venture** is a partnership for a limited purpose. Imax and the cinema operators would not merge; they would simply work together. Each organization retains its own identity. Imax would be liable to an electrician whom the cinema operator had hired to install an Imax screen, but not to the cinema's popcorn supplier.

Joint venture
A partnership for a limited purpose.

FRANCHISES

This chapter has presented an overview of the various forms of organization. Franchises are not, strictly speaking, a separate form of organization. They are included here because they represent an important option for entrepreneurs. The United States has nearly half a million franchised businesses, which employ almost 8 million people. Total sales are $1.3 trillion a year. Well-known franchises include Hampton Hotels, McDonald's, and Supercuts. Most franchisors and franchisees are corporations, although they could legally choose to be any of the forms discussed in this chapter.

If you have been to an IMAX movie, you may have benefited from a joint venture between IMAX and cinema operators.

Buying a franchise is a compromise between starting one's own business as an entrepreneur and working for someone else as an employee. Franchisees are free to choose which franchise to buy, where to locate it, and how to staff it. But they are not completely on their own. They are buying an established business with the kinks worked out. In case the owner has never boiled water before, the McDonald's operations manual explains everything from how to set the temperature controls on the stove, to the number of seconds that fries must cook, to the length of time they can be held in the rack before being discarded. And a well-known name like McDonald's or Subway ought, by itself, to bring customers through the door.

There is, however, a fine line between being helpful and being oppressive. Franchisees sometimes complain that franchisor control is too tight—tips on cooking fries might be appreciated, but rules on how often to sweep the floor are not. Sometimes franchisors, in their zeal to maintain standards, prohibit innovation that appeals to regional tastes. Just because spicy biscuits are not popular in New England does not mean they should be banned in the South.

Franchises can be very costly to acquire, anywhere from several thousand dollars to many millions. That fee is usually payable up front, whether or not a sandwich or burger is ever sold. On top of the up-front fee, franchisees also typically pay an annual fee that is a percentage of *gross sales revenues*, not *profit*. Sometimes the fee seems to eat up all the profits. Franchisees also complain when they are forced to buy supplies from headquarters. In theory, the franchisors can purchase hamburger meat and paper plates more cheaply in bulk and also maintain quality controls. On the other hand, the franchisees are a captive audience, and they sometimes allege that headquarters has little incentive to keep prices low. Indeed, some franchisors make most of their profit from the products they sell to their store owners. Often,

the franchise agreement permits the company to change the terms of the agreement by raising fees or expenses. Franchisees also grumble when they are forced to contribute to expensive "co-op advertising" that benefits all the outlets in the region. The sandwich franchise Quiznos recently spent $100 million to settle litigation with potential franchisees, who claimed that the company took their fees without finding a store location for them, and some existing store owners, who complained that the company forced them to buy *everything* (including soap in the bathrooms and the piped-in music) from the company at inflated prices.

All franchisors must comply with the Federal Trade Commission's (FTC) Franchise Rule. In addition, some states also impose their own franchise requirements. Under FTC rules, a franchisor must deliver to a potential purchaser a so-called Franchise Disclosure Document (FDD) at least 14 calendar days before any contract is signed or money is paid. The FDD must provide information on:

- The history of the franchisor and its key executives
- Litigation with franchisees
- Bankruptcy filings by the company and its officers and directors
- Costs to buy and operate a franchise
- Restrictions, if any, on suppliers, products, and customers
- Territory – any limitations (in either the real or virtual worlds) on where the franchisee can sell or any restrictions on other franchisees selling in the same territory
- Business continuity – under what circumstances can the franchisor fire the franchisee and the franchisee's rights to renew or sell the franchise
- Franchisor's training program
- Required advertising expenses
- A list of current franchisees and those that have left in the prior three years (a lot of either may be a bad sign)
- A report on prior owners of stores that the franchisor has reaquired
- Earnings information is not required; but if disclosed, the franchisor must reveal the basis for this information
- Audited financials for the franchisor
- A sample set of the contracts that a franchisee is expected to sign

© John Lund/Workbook Stock/Getty Images

"Be cool, Cat."

The purpose of the FDD is to ensure that the franchisor discloses all relevant facts. It is not a guarantee of quality because the FTC does not investigate to make sure that the information is accurate. After the fact, if the FTC discovers the franchisor has violated the rules, it may sue on the franchisee's behalf. (The franchisee does not have the right to bring suit personally against someone who violates

FTC franchise rules, but it may be able to sue under state law.)

Suppose you obtain an FDD for "Shrinking Cats," a franchise that offers psychiatric services for neurotic felines. The company has lost money on all the outlets it operates itself; it has sold only three franchises, two of which have gone out of business; and all the required contracts are ridiculously favorable to the franchisor. Nevertheless, the FTC will still permit sales as long as the franchisor discloses all the information required in the FDD.

As the following case illustrates, the franchisor has much of the power in a franchise relationship.

National Franchisee Association v. Burger King Corporation

2010 U.S. Dist. LEXIS 123065
United States District Court for the Southern District of Florida, 2010

Facts: The Burger King Corporation (BKC) would not allow franchisees to have it their way. Instead, BKC forced them to sell the double-cheeseburger (DCB) and, later, the Buck Double (the DCB minus one slice of cheese) for no more than $1.00. Franchisees alleged that, because this price was below their cost, they were losing money on every double cheeseburger they sold. The National Franchisee Association (NFA), to which 75 percent of BKC's individual franchisees belonged, filed suit alleging that (1) BKC did not have the right to set maximum prices; and (2) that even if BKC had such a right, it had violated its obligation under the franchise agreement to act in good faith.

The court dismissed the first claim because the franchise agreement unambiguously permitted BKC to set whatever prices it wanted. But the court allowed the NFA to proceed with the second claim. BKC filed a motion to dismiss.

Issue: ***Was BKC acting in good faith when it forced franchisees to sell items below cost?***

Excerpts from Judge Moore's Decision: The motive of BKC in exercising its discretion to set prices under the contract is key. [B]ad faith involves a subterfuge or evasion of contractual duties. [T]here are at least two ways a plaintiff can go about raising a claim of bad faith. Plaintiffs can allege facts identifying defendant's improper ulterior motive(s). For example, if a franchisee had evidence that a franchisor had a secret agenda to take over the franchise and operate it as a company-owned business, and was deliberately setting prices to weaken the targeted franchisee, such a plaintiff could raise a claim of bad faith by alleging the existence of that plan.

It is more likely, however, that plaintiffs will lack direct evidence of dishonesty. In these cases, plaintiffs must allege some facts tending to show that no reasonable person could have thought that the steps taken by the defendant were a reasonable means of carrying out the contract's defined purposes. If no reasonable person would have exercised discretion as defendant had, the natural inference is that defendant must have had some hidden improper motive.

[T]he magnitude of the injury claimed by plaintiff is of central importance. [A]n inference of bad faith may arise when the defendant exercises discretion in such a manner as to effectively destroy whatever benefits the plaintiff could have reasonably expected under the contract. The logic is that the measure with such severe results could not have been within the contemplation of the parties.

[N]one of the facts alleged by plaintiffs are sufficient to support a claim of bad faith. Plaintiffs rely principally on their allegation that franchisees could not produce and sell DCB or Buck Doubles at a cost less than $1.00, and therefore that franchisees suffer a loss on each of these items sold. There are a variety of legitimate reasons why a firm selling multiple products may choose to set the price of a single product below cost. Among other things, such a strategy might help build goodwill and customer loyalty, hold or shift customer traffic away from competitors, or serve as loss leaders to generate increased sales on other higher margin products.

The issue is not whether such a strategy was wise or ultimately successful or mistaken. In the absence of some other evidence of improper motive, the question is whether it was so irrational and capricious that no reasonable person would have made such a decision. There is nothing about the pricing decision that suggests BKC was doing anything other than seeking to promote the performance of its franchisees. Nothing about this action suggests bad faith.

[T]o the extent plaintiffs seek to raise a claim of bad faith by pointing to the injuries allegedly caused them by

BKC's decision, plaintiffs must allege that the damage to their overall business was so severe as to deprive them of their reasonable expectations under the contract. Plaintiffs come nowhere close to alleging such an impact. Significantly, nowhere do plaintiffs claim that their overall business has been appreciably impaired. Nor do they allege that their overall businesses are no longer profitable or that their competitive positions or economic viability going forward are threatened.

For the foregoing reasons, it is ORDERED AND ADJUDGED that Defendant's Motion to Dismiss is GRANTED.

Chapter Conclusion

The process of starting a business is immensely time-consuming. Eighteen-hour days are the norm. Not surprisingly, entrepreneurs are sometimes reluctant to spend their valuable time on legal issues that, after all, do not contribute directly to the bottom line. No customer buys more fried chicken because the franchise is a limited liability company instead of a corporation. Wise entrepreneurs know, however, that careful attention to legal issues is an essential component of success. The form of organization affects everything from taxes to liability to management control. The idea for the business may come first, but legal considerations occupy a close second place.

Exam Review

	Separate Taxable Entity	Personal Liability for Owners	Ease of Formation	Transferable Interests (Easily Bought and Sold)	Perpetual Existence	Other Features
Sole Proprietorship	No	Yes	Very easy	No, can only sell entire business	No	
Corporation	Yes	No	Difficult	Yes	Yes	
Close Corporation	Yes, for C corporation No, for S corporation	No	Difficult	Transfer restrictions	Yes	Protection of minority shareholders. No board of directors required
S Corporation	No	No	Difficult	Transfer restrictions	Yes	Only 100 shareholders. Only one class of stock. Shareholders must be individuals, estates, trusts, charities, or pension funds and be citizens or residents of the United States. All shareholders must agree to S status
Limited Liability Company	No	No	Difficult	Yes, if the operating agreement permits	Varies by state, but generally, yes	No limit on the number of shareholders, the number of classes of stock, or the type of shareholder

General Partnership	No	Yes	Easy	No	Depends on the partnership agreement	Management can be difficult
Limited Liability Partnership	No	No	Difficult	No	Depends on the partnership agreement	
Limited Partnership	No	Yes, for general partner No, for limited partners	Difficult	Yes (for limited partners), if partnership agreement permits	Yes	
Limited Liability Limited Partnership	No	No	Difficult	Yes (for limited partners), if partnership agreement permits	Yes	
Professional Corporation	Yes	No	Difficult	Shareholders must all be members of same profession	Yes, as long as it has shareholders	Complex tax issues
Joint Venture	No	Yes	Easy	No	No	Partnership for a limited purpose
Franchise	All these issues depend on the form of organization chosen by participants.					Established business. Name recognition. Management assistance. Loss of control. Fees may be high

MULTIPLE-CHOICE QUESTIONS

1. A sole proprietorship:

(a) Must file a tax return

(b) Requires no formal steps for its creation

(c) Must register with the Secretary of State

(d) May sell stock

(e) Provides limited liability to the owner

EXAM Strategy

2. CPA Question: Assuming all other requirements are met, a corporation may elect to be treated as an S corporation under the Internal Revenue Code if it has:

(a) Both common and preferred stockholders

(b) A partnership as a stockholder

(c) 100 or fewer stockholders

(d) The consent of a majority of the stockholders

Strategy: Review the list of requirements for an S corporation. (See the "Result" at the end of this section.)

3. A limited liability company:

(a) Is regulated by a well-established body of law

(b) Pays taxes on its income

(c) May issue stock options

(d) Must register with state authorities

(e) Protects the owners from personal liability for their own misdeeds

4. CPA QUESTION A joint venture is a(n):

(a) Association limited to no more than two persons in business for profit

(b) Enterprise of numerous co-owners in a nonprofit undertaking

(c) Corporate enterprise for a single undertaking of limited duration

(d) Association of persons engaged as co-owners in a single undertaking for profit

5. A limited liability partnership:

(a) Has ownership interests that cannot be transferred

(b) Protects the partners from liability for the debts of the partnership

(c) Must pay taxes on its income

(d) Requires no formal steps for its creation

(e) Permits a limited number of partners

2. Result: An S corporation can have only one class of stock. A partnership cannot be a stockholder, and all the shareholders must consent to S corporation status. C is the correct answer.

ESSAY QUESTIONS

EXAM Strategy

1. Question: Alan Dershowitz, a law professor famous for his wealthy clients (O. J. Simpson, among others), joined with other lawyers to open a kosher delicatessen, Maven's Court. Dershowitz met with greater success at the bar than in the kitchen—the deli failed after barely a year in business. One supplier sued for overdue bills. What form of organization would have been the best choice for Maven's Court?

Strategy: A sole proprietorship would not have worked because there was more than one owner. A partnership would have been a disaster because of unlimited liability. They could have met all the requirements of an S corporation or an LLC. (See the "Result" at the end of this section.)

EXAM Strategy

2. Question: Mrs. Meadows opened a biscuit shop called The Biscuit Bakery. The business was not incorporated. Whenever she ordered supplies, she was careful to sign the contract in the name of the business, not personally: The Biscuit Bakery by Daisy Meadows. Unfortunately, she had no money to pay her flour bill. When the vendor threatened to sue her, Mrs. Meadows told him that he could only sue the business because all the contracts were in the business's name. Will Mrs. Meadows lose her dough?

Strategy: The first step is to figure out what type of organization her business is. Then recall what liability protection that organization offers. (See the "Result" at the end of this section.)

3. **YOU BE THE JUDGE WRITING PROBLEM** Cellwave was a limited partnership that applied to the Federal Communications Commission (FCC) for a license to operate cellular telephone systems. After the FCC awarded the license, it discovered that, although all the limited partners had signed the limited partnership agreement, Cellwave had never filed its limited partnership certificate with the Secretary of State in Delaware. The FCC dismissed Cellwave's application on the grounds that the partnership did not exist when the application was filed. Did the FCC have the right to dismiss Cellwave's application? **Argument for Cellwave:** The limited partnership was effectively in existence as soon as the limited partners signed the agreement. The Secretary of State could not refuse to accept the certificate for filing; that was a mere formality. **Argument for the FCC:** When Cellwave applied for a license, it did not exist legally. Formalities matter.

4. Kristine bought a Rocky Mountain Chocolate Factory franchise. Her franchise agreement required her to purchase a cash register that cost $3,000, with an annual maintenance fee of $773. The agreement also provided that Rocky Mountain could change to a more expensive system. Within a few months after signing the agreement, Kristine learned that she would have to buy a new cash register that cost $20,000, with annual maintenance fees of $2,000. Does Kristine have to buy this new cash register? Did Rocky Mountain act in bad faith?

5. What is the difference between close corporations and S corporations?

1. Result: Maven's Court would have chosen an LLC or an S corporation.

2. Result: The Biscuit Bakery was a sole proprietorship. No matter how Mrs. Meadows signed the contracts, she is still personally liable for the debts of the business.

Discussion Questions

1. **ETHICS** Lee McNeely told Hardee's officials that he was interested in purchasing multiple restaurants in Arkansas. A Hardee's officer assured him that any of the company-owned stores in Arkansas would be available for purchase. However,

the company urged him to open a new store in Maumelle and sent him a letter estimating first-year sales at around $800,000. McNeely built the Maumelle restaurant, but gross sales the first year were only $508,000. When McNeely asked to buy an existing restaurant, a Hardee's officer refused, informing him that Hardee's rarely sold company-owned restaurants. The disclosure document contained no misstatements, but McNeely brought suit alleging fraud in the sale of the Maumelle franchise. Does McNeely have a valid claim against Hardee's? Apart from the legal issues, did Hardee's officers behave ethically? What Life Principles were they applying?

2. Leonard, an attorney, was negligent in his representation of Anthony. In settlement of Anthony's claim against him, Leonard signed a promissory note for $10,400 on behalf of his law firm, an LLC. When the law firm did not pay, Anthony filed suit against Leonard personally for payment of the note. Is a member personally liable for the debt of an LLC that was caused by his own negligence?

3. Think of a business concept that would be appropriate for each of the following: a sole proprietorship, a corporation, and a limited liability company.

4. As you will see in Chapter 33, Facebook began life as a corporation, not an LLC. Why did the founder, Mark Zuckerberg, make that decision?

5. Corporations developed to encourage investors to contribute the capital needed to create large-scale manufacturing enterprises. But LLCs are often start-ups or other small businesses. Why do their members deserve limited liability? And is it fair that LLCs do not have to pay income taxes?

CHAPTER 32

PARTNERSHIPS

Chase stood at the edge of a meadow near the top of the Porcupine Mountains in the Upper Peninsula of Michigan. The sun glistened off apple blossoms, birds called to each other, and the Lake of the Clouds stretched out to the horizon below. Chase had never been happier. As an architect, he believed in designing "green" houses that blended with nature. Sharing his vision, Danielle had hired him to create a house for this perfect location. The large budget would allow Chase to realize many of his architectural and environmental beliefs. But he needed help—a landscape designer and a decorator who could work with the spectacular setting and his splendid design.

Bailey and Chase began to suspect they were in trouble.

Bailey was Chase's choice for the interior design; she could create the sleek, warm look he sought using only natural products. With Zack's landscape plan, the house would appear to be a natural part of the site. At their first meeting, all three designers committed to the project and rapidly agreed to a deal: Chase would receive 50 percent of the profits, Bailey and Zack 25 percent each. All three would have veto rights over the work of the other two. As the meeting ended, Chase poured glasses of sparkling water. "Here's to our new partnership. We'll build the most beautiful and most environmentally responsible house in America," he said, rising to his feet. The three raised a toast to their success.

The honeymoon lasted only a few weeks. Chase wanted solar panels over the entire roof so that the house could be completely off grid, but Bailey thought the panels were ugly—she insisted on slate instead. When Bailey suggested consulting the owner, Chase blew up. "What do owners know?" he demanded. Zack sided with Bailey on that issue. But then both Chase and Bailey disagreed with Zack, who wanted to relocate the house to save some specimen trees. "Reduce solar efficiency to save a few ratty old trees?" Chase asked incredulously. Outvoted, Zack quit in disgust. Bailey and Chase began to suspect they were in trouble.

Their apprehension proved all too well founded. Outraged that her house was not finished on time, Danielle sued the three designers. When Chase protested that it was not *his*

fault Zack quit, Danielle snarled into the phone, "I don't know and I don't care whose fault it is. All I know is that my house isn't ready. I'll see you and your partners in court!" Meanwhile, Zack was last spotted recuperating on Bora Bora, far from the reach of the U.S. legal system.

The plight of this threesome illustrates common partnership problems. Although Chase, Bailey, and Zack never signed an agreement or filed a form, they nonetheless had formed a partnership. Not only did they refer to themselves as partners, but they intended to share profits and co-manage the business. The partnership is liable to Danielle for any damages the delay caused. If the partnership does not have enough assets to pay, each of the partners is personally liable—even if the delay was totally Zack's fault. When Zack left before finishing the project, he wrongfully dissociated from the partnership. Chase and Bailey must pay him the value of his share of the partnership, but they can subtract from that total any damages he caused. If the damages are more than the value of his partnership share, he owes them money. But his former partners must pay Danielle, whether or not they can actually recover from Zack in Bora Bora.

Introduction

Partnerships have two important advantages: they do not pay taxes and they are easy to form.[1] Many professionals, such as accountants and lawyers, traditionally favored this form of organization. Some of the rules can be complex, however, and, like any relationship, a partnership requires careful tending.

Traditionally, partnerships were regulated by common law, but a lack of consistency among the states became troublesome as interstate commerce grew. To solve this problem, the National Conference of Commissioners on Uniform State Laws proposed the Uniform Partnership Act (UPA) in 1914. Since then there have been several revisions, the most recent in 1997. More than two-thirds of the states have now passed the latest revision, so we base our discussion on that version of the law.

Although the UPA has made life easier, common law still plays an important role in regulating partnerships. To some degree, that is always true with statutes. No matter how well written they are, the courts are called upon to interpret some provisions. In addition, the UPA directs courts to apply common law to resolve any issue that it does not cover. Finally, many of the rules in the UPA are so-called **default rules**, meaning that they apply unless the partners reach a different agreement. When partners write their own rules, they must sometimes ask the courts to interpret ambiguous provisions.

Default rules
Rules that govern a partnership unless the partners agree otherwise.

Creating a Partnership

Some legal relationships are carefully delineated. By and large, people know whether or not they are married. Similarly, people usually know if they have formed a corporation. Partnerships are trickier, more like living together than getting married. It can be difficult to tell if a

[1]These issues are discussed at greater length in Chapter 31, on starting a business. Although the partnership itself does not pay taxes, each partner must pay taxes on his share of the partnership's profits.

live-in relationship—or a partnership—really exists. The UPA does not *require* partnerships to prepare a written agreement or make a formal filing. However, the UPA does *permit* a partnership to file a statement with the local Secretary of State that contains basic information about the partnership.[2]

Factors that Matter

How can you tell if you have a partnership? According to the UPA, **the association of two or more persons to carry on as co-owners a business for profit forms a partnership, whether or not the persons intend to form a partnership.**[3]

Note that a partnership is an association of two or more people. If only one person is involved in the business, it is a sole proprietorship, not a partnership.

What factors do the courts consider in determining whether a partnership exists?

- **Sharing profits.** No matter what their arrangement, if two people do not share the profits of their business, they are not partners. Period. However, just because they do share in the profits does not necessarily make them partners. In other words, sharing profits is a necessary but not sufficient condition for being partners.
- **Sharing losses.** Although landlords, employees, and even creditors may share in business profits, usually no one other than a partner is willing to sign on for a share of the losses. Sharing losses is strong evidence of a partnership.
- **Management of the business.** If participants are not involved in management, the courts will generally not consider them to be partners.
- **Oral or written agreement.** The law does not require a formal agreement, either written or oral. Nor is a formal agreement enough on its own to create a partnership. In a partnership, actions speak louder than words. If the people act like partners, then the law will treat them as such. If they do not act like partners, then nothing they say is enough, on its own, to create a partnership. Note, however, that in a close case, referring to yourselves as partners may help sway a court, but it is not enough *by itself* to create a partnership.
- **Charitable businesses.** Because charitable businesses do not technically make profits, they cannot be a partnership. When Aaron and Elijah agree to run the annual jamboree at their children's school, they expect to clear $35,000 after expenses, but they are not partners because their fund-raising has a charitable purpose.

Now let's apply these rules to real examples. Kevin and Brenda formed an electrical contracting business. The business did so well that Kevin's first wife, Cynthia, asked the court to increase his child support payments. Kevin argued that because he and Brenda were partners, he was entitled to only half of the business's profits. Therefore, his child support should not be increased.

Cynthia claimed that Kevin and Brenda were *not* partners because Kevin had reported all the income from the business on his personal tax return, while Brenda had reported none. Kevin had even put "sole proprietorship" in bold letters on the top of his return. No written partnership agreement existed. Kevin and Brenda never informed their accountant that they were a partnership. When Kevin answered interrogatories for Cynthia's lawsuit, he stated that he was sole owner and that Brenda worked for him. Nonetheless, the court held

---

[2]UPA §105.
[3]UPA §202(a).

that Brenda and Kevin were partners because Brenda helped manage the business and shared in its profits.[4]

In contrast, when Nancy Green borrowed money from Joseph DiFebo to make a down payment on four houses, they agreed that they were partners. Although Green bought the properties in her name alone, the two signed this document:

> Nancy R. Green and Joseph A. DiFebo are equal partners in the following Wilmington, Delaware, properties: 807 Pine Street, 427 East 3rd St., 611 East 7th Street, 613 East 7th Street.
>
> On the death of Nancy R. Green, her half-interest is left to her daughters, Kelly R. Green and Stacy R. Green. On the death of Joseph A. DiFebo, his half-interest is left to his daughters, Amy DiFebo and Beth Durham.
>
> If Nancy R. Green survives Joseph A. DiFebo, she makes all decisions on the above properties.

DiFebo did some repair work on the buildings but never asked Green for a share of the rentals. When the city condemned one of the properties, Green refused to give DiFebo half the proceeds. DiFebo testified that, in his mind, the money he transferred to Green established a partnership between them. Green testified that at no time did she consider their arrangement to be a partnership.

The court was less concerned about what the *agreement said* than how the *parties acted*. Although they had called themselves "equal partners," they did not share profits. DiFebo said he had not taken his share of the profits because he did not want his wife to find out about his arrangements (financial and otherwise) with Green. Ruling that their contract was a will, not a partnership agreement, the court denied DiFebo's claim.[5]

The following case illustrates the adage that a lawyer who represents himself has a fool for a client. Were they partners? You be the judge.

Nadel v. Starkman

2010 N.J. Super. Unpub. LEXIS 2542
Superior Court of New Jersey, Appellate Division, 2010

Facts: Morris Starkman hired Raymond Nadel just after he graduated from law school. At the beginning, Nadel was clearly an associate, not a partner, but after some years working together, the two men signed an agreement that changed their relationship—although to what is not clear. The agreement clarified many important issues (such as Nadel's vacation time), but it failed to resolve the most crucial question: was Nadel now a partner?

The agreement offered some hints to answering this question, but unfortunately the clues pointed in different directions. It stated that:

- The practice had "heretofore" been owned solely by Starkman;
- Nadel had an "interest in the firm";
- The firm would continue to be owned solely by Starkman, who had the right to make all management decisions;
- Starkman was the sole owner and Nadel was an independent contractor;
- Nadel would receive a percentage of the firm's net income, and he was guaranteed a minimum income each year;
- The firm would pay for Nadel's benefits, but not Starkman's.

Other relevant facts:

- The firm never filed a partnership tax return;

- Its checking accounts remained solely in Starkman's name and were entitled "Morris Starkman, Attorney at Law";
- Nadel never had authority to sign checks, and none of the checks bore his name;
- The firm's signage, letterhead, and advertisements all used the name Starkman & Nadel.

Later, Starkman decided that the firm should become a limited liability company (LLC). The agreement he prepared stated that he would own 99 percent to Nadel's 1 percent. It also stated that Nadel was an employee. Nadel refused to sign the agreement. At trial, Starkman testified that Nadel had refused to sign because he wanted a pension plan and a severance package. Nadel maintained that he had not been willing to give up his partnership interest.

The agreement had referred to the two men's "excellent relationship," but that did not last long. Starkman soon began looking for Nadel's replacement. (He waited to send the termination letter until Nadel was on vacation, which probably did not help their relationship.) Starkman formed a partnership with David Rochman, while Nadel filed suit, asking the court to determine the reasonable value of his ownership interest in the firm.

At trial, Rochman (who had since parted ways with Starkman) and others testified that Starkman had told them that Nadel was his partner and he owed the man a substantial buyout. The trial judge believed Nadel, while finding Starkman evasive and dishonest. She ruled that the two men had intended to form a partnership and had indeed done so. Starkman appealed.

You Be the Judge: ***Were Starkman and Nadel partners?***

Argument for Nadel: There was substantial evidence of a partnership, both in the agreement itself and in the two men's behavior. The agreement provided for the sharing of net profits, which is an important indicator of a partnership. Also, it implied Nadel was a partner when it referred to his "interest in the firm" and stated that the practice was "heretofore" owned solely by Starkman. As for the provision in the agreement that referred to Starkman as the sole owner, that simply meant that he was the managing partner. In any event, if the agreement was unclear, any ambiguity should be interpreted against Starkman because he is the one who drafted it.

As for behavior, the trial judge found that the parties *intended* to create a partnership and that Nadel refused to convert the business to an LLC because he would not give up his partnership interest. Starkman repeatedly referred to the business as a partnership and admitted to other people that he owed Nadel a substantial buyout.

Argument for Starkman: Both the agreement and the two men's behavior provide overwhelming evidence that there was *no* partnership. The agreement does not refer to itself as a partnership agreement. It clearly stated that Nadel was an independent contractor rather than a partner. The agreement did not grant Nadel the right to make management decisions. It did make provisions for his benefits and vacation time, but not Starkman's. These provisions indicated he was an employee, not a partner.

As for behavior, Nadel did not share in the firm's losses and the firm did not file a partnership tax return. (Presumably two lawyers would have known enough to file the appropriate tax return.)

Partnership by Estoppel

Raymond Nadel wanted to be Morris Starkman's partner so that he could share in the profits of the enterprise. *Partnership by estoppel* is concerned with the opposite situation—a person does not want to be considered a partner because he wishes to avoid the *liability* of the partnership. The twist is that partnership by estoppel applies in situations where the participants are *not*, in fact, partners but are held to be liable as if they were.

Partnership by estoppel applies if:

- **Participants tell other people that they are partners (even though they are not), or they allow other people to say, without contradiction, that they are partners;**
- **A third party relies on this assertion; and**
- **The third party suffers harm.**

Dr. William Martin was held liable under a theory of partnership by estoppel because he told a patient that he and Dr. John Maceluch were partners (although they were not); the

patient relied on this statement and made appointments to see Dr. Maceluch; and she was harmed by Dr. Maceluch's malpractice. He refused to come to the hospital when she was in labor, and as a result, her child was born with brain damage. Although Dr. Martin was out of the country at the time, he was also liable.[6]

Dr. Martin could have avoided this problem by being very careful *not* to refer to Dr. Maceluch as his partner. Presumably, he used the word "partner" to reassure the patient. Instead of "partner," he could have said "colleague," "associate," or "assistant." Dr. Martin should also have been careful to correct anyone who referred to Dr. Maceluch as his partner.

Note that even if the court determined that Raymond Nadel and Morris Starkman were *not* partners, Nadel could still be liable to a third party who had been harmed by the firm if Starkman had told that person that Nadel was a partner. In short, Nadel could end up with all of the downside but none of the upside of being a partner.

Relationship between Partners and Outsiders

Under the UPA, **the rules governing the liability of partners to outsiders are *mandatory*.** Partners may not change them. **In contrast, most of the rules governing the relationship *among* partners are *default* provisions**, meaning that the partners can change these rules if they desire.[7]

In the relationship between partners and outsiders, two questions arise: When is the partnership liable to outsiders? If the partnership is liable, who must pay the debt?

Liability of the Partnership to Outsiders

Under the UPA, **every partner is an agent of the partnership for the purpose of its business.**[8]

Authority

Partnership liability is based on the rules of agency law, discussed in Chapter 28. As an agent, a partner has three types of authority:

- **Actual authority.** A partnership is liable for any act of a partner that it authorized. Suppose Tamika and Daniel have formed the TD partnership to buy and sell used books. They decide that they would be willing to pay up to $100 for any first-edition *Harry Potter* books. When Daniel agrees to pay $75 to a customer who brings in such a book, the partnership is liable.
- **Implied authority.** A partnership is liable for any act of a partner that is reasonably necessary to carry out an authorized transaction. If Daniel spends $20 to take a taxi to meet a potential customer, the partnership must reimburse him.
- **Apparent authority.** A partnership is liable for an unauthorized act of a partner if the partner *appears* to be carrying on the business of the partnership or even business of the same type. Without Daniel's knowledge, Tamika promises to pay a large sum for Jane's record collection. Jane is a regular customer of the TD partnership and simply assumes that Tamika has authority to act. The TD partnership is liable because buying used records is the same kind of business as buying used books.

---

[6] *Haught v. Maceluch*, 681 F.2d 290, 1982 U.S. App. LEXIS 17123 (5th Cir. 1982).
[7] The exceptions are listed in UPA §103.
[8] UPA §301(1).

This issue frequently arises when a partnership breaks up but fails to notify customers. If Tamika and Daniel terminate their partnership but do not tell Jane, both of the former partners are liable on any deal Tamika enters into with Jane, as long as the transaction reasonably relates to the TD business.

Ratification

As with every agency relationship, partners can ratify unauthorized acts. **If the partnership accepts the benefit of the unauthorized transaction or fails to repudiate it, the partnership has ratified it.** Once ratified, these actions are as valid as if they had been authorized from the beginning. Thus, Daniel exceeds his authority when he offers Matthew $1,000 for any Stephen King first edition. Tamika is outraged, but she never tells Matthew that the deal is no good. After scouring the city, Matthew finds a first edition of *Misery*. The partnership must pay for the book, no matter how miserable it makes Tamika.

Information

As agent, a partner has a duty to pass on all relevant information to the partnership. Whether or not a partner actually fulfills this obligation, the partnership is treated as if it had been notified. Under the UPA, **whatever one partner knows, the partnership is deemed to know**. Under the terms of TD's storefront lease, the landlord must give 90 days' notice if he does not want to renew. He gives notice to Tamika, who forgets to tell Daniel. The notice is nonetheless valid, and the landlord has every right to evict the partnership. If someone is going to suffer harm because of Tamika's mistake, in all fairness, it should be the partnership, which had the bad judgment to take on an unreliable partner.

Tort Liability

A partnership is responsible for the *intentional* and *negligent* torts of a partner that occur *in the ordinary course* of the partnership's business or with the *actual* authority of the partners. When Daniel tells a customer that a book is a valuable, first-edition Tom Clancy when it really is a worthless Book of the Month Club edition, the partnership is liable for this intentional misrepresentation because it occurred in the ordinary course of the partnership's business. But if Daniel gets in a fight at a bar on Saturday night, the partnership is not liable because that had nothing to do with the partnership's business.

Paying the Debts of the Partnership

The basic rule of partnership liability is simply stated: **all partners are personally liable for all debts of the partnership**. All of a partner's assets are at risk. This rule applies whether or not the individual partner was in any way responsible for the debts. Thus, for example, when the accounting firm Laventhol & Horwath went bankrupt, the partners were personally liable, and some had to sell their houses to pay the partnership's debts.

Joint and Several Liability

Partners have *joint and several* liability for partnership obligations. Joint and several liability means that a creditor can sue the partnership and the partners together, or in separate lawsuits, or in any combination. The partnership and the partners are all individually liable for the full amount of the debt, but obviously the creditor cannot keep collecting after he has already received the total amount owed. **Also note that, even if creditors have a judgment against an individual partner, they cannot go after that partner's assets until all the partnership's assets are exhausted.**[9]

[9]UPA §307.

Letitia, one of the world's wealthiest people, enters into a partnership with penniless Harry to drill for oil on her land. While driving on partnership business, Harry crashes into Gus, seriously injuring him. Gus can sue any combination of the partnership, Letitia, and Harry for the full amount, even though Letitia was 2,000 miles away on her Caribbean island when the accident occurred and she had many times cautioned Harry to drive carefully. Even if Gus obtains a judgment against Letitia, however, he cannot recover against her while the partnership still has assets. So, for all practical purposes, he must try to collect first against the partnership. If the partnership is bankrupt and he manages to collect the full amount from Letitia, he cannot then try to recover against Harry. (As we will see in a minute, Letitia may be able to recover from Harry some portion of what she paid Gus.)

Letitia is not wild about Harry's behavior, so she insists that he agree in writing to share all liabilities of the partnership 50/50. Unfortunately for Letitia, the liability rule is *mandatory*, not a default provision, so her agreement with Harry has absolutely no impact on the rights of Gus or any other creditor. He can still recover from Letitia for all debts of the partnership. She can always try to recover from Harry, but he is penniless, so good luck.

Liability of Incoming Partners

A partner is personally liable only for obligations the partnership incurred while he was a partner. His liability for debts incurred before he became partner is limited to his investment in the partnership.[10] Does this rule make sense? Why should an incoming partner be liable in any way for debts the partnership incurred before he became a partner? These issues haunted the investment bank Goldman Sachs when the Englishman Robert Maxwell drowned. Long known as an international wheeler-dealer, Maxwell stole money from his companies' pension plans to pay for the purchase of newspapers and publishing houses around the world. He drowned after falling—or jumping—over the side of his yacht late one evening. After his death, investigators discovered that more than $1 billion was missing from his various enterprises. The looted pension plans sued Goldman, which settled the lawsuits for $250 million. That was the simple part. The more complicated issue was how to divide this liability among the Goldman partners. Current partners argued that the liability should be borne by those who were Goldman partners when the Maxwell transactions occurred. But the ex-partners balked at having to pay as much as $4 million apiece for a settlement they had not agreed to or even had a chance to vote on.

He drowned after falling—or jumping—over the side of his yacht late one evening.

In a sense, the UPA supports both of these positions. Goldman's ex-partners were personally liable for debts incurred while they were members of the firm. However, current partners were also liable, up to the amount of their investment in the partnership, for debts incurred even before they joined.

EXAM Strategy

Question: Mark and Shania are students who also have a business on the side selling baskets of fruit and vegetables that are cut to look like flowers. They advertise that all ingredients are organic. One day, Mark is in a hurry, and instead of driving across town to the organic food co-op, he purchases ingredients from the closest grocery

[10] UPA §306.

store, Unsafeway. Hannibal has a chemical allergy, so when he eats fruit from Mark's basket, he becomes ill. He sues Mark and Shania and is awarded $10,000 in damages. Is Shania personally liable?

Strategy: First decide if Mark and Shania have a partnership. If so, is the partnership liable for Mark's actions? Is Shania liable for the debts of the partnership that were incurred by Mark?

Result: Although Mark and Shania are students, they also run a business for profit and therefore, are partners for purposes of that business. The partnership is liable for Mark's actions because he was authorized to act. Hannibal must first try to recover the judgment from the partnership. Only if the partnership has no assets can he recover from Mark or Shania individually. At that point, Hannibal has the right to recover from Shania, even though she personally did nothing wrong.

Relationship Among Partners

The rules governing the relationship between partners and outsiders are mandatory; the partners cannot change them. In contrast, the rules regulating the relationship among partners are more flexible—the partners can alter many of them by agreement. If these rules can be changed, why are they in the UPA at all? Partnerships are often formed casually. Sometimes the partners themselves do not even realize they have a partnership. In situations such as these, the default rules apply. Also, some partnerships may not want to undertake the effort and expense of preparing their own agreement. For them, the off-the-rack rules work well enough, and they do not need a custom-tailored version.

Financial Rights

Sharing Profits

Partners share profits equally unless they agree otherwise. This basic rule applies no matter how much money, time, or effort an individual partner contributes to the partnership. After graduation, Dawn convinces her friends, Niels and Sonya, to return with her to Jackson, Mississippi, to open a coffee bar. Niels and Sonya each contribute $15,000. Dawn has nothing to contribute financially. But she does know Jackson. When Dawn's Coffee Bar opens for business, she attracts sellout crowds. Meanwhile, Niels and Sonya are working 20-hour days, first renovating the building and then serving customers. Dawn rarely sees the dawn, or even noon. Niels and Sonya have contributed more time and money and may have done more for the bar's success, but they must share profits equally with Dawn unless the three agreed otherwise.

© kgelati/Shutterstock.com

What is Dawn's share of the profits?

Sharing Losses

Partners share losses according to their share of profits unless they agree otherwise. If Dawn's Coffee Bar fizzles after the first few months of success, then Dawn is responsible for one-third of the losses because she received one-third of the profits. It is too late for her to argue that it was not her fault the business failed.

Payment for Work Done

Partners are not entitled to any payment beyond their share of profits unless they agree otherwise. Niels and Sonya have no right to a greater share of the profits in return for their extra work. It is simply too difficult for the courts to evaluate each partner's contributions. ("Sonya didn't get to work until 9:15." "That's not true, I was there at 8:45, but you didn't see me because I was out back washing your dirty dishes....") This rule may seem arbitrary, but at least it is easy to enforce. The only exception, which we will see later, is that partners are entitled to remuneration for services performed in winding up the partnership.

In the following case, the father made a number of mistakes—he died without a will and left his business without a written partnership agreement. The result was the last thing he would ever have wanted: all-out war among his children.

BANKER V. ESTATE OF BANKER

911 N.Y.S.2d 691; 2010 N.Y. Misc. LEXIS 1145
Supreme Court of New York, Delaware County, 2010

Facts: Father Banker owned Peaceful Valley Campground (which more accurately should have been called Angry Family Battleground). Peaceful Valley (PV) operated as both a campground, with cabins and an RV site. When Father Banker died without a will, each of his four sons inherited roughly 10 percent, while his widow got the rest. One son, Arnold, bought out his mother's share, so he owned roughly two-thirds.

Because the four brothers had made no other arrangement, PV operated as a partnership. Arnold was the only brother who worked in the business. He lived year-round in a house on the campground, where he was on call 24 hours a day during the seven-month camping season. He dealt with routine camp business (including reservations and maintenance), as well as emergencies. Off-season, he made repairs and did office work.

The partnership paid Arnold a salary of about $25,000 a year. It also paid his live-in girlfriend, Linda Romeo, about $10,000 a year for office work and cleaning. In addition, PV paid some of Arnold's personal expenses. The other brothers had not agreed to these payments.

The brothers objected to payments from PV to Arnold, alleging that, as a partner, Arnold had no right to payment for the work he performed.

Issue: ***Was Arnold entitled to any payment in addition to his share of partnership profits?***

Excerpts from Justice Peckham's Decision: The personal expenses of Arnold alleged to have been paid from the partnership include meals and lodging, a truck, furniture and fixtures, and sunglasses. The meals and lodging were trips related to campground business. The furniture and fixtures were actually two additional cabins for the campground. The truck was purchased for use at the campground hauling materials and supplies and also canoes the camp rents out. The sunglasses were for Arnold's use working around the camp. [T]he objection to these expenses is denied.

There is no written partnership agreement and no proof was introduced that the partners ever agreed to Arnold's salary. [W]hen there is no written partnership agreement, the New York Partnership Law effectively becomes the partnership agreement. Under the Partnership Law of New York, consent by all the partners was needed [for a partner to receive] compensation for services rendered to the partnership. No such consent was given by the three minority partners in the Peaceful Valley partnership. No consent having been given, the payment of a salary violated the partnership agreement and the law and must be refunded.

The work Ms. Romeo performed is the same type of work done by Arnold and could have been done by him. The other partners did not agree to hire Ms. Romeo, nor to the payments made to her. [Arnold must repay these amounts.]

Partnership Property

All partnership property belongs to the partnership as a whole, not to the individual partners. A partner has no right to use or sell property except for the benefit of the partnership. Suppose that the partnership owns the building that houses their coffee bar. Upstairs, above

the bar, are three apartments. "Wow! This is great," says Niels, "I get the front unit." Does Niels have the right to live in one of the three apartments? After all, Dawn and Sonya can have the other two. Although the arrangement sounds fair, in fact, Niels has no right to live there unless the other partners agree.

Right to Transfer a Partnership Interest

A partnership is a personal relationship built on trust. Therefore, a partner can no more sell his partnership share to a stranger than a spouse can come home one night and announce, "I'm leaving the marriage but, don't worry, I've found a substitute." **Without the approval of the other partners, a partner cannot sell her share; she can only transfer her right to receive profits and losses. A new partner can only be admitted to a partnership by unanimous consent of the other partners.**[11] It would be unfair to force partners to work with, or face unlimited liability for, someone they do not consider trustworthy. Sonya gets in serious debt to a fellow gambler, Nathan Detroit. Fearful that Nathan will ruin her manicure if she does not pay her debt, she agrees to give him her share of the partnership, which is her only asset. He knows a lot about coffee, and she is sure he will do fine as a partner. Although Niels and Dawn feel sorry for Sonya's predicament, they refuse to admit Nathan as a partner. Without their permission, Sonya has no right to transfer ownership rights or management authority to Nathan. Niels and Dawn cannot be forced to work with someone they do not want to touch with a 10-foot pole. However, Sonya can transfer to Nathan the right to receive her share of the partnership's profits.

What if Sonya refuses to assign to Nathan her right to receive profits from the partnership? **Creditors can attach partnership profits through a charging order.** A **charging order** is simply a court order granting a third party the right to receive a share of partnership profits.

Similar rules apply when a partner dies. A partner's heirs have no right to specific partnership property; they do not become partners themselves, nor do they have any say in partnership management. They do have a right to receive the value of a partnership share. In large, sophisticated partnerships, the partnership agreement will usually short-circuit arguments by establishing in advance how to calculate the value of a share.

Management Rights

Right to Manage

Each and every partner has equal rights in the management and conduct of the business unless the partners agree otherwise. In a large partnership, with hundreds of partners, too many cooks can definitely spoil the firm's profitability. That is why large partnerships are almost always run by one or a few partners who are designated as managing partners or members of the executive committee. Some firms are run almost dictatorially by the "rainmaker"—the partner who brings in the most business. Nonetheless, even in an autocratic firm, the atmosphere tends to be less hierarchical than in a corporation, where employees are accustomed to the concept of having a boss. Whatever the reality, partners by and large like to think of themselves as being the equal of every other partner.

Right to Bind the Partnership

As we have discussed, partners are agents of the partnership and have the power to bind the partnership through actual, implied, or apparent authority. The partnership is liable to third parties for a partner's actions. **If these actions are not authorized by the partnership, the partner still has the *power* to bind the partnership, but not the *right*.** In this case, the partnership is liable to the third party, and the partner is liable to the partnership. If the

[11] UPA §401(i).

partner has both the *power* and the *right*, he is not personally liable to the partnership no matter how harmful his actions.

A partner is authorized to bind the partnership for any transaction within the ordinary course of its business unless the partner knows that the other partners would disapprove. Dawn decides she would rather buy coffee from Hadley than from the regular supplier in New York. She has the authority to switch suppliers unless she knows that Sonya and Niels would object because Hadley's coffee is not free trade. If Dawn signs a contract with Hadley, knowing that her partners disapprove, the partnership is liable to Hadley, but Dawn is liable to the partnership.

Right to Vote

Unless the partners agree otherwise, all partners have an equal vote, regardless of their contributions to the partnership. For ordinary partnership affairs, the majority has the right to make a decision. To amend the partnership agreement or to make decisions outside the ordinary course of business, the vote must be unanimous. What happens when Dawn wants to introduce organic teas, over Niels's dead body? The partners vote. Since this is an ordinary partnership matter, the majority rules. If Dawn can get Sonya on her side, she will win approval for the healthy teas. It makes no difference that Dawn never contributed any cash to the partnership; she has the right to vote.

This is the default rule, but many partnerships change it by agreement. Accounting and law firms, for instance, often award partners a certain number of points each year based on how much business they bring in or how hard they work. The more points, the higher their compensation and the more their votes count. Some firms, run by a particularly powerful partner, may effectively have only one vote—his. The managing partner of a large law firm once said, "This partnership has a one-man, one-vote rule, and I'm the one man."

Right to Know

It is difficult to manage an enterprise without adequate information. **Therefore, the UPA grants each partner the right to inspect and copy the partnership's books and records.** This right is unconditional and does not depend upon the partner's purpose or motive. However, books and records are not enough, by themselves, to keep a partner fully informed. Therefore, the UPA requires all partners and the partnership to volunteer any information that might reasonably be necessary for other partners to exercise their rights. All partners and the partnership also have a duty to supply any other information that a partner reasonably requests. These rules are mandatory; the partners may not change them by agreement among themselves.

Management Duties

Partners have the right to manage the partnership. In addition, they also have duties to the partnership and the other partners. These duties are mandatory; the partners may not waive them.

Duties of Care

Partners are liable to the partnership for gross negligence, reckless conduct, intentional misconduct, or a knowing violation of the law. Partners are not liable for ordinary negligence.[12] As you remember from earlier in this chapter, a partnership is liable for the intentional and negligent torts of a partner that occur in the ordinary course of business. But, as you have just learned, the partner is not liable to the partnership for ordinary negligence. These two rules intersect in the following case.

[12]UPA §404.

Moren v. Jax Restaurant

679 N.W.2d 165, 2004 Minn. App. LEXIS 459
Court of Appeals of Minnesota, 2004

Facts: Jax was a pizza restaurant in Foley, Minnesota, owned by two sisters: Nicole Moren and Amy Benedetti. They operated it as a partnership. One afternoon, Moren ended her regular shift at 4:00 p.m. and left to pick up her two-year-old son, Remington, from day care. When her sister called her to say that one of the cooks had not come to work, Moren returned to the restaurant with Remington. Moren's husband said he would pick the child up in about 20 minutes.

Because Moren did not want Remington running around the restaurant, she brought him into the kitchen with her, set him on top of the counter, and began rolling out pizza dough using the dough-pressing machine. As she was making pizzas, Remington reached his hand into the dough press. His hand was crushed, causing permanent injuries. His father brought suit on Remington's behalf against the partnership for negligence. The partnership, in its turn, sued Moren, arguing that she had to reimburse the partnership for any payments to Remington. The district court granted summary judgment to Moren. The restaurant appealed.

Issue: ***Is Moren liable to the partnership for her own negligence?***

Excerpts from Judge Crippen's Decision: The partnership [argues] that its obligation to compensate Remington is diminished in proportion to the predominating negligence of Moren as a mother, although it is responsible for her conduct as a business owner. Under Minnesota's Uniform Partnership Act of 1994 (UPA), a partnership is liable for loss or injury caused to a person as a result of a wrongful act or omission, or other actionable conduct, of a partner acting in the ordinary course of business of the partnership or with authority of the partnership. [Moreover], a partnership [must] indemnify a partner for liabilities incurred by the partner in the ordinary course of the business of the partnership. Thus, under the plain language of the UPA, a partner has a right to indemnity from the partnership, but the partnership's claim of indemnity from a partner is not authorized or required.

The district court correctly concluded that Nicole Moren's conduct was in the ordinary course of business of the partnership and, as a result, indemnity by the partner to the partnership was inappropriate. It is undisputed that one of the cooks scheduled to work that evening did not come in, and that Moren's partner asked her to help in the kitchen. It also is undisputed that Moren was making pizzas for the partnership when her son was injured. Because her conduct at the time of the injury was in the ordinary course of business of the partnership, under the UPA, her conduct bound the partnership and it owes indemnity to her for her negligence.

[The restaurant] also claims that because Nicole Moren's action of bringing Remington into the kitchen was partly motivated by personal reasons, her conduct was outside the ordinary course of business. Even if the predominant motive of the partner was to benefit himself or third persons, such does not prevent the concurrent business purpose from being within the scope of the partnership. [W]e conclude that the conduct of Nicole Moren was no less in the ordinary course of business because it also served personal purposes. It is undisputed that Moren was acting for the benefit of the partnership by making pizzas when her son was injured, and even though she was simultaneously acting in her role as a mother, her conduct remained in the ordinary course of the partnership business.

Affirmed.

Duty of Loyalty

Partners have a limited fiduciary duty to their partnership.

Competing with the Partnership. **Each partner must turn over to the partnership all earnings from any activity that is related to the partnership's business.** Cara, Max, and Brooke are partners in a Beverly Hills law firm. While Cara is vacationing near Santa Fe, a guest in the next-door hacienda is arrested in the middle of the night for drunk driving. Cara goes down to the police station and persuades the police officer to release the guest. Her new client gratefully insists on paying her $5,000 for her efforts. Cara figures the fee will go

a long way toward paying the cost of her vacation. Cara figures wrong. She must turn the fee over to the partnership because she earned it doing the kind of work that the partnership does. It is irrelevant that she was on vacation.

Taking a Business Opportunity. **A partner may not take an opportunity away from the partnership unless the other partners consent.** Suppose that Beverly Hills needs a lawyer to serve as city counsel and offers the post to Max. He cannot take the job himself without the firm's permission. If he violates this duty, the partnership is entitled to the value of the opportunity he has taken.

Using Partnership Property. **A partner must turn over to the partnership any profit he earns from use of partnership property without the consent of the partners.** The partnership's office is in an old, beautifully restored historic building. Max runs a party-planning service on the side—MAXimum Fun. He occasionally holds parties on the weekends in the partnership's elegant foyer without telling Brooke and Cara. When they find out, they are maximum angry, and for good reason—Max has violated his duty to the partnership.

© Corbis Bridge / Alamy

Does Max get to keep the profit from these parties?

Conflict of Interest. **A partner has a conflict of interest whenever the partnership does business with him, a member of his family, or a business partly or fully owned by him. In that case, the partner must turn all profits over to the partnership.** Suppose that Max hires MAXimum Fun to put on the firm's 10th-anniversary celebration. Unless the other partners consent in advance, Max must turn over to the partnership any profits he earns from the party.

In the following case, one partner bought partnership property at a public auction. Is that a conflict of interest?

MARSH V. GENTRY

642 S.W.2d 574, 1982 Ky. LEXIS 315
Supreme Court of Kentucky, 1982

Facts: Tom Gentry and John Marsh were partners in a business that bought and sold racehorses. The partnership paid $155,000 for Champagne Woman, who subsequently had a foal named Excitable Lady. The partners decided to sell Champagne Woman at the annual Keeneland auction, the world's premier thoroughbred horse auction. On the day of the auction, Gentry decided to bid on the horse personally, without telling Marsh. Gentry bought Champagne Woman for $135,000. Later, he told Marsh that someone from California had approached him about buying Excitable Lady. Marsh agreed to the sale. Although he repeatedly asked Gentry the name of the purchaser, Gentry refused to tell him. Not until 11 months later, when Excitable Lady won a race at Churchill Downs, did Marsh learn that Gentry had been the purchaser. Marsh became the Excitable Man.

Issue: ***Did Gentry violate his fiduciary duty when he bought partnership property without telling his partner?***

Excerpts from Justice O'Hara's Decision: Admittedly, at an auction sale, the specific identity of a purchaser cannot be ascertained before the sale, but [Kentucky partnership law] required a full disclosure by Gentry to Marsh that he would be a prospective purchaser.

As to the private sale of Excitable Lady, Marsh consented to a sale from the partnership, at a specified price, to the prospective purchaser in California. Even though Marsh obtained the stipulated purchase price, a partner

has an absolute right to know when his partner is the purchaser. Partners scrutinize buyouts by their partners in an entirely different light than an ordinary third party sale. This distinction is vividly made without contradiction when Marsh later indicated that he would not have consented to either sale had he known that Gentry was the purchaser. Under these facts, it is obvious that Gentry failed to disclose all that he knew concerning the sales, including his desire to purchase partnership property.

[P]artners, in their relations with other partners, [must] maintain a higher degree of good faith due to the partnership agreement. The requirement of full disclosure among partners as to partnership business cannot be escaped.

Finally, Gentry maintains that it is an accepted practice at auction sales of thoroughbreds for one partner to secretly bid on partnership stock to accomplish a buyout. We would emphatically state, however, for the benefit of those engaged in such practices, that where an "accepted business practice" conflicts with existing law, the law, whether statutory or court ordered, is controlling. To hold otherwise would be chaotic.

Good Faith and Fair Dealing

Partners have an obligation of good faith and fair dealing to each other and to the partnership. They must deal with each other *fairly* and *without coercion*. Behavior that would be acceptable in an arm's-length transaction may be unacceptable between partners. Hartz Mountain Industries, Inc., was the managing partner of a real estate business in northern New Jersey. Eugene Heller was Hartz's partner. According to the partnership agreement, when Heller left the partnership, Hartz would have the properties appraised and buy Heller's share. Hartz had the right to choose the appraiser. Over Heller's objection, Hartz chose Robert DiFalco. Hartz's own internal appraisals valued the properties at more than $214 million, but DiFalco produced an appraisal of $133 million—a slight discrepancy of more than $80 million.

The court found that, while Hartz had technically complied with the partnership agreement, it had breached its obligation of good faith and fair dealing. Courts generally pay a great deal of respect to appraisals, especially when both parties have agreed in advance to the appraisal process. But the court did not accept the appraisal in this case because Hartz had violated its duty to Heller by choosing such an unreliable appraiser.[13]

EXAM Strategy

Question: Tom is a bully. He and Penelope start a test prep business. The partnership agreement specifies that Penelope is entitled to 30 percent of the profits, but that Tom is the managing partner with the right to run the day-to-day affairs of the business. Because students love Penelope's gentle demeanor, the business flourishes. A large university offers the partnership a contract to provide test prep services to all of its students. Tom decides to take that business himself without telling Penelope. He also reduces her income from the partnership. She asks for data on the partnership's profitability, but Tom refuses to give it to her. He also moves the business into a shabbier, cheaper building that Penelope hates. What rights does Penelope have?

[13] *Heller v. Hartz Mountain Industries, Inc.*, 270 N.J. Super. 143, 636 A.2d 599, 1993 N.J. Super. LEXIS 903 (N.J. Super. Ct. Law Div. 1993).

Strategy: The partnership agreement determines most of the rights between partners, but some rights are mandatory and cannot be changed by the partners.

Result: Tom does have the right to move the partnership into a different building, but he cannot take the opportunity to provide services to the university without telling Penelope. She is entitled to see the books and records of the partnership.

Terminating a Partnership

Partnership at will
A partnership with no fixed duration. Any of the partners may leave at any time, for any reason.

Term partnership
A partnership in which the partners agree in advance how long it will last.

The rules on termination depend, in part, on the type of partnership. If the partners have not agreed how long their partnership will last, they have a **partnership at will**, and any of them may leave at any time, for any reason. Taylor, Jay, and Gabriela are partners in the Donut Partnership, which owns a racehorse by the name of Speedy Donut. They see their business as a lark, to last as long as they are having fun, so they make no decision about its duration. When Taylor decamps after only two months, leaving Jay and Gabriela holding the feedbag, they have no legal right to complain.

With a **term partnership**, the partners have agreed in advance how long it will last. At the end of the specified term, the partnership automatically ends. If Taylor, Jay, and Gabriela agree to sell Speedy Donut and end their business relationship in five years, or if they agree the partnership will end when Speedy Donut runs in the Kentucky Derby, they have a term partnership.

Dissociation

Dissociation
When a partner leaves the partnership.

A partnership begins with an association of two or more people. Appropriately, the end of a partnership begins with a *dissociation*. A **dissociation** occurs when a partner quits. However, a dissociation does not inevitably lead to the termination of the partnership business. A dissociation is a fork in the road: **when one or more partners dissociate, the partnership can either buy out the departing partner(s) and continue in business or wind up the business and terminate the partnership**. Exhibit 32.1 illustrates the dissociation process under the UPA.

Rightful versus Wrongful Dissociation

A partnership is a personal relationship built on trust. As we have seen, all partners are agents for the partnership, and each partner is personally liable for its debts. The actions of one partner can profoundly affect the financial health of every other partner. Under these circumstances, courts will not force someone to remain in a partnership, no matter what the partnership agreement says, any more than they will force a couple to stay married because of their vows at the altar. Partners can always dissociate, but like any divorcing spouse, they may have to pay damages for the harm that their departure causes. As courts are wont to say: **a partner always has the power to leave a partnership but may not have the right**.

Rightful Dissociation. A rightful dissociation occurs if:

- *A partner in a partnership at will serves notice that he intends to withdraw.*
- *The partners agree in advance on an event that causes dissociation.* Jay plans to attend business school in three years, so the partnership agreement provides that he will be automatically dissociated from the partnership at that point.

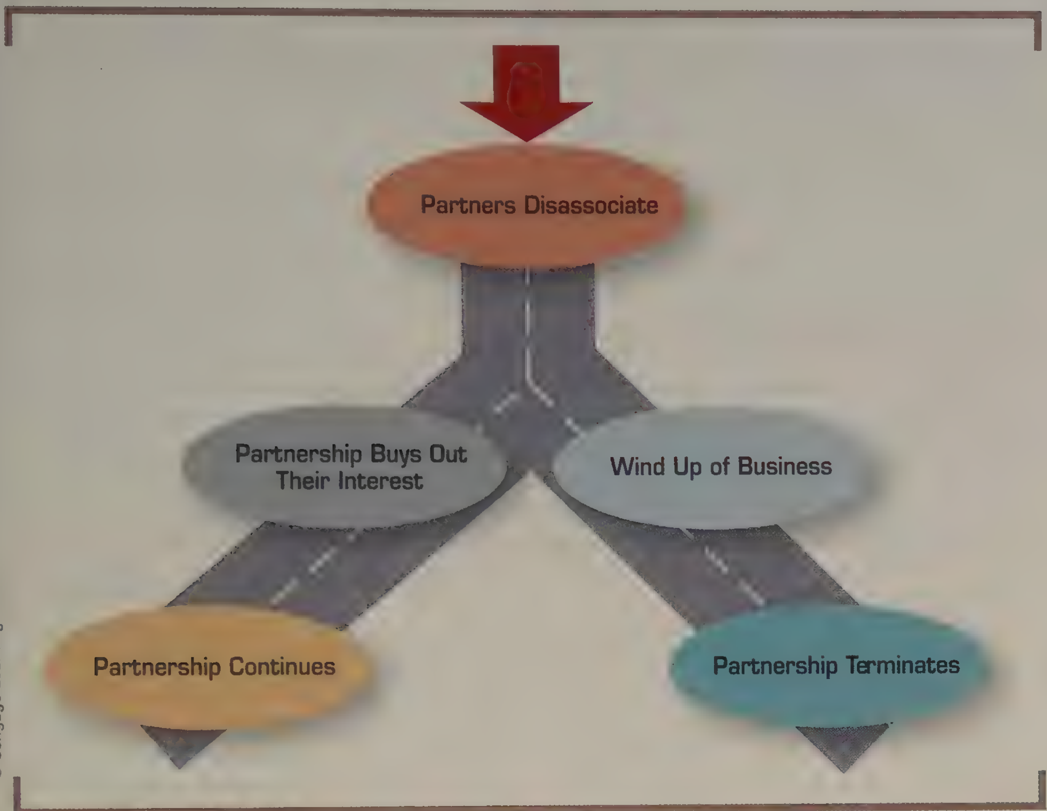

EXHIBIT 32.1

- *A partner dies or becomes incompetent.*
- *A partner is expelled by the other partners.* Partnership agreements can establish a process for expelling a partner. Often, under such agreements, the partnership does not even have to give a reason for expulsion. If a certain percentage of the partners (say, 75 percent) vote against someone, she is out. However, in the absence of such a provision in the partnership agreement, the UPA permits the expulsion of a partner only if (1) it is illegal to carry on the business with her or (2) she has transferred her partnership interest.

Even lawyers sometimes forget the law. The prestigious law firm of Cadwalader, Wickersham, & Taft fired a partner in its New York office. However, the partnership agreement said nothing about expulsion. A court upheld the firing but awarded the former partner $3 million in damages. In short, the law firm had the power, but not the right, to expel a partner. Unlike employees of a corporation, partners cannot be fired unless their partnership agreement specifically allows for it.

Wrongful Dissociation. A wrongful dissociation occurs if:

- *A partner violates the partnership agreement.* The Donut Partnership agreement prohibits racetrack betting. When Taylor wins the Pick Six, he is automatically dissociated.
- *A partner in a term partnership withdraws before the end of the term.* The Donut Partnership is supposed to last five years, but Jay withdraws after five months.
- *A court expels a partner in a term partnership because her behavior is harmful.* A court has the right to expel a partner who engages in wrongful conduct that harms the

partnership or violates the partnership agreement in a serious way. Gabriela drugs the favored Speedy Donut so that she can win a bet on a long shot in the race. A court could expel her, and that would constitute a wrongful dissociation.

- *A partner in a term partnership becomes bankrupt.*

Once a partner is dissociated, the remaining partners must decide how to proceed; they can either continue the partnership as an ongoing business or terminate it.

EXAM Strategy

Question: In their spare time, Maisy and Roland like to build widgets for Facebook.com. (Widgets are software applications that permit Facebook users to do cool things like post bumper stickers on their pages.) Under Facebook rules, Maisy and Roland are paid a small fee each time someone uses one of their applications. After this sideline becomes quite profitable, Maisy tells Roland that she is going to start building widgets on her own without him—she thinks she is more creative than Roland. Does Maisy have the right to exclude Roland?

Strategy: There are three questions to answer: Is there a partnership? If so, what kind of partnership? Does Maisy have the right to withdraw from it?

Result: Maisy and Roland do have a partnership—they are carrying on as co-owners of a business for profit. It does not matter that the word "partnership" has never passed their lips. Because there is no partnership agreement, they have a partnership at will. With this form of partnership, Maisy can withdraw at any time for any reason.

Continuation of the Partnership Business

If a partner is dissociated from the partnership, the other partners can continue the business, but they must buy out the ex-partner.[14] Most large firms provide in their partnership agreement that, upon dissociation, the business continues.

Financial Settlement

If the partnership decides to continue, it must pay the ex-partner the value of her share of the business. This value is equal to her share of the proceeds if (1) the partnership were sold as an ongoing business or (2) the partnership's assets were liquidated, whichever calculation is greater. For example, if Gabriela is adjudged incompetent by a court, she is automatically dissociated from the Donut Partnership. At that point, Speedy Donut is worth $500,000 and the partnership has debts of $50,000, for a total value of $450,000. Gabriela is entitled to at least a one-third share—$150,000. If, however, the partnership is worth $600,000 as an ongoing business, Gabriela is entitled to $200,000.

Now the plot thickens. If Gabriela's dissociation was *wrongful,* the partnership can subtract any damages she caused from the amount it owes her. A court expels Gabriela

[14] If the ex-partner's dissociation was rightful, she can vote in this decision. If her dissociation was wrongful, she has no right to vote.

from the partnership because she drugged Speedy Donut. His recovery is slow and he is unable to race for months, costing the partnership $100,000. Taylor and Jay could subtract that $100,000 from the $200,000 they owe her, so she ultimately receives a check for only $100,000. If her bad acts caused more than $200,000 in damage, she owes them money.

Liability of the Dissociated Partner to Outsiders for Debts Incurred *before* Dissociation

A dissociated partner is liable to outsiders for debts incurred during her term as a partner, but the partnership must indemnify her for these debts. After Gabriela departs, a bank sues the partnership for failure to repay its loan. Although Gabriela is no longer a partner, she was one when the partnership borrowed the money. As we have seen, the bank may be able to recover from her. If it does, however, the partnership must indemnify her, that is, the partnership must reimburse her for any amounts she pays the bank. This outcome is only fair because, when the partnership purchased her share, it reduced the payment to reflect liabilities such as this.

Liability of the Dissociated Partner to Outsiders for Debts Incurred *after* Dissociation

A dissociated partner is liable to outsiders for the debts of the partnership incurred within two years after she leaves, but only if the creditor reasonably believes she is still a partner. The partnership must indemnify her for these debts. If Taylor and Jay buy an expensive saddle on credit from their regular supplier, Gabriela is also liable unless the saddler knows she is dissociated. The partnership would have to reimburse her (if it has enough funds). To protect herself, however, Gabriela can file a statement of dissociation with the Secretary of State. Although the saddler rarely spends his free afternoons perusing the public records, he is deemed to have notice of this filing 90 days after Gabriela makes it.

Liability of the Dissociated Partner to the Partnership

If the ex-partner harms the partnership after she leaves, she is liable for the damage she causes. If Gabriela lets a feed supplier believe that she is still a partner and then buys feed on credit, the partnership may be liable for her charges. If so, she must reimburse the partnership.

Termination of the Partnership Business

When a partner is dissociated, the partnership may choose to terminate the business rather than continue it. **Ending a partnership business involves three steps: dissolution, winding up, and termination.**

Dissolution

Unless the partners agree otherwise, a partnership dissolves under the following circumstances:

- *In a partnership at will, when a partner notifies the partnership that he intends to withdraw and the remaining partners cannot agree unanimously to continue the business.*
- *In a term partnership, when:*
  - *A partner is dissociated before the end of the term and half of the remaining partners vote to wind up the partnership business.* When Jay dies, he is dissociated from the partnership. If Gabriela votes to wind up the business, the partnership is dissolved.
  - *All the partners agree to dissolve.* Although the Donut Partnership is supposed to last five years, Taylor, Jay, and Gabriela can agree among themselves to wind up the

business whenever they want. If Speedy Donut is a cream puff on the racetrack, they can decide to dissolve their partnership and sell the pastry.

- *The term expires or the partnership achieves its goal.* If Speedy Donut runs in the Derby, the Donut Partnership automatically dissolves.

- *In any partnership, when:*
  - *An event occurs which the partners had agreed would cause dissolution.* The Donut Partnership agreement provided that the partnership would dissolve if Speedy Donut failed to win a race in any 12-month period. When Speedy Donut goes winless, the partnership dissolves.
  - *The partnership business becomes illegal.* If horse racing is banned, the Donut Partnership automatically dissolves.
  - *A court determines that the partnership is unlikely to succeed.* If the partners simply cannot get along or they cannot make a profit, any partner has the right to ask a court to dissolve the partnership. If Taylor and Jay quarrel over everything and are unable to reach agreement on anything, a court is likely to agree to dissolve the partnership.

Note that even if one of these events occurs, partners can always decide (by unanimous vote) to continue a partnership. Indeed, even after the winding-up process begins, the partners can change their minds and continue the business.

Winding Up

During the winding-up process, all debts of the partnership are paid, and the remaining proceeds are distributed to the partners.

Who Does It? Unless the partnership agreement provides otherwise, any partner who has not wrongfully dissociated has the right to oversee the winding up.

Are They Paid? Partners are entitled to reasonable compensation for their work in winding up the partnership.

What Do They Do? The winding-up process can be complex and take as long as several years to complete. The partners in charge can either sell the entire business as a whole, sell the individual assets of the business, distribute specific assets to the partners, or some combination of these options. They have the right to complete unfinished transactions and do whatever is necessary to wind up the business, but they do not have the right to take on new business.

If Taylor is winding up the Donut Partnership, he can sell Speedy Donut outright, buy feed for him until the sale, sue to recover any winnings that have not been paid, and settle partnership debts. But can he enter the horse in additional races? In a similar case, a court permitted the partner in charge of winding up a racing business to pay entrance fees for races even though the horses would, in all likelihood, be sold before the races. The court assumed that buyers would pay more for horses that were eligible to race in upcoming events.[15]

The partnership is bound by the acts of the partners in charge of winding up. As the following case illustrates, this rule can sometimes lead to unhappy results.

---

[15] *Central Trust & S. Deposit Co. v. Respass*, 112 Ky. 606, 66 S.W. 421 (1902).

Jefferson Insurance Co. v. Curle

771 S.W.2d 424, 1989 Tenn. App. LEXIS 30
Tennessee Court of Appeals, 1989

Facts: Michael Curle and Steven Shelley were partners doing business under the name C & S Roofing. When the partnership dissolved, Curle agreed to complete one unfinished project (the Bishop house) and left Shelley to wind up the other partnership business. Shelley canceled the partnership's general liability insurance policy without telling Curle. While painting the Bishop house, Dennis Whitsett fell through a hole in the roof that the partnership had left covered only with tar paper. When Whitsett sought to recover from the partnership for his serious injuries, Curle and Shelley asked the insurance company to pay the claim.

The trial court found the policy canceled as to Steven Shelley, individually, but in full force and effect as to the partnership and Michael Curle, individually. The insurance company appealed.

Issue: ***Was the partnership bound by Shelley's decision during the winding-up process to cancel the policy, even though he had not told Curle?***

Excerpts from Judge McLemore's Decision: [The Tennessee Partnership Act] clearly states: "After dissolution a partner can bind the partnership ... by any act appropriate for winding up partnership affairs or completing transactions unfinished at dissolution." The liquidating partner owes a continuing fiduciary duty to the other partners and has an obligation to act equitably toward them. However, these obligations run between partners and do not absolve any partner from being bound by the liquidating partner's actions in winding up partnership affairs. In the present case, we hold Shelley's cancellation of the partnership insurance policy and collection of unused premiums to be within his authority in winding up the partnership's affairs.

For the foregoing reasons, the judgment of the trial court holding the policy canceled as to Steven Shelley, individually, is affirmed, but that portion of the judgment holding that the policy is in full force and effect as to C & S Roofing, a partnership, and Michael Curle, individually, is reversed; and we hold that the policy is canceled as to all insureds and, thus, provides no coverage to any of the defendants for the accident alleged by Dennis Whitsett.

Who Is Liable If a Partner Takes on New Business? During the winding-up process, the partners continue to be liable for the debts of the partnership that were incurred before dissolution. But what if a partner oversteps her bounds during the winding-up process and takes on new business? All of the other partners are liable unless they have filed a statement of dissolution with the Secretary of State. This statement is effective 90 days after it is filed.

How Are Partnership Proceeds Distributed? During the winding-up process, the assets of the partnership are paid out in the following order:

- First, to creditors of the partnership, including creditors who are partners. Suppose that the Donut Partnership has assets of $30,000. It owes $20,000 each to the feed supplier, the stabler, and Jay, for a total of $60,000. It will pay $10,000 to each of the three creditors—Jay is treated exactly like the outsiders.
- Second, any leftover funds (or obligations) are distributed to the partners. Unless the partnership agreement provides otherwise, partners share equally in profits—and losses. In this example, the Donut Partnership had only enough assets to pay half its $60,000 debt. Each partner would then contribute $10,000 to pay the amount still owing. Jay's payment would be a wash—he owes $10,000, but he is also entitled to be paid $10,000.

Termination

After the sometimes lengthy and complex winding up, the actual termination of a partnership is anticlimactic. Termination happens automatically once the winding up is finished. The partnership is not required to do anything official; it can go out of the world even more quietly and simply than it came in.

Chapter Conclusion

In some ways, a partnership is an old-fashioned form of organization. From the late 1770s until the mid-19th century, virtually all businesses were partnerships. Then corporations gained in popularity, and now new forms have arisen such as limited liability companies and limited liability partnerships (both discussed in Chapter 31). These new forms of organization have many of the advantages of a partnership without the disadvantage of unlimited liability.

It is no surprise that to protect their partners from personal liability, many accounting firms, law firms, brokerage houses, advertising agencies, and investment banks that were originally partnerships have changed their form of organization to one of the newer options. But many organizations continue to act like partnerships even though they have changed their official form of organization. And, before the partnership baby gets thrown out with the liability bathwater, it is worth noting that many organizations—law, accounting, and investment banking firms, to name a few—have been highly successful as partnerships. The lack of hierarchy in partnerships encourages collaboration while the lure of ownership motivates employees.

Partnership law is important for another reason. As we have seen in this chapter, partnerships are often formed inadvertently by people who do not realize they are in such a relationship until a dispute arises. It is useful to know in advance the kind of behavior that will create a partnership and understand the consequences.

Exam Review

1. **FORMING A PARTNERSHIP** In determining whether a partnership exists, a court will consider whether the parties:
   - Share the profits of the business,
   - Share the losses of the business,
   - Share management of the business, and
   - Have an oral or written partnership agreement (pp. 788–792)

EXAM Strategy

Question: Suppose that in the chapter's opening vignette, Chase, Bailey, and Zack signed a document stating, "The undersigned expressly agree that they are not partners." If they continued to work together on the house, sharing the profits and the management, would they have been partners?

Strategy: Remember that in the case of partnerships, actions speak louder than words. (See the "Result" at the end of this section.)

2. **PARTNERSHIP BY ESTOPPEL** If someone is not a member of a partnership, she will nonetheless be considered a partner by estoppel if (1) she tells other people she is a partner or allows other people to say, without contradiction, that she is a partner; (2) a third party relies on this assertion; and (3) the third party suffers harm. (pp. 791–792)

EXAM Strategy

Question: Helen parked her new Chevrolet in the parking lot at the airport in Springfield, Ohio. Bryan was giving flying lessons to Edward. Bryan told Edward to taxi a plane off the runway. Edward, standing on the ground next to the plane, cranked up the engine. The throttle was set too far open, so the plane began to move. Edward chased the plane on foot, grabbed its left wing, and swung the airplane in a semicircle, crashing it into Helen's car. Bryan operated his flying business under the name Bryan-Carl Air Service. Bryan and Carl were not partners, but Helen sued them both on a theory of partnership by estoppel. She argued that they had used a name for their business that sounded like a partnership. She had never heard of their business until the collision. Is Carl liable to Helen as a partner by estoppel?

Strategy: These elements are required for partnership by estoppel: the participants must have held themselves out as partners even though they are not; a third party must have relied on that representation and suffered harm. (See the "Result" at the end of this section.)

3. **PARTNERS AS AGENTS** Every partner is an agent of the partnership for the purpose of its business. A partnership is responsible for the intentional and negligent torts of a partner that occur in the ordinary course of the partnership's business or with the actual, implied or apparent authority of the other partners. (pp. 792–793)

EXAM Strategy

Question: While Warren Lyon was representing Betty Cook in divorce proceedings, she inherited $60,000. Lyon suggested Cook invest her money in a corporation of which he was president. Although he promised her a substantial return, the company went bankrupt shortly thereafter. Lyon was a partner in a law firm. The firm was not in the business of giving investment advice, it did not know that Lyon was giving such advice, nor did it receive any fee from Cook for the "investment service." Is the law firm liable for Cook's loss?

Strategy: Was Lyon acting within the ordinary course of the partnership's business? Was he acting with actual, implied or apparent authority? (See the "Result" at the end of this section.)

4. **A PARTNER'S LIABILITY FOR THE DEBTS OF THE PARTNERSHIP** All partners are personally liable for all debts of the partnership incurred while they were members of the partnership. Partners have joint and several liability for partnership obligations. A partner's liability for debts incurred before she became a partner is limited to her investment in the partnership. (pp. 793–795)

5. **DEFAULT RULES AMONG PARTNERS** Unless they agree otherwise, partners:
   - Share profits equally,
   - Share losses according to their share of profits,
   - Are not entitled to any payment beyond their share of profits, even if they perform work for the partnership,
   - Have no right to use or sell specific partnership property except for the benefit of the partnership,
   - Each have an equal vote, regardless of their contributions to the partnership, and
   - Each have an equal right in the management of the business. (pp. 795–798)

6. **TRANSFERRING A PARTNERSHIP SHARE** Without the approval of the other partners, a partner cannot sell her share. She can only transfer the right to receive profits and losses. A new partner can be admitted to a partnership only by unanimous consent of the other partners. (p. 797)

7. **CREDITORS' RIGHTS** Creditors can attach partnership profits through a charging order. (p. 797)

8. **A PARTNER'S LIABILITY TO THE PARTNERSHIP** Partners are liable to the partnership for any damages resulting from their gross negligence, reckless conduct, intentional misconduct, or a knowing violation of the law. Partners are not liable to the partnership for ordinary negligence. (pp. 793–795)

9. **OUTSIDE EARNINGS** Each partner must turn over to the partnership all earnings from any activity that is related to the partnership's business. (pp. 799–800)

10. **PARTNERSHIP OPPORTUNITY** A partner may not take an opportunity away from the partnership unless the other partners consent. (p. 800)

11. **CONFLICT OF INTEREST** A partner has a conflict of interest whenever the partnership does business with him, a member of his family, or a business partly or fully owned by him. The partner must turn all profits over to the partnership. (p. 800)

12. **A PARTNER'S OBLIGATION TO THE PARTNERSHIP** Partners have an obligation of good faith and fair dealing to each other and to the partnership. (pp. 798–802)

13. **DISSOCIATION** A dissociation occurs when a partner leaves the partnership. (pp. 802–805)

14. **AFTER DISSOCIATION** When one or more partners dissociate, the partnership can either buy out the departing partner(s) and continue in business or wind up the business and terminate the partnership. (pp. 804–805)

15. **THE RIGHT TO WITHDRAW** A partner always has the power to leave a partnership but may not have the right. (p. 805)

16. **PARTNERSHIP AT WILL** If partners do not have an agreement about the duration of their partnership, it is called a partnership at will, and any of them can leave at any time for any reason. (p. 805)

17. **TERM PARTNERSHIP** With a term partnership, the partners have agreed in advance how long the partnership will last. (p. 806)

18. **DISSOCIATED PARTNER** A dissociated partner is liable to outsiders for debts incurred during her term as a partner, but the partnership must indemnify her for these debts. A dissociated partner is liable for the debts of the partnership incurred within two years after she leaves, but only if the creditor reasonably believes she is still a partner. The partnership must indemnify her for these debts. (pp. 805–806)

19. **ENDING A PARTNERSHIP** If the partners decide to end the partnership business, they must take three steps: dissolution, winding up, and termination. (pp. 805–806)

20. **THE WINDING-UP PROCESS** During the winding-up process, the partners have the right to complete unfinished transactions and do whatever is necessary to terminate the business. They do not have the right to take on new business. The assets of the partnership are paid out:

- First, to creditors of the partnership, including creditors who are partners.
- Second, to partners. (pp. 806–807)

1. Result: The document would have had no impact. So long as they act like partners, they are partners.

2. Result: Two of the three elements are there—Brian and Carl held themselves out as partners and Helen suffered harm. But Carl was not a partner by estoppel because, before the accident, Helen did not know that Carl had held himself out as Bryan's partner. She had not *relied on* their representation.

3. Result: The firm was not in the investment advisory business, so Lyon was not acting within the ordinary course of business. He did not have actual authority, but he might have had apparent authority, in which case the firm would be liable.

Multiple-Choice Questions

1. **CPA QUESTION** Which of the following is not necessary to create a partnership?
   (a) Execution of a written partnership agreement
   (b) Agreement to share ownership of the partnership
   (c) Intention of conducting a business for profit
   (d) Intention of creating a relationship recognized as a partnership

2. If a partner dissociates, he is entitled to:
   (a) Force the termination of the partnership
   (b) Receive indemnification from liability for present partnership debt
   (c) Receive indemnification from damages he caused the partnership
   (d) Receive only his share of the value of the partnership assets when it ultimately liquidates

3. **CPA QUESTION** Cobb, Inc., a partner in TLC Partnership, assigns its partnership interest to Bean, who is not made a partner. After the assignment, Bean asserts the right to (1) participate in the management of TLC and (2) Cobb's share of TLC's partnership profits. Bean is correct as to which of these rights?
   (a) 1 only
   (b) 2 only
   (c) 1 and 2
   (d) Neither 1 nor 2

4. **CPA QUESTION** Ted Fein, a partner in the ABC Partnership, wishes to withdraw from the partnership and sell his interest to Gold. All of the other partners in ABC have agreed to admit Gold as a partner and to hold Fein harmless for the past, present, and future liabilities of ABC. A provision in the original partnership agreement states that the partnership will continue upon the death or withdrawal of one or more of the partners. As a result of Fein's withdrawal and Gold's admission to the partnership, Gold:
   (a) Is personally liable for partnership liabilities arising before and after his admission as a partner
   (b) Has the right to participate in the management of ABC
   (c) Acquired only the right to receive Fein's share of the profits of ABC
   (d) Must contribute cash or property to ABC in order to be admitted with the same rights as the other partners

5. Blackriver Partnership is in the process of winding up. It has three partners: Jason, Keira, and Lancelot. The partnership has assets of $90,000, but debts of $60,000, including $30,000 it owes to Jason. Who gets what?
   (a) Each partner receives $10,000.
   (b) Each partner receives $30,000.
   (c) Jason receives $30,000 and the other two get $10,000 each.
   (d) Jason receives $40,000 and the other two get $10,000 each.

Essay Questions

1. **ETHICS** Arthur, John, and George formed a partnership to drill and maintain cesspools for two years. After less than two months, John and George sent a letter to Arthur, informing him that they were dissolving the partnership. Arthur sued the two other men, asking the court to declare that the partnership still existed and he had the right to continue in the business. Do John and George have the power to dissolve a term partnership before the end of the term? Aside from the legal issue, is it fair to Arthur for the court to allow his two partners to walk away from their partnership? He had counted on a two-year commitment; they gave only two months.

2. **YOU BE THE JUDGE WRITING PROBLEM** Herbert, an artist, entered into an agreement with Randy for the reproduction and distribution of his paintings. Herbert was to receive 50 percent of the gross sales revenues. Randy was responsible for all losses and for management of the business. Before leaving on a trip to Israel,

where he feared he might be in some danger, Randy signed a partnership agreement with Herbert stating that they jointly owned the business. Shortly after Randy returned from the trip, the two men terminated their business relationship, and Herbert revoked his authorization for the sale of prints. When Randy continued selling the prints, Herbert filed suit. Randy argued that the two had formed a partnership and that he was authorized to sell assets of the partnership. Were Herbert and Randy partners? **Argument for Herbert:** A partnership agreement does not create a partnership. Randy alone managed the business. Herbert shared only revenues, not profits or losses. **Argument for Randy:** Herbert and Randy both provided services to the business: Randy paid for the printing, and Herbert did the artwork. These two men signed a partnership agreement, and they obviously intended to be partners.

3. Seventy-Three Land, Inc., sued Maxlar Partners for the balance due on a note made by the partnership. Max, a partner, asked the court to dismiss the claim against him personally because the plaintiff had not first tried to collect against the partnership. Does Max have a valid claim?

4. Pedro and Juan have a business selling ties with fraternity insignia. Pedro finds out that an online shirt business is for sale. It sounds like a great idea—customers send in their measurements and get back a custom-made shirt at a price no higher than an off-the-rack shirt at the local department store. Does Pedro have to let Juan in on the great opportunity?

5. Brothers Sydney and Ashley were partners in a real estate partnership in Pennsylvania. They received identical salaries. Sydney moved to Florida to establish residency so that he could obtain a divorce there. His lawyer told him not to return to Pennsylvania until he had resolved his marital problems. After Sydney had been gone almost a year, Ashley decided to increase his own salary to compensate for the additional work he was doing. Does Ashley have the right to pay himself more if he is doing more work?

Discussion Questions

1. Mike Love and Brian Wilson were members of the Beach Boys. In the 1960s, they wrote songs together. The copyrights for these songs were later sold to Rondor, which paid the two men royalties when the songs were played. In 2004, Wilson re-recorded some of these songs on a CD called *Good Vibrations*. This CD was distributed in the United Kingdom by the newspaper *The Mail on Sunday*. Love sued Wilson, arguing that the two men had a partnership and Wilson had violated the partnership agreement by re-recording the songs without Love's permission. Did Mike Love and Brian Wilson have a partnership?

2. Dutch, Bill, and Heidi were equal partners in a lawn care business. Bill and Heidi wanted to borrow money from the bank to buy more trucks and expand the business. Dutch was dead set against the idea. When the matter came to a vote, Bill and Heidi voted in favor, Dutch against. Dutch was so annoyed that he told the bank not to lend the money and, further, that he would not be responsible for repaying the loan. The bank loaned the money, the business failed, and the bank sued all three partners. Is Dutch liable on the loan?

3. Carrie and Laura started a business together to sell bridesmaid dresses online. Carrie spent months preparing the financials and meeting with potential investors while Laura designed dresses and found suppliers. Once Carrie was finished with the financials and had identified some potential investors, Laura announced that she preferred to work with Scott and Carrie was out of the business. What rights does Carrie have?

4. Is it fair that partners are not entitled to be paid for work they do for the partnership? What about poor Arnold in the Peaceful Valley case—he was on call 24/7 and his girlfriend was cleaning the latrines, but they were not entitled to be paid.

5. Is there any good reason to be in a partnership? If so, for what sort of business would it make sense?

CHAPTER 33

Life and Death of a Corporation

© Evan Meyer/Shutterstock.com

On July 26, 2004, Mark Zuckerberg signed a certificate of incorporation for his company, which he called TheFacebook, Inc. At 11:34 a.m. on July 29, 2004, that certificate was filed with the Secretary of State for Delaware, and TheFacebook began its life as a corporation. Zuckerberg had started this social networking Internet site the previous February in his dorm room at Harvard. By December 2004, TheFacebook had almost 1 million users. By the beginning of 2006, the company was estimated to be worth between $750 million and $2 billion. Today, TheFacebook is valued at more than $50 billion. As Zuckerberg built his company, what did he need to know about the law?

Zuckerberg started TheFacebook in his dorm room at Harvard. Within 10 months, it had almost 1 million users.

Most of the country's largest businesses, and many of its small ones, are corporations. In this chapter, you will learn how to form a corporation and also how to avoid traps that await the unwary entrepreneur before and after a business is formed. Finally, you will learn how to dissolve a corporation.

Before the Corporation Is Formed

TheFacebook operated for five months before it was incorporated. During this period, Zuckerberg needed to be careful to avoid liability as a promoter.

Promoter's Liability

The promoter is the person who creates the corporation. It is his idea; he raises the capital, hires the lawyers, calls the shots. Mark Zuckerberg was TheFacebook's promoter. Sometimes, promoters are so eager to get their business going that they sign contracts on behalf of the corporation before it is legally formed. Zuckerberg had moved company headquarters to Palo Alto, California before the certificate of incorporation was filed. Suppose that he finds the perfect location for his headquarters. He is eager to sign the lease before someone else snatches the opportunity away, but TheFacebook does not yet legally exist—it is not incorporated. What would happen if he signed the lease anyway?

© AP Photo/Paul Sakuma

Within a few years, Mark Zuckerberg went from college student to Silicon Valley billionaire.

- **The promoter is personally liable on any contract signed before the corporation is formed.** If Zuckerberg signs the lease before TheFacebook, Inc., legally exists, he is personally liable for the rent due.
- **The corporation is not liable on any contracts signed *before* incorporation unless it *adopts* the contract *after* incorporation.** What does **adoption** mean? Either the board of directors takes a formal vote saying, "We hereby adopt this contract," or they act as if they had adopted it. If TheFacebook uses the space Zuckerberg rented, it has adopted the contract. But Zuckerberg is still on the hook.

Novation
A new contract.

- **Even if the corporation adopts the contract, the promoter is still liable until the third party (in this case, the landlord) agrees to a *novation*.** A **novation** creates a *new* contract. Even if TheFacebook adopts the contract, Zuckerberg is still personally liable to the landlord until the landlord signs a new contract with him and TheFacebook explicitly stating that only the corporation is liable, not Zuckerberg.

Like many sets of rules, this one has an exception:

- **If it is clear that the parties did not intend the promoter to be liable, then he is released from liability once the corporation adopts the contract.** To protect himself, Zuckerberg would want the lease to state that TheFacebook is not yet formed but will be liable when it is formed, and that he is not personally liable for rental payments once TheFacebook adopts the contract.

EXAM Strategy

Question: Dr. Warfield hired Wolfe, a young carpenter, to build his house. A week or so after they signed the contract, Wolfe filed Articles of Incorporation for Wolfe Construction, Inc. Warfield made payments to the corporation. Unfortunately, the

work on the house was shoddy—the architect said he did not know whether to blow up the house or try to salvage what was there. Warfield sued Wolfe and Wolfe Construction, Inc. for damages. Wolfe argued that if he was liable as a promoter, then the corporation must be absolved and that, conversely, if the corporation was held liable he, as an individual, must not be. Who is liable to Warfield? Does it matter if Wolfe signed the contract in his own name or in the name of the corporation?

Strategy: Wolfe's argument is wrong—Warfield does not have to choose between suing him individually or suing the corporation. He can certainly sue both.

Result: Wolfe is personally liable on any contract signed before the corporation is filed, no matter whose name is on the contract. The corporation is liable only if it adopts the contract. Did it do so here? The fact that the corporation cashed checks that were made out to it means that the corporation is also liable. So Warfield can sue both Wolfe and the corporation.

Defective Incorporation

A promoter is liable on contracts signed before the corporation exists. What happens, though, if the promoter makes some reasonable effort to incorporate but does not succeed? In these situations, the law can be reasonably tolerant. (Remember, however, that litigation is extremely painful and it is far, far better simply to comply with all the rules from the start.)

De Jure Corporation

"De jure" is Latin for "by law." **A *de jure* corporation means that the promoter has substantially complied with the requirements for incorporation but has made some minor error.** He has perhaps misspelled the name of the corporation's registered agent (more about the registered agent later). In this case, no one, not even the state, can challenge the validity of the corporation.

De Facto Corporation

"De facto" is Latin for "in fact." **A *de facto* corporation means that the promoter has made a good faith effort to incorporate and has actually used the corporation to conduct business.** In this case, the state can challenge the validity of the corporation, but a third party cannot. Suppose that Mark Zuckerberg fills out the incorporation form and files it, but the Secretary of State does not stamp it for weeks. In the meantime, Zuckerberg signs a lease for TheFacebook. In many states, no stamp means no corporation. Nonetheless, Zuckerberg has a *de facto* corporation because he made a reasonable effort to incorporate and has used the corporation to conduct business. The landlord cannot challenge the validity of the corporation and claim that Zuckerberg is personally liable on the lease. Only the corporation is liable.

Corporation by Estoppel

A corporation by estoppel means that, if a party enters into a contract *believing* in good faith that the corporation exists, he cannot later take advantage of the fact that it does not. Suppose that Zuckerberg's attorney tells him that TheFacebook, Inc., has been formed, but in fact he never even attempted to incorporate it. In the meantime, Zuckerberg buys many Apple computers in TheFacebook's name. Under the theory of corporation by estoppel, Zuckerberg is *not* personally liable even though the corporation does not exist. Both he and Apple thought he was buying on behalf of the corporation. Why should Apple receive a windfall, and why

should Zuckerberg be penalized, simply because his lawyer made a mistake? This rule works both ways: If a bank loans money to TheFacebook, Inc., Zuckerberg cannot refuse to pay it back simply because TheFacebook does not yet exist. At the time Zuckerberg received the loan, he believed the corporation had been formed.

In the following case, a contract is so unclear, the courts have to step in. What is the proper legal result? Is that the most reasonable outcome?

You be the Judge

GS Petroleum, Inc. v. R and S Fuel, Inc.

2009 Del. Super. LEXIS 200
Superior Court of Delaware, 2009

Facts: On March 13, GS Petroleum (GS) signed an agreement to sell a Shell gas station to R and S Fuel, Inc. (Fuel). On April 2, Fuel opened a corporate bank account and began writing checks on it. On April 15, Fuel took possession of the Shell station. Later, it took out insurance in the company's name. Unfortunately, what Fuel did not do was pay the money it owed under the contract.

So far, this looks like just a breach of contract case. But there is one more fact that greatly complicates this simple picture: Fuel did not actually come into existence until March 27, two weeks after the contract was signed. The introduction to the contract stated that it was "entered by and between R and S Fuel, Inc., and GS Petroleum, Inc." The signature lines at the end looked like this:

Richard Simpson
R And S Fuel Inc.
Buyer
Susan Stamm and Richard Simpson

GS filed suit for $124,000 against the corporation but also personally against Richard Simpson and Susan Stamm. The two individuals filed a motion for summary judgment.

You Be the Judge: ***Were Simpson and Stamm personally liable for the debts of Fuel?***

Argument for GS: The corporation did not exist when the contract was signed, so someone else has to be liable. Simpson and Stamm were the promoters, their names appear on the contract, and Simpson actually signed it. No corporate title is attached to his name on the signature line, which indicates he was signing as an individual, not a corporate officer. And when Simpson signed the contract, he was acting as Stamm's agent. So she is liable, too.

The defendants argue that the business was a *de facto* corporation, but they need to read this textbook more carefully. To qualify, they must have made a good faith effort to comply with corporate law, but here they had not bothered to file the forms with the Secretary of State. That is not a good faith effort.

While they are reviewing the text, Simpson and Stamm should also note that even if Fuel adopted the contract, they are still liable until the parties sign a novation. That did not happen here. And no provision of the contract explicitly or impliedly released the two defendants.

To find Simpson and Stamm liable is the only fair result. Someone is going to be out a lot of money. It should be the people responsible for losing that money, not the innocent party who sold them a perfectly good business.

Argument for Simpson and Stamm: It is true that Simpson's signature line did not list a corporate title, but that was simply an oversight. He was clearly signing for the corporation. As for Stamm, she cannot be liable for an agreement she did not sign.

Promoters who sign an agreement on behalf of a corporation are only liable if the parties *intended* that result. GS entered into this agreement with a corporation. Note that the document states it is an agreement with just Fuel; not Fuel, Simpson, and Stamm. Everyone understood that to be the case. GS has not alleged that Fuel was a sham corporation. Even before the corporate documents were filed, Simpson and Stamm ran the business as a corporation. They opened a bank account in the company's name, they used only business checks, and they bought insurance in the corporate name. If GS wanted the two individuals to be liable, the document should have said so.

Also, R and S Fuel was a *de facto* corporation at the time the agreement was signed. Simpson and Stamm were in the process of organizing it, they were making a good faith effort, and they were using the corporation to conduct business. In the case of a *de facto* corporation, third parties such as GS have no right to challenge its validity.

Incorporation Process

The mechanics of incorporation are easy: simply download the form and mail or fax it to the Secretary of State for your state. But do not let this easy process fool you; the incorporation document needs to be completed with some care. The corporate charter defines the corporation, including everything from the company's name to the number of shares it will issue and the liability of its directors. States use different terms to refer to a charter; some call it the "articles of incorporation," others use "articles of organization," and still others say "certificate" instead of "articles." All of these terms mean the same thing. Similarly, some states use the term "shareholders," and others use "stockholders;" they are both the same.

There is no federal corporation code, which means that a company can incorporate only under state law, not federal law. No matter where a company actually does business, it may incorporate in any state. This decision is important because the organization must live by the laws of whichever state it chooses for incorporation. To encourage similarity among state corporation statutes, the American Bar Association drafted the Model Business Corporation Act as a guide. Many states do use the Act as a model, although Delaware does not. In discussing corporate law in this and the following chapters, we will give examples from both the Model Act and specific states, especially Delaware. Why Delaware? Despite its small size, it has a disproportionate influence on corporate law. More than half of all public companies are incorporated there, including 60 percent of Fortune 500 companies.

Where to Incorporate?

Traditionally, companies incorporated either in their home state or in Delaware. They typically must pay filing fees and franchise taxes in their state of incorporation, as well as in any state in which they do business. To avoid this double set of fees, a business that will be operating primarily in one state would probably select that state for incorporation rather than Delaware. But if a company is going to do business in several states, it might consider choosing Delaware.

Delaware has not always been a popular choice for corporations. In the early 1900s, New Jersey held the position that Delaware does today. When Woodrow Wilson became governor (on his way to the White House), he toughened New Jersey's laws. Looking for a state with a more hospitable environment, companies found one across the Delaware River. What is good for business is good for Delaware, too. Each year, it collects substantial filing fees and taxes from companies that, for the most part, conduct little business in the state.

Delaware offers corporations several advantages:

- *Laws that favor management.* Delaware laws offer flexibility. For example, if the shareholders want to take a vote in writing instead of holding a meeting, many other states require the vote to be unanimous; Delaware requires only a majority to agree. The Delaware legislature also tries to keep up to date by changing its code to reflect new developments in corporate law. For example, it was one of the first states to eliminate a rigid format for corporate charters.
- *An efficient court system.* Delaware has a special court (called "Chancery Court") that hears nothing but business cases and has judges who are experts in corporate law. In other states, judges who practiced in fields such as criminal law or divorce also hear corporate cases.[1] In an emergency involving, say, a hostile takeover, Delaware judges will hear cases and reach decisions on short notice. This preferential treatment is typically not available in other states.

[1]When Pennzoil sued Texaco in Texas over a breach of contract, the judge who tried the case was experienced in hearing divorce cases. Many lawyers felt that his ignorance of corporate matters contributed to the jury's Texas-sized verdict—$11 *billion*.

- *An established body of precedent.* Because so many businesses incorporate in the state, its courts hear a vast number of corporate cases, creating a large body of precedent. Thus lawyers feel they can more easily predict the outcome of a case in Delaware than in a state where few corporate disputes are tried.

The financial bonanza that Delaware realizes from its incorporation business has not gone unnoticed by other states. New York, Ohio, Pennsylvania, and, ironically, New Jersey have all modified their corporate laws to attract incorporation business. Large companies in the western part of the country often choose Nevada as their home state because of its attractive laws. Of course, management—not shareholders—chooses the state of incorporation and pays the state fees. Some commentators argue that states are so eager to attract corporate revenue that their laws unfairly favor management over shareholders. They refer to this competition as the "race to the bottom."[2] However, some recent studies indicate that, when a company reincorporates in Delaware, its stock price does not go down. Evidently, financial markets do not perceive shareholders to be at a disadvantage in Delaware.

Once a company has decided *where* to incorporate, the next step is to prepare and file the charter. The charter must always be filed with the Secretary of State; some jurisdictions also require that it be filed in a county office. Some states supply a form to be completed. Delaware and the Model Act require that certain information be included, but the incorporators can list it any way they want. The incorporators may also include some optional provisions.

Charter's Required Provisions

Name

The Model Act imposes two requirements in selecting a name. First, all corporations must use one of the following words in their name: "corporation," "incorporated," "company," or "limited." Delaware also accepts some additional terms, such as "association" or "institute." Both the Model Act and Delaware permit abbreviations (such as "inc." or "corp.") or equivalent terms in another language (such as "S.A.," which is the French abbreviation for corporation).

Second, under both the Model Act and Delaware law, a new corporate name must be different from that of any corporation that already exists in that state. If your name is Freddy du Pont, you cannot name your corporation "Freddy du Pont, Inc.," because Delaware already has a company named E. I. du Pont de Nemours and Company. It does not matter that Freddy du Pont is your real name or that the existing company is a large chemical business while you want to open a video arcade. The names are too similar. In addition, some states ban improper names. For example, Pennsylvania refused to accept "I Choose Hell Productions" because its statute prohibits names that "constitute blasphemy, profane cursing or swearing, or that profane the Lord's name." The state did accept ICH Productions. Zuckerberg chose "TheFacebook" because that was what Harvard students called their freshman directory.

What if you wake from a deep sleep late one night with the perfect corporate name in your head, but the charter is not quite ready for filing? In Delaware, you can reserve a name for 120 days for a fee of $75. That takes care of Delaware, but you know your corporation will soon be going national. How can you protect your name in other states? The Model Act also permits the advance registration of a corporate name. Alternatively, you can form a "nameholder" organization: a corporation that incurs minimum annual fees because it is inactive but does reserve its name.

[2]When Delaware passed its corporation law in 1899, the *American Law Review* attacked its pro-management bias as an effort by a "little community of truck-farmers and clam diggers ... determined to get her little, tiny, sweet, round, baby hand into the grab bag." Quoted in the *Economist* October 25, 2003, p. 55.

All this bother and expense discourage most start-ups from reserving their names nationwide. If they later expand into another state where someone else is already using their name, they either buy the name back or use a different name in that jurisdiction. The problem multiplies if they want to register their name overseas as well. When Steven Spielberg, Jeffrey Katzenberg, and David Geffen launched their Hollywood studio, DreamWorks SKG, they spent nearly $500,000 to clear rights to the name in 108 countries around the world. (Of course, that was a small drop in the $2 billion bucket they raised from investors.)

Address and Registered Agent

A company must have an official address in the state in which it is incorporated so that the Secretary of State knows where to contact it—and so that anyone who wants to sue the corporation can serve the complaint in the state. Since most companies incorporated in Delaware do not actually have an office there, they hire a registered agent to serve as their official presence in the state.

Incorporators

The incorporator signs the charter and delivers it to the Secretary of State for filing. The incorporator is not required to buy stock, nor does he necessarily have any future relationship with the company. Often, the lawyer who prepares the charter serves as incorporator. If no lawyer is involved, typically the promoter is also the incorporator. That is what happened with TheFacebook—Mark Zuckerberg served as the incorporator. The incorporator incurs liability only if he knows that something in the charter is not true when he signs it.

Purpose

The corporation is required to give its purpose for existence. In the 19th century, when corporations were a new concept, states thought it important to keep tight control over them. Under the ***ultra vires*** **doctrine**, a corporation cannot undertake any transaction unless its charter permits it. Corporate officers understandably chafed at this restriction. To avoid problems of *ultra vires*, most companies now use a very broad purpose clause such as TheFacebook's:

Ultra vires **doctrine**
A corporation cannot undertake a transaction unless permitted to do so by its charter.

> The purpose of the Corporation is to engage in any lawful act or activity for which corporations may be organized under the General Corporation Law of Delaware.

Essentially, the only way to violate this purpose clause is to commit an illegal act.

Stock

The charter must provide three items of information about the company's stock.

Par Value. The concept of par value was designed to protect investors. Originally, par value was supposed to be close to market price. A company could not issue stock at a price less than par, which meant that it could not sell to insiders at a sweetheart price well below market value. (Once the stock was *issued*, it could be *traded* at any price.) In modern times, par value does not relate to market value; it is usually some nominal figure such as 1¢ or $1 per share. Companies can dispense with the concept altogether and issue stock that has no par value. When making this decision, the company should check the state's filing fees because they may be based on the par value of the company's stock. TheFacebook stock has a par value of $0.0001 (one-hundredth of one cent) per share.

Number of Shares. Before stock can be sold, it must first be authorized in the charter. The corporation can authorize as many shares as the incorporators choose, but the more shares, the higher the filing fee. After incorporation, a company can add authorized shares by simply amending its charter and paying the additional fee. TheFacebook charter authorizes the creation of 10,000,000 shares.

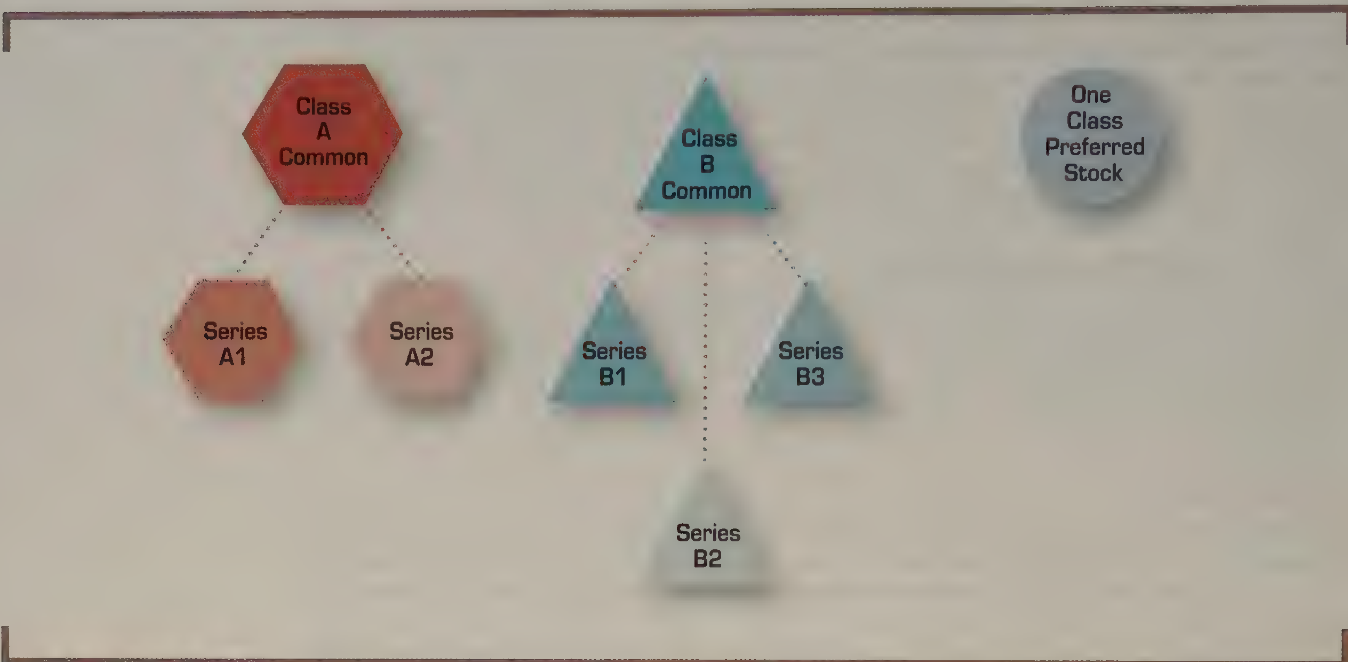

EXHIBIT 33.1

Authorized and unissued
Stock that has been authorized, but not yet sold.

Authorized and issued
Stock has been authorized and sold; another word for it is outstanding.

Treasury stock
Stock that a company has sold, but later bought back.

Stock that has been authorized but not yet sold is called **authorized and unissued**. Stock that has been sold is termed **authorized and issued** or **outstanding**. Stock that the company has sold but later bought back is **treasury stock**.

Classes and Series. Different shareholders often make different contributions to a company. Some may be involved in management, while others may simply contribute financially. Early investors may feel that they are entitled to more control than those who come along later (and who perhaps take less risk). Corporate structure can be infinitely flexible in defining the rights of these various shareholders. Stock can be divided into categories called **classes**, and these classes can be further divided into subcategories called **series**. All stock in a series has the same rights, and all series in a class are fundamentally the same, except for minor distinctions. For example, in a class of preferred stock, all shareholders may be entitled to a dividend, but the amount of the dividend may vary by series. Different classes of stock, however, may have very different rights—a class of preferred stock is different from a class of common stock. Exhibit 33.1 illustrates the concept of class and series. Defining the rights of a class or series of stock is like baking a cake—the stock can contain virtually any combination of the following ingredients (although the result may not be to everyone's taste):

- *Dividend rights.* The charter establishes whether the shareholder is entitled to dividends and, if so, in what amount. No matter what the charter says, the corporation may not pay dividends unless it is solvent, that is, unless it has enough assets to pay its debts.
- *Voting rights.* Shareholders are usually entitled to elect directors and vote on charter amendments, among other issues, but these rights can vary among different series and classes of stock. When Ford Motor Co. went public in 1956, it issued Class B common stock to members of the Ford family. This class of stock holds about 40 percent of the voting power and, thereby, effectively controls the company. Not surprisingly, the chairman of the company has often been named "Ford." TheFacebook recently amended its charter to create two classes of stock with different voting rights, presumably so that Zuckerberg can maintain control after the company goes public.

- *Liquidation rights.* The charter specifies the order in which classes of stockholders will be paid upon dissolution of the company. This provision is important if there are not enough assets to pay everyone.
- *Preemptive rights.* If a corporation later issues additional shares of its stock, the original shareholders will own a smaller percentage of the company. For example, if a company has 10 shareholders, each owning 1 share, and it later issues another 10 shares to others, each of the old shareholders will then own 5 percent of the company instead of 10 percent. To prevent this **dilution**, some companies grant preemptive rights: the old shareholders have the right to acquire enough new stock to prevent their share of the company from being diminished. In our example, each old shareholder would be entitled to buy enough new shares to keep their ownership at 10 percent. Of course, they are not required to buy this stock.
- *Conversion rights.* Some classes of stock may have the right to convert into shares of a different class. For example, if a company does not meet its financial projections, nonvoting stock may have the right to convert into voting stock.
- *Redemption rights.* Similarly, the shareholders of some classes of stock may have the right to force a company to buy their stock back if, for example, the company does not meet its financial goals.

These are the ingredients for any class or series of stock. Some stock comes prepackaged like a cake mix. "Preferred" and "common" stock are two classic types.

Preferred stock
The owners of preferred stock have preference on dividends and also, typically, in liquidation.

Owners of **preferred stock** have preference on dividends and also, typically, in liquidation. If a class of preferred stock is entitled to dividends, then it must receive its dividends before common stockholders are paid theirs. If holders of **cumulative preferred** stock miss their dividend one year, common shareholders cannot receive a dividend until the cumulative preferred shareholders have been paid all that they are owed, no matter how long that takes. Alternatively, holders of **non-cumulative preferred** stock lose an annual dividend for good if the company cannot afford it in the year it is due. When a company dissolves, preferred stockholders typically have the right to receive their share of corporate assets before common shareholders. Exhibit 33.2 illustrates the order of payment for dividends. Preferred stock can have any combination of other ingredients, such

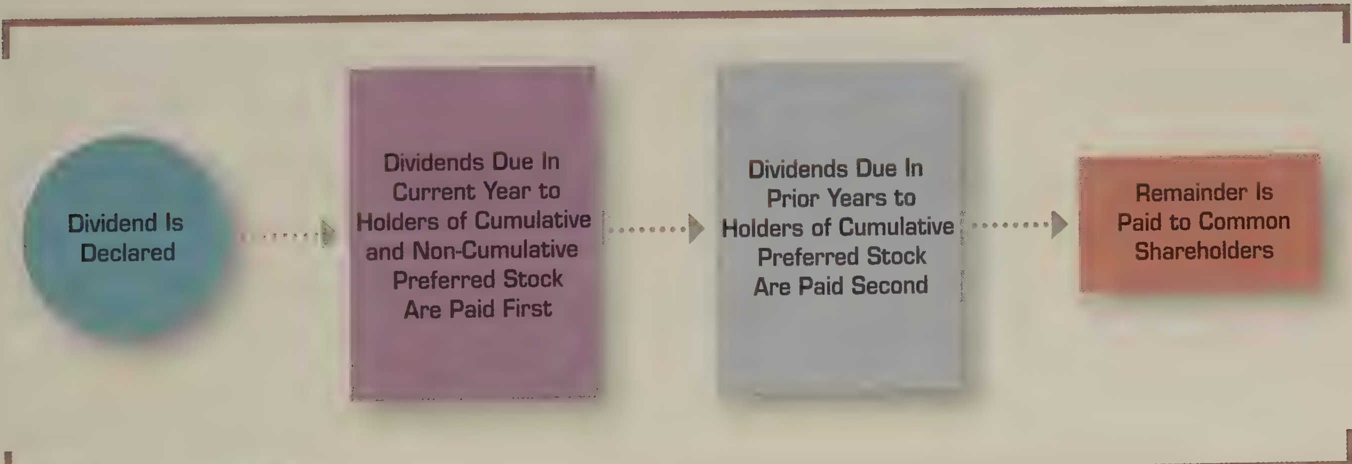

EXHIBIT 33.2

as preemptive rights or conversion rights. Sometimes preferred shareholders have voting rights, but usually they do not.

***Common stock* is last in line for any corporate payouts, including dividends and liquidation payments.** If the company is liquidated, creditors of the company and preferred shareholders are typically paid before common shareholders. But being a common shareholder is not all bad news—common shareholders often have most of the voting rights. They also have greater profit potential; preferred stock typically has a limit on the size of dividends, common does not. If the business does well, common stock will often increase in value faster than preferred stock.

Venture capitalists (professional investors who are in the business of financing companies) often choose a type of stock called **participating preferred stock**, which permits them to have their cake and eat it, too. Upon liquidation of the company, these shareholders are paid first, receiving whatever they paid for the stock plus accrued dividends. Then they are treated as if they had converted their preferred shares into common stock, so they get to share the rest of the proceeds with common shareholders.

Charter's Optional Provisions

Many corporations add optional provisions to their charters. Bear in mind, however, that once a provision is in the charter, it can be changed only by a vote of the shareholders and the filing of an amendment with the Secretary of State. This process can be cumbersome and expensive. Therefore, when in doubt, it is usually a good idea not to include extra provisions in the charter. Nonetheless, some provisions are so important that they belong there, despite the effort and expense required to change them.

Director Liability

Although incorporation protects shareholders against personal liability for the debts of the company, anyone involved in the management of the business can be personally liable for his own wrongdoing. For example, shareholders may sue directors for making an unprofitable decision. The potential liability in such a lawsuit is enormous. Even if the director is found not liable, the legal fees can be devastating.

Under most state statutes, a corporation may include in its charter a provision that protects directors from personal liability to the corporation or its shareholders for anything other than egregious misbehavior involving, for example, bad faith or intentional misconduct.[3] These provisions are called **exculpatory clauses**. TheFacebook charter has an exculpatory clause stating:

Exculpatory clause
A provision that protects directors from personal liability to the corporation and its shareholders for anything other than egregious misbehavior.

> To the fullest extent permitted by the Delaware General Corporation Law...a director of the Corporation shall not be personally liable to the Corporation or its stockholders for monetary damages for breach of fiduciary duty as a director.

Corporations also typically add an **indemnification** provision to their charter that requires the company to pay the legal fees of directors who are sued for any actions taken on behalf of the company. Without these protective provisions, companies would be unable to hire directors.

Indemnification
Requires a company to pay the legal fees of directors who are sued for actions taken on behalf of the company.

The following case illustrates the power of an exculpatory clause. Note that the directors are not liable even for acts of gross negligence.

[3]See, for example, 8 Del. C. §102(7).

Rodriguez v. Loudeye Corporation

2008 Wash. App. LEXIS 767
Court of Appeals of Washington, 2008

Facts: Loudeye Corporation provided digital music for cell phones and other consumer electronics. It was headquartered in Seattle, Washington, but incorporated in Delaware (where it did not have any offices). As permitted under Delaware law, Loudeye's charter had an exculpatory clause protecting directors from liability. Such provisions were unenforceable under Washington law.

Loudeye's directors decided to sell the company because it was not generating enough revenue to compete effectively. Nokia offered a price that was three times market value. After extensive negotiations with Nokia and an unsuccessful search for other buyers, Loudeye's board accepted Nokia's bid.

A Loudeye shareholder named Eli Rodriguez filed suit against five members of the board of directors, alleging that the directors had breached their fiduciary duties by failing to obtain the best price. He thought the board should have conducted a formal auction. He also alleged that the board had conflicts of interest and had approved the sale because they would receive special financial benefits (such as severance payments and stock options).

The Loudeye directors filed a motion to dismiss, alleging that the exculpatory clause in the company's charter protected them from liability. Rodriguez argued that Washington law should apply and, therefore, the clause was invalid. He also argued that, even if the exculpatory clause was valid, it did not apply in this case. The trial court granted the motion to dismiss and Rodriguez appealed.

Issues: ***Which state law applies to a company that is headquartered in Washington but incorporated in Delaware? Does the exculpatory clause in the Loudeye charter protect its directors from liability?***

Excerpts from Judge Agid's Decision: Shareholder claims involving a corporation's internal affairs are governed by the law of the state in which the corporation was incorporated. Thus, because Loudeye is a Delaware corporation, Delaware law applies here.

[T]o the extent these allegations describe gross negligence in the sale of the corporation, their conduct is not actionable. [O]nly if there are allegations establishing that the director's conduct is motivated by an actual intent to do harm, or occurs when directors consciously and intentionally disregard their responsibilities, and is conduct so far beyond the bounds of reasonable judgment that it seems essentially inexplicable on any ground other than bad faith [are the directors liable].

[A]s the directors point out, [that] situation typically is when the directors in the acquired corporation also have interests in the acquiring corporation or when directors seek to entrench themselves in their positions of control. But neither situation is present here. The complaint therefore fails to state a claim.

We affirm the trial court's dismissal of the complaint.

Cumulative Voting

For sheer drama, few corporate battles have exceeded the fight between the elephant, Gulf Oil, and the flea, Mesa Petroleum. When T. Boone Pickens, the CEO of Mesa, announced that Gulf Oil was badly managed, he was picking on the sixth-largest oil company in America. Pickens nominated himself to be Gulf's savior. His plan was to buy enough of the company's shares so that he could elect himself to the board of directors. Pickens's goal was possible only because Gulf was incorporated in Pennsylvania, a state that then had cumulative voting.

For sheer drama, few corporate battles have exceeded the fight between the elephant, Gulf Oil, and the flea, Mesa Petroleum.

At the time, Gulf Oil had 15 directors, all elected annually. Under a *regular* voting system, the 15 people

who receive the most votes are awarded the seats. If Pickens owned one share, he could vote for as many as 15 *different* candidates, but he could not pool his votes; that is, he could not cast multiple votes for any one candidate. Thus, he could only vote for himself to be director once. To be sure of getting elected to the board, he would have to buy half of Gulf's shares, plus one. Gulf had 165 million shares outstanding, so Pickens would have to buy 82,500,001 shares. Once he had bought that many shares, he could elect *all* the directors because he would own a majority of the company's stock. As Gulf's stock was trading at around $40 per share, Pickens would have had to invest more than $3 billion ($3,300,000,040) to achieve his goal.

Under a cumulative voting system, however, Pickens is allowed to pool his shares and vote them all for the same person (in this case, himself). How many shares would Pickens have to own to elect himself to the board? This is the formula:

$$\text{Number of shares needed to elect one director} = \frac{\text{Number of shares outstanding}}{\text{Number of directors being elected} + 1} + 1$$

This is how the formula worked in Pickens's case, where x stands for the number of shares he needed to elect one director:

$$x = \frac{165,000,000}{15 + 1} + 1$$

$$x = 10,312,501$$

This 10 million shares is a lot less than the 82 million he needed under a regular voting system. At a price per share of $40, Pickens would have to invest roughly $400 million ($412,500,040) under a cumulative voting system, compared with $3 billion under a regular system.

In a desperate effort to prevent Pickens from being elected to its board of directors, Gulf called a special meeting of shareholders to change its state of incorporation from Pennsylvania to Delaware and eliminate cumulative voting. (Delaware and the Model Act both permit, but do not require, it.) For months, both sides ran full-page advertisements in newspapers across the country to persuade shareholders. Gulf spent $9 million and Mesa $8 million on the fight alone, not counting money spent buying Gulf shares. In the end, Gulf won the battle but lost the war. It won the shareholder vote by a small margin, but the company was so weakened by this fight that it sold out to Chevron Oil shortly thereafter. The fight so frightened other companies that many changed their state of organization to Delaware. Pennsylvania then changed its statue to be like Delaware's.

After Incorporation

Once the charter has been filed (and the filing fee paid), the corporation legally exists, but work is not done yet. The shareholders must still complete a few additional tasks.

Directors and Officers

Once the corporation is organized, the incorporators elect the first set of directors. Thereafter, shareholders elect directors. Under the Model Act, a corporation is required to have at least one director unless (1) *all* the shareholders sign an agreement that eliminates the board, or (2) the corporation has 50 or fewer shareholders. To elect directors, the shareholders may hold a meeting, or, in the more typical case for a small company, they elect directors by **written consent**. (In most states and under the Model Act, all the share-

holders must sign, but in Delaware, a majority is sufficient.) A typical written consent looks like this:

Classic American Novels, Inc.
Written Consent

The undersigned shareholders of Classic American Novels, Inc., a corporation organized and existing under the General Corporation Law of the State of Wherever, hereby agree that the following action shall be taken with full force and effect as if voted at a validly called and held meeting of the shareholders of the corporation:

Agreed: That the following people are elected to serve as directors for one year, or until their successors have been duly elected and qualified:

Herman Melville
Louisa May Alcott
Mark Twain

Dated: ______________________ Signed: ______________________________
Willa Cather

Dated: ______________________ Signed: ______________________________
Nathaniel Hawthorne

Dated: ______________________ Signed: ______________________________
Harriet Beecher Stowe

Once the incorporators or shareholders have chosen the directors, the directors must elect the officers of the corporation. They can use a consent form, if they wish. The Model Act is flexible. It simply requires a corporation to have whatever officers are described in the bylaws. The same person can hold more than one office. Exhibit 33.3 illustrates the election process in corporations.

The written consents and any records of actual meetings are kept in a **minute book**, which is the official record of the corporation. Entrepreneurs sometimes feel they are too busy to bother with all these details, but if a corporation is ever sold, the lawyers for the buyers will *insist* on a well-organized and complete minute book. In one case, a company that was seeking a $100,000 bank loan could not find all of its minutes. Many of its early shareholders and directors were not available to reauthorize prior deeds. In the end, the company had to merge itself into a newly created corporation so it could start fresh with a new set of corporate records. The company spent $10,000 on this task, a large chunk out of the $100,000 loan.

Minute book
A book that contains a summary of a company's official actions.

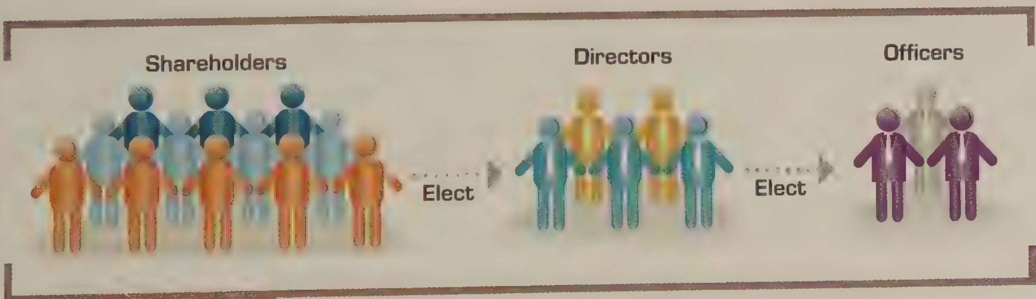

EXHIBIT 33.3

Bylaws

Bylaws
A document that specifies the organizational rules of a corporation or other organization, such as the date of the annual meeting and the required number of directors.

Quorum
The percentage of stock that must be represented for a meeting to count.

The **bylaws** list all the "housekeeping" details for the corporation. For example, bylaws set the date of the annual shareholders' meeting, define what a **quorum** is (i.e., what percentage of stock must be represented for a meeting to count), indicate how many directors there will be, give titles to officers, fix the procedure for calling a special meeting of the shareholders or directors, and establish the fiscal (i.e., tax) year of the corporation. When there is a choice, it is usually better to place provisions in the bylaws rather than the charter, because the bylaws are easier to change. Under the Model Act, directors can amend the bylaws without calling a meeting of the shareholders or paying a filing fee. TheFacebook charter provides that "….the Board of Directors of the Corporation is expressly authorized to make, amend, or repeal Bylaws of the Corporation."

The shareholders can always override the directors if they want, but they rarely do. In the following case, the directors' ignorance of company bylaws led to disaster.

In Re Bigmar

2002 Del. Ch. LEXIS 45
Court of Chancery, Delaware, 2002

Facts: Bigmar was a Delaware corporation that manufactured and marketed pharmaceuticals in Europe. While trying to raise additional capital, the company's founder, John Tramontana, met Cynthia May. She lied to him about her education, wealth, and connections in the investment community. Unfortunately, he believed her. The upshot was that May became Bigmar's president and a director of the company. She soon took control of the company's financial records and refused to give Tramontana any information (always a bad sign).[4] When Bigmar ran out of money, Tramontana sent May an email asking for her resignation. She did not respond. (Also a bad sign.)

The company was in desperate financial shape, but Tramontana managed to find a bank willing to buy $1 million of Bigmar stock. He called a special meeting of the board of directors to approve the sale of shares and to fire May. The meeting was to take place by telephone. To establish a quorum necessary for the meeting to be valid, at least five of the nine directors had to take part. May and her three allies on the board refused to participate.

Tramontana testified that, at the appointed time, he met with two directors in his office. They used a speaker feature on a cell phone that Tramontana borrowed from Danilo Graticola to call two other directors, one of whom was in Heathrow Airport in London. The five directors unanimously resolved to issue the stock to the bank. The meeting then adjourned so that they could consult counsel. It was reconvened the next day, at which time they voted to fire May.

The following day, the bank transferred $1 million to Bigmar. Tramontana instructed the company's transfer agent to send stock certificates to the bank, but May contradicted his order. Tramontana and May went to court to determine if the director's meeting was valid and the bank entitled to the shares.

Issue: ***Was the meeting of the Bigmar board of directors valid?***

Excerpts from Judge Jacobs's Decision: Ms. May attacks the validity of the meeting(s) [claiming that] no meeting at which a quorum of directors was present ever took place.

There is evidence that the meeting(s) did occur. Minutes of the meetings were prepared, and all but one of the Tramontana directors gave sworn testimony that the meeting(s) took place exactly as the minutes recite. Ordinarily that would be sufficient, but this is not an ordinary case, for several reasons.

First, the minutes were prepared by counsel, who was not present at the meetings and who simply reduced to writing what Mr. Tramontana told him had occurred. Second, there is no independent documentation or testimony of any third party witness that corroborates the directors'

---

[4]She did, however, send him this email: I wish for GOd's sake that you would GROW [UP] just a little…you've F the banking up here in Sweden so I can't get the money that I made [arrangements] for…damn idiot…take a shower and clean your ears out…you can't follow a straight line without having your ego and little hissy fits…Get off the playground…before the big boys beat you up…

testimony. Moreover, any notes taken at the meeting(s) were destroyed. Further, many of the telephone records whose production was requested were not produced, and the records that were produced either fail to corroborate the Tramontana directors' testimony,[5] or those documents are inconsistent with that testimony.[6]

Third, for the directors' testimony to be accepted, the Court would have to "buy into" a scenario that (to put it charitably) is most improbable. Although Mr. Tramontana had a speaker phone in his office, he testified that he decided to conduct the board meeting on Mr. Graticola's borrowed cell phone. His explanation for that unusual decision was that Mr. Graticola had described his new cell phone's technology in glowing terms and Mr. Tramontana elected to use the telephone to ingratiate his company with Graticola. [T]he story does have some plausibility, however slight. But even that minimal plausibility vanishes when one is told that the same identical scenario occurred a second time, at the adjourned meeting. I find this scenario too implausible for even a gullible factfinder to swallow. Accordingly, the Court is unable to determine that those directors' meetings were validly convened and conducted.

Although the analysis could stop here, that would leave the Court (and perhaps a reader of this Opinion) with a sense of dissatisfaction because Mr. Tramontana's testimony leaves unanswered questions. In purely human terms, this issue was most difficult and perplexing for the Court.

It is plausible, and the available evidence does indicate, that Mr. Tramontana attempted to assemble all of his colleagues for a telephonic meeting. [But one director] was unavailable, as he was en route from London to Ireland at that time. Because a quorum required the attendance of five directors, [this director's] unavailability meant that the telephonic meeting failed for lack of a quorum. Mr. Tramontana believed, nonetheless, that the problem could be solved by obtaining from himself and his colleagues' individual written consent resolutions taking the actions recited in the minutes. Unfortunately (and unbeknownst to Mr. Tramontana), Bigmar's by-laws required that any director action by written consent must be unanimous. [When] Mr. Tramontana learned of that unanimity requirement, [he] decided to [say] that a quorum of five directors was present and that a board meeting was held.

I am persuaded that [Mr. Tramontana and his colleagues acted] in the good-faith belief that unless the issuance of the shares to the Bank was upheld, the Company would fall into the hands of Ms. May, who was incapable of saving the Company. I think it plausible that they believed that at worst, they failed to observe a highly technical legal requirement that, on balance, was too insignificant to justify the ruination of the Company.

The principles of corporate governance, such as those violated here, exist precisely because those procedures enable courts and parties to distinguish between acts that lawfully bind the corporation and its constituents, from those that do not. The directors may have believed in good faith that they had no alternative but to testify as they did, but good faith is not sufficient to validate a procedurally invalid proceeding.

Shareholder Agreements

The shareholders of a start-up company often work together intensively. If a shareholder sells her stock to someone who does not share the same vision, conflict is inevitable. To avoid this situation, shareholders of start-ups often sign a shareholder agreement granting a right of first refusal on the company's stock. In a typical agreement, if a shareholder wants to sell, she must first offer the stock to the company at the same price that the outsider has offered. If, after 30 days, the company has not agreed to buy the stock, she must then offer it to the other shareholders. Only if they also refuse to buy it within 30 days can she then sell it to an outsider at the same price that she offered to the company and shareholders.

---

[5][The] cell phone bills for the [director who is supposed to have received a call in the London airport] do not show any incoming calls to him at Heathrow Airport at 3:00 p.m., London time, which is when the meeting is said to have started. Since [his] cell phone provider was located in Ireland where he lived, [this director] would have incurred a roaming charge for any calls received outside of Ireland, and the roaming charge would have been reflected on his cell phone bill.

[6]For example, Mr. Tramontana's telephone records show that he made an 11-minute telephone call to Mr. Graticola's cell phone number at 7:12 p.m.—a time that Mr. Tramontana claimed to have had Mr. Graticola's cell phone in his possession.

Similarly, if a shareholder dies, his estate may be required to offer the stock to the company or other shareholders. In the case of death, it is more difficult to determine the market value of the stock, so the shareholder agreement often provides a formula for making this determination.

Sometimes shareholder agreements focus not on who owns the company but how their stock is voted. For example, Craig O. McCaw was willing to sell a majority interest in Cellular One to Affiliated Publications, but he was not willing to give up control of the company. After all, he had single-handedly built it into the largest cell phone company in the United States. His solution? McCaw and Affiliated entered into a shareholder agreement requiring Affiliated to vote its stock in Cellular One as McCaw directed. Affiliated trusted McCaw's business acumen enough to want him to continue running the company even though he was only a minority shareholder. This same goal can be achieved by means of a so-called voting trust.

Issuing Debt

Most start-up companies begin with some combination of equity and debt. Equity (i.e., stock) is described in the charter; debt is not. Authorizing debt is often one of the first steps a new company takes. There are several types of debt:

Bonds
Long-term secured debt.

Debentures
Long-term unsecured debt.

Notes
When issued by a company, short-term debt, typically payable within five years.

- **Bonds** are long-term debt secured by some of the company's assets. If the company is unable to pay the debt, creditors have a right to specific assets, such as accounts receivable or inventory.
- **Debentures** are long-term *unsecured* debt. If the company cannot meet its obligations, the debenture holders are paid after bondholders, but before stockholders.
- **Notes** are short-term debt, typically payable within five years. They may be either secured or unsecured.

Foreign Corporations

A company is called a *domestic* corporation in the state where it incorporates and a *foreign* corporation everywhere else.

Ned has sworn that he will never again suffer through a bitter Chicago winter. No, he is not relocating; he has invented a new fabric that looks like fur. It is better than real fur, though, because it breathes, repels water, and is washable. He knows that his business will soon be a national success.

Ned, like many entrepreneurs before him, incorporates Fabulous Fake Furs, Inc. (FFF), in Delaware. He is still, however, living in Chicago (where he now *adores* the winter). Company headquarters are down the street from his condominium. The main manufacturing facility is in Texas, with warehouses in Minnesota and New York. A sales staff calls on all the major department stores and online merchants across the country.

Ned has obligations to the state of Delaware because he incorporated there—he must pay taxes and annual fees. But what about the other states where he is doing business? Someone had to pay to build the roads and educate the workforce in these states. Must he contribute, too? The states certainly think so. They require a foreign corporation that is doing business within their borders to register with them and obtain a "certificate of authority." This registration process is called **qualifying to do business**.

Qualifying to do business
Registering a corporation in a state in which it is not organized but in which it has an ongoing presence.

What constitutes "doing business"? **Opening an office or establishing any other ongoing presence counts as doing business.** Clearly, FFF must register in Illinois, Texas, Minnesota, and New York because it has a permanent presence in these states. Typically, the following activities do *not* count as doing business: holding meetings, opening a bank account, soliciting sales orders, or any isolated transaction. If FFF's directors hold a meeting in Alaska, Ned attends a trade show in Wisconsin, or a sales rep takes an order

at a store in California, these activities do not constitute doing business, and FFF does not have to register in these states.

To qualify, a company must file corporate documents with the state, list a registered agent, and pay annual fees and taxes on income generated in that jurisdiction. As a general rule, of course, companies would prefer not to register. Some states fine any companies they catch doing business without registering. Under the Model Act, a company that is doing business without qualifying cannot bring a lawsuit in that state until it registers (and pays back fees, taxes, and penalties). But note that, if the company is not actually doing business, then it may file suit without qualifying first. And whether or not it has qualified, a company can always *defend* against a lawsuit.

EXAM Strategy

Question: You are about to form a corporation. What do you have to do before filling out the form? Which provisions are boilerplate and, therefore, do not require special effort on your part?

Strategy: Review the description of required and optional charter provisions.

Result: Before filling out the form, you need to choose a name and check to make sure it is available. If you are incorporating someplace where you do not have an office, you will also have to hire a registered agent. You do not have to decide the purpose of the corporation; standard boilerplate works here. Unless you will have outside investors from the beginning, you do not have to think a lot about your capital structure—that is, the number and par value of your shares. Just authorize as many shares as you can for the base filing fee, and choose a nominal par value. It makes sense to add an exculpatory clause to protect your directors from liability, especially if you are going to be one. There is no need for cumulative voting at this stage.

Death of the Corporation

Sometimes, business ideas are not successful and the corporation fails. This death can be voluntary (the shareholders elect to terminate the corporation) or forced (by court order). Sometimes, a court takes a step that is much more damaging to shareholders than simply dissolving the corporation—it removes the shareholders' limited liability.

Piercing the Corporate Veil

One of the major purposes of a corporation is to protect its owners—the shareholders—from personal liability for the debts of the organization. Sometimes, however, a court will **pierce the corporate veil**; that is, the court will hold shareholders personally liable for the debts of the corporation. Courts generally pierce a corporate veil in four circumstances:

Pierce the corporate veil
A court holds shareholders personally liable for the debts of the corporation.

- *Failure to observe formalities.* If an organization does not act like a corporation, it will not be treated like one. It must, for example, hold required shareholders' and directors' meetings (or sign consents), keep a minute book as a record of these meetings, and make all the required state filings. Even a corporation with only one shareholder must comply with these formalities. Sole shareholders usually just sign a written consent in lieu of a meeting. In addition, as we saw in the *GS Petroleum* case, officers must be careful to sign all corporate documents with a corporate title,

not as an individual. Otherwise, creditors may well be in doubt about whether they were dealing with an individual or a corporation. An officer should sign like this:

Classic American Novels, Inc.
By: Stephen Crane
Stephen Crane, President
If he signs simply "Stephen Crane," creditors may successfully claim that he is personally liable.

- *Commingling of assets.* Nothing makes a court more willing to pierce a corporate veil than evidence that shareholders have mixed their assets with those of the corporation. Sometimes, for example, shareholders use corporate assets to pay their personal debts or even mix corporate and personal funds in one bank account. If shareholders commingle assets, it is genuinely difficult for creditors to determine which assets belong to whom. This confusion is generally resolved in favor of the creditors—*all* assets are deemed to belong to the corporation.

- *Inadequate capitalization.* If the founders of a corporation do not raise enough capital (either through debt or equity) to give the business a fighting chance of paying its debts, courts may require shareholders to pay corporate obligations. Therefore, if the corporation does not have sufficient capital, it needs to buy insurance, particularly to protect against tort liability. Judges are likelier to hold shareholders liable if the alternative is to send an injured tort victim away empty-handed. For example, Oriental Fireworks Co. had hundreds of thousands of dollars in annual sales but only $13,000 in assets. The company did not bother to obtain any liability insurance, keep a minute book, or defend lawsuits. There was no need because the company had no money. But then a court pierced the corporate veil and found the owner of the company personally liable.[7]

- *Fraud.* Corporations cannot be used to shelter fraud. Imagine that a con artist forms a corporation entitled Brooklyn Bridge, Inc. He then sells shares in the organization by convincing "investors," aka "victims," that the company really does own the famous New York landmark. If he is caught, the victims can go after his personal assets, even though the fraud was committed in the name of a corporation.

The following case is a good example of when a court should pierce the corporate veil.

If the owner of this amusement park fails to purchase adequate insurance, its shareholders may be personally liable.

[7] *Rice v. Oriental Fireworks Co.*, 75 Or. App. 627, 707 P.2d 1250, 1985 Ore. App. LEXIS 3928.

Brooks v. Becker

2005 Va. Cir. LEXIS 13
Circuit Court of Fairfax County, Virginia, 2005

Facts: Ronald Becker was the sole shareholder, officer, and director of Becker Interiors. Becker and his partner, Robert LaPointe, used approximately $300,000 of Becker Interiors' funds to renovate their residence, pay their personal credit card bills, and invest in another company of which Becker was president. Becker sold a corporate car for $73,700 and deposited those funds into his personal account, along with the corporation's income tax refund check of $12,850.

Becker Interiors supervised the major renovation of a house in McLean, Virginia. The company hired Stephen Brooks as a subcontractor on the project. When the company refused to pay Brooks, he filed suit, winning a judgment against the company for $54,597.09. But it turned out that Becker Interiors had no assets.

Brooks then sued Ronald Becker in an attempt to pierce the corporate veil and hold Becker personally liable for the debts of the corporation.

Issues: ***Can Brooks pierce the corporate veil? Is Becker personally liable for the debts of the corporation?***

Excerpts from Judge Roush's Decision: The decision to ignore the separate existence of a corporate entity and impose personal liability upon shareholders for debts of the corporation is an extraordinary act to be taken only when necessary to promote justice. Disregarding the corporate entity is usually warranted only under the extraordinary circumstances where: the shareholder sought to be held personally liable has controlled or used the corporation to evade a personal obligation, to perpetrate fraud or a crime, to commit an injustice, or to gain an unfair advantage. Piercing the corporate veil is justified when the unity of interest and ownership is such that the separate personalities of the corporation and the individual no longer exist and to adhere to that separateness would work an injustice.

In this case, the evidence convinces the court that the extraordinary remedy of piercing the corporate veil should be granted. Becker knowingly violated his duties as an officer, director, and shareholder of Becker Interiors and treated the corporation's funds as his personal piggy bank. His testimony that the corporate expenditures on his personal residence were a legitimate business expense because he wanted to use the residence as a showcase of his work was simply not credible. Nor did the court believe Becker's testimony that he commingled his personal funds with the corporation's funds on the advice of his accountant. The court found more credible Becker's later testimony that his accountant was "mystified" by his comingling of funds between his personal and corporate accounts.

Accordingly, the court will enter judgment against Becker in the amount of $54,597.09.

EXAM Strategy

Question: Jose is an employee and shareholder of Birdsong, a company that sells farm equipment. Jose shows Marta how to use the hay baler she has just bought from the company. He also gives her an instructional pamphlet that Birdsong had prepared. Unfortunately, Jose's advice is wrong, and so is the pamphlet's. Marta is injured while using the baler. It turns out that Birdsong's charter was revoked for failure to make the required annual filings with the Arkansas Secretary of State. In all other ways, Birdsong operated as a corporation. Is Birdsong liable to Marta? Is Jose personally liable to her?

Strategy: In theory, Jose could be liable as a shareholder because the charter of the corporation had been revoked or if the corporate veil was pierced. In addition, he could be personally liable for his own wrongdoing.

Result: Birdsong is liable for its carelessness in preparing the pamphlet. Although Birdsong was not technically a corporation, it has operated as one. Therefore, under the theory of corporation by estoppel, Jose is not liable. Nor has Birdsong done anything to warrant its veil being pierced. Jose is, however, liable for his own negligence. Therefore, he is liable for the bad advice he gave Marta.

Termination

Terminating a corporation is a three-step process:

- *Vote.* The directors recommend to the shareholders that the corporation be dissolved, and a majority of the shareholders agree.
- *Filing.* The corporation files "Articles of Dissolution" with the Secretary of State.
- *Winding up.* The officers of the corporation pay its debts and distribute the remaining property to shareholders. When the winding up is completed, the corporation ceases to exist.

The Secretary of State may dissolve a corporation that violates state law by, for example, failing to pay the required annual fees. Indeed, many corporations, particularly small ones, do not bother with the formal dissolution process. They simply cease paying their annual fees and let the Secretary of State act. A court may dissolve a corporation if it is insolvent or if its directors and shareholders cannot resolve conflict over how the corporation should be managed. The court will then appoint a receiver to oversee the winding up.

Chapter Conclusion

Virtually every businessperson will, at some point, work for a corporation or own shares in one. Indeed, corporations are so important that we devote three chapters to them. Although they are an exceedingly useful form of organization, they are also exceedingly formal. State corporation codes contain precise rules that must be followed to the letter. To do otherwise is to court disaster.

Exam Review

1. **PROMOTERS** Promoters are personally liable for contracts they sign before the corporation is formed unless the corporation and the third party agree to a novation. (p. 816)

EXAM Strategy

Question: Ajouelo signed an employment contract with Wilkerson. The contract stated: "Whatever company, partnership, or corporation that Wilkerson may form for the purpose of manufacturing shall succeed Wilkerson and exercise the rights and assume all of Wilkerson's obligations as fixed by this contract." Two months later, Wilkerson formed Auto-Soler Co. Ajouelo entered into a new contract with Auto-Soler that provided that the company was liable for Wilkerson's obligations under the old contract. Neither Wilkerson nor the company ever paid Ajouelo. He sued Wilkerson personally. Does Wilkerson have any obligations to Ajouelo?

Strategy: A promoter is not liable for a contract he signed on behalf of a yet-to-be-formed corporation if the third party (in this case, Wilkinson) agrees to a novation. (See the "Result" at the end of this section.)

2. **STATE OF INCORPORATION** Companies generally incorporate in the state in which they will be doing business. However, if they intend to operate in several states, they may choose to incorporate in a jurisdiction known for its favorable corporate laws, such as Delaware or Nevada. (pp. 816–817)

3. **THE CHARTER**

Required Provisions A corporate charter must generally include the company's name, address, registered agent, purpose, and a description of its stock. The charter must be signed by at least one incorporator. (pp. 820–824)
Optional Provisions A company's charter may include a number of optional provisions, such as cumulative voting and indemnification for officers and directors. (pp. 824–826)

EXAM Strategy

Question: Does par value matter? Did it ever?

Strategy: There are a lot of terms in this chapter, but it is a good idea to remember what they mean because you are likely to hear them again in your life as a businessperson. (See the "Result" at the end of this section.)

Question: At this writing, TheFacebook, Inc. is estimated to have 2.2 billion shares outstanding and four directors. Without cumulative voting, how many shares would you have to purchase to be sure of electing yourself to the board? If the company's charter required cumulative voting, how many shares would you have to buy to achieve this goal? What if there were 15 directors?

Strategy: The formula is

$$\text{Number of shares needed to elect one director} = \frac{\text{Number of shares outstanding}}{\text{Number of directors being elected} + 1} + 1$$

(See the "Result" at the end of this section.)

4. **FOREIGN CORPORATION** A corporation must register in every state in which it is doing business. (pp. 830–831)

5. **PIERCING THE CORPORATE VEIL** A court may, under certain circumstances, pierce the corporate veil and hold shareholders personally liable for the debts of the corporation. (pp. 831–834)

6. **TERMINATION** Termination of a corporation is a three-step process requiring a shareholder vote, the filing of "Articles of Dissolution," and the winding up of the enterprise's business. (p. 834)

1. Result: Wilkerson may have had an ethical obligation to Ajouelo but not a legal one. The court held that the second contract was a novation, which ended Wilkerson's obligations under the first contract.

3. Result: *First question:* The original purpose of par value was to protect shareholders from unscrupulous managers who wanted to issue stock at below market value. Now, it has no purpose other than as the basis for state filing fees. The only issue is that you want to set it low enough that it does not trigger a higher-than-necessary fee.
Second question: Without cumulative voting, you would have to buy 1 share more than 1.1 billion shares. With four directors, you would have to buy 1 share more than 440 million. With 15 directors, you would have to buy 1 share more than 137.5 million.

MULTIPLE-CHOICE QUESTIONS

1. **CPA QUESTION** Generally, a corporation's articles of incorporation must include all of the following **except** the:
   (a) Name of the corporation's registered agent
   (b) Name of each incorporator
   (c) Number of authorized shares
   (d) Quorum requirements

2. **CPA QUESTION** Destiny Manufacturing, Inc., is incorporated under the laws of Nevada. Its principal place of business is in California, and it has permanent sales offices in several other states. Under the circumstances, which of the following is correct?
   (a) California may validly demand that Destiny incorporate under the laws of the state of California.
   (b) Destiny must obtain a certificate of authority to transact business in California and the other states in which it does business.
   (c) Destiny is a foreign corporation in California, but *not* in the other states.
   (d) California may prevent Destiny from operating as a corporation if the laws of California differ regarding organization and conduct of the corporation's internal affairs.

3. **CPA QUESTION** A corporate stockholder is entitled to which of the following rights?
   (a) Elect officers
   (b) Receive annual dividends
   (c) Approve dissolution
   (d) Prevent corporate borrowing

4. Participating preferred stockholders:
   (a) only receive payment after other preferred shareholders have been paid
   (b) only receive payment after common shareholders have been paid
   (c) are treated like both a preferred shareholder and a common shareholder
   (d) receive all their payments before all other shareholders

5. Debentures are:
   (a) long-term secured debt
   (b) short-term secured debt
   (c) long-term unsecured debt
   (d) short-term unsecured debt

6. If the terms of a company's charter and bylaws conflict, which governs?
   (a) The charter governs.
   (b) The bylaw governs.
   (c) They are both invalid.
   (d) Shareholders must vote to determine which is valid.

ESSAY QUESTIONS

1. In the *GS Petroleum* case earlier in this chapter, what should the signature line have looked like?

2. Michael incorporated Erin Homes, Inc., to manufacture mobile homes. He issued himself a stock certificate for 100 shares for which he made no payment. He and his wife served as officers and directors of the organization, but, during the eight years of its existence, the corporation held only one meeting. Erin always had its own checking account, and all proceeds from the sales of mobile homes were deposited there. It filed federal income tax returns each year using its own federal identification number. John and Thelma paid $17,500 to purchase a mobile home from Erin, but the company never delivered it to them. John and Thelma sued Erin Homes and Michael, individually. Should the court "pierce the corporate veil" and hold Michael personally liable?

3. The Resolution Trust Corp. (RTC) sued the directors of the Commonwealth Savings Association seeking to recover from them personally $200 million that the bank lost in bad real estate loans. The directors approved the loans after state and federal regulatory agencies had issued reports criticizing the bank's loan practices. The directors failed to implement policies and procedures to prevent problems with the loan portfolio and failed to monitor loan officers adequately. There was no evidence that the directors knowingly committed illegal acts or acts outside their authority. Under Texas law, the RTC could recover for the directors' negligence only if their acts were *ultra vires*. Were these acts *ultra vires?*

4. Waste Management, Inc., the country's largest waste hauler, changed its name to WMX Technologies, Inc. Similarly, U.S. Steel changed its moniker to USX Corp. and

American Airlines became AMR Corp. What legal steps would be necessary for these companies to protect their new corporate names?

5. Dickens, Inc. is a bookstore incorporated in Nevada. From its warehouse in Montana, it ships books to all 50 states. The company's owner lives in New York, and its web designer lives in California. Where is Dickens a domestic corporation? Where must it qualify to do business?

Discussion Questions

1. In the *Loudeye* case, the court ruled that if the charter has an exculpatory clause, directors are not liable unless they are grossly negligent, motivated by an actual intent to do harm, or intentionally disregard their responsibilities. Is that a reasonable standard?

2. **ETHICS** In the *Bigmar* case, the court clearly believed that the directors had lied on the witness stand. Should the directors have been charged with perjury? Did they do the right thing when they lied on the stand to protect their company from the evil Ms. May?

3. Angelica is planning to start a home security business in McGehee, Arkansas. She plans to start modestly but hopes to expand her business within 5 years to neighboring towns and, perhaps, within 10 years to neighboring states. Her inclination is to incorporate her business in Delaware. Is her inclination correct?

4. States compete for lucrative filing fees by passing corporate statutes that favor management. One proposed solution to this problem would be a federal system of corporate registration. Is this a good idea? What are the impediments to such as system?

5. Ford Motor Co. and TheFacebook, Inc. have both created dual classes of stock so that the founders can continue to control their company even after it goes public. Should corporate laws permit this? Should some shareholders be more equal than others? If the founders want to control a company, why shouldn't they buy enough regular stock to do so?

CHAPTER 34

Corporate Management

© Evan Meyer/Shutterstock.com

Rick says: Bob and I own a bar and restaurant in Nevada. It's a pretty good business, but what really brings in the bucks is the keno game in the lounge. Keno is like bingo, only you get to choose the numbers you play. Here is the weird thing—there is absolutely *no* skill involved, but people just *love* to play the game. It is a license to print money. It's as if the folks just want to hand us their cash. We have each pulled in 4 *million* big ones since we bought this business.

You'd think that amount of money would be enough to get Bob's attention, but he acts like the business just runs itself. He can barely be bothered to show up. So I've set up a meeting with city officials, hoping to convince them to put the keno contract up for bid. I'll get the contract in my own name and cut Bob out. He's nothing but dead weight.

Bob says: Whine, whine, whine. Something must be going right with our business; we've made four million bucks, for Pete's sake. It's true that I don't spend as much time at the restaurant as Rick does, but then again, my girlfriend isn't the "manager" there. What Rick's doing there doesn't really count as work. Also, any time he asks me to do something, I'm all over it. I don't know what he's so hot and bothered about.

It's true that I don't spend as much time at the restaurant as Rick does, but then again, my girlfriend isn't the "manager" there.

What obligations does Rick have to the business he owns with Bob? In a similar case later in the chapter—*Anderson v. Bellino*—the court ruled that Rick could not take the keno contract away from their jointly owned corporation. Read on to see why.

Stakeholder
Anyone who is affected by the activities of a corporation, such as employees, customers, creditors, suppliers, shareholders, and neighbors.

Corporations are complicated creatures with many different interest groups: shareholders, officers, directors, and **stakeholders**, such as the community, employees, suppliers, creditors, and customers. Business life was not always so complicated. Before the Industrial Revolution in the 18th and 19th centuries, a business owner typically supplied both capital and management. However, the cash needs of the great manufacturing enterprises spawned by the Industrial Revolution were larger than any small group of individuals could supply. To find capital, firms sought outside investors, who often had neither the knowledge nor the desire to manage the enterprise. Investors without management skills complemented managers without capital. (Throughout these corporation chapters, the term "manager" includes both directors and officers.)

Modern businesses still have the same vast need for capital and the same division between managers and investors. Because shareholders are too numerous and too uninformed to manage the enterprises they own, they elect directors to manage for them. The directors set policy and then appoint officers to implement corporate goals. The Model Business Corporation Act describes the directors' role thus: "All corporate powers shall be exercised by or under the authority of, and the business and affairs of the corporation managed by or under the direction of, its board of directors…."[1]

Directors have the authority to manage the corporate business, but they also have important responsibilities to shareholders and stakeholders. However, the interests of these various groups often conflict. In the 2000s, the world faced two financial crises which were caused, in part, by corporate executives who engaged in highly risky activities that left them wealthy and their shareholders broke. Because of abuses by managers that in some cases included outright fraud, Congress and other regulators have tried to rebalance the power among managers, shareholders, and stakeholders. Part of their goal has been to enhance shareholder oversight of the companies they own. These two chapters are about this balance of rights and responsibilities.

MANAGERS VERSUS SHAREHOLDERS: THE FUNDAMENTAL CONFLICT

The following newspaper excerpt illustrates the natural conflict between managers and shareholders:

> The mood here in reaction to the sale of *The Los Angeles Times* to the Tribune Company may have been best summed up by Mark H. Willes, the company's chairman, when he left the board meeting that approved the transaction late Sunday evening. Mr. Willes burst into tears and wept openly, according to several people who saw him. The sale of the paper and its parent, the Times Mirror Company, would make Mr. Willes an immensely wealthy man. And it would earn tens of thousands of dollars, in some instances more, for each of the reporters, editors and many other employees of the Times Mirror Company who hold stock and stock options.
>
> But for many people in this city, both in *The Los Angeles Times* newsroom and outside, the deal felt humiliating, they said, as if something precious had been stolen away. "There is a feeling that yesterday, a part of this city's soul was *The Los Angeles Times*," said Geoffrey Cowan, dean of the Annenberg School of Communications at the University of Southern California. "I'm not sure how much that is true tomorrow." He added, "There is a loss of identity."

[1] A committee of the American Bar Association drafted the Model Business Corporation Act to serve as a guideline for states to use when enacting a corporate code. More than half the states have now adopted some version of it. The corporate statutes of Delaware also serve as a model for other states.

> Within the newsroom, many people expressed anger that the Chandler family, which has controlled the company for decades, had sold the company to an outsider, in spite of assurances in recent years that it never would. "The Chandler family long ago lost interest in running a newspaper and they're just interested in the profits," said Ken Reich, a columnist who has worked at *The Los Angeles Times* for 35 years.[2]

This episode illustrates the ongoing debate over corporate governance in America. Managers serve at least three masters: themselves, shareholders, and other stakeholders. These masters have conflicting goals:

- **Managers** want two things: first, to keep their jobs, and second, to build an institution that will survive them. Mark Willes, chairman of *The Los Angeles Times*, wept when his company was sold despite the immense wealth he received from the sale. To him, the job was what mattered.
- **Shareholders** want a high stock price, *right now*, not five years from now. As owners, the members of the Chandler family cared more about their own profits than they did about the newspaper and its important role in the life of the city.
- **Stakeholders**, those who work for the *Los Angeles Times*, read it, sell it ink, or own the food shop across the street from its plant want the newspaper to stay in business. The speaker of the California State Assembly lamented the sale because the paper had been a booster for the whole city of Los Angeles. (Generally, managers are not included in the stakeholder category because their interests may be different from those of lower-level employees.)

Did the Chandler family have a legal or ethical obligation to consider the impact of this sale on the managers and stakeholders? Or should everyone simply accept that shareholders—and their profits—come first? Would it have been fair to shareholders if the managers had vetoed the sale? These are the difficult issues of corporate governance that companies face. Only one thing is clear: managers cannot please all the stakeholders all the time.

The courts have generally held that **managers have a fiduciary duty to act in the best interests of the corporation's shareholders**. Since shareholders are primarily concerned about their return on investment, managers must *maximize shareholder value*, which means providing shareholders with the highest possible financial return from dividends and stock price. However, reality is more complicated than this simple rule indicates. It is often difficult to determine which strategy will best maximize shareholder value. And what about *stakeholders*? Must managers totally ignore their interests? In the following landmark case, the court explicitly permits the board to consider the interests of stakeholders over those of some shareholders. Commentators have described this case as "the most innovative and promising case in our corporation law."

[2]James Sterngold, "In Los Angeles, Tears and a Feeling of Loss," p. C16. From *The New York Times*, March 14, 2000.

Landmark Case

Unocal Corp. v. Mesa Petroleum Co.

493 A.2d 946, 1985 Del. LEXIS 482
Supreme Court of Delaware, 1985

Facts: Mesa Petroleum Co. offered to purchase 64 million shares of Unocal's stock at a cash price of $54 per share. Upon merger of the two companies, Mesa planned to exchange the remaining Unocal shares for "junk bonds" that Mesa (but no one else, including the court) valued at $54 per share. Unocal's investment bankers advised the board of directors that the Mesa proposal was wholly inadequate and that an offer of over $60 per share would have been reasonable. The board rejected the Mesa offer and then made its own competing offer of $72 per share to all shareholders except Mesa. (This type of offer is called a "selective exchange offer.") The board's offer effectively preempted Mesa because no shareholder would accept the $54 Mesa offer when the $72 Unocal offer was also available. The Delaware court issued a preliminary injunction against Unocal's offer unless it included Mesa.

Issues: ***Could Unocal make an offer to buy stock from all shareholders except Mesa? In making this offer, did Unocal have the right to consider the interests of other stakeholders?***

Excerpts from Justice Moore's Decision: In the board's exercise of corporate power to forestall a takeover bid, our analysis begins with the basic principle that corporate directors have a fiduciary duty to act in the best interests of the corporation's stockholders. The restriction placed upon a selective stock repurchase is that the directors may not have acted solely or primarily out of a desire to perpetuate themselves in office. This entails an analysis by the directors of the nature of the takeover bid and its effect on the corporate enterprise. Examples of such concerns may include inadequacy of the price offered, nature and timing of the offer, questions of illegality, the impact on "constituencies" other than shareholders (i.e., creditors, customers, employees, and perhaps even the community generally), the risk of nonconsummation, and the quality of securities being offered in the exchange. While not a controlling factor, it also seems to us that a board may reasonably consider the basic stockholder interests at stake, including those of short term speculators, whose actions may have fueled the coercive aspect of the offer at the expense of the long-term investor.

In adopting the selective exchange offer, the board stated that its objective was either to defeat the inadequate Mesa offer or, should the offer still succeed, provide its stockholders with $72 a share. We find that both purposes are valid. However, such efforts would have been thwarted by Mesa's participation in the exchange offer. First, if Mesa could tender its shares, Unocal would effectively be subsidizing the former's continuing effort to buy Unocal stock at $54 per share. Second, Mesa could not, by definition, fit within the class of shareholders being protected from its own coercive and inadequate tender offer. Thus, we are satisfied that the selective exchange offer is reasonably related to the threats posed.

The decision of the Court of Chancery is therefore *reversed*, and the preliminary injunction is *vacated*.

Devil's Advocate In this case, the court says that the board cannot act with the primary goal of keeping itself in office. One could argue, however, that that is precisely what the board did. It *said* that it was concerned about stakeholders but, conveniently, stakeholder interests coincided precisely with its own. When forced to choose between shareholders, who in fact *own the company,* and stakeholders, why should the board be allowed to choose stakeholders? This choice seems particularly tainted given the board's conflict of interest.

A number of states have adopted statutes that codify the *Unocal* decision. These statutes permit directors, when making a decision, to consider, for example, "both the short-term and long-term best interests of the corporation, taking into account, and weighing

as the directors deem appropriate, the effects thereof on the corporation's shareholders and the other corporate constituent groups...."[3] The next section looks more closely at directors' responsibilities to their various constituencies.

Resolving the Conflict: The Business Judgment Rule

Officers and directors have a fiduciary duty to act in the best interests of their stockholders, but under the **business judgment rule,** the courts allow managers great leeway in carrying out this responsibility. The business judgment rule is a common law concept that has achieved national acceptance. It is a fundamental principle of corporate law. To be protected by the business judgment rule, managers must act in good faith:

Duty of Loyalty	1. Without a conflict of interest
Duty of Care	2. With the care that an ordinarily prudent person would take in a similar situation, and 3. In a manner they reasonably believe to be in the best interests of the corporation.

The business judgment rule is two shields in one: it protects both the manager and her decision. **If a manager has complied with the rule, a court will not hold her personally liable for any harm her decision has caused the company, nor will the court rescind her decision.** If the manager violates the business judgment rule, then she has the burden of proving that her decision was entirely fair to the shareholders. If it was not entirely fair, she may be held personally liable and the decision can be rescinded.

The business judgment rule accomplishes three goals:

- *It permits directors to do their job.* Business is risky. No one can guarantee perfect decision making all the time. If directors were afraid they would be liable for every decision that led to a loss, they would never make a decision, or at least not a risky one.
- *It keeps judges out of corporate management.* Shareholders would generally prefer that their investments be overseen by experienced corporate managers, not judges. Without the business judgment rule, judges would be tempted, if not required, to second-guess managers' decisions.
- *It encourages directors to serve.* No one in his right mind would serve as a director if he knew that every decision was open to attack in the courtroom. Even if the company pays the legal bills, who wants to spend years in litigation?

Analysis of the business judgment rule is typically divided into two parts. The obligation of a manager to act without a conflict of interest is called the **duty of loyalty**. The requirements that a manager act with care and in the best interests of the corporation are referred to as the **duty of care**.

Duty of loyalty
The obligation of a manager to act without a conflict of interest.

Duty of care
The requirement that a manager act with care and in the best interests of the corporation.

Duty of Loyalty

The duty of loyalty prohibits managers from making a decision that benefits them at the expense of the corporation.

[3] Indiana Code §23-1-35-1.

Self-Dealing

Self-dealing means that a manager makes a decision benefiting either himself or another company with which he has a relationship. While working at the Blue Moon restaurant, Zeke signs a contract on behalf of the restaurant to purchase bread from Rising Sun Bakery. Unbeknownst to anyone at Blue Moon, he is a part owner of Rising Sun. Zeke has engaged in self-dealing, which is a violation of the duty of loyalty.

Once a manager engages in self-dealing, the business judgment rule no longer applies. This does not mean the manager is automatically liable to the corporation or that his decision is automatically void. All it means is that the court will no longer presume that the transaction was acceptable. Instead, the court will scrutinize the deal more carefully. A self-dealing transaction is valid in any one of the following situations:

- **The disinterested members of the board of directors approve the transaction.** Disinterested directors are those who do not themselves benefit from the transaction.
- **The disinterested shareholders approve it.** The transaction is valid if the shareholders who do not benefit from it are willing to approve it.
- **The transaction was entirely fair to the corporation.** In determining fairness, the courts will consider whether the price was reasonable and the impact of the transaction on the corporation.

Exhibit 34.1 illustrates the rules on self-dealing.

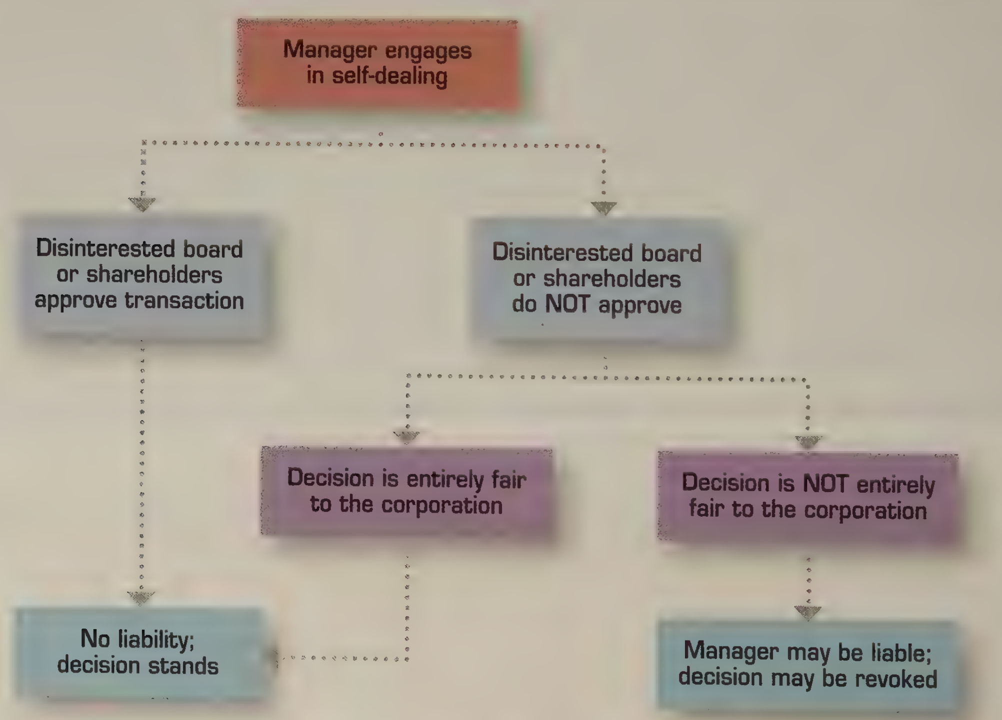

EXHIBIT 34.1

Corporate officers, especially in family businesses, sometimes forget that they do not have the right to do whatever they want. The following case illustrates the business judgment rule and also the enduring principle that litigation is a very sad method for resolving family disputes.

LIPPMAN V. SHAFFER

15 Misc. 3d 705; 836 N.Y.S.2d 766; 2006 N.Y. Misc. LEXIS 4212
Supreme Court of New York, 2006

Facts: Years ago, Harry Lippman purchased Despatch Industries, Inc., which manufactured hardware for cabinets. His son, James, worked for the company. Later, James's son, Wade, and son-in-law, Alan Shaffer, also went on the company payroll. Both young men signed identical employment contracts. After Wade and James had a falling out, Wade resigned from the company. The Despatch board agreed to pay $1.3 million to both Wade and Alan. Company tax returns referred to these as "severance" payments, although Alan continued to work for the company and receive a salary.

Wade filed suit against Alan and Despatch, alleging that the payments to Alan were improper and should be returned. The defendants argued that the payments were protected by the business judgment rule. Wade filed a motion for summary judgment.

Issue: ***Were the payments to Alan protected by the business judgment rule?***

Excerpts from Judge Fisher's Decision: Generally, the actions of directors are protected by the business judgment rule, which bars judicial inquiry into actions of corporate directors taken in good faith and in the exercise of honest judgment in the lawful and legitimate furtherance of corporate purposes. As such, the business judgment rule prevents a court from second-guessing corporate decision making.

[T]he business judgment rule is not applicable when the directors have an interest in the challenged transaction. Directors are self-interested in a challenged transaction where they will receive a direct financial benefit from the transaction which is different from the benefit to shareholders generally.

The court's first inquiry is whether the business judgment rule applies. Here, it does not. Plaintiffs have established that there was no contractual or other legitimate reason to give [Alan] the equivalent of the so-called severance payments made to Wade because the severance terms of [Alan's] employment contract covering such payments were not then triggered. To avoid liability, the board will have to demonstrate entire fairness by presenting evidence of the manner by which it otherwise discharged all of its fiduciary duties.

The difficulty in defendants' position lies in the undisputed fact that no events had transpired to trigger any severance payments to [Alan] under the agreements. [Alan] states the following rationale for the payments: "Whatever Wade got, I would get. Whatever I got, Wade would get." Inasmuch as severance payments were contractually due to Wade, but not to [Alan, his] payments may only be described as a gift of corporate assets and therefore he got more than Wade got, to the tune of $ 1.3 million.

[Wade's motion for summary judgment is granted.]

Corporate Opportunity

The self-dealing rules prevent managers from *forcing* their companies into unfair deals. The corporate opportunity doctrine is the reverse—it prohibits managers from *excluding* their company from favorable deals. **Managers are in violation of the corporate opportunity doctrine if they compete against the corporation without its consent.**

Long ago, Charles Guth was president of Loft, Inc., which operated a chain of candy stores. These stores sold Coca-Cola. Guth purchased the Pepsi-Cola Company personally, without offering the opportunity to Loft. The Delaware court found that Guth had violated the corporate opportunity doctrine and ordered him to transfer all his shares in PepsiCo to Loft.[4] That was in 1939 and Pepsi-Cola was bankrupt; today, PepsiCo, Inc., is worth more than $100 billion.

[4] *Guth v. Loft,* 5 A.2d 503, 23 Del. Ch. 255, 1939 Del. LEXIS 13 (Del. 1939).

If a manager suspects that company officers would be displeased to learn about his new sideline, that is an indication he is skating on thin ice.

If a manager first offers an opportunity to disinterested directors or shareholders, and they turn it down, the manager then has the right to take advantage of the opportunity himself. (Remember that "disinterested directors or shareholders" are those who do not personally benefit from the transaction.) Sometimes, however, either through oversight or ignorance, managers do not seek permission in advance. To avoid violating the corporate opportunity doctrine, the manager must show after the fact that the company would have been unable to benefit from the opportunity. For example, Cellular Information Systems, Inc., had just emerged from bankruptcy proceedings when one of its directors learned that a cell-phone license covering part of Michigan was for sale. The director purchased the license himself, and the company sued. The court found the director not liable because the company could not have afforded to purchase the license itself.[5]

A manager will often find it difficult to prove that the company could not have used an opportunity itself. However, these disputes are easy to avoid—the manager must simply ask permission first. Certainly, if a manager suspects that company officers would be displeased to learn about his new sideline, that is an indication that he is skating on thin ice.

In the following case, the manager felt that he had a good reason for taking a corporate opportunity. Unfortunately, the court disagreed.

Anderson v. Bellino

265 Neb. 577, 658 N.W.2d 645, 2003 Neb. LEXIS 49
Supreme Court of Nebraska, 2003

Facts: Richard Bellino and Robert Anderson formed LaVista Lottery, Inc. (Lottery) to operate a restaurant, lounge, and keno game in LaVista, Nevada. They each owned 50 percent of the stock of Lottery, and both were officers and directors.

During the next nine years, Lottery grossed more than $100 million. Bellino and Anderson each received over $4 million in salary and dividends. Although Bellino and Anderson were both involved in Lottery, Bellino spent more time, in part because of his personal relationship with Lottery's lounge manager. During this period, Bellino did not complain to Anderson about his lack of involvement in Lottery, and Anderson never refused to do anything that Bellino asked him to do.

Resentful of Anderson's work ethic, Bellino set up a meeting with LaVista's city administrator. Until that meeting, the city had been satisfied with Lottery's performance. But after the meeting, the administrator recommended to the city council that the keno contract be put up for competitive bid. Bellino incorporated LaVista Keno, Inc. (Keno) to bid on the contract.

Bellino wrote to Anderson complaining that he (Bellino) was doing too much work for Lottery at too little pay. (Evidently, $4 million is not as much as it used to be.) Therefore, Bellino intended to resign from Lottery and bid on the city contract himself. Anderson offered to do more work or whatever Bellino wanted, but Bellino refused any effort at reconciliation. He then submitted a bid on behalf of Keno. At the time he submitted the bid, Bellino was still an officer of Lottery, as well as a director and a 50 percent shareholder. Anderson also bid on the contract on behalf of Lottery. The city awarded the new contract to Keno.

Anderson and Lottery filed suit against Bellino and Keno, alleging that they had usurped a corporate opportunity. The lower court found for Anderson and Lottery. It ordered Bellino to pay $644,992.63 but provided that Bellino could receive a credit of $172,514.63 against the judgment if Bellino transferred the stock of Keno to Lottery and persuaded the city to relicense the keno contract from Keno to Lottery.

[5] *Broz v. Cellular Information Systems, Inc.*, 673 A.2d 148, 1996 Del. LEXIS 105.

Issues: ***Did Bellino usurp a corporate opportunity? Is he liable to Lottery?***

Excerpts from Justice Miller-Lerman's Decision: Bellino and Keno claim that if a corporate opportunity existed, it was limited to the opportunity to bid for the keno contract, that Bellino did nothing to impede Lottery from bidding for the keno contract by merely submitting a competing bid, and that, therefore, Bellino did not usurp a corporate opportunity.

Contrary to the arguments asserted by Bellino and Keno, the corporate opportunity was not the right to bid; the bidding process was merely the "preliminary step" by which Lottery sought to acquire the opportunity embodied in the award of the keno contract. The facts thus establish that the keno contract was a corporate opportunity for Lottery.

When discussing a corporate officer or director's fiduciary duty to the corporation, we have stated:

> Although an officer or a director of a corporation is not necessarily precluded from entering into a separate business because it is in competition with the corporation, his fiduciary relationship to the corporation and its stockholders is such that if he does so he must prove that he did so in good faith and did not act in such a manner as to cause or contribute to the injury or damage of the corporation, or deprive it of business; if he fails in this proof, there has been a breach of that fiduciary trust or relationship.

The evidence is uncontroverted that Bellino's successful bid for the LaVista keno contract deprived Lottery of its only source of business. Bellino, through Keno, should not have competed with Lottery for the LaVista keno contract.

We affirm the district court's order.

EXAM Strategy

Question: Otto signed a lease with Landlord on a storefront in Georgetown, in Washington, D.C. He convinced his nephew Nick to start a furniture store in the space. Otto and Nick formed a corporation to operate the store. Otto owned 51 percent and Nick 49 percent of the company's stock. Otto signed a lease between himself and the store at a price that was 20 percent higher than the rent Otto was paying Landlord. Otto purchased a warehouse and then rented it to the corporation at a fair market rent. Nick sued, alleging that the two leases were not valid. Were they?

Strategy: Under the business judgment rule, the courts will not second-guess a corporate action. However, if a manager engages in self-dealing, the business judgment rule does not apply.

Result: Otto violated the duty of loyalty twice. The lease for the storefront was self-dealing—it directly benefited him. When he purchased the warehouse, he took a corporate opportunity that he should have offered first to the company. He is personally liable for any damages to the corporation. The company also has the right to cancel both leases and to purchase the warehouse from him.

Duty of Care

In addition to the *duty of loyalty*, managers also owe a *duty of care.* **The duty of care requires officers and directors to act in the best interests of the corporation and to use the same care that an ordinarily prudent person would in a similar situation.** An ordinarily prudent person would have a rational business purpose, avoid illegal behavior, and make informed decisions. Officers and directors of corporations must do no less.

Rational Business Purpose

Courts generally agree in principle that directors and officers are liable to shareholders for decisions that have no rational business purpose. In practice, however, these same courts have been extremely supportive of managerial decisions, looking hard to find some

justification. For years, the Chicago Cubs baseball team was the only major American professional sports team whose home field did not have lights. Cubs fans could only take themselves out to the ball game during the day. A shareholder sued on the grounds that the Cubs' revenues were peanuts and Cracker Jack compared with those generated by other teams that played at night. The Cubs defended their decision on the grounds that a large night crowd would cause the neighborhood to deteriorate, depressing the value of Wrigley Field (which was not owned by the Cubs). The court rooted for the home team and found that the Cubs' excuse was a "rational purpose" and a legitimate exercise of the business judgment rule.[6]

If a decision does not have a rational business purpose, the managers are liable and the decision can be rescinded. If a court decides that there is a rational business purpose, both the manager and the decision are protected.

Legality

Courts are generally unsympathetic to managers who engage in illegal behavior, even if their goal is to help the company. For example, the managing director of an amusement park in New York used corporate funds to purchase the silence of people who threatened to complain that the park was illegally operating on Sunday. The court ordered the director to repay the money he had spent on bribes, even though the company had earned large profits on Sundays.[7]

Informed Decision

Generally, courts will protect managers who make an *informed* decision, even if the decision ultimately harms the company. Making an informed decision means carefully investigating the facts. However, even if the decision is uninformed, the directors will not be held liable if the decision was entirely fair to the shareholders. The board of Technicolor, Inc., agreed to sell the film processing company, knowing little about the terms of the deal and without seeking other bidders. The directors simply knew that the sales price was higher than the appraised value of the company. Five years later, the buyer sold the company for a $750 million profit. The former shareholders sued, alleging that the directors had made an uninformed decision. The state supreme court held that, because the directors had been so careless, they had to prove that the price and the process by which it had been determined were both fair.[8]

Exhibit 34.2 provides an overview of the duty of care.

---

[6] *Shlensky v. Wrigley*, 95 Ill. App. 2d 173, 237 N.E.2d 776, 1968 Ill. App. LEXIS 1107 (Ill. App. Ct. 1968).

[7] *Roth v. Robertson*, 64 Misc. 343, 118 N.Y.S. 351, 1909 N.Y. Misc. LEXIS 279 (N.Y. 1909).

[8] The state supreme court sent the case back to the lower court to determine whether the deal had been fair to the shareholders. *Cede & Co., Inc. v. Technicolor, Inc.*, 634 A.2d 345, 1993 Del. LEXIS 398 (Del. 1993). The lower court ultimately decided that the transaction had indeed been fair. *Cinerama, Inc. v. Technicolor, Inc.*, 663 A.2d 1134, 1994 Del. Ch. LEXIS 178 (Del. Ch. 1994). The state supreme court, however, disagreeing with the valuation method used by the trial court, reversed that decision and remanded it once again to the trial court for further proceedings. *Cede & Co. v. Technicolor*, 684A.2d 289, 1996 Del. LEXIS 386 (Del. 1996). Yet again, in 2000, the Delaware Supreme Court (somewhat apologetically) overruled the trial court and returned the case for another trial. *Cede & Co. v. Technicolor, Inc.*, 758 A.2d 485, 2000 Del. LEXIS 283 (Del. 2000). The results from this trial were again appealed. Finally, in 2005, the Supreme Court of Delaware upheld most of the trial court rulings and remanded with simple instructions to change the interest rate it used to calculate damages. *Cede & Co. v. Technicolor, Inc.*, 2005 Del. LEXIS 177 (Del. 2005). The original sale of stock took place in 1983. This has been the longest case in the 200-year history of the Delaware Court of Chancery.

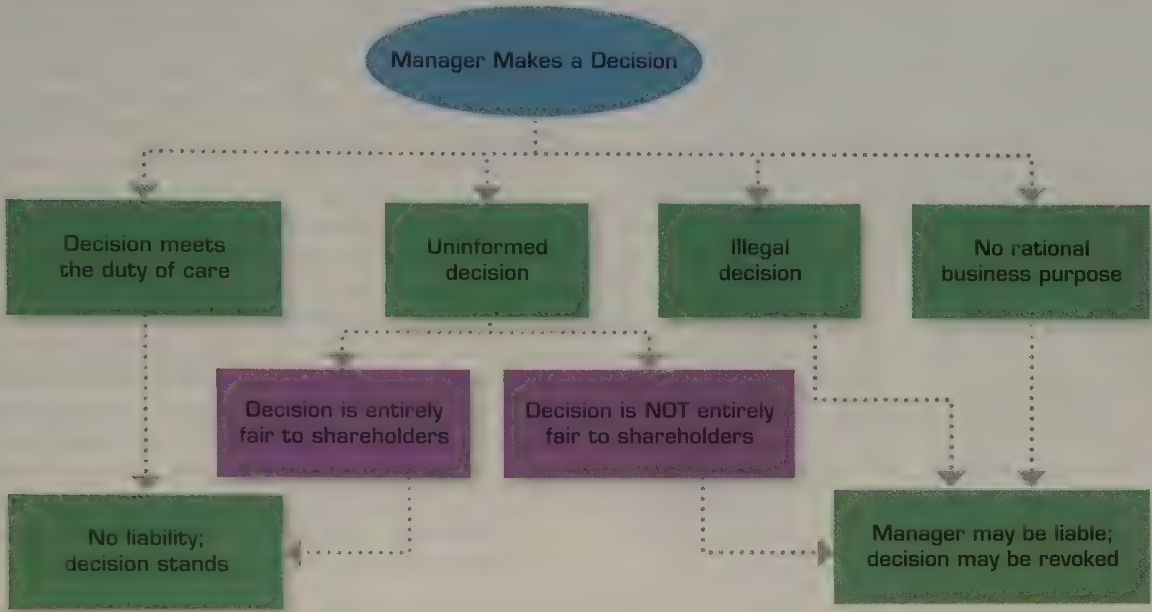

EXHIBIT 34.2

In the following case, the board of directors failed to hold meetings. Were their decisions informed?

RSL Communications v. Bildirici

2006 U.S. Dist. LEXIS 67548
United States District Court for the Southern District of New York, 2006

Facts: Ronald S. Lauder founded RSL Ltd., a multinational telecommunications corporation. RSL Plc was a subsidiary of RSL Ltd. The subsidiary began by issuing \$1.4 billion of bonds. A few years later, in July, Lauder provided it with a \$100 million line of credit. The company's board of directors did not hold a meeting to approve the Lauder loan. In August, RSL Plc drew down \$25 million from that loan. The following March, the company's directors held their first board meeting in a year. Five days later, RSL Plc filed for bankruptcy.

The issue before the court is whether the members of the board of directors of RSL Plc breached their duty of care to the company when they failed to hold a board meeting for a year at a time when the company was in a precarious financial position.

Issue: ***Did the directors of RCL Plc violate their duty of care to the corporation?***

Excerpts from Judge Karas's Decision: Under New York law, a director shall perform his duties as a director, in good faith and with that degree of care which an ordinarily prudent person in a like position would use under similar circumstances. It is well settled that the duty of due care requires that a director's decision be made on the basis of reasonable diligence in gathering and considering material information.

When faced with allegations of misconduct, a defendant director may raise the business judgment rule as an absolute defense. [U]nder Delaware law the business judgment rule applies even where conclusions were stupid or irrational, as long as the process employed was either rational or employed in a *good faith* effort to advance corporate interests.

Although the standard of review for business judgments is deferential, to receive the protection of the business judgment rule, a director must show an exercise of judgment, not simply the existence of a business decision. Directors' fiduciary duties require them to do more than passively rubber-stamp the decisions of the active managers. Thus, where the directors' methodologies and procedures are so restricted in

scope, so shallow in execution, or otherwise so *pro forma* or halfhearted as to constitute a pretext or a sham, inquiry into their acts is not shielded by the business judgment rule. The Directors may not seek the protection of the business judgment rule on the ground that they made no decisions and took no actions.

It is undisputed that the Defendants did not hold board meetings on behalf of RSL Plc during the time period relevant to this action. Despite this, RSL Plc still operated and took actions such as drawing down $25 million from the Lauder loan, apparently at the direction of RSL Ltd. However, no independent board discussions regarding the propriety of this and other business decisions were held on behalf of RSL Plc by its board of directors.

Indeed, the law does not tolerate inaction of the sort Defendants are alleged to have engaged in, as Defendants allegedly failed to consider any information they had regarding the company's financial health and allegedly failed to make a business judgment as a board regarding any financial decision on behalf of RSL Plc.

Defendants point to cases which hold that small, closely held corporations with directors frequently in close contact with one another may dispense with formalities such as board meetings when making business decisions. However, RSL Plc is not a small corporation, as it accrued more than $1.4 billion in debt. Further, while it is clear that some of RSL Plc's board members had some contact during the period in question, [there were no] behind-the-scenes meetings where the business of RSL Plc was discussed by these members, let alone an agreement not to have a board meeting.

Defendants argue that they were fully informed regarding RSL Plc's financial matters because some Defendants were also board members of RSL Ltd., and that in that capacity, they exercised judgment on behalf of RSL Ltd, the parent of RSL Plc. This argument is unpersuasive. [I]ndividuals who act in a dual capacity as directors of two corporations, one of whom is parent and the other subsidiary, owe the same duty of good management to both corporations.

EXAM Strategy

Question: You are the CEO of a software company. You will only allow your engineers to create software for Apple computers, not for PCs, because you think Apple is cooler. Some of your shareholders disagree with this policy. Is your decision protected by the business judgment rule?

Strategy: Remember that you owe a duty of care to the corporation. This means that you must have a rational business purpose for your decision.

Result: The courts are very generous in defining a rational business purpose. They would probably uphold your decision as long as it was not in some way personally benefitting you, e.g., as long as you are not a major shareholder of Apple.

MORE CONFLICT: TAKEOVERS

The business judgment rule is an important guideline for officers and directors in the routine management of corporations. The business judgment rule also plays a crucial role in corporate takeover battles. But the business judgment rule is not, by itself, sufficient for resolving all the issues that arise in these battles. Therefore, both Congress and many state legislatures have passed statutes that define the roles of the various combatants in hostile takeovers. Thus, the law of takeovers is rooted in both common and statutory law.

There are three ways to acquire control of a company:

- **Buy the company's assets.** Such a sale must be approved by both the shareholders and the board of directors of the acquired company.

- **Merge with the company.** In a merger, one company absorbs another. The acquired company ceases to exist. A merger must be approved by the shareholders and the board of directors of the target.
- **Buy stock from the shareholders.** This method is called a **tender offer** because the acquirer asks shareholders to "tender," or offer their stock for sale. As long as shareholders tender enough stock, the acquirer gains control. Typically, the bidder makes an offer (at a price above market value). This offer is usually contingent—that is, if a certain percentage of the shareholders do not tender, the offer terminates automatically. Although an acquisition can proceed without the approval of the board of the target company, resistance from the board can hinder the deal and even torpedo it. We will discuss shortly some of the weapons available to the target board. A tender offer is called a **hostile takeover** if the board of the target resists.

Two scenarios are common in hostile takeovers:

- The target has assets that the bidder genuinely wants.
- A speculator plans to acquire control and then resell all or part of the company at a profit. Speculators, sometimes called **corporate raiders**, often say that they are acquiring stock in a company because it is undervalued; their ostensible goal is to improve management and raise stock prices. In practice, however, oftentimes another bidder comes along who buys their stock at a higher price; the raiders dismember the company and sell its parts; or the target company buys its own stock back at a higher-than-market price. (Management is willing to pay a premium price to keep the company intact and their jobs safe.)

©Imaginechina/Corbis

Apple may be cooler but is that reason enough to refuse to write software for PCs?

Tender offer
A public offer to buy a block of stock directly from shareholders.

Hostile takeover
An outsider buys a company in the face of opposition from the target company's board of directors.

In the beginning, state and federal governments barely regulated tender offers at all. Over time, targets began to ask Congress and their state legislatures to umpire these increasingly rancorous battles. Both states and the federal government have stepped into the ring as referees, generally more on the side of the target than of the bidder.[9]

Federal Regulation of Tender Offers: The Williams Act

The Williams Act applies only if the target company's stock is publicly traded. **Under the Williams Act:**

- Any individual or group who together acquire more than 5 percent of a company's stock must file a public disclosure document (called a "Schedule 13D") with the Securities and Exchange Commission (SEC).

[9] R. Morck, A. Schleifer, and R.W. Vishny, "Management Ownership and Market Valuation: An Empirical Analysis," Working Paper No. 23, Institute for Financial Research, Faculty of Business, University of Alberta, quoted in P.-O. Bjuggren, "Ownership and Efficiency in Companies Listed on Stockholm Stock Exchange 1985," in M. Faure and R. Van den Bergh, *Essays in Law and Economics* (MAKLU, Antwerp, 1985).

- On the day a tender offer begins, a bidder must file a disclosure statement with the SEC;
- A bidder must keep a tender offer open for at least 20 business days initially, and for at least 10 business days after any substantial change in the terms of the offer;
- Any shareholder may withdraw acceptance of the tender offer at any time while the offer is still open;
- If the bidder raises the price offered, all selling shareholders must be paid the higher price, regardless of when they tendered; and
- If the stockholders tender more shares than the bidder wants to buy, it must purchase shares *pro rata* (in other words, it must buy the same proportion from everyone, *not* first come, first served).

Observe that the Williams Act regulates only the behavior of the *bidder*, not that of the *target company*. After Congress passed the Act, the number of tender offers declined and the average premium over market price increased. But target companies did not rely merely on the Williams Act to protect against the threat of takeovers. They were busy formulating other defenses.

State Regulation of Takeovers

A company's response to a takeover attempt is largely governed by state law, both common and statutory.

Common Law of Takeovers

To protect themselves from hostile takeovers, companies adopt defensive measures known as **antitakeover devices** or **shark repellents**. (The acquiring shareholder in a hostile takeover is sometimes referred to as a "shark.") Common shark repellents include the following:

- **Asset lockup.** The target sells off the assets that the shark most wants. Suppose that Ingrid is the CEO of Casablanca, Inc., a successful film production company that owns a vast and valuable library of old films. Turner has indicated that he may want to acquire Casablanca because he covets its library. Ingrid tries to pass the bait to someone else, either by selling the film library or by giving someone else the option to buy it.
- **Greenmail.** The target buys back the shark's stock at a premium price. Ingrid suspects that Turner is not really interested in owning Casablanca stock; he simply wants to turn a quick profit. Ingrid offers to buy back Turner's stock at a price 30 percent higher than he paid for it.
- **Shareholder rights plan ("poison pill").** When an outside shareholder acquires more than a certain percentage of company stock, a rights plan dilutes the value of these shares.[10] Now Ingrid becomes truly creative. She gets Casablanca to issue a special share of preferred stock to each current shareholder.[11] If a shark purchases more than

[10]In a recent case, a Delaware court explicitly permitted a poison pill that applied to outside shareholders but not the chairman of the company. *Yucaipa Am. Alliance Fund II, L.P. v. Riggio*, 1 A.3d 310; 2010 Del. Ch. LEXIS 172.

[11]Although in theory, the shareholders must approve the issuance of a new class of stock, some companies have so-called *blank check preferred stock* in their charters. When this stock is authorized, its rights and other characteristics are left blank, to be filled in by the board of directors upon issuance. It is like an unloaded gun that can be armed by the board whenever a shark threatens.

20 percent of Casablanca's stock and subsequently merges with Casablanca, this preferred stock can be converted into 10 shares of the acquiring company. Thus, for each share of Casablanca that Turner buys, he also has to give away 10 of his own shares, making the takeover much more expensive for him. No wonder these, and other similar tactics, are called "poison pills;" they could certainly prove fatal to a shark.

Jupiterimages

Target companies are often afraid of sharks.

- **Chewable poison pills.** These pills are exactly like a poison pill except that they expire automatically if a cash tender offer is made for 100 percent of the company's stock, at a price at least, say, 25 percent above market value. Chewable poison pills were adopted in response to complaints by institutional shareholders that regular pills are nothing more than protection for incompetent managers. A chewable pill would give Ingrid plenty of clout when negotiating with outsiders but limit her ability to turn down an offer that is clearly in the shareholders' best interest.
- **Dead-hand poison pills.** A dead-hand poison pill can be removed only by vote of the directors who installed the pill or by their handpicked successors. In this way, the decision is in the "dead hands" of the prior board. Without a dead-hand poison pill, Turner could dismantle Casablanca's shark repellents by electing some of his supporters to the board. Dead-hand poison pills are invalid in some states, but if Casablanca is incorporated in a state that does permit this defense, Turner's nominees to the board would not be able to remove the company's poison pill.
- **Staggered board of directors.** With a typical board of directors, all directors run for election each year, with the result that the entire board can be voted out at the same time. With a staggered board, only a portion of the directors are elected each year. Therefore, replacing the entire board takes some years to accomplish. Casablanca has a staggered board, in which each director serves a three-year term and only 4 of the 12 directors are elected each year. If Turner takes over the company, he will not gain control of the board for two years, and it will be three before he can replace all the directors.
- **Supermajority voting.** Ordinarily, shareholders can approve charter amendments by a majority vote, but some companies require a higher percentage to approve important changes. If Ingrid wants to make a takeover more difficult, she can ask shareholders to amend Casablanca's charter to require a *supermajority* vote of, say, 80 percent to approve a merger. Thus, Turner will not be able to merge his company with Casablanca unless he buys 80 percent of Casablanca.
- **White knight.** A white knight is another company that rescues the target from a hostile takeover. Because Turner has publicly criticized Ingrid's management of Casablanca, she despises him and would prefer to sell to *anyone* else. She locates another buyer who she hopes will retain her management team.

Management typically cannot use poison pills, staggered boards of directors, supermajority voting, and white knights without shareholder approval. (Although management could issue stock under a poison pill plan, the stock would first have to be authorized by the shareholders.) Shareholder approval is not required to implement the other shark repellents.

As a general rule, Delaware courts defer to boards of directors, allowing them great latitude in fighting off takeovers. (Not all states are as protective.) Like so much in corporate

law, a balancing act is involved: the courts need to allow the board of a target company enough time to communicate with shareholders, search for alternatives, and force a higher price from the bidder, while at the same time allowing shareholders enough power to sell the company if they desire. Perhaps for this reason, legal rules on antitakeover devices are complex and sometimes seem to depend on the specific details of a particular case. But these are the general guidelines:

- **When establishing takeover defenses, shareholder welfare must be the board's primary concern.** The directors may institute shark repellents, but they must do so to ensure that bids are high, not to protect their own jobs. A poison pill is acceptable if it gives management enough bargaining power to negotiate a high price for shareholders, but not if it makes a takeover impossible.
- **If it is clear that the company will ultimately be sold, the board must auction the company to the highest bidder; it cannot give preferential treatment to a lower bidder.** The board cannot sell the company to a white knight at a lower price than someone else has offered, no matter how much management might personally dislike the shark.

In the following case, a bidder tried a new approach to winning a hostile takeover. Should the court permit this action? You be the judge.

You be the Judge

Airgas, Inc. v. Air Products and Chemicals, Inc.

8 A.3d 1182; 2010 Del. LEXIS 585
Supreme Court of Delaware, 2010

Facts: Air Products and Chemicals, Inc. (Air Products) launched a tender offer to acquire 100 percent of the shares of Airgas, Inc. (Airgas). The Airgas board of directors rejected these bids because they were lower than the market price. Airgas's charter provided for a staggered board of nine directors—at each annual meeting, three would run for election.

At Airgas's annual meeting in September, shareholders elected three of Air Products's nominees to the board. Air Products also proposed a bylaw (the January Bylaw) that switched Airgas's annual meeting to January rather than September. This change would mean that the next annual meeting would be in only four months. Air Products's plan was to vote out three more directors in January, which would have the effect of reducing their terms by eight months. Shareholders approved this amendment with a 51 percent vote in favor. Because not all shareholders voted, the favorable vote actually constituted only 45.8 percent of the outstanding shares. To amend the Airgas charter and eliminate the staggered board would have taken a 67 percent vote of the shareholders who cast ballots.

Airgas filed suit, alleging that the January Bylaw was invalid because it was a back-door method of eliminating the staggered board without a 67 percent vote of the shareholders. (A bylaw is invalid if it conflicts with the charter.) The lower court upheld the January Bylaw, and Airgas appealed.

You Be the Judge: ***Was the January Bylaw valid?***

Argument for Air Products: Airgas's charter provides that directors serve terms that expire at "the annual meeting of stockholders held in the third year following the year of their election." The January Bylaw complies with this charter provision as written because the January meeting will take place "in the third year after the directors' election." Nowhere does the charter say that directors have to serve three full years. If Airgas wins this case, corporations in Delaware will have to calculate the dates of their annual meetings with mathematical precision.

Moreover, 51 percent of the shares at the annual meeting voted in favor of the January Bylaw. If it was unfair or against the best interests of shareholders, they could have voted against it. Why should the court thwart the shareholders' intent?

Argument for Airgas: In 25 years, Airgas has never held its annual meeting earlier than July 28. We are not arguing that Airgas has to wait exactly 365 days to schedule its next annual meeting, but it should delay at least 11 months. Moreover, the company's fiscal year ends on March 31, so if the meeting were to be held in January, Airgas would not have new financial results to report to its shareholders.

The charter term is ambiguous—does it mean that directors have to serve into the start of the third year, or do they have to serve three full years? Regardless of what the actual language says, the *intent* is clear—directors are meant to serve three years. Air Products has found a loophole that violates the spirit of the charter provision and frustrates the purpose of staggered boards, which is to provide stability. The court should not allow Air Products to avoid the clear intent of the charter so that it can acquire a company at less than market value.

It is true that that 51 percent of the shares *at the meeting* voted in favor of the January Bylaw, but this was only 45.8 percent of the shares outstanding. That is not even a majority, never mind the 67 percent vote required to amend the charter. Moreover, if the January Bylaw is upheld, effectively three of the board members will be removed without cause. Under the charter, removal without cause also requires a 67 percent vote.

EXAM Strategy

Question: You are the CEO of Bubble Gum, Inc., a publicly traded company. Pink Co. has just made an offer to buy Bubble. Pink is particularly interested in Bubble's farmland, on which grows the corn for the sweetener used in the gum. You despise the CEO of Pink and know if Pink takes over the company, you will be fired. Your friend at ChewCo says his company would be interested in buying Bubble, but at a lower price than Pink is willing to pay. You are convinced that the company is better off long-term with ChewCo. What can you do immediately to protect Bubble from Pink?

Strategy: Shark repellents that require shareholder approval will not work because you do not have time to call a shareholders' meeting. Remember that your primary duty is to your shareholders.

Result: You cannot simply agree to a sale to ChewCo—once it is clear that the company will be sold, you must auction it to the highest bidder. You could try an asset lockup—selling off the company's farmland. Perhaps that would discourage Pink from making the purchase.

State Antitakeover Statutes

In fighting takeover battles, companies have also found support in state governments because legislators fear the impact on the local economy if a major employer leaves. When the Belzberg family threatened a hostile takeover of auto parts manufacturer Arvin Industries, the Indiana legislature quickly passed a tough antitakeover bill that had been drafted by Arvin's own lawyers. Shortly thereafter, Arvin and the Belzbergs settled. Arvin was not only the second-largest employer in Columbus, Indiana, it was an all-purpose fairy godmother. Among its charitable activities, it built two new schools, subsidized the salary of the school superintendent, and opened a summer camp. Columbus residents were delighted that Arvin survived the takeover attempt, but company shareholders might have preferred a bidding war for their stock. After all, shareholders do not necessarily care if the children of

Columbus spend their summers at leafy Camp Grenada or sleazy Mall City. Once again, the interests of these two corporate constituencies clash.

Most states have now passed laws to deter hostile takeovers. Among the common varieties are the following:

- **Statutes that automatically impede hostile takeovers.** These statutes, for instance, might ban hostile mergers for five years after the acquirer buys 10 percent of a company. Or investors who acquire as much as 20 percent of a company lose their voting rights unless the other shareholders move to reinstate the rights (not likely!). These provisions do not apply to bids that have been approved by the board of directors of the target company. In many states, such as Delaware, the board can opt out of the statute altogether and refuse to accept its protection.

- **Statutes that authorize companies to fight off hostile takeovers.** These statutes typically permit management, when responding to a hostile takeover, to consider the welfare of company stakeholders, such as the community, customers, suppliers, and employees. Some even go so far as to allow management to consider the regional or national economy. Since takeovers are almost always harmful to these other constituencies, company management has a ready excuse for fighting the takeover.

Most of these statutes do not totally eliminate hostile takeovers. A determined, well-financed bidder can still be successful. But these state statutes do tip the playing field in favor of management. Research indicates that takeover battles are much more profitable to the shareholders of targets than to bidders.

Ethics Supporters of these state statutes argue that large, publicly traded corporations owe a duty to all of their constituencies. The loss of a large corporate presence can be immensely disruptive to a community. Perhaps a state should have the right to prevent economic upheaval within its borders.

Opponents contend that shareholders own the company and their interests ought to be paramount. Antitakeover legislation entrenches management and prevents shareholders from obtaining the premium that accompanies a takeover. Opponents also argue that, if other *stake*holders are so concerned with the well-being of the company, let them put their money where their mouths are and buy stock. And if current managers cannot offer shareholders as high a stock price as an outside raider, they ought to be replaced.

Delaware companies can choose not to accept the protection of the antitakeover statute. What is the ethical choice for directors?

Chapter Conclusion

Managers of corporations have a fiduciary duty to shareholders and are charged with running the organization for their benefit. The law, whether federal or state, common or statutory, grants managers great freedom in deciding how to promote the shareholders' interest. In the takeover arena, lawmakers have given managers considerable leeway in defending their organizations from outside attack.

Exam Review

1. **FIDUCIARY DUTY** Officers and directors have a fiduciary duty to act in the best interests of the shareholders of the corporation. (p. 841)

2. **BUSINESS JUDGMENT RULE** If managers comply with the business judgment rule, a court will not hold them personally liable for any harm their decisions cause the company, nor will the court rescind the decision. (pp. 843–850)

EXAM Strategy

Question: Employees of Exxon Corp. paid some $59 million in corporate funds as bribes to Italian political parties to secure special favors and other illegal commitments. The board of directors decided not to sue the employees who had committed the illegal acts. Were these decisions protected by the business judgment rule?

Strategy: Two decisions are at issue here: illegal payments and the decision not to sue. (See the "Result" at the end of this section.)

3. **DUTY OF LOYALTY** Managers may not enter into an agreement on behalf of their corporation that benefits them personally unless the disinterested directors or shareholders have first approved it. If the manager does not seek the necessary approval, the business judgment rule no longer applies, and the manager will be liable unless the transaction was entirely fair to the corporation. (pp. 843–847)

4. **CORPORATE OPPORTUNITY** Under the duty of loyalty, managers may not take advantage of an opportunity that rightfully belongs to the corporation. (pp. 845–846)

EXAM Strategy

Question: Vern owned 32 percent of Coast Oyster Co. and served as president and director. Coast was struggling to pay its debts, so Vern suggested that the company sell some of its oyster beds to Keypoint Co. After the sale, officers at Coast discovered that Vern owned 50 percent of Keypoint. They demanded that he give the Keypoint stock to Coast. Did Vern violate his duty to Coast?

Strategy: Here, Vern has violated the duty of loyalty not once, but twice. (See the "Result" at the end of this section.)

5. **DUTY OF CARE** Under the duty of care, managers must make legal, informed decisions that have a rational business purpose. (pp. 847–850)

6. **WILLIAMS ACT** The Williams Act regulates the activities of a bidder in a tender offer for stock in a publicly traded corporation. (pp. 851–852)

7. **TAKEOVER DEFENSES** Under common law, shareholder welfare must be the board's primary concern when establishing takeover defenses. If it is clear that the company will ultimately be sold, the board must auction the company to the highest bidder; it cannot give preferential treatment to a lower bidder. (pp. 852–855)

EXAM Strategy

Question: The board of Harmony, Inc., is concerned that the company may be the target of a hostile takeover. It has decided to adopt antitakeover devices. Which one of the following statements is *false*?

a. Harmony may divest one of its divisions, as long as it does so at fair market value.

b. Harmony may adopt a poison pill, as long as the purpose is to give management enough bargaining power to negotiate a high price for shareholders.

c. If it becomes clear that Harmony is going to be sold, the directors have an obligation to auction the company off to the highest bidder, no matter how loathsome the directors find the bidder to be.

d. If Harmony offers to buy back any of its stock, it must treat its shareholders equally.

Strategy: Apply the principle established in the *Unocal* case earlier in the chapter. (See the "Result" at the end of this section.)

8. **STATE STATUTES** Many states have passed antitakeover statutes that render hostile takeovers more difficult for the bidder. (pp. 855–856)

2. Result: The business judgment rule would not protect the underlying illegal payments, but it did protect the decision not to sue. In other words, anyone who *made* an illegal payment had violated the business judgment rule, but the people who had decided not to pursue the violators had not themselves breached the business judgment rule because they had not violated the duty of care or the duty of loyalty.

4. Result: If the shareholders and directors did not know of Vern's interest in Keypoint, they could not evaluate the contract properly. Vern should have told them. Also, by purchasing stock in Keypoint, Vern took a corporate opportunity. He had to turn over any profits he had earned on the transaction, as well as his stock in Keypoint.

7. Result: In the *Unocal* case, the court permitted the company to exclude one shareholder from its buyback offer. D is the correct answer.

Multiple-Choice Questions

1. If a manager engages in self-dealing, which of the following answers will *NOT* protect him from a finding that he violated the business judgment rule:
   (a) The disinterested members of the board approved the transaction.
   (b) The transaction was of minor importance to the company.
   (c) The disinterested shareholders approved the transaction.
   (d) The transaction was entirely fair to the corporation.

2. In the *Lippman* case involving a payout to the son and son-in-law:
   (a) The son-in-law was entitled to the payment because he represented the daughter's interest in the company.
   (b) The son-in-law was entitled to the payment because he had the same employment contract as the son.
   (c) The son-in-law was entitled to the payment because the business judgment rule protects decisions by corporate directors.
   (d) The son-in-law was not entitled to the payment.

3. The duty of care:
   (a) Is not a requirement of the business judgment rule
   (b) Protects directors who make an uninformed decision if it was entirely fair to the company
   (c) Protects a decision that has a rational business purpose, even if the activity was illegal
   (d) Will not protect directors who make a decision that harms the company

4. Under the Williams Act:
   (a) If shareholders offer more stock than the bidder wants, it must purchase shares *pro rata*.
   (b) Target companies must reveal the names of any shareholders who acquire more than 5 percent of its stock.
   (c) A bidder must file a disclosure statement at least 24 hours before the tender offer begins.
   (d) Once a shareholder has accepted a tender offer, she cannot withdraw it.

5. Takeovers are *NOT* regulated by:
   (a) Federal statute
   (b) Federal common law
   (c) State statutes
   (d) State common law

Essay Questions

1. **YOU BE THE JUDGE WRITING PROBLEM** Asher and Stephen formed a corporation named "Ampersand" to produce plays. Both men were employed by the corporation. Stephen decided to write *Philly's Beat*, focusing on the history of rock and roll in Philadelphia. As the play went into production, however, the two men quarreled over Asher's repeated absences from work and the company's serious financial difficulties. Stephen resigned from Ampersand and formed another corporation to produce the play. Did the opportunity to produce *Philly's Beat* belong to Ampersand? **Argument for Stephen:** Ampersand was formed for the purpose of producing plays, not writing them. When Stephen wrote *Philly's Beat*, he was not competing against Ampersand. Furthermore, Ampersand could not afford to produce the play even if it had had the opportunity. **Argument for**

Asher: Ampersand was in the business of producing plays, and it wanted *Philly's Beat*. Ampersand was perfectly able to afford the cost of production—until Stephen resigned.

2. Both Viacom and Paramount owned a diverse group of entertainment businesses. QVC was a televised shopping channel. The Paramount board of directors accepted a merger offer from Viacom at a price of $69 per share. QVC and Viacom then entered a bidding war for Paramount. QVC ultimately made the highest offer, at $90 per share. The Paramount board rejected QVC's bid on the grounds that a Viacom merger would be more in keeping with Paramount's business strategy. Does a board of directors have the right to reject a high bidder on the belief that the low bidder would be better for the company?

3. Eve bought defective ball bearings from Saginaw Corp. Alfred was the sole shareholder of the company and also its landlord. After Alfred sold all of Saginaw's assets, he withheld enough money to cover the rent that Saginaw owed him. As a result, Saginaw had no money to pay Eve. Does Eve have a claim against Alfred?

4. Ulrick and Birger started an air taxi service in Berlin, Germany, under the name Berlinair, Inc. Birger was approached by a group of travel agents who were interested in hiring an air charter business to take German tourists on vacation. Birger formed Air Berlin Charter Co. (ABC) and was its sole owner. On behalf of ABC, he entered into a contract with the Berlin travel agents. Birger concealed his negotiations from Ulrick, even though he used Berlinair working time, staff, money, and facilities. Birger defended his behavior on the grounds that Berlinair could not afford to enter into a contract with the travel agents. Has Birger violated the corporate opportunity doctrine?

5. Wallace, Inc. adopted a poison pill. Five years later, Moore Corp. offered to buy all Wallace's stock for $56 a share, which was 27 percent over the existing market price. However, the offer was contingent upon the Wallace board eliminating the poison pill. Wallace consulted with its investment banker, which advised the company that the offer was inadequate but did not indicate what the shares were really worth. Moore then raised its offer price to $60 per share, and again the bankers opined that the offer was inadequate. Both the board and its banker believed that Wallace's recently adopted corporate strategy would lead to an increased stock price. Indeed, the company's recent financial results had been better than expected. Despite these improved results, more than 73 percent of Wallace shareholders offered their shares to Moore. When Wallace refused to remove the poison pill, Moore filed suit. Was the board's refusal to remove the poison pill a violation of the business judgment rule?

Discussion Questions

1. Some companies adopt a staggered board of directors as an antitakeover defense. How does a staggered board affect cumulative voting?

2. Congressional Airlines was highly profitable operating flights between Washington, D.C., and New York City. The directors approved a plan to offer flights from Washington to Boston. This decision turned out to be a major mistake, and the

airline ultimately went bankrupt. Under what circumstances would shareholders be successful in bringing suit against the directors?

3. **ETHICS** Ronald O. Perelman, chairman of the board and CEO of Pantry Pride, met with his counterpart at Revlon, Michel C. Bergerac, to discuss a friendly acquisition of Revlon by Pantry Pride. Revlon rebuffed Pantry Pride's overtures, perhaps in part because Bergerac did not like Perelman. The Revlon board of directors agreed to sell the company to Forstmann Little & Co. at a price of $56 per share. Pantry Pride announced that it would engage in fractional bidding to top any Forstmann offer by a slightly higher one. To discourage Pantry Pride, the Revlon board granted Forstmann the right to purchase Revlon's Vision Care and National Health Laboratories divisions at a price some $100–$175 million below their value. Was the board within its rights in selling off these two divisions? Do the shareholders of Revlon have the right to prevent a sale of the company to Forstmann at a price lower than Pantry Pride offered? Is it ethical for a board to base a takeover decision on personal animosity? What are a board's ethical obligations to shareholders?

4. An appraiser valued a subsidiary of Signal Co. at between $230 million and $260 million. Six months later, Burmah Oil offered to buy the subsidiary at $480 million, giving Signal only three days to respond. The board of directors accepted the offer without obtaining an updated valuation of the subsidiary or determining if other companies would offer a higher price. Members of the board were sophisticated, with a great deal of experience in the oil industry. A Signal Co. shareholder sued to prevent the sale. Is the Signal board protected by the business judgment rule?

5. Courts have tended to be protective of managers who fight against hostile takeovers, even if the bidder is offering a price much higher than the market value of the shares. Why? Do the courts have the balance right when resolving disputes between these two groups?

CHAPTER 35

SHAREHOLDERS

© Evan Meyer/Shutterstock.com

In little more than a decade, Enron Corp. transformed itself from a modest pipeline company into a $65 billion global energy business. Enron's officers earned fabulous wealth and became major celebrities. But no sooner had the ink dried on newspaper and magazine articles lauding the Enron business model when suddenly, shockingly, the company collapsed into bankruptcy court. What happened to Enron?

Enron had become, in essence, an energy trading enterprise that required a lot of cash. To obtain the cash, it created subsidiaries that held substantial sums in safe investments. Enron borrowed money that was secured by these subsidiaries, but—and here is the catch—it excluded this debt from its financial statements. The income from energy sales appeared as revenue for Enron, but the debt to support this income was off the books. None of these "special" arrangements was disclosed clearly to shareholders.

Moreover, compensation for top executives was tied directly to the company's stock price. So managers had a powerful incentive to raise the stock price in any way possible, legal or not. Stock manipulation and questionable accounting practices became standard operating procedure at the firm. The company would, for example, book as current revenues its (optimistic) assessment of what future revenues might be for new deals.

Managers had a powerful incentive to raise the stock price in any way possible, legal or not.

After a few stock analysts began to ask tough questions, Enron restated its earnings by nearly $600 million, which caused investors to lose confidence. Enron stock entered a death spiral into bankruptcy, destroying the net worth (and the dreams) of many employees and shareholders. It turned out, however, that not all employees suffered dramatic financial losses—the top executives had sold hundreds of millions of dollars in stock before the collapse, even as they were exhorting other employees and shareholders to continue buying.

Outrage and uproar ensued. Inquiring minds wanted to know: Why did the law fail to protect Enron shareholders? Why did the impressive board of directors miss—or

ignore—obvious signs of trouble? At the same time, other prominent companies confessed to shady accounting practices: Xerox Corp., Merrill Lynch, and Lucent, among others. The CEO of investment bank Goldman Sachs said, "I cannot think of a time when business overall has been held in less repute."

What is the solution to this raft of corporate wrongdoing? Some commentators claim that there are simply a few bad apples in the executive orchard. More pessimistic commentators argue that wholesale changes are needed in the regulation of public companies. After reading this chapter, you decide.

INTRODUCTION

Shareholders technically own the companies in which they invest, but their power over these enterprises is very limited. As Chapter 34 revealed, **directors, not shareholders, have the right to manage the corporate business**. In this chapter, we look at shareholder rights—what control do they exercise over the enterprises they own?

The topic of shareholder rights is a contentious, controversial topic. In this century, we have already experienced two financial meltdowns—one at the beginning of the 2000s and one at the end—that starkly revealed the different incentives faced by shareholders and managers. Too often, managers earned exorbitant compensation from highly risky, short-term decisions that in the longer run left shareholders holding an empty bag. If CEOs made a risky decision that paid off, they profited enormously. If the decision failed, they might be fired, but even then they were likely to have received generous compensation all along. On the way out the door, many also got severance payments that left them wealthy beyond most people's dreams. For example, in the two years before investment banks Bear Stearns Companies, Inc. and Lehman Brothers Holdings, Inc. failed, their top five executives took home \$1.4 billion and \$1 billion respectively, even as their shareholders were left with nothing.

Even worse, investigations after the fact revealed that too many managers had gamed compensation plans, stacked the boards of their companies with their friends, and ignored shareholder interests. Compliant boards had been little more than rubber stamps, approving whatever the officers wanted. In anger and frustration, shareholders, Congress, the Securities and Exchange Commission (SEC), and stock exchanges undertook an unprecedented effort to rebalance corporate power. Yet these changes are little more than a shot in the dark, without compelling evidence that they will enhance financial stability or improve shareholder results.

A note before we begin: at one time, corporate stock was primarily owned by individuals. But now, institutional investors—pension plans, mutual funds, insurance companies, banks, foundations, and university endowments—own more than 50 percent of all shares publicly traded in the United States.[1] Institutional investors, with enormous sums to invest,

[1]Shareholders play a very different role in privately held companies than in publicly traded corporations. Not only do privately held corporations have fewer shareholders, but these owners take a more active role in management, often serving as a director, officer, or employee. A public corporation is one that (1) has completed a public offering under the Securities Act of 1933, or (2) has securities traded on a national exchange, or (3) has at least 500 shareholders and total assets that exceed \$10 million. For a discussion of public corporations, see Chapter 36, on securities law.

have little choice but to buy the stocks of large companies. If they are unhappy with management, it is difficult for them to do the "Wall Street walk"—that is, sell their shares—because a sale of their large stock holdings would depress the market price. And where would they invest the proceeds? Institutional investors cannot all profit simply by trading shares among themselves. For better or worse, the fate of fund managers hangs on the success of these large companies.

RIGHTS OF SHAREHOLDERS

If you own a car, you expect to be able to drive it whenever you want. If you own it with four of your friends, you may not be able to use it every Saturday night, but you will get to drive it *sometimes*, even if only on Sunday mornings. Of course, you will also be responsible for changing the oil sometimes, too. Owning stock in a corporation is different. As an owner, you have no right to use any *specific* asset of the corporation. If you own stock in Starbucks Corp., your share of stock plus $6.25 entitles you to a triple grande soy vanilla latte, the same as everyone else. By the same token, if the pipes freeze and the local Starbucks store floods, the manager has no right to call you, as a shareholder, to help clean up the mess. **As a shareholder, you have neither the *right* nor the *obligation* to manage the day-to-day business of the enterprise.** So what rights do you have?

Right to Information

A company's obligation to provide shareholders with information depends on whether it is publicly or privately held. Privately held companies are regulated by state law, while publicly traded enterprises must also meet SEC standards. More than half the states have adopted as state law some version of the Model Business Corporation Act (Model Act), which requires only limited disclosure.[2] In contrast, the SEC requires companies to provide shareholders with extensive information.

Even if a corporation is not required to volunteer information, shareholders have the right to obtain certain data upon request. **Under the Model Act, shareholders acting in good faith and with a proper purpose have the right to inspect and copy the corporation's minute book, accounting records, and shareholder lists.** A **proper purpose** is one that aids the shareholder in managing and protecting her investment. If Celeste receives an offer to sell her shares in a bakery called Devil Desserts, Inc., she may want to look carefully at the company's accounting records to determine the value of her stock. Or, if she is convinced the directors are mismanaging the company, she might demand a list of shareholders so that she can ask them to join her in a lawsuit. This purpose is proper—though the company may not like it—and the company is required to give her the list. If, however, Celeste wants to use the shareholder list as a potential source for her new business selling exercise equipment, the company could legitimately turn her down. The following case is typical: the court must decide if the shareholder is acting in his role as owner or competitor.

---

[2]A committee of the American Bar Association drafted the Model Business Corporation Act to serve as a guideline for states to use when enacting a corporate code. The corporate statutes of Delaware also serve as a model for some states.

You be the Judge

Chopra v. Helio Solutions, Inc.

2007 Cal. App. Unpub. LEXIS 5909
Court of Appeal of California, 2007

Facts: Paul Chopra was a minority shareholder and former director of Helio Solutions, Inc. Both he and Helio were in the business of reselling Sun Microsystems hardware and software. Chopra suspected that (1) some of Helio's majority shareholders had purchased a building and leased it to Helio at an excessive rent; (2) the company had broken a lease so that it could rent this building; (3) some shareholders had used assets of the corporation to secure a personal loan; (4) Helio had permitted ex-employees to take away substantial business; and (5) the company had not collected a $1 million debt it was owed. In addition, he wanted to know if Helio was planning to issue stock and thereby dilute his ownership. Finally, he felt that his dividend of $1,952.55 was unreasonably low, given that Helio had $88 million in revenue.

Chopra hired a forensic accountant to help him investigate Helio's finances. At the accountant's request, Chopra asked Helio for these documents:

1. Articles of incorporation;
2. Minutes for meetings of the board of directors and shareholders;
3. All financial statements;
4. All tax returns;
5. The general ledger with accompanying journals;
6. Income and balance sheets;
7. Schedule of accounts payable and received and inventory;
8. Depreciation schedule for fixed assets;
9. Supporting documents, including bank loans, lines of credit, accrued payroll liabilities, sales tax liabilities, other receivables, loans to officers and owners, significant prepayments or deposits, and equipment lease agreements;
10. Monthly bank statements;
11. Company credit card statements;
12. Compensation records;
13. The following contracts: life insurance policies for officers and/or stockholders, pension plan and profit sharing plans, stock purchase plans, equipment and building leases, employment and bonus agreements for owners or key employees, covenants not to compete, loan agreements and credit information, documents connected with the company's real property, option grants, and each owner's curriculum vitae;
14. A list of patents held by the company;
15. Budget projections for the current year;
16. Company brochures and/or marketing information;
17. A list of key management personnel with job titles;
18. An overview of company positions and objectives for each department manager; and
19. Information regarding contingencies and lawsuits.

Helio Solutions gave Chopra items 1–6 but refused to turn over the other material. He filed suit.

You Be the Judge: ***Which of these documents must a company provide to its shareholders?***

Argument for Chopra: All these documents are necessary for assessing the value of Chopra's investment in the company and determining whether his interests as a minority shareholder are being protected. For example, without employee agreements and compensation information, he cannot assess the current corporate financial situation, value the business, determine if the business is being properly managed, or discover whether the majority shareholders or directors are improperly diverting corporate funds for their own benefit. He needs the contracts and agreements related to equipment and building leases to determine whether the majority shareholders had purchased a building and leased it to Helio at an excessive rate.

Argument for Helio: Chopra is simply on a fishing expedition to find information that would help him compete against Helio. It seems as if he wants to use Helio's budget projections and managerial objectives so that he can beat them to the punch on some of their new initiatives. Many of the requests relate to specific shareholders rather than to the company. Complying with these requests would be unreasonably burdensome to Helio. It would take weeks of work to pull these documents together and photocopy them. Shareholders have some rights to corporate information, but they are not entitled to unlimited access to corporate confidences and secrets.

Right to Vote

A corporation must have at least one class of stock with voting rights. Typically, common shareholders have the right to vote and preferred shareholders do not, but there are many exceptions to this rule.

Shareholder Meetings

Annual shareholder meetings are the norm for publicly traded companies. Although technically not all states require public companies to hold an annual meeting of shareholders, the New York Stock Exchange (NYSE) requires companies listed with it to do so. Companies whose stock is not publicly traded can either hold an annual meeting or use written consents from their shareholders. (Written consents are discussed in Chapter 33.) Under the Model Act, the board of directors and shareholders owning at least 10 percent of the company's stock each have the right to call a *special* meeting to vote on an emergency issue that cannot wait until the next annual meeting—for example, to conclude a merger or sell off substantial assets.

Everyone who owns stock on the **record date** must be sent notice of a meeting, whether it is an annual or a special meeting. The record date can be any day that is no more than 70 days before the meeting. The votes taken at a shareholder meeting are not valid unless a **quorum** is present, meaning that shareholders owning a certain percentage of the shares are represented, either in person or by proxy.

Quorum
The percentage of voters who must be present for a meeting to count.

Companies are permitted to hold shareholder meetings online rather than in person. Many companies do both, conducting a live meeting with virtual access. In 2010, Symantec Corporation became the first Fortune 500 company to eliminate the in-person meeting and hold a virtual-only version. Unfortunately, the company used this opportunity to limit rather than expand access. It broadcast only in audio, not video, which meant that participants had no opportunity to read body language or even know that three directors were absent. In the question-and-answer period, management read and answered only two questions from shareholders, without providing an opportunity for follow-up questions. Nor did they reveal who had asked the questions or even what questions they had chosen not to answer.

Proxy
The person whom a shareholder appoints to vote for her at a meeting of the corporation. Also, the document a shareholder signs appointing this substitute voter.

Ethics Symantec's actions in holding a virtual shareholder meeting were legal. If you had been a shareholder and had attended the meeting in cyberspace, would you have been satisfied with the company's virtual format?

© REUTERS/Tim Shaffer

A traditional shareholder meeting looks like this. Is a virtual meeting a reasonable substitute?

Proxies

Under common law, shareholders could cast a vote only by attending the shareholders' meeting. Such a rule in a publicly traded corporation would effectively disfranchise many shareholders who have neither the time nor the interest to travel around the country attending meetings. Modern statutory law permits shareholders to appoint someone else to vote for them. Confusingly, both this person and the card the shareholder signs to appoint the substitute voter are called a **proxy**.

Under the Model Act, a proxy is valid for only 11 months unless the form provides for a longer period. For public corporations, however, SEC rules specify that a proxy is valid only for the next meeting. After that, it automatically expires. Under both state and federal law, the shareholder can generally revoke a proxy at any time.

Under SEC rules, companies are not required to solicit proxies, but virtually all of them do because that is the only practical way to obtain a quorum. Along with the proxy, the company must also give shareholders a **proxy statement** and an **annual report**. The proxy statement provides information on everything from management compensation to a list of directors who miss too many meetings. The annual report contains detailed financial data. Under SEC rules, companies are required to post all of this information on their website. They must then mail to shareholders either hard copies of all the information, including ballots, or a card telling shareholders how to view the materials and vote online. But shareholders always have the right to request hard-copy versions.

Annual report
A document that the SEC requires public companies to provide to their shareholders each year.

Even if a company decides not to solicit proxies for a shareholder meeting, it cannot avoid its obligation to communicate with its shareholders. The SEC requires public companies, whether or not they solicit proxies, to give shareholders all the information required in a proxy statement and an annual report.

Shareholder Proposals

Shareholders who oppose a company policy may use the proxy process to challenge that policy. **Under SEC rules, any shareholder who has continuously owned for one year at least 1 percent of the company or $2,000 of stock can require that one proposal be placed in the company's proxy statement to be voted on at the shareholder meeting.**

If a company refuses to include a shareholder proposal in its proxy material, shareholders can appeal to the SEC. These are the major SEC regulations on shareholder resolutions:[3]

- *The proposal cannot relate to the ordinary business operations of the corporation.* For example, the SEC used to routinely exclude all proposals that asked a board of directors to develop a succession plan for the CEO, on the theory that this request related to the management of the workforce, which is part of the ordinary business operations of a company. But the SEC recently overruled itself and decided that succession planning is an important board function that raises significant policy issues. Now these proposals are permitted in proxy statements.
- *The proposal must relate to operations accounting for at least 5 percent of total assets, gross sales, or net earnings.* AT&T refused to include in its proxy statement an anti-Israel proposal from a white supremacy group on the grounds that the company's business with Israel accounted for less than 1 percent of sales.
- *The proposal cannot interfere with the company's proxy solicitation.* Management can exclude more than one proposal on the same topic and proposals that were voted down decisively in the past.
- *The proposal cannot require the company to violate a federal or state law.* Bell & Howell excluded a shareholder proposal that called for the company to hire qualified women because the proposal might require the company to violate federal and state antidiscrimination laws.
- *The shareholder cannot use a proposal to seek satisfaction of a personal grievance against the company.* Lee Data Corp. excluded a proposal requested by an employee/shareholder who had been fired for sexual harassment. The goal of his proposal was to embarrass the company and provide fodder for his lawsuit.

Traditionally, many shareholder proposals had a social policy agenda: cut greenhouse gases, withdraw from Myanmar, or ban genetically modified ingredients, for example. Now, many relate to corporate-governance issues: permit secret ballots, adopt cumulative voting,

[3]Rule 14a-8.

or repeal takeover defenses. Prior to 1985, only *two* proposals had been approved—*ever*. In recent years, shareholders of the 100 largest American companies have approved 20 percent of the corporate governance resolutions, but none of the social policy proposals.

Note, however, that even if a proposal meets SEC standards *and* is approved by a majority of shareholders, the company may not necessarily implement it. Resolutions are binding on a company only if they are within the narrow realm of shareholder power. For example, because shareholders have the right to amend company bylaws, such proposals are binding. But a shareholder vote that requires the board to take action is not binding because the board that has the right to manage the company, not the shareholders. Thus, even though the SEC requires companies to allow a vote on proposals about succession planning, the board still does not *have* to develop a succession plan, even if a majority of shareholders vote in favor. Most proposals are *non-binding*, and companies implement fewer than half of those that their shareholders approve.

Frustrated at this unresponsive behavior by boards, shareholders have begun to withhold their vote from any director who fails to support a successful shareholder proposal. Even this threat has not yet had a significant impact on board response to shareholder proposals.

Ironically, companies sometimes implement shareholder proposals that have not received support from a majority of the shareholders. The pressure of shareholder proposals is credited with inducing many American companies to withdraw from South Africa when its government had apartheid laws. Other companies implement shareholder proposals without even putting them up for a vote. Indeed, a substantial number of shareholder proposals are now withdrawn before a vote because the company is willing to negotiate and accommodate. For instance, Colgate-Palmolive Co. agreed to a proposal by institutional investors to permit secret ballots at shareholder meetings.

EXAM Strategy

Question: Shareholders of Beazer Homes USA asked for a proposal requiring disclosure about the construction company's risks in the mortgage market. This was a time when many companies were struggling with bad loans to home buyers. Beazer asked the SEC for permission to exclude this proposal from its proxy statement. What did the SEC rule?

Strategy: The SEC allows companies to exclude proposals that relate to the ordinary business operations of the company.

Result: The SEC ruled that Beazer Homes was required to include the mortgage proposal because these risks directly affected the value of the company in a time of extraordinary challenges in this industry. Shortly thereafter, Beazer announced that it would stop originating mortgages.

Election and Removal of Directors

The process of electing directors to the board of a publicly traded company is different from what most people think. At this writing, shareholders do *not* have the right to use the company's proxy statement to propose nominees for director. Instead, the nominating committee of the board of directors produces a slate of directors, with one name per opening. Typically, the names are approved by the CEO. This slate is then placed in the proxy statement and sent to shareholders, whose only choice is to vote in favor of a nominee or to withhold their vote (i.e., not vote at all). If shareholders want to vote for someone who

was not selected by the company, they have to nominate their own slate, prepare and distribute a proxy statement to other shareholders, and then communicate why their slate is superior, all the while fighting against the company's almost unlimited financial resources. This process is complex, expensive, and disruptive to the company. Not surprisingly, only a few shareholder groups undertake this effort each year. Recent research does indicate, however, that companies with a director elected through proxy contests outperform their peers in both the short and long run.[4]

This traditional corporate voting method is called **plurality voting**. A successful candidate does not need to receive a majority vote; he must simply receive more than any competitor. Since there are no competitors, one vote is sufficient (and that vote could be his own). Even if a large number of shareholders withhold their votes, the nominee may be embarrassed, but as long as he receives that one vote, he is elected. Thus, for example, in the waning years of Michael Eisner's rule at Disney Enterprises Inc., shareholders withheld 43 percent of their votes from him. But that vote of no confidence did not cause the board to fire him, nor did he immediately resign.

Plurality voting
To be elected, a candidate only needs to receive more votes than her opponent, not a majority of the votes cast.

Congress, other regulators, and major shareholders are now reforming corporate democracy in an effort to rebalance the relationship between managers and shareholders.

Independent Directors. Congress began its reform effort by passing the Sarbanes-Oxley Act (SOX), which applies to all publicly traded corporations in the United States, as well as to all foreign companies listed on a U.S. stock exchange. Among other provisions, SOX stipulates that **all members of a board's audit committee must be independent, and at least one of these members must be a financial expert. Independent directors** are those who are not employees of the company and, therefore, presumably not in the pocket of the CEO.

Independent directors
Members of the board of directors who are not employees of the company. Also known as outside directors.

Inside directors
Members of the board of directors who are also employees of the corporation.

Likewise, the NYSE and NASDAQ require that, for companies listed on these exchanges:

- Independent directors must comprise a majority of the board;
- They must meet regularly on their own without **inside directors**, that is, members of the board who are also employees of the corporation;
- Only independent directors can serve on audit, compensation, or nominating committees; and
- Audit committees must have at least three directors who are financially literate.

The effectiveness of these reforms, however, is uncertain. One study found that 45 percent of directors who are technically "independent" have friendship ties to the CEO. And, as the second eBay case in this chapter illustrates, even independent directors are often financially beholden to the CEO. At a minimum, the CEO is more likely to fire them from their lucrative directorships than shareholders are, so their incentives are often more aligned with the CEO. Also, some commentators argue that because independent directors do not work full time for the company, they know *less* about what is really going on and have to rely *more* on company executives.

What happens to independent directors who fail to carry out their watchdog responsibilities? Unless they personally commit fraud, the answer is: not much. After all, if the SEC were aggressive about going after independent directors, few people would be willing to serve in that role. Even if they are sued, the corporation or its insurance company usually pays the damages. For the first time, however, the SEC has brought suit against three independent directors. As friends and neighbors of the CEO at DHB Industries, Inc. they actively assisted him in a cover-up of wrong-doing.

Shareholder Activists. Proxy advisors, such as Institutional Shareholder Services, Inc. (ISS), are a new development in corporate democracy. They advise institutional investors on how to vote their shares. Proxy advisors and hedge funds (which often own substantial stockholdings) wield significant power. ISS alone can affect up to 20 to 40 percent of the vote at a company. Corporate managers argue that this is too much power—that activists may well have an agenda that is contrary to that of other shareholders, and that they support corporate governance initiatives without proof of effectiveness. In any event, boards have become more responsive to the demands of shareholder activists and, as a result, are more likely to replace executives who perform badly, either in their corporate or personal lives. For example, the board of Hewlett-Packard fired CEO Mark Hurd for a combination of reasons that included his fudging of expense reports to hide his relationship with someone who accused him of sexual harassment, and, perhaps worst of all, bad press.

Majority voting systems. Because of pressure from shareholder activists, two-thirds of the S&P 500 (large companies) now refuse to seat a director if fewer than half of the shares that vote tick off her name on the ballot. However, among smaller companies—those in the Russell 3000 Index—three-quarters still permit plurality voting, where one vote is often sufficient to insure election.[5]

Proxy access. By a 3-2 vote of the commissioners, the SEC approved proxy access rules that required companies to include in their proxy material the names of board nominees selected by large shareholders (that is, those who had owned 3 percent of the company for three years). But when business groups sued the SEC to prevent implementation, a federal appeals court invalidated the proxy access rule on the grounds that the SEC had not followed required procedures in adopting it. The SEC elected not to appeal this decision.[6] However, proxy access survives in a weakened form because the SEC amended Rule 14a-8 so that shareholders can now make proposals which would change company bylaws to permit proxy access. This two-step process is more complicated, and less likely to succeed, than the one-step version the SEC originally proposed. Also, such proposals are binding on the company only if state law permits. Such a proposal could be binding in Delaware.

The effectiveness of this rule change is uncertain. At this stage, it has not changed the reality that for most companies, shareholders have little say on board nominations.

Compensation for Officers and Directors—The Problem

Given the control that the CEO has over the selection process for the board of directors, it is not surprising that when the board sets the CEO's compensation, the results can sometimes appear to unfairly favor the CEO over the shareholders whose money is being used to pay him. After all, the CEO can easily replace stingy directors. Between 2001 and 2003, public companies spent 9.8 percent of their net income on compensation for top executives. In 1975, the top 100 CEOs earned 39 times as much as the average worker. By 2005, that ratio was over 400. See Exhibit 35.1 for an illustration of this trend.

The ratio in Japan is 11 to 1; in Britain, it is 22 to 1. Or, to look at it another way, the average salary of the CEO of a Fortune 500 company in 1960 was twice that of the president of the United States. In 2006, the ratio was 30 to 1.

Here are some examples of executive compensation that particularly agitated shareholders:

- Michael Eisner was the head of Walt Disney Corporation for 20 years. At the beginning of his tenure, the company did very well, and few complained when he was exceedingly well paid. But for the final *13* years, he earned $800 million

[5]The S&P 500 is composed of 500 leading companies in the most important U.S. industries, while the Russell 3000 is made up of the largest 3000 companies in the United States, representing 98 percent of the investable U.S. equity market.

[6]*Business Roundtable v. SEC*, 2011 U.S. App. LEXIS 14988 (D.C. Cir, 2011).

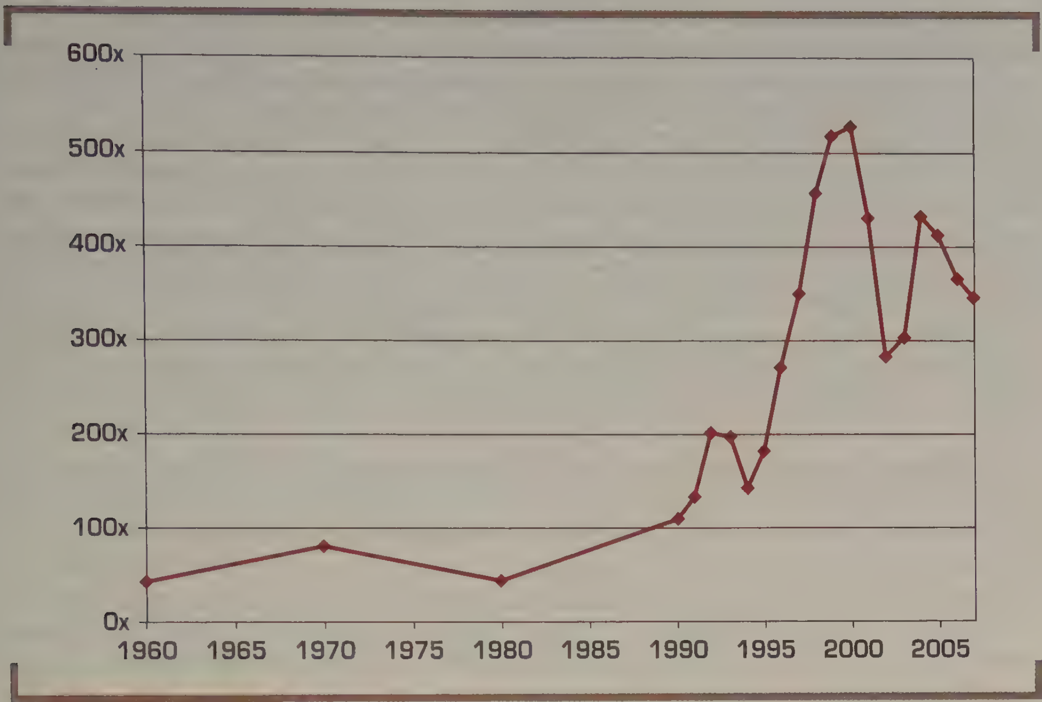

EXHIBIT 35.1 CEOs' pay as a multiple of the average worker's pay, 1960-2007
Source: *Executive Excess 2008*, the 15th Annual CEO Compensation Survey from the Institute for Policy Studies and United for a Fair Economy.[7]

while the stock performed worse than government bonds (a much less risky investment).

- The CEO of Fannie Mae earned $90 million during a time when the company's accounting system was so flawed that it overstated its earnings by $11 billion.
- Executives whose companies survived the 2008 financial crisis only because of taxpayer bailouts still received enormous bonuses. For example, taxpayers spent $180 billion to save American International Group, Inc., even as the company awarded bonuses of $165 million.

To many investors, sky-high executive salaries have become the symbol of all that is wrong with corporate governance. In many companies, salaries are the least of the compensation. Executives also received:

Stock options. Concerned about escalating executive salaries, shareholder activists began advocating "pay-for-performance" plans. The theory was that if executives received stock options instead of cash salaries, their incentives would be more closely aligned with those of shareholders. It was a good theory, but in practice, it did not work as intended.

[7]Prepared by Professor G. William Miller, University of California at Santa Cruz, *http://sociology.ucsc.edu/whorulesamerica/power/wealth.html*.

Stock options became a "heads, I win; tails, you lose" game. When stock prices soared in a bull market, options became unexpectedly valuable. In some cases, managers were richly rewarded even when their company had underperformed the (rising) market. However, when stock prices fell, boards lowered the price of the options.

Also, companies played games with options. After the 9/11 terrorist attack, the stock market was closed for four days. When it reopened, stocks took a bigger plunge than they had in any week since Nazi Germany invaded France at the beginning of World War II. In what appeared to be an unseemly exploitation of a national tragedy, 186 companies granted stock options to 511 executives during those few weeks. That is more than twice the number of companies that usually issued stock options in September.[8] These grants, if questionable, were at least legal; not so the backdated options that more than 2,000 companies appear to have issued their executives. In granting options, companies claimed that they had been issued on an earlier date, when the stock price was lower. This practice is fraud.

Termination, retirement plans, and death benefits. Most public companies provide their top executives with generous termination payments, no matter whether the person dies or is fired. Indeed, many CEO employment contracts provide that employees are entitled to severance pay unless fired for committing a particular type of felony. Dying also pays. For example, Nabor Industries Ltd. agreed to pay its 78-year-old CEO $263 million when he dies. The CEO of the Shaw Group was entitled to $17 million if he did not compete with the company after he dies. Yes, you read that right—he was to be paid for not competing after death.

Lavish perks. Executives had long received perks such as country club memberships and cars, but the roster of options expanded. One of the most popular perks was use of the corporate jet. One study found a high correlation between the use of the company plane and membership in far-flung golf clubs. Unfortunately, the correlation is inverse: the more companies spent on private jets, the worse their stock performed.

No wonder that executive compensation became a hot topic for shareholder proposals. Why did executive pay become so lavish?

Directors, not Shareholders, Set Executive Compensation. Directors set the CEO's compensation, but shareholders are the ones who pay the money. People tend to spend someone else's money more generously than their own. Also, directors and the CEO are often friends. Imagine if you got to decide how much your friend could spend dining out, knowing that someone else, whom you had never met, would have to pay the bill. It would be easy to be generous.

Shareholders Bear the Risk. Once again, executive compensation is a "heads I win; tails you lose" game. As we discussed at the beginning of the chapter, if CEOs make a risky decision that pays off, they typically profit enormously. Even if the decision turns out badly, they are often well paid anyway.

Benchmarking Games. Compensation is rarely linked closely to individual performance but instead to overall industry or stock market performance, which is defined in a way to favor executives. Two-thirds of the largest 1,000 U.S. companies report that they performed better than their peers.[9] That is, in part, because benchmarks can be manipulated.

---

[8] Charles Forelle, James Bandler, and Mark Maremont, "Executive Pay: The 9/11 Factor," *The Wall Street Journal*, July 15, 2006, p. A1.

[9] Kevin J. Murphy, "Politics, Economics and Executive Compensation," reported in Lucian Bebchuk and Jesse Fried, *Pay without Performance*, Harvard University Press, 2004, p. 71.

For example, Tootsie Roll Industries Inc., with $500 million in sales, benchmarked against Kraft Foods Inc., with $42.2 billion in earnings. Indeed, every company Tootsie Roll benchmarked against had higher revenues.

Campbell Soup used one set of benchmark companies to determine executive compensation but another set to evaluate its total shareholder return. In all fairness, it seems that Campbell ought to be consistent—presumably only one set of companies is the right comparison group.

The CEO Gets All the Credit. Compensation committees sometimes act as if the CEO and (maybe) a few other top executives are solely responsible for a company's success. Although there is much talk about "pay for performance," the reality is that luck can be as important a determinant of executive compensation as good performance.[10] After James Kilts became CEO of Gillette Co., the stock price went up 61 percent. He had added $20 billion in shareholder value, and therefore, to many, it seemed only fair when he was rewarded with a $153 million payout. But was it? About half the increase in Gillette revenues during the time that Kilts was running the show were attributable to currency fluctuations. A cheaper dollar increased revenue overseas. If the dollar had moved in the opposite direction, there might not have been any increase in revenue.

The Busier the Directors, the Higher the Executive Pay. Generally, executives are more likely to be overpaid if directors serve on many boards. These directors may be too busy to pay attention to such details. Also, trophy directors may be afraid that if they offend a chief executive at one company, word will get around, jeopardizing their position on other boards.

Most Executives Are Above Average. Of course, not everyone can be above average, but most directors believe that their executives are. No one wants to admit to hiring incompetents. Suppose that you are on a company's compensation committee and have data about industry averages. If your executives are above average in performance, you should pay them above-average salaries. If they are not above average, you should fire them, which few boards want to do, except in the face of disaster. If *you* raise salaries, the industry average also rises. Thus, the next company that sets compensation has an even higher bar to jump. For example, Colgate-Palmolive awarded 2 million stock options to its CEO on the understanding that he would receive no further grants for five years. Three years later, however, when consultants found that the CEO's compensation had fallen below the median, the company immediately awarded him an additional 2.6 million options.

Compensation Consultants Often Have Conflicts of Interest. Many companies hire compensation consultants to offer advice on executive pay. These same consultants may also provide other services to the company—such as human resource management—for which the fees can be substantial. The consultants have every incentive to suggest generous packages. In any event, it is not their money.

To make matters even worse for shareholders, lavish compensation does not appear to improve a business's success. A study of the 58 companies that were most generous to their CEOs found that, on average, these companies significantly underperformed both the market generally and their industry in particular.[11]

---

[10]See, for example, Marianne Bertrand and Sendhil Mullainathan, "Are CEOs Rewarded for Luck? The Ones Without Principals Are," *The Quarterly Journal of Economics*, August 2001.

[11]Reed Abelson, "Who Profits If the Boss Is Overfed?" *New York Times*, June 20, 1999, Business Section, p. 9.

Corporate executives are not the only people to earn fabulous salaries. Some athletes earn even more than CEOs. What is the difference between athletes and executives (besides a hook shot)? Athletes' salaries are indeed negotiated at arm's length with the team owner who will actually be paying the bill. This negotiation process means that (1) athletes' pay is not camouflaged; (2) they do not receive enormous severance packages on their way out the door; and (3) their retirement pay ranges from modest to nonexistent.[12] Also, an athlete's performance is transparent and easy to measure.

Compensation for Officers and Directors—A Solution?

The federal government has begun to respond to these perceived abuses.

Proxy Rules. The SEC began this process by amending its proxy rules to require more information about executive compensation. A proxy statement must now include a summary table setting out the full amount of compensation for the five highest-earning executives. The company must explain, for example, why option grants were approved and how much retirement benefits are worth. Companies must also disclose if the pay package increases the risk of large losses. The goal of this provision is to discourage companies from offering pay plans that reward executives for taking excessive risks.

SOX. Under SOX:

- A company cannot make personal loans to its directors or officers.
- If a company has to restate its earnings, the SEC has the right to demand that the CEO and CFO reimburse the company for any bonus or profits they received from selling company stock within a year of the release of the flawed financials. This is a so-called clawback provision. (See bizlawupdate.com for an article about how this clawback provision is working.)

Dodd-Frank. In 2010, Congress passed the Dodd-Frank Wall Street Reform and Consumer Protection Act. Dodd-Frank:

- Requires that compensation committees for all companies listed on a stock exchange must be composed solely of independent directors.
- Strengthens the clawback provisions of SOX and extends it to three years.
- Requires so-called "say-on-pay." At least once every three years, companies must take a *non-binding* shareholder vote on executive compensation (that is, for executive officers, but not for directors). In 2010, for the first time ever, shareholders voted against an executive pay plan—54 percent of Motorola's shareholders opposed CEO Sanjay Jha's compensation. The board had promised him 3 percent of the company if the plan to split Motorola in two succeeded, or a guaranteed payment if it did not. This vote was non-binding, and the company made no promise to respond.
- At least once every six years, companies must take a *non-binding* shareholder vote on how often to hold the say-on-pay vote—once a year, every two years, or every three years.
- In the event of a merger or sale of all company assets, shareholders have the right to a *non-binding* vote on so-called golden parachutes—special payments to executives because of the transaction.

---

[12]Some of the material in this section on executive compensation is drawn from Lucian Bebchuk and Jesse Fried, *Pay without Performance*, Harvard University Press, 2004.

- Companies must disclose the relationship between financial performance and the executive compensation they actually paid.
- Companies must disclose the CEO's compensation and the median compensation of all other company employees, as well as the ratio of these two numbers.

Even with these new protections in place, shareholder influence over executive compensation is far from guaranteed. Note that the shareholder resolutions are non-binding. And there is little shareholders can do to challenge executive compensation in the courts. To be successful, shareholders must prove that the board violated the business judgment rule, either by making a decision that was *grossly uninformed* or by setting an amount so high that it had *no relation* to the value of the services performed and was really a gift.[13] As the following case indicates, courts tend to be unsympathetic to this line of argument.

Brehm v. Eisner

2006 Del. LEXIS 307
Supreme Court of Delaware, 2006

Facts: Michael Ovitz founded Creative Artists Agency (CAA), the premier talent agency in Hollywood. As a partner at this agency, he earned between $20 and $25 million per year. He was also a longtime friend of Michael Eisner, chairman and CEO of the Walt Disney Company. Ovitz lacked experience managing a diversified public company, but Disney hired him to be its president with the hope that he could improve the company's talent relationships and increase foreign revenues. Upon the advice of Graef Crystal, a compensation consultant, the board approved Ovitz's contract.

After 14 months, all parties agreed that the experiment had failed, so Ovitz left Disney—but not empty-handed. Under his contract, he was entitled to $130 million in severance pay.[14]

Shareholders of Disney sued the board, alleging that it had violated the business judgment rule and that such a large payout was a waste of corporate assets. The trial court held for Disney, and the shareholders appealed.

Issues: ***Did Disney directors have the right to pay $130 million to an employee who had worked unsuccessfully at the company for only 14 months?***

Excerpts from Justice Jacobs's Decision: [T]he compensation committee [of the Board of Directors] was informed of the material facts relating to the payout. If measured in terms of the documentation that would have been generated if "best practices" had been followed, that record leaves much to be desired. [But, the] committee reasonably believed that the analysis of the terms of the [contract] was within Crystal's professional or expert competence, and the committee relied on the information, opinions, reports, and statements made by Crystal. Furthermore, Crystal appears to have been selected with reasonable care, especially in light of his previous engagements with the company.

[The purpose of the business judgment rule] is to protect directors who rely in good faith upon information presented to them from various sources, including any other person as to matters the member reasonably believes are within such person's professional or expert competence and who has been selected with reasonable care by and on behalf of the corporation. For these reasons, we uphold the Chancellor's [that is, the trial court's] determination that the compensation committee members did not breach their fiduciary duty of care.

The shareholders claim the payment of the severance amount to Ovitz constituted waste. A claim of waste will arise only in the rare, unconscionable case where directors irrationally squander or give away corporate assets.

[The shareholders] claim that provisions of the [contract] were wasteful because they incentivized Ovitz to perform poorly in order to obtain payment. The approval

[13] The business judgment rule is discussed at length in Chapter 34.
[14] As Ira Gershwin put it, "Nice work if you can get it, and if you get it—won't you tell me how?"

of the [contract] had a rational business purpose: to induce Ovitz to leave CAA, at what would otherwise be a considerable cost to him, in order to join Disney. To suggest that at the time he entered into the [contract,] Ovitz would engineer an early departure at the cost of his extraordinary reputation in the entertainment industry and his historical friendship with Eisner is not only fanciful but also without proof in the record.

For the reasons stated above, the judgment of the Chancellor is affirmed.

Fundamental Corporate Changes

A corporation must seek shareholder approval before undergoing any of the following fundamental changes:

- **Mergers.** As a general rule, one corporation cannot merge with another unless a majority of both sets of shareholders approve. This rule is always true for shareholders of the *acquired* company because they are always affected by the merger. But when an elephant acquires a peanut, it makes little sense for the elephant to vote. So, shareholders of the *acquiring* company vote only if the merger will have a major impact on their company.
- **Sale of assets.** Generally, shareholders are not asked to approve the sale of corporate assets. After all, one could hardly ask shareholders of the Coca-Cola Company to approve the sale of every bottle of Coke at every grocery store in the country. But shareholders must approve any sale that involves "all or substantially all" of the company's assets.
- **Dissolution.** A corporation cannot *voluntarily* dissolve without shareholder approval. However, as discussed in Chapter 33, the state or a court can *involuntarily* dissolve a corporation regardless of shareholder views.
- **Amendments to the charter.** Directors propose amendments to the charter, but these amendments are not valid unless approved by shareholders.
- **Amendments to the bylaws.** Both directors and shareholders have the right to amend the bylaws.

Right to Dissent

If a private corporation (i.e., one whose stock is not publicly traded) decides to undertake a fundamental change, the Model Act and many state laws require the company to buy back the stock of any shareholders who object to this decision. This process is referred to as **dissenters' rights**, and the company must pay "fair value" for the stock. Fundamental changes include a merger or a sale of most of the company's assets. Devil Desserts, Inc., manufactures sinfully rich chocolate delights. The board of directors is now considering a merger with Angel Treats Ltd., a company that sells low-fat, low-calorie (and in shareholder Celeste's opinion, low-taste) desserts. Celeste fully expects the value of the company to plummet after the merger, but her fellow shareholders support the board's decision. In a public company, Celeste could simply sell her stock, but Devil is a private corporation, and there is no market for its stock. She has the right to dissent because a merger is a fundamental change.

Right to Protection from Other Shareholders

Anyone who owns enough stock to control a corporation has a fiduciary duty to minority shareholders (those with less than a controlling interest). The courts have long recognized that minority shareholders are entitled to extra protection because it is easy (perhaps even

natural) for controlling shareholders to take advantage of them. In the following case, craigslist adopted a rights plan (which, as you may remember from the prior chapter, is also called a poison pill). But the pill was too bitter for eBay to swallow.

EBAY DOMESTIC HOLDINGS, INC. V. NEWMARK

2010 Del. Ch. LEXIS 187
Court of Chancery of Delaware, 2010

Facts: The company craigslist, Inc., owned the most popular website in the country for classified ads. It had just two shareholders—Craig Newmark and Jim Buckmaster—and only 34 employees. eBay, Inc. was a publicly traded company that operated online auction sites worldwide. It employed over 16,000 people. eBay bought a minority interest in craiglist, with the goal of ultimately acquiring the company or, failing that, learning the "secret sauce" of craigslist's success. It turned out, though, that craigslist and eBay were not a good match because they had entirely different cultures and approaches to business. While craigslist focused on enhancing its user community rather than maximizing its profits or expanding its business model, eBay's primary focus was to increase profitability and market share.

Without undergoing any premarital discussions in which these divergent goals might have been revealed, eBay purchased 28.4 percent of craigslist's shares. Under the explicit terms of the deal, it had the right to compete with craigslist. Craig and Jim said that if eBay was able to offer customers a better experience, then it should be allowed to do so.

As eBay gradually realized that Craig and Jim would never sell out to them, at least in this lifetime, it launched a competing classifieds website at **www.Kijiji.com**. In this process, it used nonpublic information about craigslist that it garnered, without Craig and Jim's knowledge, from its relationship with the company. That "betrayal" further inflamed the situation. As other people have discovered, agreeing in theory to an open marriage is very different from experiencing it in practice. Jim and Craig were furious about eBay's foray into online classifieds. They asked for a divorce, but eBay refused to sell its stock.

Craig and Jim, in their role as directors, responded by adopting a rights plan that restricted eBay's ability to buy more shares of craigslist or sell its existing shares to third parties. They also eliminated its right to choose one board member. In response, eBay filed suit, alleging that this rights plan violated craigslist's fidcuciary rights to eBay as a minority shareholder.

Issue: ***Did Craig, Jim, and craiglist violate their fiduciary duty to the minority shareholder?***

Excerpts from Chancellor Chandler's Decision: All directors of Delaware corporations are fiduciaries of the corporations' stockholders. Similarly, controlling stockholders are fiduciaries of their corporations' minority stockholders.

[In a situation such as this,] directors must (1) identify the proper corporate objectives served by their actions; and (2) justify their actions as reasonable in relationship to those objectives. Thus, the two main issues I confront are: First, did Jim and Craig properly and reasonably perceive a threat to craigslist's corporate policy and effectiveness? Second, if they did, is the Rights Plan a proportional response to that threat?

Jim and Craig contend that they identified a threat to craigslist and its corporate policies that will materialize after they both die and their craigslist shares are distributed to their heirs. To prevent this unwanted potential future reality, Jim and Craig have adopted the Rights Plan *now* so that their vision of craigslist's culture can bind *future* fiduciaries and stockholders from beyond the grave. Having given new meaning to the concept of a "dead-hand pill," Jim and Craig ask this Court to validate their attempt to use a pill to shape the future of the space-time continuum.

Ultimately, defendants failed to prove that craigslist possesses a palpable, distinctive, and advantageous culture that sufficiently promotes stockholder value to support the indefinite implementation of a poison pill. Jim and Craig did not make any serious attempt to prove that the craigslist culture, which rejects any attempt to further monetize its services, translates into increased profitability for stockholders.

I am sure that part of the reason craigslist is so popular is because it offers a free service that is also extremely useful. It may be that offering free classifieds is an essential component of a successful online classifieds venture. After all, by offering free classifieds, craigslist is able to attract such a large community of users that real estate brokers in New York City gladly pay fees to list apartment rentals in order to access the vast community of craigslist users. Giving away services to attract business is a sales tactic, however, not a corporate culture. To the extent business measures like loss-leading products, money-back

coupons, or putting products on sale are cultural artifacts, they reflect the American capitalist culture, not something unique to craigslist.

The defendants also failed to prove at trial that when adopting the Rights Plan, they concluded in good faith that there was a sufficient connection between the craigslist "culture" (however amorphous and intangible it might be) and the promotion of stockholder value. Jim and Craig simply disliked the possibility that the Grim Reaper someday will catch up with them and that a company like eBay might, in the future, purchase a controlling interest in craigslist. They considered this possible future state unpalatable, not because of how it affects the value of the entity for its stockholders, but rather because of their own personal preferences. Jim and Craig therefore failed to prove at trial that they acted in the good faith pursuit of a proper *corporate* purpose when they deployed the Rights Plan.

I personally appreciate and admire Jim's and Craig's desire to be of service to communities. The corporate form in which craigslist operates, however, is not an appropriate vehicle for purely philanthropic ends, at least not when there are other stockholders interested in realizing a return on their investment. If Jim and Craig were the only stockholders affected by their decisions, then there would be no one to object. eBay, however, holds a significant stake in craigslist, and Jim and Craig's actions affect others besides themselves.

As long as Jim and Craig have control, they can maintain the craigslist "culture" regardless of whether eBay sells some or all of its shares. The Rights Plan therefore does not have a reasonable connection to Jim and Craig's professed goal. It therefore falls outside the range of reasonableness.

I rescind the Rights Plan in its entirety.

Ordinary Business Transactions

Minority shareholders have the right to overturn an ordinary business transaction between the corporation and a controlling shareholder unless the corporation can show that the transaction is fair to the minority shareholders. The Sinclair Oil Co. owned 97 percent of Sinclair Venezuelan Oil Co. (Sinven). Sinven's minority shareholders complained that Sinclair

- Forced Sinven to pay dividends so large that the subsidiary faced bankruptcy
- Hired other, wholly owned, subsidiaries but not Sinven, and
- Refused to force its other subsidiaries to abide by their contracts with Sinven; for instance, a Sinclair subsidiary signed a contract with Sinven to buy crude oil but failed to purchase the required amount.[15]

The court ruled that the dividend policy was fair to the minority shareholders because they received the dividends, too. Sinclair was not under any obligation to hire Sinven. But Sinclair did have to ensure that other subsidiaries complied with their Sinven contracts.

Excluding Minority Shareholders

Controlling shareholders must include minority shareholders in any favorable arrangements that they make for their own stock. A successful savings and loan (S&L) had stock that, in theory, was worth $2,400 a share but, in reality, it rarely traded because of the high price. The controlling shareholder could have split the stock so that shareholders received 100 shares worth $24 each. Instead, he concocted a shrewd plan whereby he and his friends (who together owned 85 percent of the stock) exchanged their S&L stock for shares in a new corporation. Stock of the new company sold well, but there was still

[15] *Sinclair Oil Corp. v. Levien,* 280 A.2d 717, 1971 Del. LEXIS 225 (Del. 1971).

virtually no market for the remaining S&L shares. The court held that the controlling shareholders could not exclude the minority without a compelling business purpose, which did not exist in this case.[16]

Expelling Shareholders

There is an old saying that you can choose your friends, but not your family. Can you choose your fellow shareholders? Sometimes, relations between shareholders become so bitter that the majority attempts to expel a minority owner. **Many states prohibit a company from expelling shareholders unless the firm pays a fair price for the minority stock and the expulsion has a legitimate business purpose.** Delaware has an even higher standard—the transaction must be "entirely fair." This standard requires that both the price and the process of approval be fair. Theodore Lerner owned 70 shares in the family real estate company, Lawrence Lerner only 25. When Lawrence sued Theodore for mismanagement, Theodore amended the charter to reclassify each share of stock into 1/35th of a share and to buy out any fractional shares. Lawrence ended up with 5/7ths of a share, which the company purchased. The court, however, halted the squeeze-out because it had no legitimate business purpose.[17]

> **Sometimes, relations between shareholders become so bitter that the majority attempts to expel a minority owner.**

Right to Monitor

As owners of an enterprise, shareholders play a relatively passive role. Primarily, they have the right to *monitor*, meaning the right to receive information and the right to vote on proposals put to them by the board. Shareholders do not, by and large, have the right to *initiate* corporate changes.

EXAM Strategy

Question: The five Brown children were all owners of the Roundup Ranch, Inc., in Montana. Peter owned 51 percent of the corporation; the rest was evenly divided among his four siblings. Because coal companies were encroaching on Roundup, Peter traded the Montana ranch for equivalent land in New Mexico. His siblings were not happy—their only interest in owning the ranch had been to maintain a connection with their family homestead. What could they do?

Strategy: Because Peter owned a majority of the shares, he had the right to sell the ranch. But because he is undertaking a fundamental change, his siblings do have some rights.

Result: The siblings have the right to dissent—that is, to require the company to buy back their stock, which is what the unhappy siblings required the unhappier Peter to do.

---

Enforcing Shareholder Rights

Shareholders in serious conflict with management have two different mechanisms for enforcing their rights: a derivative lawsuit or a direct lawsuit.

Derivative Lawsuits

A derivative lawsuit is brought by *shareholders* to remedy a wrong to the *corporation*. The suit is brought in the name of the corporation, and all proceeds of the litigation go to the corporation. For example, as you saw in the earlier case, shareholders of Disney were upset when the board of directors approved a $130 million severance package for Michael Ovitz, who had served as Disney's president for a rocky 14 months. Shareholders wanted to sue the directors for having approved this compensation plan. But they had no right to sue on their *own* behalf because it was the *company* that had been harmed. Any injury to the shareholders was indirect. Thus, only the corporation could sue. And who would authorize a suit against the directors on behalf of the corporation? The directors, of course. Because the directors are unlikely to sue themselves, the law permits derivative actions, by which shareholders can sue managers who have violated their duty to the corporation. Because damages go to the *corporation*, the individual shareholders benefit only to the extent that the settlement causes their stock to rise in value.

The same rule applies if an outsider harms the corporation. If Disney decided not to sue a customer that refused to pay its bill, the shareholders could do so, but only in a derivative action, that is, only in the name of the corporation. Once again, any recovery goes to the corporation.

Litigation is tremendously expensive. How can shareholders afford to sue if they are not entitled to damages? A corporation that loses a derivative suit must pay the legal fees of the victorious shareholders. Most derivative lawsuits are litigated by lawyers eager to earn these fees. (Losing shareholders are not required to pay the corporation's legal fees.[18]) Most derivative lawsuits are initiated by lawyers who seek out shareholders and persuade them to sue. Without this incentive, few shareholders would bring derivative suits and much corporate wrongdoing would go unpunished. As we have seen, shareholders have limited power; derivative lawsuits are a means of protecting their rights.

Most derivative suits are brought in Delaware, so this discussion is based on Delaware law. Most other corporate statutes are similar to those of Delaware.

Making Demand

Before bringing suit, shareholders must first "make demand" on the board of directors. In other words, they must notify the board that the corporation has been wronged and ask the board to bring suit in the name of the corporation directly. There is one crucial exception to this rule: shareholders are not required to make demand if it would *clearly be futile* because a majority of the directors either have a conflict of interest or were careless when making the decision. In the following case, the court ruled that making demand on eBay would be futile.

[18]Under the Private Securities Litigation Reform Act, class action plaintiffs in suits brought under the securities laws must pay the corporation's legal expenses if the court determines that the suit was frivolous or abusive. 104 Pub. L. No. 67, 109 Stat. 737.

In Re eBay, Inc. Shareholders Litigation

2004 Del. Ch. LEXIS 4
Court of Chancery of Delaware, 2004

Facts: Pierre M. Omidyar and Jeffrey Skoll founded eBay, Inc., a company that hosts an online auction site. Later, Robert C. Kagle and Margaret C. Whitman joined the eBay board. Whitman also became president and CEO. Goldman Sachs Group Inc. twice served as lead underwriter when eBay sold shares to the public. Then Whitman became a director of Goldman. Afterwards, Goldman served as eBay's financial advisor when it acquired PayPal, Inc.

During this period in which Goldman engaged in three major transactions with eBay, the investment bank also served as underwriter for a substantial number of technology companies that went public. Many investors wanted to buy stock in these initial public offerings (IPOs) because an immediate and large profit was virtually guaranteed. Often stock prices doubled or tripled on the day of the offering. Goldman allowed Omidyar, Skoll, Kagle, and Whitman, all directors of eBay, to buy shares in hundreds of its IPOs, effectively giving them millions of dollars in profits. The following chart reveals the percentage of eBay shares that each director owned and the number of Goldman IPOs in which he or she was allowed to invest:

Director	Percentage of eBay shares owned	Number of IPOs in which director took part
Omidyar	>23%	40
Skoll	13%	75
Whitman	3.3%	>100
Kagle	Not disclosed in case	25

In each case, the eBay directors sold the stock immediately, and did earn millions of dollars in total profit.

eBay shareholders sued, alleging that Goldman had effectively bribed the defendants to continue giving business to the bank. The lawsuit was brought as a derivative action in the name of eBay. The plaintiffs alleged that demand was futile because the directors had a conflict of interest.

The board of directors of eBay had seven members: Omidyar, Kagle, Whitman, Philippe Bourguignon, Scott D. Cook, Dawn G. Lepore, and Howard D. Schultz. (At the time of the lawsuit, Skoll was no longer a director.) The court determined that the three defendants had a conflict of interest because they were the targets of the lawsuit. It was obvious they would not vote for eBay to pursue the litigation. If one of the remaining four directors also had a conflict, then that would constitute a majority and demand would be excused. The shareholders could then proceed with the lawsuit.

Issues: ***Did a majority of the board of directors have a conflict of interest? Was demand on the board futile?***

Excerpts from Chancellor Chandler's Decision: Plaintiffs allege that Cook, Lepore, Schultz, and Bourguignon have received huge financial benefits as a result of their positions as eBay directors and, furthermore, that they owe their positions on the board to Omidyar, Whitman, Kagle, and Skoll.

[I]n 1998, when Cook joined eBay's board, it awarded him 900,000 [stock] options. In 1998, eBay adopted a director's stock option plan pursuant to which each non-employee director was to be awarded 30,000 options each year. [T]he stock options are worth potentially millions of dollars.

© AP Photo/Paul Sakuma

Was it right for Meg Whitman to buy stock in Goldman IPOs?

I need not address each of the four outside directors, as I agree with plaintiffs that the allegations of the complaint are sufficient to raise a reasonable doubt as to Cook's independence from the eBay insider directors who accepted Goldman Sachs' IPO allocations.

First, Whitman, Omidyar, Kagle, and Skoll (and their affiliates) own about one-half of eBay's outstanding

common stock. As a result, these eBay officers and directors effectively have the ability to control eBay and to direct its affairs and business, including the election of directors and the approval of significant corporate transactions.

Second, a significant number of options have not yet vested and will never vest unless the outside directors remain directors of eBay. ["Vested" means that the owner is allowed to keep the options, even if he leaves the company.] Given that the value of the options for Cook (and allegedly for the other outside directors) potentially run into the millions of dollars, one cannot conclude realistically that Cook would be able to objectively and impartially consider a demand to bring litigation against those to whom he is beholden for his current position and future position on eBay's board. With the specific allegations of the complaint in mind, I conclude that plaintiffs have adequately demonstrated that demand on eBay's board should be excused as futile.

Ethics The activities described in this case were standard operating procedure at the time. Yet, these defendants were *billionaires.* Why would they engage in behavior that was potentially damaging to their reputation and to their company? Would you have done the same? Why or why not?

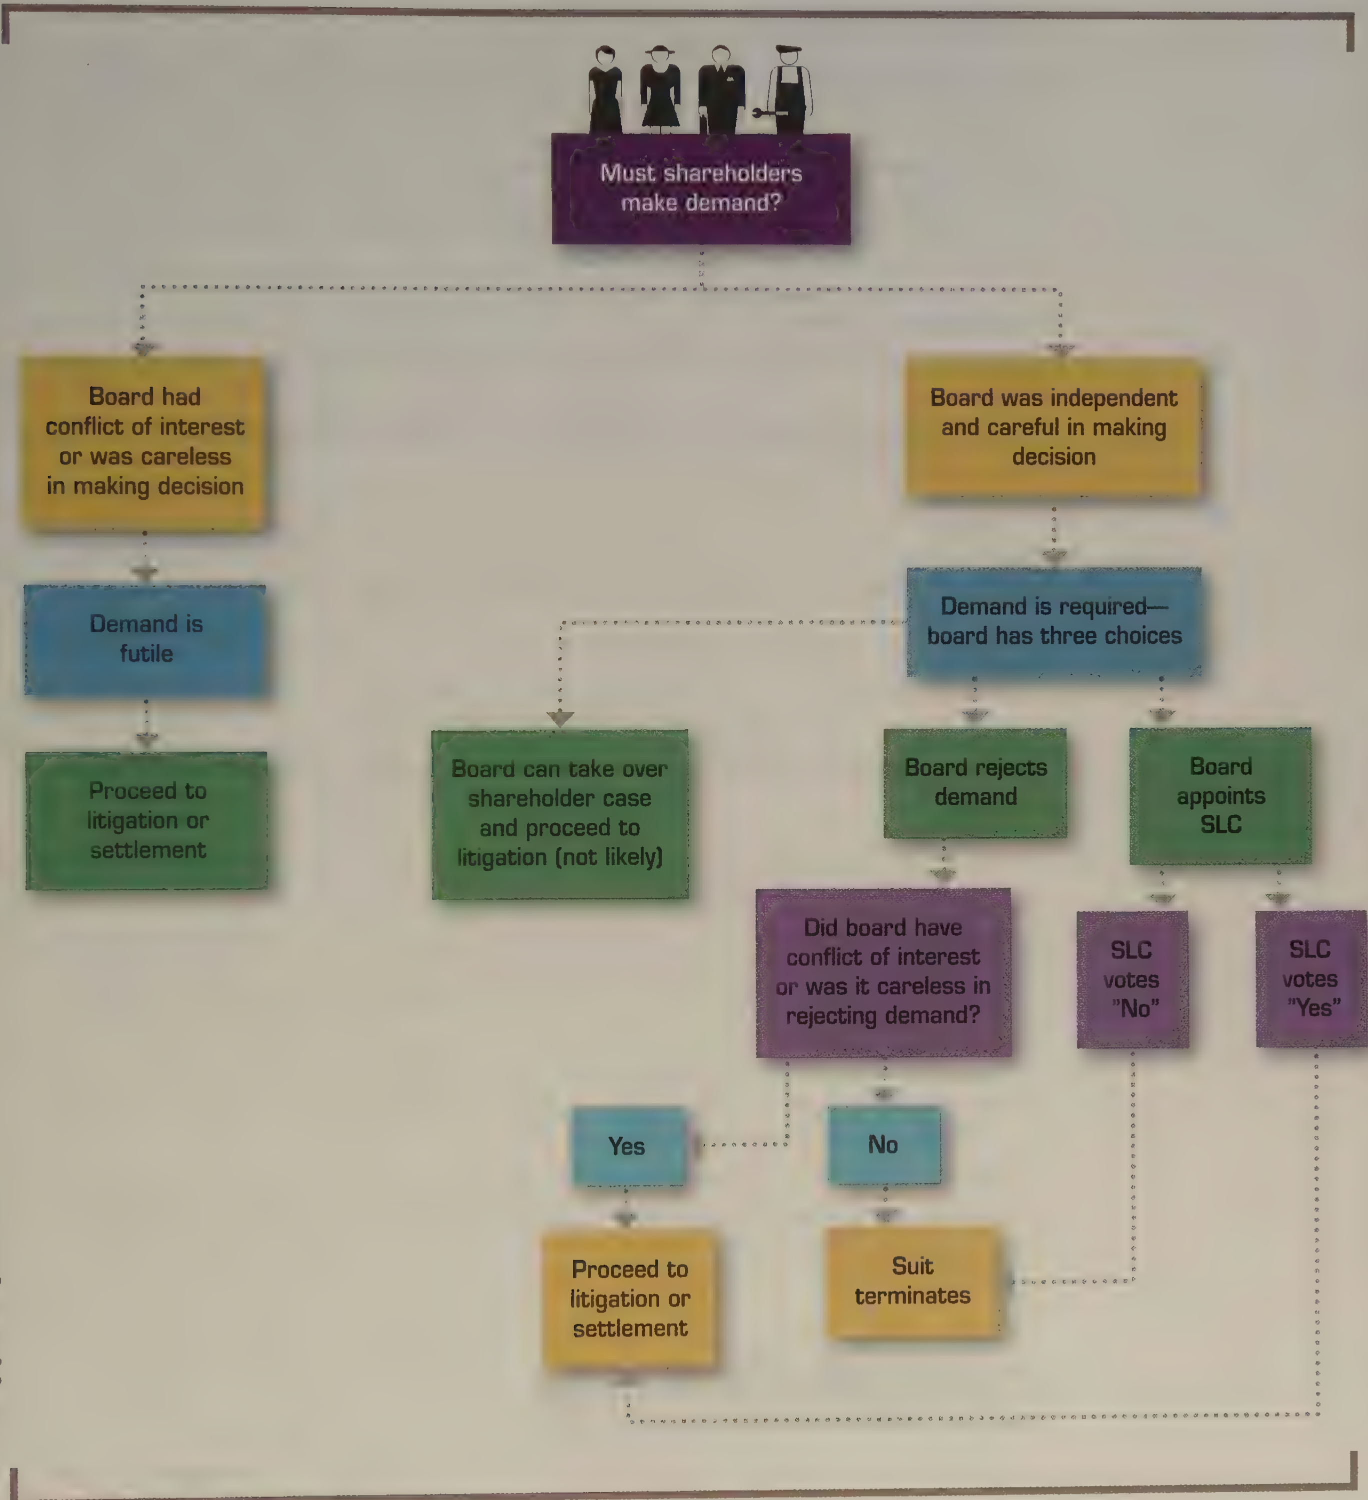
If Demand Is Required

If shareholders are required to make demand, the board has three choices:

1. It can agree with the shareholders and file suit on behalf of the corporation. In this case, the shareholders cannot bring their own derivative action. Although technically, the board is required to put the interests of the corporation first, it is, shall we say, very unlikely that a board will decide to file suit.
2. The board can reject the demand (or fail to respond). To proceed with their suit in this case, the plaintiffs must convince the court that the board has violated the business judgment rule because it had a conflict of interest or was careless in rejecting the demand. Again, this is a low-probability event.
3. The board can appoint a Special Litigation Committee (SLC). The SLC is typically comprised of at least two independent directors (usually those elected after the disputed activity occurred). If the SLC determines that the lawsuit is without merit, then the court must generally dismiss the case unless the shareholders can show the rejection was uninformed or not in good faith. There does not appear to be a single case in which an SLC recommended that litigation continue or a court overturned the decision of an SLC.

Exhibit 35.2 illustrates the course of derivative litigation. The most important issue is whether a court will require demand. Shareholders know that if they make demand, the directors will appoint an SLC, which will then kill the suit. Therefore, shareholders typically file suit without making demand and wait for the company to go to court to ask that the suit be dismissed unless demand is made. If the court indeed requires demand, the shareholders know they have lost and typically withdraw the case. If, however, the shareholders can convince the court that demand is not required, the shareholders have won and the parties settle.

More Fortune 500 companies are incorporated in Delaware than in any other state, making its corporate law the most influential in the nation. The Model Act has, however, deviated from Delaware law by proposing that demand be required in *all* derivative cases. This approach essentially ignores the possibility that demand might be futile.



Must shareholders make demand?
Board had conflict of interest or was careless in making decision
Board was independent and careful in making decision
Demand is futile
Demand is required—board has three choices
Proceed to litigation or settlement
Board can take over shareholder case and proceed to litigation (not likely)
Board rejects demand
Board appoints SLC
Did board have conflict of interest or was it careless in rejecting demand?
SLC votes "No"
SLC votes "Yes"
Yes
No
Proceed to litigation or settlement
Suit terminates

EXHIBIT 35.2

Direct Lawsuits

Shareholders are permitted to sue the corporation directly only if their own rights have been harmed. If, for example, the corporation denies shareholders the right to inspect its books and records or to hold a shareholder meeting, they may sue in their own name and keep any damages awarded. The corporation is not required to pay the shareholders' legal fees; winning shareholders can use part of any damage award for this purpose. With a direct action, shareholders are more likely to get their day in court because they are not required to make demand first.

The following table displays some of the important distinguishing features of derivative suits and direct actions:

Features	Derivative Action	Direct Action
Enforces the Rights of:	The corporation	The shareholder(s)
Damages Are Paid to:	The corporation	The shareholder(s)
Procedural Requirements	• Plaintiffs make demand on the board unless clearly futile. • If demand is futile, plaintiffs proceed with the case. • If demand is made, either the board or the SLC can terminate the case.	The same as regular litigation

EXAM Strategy

Question: Shareholders of Hewlett-Packard Co. were outraged that the board of directors paid CEO Carleton Fiorina $40 million after it fired her. The shareholders filed suit directly. Do the shareholders have the right to bring this suit on their own behalf against the board of directors?

Strategy: Shareholders can bring suit directly only if they have been personally harmed. If the harm is to the corporation, then shareholders must bring a derivative action in the name of the company.

Result: In this case, the harm was to the corporation. The shareholders were harmed only indirectly, when the price of their stock went down. A derivative action was their only option.

Chapter Conclusion

Two major financial collapses in the first decade of this century led to harsher scrutiny of corporate governance. The sight of huge payouts to top executives, even as their companies fell in heaps around them, spurred shareholder—and governmental—anger. We are now engaged in a great experiment—what can shareholders do, with and without government aid, to improve corporate accountability and performance? What is the right balance of power between shareholders and managers?

Regulatory changes and shareholder power have led to some concrete results. At the beginning of this century, about half of publicly traded companies combined the position of CEO and chairman of the board of directors. For most companies, those two jobs are now separate. CEOs now serve an average of 6.3 years, down from 8.1 years a decade ago. More independent directors, who take their independence more seriously, populate boards.

But corporate governance is not an end in itself—its goal is to improve performance. It is early days yet, but so far there is no compelling evidence of a significant relationship between good corporate governance and improved financial results.

In the end, it may be that the answer lies, at least in part, in the character of corporate leaders. In analyzing Enron and its aftermath, a *Wall Street Journal* article concluded: "[N]ot one of the instances of egregious abuse of shareholder interest could have occurred if the CEO had simply said, 'No!' It takes a person of character to know what lines you don't cross."[19]

EXAM REVIEW

1. **DIRECTORS** Directors, not shareholders, have the right to manage the corporate business. (p. 863)

2. **THE SEC** The Securities and Exchange Commission regulates the relationship between publicly held corporations and their shareholders. The SEC plays a less active role in privately held corporations. (p. 863)

3. **SHAREHOLDER RIGHTS** Shareholders have the right to:
   - Receive annual financial statements (if their company is publicly traded),
   - Inspect and copy the corporation's records (for a proper purpose),
   - Elect and remove directors, and
   - Approve fundamental corporate changes, such as a merger or a major sale of assets. (pp. 864–879)

EXAM Strategy

Question: The board of directors of Finalco Group, Inc., decided to sell most of the company's assets to Western Savings. Shortly after the proposed sale was announced, Finalco's largest shareholder said he opposed the transaction. Does Finalco need his approval for the sale?

Strategy: Shareholders have the right to approve fundamental corporate changes. Was this a fundamental change? (See the "Result" at the end of this section.)

[19] David Wessel, "Why the Bad Guys of the Boardroom Emerged en Masse," *Wall Street Journal*, June 20, 2002, p. A1.

4. **PROXIES** Virtually all publicly held companies solicit proxies from their shareholders. A proxy authorizes someone else to vote in place of the shareholder. (pp. 866–867)

5. **SHAREHOLDER PROPOSALS** Under certain circumstances, public companies must include shareholder proposals in the proxy statement. (pp. 867–868)

EXAM Strategy

Question: An institutional investor wanted A&P, the grocery store chain, to permit large shareholders to place comments about the company's financial performance in its proxy statement. Which would be a better strategy for achieving this goal: a shareholder proposal or an amendment to the company's bylaws?

Strategy: Shareholder proposals are treated differently from bylaw amendments. Which one is more likely to affect the behavior of the company? (See the "Result" at the end of this section.)

6. **INDEPENDENT DIRECTORS** Under SOX, all members of a board's audit committee must be independent. For companies listed on the NYSE or NASDAQ, independent directors must comprise a majority of the board and only independent directors can serve on audit, compensation, or nominating committees. (p. 869)

7. **EXECUTIVE COMPENSATION**
   - Under SOX, a company cannot make personal loans to its directors or officers. If a company has to restate its earnings, its CEO and CFO must reimburse the company for any bonus or profits they received from selling company stock within a year of the release of the flawed financials.
   - Dodd-Frank requires shareholder "say-on-pay." In addition, companies must disclose the CEO's compensation and the median compensation of all other company employees, as well as the ratio of these two numbers. (pp. 870–876)

8. **DISSENTERS' RIGHTS** A shareholder who objects to a fundamental change in the corporation can insist that her shares be bought out at fair value. (p. 876)

9. **RIGHTS AND OBLIGATIONS OF CONTROLLING SHAREHOLDERS** Controlling shareholders:
   - May not enter into unfair business transactions with the corporation,
   - Have a fiduciary duty to minority shareholders,
   - May not exclude minority shareholders from beneficial arrangements involving stock, and
   - Are prohibited from expelling minority shareholders unless the expulsion is done for a legitimate business purpose. (pp. 876–879)

10. **DERIVATIVE LAWSUITS** A derivative lawsuit is brought by shareholders to remedy a wrong to the corporation. The suit is brought in the name of the corporation, and all proceeds of the litigation go to the corporation. (pp. 880–883)

EXAM Strategy

Question: Daniel Cowin was a minority shareholder of Bresler & Reiner, Inc., a public company that developed real estate in Washington, D.C. He alleged numerous instances of corporate mismanagement, fraud, self-dealing, and breach of fiduciary duty by the board of directors. He sought damages for the diminished value of his stock. Could Cowin bring this suit as a direct action, or must it be a derivative suit?

Strategy: If the wrong was to the corporation, then Cowin must bring a derivative lawsuit. He can bring a direct action only if the harm was to him personally. (See the "Result" at the end of this section.)

3. Result: Yes, it was a sale of most of the company's assets. The board could not proceed without the approval of the owners of a majority of shares.

5. Result: A shareholder proposal is not binding on the company. Even if the shareholders approved a proposal, A&P would be under no obligation to carry it out. A bylaw amendment, on the other hand, would be binding on the company.

10. Result: The court ruled that the injury had fallen equally on all the shareholders, and therefore, a derivative suit was appropriate.

Multiple-Choice Questions

1. The president of R. Hoe & Co., Inc., refused to call a special meeting of the shareholders although 55 percent of them requested it. One purpose of the meeting was to demand that the former president be reinstated. Do shareholders have the right to make these two requests?
   (a) Yes to both.
   (b) No to both.
   (c) The shareholders have the right to call a meeting, but not to reinstate the president.
   (d) The shareholders have the right to reinstate the president, but not to call a meeting.

2. Under SOX and Dodd-Frank:
   (a) Companies are prohibited from making personal loans to directors and officers.
   (b) If a company restates its earnings, the five top executives must reimburse the company for any income they have received during that period.

(c) All directors must be independent.
(d) Shareholders have the right to strike down golden parachutes.

3. A company is allowed to hold its annual meeting online:
   (a) If a majority of its shareholders approve
   (b) If it also hold a live meeting for shareholders who want to attend in person
   (c) If it simulcasts a video of the meeting
   (d) Any way it wants, as long as shareholders are notified

4. To be elected to a board of a publicly traded company, a candidate must:
   (a) Receive a majority of the votes cast
   (b) Receive a majority vote of the shares outstanding
   (c) Receive a plurality of the votes cast
   (d) Receive a plurality of the shares outstanding

5. If directors and officers cause harm to their company:
   (a) Shareholders have the right to file suit against them and recover damages.
   (b) Shareholders have the right to file suit against them and recover damages only if the board permits the suit.
   (c) Shareholders have the right to file suit against them and recover damages only if the board permits the suit or a court deems the demand futile.
   (d) Shareholders do not have the right to file suit against them.

Essay Questions

1. William H. Sullivan, Jr., purchased all the voting shares of the New England Patriots Football Club, Inc. (the Old Patriots). He organized a new corporation called the New Patriots Football Club, Inc. The boards of directors of the two companies agreed to merge. After the merger, the nonvoting stock in the Old Patriots was to be exchanged for cash. Do minority shareholders of the Old Patriots have the right to prevent the merger? If so, under what theory?

2. **ETHICS** Edgar Bronfman, Jr., dropped out of high school to go to Hollywood and write songs and produce movies. Eventually, he left Hollywood to work in the family business—the Bronfmans owned 36 percent of Seagram Co., a liquor and beverage conglomerate. Promoted to president of the company at the age of 32, Bronfman seized a second chance to live his dream. Seagram received 70 percent of its earnings from its 24 percent ownership of DuPont Co. Bronfman sold this stock *at less than market value* to purchase (at an inflated price) 80 percent of MCA, a movie and music company that had been a financial disaster for its prior owners. Some observers thought Bronfman had gone Hollywood, others that he had gone crazy. After the deal was announced, the price of Seagram shares fell 18 percent. Was there anything Seagram shareholders could do to prevent what to them was not a dream but a nightmare? Apart from legal issues, was Bronfman's decision ethical? What ethical obligations does he owe Seagram's shareholders?

3. **YOU BE THE JUDGE WRITING PROBLEM** Two shareholders of Bruce Co., Harry and Yolan Gilbert, were fighting management for control of the company. They asked for permission to inspect Bruce's stockholder list so that they could either solicit support for their slate of directors at the upcoming stockholder meeting, attempt to buy additional stock from other stockholders, or both. Bruce's board refused to allow the Gilberts to see the shareholder list on the grounds that the Gilberts owned another corporation that competed with Bruce. Do the Gilberts have the right to see Bruce's shareholder list? **Argument for the Gilberts:** If shareholders of a company have a proper purpose, they are entitled to inspect shareholder lists. Soliciting votes and buying stock are both proper purposes. **Argument for Bruce:** The Gilberts are simply offering a pretext. They could use this information to compete against the company. No shareholder has the right to cause harm.

4. When Classic Corp. went public at $12 a share, its waterbed business was floating along nicely—the company had annual sales of $23 million and turned a hefty profit. The company then sprang a leak and suffered through many years of losses. Isaac, who owned 64 percent of the stock, decided to take the company private again (by buying shareholders' stock) at a price of 20 *cents* a share. Classic hired two financial advisers who opined that the buyout price was fair. The board of directors voted in favor of the sale and then scheduled a special shareholder meeting to vote on the buyout. Do the minority shareholders have any rights?

5. Shareholders lost their gamble when they bought stock of Jackpot Enterprises, Inc. Fed up with management, a shareholder asked the company to include a proposal in the proxy statement that would require the board of directors to sell or merge the company. Must Jackpot include this proposal in its proxy statement?

Discussion Questions

1. Pfizer Inc. paid $2.3 billion to settle civil and criminal charges alleging that it had illegally marketed 13 of its most important drugs. This settlement made history, but not in a good way. It was both the largest criminal fine and the largest settlement of civil health care fraud charges *ever* paid. Shareholders filed a derivative suit against the Pfizer board and top executives. Defendants responded with a motion to dismiss on the grounds that shareholders had not made demand on the board. Is demand necessary?

2. **ETHICS** After a recent annual meeting, Cisco Systems reported the results of the votes on both management and shareholder proposals. The company reported the results of its own proposals as a simple ratio of those in favor divided by the total number of votes cast. But for shareholder proposals, it reported the percentage as a ratio of those in favor divided by all outstanding shares. As a result, it reported the favorable vote for one shareholder proposal as 19 percent when, in fact, 34 percent of the votes cast supported this proposal. Is Cisco behaving ethically?

3. For several years, CSK Auto, Inc., fraudulently reported inflated earnings. During this period, Maynard Jenkins was CEO. He was not involved in the fraud, however, and was never charged with a crime. Nonetheless, using a SOX provision, the SEC sought

to claw back some of his earnings during this period. Should Jenkins be financially responsible for fraud that occurred on his watch, even though he did not participate?

4. Prior to the DuPont Co.'s annual shareholder meeting, Friends of the Earth Oceanic Society submitted a proposal requiring the company to (1) accelerate its phaseout of the production of chlorofluorocarbons and halons, (2) present to shareholders a report detailing research and development efforts to find environmentally sound substitutes, and (3) report to shareholders on marketing plans to sell those substitutes. Must DuPont include this proposal in its proxy material for the annual meeting?

5. Would the following initiatives improve corporate governance? Can you think of others that would?

a. Shareholder proposals: require the board of directors to implement shareholder proposals that receive a majority vote,

b. Proxy access: as proposed by the SEC,

c. Majority vote: prohibit boards of directors from seating directors who fail to receive a majority vote of shares cast,

d. Compensation: base compensation on the company's growth in earnings compared with those of its competitors, not just increases in earnings (that might be caused by a general market rise).

SECURITIES REGULATION

In 1926, America was gripped by a fever of stock market speculation. "Playing the market" became a national mania. The most engrossing news on any day's front page was the market. Up and up it soared. The cause of this psychological virus is uncertain, but the focus of the infection was the New York Stock Exchange (NYSE). Between 1926 and 1929, annual volume more than doubled.

Much of this feverish trading was done on margin. Customers put down only 10 or 20 percent of a stock's purchase price and then borrowed the rest from their broker. This easy-payment plan excited the gambling instinct of unwary amateurs and professional speculators alike. By September 1929, the volume of these margin loans was equal to about half the entire public debt of the United States.

From the peak of the bull market in September to the debacle of October 29, over $32 billion of equity value simply vanished from the earth.

On September 4, 1929, stock prices began to soften, and for the next month, they slid gently. Over the weekend of October 19, brokers sent out thousands of margin calls, asking customers to pay down loans that now exceeded the value of their stock. If customers failed to pay, brokers dumped their stock on the market, causing prices to fall further and brokers to make more margin calls. Soon there was a mad scramble of selling as prices plunged in wild disorder. Tens of thousands of investors across the country were wiped out as the value of their stock fell below what they had borrowed to buy it. On Tuesday, October 29, 1929, the speculative boom completely collapsed. That day, 4 million shares were traded, a record that stood for 30 years. From the peak of the bull market in September to the debacle of October 29, over $32 billion of equity value simply vanished from the earth.

The stock market crash spawned the Great Depression—the most pervasive, persistent, and destructive economic crisis the nation has ever faced. Retail trade fell by one-half, automobile production by two-thirds, steel by three-quarters. In 1933, more businesses

failed than in any other year in history. Surviving businesses responded to the crisis by cutting dividends, reducing inventories, laying off workers, slashing wages, and canceling capital investments.

Unemployment statistics were the most poignant of all. In 1932, one in every five people in the labor force was out of a job, more than twice the highest level reached in the most recent U.S. recession. And this was at a time before widespread unemployment benefits. Millions of others were underemployed, working only two or three days a week for wages that could not support a family. Distress cut across all economic and social classes. Bankers, insurance agents, architects, and lawyers joined the throng of unemployed. Articles such as the following were common in newspapers across the land:

> *New York, Jan. 6, 1933 (AP)*—After vainly trying to get a stay of dispossession until Jan. 15 from his apartment in Brooklyn, yesterday, Peter J. Cornell, 48 years old, a former roofing contractor out of work and penniless, fell dead in the arms of his wife. A doctor gave the cause of his death as heart disease, and the police said it had at least partly been caused by the bitter disappointment of a long day's fruitless attempt to prevent himself and his family being put out on the streets.[1]

Introduction

At the time of the great stock market crash, only state, not federal law, regulated securities (such as stocks and bonds). Congress recognized that the country needed a national securities system if it was to avoid another such catastrophe. In 1933, Congress passed the Securities Act of 1933 (1933 Act) to regulate the issuance of new securities. The next year, it passed the Securities Exchange Act of 1934 (1934 Act) to regulate companies with publicly traded securities. The 1934 Act also established the Securities and Exchange Commission (SEC), the regulatory agency that oversees the securities industry.

The Securities and Exchange Commission

The SEC creates law in three different ways:

- **Rules.** The securities statutes are often little more than general guides. Through its rules, the SEC fills in the crucial details.
- **Releases.** These are informal pronouncements from the SEC on current issues. Releases often operate as two-way communications. When the SEC issues a release to announce a proposed change in the rules, it also asks for comments on the proposal.
- **No-action letters.** Anyone who is in doubt about whether a particular transaction complies with the securities laws can ask the SEC directly. The response is called a no-action letter because it states that "the staff will recommend that the Commission take no action" if the transaction is done in a specified manner.

In addition to creating laws, the SEC has the power to enforce them. It can bring **cease and desist orders** against those who violate the securities laws, and it can also levy fines or

[1] The material in this section is adapted from Cabell Phillips, *From the Crash to the Blitz* (Toronto: Macmillan, 1969).

confiscate profits from illegal transactions. Those accused of wrongdoing can appeal these sanctions to the courts. The SEC does not have the authority to bring a criminal action; it refers criminal cases to the Justice Department.

What Is a Security?

Both the 1933 and the 1934 Acts regulate securities. The official definition of a security includes stock, bonds, treasury stock, notes, debentures, evidence of indebtedness, certificates of interest or participation in any profit-sharing agreement, and 17 other equivalents. Courts have interpreted this definition to mean that a **security** is any transaction in which the buyer (1) invests money in a common enterprise and (2) expects to earn a profit predominantly from the efforts of others.

Security
Any transaction in which the buyer invests money in a common enterprise and expects to earn a profit predominantly from the efforts of others.

This definition covers investments that are not necessarily *called* securities. For example, they may be called orange trees. W. J. Howey Co. owned large citrus groves in Florida. It sold these trees to investors, most of whom were from out of state and knew nothing about farming. Purchasers were expected to hire someone to take care of their trees—someone like Howey-in the-Hills, Inc., a related company that just happened to be in the service business. Customers were free to hire any service company, but 85 percent of the acreage was covered by service contracts with Howey-in-the-Hills. The court held that Howey was selling a security (no matter how orange or tart), because the purchaser was investing in a common enterprise (the orange grove) expecting to earn a profit from Howey's farmwork.

Other courts have interpreted the term "security" to include animal breeding arrangements (chinchillas, silver foxes, or beavers, take your pick); condominium purchases in which the developer promises the owner a certain level of income from rentals; and even investments in whiskey.

Securities Act of 1933

The 1933 Act requires that before offering or selling securities, the issuer must register the securities with the SEC unless the securities qualify for an exemption. An **issuer** is the company that sells the stock initially. Registering securities with the SEC in a public offering is a major undertaking, but the 1933 Act exempts some securities and also some particular types of securities transactions from the full-blown registration requirements of a public offering.

Issuer
A company that sells its own stock.

It is also important to remember that **when an issuer registers securities, the SEC does not investigate the quality of the offering.** Permission from the SEC to sell securities does not mean that the company has a good product or will be successful. SEC approval simply means that, on the surface, the company has provided all required information about itself and its major products. The guiding principle of the federal securities laws is that investors can make a reasoned decision on whether to buy or sell securities if they have full and accurate information about a company and the security it is selling. For example, the Green Bay Packers football team sold an offering of stock to finance stadium improvements. The prospectus admitted:

> IT IS VIRTUALLY IMPOSSIBLE that any investor will ever make a profit on the stock purchase. The company will pay no dividends, and the shares cannot be sold.

This does not sound like a stock you want in your retirement fund; on the other hand, the SEC will not prevent Green Bay from selling it, or you from buying it, so long as you understand what the risks are.

Companies must deliver certain documents to investors and also file them with the SEC. Almost all filings with the SEC must be made electronically, using the Electronic Data Gathering, Analysis, and Retrieval (EDGAR) system. Once filed with the SEC, this information is available online (at **http://www.sec.gov**).

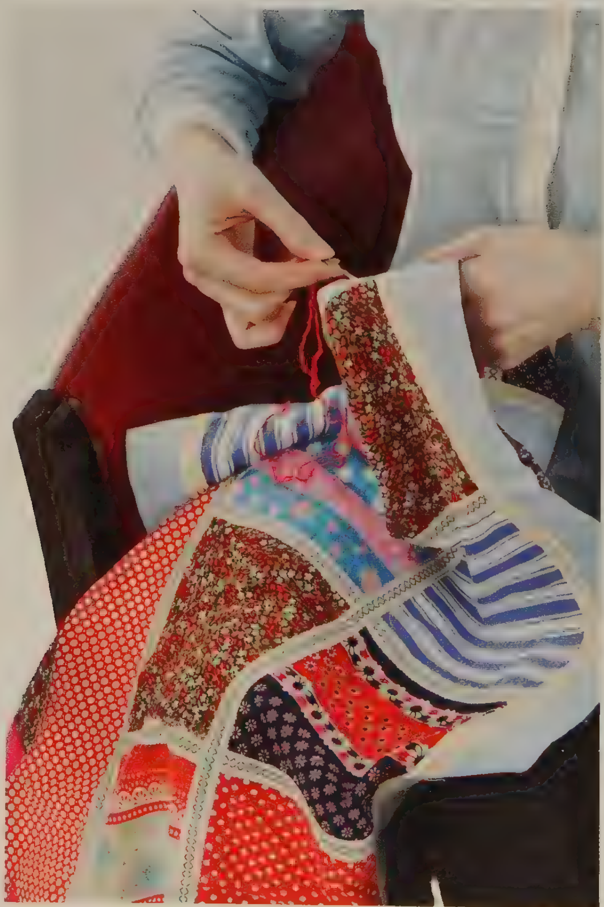
General Exemption

Before offering securities for sale, the issuer must determine whether they are exempt from registration under the 1933 Act. Typically, exemptions are based on two factors: the type of security and the type of transaction.

Exempt Securities

The 1933 Act exempts some types of securities from registration because they (1) are inherently low-risk, (2) are regulated by other statutes, or (3) are not really investments. The following securities are exempt from registration:

- **Government securities,** which include any security issued or guaranteed by federal or state government;
- **Bank securities,** which include any security issued or guaranteed by a bank;
- **Short-term notes,** which are high-quality negotiable notes or drafts that are due within nine months of issuance and are not sold to the general public;
- **Nonprofit issues,** which include any security issued by a nonprofit religious, educational, or charitable organization; and
- **Insurance policies and annuity contracts,** which are governed by insurance regulations.



© Strakovskaya/Shutterstock.com

The first time this quilt maker sold shares in her company, they were exempt from registration. They will not necessarily be exempt in subsequent sales.

Exempt Transactions

Section 4(2) of the 1933 Act exempts from registration "transactions by an issuer not involving any public offering." These are simple words to define a complex problem. In effect, this language means that an issuer is not required to register securities that are sold in a private offering; that is, an offering with only a few investors or a relatively small amount of money involved. In private offerings, the full-blown disclosure of a public offering is neither necessary nor appropriate. For instance, a group of sophisticated investors who know an industry well do not need full disclosure. Or, if the amount at stake is relatively small, it would not make economic sense for the issuer to incur the heavy expense of a public offering.

There is an important distinction between exempt *securities* and exempt *transactions*. Exempt *securities* are always exempt, throughout their lives, no matter how many times they are sold. Stock sold in an exempt *transaction* is exempt only that one time, not necessarily in any subsequent sale. Suppose that County Bank sells stock to the public. Under the 1933 Act, the bank is never required to register these securities, no matter how many times they are sold. On the other hand, suppose that Tumbleweed, Inc., a quilt maker, sells $5 million worth of stock in a private offering that is exempt from registration. Shamika buys 100 shares of this stock. Seven years later, the company decides to sell stock in a public offering that must be registered. As part of this public offering, Shamika sells her 100 shares. This time, the shares must be registered because they are being sold in a *public offering*.

Most small companies use private, not public, offerings to raise capital. There are three different types of private offerings—intrastate, Regulation D, and Regulation A—each with its own set of rules.

Intrastate Offering Exemption

Under SEC Rule 147, an issuer is not required to register securities that are *offered* and *sold* only to residents of the state in which the issuer is incorporated and does business. This exemption was designed to provide local financing for local businesses. To qualify under Rule 147, 80 percent of the issuer's revenues and assets must be in-state, and it must also intend to spend 80 percent of the offering's proceeds in-state. Neither the issuer nor any purchaser can sell the securities outside the state for nine months after the offering.

Rule 147 is a **safe harbor**—if an issuer totally complies with it, the offering definitely qualifies as intrastate. But even if the issuer does not comply absolutely with the rule, the SEC or the courts may still consider the offering to be intrastate; however, the issuer cannot be sure in advance how the decision will come out. Sonic was a Utah corporation that sold stock to Utah residents. *Seven* months later, the company sold stock to an Illinois company. Although Sonic violated Rule 147 by making the second sale too early, the court held that the company had nonetheless qualified for an intrastate offering because it had not intended, at the time of the original offering, to sell stock outside Utah.[2] A safe harbor is less dangerous, but a voyage outside its boundaries does not necessarily end in disaster.

Safe Harbor
A set of requirements that, if met, indicate *automatic* compliance with a law.

Regulation D

Regulation D is far and away the most popular route for private offerings. Tens of thousands of these offerings take place each year. Three different types of private offerings can be made under Regulation D (often referred to as Reg D) using Rules 504, 505, and 506. To understand Reg D, there are several important definitions you need to know:

- **Accredited investors** are institutions (such as banks and insurance companies) or wealthy individuals. To qualify, individuals must have a net worth (not counting their home) of more than $1 million or an annual income of more than $200,000.
- **Sophisticated investors** Are *unsophisticated* investors people who do not care for opera? No, they are investors who are unable to assess the risks of an offering themselves.
- **Restricted stock** means the securities must be purchased for investment purposes. As a general rule, the buyer cannot resell, either publicly or privately, for one year.

Accredited investors
Institutions (such as banks and insurance companies) or wealthy individuals. To qualify, individuals must have a net worth (not counting their home) of more than $1 million or an annual income of more than $200,000).

Sophisticated investor
Someone who is able to assess the risk of an offering.

Restricted stock
Securities purchased strictly for investment purposes.

Rule 504. Under this rule (known as the "seed capital" rule), you may either:

- Sell up to $1 million in restricted stock privately to anyone during each 12-month period; or,
- Sell up to $1 million in non-restricted stock with public advertising if the transaction is registered under a state law with appropriate disclosure requirements; or,
- Sell up to $1 million in non-restricted stock with public advertising if the transaction is exempted under a state law and sales are limited to accredited investors.

Rule 505. You may sell up to $5 million of stock during each 12-month period, subject to the following restrictions:

- You may sell to an unlimited number of accredited investors, but to only 35 unaccredited investors.
- You may not advertise the stock publicly.

[2] *Busch v. Carpenter*, 827 F.2d 653, 1987 U.S. App. LEXIS 11034 (10th Cir. 1987).

- You need not provide information to accredited investors but must make disclosure to unaccredited investors, including a certified balance sheet. This requirement is a high hurdle because the disclosure requirements, although less demanding than for a public offering, are nonetheless burdensome.
- Stock purchased under this rule is restricted.

Rule 506. You may sell an unlimited amount of stock, subject to the following restrictions:

- You may sell to an unlimited number of accredited investors, but to only 35 unaccredited investors.
- You may not advertise the stock publicly.
- You need not provide information to accredited investors but must make disclosure to unaccredited investors, including a certified balance sheet.
- Stock purchased under this rule is restricted.
- One further wrinkle: if an unaccredited purchaser is unsophisticated, he must have a **purchaser representative** to help him evaluate the investment.

The following table sets out the menu of choices under Reg D:

	Maximum Value of Securities Sold in a 12-Month Period	Maximum Number of Investors	Disclosure Required:	Is Public Advertising Permitted?	Are Securities Restricted?
Rule 504 Option 1:	$1 million	Unlimited	None	No	Yes
Option 2:	$1 million	Unlimited	Appropriate state disclosure	Yes	No
Option 3:	$1 million, provided offering is exempt under state law	Unlimited accredited investors	None	Yes	No
Rule 505	$5 million	No limit on accredited investors; no more than 35 unaccredited investors	Only for unaccredited investors	No	Yes
Rule 506	No limit	No limit on accredited investors; no more than 35 unaccredited investors, who must either be sophisticated or have a purchaser representative	Only for unaccredited investors	No	Yes

Regulation A

Although an offering under Regulation A (Reg A) is *called* a private offering, it really is a small public offering. **Reg A permits an issuer to sell up to $5 million of securities *publicly* in any 12-month period.** The issuer must give each purchaser an offering circular that provides the same disclosure required for unaccredited investors under Reg D. Stock sold in a Reg A offering is not restricted.

The following table compares a public offering, Reg A, and Reg D:

	Initial Public Offering	**Regulation A**	**Regulation D**
Maximum Value of Securities Sold	No limit	$5 million	$1 million, $5 million, or no limit, depending on the rule
Public Solicitation of Purchasers	Permitted	Permitted	Permitted only under Rule 504
Suitability Requirements for Purchasers	No requirements	No requirements	Must determine if investors are accredited or sophisticated
Disclosure Requirements	Elaborate registration statement, audited financials	Offering circular that is less detailed than a registration statement, unaudited financials	Rule 504: may require disclosure under state law Rules 505 and 506: none for accredited investors, the same requirements as Reg A for unaccredited investors
Resale of Securities	Permitted	Permitted	Sometimes permitted under Rule 504, otherwise not permitted for one year

Direct Public Offerings

Traditionally, a small company either sold stock to people it knew well or hired an investment banker to place the securities with a wider public. But now, instead of going through Wall Street, many companies trying to raise capital for the first time sell stock to the public themselves through a direct public offering (DPO). In a DPO, the issuer typically sells shares to its stakeholders: customers, employees, suppliers, or the community. The issuer makes a DPO offering under Rule 147, Reg D, or Reg A.

Selling stock to the public without the help of an investment bank can be challenging. Thanksgiving Coffee Co. used both modern technology and old-fashioned methods. It advertised on its website but also placed ads on bags of coffee beans, in its catalogs, and in notices to suppliers. The company raised $1.25 million.

The advantages of a DPO are:

- It is much cheaper and faster than a regular public offering done through an underwriter.
- It can be an effective marketing tool—shareholders tend to become even more loyal customers.
- The Internet provides an easy and inexpensive mechanism for reaching potential investors.

The downsides of a DPO are:

- There is a limit to how much a company can raise in this way.
- Company officers typically do not have as much expertise about the securities markets as securities lawyers, investment bankers, and other professionals do.
- Each investor must receive written information about the company. The cost of this disclosure can be prohibitive when dealing with many small investors. Mailing a $10 disclosure document to hundreds of investors who only want to buy $50 worth of stock each may not be an efficient means of raising money.
- Although shareholders are warned that they should view their purchases as long-term investments, some will inevitably want to sell their shares. Setting up a system to permit these trades can be tricky and time-consuming.

EXAM Strategy

Question: As a pitcher for the Cleveland Indians farm team, Randy Newsom had dreams of glory but a paycheck that was a nightmare—$8,000 for the season. Newsom came up with a clever solution: he set up a website that offered fans the opportunity to buy a share of his future. For only $20, the buyer was entitled to .002 percent of his career pay. Any problems with this plan?

Strategy: Remember that even orange trees can be securities.

Result: Newsom was selling securities: buyers were investing in him, hoping that they could earn a profit from his efforts. He had neither registered the securities nor qualified for an exemption, so his plan was illegal.

Public Offerings

Initial public offering (IPO)
A company's first public sale of securities.

Secondary offering
Any public sale of securities by a company after the initial public offering.

Firm commitment underwriting
The underwriter buys stock from the issuer and sells it to the public.

Best efforts underwriting
The underwriter does not buy the stock from the issuer but instead acts as the issuer's agent in selling the securities.

When a company wishes to raise significant amounts of capital from a large number of people, it has to do a public offering. A company's first public sale of securities is called **an initial public offering** or an **IPO.** Because companies are now more successful in raising money privately, the number of IPOs has declined from an annual average of around 500 in the 1990s to a current average of about 130. Any public sale of securities after the IPO is called a **secondary offering**. This is the process an issuer follows for either type of sale:

1. *Underwriting.* For a public offering, companies hire an investment bank to serve as underwriter. In a **firm commitment underwriting**, the underwriter buys the stock from the issuer and resells it to the public. The underwriter bears the risk that the stock may sell at a lower price than expected. In a **best efforts underwriting**, the underwriter does not buy the stock but instead acts as the company's agent in selling it. If the stock sells at a low price, the company, not the underwriter, is the loser.
2. *Registration statement.* The **registration statement** has two purposes: to notify the SEC that a sale of securities is pending and to disclose information to prospective purchasers. The registration statement typically must include detailed information about the issuer and its business, a description of the stock, the proposed use of the proceeds from the offering, and two years of audited balance sheets and income statements. But the amount of required disclosure depends on the issuer—more disclosure is required for an IPO than for an offering by a so-called "well-known seasoned issuer." Preparing a registration statement is neither quick nor inexpensive— a typical IPO recently cost $8 million.
3. *Prospectus.* Typically, buyers never see the registration statement; they are given the **prospectus** instead. (The prospectus is included in the registration statement that is sent to the SEC.) The prospectus includes the important disclosures about the company, while the registration statement includes additional information that is of interest to the SEC but not to the typical investor, such as the names and addresses of the lawyers for the issuer and underwriter. All investors must receive a copy of the prospectus before purchasing the stock.
4. *Sales effort.* Even before the final registration statement and prospectus are completed, the investment bank begins its sales effort. It cannot actually make sales during this period, but it can solicit offers. The SEC closely regulates an issuer's sales effort to make sure that no one is unduly hyping the stock. For example, the SEC delayed an offering of stock by Google Inc. after *Playboy* magazine published an interview with its founders.

5. *Going effective.* Once its review of the preliminary registration statement is complete, the SEC sends the issuer a **comment letter**, listing changes that must be made to the registration statement. An issuer almost always amends the registration statement at least once, and sometimes more than once. Remember that the SEC does not assess the value of the stock or the merit of the investment. Its role is to ensure that the company has disclosed enough to enable investors to make an informed decision. After the SEC has approved a final registration statement (which includes, of course, the final prospectus), the issuer and underwriter agree on a price for the stock and the date to **go effective;** that is, to begin the sale.

In the following case, eToys sued its underwriter, Goldman Sachs, for underpricing its stock offering. Should Goldman be liable? You be the judge.

You be the Judge

EBC I, Inc. v. Goldman Sachs & Co.

2005 N.Y. LEXIS 1178
Court of Appeals of New York, 2005

Facts: Goldman Sachs was the lead underwriter for eToys' initial public offering. In the IPO, eToys agreed to sell 8,320,000 shares of its stock to Goldman at a price of $18.65 per share, for resale to the public at $20. (Goldman had the option to buy an additional 1,248,000 shares at the same price.) The bank's potential profit was $1.35 per share, for a maximum of $12,916,800.

On the first day of the offering, the price of eToys' stock rose as high as $85 and closed at $76.56. Within a year, however, the price had fallen below $20. eToys ultimately filed for bankruptcy protection.

In its lawsuit, eToys alleged that Goldman made side deals with other clients, allowing them to purchase shares in eToys' offering in exchange for kickbacks to Goldman of a portion of their profits on the stock. This arrangement would have created an incentive for Goldman to underprice the stock. eToys also alleged that Goldman had a fiduciary duty to eToys that it violated by not disclosing this conflict of interest.

Goldman filed a motion to dismiss, denying that it had a fiduciary relationship to eToys.

You Be the Judge: ***Did Goldman have a fiduciary duty to eToys? Did it violate this duty?***

Argument for eToys: A fiduciary relationship exists between two parties if one of them is under a duty to act for or to give advice for the benefit of the other. eToys hired Goldman for its expertise and paid handsomely for its advice about many aspects of going public. The company would never have relied on this advice had it known about the side deals with other clients—deals that could harm eToys.

eToys trusted Goldman, the bank betrayed that trust, and eToys suffered an enormous financial penalty as a result.

Argument for Goldman Sachs: This is a simple case: eToys sold stock, Goldman bought it. Goldman negotiated the best price it could. If eToys was unhappy with this deal, it had no one to blame but itself.

If eToys expected Goldman to act as a fiduciary, the agreement should have said so explicitly. The company always knew that its interests were different from Goldman's. eToys sought the highest price; Goldman had to ensure that it could resell the shares at a profit. The lower the price to eToys, the lower the risk to Goldman. Goldman took a substantial risk buying this stock, and in this case, the risk paid off. That does not always happen.

eToys was a sophisticated company with sophisticated advisors. Its stockholders included well-known venture-capital firms. Its largest single stockholder, Idealab, was an incubator for successful technology companies. eToys' law firm—the Venture Law Group, P.C.—specialized in representing high-tech companies. During one year, this law firm was fourth on the list of firms that handled the most initial public offerings for technology companies.

In short, the offering price was not "set" by Goldman; it was negotiated by two sophisticated parties.

Sales of Restricted Securities

The SEC wants to ensure that the public sale of stock takes place in an orderly manner. Therefore, it imposes some restrictions on the sale of stock even after a company has gone public. **Rule 144 limits the resale of two types of securities issued by public companies: *control securities* and *restricted securities*.**

A **restricted security** is any stock purchased from the issuer in a private offering (such as Reg D). If the issuer is private (that is, not subject to the reporting requirements of the 1934 Act), these restricted securities cannot be sold for one year. But, once the company goes public, the holding period on restricted securities shrinks to six months from the date of purchase. After six months, these restricted securities can be sold freely unless they are also control securities, in which case those restrictions still apply.

Control security
Stock held by any shareholder who owns more than 10 percent of a class of stock or by any officer or director of the company.

A **control security** is stock held by any shareholder who owns more than 10 percent of a class of stock or by any officer or director of the company. In any three-month period, such an insider can sell only an amount of stock equal to the average weekly trading volume for the prior four weeks or 1 percent of the number of shares outstanding, whichever is greater. The purpose of this rule is to protect other investors from precipitous declines in stock price. If company insiders sold all of their stock in one day, the price would plunge, causing losses to the other shareholders.

EXAM Strategy

Question: You are the CEO of Calmm.com, Inc. The company's board has decided to sell \$2 million in stock. You have 40 wealthy friends who would like to invest a total of \$1 million. What would be the best way to raise these funds? Would a public offering work?

Strategy: Review the options for both private and public offerings.

Result: A public offering is not a good idea—it would cost millions. Rule 504 is not suitable because it would limit you to raising only \$1 million. Under Rule 505, you could sell to all your wealthy friends (if they are accredited investors), and as many as 35 unaccredited investors. Rule 506 is more complicated (and therefore more expensive), so Rule 505 would be a better choice.

Liability Under the 1933 Act

Liability for Selling Unregistered Securities

Section 12(a)(1) of the 1933 Act imposes liability on anyone who sells a security that is neither registered nor exempt. The purchaser of the security can demand rescission—a return of his money (plus interest) in exchange for the stock—or, if he no longer owns the stock, he can ask for damages.

Fraud

Under Section 12(a)(2) of the 1933 Act, **the seller of a security is liable for making any material misstatement or omission, either oral or written, in connection with the offer or sale of a security.** This provision applies to offerings that are *public* or *private* and *registered* or *unregistered* if there is some use of interstate commerce, such as mail, telephone (even for an *intra*state call), or check (that clears). It is difficult to imagine a securities transaction that does not involve interstate commerce. Both the SEC and any purchasers of the stock can sue the issuer.

Criminal Liability

Under Section 24 of the 1933 Act, the Justice Department can prosecute anyone who willfully violates the Act.

Liability for the Registration Statement

Section 11 of the 1933 Act establishes the penalties for any errors in a registration statement. **If a final registration statement contains a material misstatement or omission, the purchaser of the security can recover from everyone who signed the registration statement.** This list of signatories includes the issuer, its directors, and chief officers; experts (such as auditors, engineers, or lawyers); and the underwriters. Everyone who signed the registration statement is jointly and severally liable for any error, except the experts, who are liable only for misstatements in the part of the registration statement for which they were responsible.[3] Thus, an auditor is liable for misstatements in the financials but not, say, for omissions about the CEO's criminal past.

Damages. To prevail under Section 11, the plaintiff need only prove that there was a material misstatement or omission and that she lost money. **Material** means important enough to affect an investor's decision. The plaintiff does not have to prove that she relied on (or even *read*) the registration statement, that she bought the stock from the issuer, or that the defendant was negligent. The plaintiff can recover the difference between what she paid for the stock and its value on the date of the lawsuit.

Material
Important enough to affect an investor's decision.

Suppose that Pet Detective, Inc., does an IPO at $10 per share. A week later, Ace Investora buys 1,000 shares at $10 each. He knows nothing about the company, but he likes the name. This stock turns out to be a dog—Pet Detective has only 2 agencies, not the 200 stated in the registration statement. After Investora sells the stock at 10 cents a share, he can sue under Section 11 for $9,900.

Due Diligence. All is not hopeless, however, for those who have signed the registration statement. If the statement contains a material misstatement or omission, the company is liable and has no defense. But everyone else who signed the registration statement can avoid liability by showing that he investigated the registration statement as thoroughly as a "prudent person in the management of his own property." This investigation is called **due diligence**. Its importance cannot be overstated. The SEC does not conduct its own investigation to ensure that the registration statement is accurate. It can only ensure that, on the surface, the issuer has supplied all relevant information. If an issuer chooses to lie, the SEC has no way of knowing. It is the job of the underwriters to check the accuracy of the filing. Thus, underwriters typically spend weeks visiting the company, reading all its corporate documents (including minutes back to the beginning), and calling its bankers, customers, suppliers, and competitors to ensure that the registration statement is accurate and no skeletons have been overlooked.

Due diligence
An investigation of the registration statement by someone who signs it.

When Section 11 was first passed, investment bankers were outraged. Some predicted that this liability provision would cause capital in America to dry up, that grass would grow on Wall Street. In fact, the first case under Section 11 arose 35 years and 27,000 registration statements later. In this case—*Escott v. Barchris Construction Corp.*—the registration statement was profoundly flawed.[4] The underwriter failed to read the minutes of the executive committee meetings that revealed the company to be in serious financial condition. Much of the company's alleged backlog of orders was from nonexistent corporations. Proceeds of the offering were earmarked to pay off debt, not to buy new plant

[3]Joint and several liability means that all members of a group are liable. The plaintiff can sue them as a group or anyone of them individually for the full amount owing. The plaintiff cannot recover more than the total amount of the damages owing, however.
[4]283 F. Supp. 643, 1968 U.S. Dist. LEXIS 3853 (S.D.N.Y. 1968).

and equipment as the registration statement had indicated. The company's directors, underwriters, and underwriters' counsel were held liable.

Securities Exchange Act of 1934

Most buyers do not purchase new securities from the issuer in an initial public offering. Rather they buy stock that is publicly traded in the open market. This stock is, in a sense, *secondhand* because others, perhaps many others, have already owned it. The purpose of the 1934 Act is to maintain the integrity of this secondary market.

General Provisions of the 1934 Act

Registration Requirements

As we have seen, the 1933 Act requires an issuer to register securities before selling them. That is a onetime effort for the company. The 1933 Act does not require the issuer to provide shareholders with any additional information in later years. Suppose that an automobile company registered and sold securities for the first time in 1946. Purchasers of those securities knew a lot about the firm—in 1946. But how can current investors assess the company? The 1934 Act plugs this hole. It requires issuers with publicly traded stock to continue to make information available to the public so that current—and potential—shareholders can evaluate the company. It is often said that the 1933 Act registers securities and the 1934 Act registers companies.

Under the 1934 Act, an issuer must register with the SEC if (1) it completes a public offering under the 1933 Act, or (2) its securities are traded on a national exchange (such as the NYSE), or (3) it has at least 500 shareholders *and* total assets that exceed $10 million. A company can *de*register if its number of shareholders falls below 300 or if it has fewer than 500 shareholders and assets of less than $10 million.

Disclosure Requirements—Section 13

Reporting Company
A company registered under the 1934 Act.

Like the 1933 Act, the 1934 Act focuses on disclosure. The difference is that the 1933 Act requires onetime disclosure when a company sells stock to the public. The 1934 Act requires ***ongoing***, regular disclosure for any company with a class of stock that is publicly traded. Companies that register under the 1934 Act are called **reporting companies. Section 13 requires reporting companies to file the following documents:**

- An initial, detailed information statement when the company first registers (similar to the filing required under the 1933 Act);
- Annual reports on Form 10-K, containing audited financial statements, a detailed analysis of the company's performance, and information about officers and directors;
- Quarterly reports on Form 10-Q, which are less detailed than 10-Ks and contain unaudited financials; and
- Form 8-K to report any significant developments, such as bankruptcy, a change in control, a purchase or sale of significant assets, the resignation of a director as a result of a policy dispute, a change in fiscal year, or a change in auditing firms.

In response to corporate scandals, Congress passed the Sarbanes-Oxley Act of 2002 (SOX). It requires each company's CEO and CFO to certify that:

- The information in the quarterly and annual reports is true;
- The company has effective internal controls; and

- The officers have informed the company's audit committee and its auditors of any concerns that they have about the internal control system.

A reporting company must send its annual report to shareholders. All annual reports and other 1934 Act filings are available on the SEC website.

New Developments: The Facebook Problem

The SEC faces a new challenge in regulating private companies. Traditionally, companies went public when a small number of investors could no longer provide sufficient capital. But some young, sought-after companies in California, such as Facebook, Twitter, and Zynga, have the opposite problem—so many people want to buy their stock that they may be forced to go public.

Most of these companies' stock is owned by venture capitalists who originally bought stock in a private offering or employees who were granted stock options as part of their compensation. Now that the stock is so valuable, these shareholders want to cash out. Private exchanges (such as SecondMarket and SharesPost) have developed to help shareholders sell their stock to the many willing buyers.

As private companies, these businesses are not required to make any ongoing financial disclosure. Lots of investors are willing to buy anyway. But once an enterprise has 500 shareholders (and $10 million in assets), it becomes a public company and must comply with the disclosure requirements of the 1934 Act. However, going public carries some serious burdens: it costs at least $5 million a year to comply with SEC regulations, and public shareholders sometimes pressure companies to take a short-term view—they want profits now.

Should Facebook (and other enterprises like it) be forced to go public even though investors are willing to buy stock without the financial disclosure required of public companies? The SEC and Facebook have already reached one compromise—shareholders who own restricted stock do not count towards the 500 limit. For its part, Facebook no longer allows current employees to sell stock and, indeed, now gives new employees "restricted units" that convert into stock when the company goes public.

At this writing, the SEC has notified Congress that it is reviewing all the regulations that govern private sales of stock, and, in particular, it will consider:

- Raising the limit on the number of shareholders in a private company above 499.
- Permitting private companies greater leeway in advertising stock sales.
- Permitting the use of so-called crowd-funding methods for raising capital. (Crowd-funding is a method in which business owners use the Internet to raise small amounts of money from small investments—say, $100,000 raised by selling shares at $100 each.)

Those in favor of these reforms argue that they will encourage investment and job growth, while opponents fear that reduced disclosure will facilitate fraud.

Proxy Requirements—Section 14

As discussed in Chapter 35, most shareholders of public corporations do not attend annual shareholder meetings. Instead, the company solicits their proxies, permitting them to vote by mail rather than in person. If a company solicits proxies, it is required to supply shareholders with a proxy statement that is intended to give them enough information to make informed decisions about the company. The proxy statement contains detailed information about officers and directors, including their experience, relationship with the company, and compensation. (The annual report provides financial information.) Proxy statements must also be filed with the SEC. Proxy contests and shareholder proposals are discussed in Chapter 35.

Under SEC rules, a company is not *required* to solicit proxies from shareholders, but if it does not, it is unlikely to obtain the quorum needed for the meeting to be held. In any

event, a company cannot avoid its responsibility to inform shareholders. Whether or not it solicits proxies, it is still required to furnish shareholders with an information statement that contains essentially the same material as a proxy statement.

Short-Swing Trading—Section 16

During congressional hearings after the 1929 stock market crash, witnesses testified that insiders had manipulated the stock market. For example, insiders would buy a large block of stock, announce a substantial dividend, and then divest before the dividend was reduced. Section 16 was designed to prevent corporate insiders—officers, directors, and shareholders who own more than 10 percent of the company—from taking unfair advantage of privileged information to manipulate the market.

Section 16 takes a two-pronged approach:

- First, insiders must **report** their trades within two business days. This report must also reveal their total stock holdings in the company. The filings must be made to the SEC electronically, and both the SEC and the company are required to post them on their respective websites within one business day after the report is made.
- Second, insiders must **turn over to the corporation** any profits they make from the purchase and sale or sale and purchase of company securities in a six-month period. Section 16 is a strict liability provision. It applies even if the insider did not actually take advantage of secret information or try to manipulate the market; if she bought and sold or sold and bought stock in a six-month period, she is liable.

Suppose that Manuela buys 20,000 shares of her company's stock in June at $10 a share. In September, her (uninsured) winter house in Florida is destroyed by a hurricane. To raise money for rebuilding, she sells the stock at $12 per share, making a profit of $40,000. But she has violated Section 16 and must turn over the profit to her company.

Liability Under the 1934 Act

Section 18

Under Section 18, anyone who makes a false or misleading statement in a filing under the 1934 Act is liable to buyers or sellers who (1) acted in reliance on the statement and (2) can prove that the price at which they bought or sold was affected by the false filing. Section 18 applies to all filings under the 1934 Act, including proxy statements and annual reports. For example, a court ruled that plaintiffs could bring suit against the directors and officers of a pharmaceutical company that manufactured a contraceptive device called the Dalkon Shield. In its annual report filed with the SEC, the company emphasized the safety, reliability, and efficiency of the Dalkon Shield, failing to reveal that in fact, there was substantial evidence that the device was less effective and more harmful than it had disclosed. Indeed, seven women had died from using the Dalkon Shield, and many others were rendered infertile.[5]

Section 10(b)

Section 18 applies only to *filings* under the 1934 Act. What happens if a company executive makes a false public *statement* about the company, or writes an untrue statement somewhere other than in a filing? In one case, a corporate officer bought up shares of his company's stock even as he made pessimistic public statements about the company. That is the type of behavior that Section 10(b) is designed to prevent. **Section 10(b) prohibits**

[5] *Ross v. A. H. Robins Co.*, 607 F.2d 545, (2d Cir, 1979).

fraud in connection with the purchase and sale of any security, whether or not the security is registered under the 1934 Act.

The SEC adopted Rule 10b-5 to clarify Section 10(b), but the rule is still a relatively vague, catch-all provision designed to fill any holes left by other sections of the securities laws.[6] Interpretation has largely been left to the courts, which generally have interpreted Rule 10b-5 as follows:

- **A misstatement or omission of a material fact.** Anyone who fails to disclose material information, or makes incomplete or inaccurate disclosure, is liable.
- **The term "material"** has the same meaning as under the 1933 Act: important enough to affect an investor's decision. For example, a company repeatedly and falsely denied that it was involved in merger negotiations. It was liable even though the negotiations had only been in a preliminary stage.[7]
- **Scienter.** This is a legal term meaning *willfully, knowingly, or recklessly*. To be liable under Rule 10b-5, the defendant must have (1) known (or been reckless in not knowing) that the statement was inaccurate and (2) intended for the plaintiff to rely on the statement. Negligence is not enough. A group of shareholders sued the accounting firm Ernst & Ernst because it had failed to discover, during the course of an audit, that a company's chief executive was stealing funds. According to the shareholders, the auditors should have discovered that the executive refused to allow anyone else to open his mail and, therefore, should have been suspicious of wrongdoing. The court found Ernst & Ernst not liable. Although it may have been negligent, it had not *intentionally* or even *recklessly* facilitated fraud.[8]
- **Purchase or sale.** Rule 10b-5 covers both buyers and sellers. It does not include, however, someone who failed to purchase stock because of a material misstatement. In the case of the company executive who spread negative rumors about his company while he bought stock, those who sold because of his false rumors could sue under Rule 10b-5, but not those who simply failed to buy.
- **Reliance.** To bring suit, a plaintiff must show that she relied on the misstatement or omission. In the case of open-market trades, reliance is difficult to prove, so the courts are willing to assume it.
- **Economic loss.** The plaintiffs must suffer a loss in the value of their investment. For example, a couple sold their pharmaceutical business to another company in exchange for stock of the purchaser. Some time later, they discovered that the purchaser had lied about its financial condition. However, the court held that the couple could not recover because by the time they sold their stock in the purchaser, it was worth substantially more than when they acquired it. Thus, they had not suffered an economic loss.
- **Loss causation.** The economic loss must have been caused by the misstatement of a material fact. For example, a group of investors bought stock in Dura

---

[6]Rule 10b-5 prohibits any person, in connection with a purchase or sale of any security, from (1) employing any device, scheme, or artifice to defraud; (2) making any untrue statement of a material fact or omitting to state a material fact necessary in order to make the statements made, in light of the circumstances under which they were made, not misleading; or (3) engaging in any act, practice, or course of business that operates or would operate as a fraud or deceit upon any person.

[7]*Basic Inc. v. Levinson*, 485 U.S. 224, 108 S. Ct. 978, 1988 U.S. LEXIS 1197 (1988).

[8]*Ernst & Ernst v. Hochfelder*, 425 U.S. 185, 96 S. Ct. 1375, 1976 U.S. LEXIS 2 (1976).

> Pharmaceuticals. They alleged that, when making the purchase, they had relied on statements by company executives that (1) its drug sales would be profitable and (2) the Food and Drug Administration would approve its new asthma spray device. Neither of these statements turned out to be true, and the company's stock price fell. Plaintiffs argued that, if it had not been for the misrepresentations, the stock price would have been lower when they purchased stock and then would not have fallen as far (or at all) when the truth came out.

The Supreme Court ruled, however, that the plaintiffs could not recover because there was no proof that the misstatements had *caused* the decline in stock price. The price drop could have been the result of other factors, such as changes in the industry or in the economy as a whole.[9]

Both the 1933 Act and the 1934 Act specify that misstatements and omissions create liability only if they are material. In the following case, a unanimous Supreme Court provided guidance on what "material" means.

Matrixx Initiatives, Inc. v. Siracusano

2011 U.S. LEXIS 2416
Supreme Court of the United States, 2011

Facts: Zicam Cold Remedy was a nasal spray (or gel) that accounted for 70 percent of Matrixx's sales revenue. Its active ingredient was zinc gluconate. Matrixx began receiving reports that some Zicam users had developed anosmia (that is, they had lost their sense of smell). The company learned for the first time that some studies had linked the use of zinc sulfate to the loss of smell.

Matrixx then found out that two doctors were planning to make a presentation at a conference about patients who had developed anosmia after Zicam use. Matrixx sent them a letter warning them that they did not have permission to use the name of Matrixx or its products. The doctors deleted references to Zicam.

Nine people filed suit against Matrixx, alleging that Zicam had damaged their sense of smell. Matrixx then issued statements that Zicam was poised for growth and that revenues would increase by more than 80 percent. In its 10-Q filing with the SEC, Matrixx warned of the potential "'material adverse effect' that could result from product liability claims, "whether or not proven to be valid." It did not disclose, however, that plaintiffs had already sued Matrixx.

After the Food and Drug Administration (FDA) announced that it was investigating Zicam, Matrixx's stock price fell. Matrixx issued a press release stating:

> Matrixx believes statements alleging that Zicam products caused anosmia (loss of smell) are completely unfounded and misleading. In no clinical trial of zinc gluconate gel products has there been a single report of lost or diminished olfactory function (sense of smell). A multitude of environmental and biologic influences are known to affect the sense of smell. Chief among them is the common cold. As a result, the population most likely to use cold remedy products is already at increased risk of developing anosmia.

The day after this press release, Matrixx stock price bounced back. Shortly thereafter, however, the TV show *Good Morning America* reported that more than a dozen patients had suffered from anosmia after using Zicam and that some had filed lawsuits against Matrixx. The company's stock price plummeted.

A group of shareholders filed suit, alleging that Matrixx had violated Section 10(b) and Rule 10b-5. The trial court granted Matrixx's motion to dismiss on the grounds that, without a statistical correlation between the use of Zicam and anosmia, the reported incidents were not material. The Court of Appeals reversed. The Supreme Court granted *certiorari*.

---

[9] *Dura Pharmaceuticals, Inc. v. Broudo*, 125 S. Ct. 1627, 2005 U.S. LEXIS 3478 (2005).

Issues: ***Was Matrixx required to disclose allegations of harm for which there was not statistical correlation? Did Matrixx violate §10(b) and Rule 10b-5?***

Excerpts from Justice Sotomayor's Decision, writing for a unanimous court: To prevail on a §10(b) claim, a plaintiff must show that the defendant made a statement that was *misleading* as to a *material* fact. [T]his materiality requirement is satisfied when there is a substantial likelihood that the disclosure of the omitted fact would have been viewed by the reasonable investor as having significantly altered the "total mix" of information made available.

[M]edical researchers consider multiple factors in assessing causation. A lack of statistically significant data does not mean that medical experts have no reliable basis for inferring a causal link between a drug and adverse events. Not only does the FDA rely on a wide range of evidence of causation, it sometimes acts on the basis of evidence that suggests, but does not prove, causation. For example, the FDA requires manufacturers of over-the-counter drugs to revise their labeling to include a warning as soon as there is reasonable evidence of an association of a serious hazard with a drug; a causal relationship need not have been proved.

Given that medical professionals and regulators act on the basis of evidence of causation that is not statistically significant, it stands to reason that in certain cases, reasonable investors would as well. As a result, assessing the materiality of adverse event reports is a fact-specific inquiry that requires consideration of the source, content, and context of the reports.

Application of [the] "total mix" standard does not mean that pharmaceutical manufacturers must disclose all reports of adverse events. Adverse event reports are daily events in the pharmaceutical industry. The fact that a user of a drug has suffered an adverse event, standing alone, does not mean that the drug caused that event. Something more is needed, but that something more is not limited to statistical significance.

Moreover, it bears emphasis that §10(b) and Rule 10b-5(b) do not create an affirmative duty to disclose any and all material information. Disclosure is required under these provisions only when necessary to make statements made, in the light of the circumstances under which they were made, not misleading. Even with respect to information that a reasonable investor might consider material, companies can control what they have to disclose under these provisions by controlling what they say to the market.

[W]e conclude that respondents have adequately pleaded materiality. Matrixx received information that plausibly indicated a reliable causal link between Zicam and anosmia. Importantly, Zicam Cold Remedy accounted for 70 percent of Matrixx's sales.

It is substantially likely that a reasonable investor would have viewed this information as having significantly altered the "total mix" of information made available. Matrixx told the market that revenues were going to rise 50 and then 80 percent. [H]owever, Matrixx had information indicating a significant risk to its leading revenue-generating product.

For the reasons stated, the judgment of the Court of Appeals for the Ninth Circuit is

Affirmed.

Ethics Matrixx learned that its products were potentially causing a loss of smell, which is no minor matter. People with anosmia cannot properly taste food, so they often lose interest in eating, which can lead to malnutrition and depression. Was it ethical for the company to prohibit doctors from presenting information about Zicam at a conference? Did the company have an ethical obligation to alert the public to this issue? What about its obligation to its shareholders?

In the case of large frauds, where many people lose lots of money, the company at the heart of the wrongdoing is often bankrupt, so plaintiffs scramble to find other deep pockets from which to recover their losses. One approach they have tried is to go after those who did not commit the fraud themselves, but who aided and abetted it. Section 10(b) is often their weapon of choice. However, the Supreme Court is unsympathetic to this approach. Athough this time, the Supreme Court was divided 5-3, with one justice not taking part.

Stoneridge Investment Partners, LLC v. Scientific-Atlanta, Inc.

28 S. Ct. 761; 2008 U.S. LEXIS 1091
Supreme Court of the United States, 2008

Facts: Charter Communications, Inc., a cable operator, engaged in a variety of fraudulent practices to pump up its financial statements so they would meet Wall Street expectations. When these efforts fell short, Charter approached two of its suppliers—Scientific-Atlanta and Motorola—for help in furthering the fraud. These two companies supplied Charter with the digital cable converter (set-top) boxes that Charter furnished its customers. Charter arranged to overpay the suppliers $20 for each set-top box it purchased, with the understanding that they would return the overpayment by purchasing advertising from Charter. These transactions had no economic purpose other than inflating Charter's revenue and operating cash flow numbers by $17 million. They violated generally accepted accounting principles. The plan was successful—Charter did manage to fool its auditors.

The inflated numbers were included in financial statements filed with the SEC and reported to the public. Purchasers of Charter stock sued the two suppliers, alleging that they had violated Section 10(b) and Rule 10b-5. The District Court granted defendants' motion to dismiss. The U.S. Court of Appeals for the Eighth Circuit affirmed. The Supreme Court granted *certiorari*.

Issue: ***Is someone who aids and abets a violation of Section 10(b) liable under the statute?***

Excerpts from Justice Kennedy's Decision: Reliance by the plaintiff upon the defendant's deceptive acts is an essential element of the §10(b) cause of action. [In this case, no] member of the investing public had knowledge, either actual or presumed, of [defendants'] deceptive acts during the relevant times. Petitioner, as a result, cannot show reliance upon any of [defendants'] actions except in an indirect chain that we find too remote for liability.

It is true that a dynamic, free economy presupposes a high degree of integrity in all of its parts. Were the implied cause of action to be extended to the practices described here, however, there would be a risk that the federal power would be used to invite litigation beyond the immediate sphere of securities litigation and in areas already governed by functioning and effective state-law guarantees. Section 10(b) does not incorporate common-law fraud into federal law.

[E]xtensive discovery and the potential for uncertainty and disruption in a lawsuit allow plaintiffs with weak claims to extort settlements from innocent companies. Adoption of petitioner's approach would expose a new class of defendants to these risks. [C]ontracting parties might find it necessary to protect against these threats, raising the costs of doing business. Overseas firms with no other exposure to our securities laws could be deterred from doing business here. This, in turn, may raise the cost of being a publicly traded company under our law and shift securities offerings away from domestic capital markets.

Here respondents were acting in concert with Charter in the ordinary course as suppliers, not in the investment sphere. Charter was free to do as it chose in preparing its books, conferring with its auditor, and preparing and then issuing its financial statements. In these circumstances, the investors cannot be said to have relied upon any of [defendants'] deceptive acts in the decision to purchase or sell securities; and as the requisite reliance cannot be shown, respondents have no liability to petitioner. The judgment of the Court of Appeals is affirmed.

Devil's Advocate If the suppliers had not taken part in Charter's scheme, the company would not have been able to release fake numbers or fool its auditors. The suppliers knew exactly what they were doing and what the result would be. The court argues that holding the suppliers liable would harm domestic capital markets. But rampant fraud would also harm capital markets. The Court refers to this scheme as "unconventional." That is a nice word for deliberate, intentional fraud.

The Private Securities Litigation Reform Act of 1995

The Private Securities Litigation Reform Act modifies many existing laws, including the 1934 Act. Its amendment to the 1934 Act was intended to discourage fraud suits by shareholders. Under this amendment, companies are liable to shareholders for so-called forward-looking statements (that is, financial projections or statements about future plans) *only if* (1) the company fails to include a warning that the predictions may not come to pass, *and* (2) the shareholders can show that company executives knew the predictions were false. Suppose a pharmaceutical company predicts that a new drug will generate billions in sales, but two years later, the drug is a total failure. Before this statute, shareholders would have had a strong case, but now the company would not be liable as long as it had disclosed, at the time of making the prediction, reasons why the drug might not be a success. Even if the company failed to mention these reasons, it would be liable only if executives knew the prediction to be false when they made it.

Insider Trading

The day before Merck & Co. announced its takeover of Schering-Plough, the price of Schering stock rose by 8 percent. A lucky guess on the part of traders? Federal investigators think not. That was one of the incidents they probed during a three-year investigation into insider trading in the hedge fund industry. The probe became public when one of the principals of a research company sent this email to firm clients:

> Today two fresh-faced eager beavers from the FBI showed up unannounced (obviously) on my doorstep, thoroughly convinced that my clients have been trading on copious insider information. (They obviously have been recording my cell phone conversations for quite some time, with what motivation I have no idea.) We obviously beg to differ, so have therefore declined the young gentleman's gracious offer to wear a wire and therefore ensnare you in their devious web.

It turns out that other people were not so reluctant to secretly tape record conversations. This evidence was used to build cases against employees of more than three dozen companies (including the man who sent the email). The group are alleged to have earned tens of millions of dollars in illegal profits. They potentially face years in prison and millions of dollars in fines.

Insider trading is a crime punishable by fines and imprisonment. So now you know that insider trading is dangerous, but exactly what is it? That question is not easy to answer. As noted, Rule 10b-5 is a vaguely worded rule that generally prohibits fraud. The language of the rule never explicitly mentions insider trading, but courts have interpreted it to prohibit this activity. Although the courts are nominally *interpreting* the rule, in fact, they are more or less fashioning this crime out of whole cloth. Insider trading has been described as "the judicial oak that has grown from little more than a legislative acorn." The SEC has argued many times that anyone in possession of nonpublic material information must disclose it or refrain from trading. But in the following Landmark Case, the most famous on the topic of insider trading, the Supreme Court rejected the SEC's view.

They potentially face years in prison and millions of dollars in fines.

Landmark Case

Chiarella v. United States

445 U.S. 222; 1980 U.S. LEXIS 88
Supreme Court of the United States, 1980

Facts: Chiarella was a printer at Pandick Press, a company that printed the documents used to announce corporate takeover bids. For security reasons, the first drafts of these documents disguised the names of the companies involved. Chiarella used other information in the early drafts to figure out the identities of five target companies. He then secretly bought shares in these companies, selling them at a profit once the takeover was announced and the names revealed.

In the end, however, this scheme did not turn out to be profitable for Chiarella. When the SEC figured out what he had done, it brought civil charges against him. To settle those charges, he agreed to turn over his profits to the sellers of the shares. Then Pandick Press fired him, he was convicted of criminal violations of Section10(b) and Rule 10b-5, he was sentenced to a year in prison, and the Court of Appeals affirmed his conviction. But the Supreme Court granted *certiorari.*

Issue: ***Did Chiarella violate securities laws when he traded on secret information that he acquired in his job as a printer?***

Excerpts from Justice Powell's Decision[10]: [S]ilence in connection with the purchase or sale of securities may operate as a fraud actionable under §10(b). But such liability is premised upon a duty to disclose arising from a relationship of trust and confidence between parties to a transaction. Application of a duty to disclose prior to trading guarantees that corporate insiders, who have an obligation to place the shareholder's welfare before their own, will not benefit personally through fraudulent use of material, nonpublic information.

In this case, the defendant was convicted of violating §10(b) although he was not a corporate insider and he received no confidential information from the target company. Moreover, the "market information" upon which he relied did not concern the earning power or operations of the target company, but only the plans of the acquiring company. Defendant's use of that information was not a fraud under §10(b) unless he was subject to an affirmative duty to disclose it before trading.

In effect, the trial court instructed the jury that defendant owed a duty to everyone; to all sellers, indeed, to the market as a whole. The Court of Appeals' decision rested solely upon its belief that the federal securities laws have "created a system providing equal access to information necessary for reasoned and intelligent investment decisions." The use by anyone of material information not generally available is fraudulent, this theory suggests, because such information gives certain buyers or sellers an unfair advantage over less informed buyers and sellers.

This reasoning suffers from two defects. First, not every instance of financial unfairness constitutes fraudulent activity under §10(b). Second, the element required to make silence fraudulent—a duty to disclose—is absent in this case. No duty could arise from defendant's relationship with the sellers of the target company's securities, for defendant had no prior dealings with them. He was not their agent, he was not a fiduciary, he was not a person in whom the sellers had placed their trust and confidence. He was, in fact, a complete stranger who dealt with the sellers only through impersonal market transactions.

We cannot affirm defendant's conviction without recognizing a general duty between all participants in market transactions to forgo actions based on material, nonpublic information. Formulation of such a broad duty should not be undertaken absent some explicit evidence of congressional intent. [N]o such evidence emerges from the language or legislative history of §10(b). We hold that a duty to disclose under §10(b) does not arise from the mere possession of nonpublic market information. The judgment of the Court of Appeals is

Reversed.

[10]For ease of reading, we have substituted "defendant" for "petitioner."

Instead of the SEC's simple proposal, we have instead a much more complex set of rules:

- **Strangers.** As we saw in the landmark *Chiarella* case, **someone who trades on inside information is liable only if he breaches a fiduciary duty.** Suppose that, while looking in a dumpster, Harry finds correspondence indicating that MediSearch, Inc., will shortly announce a major breakthrough in the treatment of AIDS. Harry buys the stock, which promptly quadruples in value. Harry will be dining at the Ritz, not in the dumpster or in federal prison, because he has no fiduciary duty to MediSearch.
- **Fiduciaries.** Anyone who works for a company is a fiduciary. **A fiduciary violates Rule 10b-5 if she trades stock of her company while in possession of nonpublic material information.** If the director of research for MediSearch learns of the promising new treatment for AIDS and buys stock in the company before the information is public, she has violated Rule 10b-5. This rule applies not only to employees who work for the company, but also to **constructive insiders**—others who receive confidential information while they have an indirect employment relationship, such as employees of the company's auditors or law firm. Thus, if a lawyer who works at the firm that is patenting MediSearch's new discovery buys stock before the information is public, she has violated Rule 10b-5.

Constructive insider
Anyone who receives confidential information while in an indirect employment relationship with a company, such as employees of the company's auditors or law firm.

- ***Possession* versus *use* of information.** Suppose that an insider sells stock just after learning that her company is about to report lower earnings, but before this information is public. When challenged by the SEC, she argues that she sold her stock for other reasons—say, to buy a new house, or set her son up in business. To deal with this type of situation, the SEC issued **Rule 10b5-1, which provides that an insider violates Rule 10b-5 if she trades while in possession of material, nonpublic information unless she has committed in advance to a plan to sell those securities.** Thus, if an insider knows that she will want to sell stock to pay college tuition, she can establish such a sales plan in advance. (And, then, despite any change in circumstances, she must sell according to the plan.) She will then not be liable for the sales, no matter what inside information she ultimately learns.
- **Tippers.** What about people who do not trade themselves, but pass on information to someone who does? **Insiders who pass on nonpublic, material information are liable under Rule 10b-5, even if they do not trade themselves, so long as (1) they know the information is confidential and (2) they expect some personal gain.** Personal gain is loosely defined. Essentially, any gift to a friend counts as personal gain. W. Paul Thayer was a corporate director, deputy secretary of defense, and former fighter pilot ace who gave stock tips to his girlfriend in lieu of paying her rent. That counted as personal gain, and he spent a year and a half in prison.
- **Tippees. Those who receive tips—tippees—are liable for trading on inside information, even if they do not have a fiduciary relationship to the company, so long as (1) they know the information is confidential, (2) they know that it came from an insider who was violating his fiduciary duty, and (3) the insider expected some personal gain.** Barry Switzer, then head football coach at the University of Oklahoma, went to a track meet to see his son compete. While sunbathing on the bleachers, he overheard someone talking about a company that was going to be acquired. Switzer bought the stock but was acquitted of insider trading charges because the insider had not breached his fiduciary duty. He had not tipped anyone on purpose—he had simply been careless. Also, Switzer did not know that the insider was breaching a fiduciary duty, and the insider expected no personal gain.[11]

[11] *SEC v. Switzer*, 590 F. Supp. 756, 1984 U.S. Dist. LEXIS 15303 (W.D. Okla. 1984).

- **Takeovers.** Frustrated by its lack of success under Rule 10b-5, the SEC adopted Rule 14e-3. **This rule prohibits trading on inside information during a tender offer if the trader knows the information was obtained from either the bidder or the target company.** The trader or tipper need not have violated a fiduciary duty.
- **Misappropriation.** In an effort to tighten the insider trading noose further, the SEC developed a new theory—misappropriation. Under this theory, **a person is liable if he trades in securities (1) for personal profit, (2) using confidential information, and (3) in breach of a fiduciary duty to the source of the information.** This theory applies even if that source was not the company whose stock was traded. For example, James O'Hagan was a lawyer in a firm that represented a company attempting to take over Pillsbury Co. Although O'Hagan did not work on the case, he heard about it and then bought stock in Pillsbury. After the takeover attempt was publicly announced, O'Hagan sold his stock in Pillsbury at profit of more than $4.3 million.[12] The Supreme Court ruled that O'Hagan had violated insider trading laws. While it was true that he had no fiduciary duty to Pillsbury, he did owe one to his law firm, which was the source of the information. According to the court, what he had done was the same thing as embezzlement.[13]

© Lane Oatey/Jupiterimages

When he revealed confidential information, was he expecting personal gain?

After the *O'Hagan* case established the principle of misappropriation, it was still not clear how this rule applied to family members. If a wife told her husband that her company was about to be taken over and he then sold company stock as a result, was he in violation of 10b-5? Did he have a fiduciary duty to her? Rule 10b-5-2 establishes that anyone who receives non-public, material information from a spouse, parent, child or sibling has a fiduciary duty unless the trader can prove that he did not have a duty of trust or confidence to the family member in question.

EXAM Strategy

Question: Paul was an investment banker who sometimes bragged about deals he was working on. One night he told a bartender, Ryanne, about an upcoming deal, without revealing his connection to it. Ryanne bought stock in the company Paul had mentioned. Both were prosecuted for insider trading. Ryanne was acquitted but Paul was convicted, even though Ryanne was the one who made money. How is that possible?

Strategy: Note that there are different standards for tippers and tippees.

Result: Paul is liable if he knew the information was confidential and he expected some personal gain. A gift counts as personal gain. (The courts have an expansive definition of

[12] O'Hagan used the profits that he gained through this trading to conceal his previous embezzlement of client funds. There is a moral here.

[13] *United States v. O'Hagan*, 521 U.S. 642, 117 S. Ct. 2199, 1997 U.S. LEXIS 4033.

"gift"—practically anything counts. Here, the information could be interpreted as a tip to the bartender.) Ryanne was not liable because she did not know the information was confidential and that it came from an insider who was violating his fiduciary duty.

Why is insider trading a crime? Who is harmed? After all, if you buy or sell stock in a company, presumably you are reasonably content with the price or you would not have traded. Insider trading is illegal because:

- It offends our fundamental sense of fairness. No one wants to be in a poker game with marked cards.
- Investors will lose confidence in the market if they feel that insiders have an unfair advantage.
- Investment banks typically "make a market" in stocks, meaning that they hold extra shares so that orders can be filled smoothly. If an insider buys stock because she knows the company is about to sign an important contract, she earns the profit on that information at the expense of the market maker who sold her the stock. These market makers expect to earn a certain profit. If they do not earn it from normal stock appreciation, they simply raise the commission they charge for being a market maker. As a result, everyone who buys and sells stock pays a slightly higher price because insider trading skims off some of the profits.

Sarbanes-Oxley

The Sarbanes-Oxley Act (SOX) is an amendment to the 1934 Act that applies to all U.S companies reporting under the 1934 Act, as well as to all foreign companies listed on a U.S. stock exchange. In addition to the provisions we discussed earlier, SOX:

- Requires companies to disclose if they have an ethics code and, if they do not, why not.
- Imposes fines and imprisonment on anyone who interferes with a federal investigation into fraud.
- Permits an employee who blows the whistle on a securities law violation to sue the company if it retaliates against the employee. SOX also makes it a crime to retaliate against someone who blows the whistle on any federal offense.
- Establishes a new Public Accounting Oversight Board to oversee the auditing of reporting companies.

Dodd-Frank

The Dodd-Frank Wall Street Reform and Consumer Protection Act amends the 1934 Act to provide a reward system for whistleblowers. Dodd-Frank also establishes a requirement that reporting companies tell the SEC and post on their websites information about their use of "conflict minerals" (such as tin, tungsten, and gold). A conflict mineral is one that is being used to finance the war in the Democratic Republic of the Congo or a neighboring country.

In addition, energy mining companies must disclose payments they make to other governments for oil, gas, and mineral rights. The goal of this provision is to provide information to the citizens of foreign countries about how much revenue their governments are receiving so that they can hold officials responsible for misspending.

Blue Sky Laws

At the end of the 19th century, years before the great stock market crash, states had already begun to regulate the sale of securities. These statutes are called **blue sky laws** (because crooks were willing to sell naive investors a "piece of the great blue sky"). Currently, all states and the District of Columbia have blue sky laws.

Exemption from State Regulation

To make life easier for issuers of stock, Congress passed the **National Securities Markets Improvement Act (NSMIA) of 1996.** Essentially, states may no longer regulate offerings of securities that are:

- Traded on a national exchange,
- Exempt under Rule 506, or
- Sold to a **qualified purchaser.**[14]

State Regulation

Any securities offerings not covered by the NSMIA must comply with state securities laws. Easier said than done. The 50 states have exhibited great creativity in crafting their securities laws and, as a result, have caused many headaches for issuers of securities. To begin, the 1933 Act is primarily concerned with disclosure, but many state statutes focus on the quality of the investment and require a so-called *merit review*. For example, in 1981, the Massachusetts securities commissioner refused to allow Apple Computer Co. to sell its initial public offering in Massachusetts because he believed the stock, selling at 92 times earnings, was too risky. He "protected" Massachusetts residents from this investment.

Typically, states take one of the following approaches to securities offerings:

- *Registration by notification*. Some states permit issuers with an established track record simply to file a notice before offering their securities.
- *Registration by coordination*. Some states permit issuers that have registered with the SEC simply to file copies of the federal registration statement (and perhaps some additional documents) with the state.
- *Registration by qualification*. Some states require issuers to undergo a full-blown registration, complete with a merit review.

Facilitating State Regulation

All is not bleak, however. There are three options that ease the process of complying with state securities requirements.

Coordinated Equity Review (CER)

For offerings over $5 million that are registered with the SEC, the issuer might be able to take advantage of the **Coordinated Equity Review (CER)** program. Under this program, the issuer files in every state in which it wants to sell securities, but it only has to deal with Pennsylvania, which takes responsibility for coordinating the comments from all other states. The process is simpler, but state officials still have the right to conduct a merit review.

[14]The SEC was supposed to define this term in 1996, but it has not yet done so. What's the rush?

Small Company Offering Registration (SCOR)

Most states permit a so-called **small company offering registration (SCOR)** for use in offerings of up to $1 million over any 12-month period. The issuer has the right to advertise publicly (even on the Internet) and can sell any amount of securities to any number of investors (as long as the total offering does not exceed $1 million). The relatively simple form (U-7) is in a question-and-answer format. It is designed to be filled out by company executives without the assistance of lawyers or accountants who are securities experts. Any company using a SCOR form can request a coordinated review from the states in which it has filed. Under this system, a designated lead state takes responsibility for coordinating the process with all other states. The result is a faster, simpler process. States do have the right to conduct a merit review, although it tends to be less burdensome than the usual merit examination. SCOR registration is designed to be used with Rule 147, Rule 504, and Reg A.

Uniform Limited Offering Exemption

Under the **Uniform Limited Offering Exemption,** most states largely exempt from registration any offerings under Rule 505.

The moral of the story? Securities offerings are exceedingly complex and require professional supervision. Do not attempt this at home!

Chapter Conclusion

The 1929 stock market crash and the Great Depression that followed were an economic catastrophe for the United States. The Securities Act of 1933 and the Securities Exchange Act of 1934 were designed to prevent such disasters from ever occurring again. Whether or not they achieve that goal, they undoubtedly enhance the reliability and stability of the securities markets.

EXAM REVIEW

1. **SECURITY** A security is any transaction in which the buyer invests money in a common enterprise and expects to earn a profit predominantly from the efforts of others. (p. 893)

EXAM Strategy

Question: Jonah bought 12 paintings from Theo's Art Gallery at a total cost of $1 million. Theo told Jonah that the paintings were a safe investment that could only go up in value. The gallery permitted any purchaser to trade in a painting in return for any other artwork the gallery owned. In the trade-in, the purchaser would get credit for the amount of the original painting and then pay the difference if the new painting was worth more. When Jonah's paintings did not increase in value, he sued Theo for a violation of the securities laws. Were these paintings securities?

Strategy: Are all three elements of a security present here? (See the "Result" at the end of this section.)

2. **REGISTRATION** Before any offer or sale, an issuer must register securities with the SEC unless the securities qualify for an exemption. (p. 893)

3. **EXEMPTIONS** These securities are exempt from the registration requirement: government securities, bank securities, short-term notes, nonprofit issues, insurance policies, and annuity contracts. (pp. 894–898)

4. **SECURITIES OFFERINGS** The following table compares the different types of securities offerings:

	Public Offering	Intrastate Offering	Regulation A	Regulation D: Rule 504	Regulation D: Rule 505	Regulation D: Rule 506
Maximum Value of Securities Sold	Unlimited	Unlimited	$5 million	$1 million	$5 million	Unlimited
Public Solicitation of Purchasers	Permitted	Permitted	Permitted	Sometimes permitted	Not permitted	Not permitted
Suitability Requirements for Purchasers	No requirements	Must reside in issuer's state	No requirements	May be limited to accredited investors	No limit on accredited investors; no more than 35 unaccredited investors	No limit on accredited investors; no more than 35 unaccredited investors who, if unsophisticated, must have a purchaser representative
Disclosure Requirements	Elaborate registration statement; audited financials	None	Offering circular that is less detailed than a registration statement	May be required under state law	Same requirements as Reg A for unaccredited investors; no disclosure to accredited investors	Same requirements as Reg A for unaccredited investors; no disclosure to accredited investors
Resale of Securities	Permitted	Permitted, but may not be made out of state for nine months	Permitted	Sometimes permitted	Not permitted for one year	Not permitted for one year

EXAM Strategy

CPA Question: Hamilton Corp. makes a $4.5 million securities offering under Rule 505 of Regulation D of the Securities Act of 1933. Under this regulation, Hamilton is:

a. Required to provide full financial information to accredited investors only

b. Allowed to make the offering through a general solicitation

c. Limited to selling to no more than 35 nonaccredited investors

d. Allowed to sell to an unlimited number of investors, both accredited and nonaccredited

Strategy: The answer is not (a) because accredited investors are never entitled to *more* disclosure than other investors. The answer is not (b) because Rule 505 does not permit a general solicitation. The answer is not (d) because Rule 505 is limited to only 35 unaccredited investors. (See the "Result" at the end of this section.)

5. **LIABILITY UNDER THE 1933 ACT** If a final registration statement contains a material misstatement or omission, the purchaser of a security offered under that statement can recover from everyone who signed it. (pp. 900–902)

6. **THE 1934 ACT** The 1934 Act requires public companies to make regular filings with the SEC. (pp. 902–908)

7. **SECTION 16** Under Section 16, insiders who buy and sell or sell and buy company stock within a six-month period must turn over to the corporation any profits from the trades. They must also disclose any trades they make in company stock. (p. 904)

EXAM Strategy

Question: You are the president of Turbocharge, Inc., a publicly traded company. You have been buying stock recently because you think the company's product—a more efficient hybrid engine—is very promising. One day, you show up at work and find your desk in the hallway. The CEO has fired you. In a huff, you sell all your company stock. The only silver lining to your cloud is that you make a large profit. Or is this a silver lining?

Strategy: You can be in violation of Section 16 even if you did not have any inside information when you trade. (See the "Result" at the end of this section.)

8. **SECTION 10(B)** Section 10(b) prohibits fraud in connection with the purchase and sale of any security, whether or not the issuer is registered under the 1934 Act. (pp. 904–908)

9. **INSIDER TRADING** Section 10(b) also prohibits insider trading. (pp. 909–913)

10. **SOX** Sarbanes Oxley:
    - imposes fines and imprisonment on anyone who interferes with a federal investigation into fraud.
    - permits an employee who blows the whistle on a securities law violation to sue the company if it retaliates against the employee. SOX also makes it a crime to retaliate against someone who blows the whistle on any federal offense. (p. 913)

11. **DODD-FRANK** The Dodd-Frank Act
    - provides a reward system for whistleblowers, and
    - requires that reporting companies tell the SEC and post on their websites information about their use of conflict minerals. (p. 913)

12. **THE NSMIA** The National Securities Markets Improvement Act prohibits states from regulating securities offerings that are:
    - traded on a national exchange,
    - exempt under Rule 506, or
    - sold to "qualified purchasers." (p. 914)

13. **BLUE SKY LAWS** Any securities offerings not covered by the NSMIA must comply with state securities laws, which are varied and complex. (pp. 914–915)

1. Result: The paintings were not securities because there was no "common enterprise." The investors did not pool funds or share profits with other investors.

4. Result: The answer is (c).

7. Result: You are in violation of Section 16. Even though you acted without any bad intent, you must turn over all your profits to the company.

Multiple-Choice Questions

1. **CPA QUESTION** When a common stock offering requires registration under the Securities Act of 1933:
   (a) The registration statement is automatically effective when filed with the SEC.
   (b) The issuer would act unlawfully if it were to sell the common stock without providing the investor with a prospectus.
   (c) The SEC will determine the investment value of the common stock before approving the offering.
   (d) The issuer may make sales 10 days after filing the registration statement.

2. **CPA QUESTION** Pace Corp. previously issued 300,000 shares of its common stock. The shares are now actively traded on a national securities exchange. The original offering was exempt from registration under the Securities Act of 1933. Pace has $2.5 million in assets and 425 shareholders. With regard to the Securities Exchange Act of 1934, Pace is:
   (a) Required to file a registration statement because its assets exceed $2 million in value
   (b) Required to file a registration statement even though it has fewer than 500 shareholders
   (c) Not required to file a registration statement because the original offering of its stock was exempt from registration
   (d) Not required to file a registration statement unless insiders own at least 5 percent of its outstanding shares of stock

3. Lily would like to raise money for her video game start-up by advertising the shares on her website, but without substantial financial disclosure. What should she do?
   (a) Nothing. If she is going to solicit purchasers publicly, she must undertake an IPO.
   (b) Use Rule 504 to sell up to $1 million in stock to accredited investors, and make sure the offering is exempt under state law.
   (c) Use Rule 504 to sell up to $1 million in stock to any purchasers and register the stock under a state law.
   (d) Use Rule 505 sell up to $5 million in stock to an unlimited number of accredited investors and no more than 35 unaccredited investors.

4. If a publicly traded company wishes to issue more stock, it will undertake a(n)____________. If the underwriter buys the stock and resells it to the public, that is a ____________ underwriting. Before buying the stock, investors must receive a copy of the ____________.
   (a) IPO, best efforts, registration statement
   (b) IPO, firm commitment, registration statement
   (c) Secondary offering, best efforts, prospectus
   (d) Secondary offering, firm commitment, prospectus

5. Three months ago, Noah bought stock under Rule 506 in TreesNFlowers, Inc. He has lost interest in the company and would like to sell the stock. Which of the following statements is true:
   (a) He can sell the stock now, so long as he sells it to an accredited investor.
   (b) He can sell the stock now, so long as the company grants permission.
   (c) He must hold on to the stock for at least nine months.
   (d) He could sell the stock in three months, but only if the company goes public in the meantime.

Essay Questions

1. A railroad's employees noticed that a lot of people in suits were touring the rail yard. The CFO asked for a list of all trains owned by the company. Workers began speculating that the company might be sold and they would all lose their jobs. The company's code of conduct made it illegal to disseminate material nonpublic information. Two employees—an engineer and a trainman—bought stock in the railroad. When the railroad did indeed change hands, they were able to sell their stock for $1 million profit. Are the employees liable under insider trading rules?

2. Fluor, an engineering and construction company, was awarded a $1 billion project to build a coal gasification plant in South Africa. Fluor signed an agreement with a South African client that prohibited them both from announcing the agreement until March 10. Accordingly, Fluor denied all rumors that a major transaction was pending. Between March 3 and March 6, the State Teachers Retirement Board pension fund sold 288,257 shares of Fluor stock. After the contract was announced, the stock price went up. Did Fluor violate Rule 10b-5?

3. Do you love ice cream? Here is an opportunity for you! For only $800, you can buy a cow from Berkshire Ice Cream. The company gets milk from the cow, and you get to share in the profits from the sale of ice cream. Just last month, Berkshire mailed $32,000 worth of checks to investors, who are expecting a 20 percent annual rate of return. Are there any problems with this plan?

4. **ETHICS** ETS Payphones, Inc., sold pay phones to the public. The company then leased back the pay phones from the purchaser, promising a guaranteed 14 percent annual return on their investment. Although ETS's marketing materials trumpeted the "incomparable pay phone" as "an exciting business opportunity," the pay phones did not generate enough revenue for ETS to make the required payments. The SEC sued, alleging that ETS had been selling unregistered securities. Were the pay phone contracts securities under the 1933 Act? These allegedly "guaranteed" investments are particularly attractive to older and less-sophisticated investors. Was it ethical to pitch a high-risk investment to vulnerable investors who were unable to assess the risks accurately?

5. Suppose that, while waiting in line at the grocery store, you overhear a stranger saying that the FDA is going to approve a new drug tomorrow—one that will be a huge success for Alpha Pharmaceuticals. Is it legal for you to buy stock in Alpha?

Discussion Questions

1. Federal security laws are based on the assumption that investors are knowledgeable enough to assess the quality of a stock, so long as the issuer provides adequate disclosure. Many states take a different approach—they refuse to permit the sale of securities that they deem to be of poor quality. Should securities laws protect investors in this way?

2. **ETHICS** David Sokol worked at Berkshire Hathaway for legendary investor Warren Buffett, who is renowned not only for his investment skills but also his ethics. Bankers suggested to both Sokol and the CEO of Lubrizol that the company might be a good buy for Berkshire. Sokol then found out that the CEO of Lubrizol planned to ask his board for permission to approach Berkshire about a possible acquisition. Sokol purchased $10 million worth of Lubrizol stock before recommending Lubrizol to Buffett. Sokol mentioned to Buffett "in passing" that he owned shares of Lubrizol. Buffett did not ask any questions about the timing or amount of Sokol's purchases. Sokol made a $3 million profit when Berkshire acquired Lubrizol. Did Sokol violate insider trading laws? Did he behave ethically? What about Buffett?

3. Refco Inc. failed to disclose in SEC filings that millions of dollars of its accounts receivables were uncollectible. Two months after its IPO, the company went bankrupt. Shareholders filed suit against the company's law firm, alleging that it was liable under Section 10(b) for drafting Refco's SEC filings that contained these material omissions. Is the law firm liable? Should it be? Is this a stronger or weaker case than *Stoneridge*?

4. Facebook, Inc. is valued at more than $50 billion, and yet, because it is still privately held, it is not required to make any disclosure about its finances. Once the number of

its shareholders reaches 500, it will be deemed a public company and will be required to make significant (and expensive) financial disclosure. Should the SEC change its rules so that these reporting requirements are not triggered until companies have more than 500 shareholders? Which is more important—to minimize the disclosure burden on companies or to protect investors who are willing to buy stock even without financial disclosure?

5. Do you agree with the court's decision in the *Stoneridge* case?

6. The SEC believes that anyone in possession of nonpublic material information about a company should be required to disclose it before trading on the stock of that enterprise. Instead, the courts have developed a more complex set of rules. Do you agree with the SEC or the courts on this issue?

CHAPTER 37

BANKRUPTCY

© Evan Meyer/Shutterstock.com

Three bankruptcy stories:

1. Tim's account: "First, there was Christmas. Was I really not going to buy my eight-year-old the Xbox he'd been begging for? Then my daughter's basketball team qualified for the nationals at Disney World. She's a talented player, and if she sticks with it, maybe she'll get a college scholarship. The kids had never been to Disney World. How could we say no? Then my car died. And I didn't get a bonus this year. Next thing you know, we had $27,000 in credit card debt. Then we had some uninsured medical bills. We were seriously underwater. There was just no way we could pay all that money back."

We were seriously underwater. There was just no way we could pay all that money back.

2. Kristen was a talented gardener and had always loved flowers. Sometimes she did the flowers for friends' weddings. When the guy who owned the local flower shop wanted to retire, it seemed a great opportunity to buy the business. She had lots of good ideas for improving it. First, she renovated the space so that people could hold parties there. She hired staff to keep the shop open longer hours. Everything went really well. Then the recession hit, and people cut back on nonessentials like flowers. How could she pay her loans?

3. General Motors (GM), once a symbol of American business, filed for bankruptcy in 2009. At the time, its liabilities were $90 billion more than its assets. It also had 325,000 employees and even more stakeholders: retired employees, car owners, suppliers, investors, and communities in which it operated and its employees lived and paid taxes. GM emerged from bankruptcy 40 days later with fewer brands, factories, and workers, but ready to do business. The next year, the company was profitable.

Bankruptcy law always has been and always will be controversial. Typically, in other countries, the goal of bankruptcy law is to protect creditors and punish debtors, even sending debtors to prison. Indeed, many of America's first settlers fled England to escape debtors' prison. As if to compensate for Europe's harsh regimes, American bankruptcy laws were traditionally more lenient toward debtors.[1]

The General Motors example illustrates the good news about American bankruptcy. It is efficient (40 days!) and effective at reviving ailing companies. Everyone—investors, employees, the country—benefits from GM's survival. And although Kristen's flower shop did not survive, bankruptcy laws will protect her so that she is not afraid to try entrepreneurship again.[2] New businesses fail more often than not, but they are nonetheless important engines of growth for our country. We all benefit from the jobs they create and the taxes they pay.

Tim represents the bad news in bankruptcy laws. Unfortunately, he is often the type of person who first comes to mind when people think about bankrupts. And people do not like Tim very much. They think: why should he be rewarded for his irresponsibility, when I get stuck paying all my bills? But a more difficult bankruptcy process will probably not discourage Tim. He is the kind of guy who cares a lot about current pleasures and little about future pain. No matter what bankruptcy laws we have, he will not say no to Disney World. Should the laws become too onerous, businesses will fail, entrepreneurs will be discouraged, and the Tims of the world will continue to spend more than they should.

But maybe America has too much of a good thing. This nation has the highest bankruptcy rate in the world. In the most recent year, there was one bankruptcy filing for every 200 Americans.[3] Clearly, bankruptcy laws play a vital role in our economy. They have the potential to resuscitate failing companies while encouraging entrepreneurship. At the same time, it is important not to enable irresponsible spendthrifts. Do American bankruptcy laws reach the right balance?

Overview of the Bankruptcy Code

The federal Bankruptcy Code (the Code) is divided into eight chapters. All chapters except one have odd numbers. Chapters 1, 3, and 5 are administrative rules that generally apply to all types of bankruptcy proceedings. These chapters, for example, define terms and establish the rules of the bankruptcy court. Chapters 7, 9, 11, 12, and 13 are substantive rules for different types of bankruptcies. All of these substantive chapters have one of two objectives—rehabilitation or liquidation.

Rehabilitation

The objective of Chapters 11 and 13 is to rehabilitate the debtor. Many debtors can return to financial health provided they have the time and breathing space to work out their problems. These chapters hold creditors at bay while the debtor develops a payment plan. In return for retaining some of their assets, debtors typically promise to pay creditors a portion of their future earnings.

---

[1]Bankruptcy law was so important to the drafters of the Constitution that they specifically listed it as one of the subjects that Congress had the right to regulate (Article 1, Section 8).

[2]See, for example, Seung-Hyun Lee, Yasuhiro Yamakawa, Mike W. Peng, and Jay B. Barney, "How do bankruptcy laws affect entrepreneurship development around the world?" in the *Journal of Business Venturing*, JBV-05559, 2010.

[3]Some of these filings are by businesses, although that percentage is small. In the last 15 years, more than 95 percent of all bankruptcy filings have been by consumers.

Liquidation

Straight bankruptcy
Also known as liquidation, this form of bankruptcy mandates that the bankrupt's assets be distributed to creditors but the debtor has no obligation to share future earnings.

When debtors are unable to develop a feasible plan for rehabilitation under Chapter 11 or 13, Chapter 7 provides for liquidation (also known as a **straight bankruptcy**). Most of the debtor's assets are distributed to creditors, but the debtor has no obligation to share future earnings.

Chapter Description

The following options are available under the Bankruptcy Code:

Number	Topic	Description
Chapter 7	Liquidation	The bankrupt's assets are sold to pay creditors. If the debtor owns a business, it terminates. The creditors have no right to the debtor's future earnings.
Chapter 11	Reorganization	This chapter is designed for businesses and wealthy individuals. Businesses continue in operation, and creditors receive a portion of the debtor's current assets and future earnings.
Chapter 13	Consumer reorganization	Chapter 13 offers reorganization for the typical consumer. Creditors usually receive a portion of the individual's current assets and future earnings.

In liquidation, most of the debtor's assets are distributed to creditors.

Debtors are sometimes eligible to file under more than one chapter. No choice is irrevocable because both debtors and creditors have the right to ask the court to convert a case from one chapter to another at any time during the proceedings. For example, if creditors have asked for liquidation under Chapter 7, a bankrupt consumer may request rehabilitation under Chapter 13.

Goals

The Bankruptcy Code has three primary goals:

- *To preserve as much of the debtor's property as possible.* In keeping with this goal, the Code requires debtors to disclose all of their assets and prohibits them from transferring assets immediately before a bankruptcy filing.
- *To divide the debtor's assets fairly between the debtor and creditors.* On the one hand, creditors are entitled to payment. On the other hand, debtors are often so deeply in debt that full payment is virtually impossible in any reasonable period of time. The Code tries to balance the creditors' right to be paid with the debtors' desire to get on with their lives, unburdened by prior debts.
- *To divide the debtor's assets fairly among creditors.* Creditors rarely receive all they are owed, but at least they are treated fairly, according to established rules. Creditors do not benefit from simply being the first to file or from any other gamesmanship.

Chapter 7 Liquidation

All bankruptcy cases proceed in a roughly similar pattern, regardless of chapter. We use Chapter 7 as a template to illustrate common features of all bankruptcy cases. Later on, the discussions of the other chapters will indicate how they differ from Chapter 7.

Filing a Petition

Any individual, partnership, corporation, or other business organization that lives, conducts business, or owns property in the United States can file under the Code. (Chapter 13, however, is available only to individuals.) The traditional term for someone who could not pay his debts was **bankrupt,** but the Code uses the term **debtor** instead. We use both terms interchangeably.

Debtor
Someone who cannot pay his debts and files for protection under the Bankruptcy Code.

A case begins with the filing of a bankruptcy petition in federal district court. The district court typically refers bankruptcy cases to a specialized bankruptcy judge. Either party can appeal the decision of the bankruptcy judge back to the district court and, from there, to the federal appeals court.

Debtors may go willingly into the bankruptcy process by filing a **voluntary petition,** or they may be dragged into court by creditors who file an **involuntary petition**. Originally, when the goal of bankruptcy laws was to protect creditors, voluntary petitions did not exist; all petitions were involuntary. Because the bankruptcy process is now viewed as being favorable to debtors, the vast majority of bankruptcy filings in this country are voluntary petitions.

Voluntary petition
Filed by a debtor to initiate a bankruptcy case.

Involuntary petition
Filed by creditors to initiate a bankruptcy case.

Voluntary Petition

Any debtor (whether a business or an individual) has the right to file for bankruptcy. It is not necessary that the debtor's liabilities exceed assets. Debtors sometimes file a bankruptcy petition because cash flow is so tight they cannot pay their debts, even though they are not technically insolvent. However, *individuals* must meet two requirements before filing:

- Within 180 days before the filing, an individual debtor must undergo credit counseling with an approved agency.
- Individual debtors may only file under Chapter 7 if they earn less than the median income in their state *or* they cannot afford to pay back at least $7,025 over five years.[4] Generally, all other debtors must file under Chapter 11 or Chapter 13. (These Chapters require the bankrupt to repay some debt.)

[4]In some circumstances, debtors with income higher than $7,025 may still be eligible to file under Chapter 7, but the formula is highly complex and more than most readers want to know. The formula is available at 11 USC Section 707(b)(2)(A). Also, you can google "bapcpa means test" and then click on the Department of Justice website. The dollar amounts are updated every three years. You can find them by googling "federal register bankruptcy revision of dollar amounts."

The voluntary petition must include the following documents:

Document	Description
Petition	Begins the case. Easy to fill out, it requires checking a few boxes and typing in little more than name, address, and Social Security number.
List of Creditors	The names and addresses of all creditors.
Schedule of Assets and Liabilities	A list of the debtor's assets and debts.
Claim of Exemptions	A list of all assets that the debtor is entitled to keep.
Schedule of Income and Expenditures	The debtor's job, income, and expenses.
Statement of Financial Affairs	A summary of the debtor's financial history and current financial condition. In particular, the debtor must list any recent payments to creditors and any other property held by someone else for the debtor.

Involuntary Petition

Creditors may force a debtor into bankruptcy by filing an involuntary petition. The creditors' goal is to preserve as much of the debtor's assets as possible and to ensure that all creditors receive a fair share. Naturally, the Code sets strict limits—debtors cannot be forced into bankruptcy every time they miss a credit card payment. **An involuntary petition must meet all of the following requirements:**

- The debtor must owe at least $14,425 in unsecured claims to the creditors who file.[5]
- If the debtor has at least 12 creditors, 3 or more must sign the petition. If the debtor has fewer than 12 creditors, any one of them may file a petition.
- The creditors must allege either that a custodian for the debtor's property has been appointed in the prior 120 days or that the debtor has generally not been paying debts that are due.

What does "a custodian for the debtor's property" mean? *State* laws sometimes permit the appointment of a custodian to protect a debtor's assets. The Code allows creditors to pull a case out from under state law and into federal bankruptcy court by filing an involuntary petition. In the event that a debtor objects to an involuntary petition, the bankruptcy court must hold a trial to determine whether the creditors have met the Code's requirements.

Order for relief
An official acknowledgment that a debtor is under the jurisdiction of the bankruptcy court.

Once a voluntary petition is filed or an involuntary petition approved, the bankruptcy court issues an **order for relief**. This order is an official acknowledgment that the debtor is under the jurisdiction of the court, and it is, in a sense, the start of the whole bankruptcy process. An involuntary debtor must now make all the filings that accompany a voluntary petition.

[5] In Chapter 24, on secured transactions, we discuss the difference between secured and unsecured claims at some length. A secured claim is one in which the creditor has the right to foreclose on a specific piece of the debtor's property (known as **collateral**) if the debtor fails to pay the debt when due. For example, if Lee borrows money from GMAC Finance to buy a car, the company has the right to repossess the car if Lee fails to repay the loan. GMAC's loan is **secured**. An **unsecured** loan has no collateral. If the debtor fails to repay, the creditor can make a general claim against the debtor but has no right to foreclose on a particular item of the debtor's property.

Trustee

The trustee is responsible for gathering the bankrupt's assets and dividing them among creditors. This is a critical role in a bankruptcy case. Trustees are typically lawyers or CPAs, but any generally competent person can serve. Creditors have the right to elect the trustee, but often they do not bother. If the creditors do not elect a trustee, then the **U.S. Trustee** appoints one. Each region of the country has a U.S. Trustee selected by the U.S. attorney general. Besides appointing trustees as necessary, this U.S. Trustee oversees the administration of bankruptcy law in the region.

The U.S. Trustee
Oversees the administration of bankruptcy law in a region.

Creditors

After the court issues an order for relief, the U.S. Trustee calls a meeting of all of the creditors. At the meeting, the bankrupt must answer (under oath) any question the creditors pose about his financial situation. If the creditors want to elect a trustee, they do so at this meeting.

After the meeting of creditors, unsecured creditors must submit a ***proof of claim***. This document is a simple form stating the name of the creditor and the amount of the claim. The trustee and the debtor also have the right to file on behalf of a creditor. But if a claim is not filed, the creditor loses any right to be paid. The trustee, debtor, or any creditor can object to a claim on the grounds that the debtor does not really owe that money. The court then holds a hearing to determine the validity of the claim.

Proof of claim
A form stating the name of an unsecured creditor and the amount of the claim against the debtor.

Secured creditors do not file proofs of claim unless the claim exceeds the value of their collateral. In this case, they are unsecured creditors for the excess amount and must file a proof of claim for it. Suppose that Deborah borrows $750,000 from Morton in return for a mortgage on her house. If she does not repay the debt, he can foreclose. Unfortunately, property values plummet, and by the time Deborah files a voluntary petition in bankruptcy, the house is worth only $500,000. Morton is a secured creditor for $500,000 and need file no proof of claim for that amount. But he is an unsecured creditor for $250,000 and will lose his right to this excess amount unless he files a proof of claim for it.

Automatic Stay

A fox chased by hounds has no time to make rational long-term decisions. What that fox needs is a safe burrow. Similarly, it is difficult for debtors to make sound financial decisions when hounded night and day by creditors shouting, "Pay me! Pay me!" The Code is designed to give debtors enough breathing space to sort out their affairs sensibly. An automatic stay is a safe burrow for the bankrupt. It goes into effect as soon as the petition is filed. An **automatic stay** prohibits creditors from collecting debts that the bankrupt incurred before the petition was filed. Creditors may not sue a bankrupt to obtain payment, nor may they take other steps, outside of court, to pressure the debtor for payment. The following case illustrates how persistent creditors can be.

Automatic stay
Prohibits creditors from collecting debts that the bankrupt incurred before the petition was filed.

Jackson v. Holiday Furniture

309 B.R. 33, 2004 Bankr. LEXIS 548
United States Bankruptcy Court for the Western District of Missouri, 2004

Facts: In April, Cora and Frank Jackson purchased a recliner chair on credit from Dan Holiday Furniture. They made payments until November. That month, they filed for protection under the Bankruptcy Code. Dan Holiday received a notice of the bankruptcy. This notice stated that the store must stop all efforts to collect on the Jacksons' debt.

Despite this notice, a Dan Holiday collector telephoned the Jacksons' house 10 times between November 15 and December 1 and left a card in their door threatening repossession of the chair. On December 1, Frank (without Cora's knowledge) went to Dan Holiday to pay the $230 owed for November and December. He told the

store owner about the bankruptcy filing but allegedly added that he and his wife wanted to continue making payments directly to Dan Holiday.

In early January, employees at Dan Holiday learned that Frank had died the month before. Nevertheless, after Cora failed to make the payment for the month of January, a collector telephoned her house 26 times between January 14 and February 19. The store owner's sister left the following message on Cora's answering machine:

> Hello. This is Judy over at Dan Holiday Furniture. And this is the last time I am going to call you. If you do not call me, I will be at your house. And I expect you to call me today. If there is a problem, I need to speak to you about it. You need to call me. We need to get this thing going. You are a January and February payment behind. And if you think you are going to get away with it, you've got another thing coming.

When Cora returned home on February 18, she found seven bright yellow slips of paper in her doorjamb stating that a Dan Holiday truck had stopped by to repossess her furniture. The cards read: "OUR TRUCK was here to **REPOSSESS** Your furniture (sic). 241-6933 Dan Holiday Furn. & Appl. Co."

The threat to send a truck was merely a ruse designed to frighten Cora. In truth, Dan Holiday did not really want the recliner back. The owner just wanted to talk directly with Cora about making payments.

Also on February 18, Dan Holiday sent Cora a letter stating that she had 24 hours to bring her account current or else **"Repossession** Will Be Made and **Legal Action Will Be Taken."** That same day, Cora's bankruptcy attorney contacted Dan Holiday. Thereafter, all collection activity ceased.

Issues: ***Did Dan Holiday violate the automatic stay provisions of the Bankruptcy Code? What is the penalty for a violation?***

Excerpts from Judge Venters's Decision:[6] The automatic stay prohibits the commencement or continuation of any action against the debtor that arose before the commencement of the bankruptcy case and forbids any act by a pre-petition creditor to obtain possession of property of the bankruptcy estate. An individual injured by a creditor's violation of the automatic stay shall recover actual damages, including costs and attorneys' fees, and in appropriate circumstances, may recover punitive damages.

In this case, there is no question that Dan Holiday repeatedly violated the automatic stay. [T]he Court finds that the Jacksons suffered financial damages in the amount of $230.00, which represents the coerced payments that Dan Holiday received from Frank Jackson on December 1.

The Court finds that punitive damages are warranted in this case based on Dan Holiday's egregious, intentional violations of the automatic stay. Dan Holiday's conduct was remarkably bad in that, after it had actual knowledge of the Jacksons' bankruptcy, and after coercing payments from the Jacksons covering the months of November and December, it made no less than twenty-six telephone calls to the Jacksons' household in January and February. Dan Holiday's continued collection efforts were in flagrant violation of the protections Congress afforded to debtors under the automatic stay.

In this matter, the Court is somewhat hampered in assessing punitive damages by the lack of evidence concerning the ability of Dan Holiday to pay. [An owner] testified that Dan Holiday was a family-owned business that has been in existence for 52 years, and the Court assumes that it is a relatively small business. Under the circumstances of this case, the Court believes that an appropriate penalty would be $100.00 for each illegal contact with the Jacksons after December 1, when it is crystal clear that Dan Holiday had actual knowledge of the Jacksons' bankruptcy filing, for a total of $2,800.00. The Court believes that this penalty will be sufficient to sting the pocketbook of Dan Holiday and impress upon Dan Holiday and its owners and employees the importance of debtor protections under the Bankruptcy Code, as well as to deter further transgressions.

The Court also will award the Jacksons their attorneys' fees and costs in the amount of $1,142.42, an amount the Court considers eminently fair and reasonable under the circumstances of this case.

Bankruptcy Estate

Bankruptcy estate
The new legal entity created when a debtor files a bankruptcy petition. The debtor's existing assets pass into the estate.

The filing of the bankruptcy petition creates a new legal entity separate from the debtor—the **bankruptcy estate**. All of the bankrupt's assets pass to the estate except exempt property and new property that the debtor acquires after the petition is filed.

[6] For readability's sake, we refer to the plaintiffs as "the Jacksons," not "debtors," as the court did.

Exempt Property

Unpaid creditors may be angry, but generally they do not want the debtor to starve to death. **The Code permits *individual* debtors (but not organizations) to keep some property for themselves.** This exempt property saves the debtor from destitution during the bankruptcy process and provides the foundation for a new life once the process is over.

In this one area of bankruptcy law, the Code defers to state law. Although the Code lists various types of exempt property, it permits states to opt out of the federal system and define a different set of exemptions. A majority of states have indeed opted out of the Code, and for their residents, the Code exemptions are irrelevant. Alternatively, some states allow the debtor to choose between state or federal exemptions.

Under the *federal* Code, a debtor is allowed to exempt only $21,625 of the value of her home. If the house is worth more than that, the trustee sells it and returns $21,625 of the proceeds to the debtor. Most *states* exempt items such as the debtor's home, household goods, cars, work tools, disability and pension benefits, alimony, and health aids. Indeed, some states set no limit on the value of exempt property. Both Florida and Texas, for example, permit debtors to keep homes of unlimited value and a certain amount of land. (Texas also allows debtors to hang on to two firearms; athletic and sporting equipment; two horses, mules or donkeys and a saddle, blanket, and bridle for each; up to a total value of $60,000 per family.) Not surprisingly, these generous exemptions sometimes lead to abuses. Therefore, the Code provides that debtors can take advantage of state exemptions only if they have lived in that state for two years prior to the bankruptcy. And they can exempt only $146,450 of any house that was acquired during the 40 months before the bankruptcy.

Voidable Preferences

A major goal of the bankruptcy system is to divide the debtor's assets fairly among creditors. It would not be fair, or in keeping with this goal, if debtors were permitted to pay off some of their creditors immediately before filing a bankruptcy petition. These transfers are called **preferences** because they give unfair preferential treatment to some creditors. The trustee has the right to void such preferences.

Preference
When a debtor unfairly pays creditors immediately before filing a bankruptcy petition.

Preferences can take two forms: payments and liens. A *payment* simply means that the debtor gives a creditor cash that would otherwise end up in the bankruptcy estate. A *lien* means a security interest in the debtor's property. In bankruptcy proceedings, secured creditors are more likely to be paid than unsecured creditors. If the debtor grants a security interest in specific property, he vaults that creditor out of the great unwashed mass of unsecured creditors and into the elite company of secured creditors. If it happens immediately before the petition is filed, it is unfair to other unsecured creditors.

The trustee can void any transfer (whether payment or lien) that meets all of the following requirements:

- The transfer was to a creditor of the bankrupt.
- It was to pay an existing debt.
- The creditor received more from the transfer than she would have received during the bankruptcy process.
- The debtor's liabilities exceeded assets at the time of the transfer.
- The transfer took place in the 90-day period before the filing of the petition.

Don Farrall/Photodisc/Getty Images

The debtor who hides assets from the approaching storm of bankruptcy is making a fraudulent transfer.

Insider
Family members of an individual debtor, officers and directors of a corporation, or partners of a partnership.

In addition, the trustee can void a transfer to an insider that occurs in the *year* preceding the filing of the petition. **Insiders** are family members of an individual, officers and directors of a corporation, or partners of a partnership.

Fraudulent Transfers

Suppose that a debtor sees bankruptcy approaching across the horizon like a tornado. He knows that, once the storm hits and he files a petition, everything he owns except a few items of exempt property will become part of the bankruptcy estate. Before that happens, he may be tempted to give some of his property to friends or family to shelter it from the tornado. If he succumbs to temptation, however, he is committing a fraudulent transfer.

A transfer is fraudulent if it is made within the year before a petition is filed and its purpose is to hinder, delay, or defraud creditors. The trustee can void any fraudulent transfer. The debtor has committed a crime and may be prosecuted.

Even the insolvent are allowed to shower with the lights on.

Not all payments by a debtor prior to filing are considered voidable preferences or fraudulent transfers. **A trustee cannot void pre-petition payments made *in the ordinary course*.** In a business context, that means a trustee cannot void payments from, say, a grocery store to its regular cookie supplier. For consumers, the trustee cannot void payments below $600 or other routine payments, say, to the electric or water company. In these situations, the bankrupt is clearly not trying to cheat creditors. Even the insolvent are allowed to shower with the lights on.

EXAM Strategy

Question: Eddie and Lola appeared to be happily married. But then Eddie's business failed, and he owed millions. Suddenly, Lola announced that she wanted a divorce. Eddie immediately agreed to transfer all of the couple's remaining assets to her as part of the divorce settlement. Are you suspicious? Is there a problem?

Strategy: Was this a voidable preference or a fraudulent transfer? What difference does it make?

Result: In a voidable preference, the debtor makes an unfair transfer to a creditor. In a fraudulent transfer, the bankrupt's goal is to hold on to assets himself. In a case similar to this one, the court ruled that the transfer was fraudulent because Eddie intended to shield his assets from all creditors.

Payment of Claims

Imagine a crowded delicatessen on a Saturday evening. People are pushing and shoving because they know there is not enough food for everyone; some customers will go home hungry. The delicatessen could simply serve whoever pushes to the front of the line, or it could establish a number system to ensure that the most deserving customers are served first—longtime patrons or those who called ahead. The Code has, in essence, adopted a number system to prevent a free-for-all fight over the bankrupt's assets. Indeed, one of the Code's primary goals is to ensure that creditors are paid in the proper order, not according to who pushes to the front of the line.

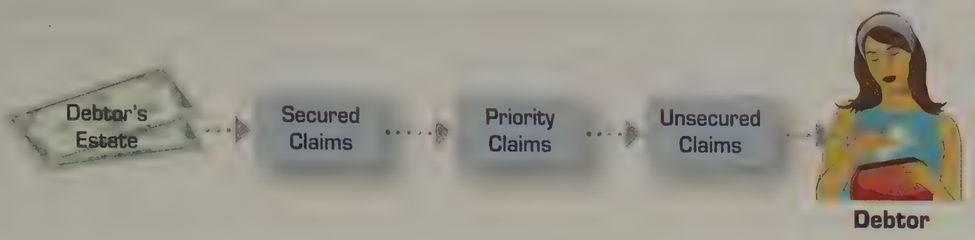


EXHIBIT 37.1

All claims are placed in one of three classes: (1) secured claims, (2) priority claims, and (3) unsecured claims. The second class—priority claims—has seven subcategories; the third class—unsecured claims—has three. **The trustee pays the bankruptcy estate to the various classes of claims in order of rank.** A higher class is paid in full before the next class receives any payment at all. In the case of *priority* claims, each *subcategory* is paid in order, with the higher subcategory receiving full payment before the next subcategory receives anything. If there are not enough funds to pay an entire subcategory, all claimants in that group receive a *pro rata* share. The rule is different for unsecured claims. All categories of *unsecured* claims are treated the same, and if there are not enough funds to pay the *entire* class, everyone in the class shares *pro rata*. If, for example, there is only enough money to pay 10 percent of the claims owing to unsecured creditors, then each creditor receives 10 percent of her claim. In bankruptcy parlance, this is referred to as "getting 10 cents on the dollar." The debtor is entitled to any funds remaining after all claims have been paid. The payment order is shown in Exhibit 37.1.

Secured Claims

Creditors whose loans are secured by specific collateral are paid first. Secured claims are fundamentally different from all other claims because they are paid by selling a specific asset, not out of the general funds of the estate. Sometimes, however, collateral is not valuable enough to pay off the entire secured debt. In this case, the creditor must wait in line with the unsecured creditors for the balance. Deborah (whom we met earlier in the section entitled "Creditors") borrowed $750,000 from Morton, secured by a mortgage on her house. By the time she files a voluntary petition, the house is worth only $500,000. Morton is a secured creditor for $500,000 and is paid that amount as soon as the trustee sells the house. But Morton is an unsecured creditor for $250,000 and will only receive this amount if the estate has enough funds to pay the unsecured creditors.

Priority Claims

There are seven subcategories of priority claims. Each category is paid in order, with the first group receiving full payment before the next group receives anything.

- *Alimony and child support.* The trustee must first pay any claims for alimony and child support. However, if the trustee is administering assets that could pay these support claims, then the trustee's fees are paid first.
- *Administrative expenses.* These include fees to the trustee, lawyers, and accountants.
- *Gap expenses.* If creditors file an involuntary petition, the debtor will continue to operate her business until the order for relief. Any expenses she incurs in the ordinary course of her business during this so-called **gap period** are paid now.

Gap period
The period between the time that a creditor files an involuntary petition and the court issues the order for relief.

- *Payments to employees.* The trustee now pays back wages to the debtor's employees for work performed during the 180 days prior to the date of the petition. The trustee, however, can pay no more than $11,725 to each employee. Any other wages become unsecured claims.
- *Employee benefit plans.* The trustee pays what the debtor owes to employee pension, health, or life insurance plans for work performed during the 180 days prior to the date of the petition. The total payment for wages and benefits under this and the prior paragraph cannot exceed $11,725 times the number of employees.
- *Consumer deposits.* Any individual who has put down a deposit with the bankrupt for consumer goods is entitled to a refund of up to $2,600. If Stewart puts down a $3,000 deposit on a Miata sports car, he is entitled to a refund of $2,600 when the Trustie Car Lot goes bankrupt.
- *Taxes.* The trustee pays the debtor's income taxes for the three years prior to filing and property taxes for one prior year.
- *Intoxication injuries.* The trustee next pays the claims of anyone injured by a bankrupt who was driving a vehicle while drunk or on drugs.

Unsecured Claims

Last, and frequently very much least, the trustee pays unsecured claims. All three of these unsecured subcategories have an equal claim and must be paid together.

- *Secured claims that exceed the value of the available collateral.* If funds permit, the trustee pays Morton the $250,000 that his collateral did not cover.
- *Priority claims that exceed the priority limits.* The trustee now pays employees, Stewart, and the tax authorities who were not paid in full the first time around because their claims exceeded the priority limits.
- *All other unsecured claims.* Unsecured creditors have now reached the delicatessen counter. They can only hope that some food remains.

Discharge

Filing a bankruptcy petition is embarrassing, time-consuming, and disruptive. It can affect the debtor's credit rating for years, making the simplest car loan a challenge. To encourage debtors to file for bankruptcy despite the pain involved, the Code offers a powerful incentive: the **fresh start**. Once a bankruptcy estate has been distributed to creditors, they cannot make a claim against the debtor for money owed before the filing, *whether or not they actually received any payment*. These pre-petition debts are **discharged**. All is forgiven, if not forgotten.

Fresh start
After the termination of a bankruptcy case, creditors cannot make a claim against the debtor for money owed before the initial bankruptcy petition was filed.

Discharge
The debtor no longer has an obligation to pay a debt.

Discharge is an essential part of bankruptcy law. Without it, debtors would have little incentive to take part. To avoid abuses, however, the Code limits both the type of debts that can be discharged and the circumstances under which discharge can take place. In addition, a debtor must complete an approved course on financial management before receiving a discharge.

Debts That Cannot Be Discharged

The following debts are *never* discharged, and the debtor remains liable in full until they are paid:

- Income taxes for the three years prior to filing and property taxes for the prior year.
- Money obtained fraudulently. Kenneth Smith ran a home repair business that fleeced senior citizens by making unnecessary repairs. Three months after he was found

liable for fraud, he filed a voluntary petition in bankruptcy. The court held that his liability on the fraud claim could not be discharged.[7]

- Any loan of more than $600 that a consumer uses to purchase luxury goods within 90 days before the order for relief is granted.
- Cash advances on a credit card totaling more than $875 that an individual debtor takes out within 70 days before the order for relief.
- Debts omitted from the Schedule of Assets and Liabilities that the debtor filed with the petition, if the creditor did not know about the bankruptcy and therefore did not file a proof of claim.
- Money that the debtor stole or obtained through a violation of fiduciary duty.
- Money owed for alimony or child support.
- Debts stemming from intentional and malicious injury.
- Fines and penalties owed to the government.
- Liability for injuries caused by the debtor while operating a vehicle under the influence of drugs or alcohol. (Yet another reason why friends don't let friends drive drunk.)
- Liability for breach of duty to a bank. During the 1980s, a record number of savings and loans failed because their officers had made too many risky loans (in some cases to friends and family). This provision, added to the Code in 1990, was designed to prevent these officers from declaring bankruptcy to avoid their liability to bank shareholders.
- Debts stemming from a violation of securities laws.
- Student loans can be discharged only if repayment would cause undue hardship. As the following case illustrates, proving undue hardship is difficult.

In Re Stern

288 B.R. 36; 2002 Bankr. LEXIS 1609
United States Bankruptcy Court for the Northern District of New York, 2002

Facts: James Stern took out student loans to attend Bates College and Syracuse College of Law. Afterward, he had difficulty finding a job as a lawyer, so he opened his own practice. Both he and his wife earned less than $20,000 a year.

A client sued Stern for malpractice. Although Stern won, his malpractice premiums increased so much that he could no longer afford the insurance. Believing that his debt and default on his student loans made him unemployable as a lawyer, he moved with his wife to her native country, France. Unfortunately, he did not speak French and, therefore, could not obtain a job, even as a street sweeper. His wife's total income over six months in France was $2,200. Even more unfortunately, their expenses in France were higher than in the United States.

Stern owed $147,000 in student loans: $56,000 in principal and $91,000 in interest. He calculated that paying this debt would cost $1,167 per month over 30 years. He asked the court to discharge these student loans on grounds of undue hardship. As he put it, "I'm never going to be able to get a house, I'm never going to be able to have a car, and I won't—you know, I want to have kids. I want to be responsible, and I can't—I can't possibly pay this amount and have a life, not with what I expect I'll be able to earn."

[7] *In re Smith,* 848 F.2d 813, 1988 U.S. App. LEXIS 8037 (7th Cir. 1988).

Issue: *Is Stern entitled to a discharge of his student loans on grounds of undue hardship?*

Excerpts from Judge Gerling's Decision:[8] [E]ducational loans are different from most loans. They are made without business considerations, without security, without cosigners, and rely for repayment solely on the debtor's future increased income resulting from the education. In this sense, the loan is viewed as a mortgage on the debtor's future.

[To obtain a discharge,] Stern must prove more than his present inability to pay his student loan obligations. He must also establish that his current financial hardship is likely to be long-term. In this case, Stern possesses both a bachelor's degree and a Juris Doctorate. Stern apparently has decided that he no longer wishes to pursue a legal career. He is certainly well within his rights to make such a choice. Nevertheless, [b]orrowers under the various guaranteed student loan programs are obligated to repay their loans even if they are unable to obtain employment in their chosen field of study.

The Court finds disturbing Stern's failure to maximize his income and minimize his expenses. He and his wife have elected to relocate to France, where Stern admitted that the cost of living is higher. Nor is there any evidence that he ever made any effort to obtain employment in the United States in order to enhance his earnings, whether it be in business, government, or in a private law firm in Syracuse or elsewhere. Instead, he opted to move to a country where he acknowledges he cannot even get a job as a street sweeper because of his inability to speak the language.

Obviously, Stern would prefer to be in a position that would allow him to allocate those monies [he owes] to a mortgage on a home or to the raising of children. Those are certainly commendable goals; but the fact that they may not be attainable at this time because of the student loans and Stern's, as well as his wife's, current employment situation, does not meet the fundamental standard from which "undue hardship" is measured and does not provide a basis for granting Stern [even] a partial discharge at this time.

While Stern and his wife have experienced some "bumps in the road," the direction they take in the future appears very much in their control based on their age, health, and education. Indeed, it is the very education that he obtained as a result of the student loans at both the undergraduate and graduate levels, which, arguably, should ultimately allow him to pursue employment opportunities not available to others who were unable to pursue higher education for whatever reason. While Stern testified that he no longer wishes to continue in the legal profession, certainly, there are other career opportunities available to him by virtue of his education, training, and experience.

Circumstances That Prevent Debts from Being Discharged

Apart from identifying the *kinds* of debts that cannot be discharged, the Code also prohibits the discharge of debts under the following *circumstances:*

- *Business organizations.* Under Chapter 7 (but *not* the other Chapters), only the debts of individuals can be discharged, not those of business organizations. Once its assets have been distributed, the organization must cease operation. If it continues in business, it is responsible for all pre-petition debts. Shortly after E. G. Sprinkler Corp. entered into an agreement with its union employees, it filed for bankruptcy under Chapter 7. Its debts were discharged, and the company began operation again. A court ordered it to pay its obligations to the employees because, once the company resumed business, it was responsible for all of its pre-filing debts.[9]
- *Revocation.* A court can revoke a discharge within one year if it discovers the debtor engaged in fraud or concealment.
- *Dishonesty or bad faith behavior.* The court may deny discharge altogether if the debtor has, for example, made fraudulent transfers, hidden assets, falsified records, disobeyed court orders, refused to testify, or otherwise acted in bad faith. For

[8] Although the court refers to Stern as "Debtor," we use his surname.
[9] *In re Goodman*, 873 F.2d 598, 1989 U.S. App. LEXIS 5472 (2d Cir. 1989).

instance, a court denied discharge under Chapter 7 to a couple who failed to list 15 pounds of marijuana on their Schedule of Assets and Liabilities. The court was unsympathetic to their arguments that a listing of this asset might have caused larger problems than merely being in debt.[10]

- *Repeated filings for bankruptcy.* Congress feared that some debtors, attracted by the lure of a fresh start, would make a habit of bankruptcy. Therefore, a debtor who has received a discharge under Chapter 7 or 11 cannot receive another discharge under Chapter 7 for at least eight years after the prior filing. And a debtor who received a prior discharge under Chapter 13 cannot in most cases receive one under Chapter 7 for at least six years.

Ethics Banks and credit card companies lobbied Congress hard for the prohibition against repeated bankruptcy filings. They argued that irresponsible consumers run up debt and then blithely walk away. You might think that, if this were true, lenders would avoid customers with a history of bankruptcy. Research indicates, though, that lenders actually *target* those consumers, repeatedly sending them offers to borrow money. The reason is simple: these consumers are much more likely to take cash advances, which carry very high interest rates. And this is one audience that *must* repay its loans for the simple reason that these borrowers cannot declare bankruptcy again.[11] Is this strategy ethical?

EXAM Strategy

Question: Someone stole a truck full of cigarettes. Zeke found the vehicle abandoned at a truck stop. Not being a thoughtful fellow, he took the truck and sold it with its cargo. Although Tobacco Company never found out who stole the truck originally, it did discover Zeke's role. A court ordered Zeke to pay Tobacco $50,000. He also owed his wife $25,000 in child support. Unfortunately, he only had $20,000 in assets. After he files for bankruptcy, who will get paid what?

Strategy: There are two issues: the order in which the debts are paid and whether they will be discharged.

Result: Child support is a priority claim, so that will be paid first. In a similar case, the court refused to discharge the claim over the theft of the truck, ruling that that was an intentional and malicious injury. Nor will a court discharge the child support claim. So Zeke will be on the hook for both debts, but the child support must be paid first.

Reaffirmation

Reaffirm

To promise to pay a debt even after it is discharged.

Sometimes debtors are willing to **reaffirm** a debt, meaning they promise to pay even after discharge. They may want to reaffirm a secured debt to avoid losing the collateral. For example, a debtor who has taken out a loan secured by a car may reaffirm that debt so that the finance company will not repossess it. Sometimes debtors reaffirm because they feel guilty or want to maintain a good relationship with the creditor. They may have borrowed from a family member or an important supplier. Because discharge is a fundamental pillar of the bankruptcy process, creditors are not permitted to unfairly pressure the bankrupt. To be valid, the reaffirmation must:

- Not violate common law standards for fraud, duress, or unconscionability. If creditors force a bankrupt into reaffirming a debt, the reaffirmation is invalid.
- Have been filed in court before the discharge is granted.
- Include the detailed disclosure statement required by the statute (Section 524).
- Be approved by the court if the debtor is not represented by an attorney or if, as a result of the reaffirmed debt, the bankrupt's expenses exceed his income.

In the following case, the debtor sought to reaffirm the loan on his truck. He may have been afraid that if he did not, the lender would repossess it, leaving him stranded. It is hard to get around Dallas without a car. Should the court permit the reaffirmation?

In Re: Grisham

436 B.R. 896; 2010 Bankr. LEXIS 2907
United States Bankruptcy Court for the Northern District of Texas, 2010

Facts: Two months before filing for bankruptcy, William Grisham bought a Dodge truck (Nitro-V6 Utility 4D SLT 2WD). At the time of his bankruptcy filing, the vehicle was worth $16,000, but he owed $17,500 on it. The annual interest rate was 17.5 percent, the monthly payments were $400, and the payment schedule was almost 6 years. In addition, Grisham owed:

$29,000 to the IRS
$75,000 in alimony
$100,000 in student loans
$70,000 in unsecured debt
$274,000 total in addition to the truck

Grisham sought to reaffirm the truck loan. Should the court allow him to do so?

Issue: ***Would reaffirmation of this debt create an undue hardship for the debtor?***

Excerpts from Judge Jernigan's Decision: [F]rom the outset, this court was concerned that the Debtor wished to reaffirm debt on personal property in which there is no equity. [T]he Debtor describes himself as "retired/unemployed." The Debtor's only source of income is $1,928 per month of social security income and $1,698 per month of unemployment benefits—the latter of which will soon expire. The Debtor owns no real property and testified that he currently resides rent-free at a relative's home. The Debtor's monthly net income, after deducting his living expenses, is a negative $1,091.

While the monthly payments on the vehicle are not eye-popping, for this Debtor, in his current situation, it is unduly burdensome. In particular, this Debtor is burdened with several obligations that will likely survive his discharge in bankruptcy (large IRS debt; large alimony; and large student loan debt). Finally, the court heard no compelling testimony to justify why the Debtor purchased his vehicle right before filing bankruptcy (sometimes this may be defensible and sometimes not). In summary, the court will not stamp its seal of approval on the Debtor's reaffirmation of the debt. To do so would create a hardship on this Debtor and does not otherwise seem justified.

Bankruptcy is about "fresh starts" and new beginnings. It is about belt-tightening and shedding past bad habits. Too often, a reaffirmation agreement will reveal

that someone just does not comprehend this and wants to go forward in a manner that will impair his fresh start and perpetuate bad habits from the past.

The court realizes that this is sometimes complicated. [T]here are probably situations in which a vehicle-lender will repossess the debtor's vehicle post-discharge, even when the debtor is making regular and timely contractual payments for the car post-discharge—for the simple reason that the debtor did not "reaffirm." Thus, the court can understand why a debtor and his counsel might see the wisdom of entering into a reaffirmation agreement, even if they can envision the court may never approve it because of the negative math. Perhaps they imagine that this will help the debtor with the car lender post-discharge, if they at least tried to get the reaffirmation agreement approved with the court. Moreover, perhaps the debtor genuinely needs a car and worries that, absent an attempt at a reaffirmation agreement, he will surely lose the car post-discharge and may not be able to purchase (*i.e.*, obtain financing) for another vehicle in the near future.

The court realizes that we are in a world where car lenders may not always act like economically rational animals. And, the court appreciates that car lenders may sometimes have their own economic pressures with which to contend. But, again, the fresh start is the overriding purpose of a chapter 7 bankruptcy case. Many reaffirmation agreements presented to the court are the farthest thing from a "fresh start" that one could ever imagine. Many times it is time to say "good riddance" to the car. And many times—maybe, just maybe—a car lender will see the wisdom of renegotiating a car loan if reaffirmation is denied.

Accordingly,

IT IS ORDERED that the Reaffirmation Agreement is disapproved.

Chapter 11 Reorganization

For a business, the goal of a Chapter 7 bankruptcy is euthanasia—putting it out of its misery by shutting it down and distributing its assets to creditors. Chapter 11 has a much more complicated and ambitious goal—resuscitating a business so that it can ultimately emerge as a viable economic concern, as General Motors did. Keeping a business in operation benefits virtually all company stakeholders: employees, customers, creditors, shareholders, and the community.

Both individuals and businesses can use Chapter 11. Businesses usually prefer Chapter 11 over Chapter 7 because Chapter 11 does not require them to dissolve at the end, as Chapter 7 does. The threat of death creates a powerful incentive to try rehabilitation under Chapter 11. Individuals, however, tend to prefer Chapter 13 because it is specifically designed for them.

A Chapter 11 proceeding follows many of the same steps as Chapter 7: a petition (either voluntary or involuntary), order for relief, meeting of creditors, proofs of claim, and an automatic stay. There are, however, some significant differences.

Debtor in Possession

Chapter 11 does not require a trustee. The bankrupt is called the **debtor in possession** and, in essence, serves as trustee. The debtor in possession has two jobs: to operate the business and to develop a plan of reorganization. A trustee is chosen only if the debtor is incompetent or uncooperative. In that case, the creditors can elect the trustee, but if they do not choose to do so, the U.S. Trustee appoints one.

Debtor in possession
The debtor acts as trustee in a Chapter 11 bankruptcy.

Creditors' Committee

In a Chapter 11 case, the creditors' committee is important because typically, there is no neutral trustee to watch over their interests. The committee generally protects the interests of its constituency and may play a role in developing the plan of reorganization. Moreover, the Bankruptcy Code requires the committee to communicate diligently with

all creditors. The U.S. Trustee typically appoints the seven largest *un*secured creditors to the committee. However, the court may require the U.S. Trustee to appoint some small-business creditors as well. Secured creditors do not serve because their interests require less protection. If the debtor is a corporation, the U.S. Trustee may also appoint a committee of shareholders. The Code refers to the **claims** of creditors and the **interests** of shareholders.

Plan of Reorganization

Once the bankruptcy petition is filed, an automatic stay goes into effect to provide the debtor with temporary relief from creditors. The next stage is to develop a plan of reorganization that provides for the payment of debts and the continuation of the business. For the first 120 days (which the court can extend up to 18 months), the debtor has the exclusive right to propose a plan. If the debtor fails to file a plan, or if the court rejects it, then creditors and shareholders can develop their own plan.

Confirmation of the Plan

Anyone who proposes a plan of reorganization must also prepare a **disclosure statement** to be mailed out with the plan. The purpose of this statement is to provide creditors and shareholders with enough information to make an informed judgment. The statement describes the company's business, explains the plan, calculates the company's liquidation value, and assesses the likelihood that the debtor can be rehabilitated. The court must approve a disclosure statement before it is sent to creditors and shareholders.

All the creditors and shareholders have the right to vote on the plan of reorganization. In preparation for the vote, each creditor and shareholder is assigned to a class. Everyone in a class has similar claims or interests. Chapter 11 classifies claims in the same way as Chapter 7: (1) secured claims, (2) priority claims, and (3) unsecured claims. Each secured claim is usually in its own class because each one is secured by different collateral. Shareholders are also divided into classes depending upon their interests. For example, holders of preferred stock are in a different class from common shareholders.

Creditors and shareholders receive a ballot with their disclosure statement to vote for or against the plan of reorganization. After the vote, the bankruptcy court holds a **confirmation hearing** to determine whether it should accept the plan. **The court will approve a plan if a majority *of each class* votes in favor of it *and* if the "yes" votes hold at least two-thirds of the total debt in that class.**

Even if some classes vote against the plan, the court can still confirm it under what is called a **cramdown** (as in "the plan is crammed down the creditors' throats"). The court will not impose a cramdown unless, in its view, the plan is feasible and fair. If the court rejects the plan of reorganization, the creditors must develop a new one. In the following case, the court did impose a cramdown.

In Re Fox

2000 Bankr. LEXIS 1713
United States Bankruptcy Court, District of Kansas, 2000

Facts: Donald Fox founded Midland Fumigant, Inc., a company in the business of fumigating stored wheat, corn, and other grain. In a prior case, a competitor, United Phosphorus, Ltd., obtained a verdict of $2 million against Midland and Fox for fraud.

Unable to pay the judgment, Fox filed a voluntary petition under Chapter 11 of the Bankruptcy Code. His plan of reorganization envisioned that he would use revenues from Midland to pay off his creditors in full over five years, with interest. To ensure that the plan of

reorganization was feasible, Fox hired CPA Kirk Wiesner to analyze Midland's financial statements and prepare projections of its income and expenses. Wiesner also reviewed Midland's operations, business, products, and the industry. He concluded that the plan's projections were conservative and could be met easily.

Midland had six classes of creditors. All of the classes accepted the plan except the two classes in which United was a member. The bankruptcy judge noted that United had an incentive to oppose Midland's reorganization because this business was highly competitive and, if Midland were to cease operations, United would be able to raise its prices substantially.

Issues: ***Was Fox's plan of reorganization feasible and fair? Should the court impose a cramdown?***

Excerpts from Judge Robinson's Decision: Debtor has proposed a plan which pays all creditors in full, with interest. United, the only objecting creditor, will be paid in full [within 16 months]. Debtor has provided a reasonable and orderly repayment of his debts. Debtor's desire and intent to provide a mechanism for him to retain his business interests and assets is consistent with the purposes of the Bankruptcy Code. The plan may satisfy [the Code] even though the plan may not be one which the creditors would themselves design.

United contends that the Plan is not feasible because the projections of Midland's income and expenses are unreliable. The purpose [of the Bankruptcy Code] is to prevent confirmation of visionary schemes that promise creditors and equity security holders more than the debtor can possibly attain after confirmation.

Will the reorganized debtor emerge from bankruptcy solvent and with a reasonable prospect of success? Debtor's expert, Kirk Wiesner, analyzed Midland's financial statements, and determined that Midland would have sufficient income and cash flow during the life of Debtor's Plan, to make the anticipated distributions and loans that will fund Debtor's Plan. Based on Wiesner's Projections, which proved conservative in [the past], when Midland's actual income doubled the projected income, the Court concludes that Midland will have a continuing ability to distribute and loan funds to the Debtor as contemplated.

The Plan has a reasonable assurance of success and is not likely to be followed by liquidation, or the need for further financial reorganization. As such, the Debtor's Plan meets the feasibility requirement. The Court further notes that the United States Trustee has filed a statement in support of confirmation of the Plan.

[T]he Court finds that the Debtor's Plan is fair and equitable and, as a result, the fact that [two] Classes did not accept the Plan does not preclude confirmation.

The Debtor's Plan is confirmed over the objection of United and over the dissenting votes of [two] Classes for the reasons stated.

Discharge

A confirmed plan of reorganization is binding on the debtor, creditors, and shareholders. **The debtor now owns the assets in the bankrupt estate, free of all obligations except those listed in the plan.** Under a typical plan of reorganization, the debtor gives some current assets to creditors and also promises to pay them a portion of future earnings. In contrast, the Chapter 7 debtor typically relinquishes all assets (except exempt property) to creditors but then has no obligation to turn over future income. Exhibit 37.2 illustrates the steps in a Chapter 11 bankruptcy.

Small-Business Bankruptcy

Out of concern that the lengthy procedure in Chapter 11 was harming the creditors of small businesses, in 2005 Congress included provisions designed to speed up the process for businesses with less than $2 million in debt. After the order for relief, the bankrupt has the exclusive right to file a plan for 180 days. Both a plan and a disclosure statement must be filed within 300 days. The court must confirm or reject the plan within 45 days after its filing. If these deadlines are not met, the case can be converted to Chapter 7 or dismissed.

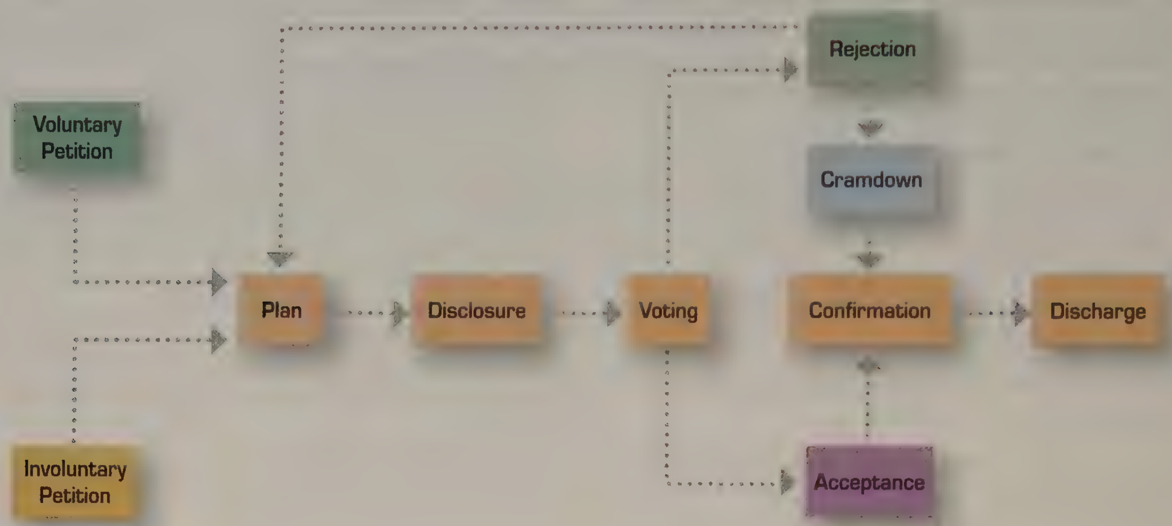

EXHIBIT 37.2

Chapter 13 Consumer Reorganizations

The purpose of Chapter 13 is to rehabilitate an individual debtor. It is not available at all to businesses or to individuals with more than $360,475 in unsecured debts or $1,081,400 in secured debts. Under Chapter 13, the bankrupt consumer typically keeps most of her assets in exchange for a promise to repay some of her debts using future income. Therefore, to be eligible, the debtor must have a regular source of income. Individuals usually choose this chapter because it is easier and cheaper than Chapters 7 and 11. Consequently, more money is retained for both creditors and debtor.

As you read at the beginning of the chapter, debtors can convert from one chapter to another as they wish. In this case, the trustees objected to a conversion. The case went all the way to the Supreme Court, which split 5-4. How would you have voted?

You be the Judge

Marrama v. Citizens Bank of Massachusetts

127 S. Ct. 1105; 2007 U.S. LEXIS 2651
Supreme Court of the United States, 2007

Facts: When Robert Marrama filed a voluntary petition under Chapter 7, he lied. Although he disclosed that he was the sole beneficiary of a trust that owned a house in Maine, he listed its value as zero. Marrama also denied that he had transferred any property during the prior year. Neither statement was true: the Maine property was valuable (how many houses are worth zero?), and he had given it for free to the trust seven months prior to filing for bankruptcy protection. Marrama also lied when he claimed that he was not entitled to a tax refund. In fact, he knew that a check for $8,700 from the Internal Revenue Service was in the mail.

Once Marrama found out that the bankruptcy trustees were going after the Maine property, he filed a notice to convert his Chapter 7 bankruptcy to Chapter 13. The trustee and creditors objected. They contended that because Marrama had acted in bad faith when he tried to conceal the Maine property from his creditors, he should not be permitted to convert. The bankruptcy court and the appeals court agreed. The Supreme Court granted *certiorari*.

You Be The Judge: ***Can a bankruptcy court refuse to allow a debtor to convert from Chapter 7 to Chapter 13?***

Argument for Marrama: Under the Bankruptcy Code, a Chapter 7 debtor may convert a case, with only two restrictions. First, the bankrupt can convert only once. Second, the debtor must meet the conditions that would have been required for him to file under the new chapter in the first place. Nothing in the Code suggests that a bankruptcy judge has the right to prohibit a conversion because of the debtor's bad faith.

If a debtor acts in bad faith, the court has other remedies: it can convert the case back to a Chapter 7 liquidation; it can refuse to approve the plan of payment; or it can charge the debtor with perjury. That is the law, whether the trustee and creditors like it or not.

Argument for the Bankruptcy Trustee: A bankruptcy court has the unquestioned right to dismiss a Chapter 13 petition if the debtor demonstrates bad faith. There seems no logical reason why a court would have the right to dismiss a case for bad faith but not the right to prohibit a filing under Chapter 13 to begin with. In both cases, the court is simply saying that the individual does not qualify as a debtor under Chapter 13. That individual is not a member of the class of honest but unfortunate debtors whom the bankruptcy laws were enacted to protect.

EXAM Strategy

Question: Why did Marrama first file under Chapter 7 and then try to switch to Chapter 13 after he was caught lying?

Strategy: This question is a good test of your understanding of the advantages and disadvantages of the different chapters. For help in answering this question, you might want to look at the chart at the end of the chapter. Remember that Chapter 7 is a liquidation provision—it takes more of the bankrupt's money upfront but then discharges his debts and gives him a fresh start for the future. Chapter 13 does not take as many assets during the bankruptcy process but may attach all the debtor's disposable income for the next five years.

Result: Marrama filed under Chapter 7 in the hope that he could hold on to his house while all his debts were discharged. Once that plan failed, he tried to switch to Chapter 13 in the hope that he could keep the house and give up his disposable income instead. This case illustrates the different emphases of Chapters 7 and 13.

A bankruptcy under Chapter 13 generally follows the same course as Chapter 11: the debtor files a petition, creditors submit proofs of claim, the court imposes an automatic stay, the debtor files a plan, and the court confirms the plan. But there are some differences.

Beginning a Chapter 13 Case

To initiate a Chapter 13 case, the debtor must file a voluntary petition. **Creditors cannot use an involuntary petition to force a debtor into Chapter 13.** In all Chapter 13 cases, the U.S. Trustee appoints a trustee to supervise the debtor, although the debtor remains in possession of the bankruptcy estate. The trustee also serves as a central clearinghouse for the debtor's payments to creditors. The debtor pays the trustee who, in turn, transmits these funds to creditors. For this service, the trustee is allowed up to 10 percent of the payments.

Plan of Payment

The debtor must file a plan of payment within 15 days after filing the voluntary petition. Only the debtor can file a plan; the creditors have no right to file their own version. Under the plan, the debtor must (1) commit some future earnings to pay off debts, (2) promise to pay all secured and priority claims in full, and (3) treat all remaining classes equally. If the plan does not provide for the debtor to pay off creditors in full, then all of the debtor's disposable income for the next five years must go to creditors.

Within 30 days after filing the plan of payment, the debtor must begin making payments to the trustee under the plan. The trustee holds these payments until the plan is confirmed and then transmits them to creditors. The debtor continues to make payments to the trustee until the plan has been fully implemented. If the plan is rejected, the trustee returns the payments to the debtor.

Only the bankruptcy court has the authority to confirm or reject a plan of payment. Creditors have no right to vote on it. However, to confirm a plan, the court must ensure that:

- The creditors have the opportunity to voice their objections at a hearing;
- All of the unsecured creditors receive at least as much as they would have if the bankruptcy estate had been liquidated under Chapter 7;
- The plan is feasible and the bankrupt will be able to make the promised payments;
- The plan does not extend beyond three years without good reason and in no event lasts longer than five years; and
- The debtor is acting in good faith, making a reasonable effort to pay obligations.

Discharge

Once confirmed, a plan is binding on all creditors whether they like it or not. **The debtor is washed clean of all pre-petition debts except those provided for in the plan, but, unlike Chapter 7 , the debts are not *permanently* discharged.** If the debtor violates the plan, all of the debts are revived, and the court may either dismss the case or convert it to a liquidation proceeding under Chapter 7. The debts become permanently discharged only when the bankrupt fully complies with the plan.

Note, however, that any debtor who has received a discharge under Chapter 7 or 11 within the prior four years, or under Chapter 13 within the prior two years, is not eligible under Chapter 13.

If the debtor's circumstances change, the debtor, the trustee, or unsecured creditors can ask the court to modify the plan. Most such requests come from debtors whose income has declined. However, if the debtor's income rises, the creditors or the trustee can ask that payments increase, too.

Chapter Conclusion

Whenever an individual or organization incurs more debts than it can pay in a timely fashion, everyone loses. The debtor loses control of his assets and the creditors lose money. Bankruptcy laws cannot create assets where there are none (or not enough), but they can ensure that the debtor's assets, however limited, are fairly divided between the debtor and creditors. Any bankruptcy system that accomplishes this goal must be deemed a success. Is the U.S. Bankruptcy Code fair?

EXAM REVIEW

This chart sets out the important elements of each bankruptcy chapter.

	Chapter 7	Chapter 11	Chapter 13
Objective	Liquidation	Reorganization	Consumer reorganization
Who May Use It	Individual or organization	Individual or organization	Individual
Type of Petition	Voluntary or involuntary	Voluntary or involuntary	Only voluntary
Administration of Bankruptcy Estate	Trustee	Debtor in possession (trustee selected only if debtor is unable to serve)	Trustee
Selection of Trustee	Creditors have right to elect trustee; otherwise, U.S. Trustee makes appointment	Usually no trustee	Appointed by U.S. Trustee
Participation in Formulation of Plan	No plan is filed	Both creditors and debtor can propose plans	Only debtor can propose a plan
Creditor Approval of Plan	Creditors do not vote	Creditors vote on plan, but court may approve plan without the creditors' support	Creditors do not vote on plan
Impact on Debtor's Post-petition Income	Not affected; debtor keeps all future earnings	Must contribute toward payment of pre-petition debts	Must contribute toward payment of pre-petition debts

1. Question: Mark Milbank's custom furniture business was unsuccessful, so he repeatedly borrowed money from his wife and her father. He promised that the loans would enable him to spend more time with his family. Instead, he spent more time in bed with his next-door neighbor. After the divorce, his ex-wife and her father demanded repayment of the loans. Milbank filed for protection under Chapter 13. What could his ex-wife and her father do to help their chances of being repaid?

Strategy: First ask yourself what kind of creditor they are: secured or unsecured. Then think about what creditors can do to get special treatment. (See the "Result" at the end of this section.)

EXAM Strategy

2. After a jury ordered actor Kim Basinger to pay $8 million for violating a movie contract, she filed for bankruptcy protection, claiming $5 million in assets and $11 million in liabilities. Under which Chapter should she file? Why?

Strategy: Look at the requirements for each Chapter. Was Basinger eligible for Chapter 13? What would be the advantages and disadvantages of Chapters 7 and 11? (See the "Result" at the end of this section.)

1. Result: The father and the ex-wife were unsecured creditors who, as a class, come last on the priority list. The court granted their request not to discharge their loans on the grounds that Milbank had acted in bad faith.

2. Result: Basinger was not eligible to file under Chapter 13 because she had debts of $11 million. She first filed under Chapter 11 in a effort to retain some of her assets, but then her creditors would not approve her plan of reorganization, so she converted to liquidation under Chapter 7.

Multiple-Choice Questions

1. CPA QUESTION A voluntary petition filed under the liquidation provisions of Chapter 7 of the federal Bankruptcy Code:

(a) Is not available to a corporation unless it has previously filed a petition under the reorganization provisions of Chapter 11 of the Code

(b) Automatically stays collection actions against the debtor **except** by secured creditors

(c) Will be dismissed unless the debtor has 12 or more unsecured creditors whose claims total at least $5,000

(d) Does **not** require the debtor to show that the debtor's liabilities exceed the fair market value of assets

2. CPA QUESTION Decal Corp. incurred substantial operating losses for the past three years. Unable to meet its current obligations, Decal filed a petition of reorganization under Chapter 11 of the federal Bankruptcy Code. Which of the following statements is correct?

(a) A creditors' committee, if appointed, will consist of unsecured creditors.

(b) The court must appoint a trustee to manage Decal's affairs.

(c) Decal may continue in business only with the approval of a trustee.

(d) The creditors' committee must select a trustee to manage Decal's affairs.

3. CPA QUESTION Unger owes a total of $50,000 to eight unsecured creditors and one fully secured creditor. Quincy is one of the unsecured creditors and is owed $6,000. Quincy has filed a petition against Unger under the liquidation provisions of Chapter 7 of the federal Bankruptcy Code. Unger has been unable to pay debts as

they become due. Unger's liabilities exceed Unger's assets. Unger has filed papers opposing the bankruptcy petition. Which of the following statements regarding Quincy's petition is correct?

(a) It will be dismissed because the secured creditor failed to join in the filing of the petition.

(b) It will be dismissed because three unsecured creditors must join in the filing of the petition.

(c) It will be granted because Unger's liabilities exceed Unger's assets.

(d) It will be granted because Unger is unable to pay Unger's debts as they become due.

4. Dale is in bankruptcy proceedings under Chapter 13. Which of the following statements is true?

(a) His debtors must have filed an involuntary petition.

(b) His unsecured creditors will be worse off than if he had filed under Chapter 7.

(c) All of his debts are discharged as soon as the court approves his plan.

(d) His creditors have an opportunity to voice objections to his plan.

5. Grass Co. is in bankruptcy proceedings under Chapter 11. _______ serves as trustee. In the case of _______ the court can approve a plan of reorganization over the objections of the creditors.

(a) The debtor in possession, a cramdown

(b) A person appointed by the U.S. Trustee, fraud

(c) The head of the creditors' committee, reaffirmation

(d) The U.S. Trustee, voidable preference

Essay Questions

1. James, the owner of an auto parts store, told his employee, Rickey, to clean and paint some tires in the basement. Highly flammable gasoline fumes accumulated in the poorly ventilated space. James threw a firecracker into the basement as a joke, intending only to startle Rickey. Sparks from the firecracker caused an explosion and fire that severely burned him. Rickey filed a personal injury suit against James for $1 million. Is this debt dischargeable under Chapter 7?

2. Mary Price went for a consultation about a surgical procedure to remove abdominal fat. When Robert Britton met with her, he wore a name tag that identified him as a doctor, and was addressed as "doctor" by the nurse. Britton then examined Price, touching her stomach and showing her where the incision would be made. It turned out that Britton was the office manager, not a doctor. Although a doctor actually performed the surgery on Price, Britton was present. It turned out that the doctor left a tube in Price's body at the site of the incision. The area became infected, requiring corrective surgery. A jury awarded Price $275,000 in damages in a suit against Britton. He subsequently filed a Chapter 7 bankruptcy petition. Is this judgment dischargeable in bankruptcy court?

3. **YOU BE THE JUDGE WRITING PROBLEM** Lydia D'Ettore received a degree in computer programming at the DeVry Institute of Technology, with a grade point average of 2.51. To finance her education, she borrowed $20,516.52 from a federal student loan program. After graduation, she could not find a job in her field, so she went to work as a clerk at an annual salary of $12,500. D'Ettore and her daughter lived with her parents free of charge. After setting aside $50 a month in savings and paying bills that included $233 for a new car (a Suzuki Samurai) and $50 for jewelry from Zales, her disposable income was $125 per month. D'Ettore asked the bankruptcy court to discharge the debts she owed DeVry for her education. Did the debts to the DeVry Institute impose an undue hardship on D'Ettore? **Argument for D'Ettore:** Lydia D'Ettore lives at home with her parents. Even so, her disposable income is a meager $125 a month. She would have to spend every single penny of her disposable income for nearly 15 years to pay back her $20,500 debt to DeVry. That would be an undue hardship. **Argument for the Creditors:** The U.S. government guaranteed D'Ettore's loan. Therefore, if the court discharges it, the American taxpayer will have to pay the bill. Why should taxpayers subsidize an irresponsible student? D'Ettore must also stop buying new cars and jewelry. And why should the government pay her debts while she saves money every month?

4. Dr. Ibrahim Khan caused an automobile accident in which a fellow physician, Dolly Yusufji, became a quadriplegic. Khan signed a contract for the lifetime support of Yusufji. When he refused to make payments under the contract, she sued him and obtained a judgment for $1,205,400. Khan filed a Chapter 11 petition. At the time of the bankruptcy hearing, five years after the accident, Khan had not paid Yusufji anything. She was dependent on a motorized wheelchair; he drove a Rolls-Royce. Is Khan's debt dischargeable under Chapter 11?

5. After filing for bankruptcy, Yvonne Brown sought permission of the court to reaffirm a $6,000 debt to her credit union. The debt was unsecured, and she was under no obligation to pay it. The credit union had published the following notice in its newsletter:

   > If you are thinking about filing bankruptcy, THINK about the long-term implications. This action, filing bankruptcy, closes the door on TOMORROW. Having no credit means no ability to purchase cars, houses, credit cards. Look into the future—no loans for the education of your children.

   Should the court approve Brown's reaffirmation?

DISCUSSION QUESTIONS

1. **ETHICS** On November 5, Hawes, Inc., a small subcontractor, opened an account with Basic Corp., a supplier of construction materials. Hawes promised to pay its bills within 30 days of purchase. Although Hawes purchased a substantial quantity of goods on credit from Basic, it made few payments on the accounts until the following March, when it paid Basic over $21,000. On May 14, Hawes filed a voluntary petition under Chapter 7. Does the bankruptcy trustee have a right to recover this payment? Is it fair to Hawes's other creditors if Basic is allowed to keep the $21,000 payment?

2. Look on the web for your state's rules on exempt property. Compared with other states and the federal government, is your state generous or stingy with exemptions?

In considering a new bankruptcy statute, Congress struggled mightily over whether or not to permit state exemptions at all. Is it fair for exemptions to vary by state? Why should someone in one state fare better than his her neighbor across the state line?

3. Some states permit debtors an unlimited exemption on their homes. Is it fair for bankrupts to be allowed to keep multimillion dollar homes while their creditors remain unpaid? But other states allow as little as $5,000. Should bankrupts be thrown out on the street? What amount is fair?

4. What about the rules regarding repeated bankruptcy filings? Debtors cannot obtain a discharge under Chapter 7 within eight years of a prior filing. Under Chapter 13, no discharge is available within four years of a prior Chapter 7 or 11 filing and within two years of a prior Chapter 13 filing. Are these rules too onerous, too lenient, or just right?

5. A bankrupt who owns a house has the option of either paying the mortgage or losing his home. The only advantage of bankruptcy is that his debt to the bank is discharged. The U.S. House of Representatives passed a bill permitting a bankruptcy judge to adjust the terms of mortgages to aid debtors in holding onto their houses. Proponents argued that this change in the law would reduce foreclosures and stabilize the national housing market. Opponents said that it was not fair to reward homeowners for being irresponsible. How would you vote if you were in the Senate?

6. In the *Grisham* case, the debtor had virtually no income but owed about $200,000 in debts that could not be discharged. What kind of fresh start is that? Should limits be placed on the total debt that cannot be discharged? Is the list of non-dischargeable debts appropriate?

Government Regulation

CHAPTER 38

ANTITRUST

© Werner H. Kunz/Flickr/Getty

On his way into Sleepy Time to buy a mattress for his new king-size bed, Sean noticed that Girl Scout Troop 1474 was selling cookies. There was nothing he liked more than Thin Mint cookies mixed into vanilla ice cream, and $3 a box seemed like a reasonable price. But he decided to focus on the task at hand and buy the mattress first. After much lying down on pocketed coils, pillowtops, and memory foam, he ultimately decided on a Tempur-Pedic made out of visco-elastic, temperature-sensitive material. Wouldn't that be bliss?

But Sean was no fool. He knew that the country was in the midst of a raging recession (or was it a depression?) and that retail stores were desperate for customers. He figured he could negotiate a handsome discount from the list price of $2,399. But when he asked Gavin, the sales guy, what his best price was, Gavin just shrugged, a hangdog expression on his face. "I'm on commission and would love to sell you a mattress, but Tempur-Pedic won't let us offer any discounts. If they found out I'd reduced the price, they'd yank those mattresses out of my store so fast, even the dust mites couldn't keep up. The price is $2,399 or nothing." He lowered his voice. "In the old days, manufacturers couldn't do that, but our company lawyer made this big deal about how the Supreme Court has changed antitrust law and made this kind of price fixing legal. They call it 'resale price maintenance' or something like that. Anyway, our hands are tied."

"If they found out I'd reduced the price, they'd yank those mattresses out of my store so fast, even the dust mites couldn't keep up."

That was a stiff price for a soft mattress, so Sean decided he would shop around. By now he was hungry, and it was cold and dark outside, so he was eager at the thought of Girl Scout cookies. But Troop 1474 had gone home. It seemed as if this was just not his day.

His mood lifted, though, when he stopped at Video Horizons and noticed a different Girl Scout troop selling cookies. That was until he noticed the price was $4 a box. "Why the price gouging?" he demanded grouchily. One of the girls spoke up reluctantly, "When I was studying for my Law and Order badge, I found out that it's a violation of antitrust law for Girl Scout councils to get together and agree on the prices their troops will charge. Each council has to decide its own price. We hear that Cambridge is charging $3, but in Winchester, it's $4."

Gavin the sales guy says that manufacturers can set the price for mattresses, but the Girl Scouts claim their councils do not have the right to agree on the cost of a box of cookies. Who is right? Are there different laws for cookies and mattresses?

Both the Girl Scouts and Gavin are correct in their interpretation of the law. They are each talking about a different type of price fixing. The sale of these mattresses involves *vertical price fixing*, so called because the manufacturer and the store are at different stages of the production process. Thus, they do not compete against each other, and that type of price fixing is generally legal. No matter how hard Sean looks, he is not likely to find a cheaper price on the mattress he wants. But *horizontal price fixing*—which involves agreements among competitors—is *automatically* illegal. The Girl Scout councils are competitors, so they are prohibited from agreeing among themselves what price they all will charge. If the consumer wants to save $1 a box on cookies, all he has to do is drive from Cambridge to Winchester.

Competition is an essential element of the American economic system. Antitrust laws are the rules that govern that competition. As this chapter opening illustrates, these laws affect many aspects of our lives—both as consumers and as businesspeople.

In The Beginning

Throughout much of the 19th century, competition in America was largely a local affair. The country was so big and transportation so poor that companies primarily competed in small local markets. It was too costly to transport goods great distances. State laws, rather than national statutes, regulated competition.

By the second half of the 19th century, four railroad lines crossed the continent from coast to coast. For the first time, national markets were a real possibility. John D. Rockefeller saw the potential. In 1859, Edwin L. Drake, a retired railroad conductor, drilled the first commercially successful oil well in the United States. Three years later, when the 23-year-old Rockefeller entered the scene, the oil industry was full of producers too small to benefit from economies of scale. Production was inefficient, and prices varied dramatically in different parts of the country.

Rockefeller set out to reorganize the industry. He began by buying refineries, first in Cleveland and then in other cities. He and his partners spread into all segments of the oil industry—buying oil fields, building pipelines, and establishing an efficient marketing system. To unify the management of these companies, they transferred their stock to the Standard Oil Trust. By 1870, Rockefeller had achieved his goal—the Standard Oil Trust controlled virtually all the oil in the country, from producer to consumer. At age 31, Rockefeller was the wealthiest person in the *world*.

Some of Rockefeller's tactics were controversial. When a competitor tried to build an oil pipeline, Rockefeller used every weapon short of violence to stop it. He planted stories in the press suggesting the pipes would leak and ruin nearby fields. He flooded local builders with orders for tank cars so no workers would be available to build the pipeline. When the pipeline was finished, he refused to allow his oil to flow through it. These tactics were frightening, especially in an industry as important as oil. What if Rockefeller decided to raise prices unfairly? Or cut off oil altogether? Newspapers began to attack him ferociously.

Sherman Act

With the coming of the railroads, it became clear that large companies might be able to control other industries as well. To prevent extreme concentrations of economic power, Congress passed the **Sherman Act** in 1890. It was one of the first national laws designed to regulate competition. Because this statute was aimed at the Standard Oil Trust and other similar organizations, it was termed **antitrust** legislation. In 1892, the Ohio Supreme Court

dissolved the Standard Oil Trust, which was replaced by the Standard Oil Co. But the government was not satisfied until a spring day in 1911, when Supreme Court Chief Justice Edward White quietly read aloud his dramatic 20,000-word opinion ordering the breakup of Standard Oil.[1] The 33 companies that made up Standard Oil were forced to compete as separate businesses. Today, descendants of Standard Oil include Atlantic Richfield, Chevron, Exxon-Mobil, Pennzoil, and parts of British Petroleum (BP). Imagine what kind of giant they would be if still united.

For the first 70 or so years after the passage of the Sherman Act, most scholars and judges took the view that large concentrations of economic power were suspect, even if they had no obvious impact on competition itself. Big was bad—it meant too much economic and political power. As Sen. John Sherman, sponsor of the Sherman Act, put it, a nation that "would not submit to an emperor should not submit to an autocrat of trade." Fragmented, competitive markets were desirable in and of themselves. Standard Oil should not control the oil markets even if the company was very efficient and had gained control by completely acceptable methods.

Chicago School

Beginning in the 1960s and 1970s, however, a group of influential economists and lawyers at the University of Chicago began to argue that the goal of antitrust enforcement should be *efficiency*. Let a company grow as large as it likes, provided that this growth is based on a superior product or lower costs, not ruthless tactics. Insist on a clean fight, but do not handicap large successful companies to help weaker competitors. Some companies will thrive, others will die, but in either case, the consumer will come out ahead. Adherents of the **Chicago School** argued further that the *market* should decide the most efficient size for each industry. In some cases, such as automobiles or aircrafts, the most efficient size might be very large indeed. Under traditional antitrust analysis, courts often asked, "Has a competitor been harmed?" The Chicago School suggests that courts should ask instead, "Has *competition* been harmed?"

At the turn of the 20th century, President Theodore Roosevelt personally plotted the breakup of Standard Oil. (As one of Rockefeller's compatriots said of Roosevelt, "We bought the son of a bitch, and then he didn't stay bought.") At the turn of the 21st century, two descendants of Standard Oil—Exxon and Mobil—announced their intention to merge. This time, not one politician so much as grabbed a microphone to object to the recombination. Where once size alone was cause for concern, now regulators believe that a certain bulk may be necessary if American companies are to compete in the intense global economy.

Antitrust policy, however, continues to evolve. Adherents of the so-called **Post Chicago School** are beginning to recognize that competition alone may not be enough to protect consumers. For example, an industry with a large number of competitors may foster collusion, not competition. Or, activities that appear consumer-friendly, such as giving a product away for free, may in the long run harm consumers. (Take, for example, Microsoft's decision to give away its Internet browser. Although consumers benefited in the short run, the Justice Department alleged that this giveaway harmed consumers by driving competitors out of business.) Now, when deciding whether to take action, federal trustbusters are beginning to focus directly on consumers, asking two questions:

- Will this action cause consumers to pay higher prices?
- Are the higher prices sustainable in the face of existing competition?

[1] *Standard Oil Company of New Jersey v. United States*, 221 U.S. 1, 31 S. Ct. 502, 1911 U.S. LEXIS 1725 (1911).

As you read the cases in this chapter, think about which factors the court considers important: size, competition, or the impact on consumers.

Overview of Antitrust Laws

The major provisions of the antitrust laws are:

- Section 1 of the Sherman Act prohibits all agreements "in restraint of trade."
- Section 2 of the Sherman Act bans "monopolization"—the wrongful acquisition of a monopoly.
- The Clayton Act prohibits anticompetitive mergers, tying arrangements, and exclusive dealing agreements.
- The Robinson-Patman Act bans price discrimination that reduces competition.

In 1914, Congress passed the **Clayton Act** in part because the courts were not enforcing the Sherman Act as strictly as it had intended. The purpose of the Clayton Act was to clarify the earlier statute. As a result, the two laws overlap significantly. The **Robinson-Patman Act** (passed in 1936) is an amendment to the Clayton Act. Rather than systematically reviewing the terms of each statute in order, this chapter focuses instead on the *kinds of behavior* that the antitrust laws regulate.

Violations of the antitrust laws are divided into two categories: ***per se*** and **rule of reason.** As the name implies, ***per se*** **violations** are automatic. Defendants charged with this type of violation cannot defend themselves by saying, "But the impact wasn't so bad" or "No one was hurt." The court will not listen to excuses, and the defendants are subject to both *criminal* and *civil* penalties. Typically, the Justice Department has sought criminal sanctions only against *per se* violators.

***Per se* violation**
An automatic breach of antitrust laws.

Rule of reason violation
An action that breaches antitrust laws only if it has an anticompetitive impact.

Rule of reason violations, on the other hand, are illegal only if they have an anticompetitive *impact*. To determine if an activity is an unreasonable restraint of trade, the courts consider its circumstances, intent, and impact. For example, if competitors join together and agree that they will not deal with a particular supplier, their action is illegal only if it harms competition. Although rule of reason violators may be subject to civil penalties or private lawsuits, traditionally the Justice Department has not sought criminal penalties against them.

Both the Justice Department and the Federal Trade Commission (FTC) have authority to enforce the antitrust laws. However, only the Justice Department can bring criminal proceedings; the FTC is limited to civil injunctions and other administrative remedies. In addition to the government, anyone injured by an antitrust violation has the right to sue for damages. The United States is unusual in this regard—in most other countries, only the government is able to sue antitrust violators. A successful plaintiff can recover treble (that is, triple) damages from the defendant.

Another important point before we begin our discussion of particular antitrust provisions: **any conduct *overseas* that has an anticompetitive impact in the United States is a violation of U.S. law** provided that (1) the foreign actor *intended* to affect the U.S. market, and (2) the foreign conduct has a *direct and substantial effect* on the U.S. market. For example, the Justice Department indicted two Japanese businessmen because they met in Japan to fix the price of fax paper sold to an American company.

In developing a competitive strategy, managers typically consider two different approaches:

- Cooperative strategies that allow companies to work together to their mutual advantage
- Aggressive strategies, designed to create an advantage over competitors

COOPERATIVE STRATEGIES

Three types of cooperative strategies are potentially illegal:

Horizontal agreement
An agreement among competitors.

Vertical agreements
An agreement among participants operating at different stages of the production process.

- **Horizontal agreements** among competitors. An agreement between Levi Strauss and Wrangler—both manufacturers of denim jeans—would be a horizontal agreement. So would the agreement among the Girl Scout councils in the opening scenario.
- **Vertical agreements** among participants at different stages of the production process. An agreement between Levi Strauss and Macy's—one company makes jeans, the other sells them—would be a vertical agreement. So would an agreement between a mattress manufacturer and Sleepy Time.
- **Mergers and joint ventures** among competitors. Here, companies go beyond simple agreements to combine forces more permanently.

The following table lists the cooperative strategies that will be discussed in this chapter:

Horizontal Strategies	Vertical Strategies	Mergers
Market division	Reciprocal dealing	Horizontal mergers
Price fixing	Price discrimination	Vertical mergers
Bid rigging		Joint ventures
Refusal to deal		

Horizontal Cooperative Strategies

Although the term "cooperative strategies" *sounds* benign, these tactics can be harmful to competition. Indeed, many horizontal cooperative strategies are *per se* violations of the law and can lead to prison terms, heavy fines, and expensive lawsuits with customers and competitors.

Market Division

Any effort by a group of competitors to divide its market is a *per se* violation of §1 of the Sherman Act. Illegal arrangements include agreements to allocate customers, territory, or products. For example, these business schools would be in violation if:

- Georgetown agreed to accept only men and, in return, George Washington would take only women;[2]
- Stanford agreed to accept only students from west of the Mississippi, leaving the east to Yale; or
- Northwestern agreed not to provide courses in entrepreneurship, while the University of Chicago eliminated its international offerings.

[2]This, of course, does not mean that all single-sex schools are violating the antitrust laws. They are in violation only if their admissions policy results from an agreement with competitors.

Price Fixing and Bid Rigging

When competitors agree on the prices at which they will buy or sell products or services, their price fixing is a *per se* violation of Section 1 of the Sherman Act. Bid rigging is also a *per se* violation. In bid rigging, competitors eliminate price competition by agreeing on who will submit the lowest bid.

In the following Landmark Case, the defendants argued that price fixing was wrong only if the prices were *unfair*. Did the Supreme Court agree?

Landmark Case

UNITED STATES v. TRENTON POTTERIES COMPANY

273 U.S. 392; 1927 U.S. LEXIS 975
Supreme Court of the United States, 1927

Facts: This case involved dirty behavior in the bathroom fixture business. The federal government alleged 23 of the corporations that manufactured these fixtures had agreed on the prices they would charge their customers. The defendants argued that they had not violated the law because their prices had been reasonable.

They were found guilty at trial, but the appeals court overturned their convictions. The Supreme Court granted *certiorari*.

Issue: ***Is price fixing a violation of the law if the prices are reasonable?***

Excerpts from Justice Stone's Decision: The trial court refused various requests to charge [the jury] that the agreement[s] to fix prices, if found, did not in themselves constitute violations of law unless it was also found that they unreasonably restrained interstate commerce.

Our view of what is a reasonable restraint of commerce is controlled by the recognized purpose of the Sherman Law itself. Whether this type of restraint is reasonable or not must be judged in part at least in the light of its effect on competition, for whatever difference of opinion there may be among economists as to the social and economic desirability of an unrestrained competitive system, it cannot be doubted that the Sherman Law and the judicial decisions interpreting it are based upon the assumption that the public interest is best protected from the evils of monopoly and price control by the maintenance of competition. The aim and result of every price-fixing agreement, if effective, is the elimination of one form of competition.

The power to fix prices, whether reasonably exercised or not, involves power to control the market and to fix arbitrary and unreasonable prices. The reasonable price fixed today may through economic and business changes become the unreasonable price of tomorrow. Once established, it may be maintained unchanged because of the absence of competition secured by the agreement for a price reasonable when fixed. Agreements which create such potential power may well be held to be in themselves unreasonable or unlawful restraints, without the necessity of minute inquiry whether a particular price is reasonable or unreasonable as fixed and without placing on the government in enforcing the Sherman Law the burden of ascertaining from day to day whether it has become unreasonable through the mere variation of economic conditions.

Moreover, in the absence of express legislation requiring it, we should hesitate to adopt a construction making the difference between legal and illegal conduct in the field of business relations depend upon so uncertain a test as whether prices are reasonable—a determination which can be satisfactorily made only after a complete survey of our economic organization and a choice between rival philosophies. Thus viewed, the Sherman law is not only a prohibition against the infliction of a particular type of public injury. It is a limitation of rights which may be pushed to evil consequences and therefore restrained.

It follows that the judgment of the circuit court of appeals must be reversed and the judgment of the district court reinstated.

Reversed.

The Supreme Court has referred to this type of collusion as "the supreme evil of antitrust," and it has been illegal for the better part of a century.[3] But it never seems to go away. Here are some examples:

- Using a computer to analyze the bids that schools received on their milk contracts, the Florida attorney-general uncovered a pervasive price-fixing scheme. Forty-three companies were convicted or pleaded guilty; two dozen individuals went to prison. Companies paid fines in excess of $90 million.
- Colleges were concerned about the cost of their athletic programs. In particular, the cost of the coaching staffs seemed out of control. In response, NCAA schools (that is, members of the National Collegiate Athletic Association) agreed to cap the salaries of assistant coaches. But a court blew the whistle, finding that the NCAA had engaged in illegal price fixing. A jury awarded the coaches $66 million.
- Samsung Electronics Co. paid a $300 million fine for having conspired to fix the prices of computer chips. Other companies engaged in the conspiracy have paid $346 million in fines. These fines were topped by that paid by pharmaceutical company F. Hoffmann–La Roche—$500 million for conspiring to fix the prices of vitamins. Executives went to prison for their roles in these conspiracies.

In these cases, the Justice Department found hard evidence of an illegal agreement. But what if there is only *circumstantial* evidence? Suppose competitors just happen to charge the same prices. If competitors act in concert but without an explicit agreement, their behavior is called **conscious parallelism.** As the following case illustrates, **conscious parallelism is illegal only if plus factors are present.** Plus factors include:

Conscious parallelism
When competitors who do not have an explicit agreement nonetheless all make the same competitive decisions.

- A motive to conspire
- A high level of communication among firms

Fears v. Wilhelmina Model Agency, Inc.

2004 U.S. DIST. LEXIS 4502
United States District Court for the Southern District of New York, 2004

Facts: A group of models sued some of the top agencies in New York, alleging that these firms had violated §1 of the Sherman Act by conspiring to fix the commissions that they charged the models for placing them. The agencies were all members of the International Model Managers Association, Inc. (IMMA).

Under New York law, *employment* agencies could not charge a commission of more than 10 percent, but *management* agencies could. All agencies that were members of IMMA changed their state registration from employment agency to management agency and then raised their standard commission to 20 percent. Several of the agencies used identical language in their contracts, specifying that they were personal managers, not employment agencies. At IMMA meetings, executives at various agencies announced that they were raising their commissions to 20 percent. One executive stated, "We are all committing suicide, if we do not stick together..."

Executives at the agencies admitted that they knew instantly every time an agency raised prices. One executive stated, "The more uniformity in the prices, the more I think it was—it was something that you could then compete on the quality of your models on the service, and not just on—on rates, you know. So we were always favorable to letting everyone know as much as possible about—about our pricing policies."

The models also presented memoranda from the agencies, stating:

[3] *Verizon Communs., Inc. v. Trinko, LLP*, 540 U.S. 398 (S.Ct. 2004).

- "IMMA should send out a letter stating that we plan on pursuing a 1-1/2 percent finance charge on clients who pay after 30 days in lieu of increasing our service charge."
- The commission would increase from 15 to 20 percent, and "all other agencies will go along with this increase. Please inform your clients accordingly so that there is no misunderstanding."
- "Pauline's agreed with me but as usual, Bill Weinberg cautioned me about price fixing … Ha! Ha! Ha! … the usual bulls–t! I warned him that by not sticking together, we would have to make 40 percent more volume in order to make the same figures as last year, but you know Bill, he always thinks he can get more if he acts that way."

IMMA minutes reported that members had adopted uniform schedules for the Christmas holiday. In addition, the agencies agreed to operate "ethically," by which they meant that they would not try to hire models from other agencies. A letter to all members of IMMA reported that one agency had broken this rule by hiring model Michele Weweje.

The agencies admitted that they had engaged in parallel behavior, but they argued that these activities were not sufficient to support a charge of illegal price fixing. The agencies moved for summary judgment.

© MATTEO BAZZI / EPA /Landov

Michele Weweje's agency violated the rules–but were the rules legal?

Issues: ***Did the modeling agencies engage in illegal price fixing? Is parallel behavior illegal?***

Excerpts from Judge Baer's Decision: To be sure, business behavior is admissible circumstantial evidence from which the factfinder may infer agreement. But this Court has never held that proof of parallel business behavior conclusively establishes agreement or, phrased differently, that such behavior itself constitutes a Sherman Act offense. Because parallel activity may be equally suggestive of independent conduct, plaintiffs offering parallel conduct as evidence of an antitrust conspiracy must demonstrate additional circumstances, often referred to as "plus factors," which provide a supplemental basis to infer a conspiracy. Among recognized plus factors, two in particular have received significant exposure in case law, both of which have a strong presence in this case—a motive to conspire and a high level of inter-firm communication.

With regard to the first plus factor, there is no question that defendants possessed a common rational motive to conspire—the ability to raise models' commissions without suffering loss of business.

[As for the second plus factor,] I find that the extensive evidence of agreements between IMMA members, on various components of their businesses, such as client service fees, holiday closing schedules, cancellation policies, and penalties borne by management companies who attract models from competitors, may reasonably be inferred to demonstrate an industry inundated with collusion.

Plaintiffs have established that all defendants who were members of IMMA, and therefore participated in or were privy to the conversations and agreements discussed above, had a unity of purpose or a common design and understanding, or a meeting of minds in an unlawful arrangement. [Therefore, the court denies the agencies' motion for summary judgment.]

Refusals to Deal

Every company generally has the right to decide with whom it will or will not do business. **However, a refusal to deal is a rule of reason violation of the Sherman Act, and illegal if it harms competition.** In a **refusal to deal,** a group of competitors boycotts a buyer, supplier, or

even another competitor. For example, a group of clothing manufacturers agreed that they would not sell apparel to retailers who also bought from style pirates—companies that copied the manufacturers' designs. The Supreme Court held that this was an illegal refusal to deal because it was harming competition.[4]

EXAM Strategy

Question: Lawyers who were paid by the state to represent poor clients in Washington, D.C., agreed among themselves not to accept any new cases until their fees were raised to the level they had agreed upon. Have the lawyers violated the Sherman Act? If so, what kind of violation is it?

Strategy: This is a trick question because the lawyers committed not one, but two violations of the Sherman Act. Remember, too, that there are two types of Sherman Act violations—rule of reason and *per se.*

Result: First, the attorneys were fixing prices—they agreed together on their fees. Price fixing is a *per se* violation and therefore automatically illegal. In addition, they engaged in a refusal to deal. This is a rule of reason violation, which is illegal only if it harms competition.

Vertical Cooperative Strategies

Vertical cooperative strategies are agreements among participants at different stages of the production process.

Reciprocal Dealing Agreements

Under a reciprocal dealing agreement, a buyer refuses to purchase goods from a supplier unless the supplier also purchases items from the buyer. Imagine that you are in the business of processing beets into sugar. During this process, it is easy to separate the seeds, which can then be used to grow more beets. Why not suggest to your beet suppliers that they buy their seeds from you? Why not further suggest that if *they* are not willing, you will find other suppliers who are?[5]

You are proposing a reciprocal dealing agreement. In the past, such arrangements were common. Many major corporations even kept records of purchases, sales, and "balance of trade" with other companies. Although these arrangements might have made *business* sense, the government took the view that they were also *rule of reason* violations of the Sherman Act; that is, they were illegal if they had an anticompetitive effect. The government brought suit against several companies, including a beet processor. It also halted a number of mergers that might have resulted in internal reciprocal arrangements. In recent years, however, the government has brought few of these cases. Reciprocal dealing agreements today are likely to be a problem only if they foreclose a *significant share* of the market and if the participants *agree* not to buy from others.

---

[4] *Fashion Originators' Guild of America, Inc. v. Federal Trade Commission*, 312 U.S. 457, 1941 U.S. LEXIS 1318 (1941).

[5] See *Betaseed, Inc. v. U & I, Inc.*, 681 F.2d 1203, 1982 U.S. App. LEXIS 17190 (9th Cir. 1982).

Price Discrimination

Under the Robinson-Patman Act, it is illegal to charge different prices to different purchasers if:

- The items are the same, and
- The price discrimination lessens competition.

However, it is legal to charge a lower price to a particular buyer if:

- The costs of serving this buyer are lower, or
- The seller is simply meeting competition.

Congress passed the Robinson-Patman Act (RPA) in 1936 to prevent large chains from driving small, local stores out of business. Owners of these "Ma and Pa stores" complained that the large chains could sell goods cheaper because suppliers charged them lower prices. As a result of the RPA, managers who would otherwise like to develop different pricing strategies for specific customers or regions may hesitate to do so for fear of violating this statute. In reality, however, they have little to fear.

Under the RPA, a plaintiff must prove that price discrimination occurred and that it lessened competition. It is now perfectly permissible, for example, for a supplier to sell at a different price to its Texas and California distributors, or to its health care and educational distributors, so long as the distributors are not in competition with each other.

The RPA also expressly permits price variations that are based on differences in cost. Thus Kosmo's Kitchen would be perfectly within its legal rights to sell its frozen cheese enchiladas to Giant at a lower price than to Corner Grocery if Kosmo's costs are lower to do so. Giant often buys shipments the size of railroad containers that cost less to deliver than smaller boxes.

The federal government seems to have little interest in enforcing the RPA. Some federal officials have even urged that the RPA be repealed to prevent it from interfering with the smooth operation of the market. This fade-out of government action has left enforcement in the hands of individual plaintiffs, but these cases are receiving little encouragement from the courts.

The Supreme Court has, for instance, made it much more difficult for plaintiffs to win damages in price discrimination cases. Chrysler Motors charged the J. Truett Payne dealership more than other car dealers in Birmingham, Alabama. Unable to compete, Payne went out of business. The accepted formula for determining damages in an RPA case *had been* the difference between the two prices multiplied by the number of units purchased. These numbers were easy to calculate. However, in *Payne*, the Supreme Court held that it is not enough to prove that competitors are able to buy at a lower cost. The plaintiff must also show that these competitors passed their savings on to customers and, as a result, the plaintiff lost profits.[6] These are difficult facts to prove. As a result of cases such as this, antitrust lawyers sometimes advise their clients not to worry too much about price discrimination suits because dissatisfied customers will usually not seek damages in court but will instead try to negotiate a better price.

In the following case, a food fight broke out. Will the court intervene?

[6] *J. Truett Payne Co., Inc. v. Chrysler Motors Corp.*, 451 U.S. 557, 1981 U.S. LEXIS 49 (1981).

You be the Judge

Feesers, Inc. v. Michael Foods, Inc.

591 F.3d 191, 2010 U.S. App. Lexis 337
United States Court of Appeals for the Third Circuit, 2010

Facts: This case is about food that is served in institutions such as schools, hospitals, and nursing homes, likely including institutions in which you have eaten. Michael Foods was the nation's largest producer of a product unappetizingly referred to as "liquid eggs." It sold its egg products and potatoes to (1) distributors who simply resold the food to "self-ops" (who prepared it themselves in-house) and (2) food service management companies that bought, prepared, and also served food in institutions. Feesers, Inc. distributed food to self-ops within a 200-mile radius of Harrisburg, Pennsylvania, while Sodexo, Inc. was a food service management company that served institutions worldwide. (Sodexo was the largest private purchaser of food in the world.) Both Feesers and Sodexo bought products from Michael's.

Institutions sometimes switched back and forth between preparing food themselves and hiring a food service management company to do it. Feesers and Sodexo competed against each other when a customer considered switching from self-op to food service management, or vice versa.

Michael's sold its products to Feesers at prices that were as much as 59 percent higher than those it charged Sodexo. Indeed, when courting customers, Sodexo touted its access to discounted food. However, when customers made a decision to hire Sodexo, they did not know the exact prices of food because they were buying the whole service package.

Feesers alleged that Michael's discounts to Sodexo violated the RPA. The trial court found for Feesers. Michael's appealed.

You Be the Judge: ***Did Michael's engage in illegal price discrimination?***

Argument for Feesers: The behavior in this case is exactly why Congress passed the RPA. Because a multinational company is able to buy its products cheaper, it obtains a huge competitive advantage over a smaller, local distributor. This unfair advantage enables Sodexo to take customers away from Feesers.

In marketing its product, Sodexo brags that its food prices are lower. Although our customers may not know the exact cost of eggs and potatoes, they do know that Sodexo's prices are lower. That gives Sodexo an unfair competitive advantage.

Argument for Michael's: Although Feesers and Sodexo both buy food from Michael's, they are not competitors. Sodexo handles all dining services for its customers; supplying food is only a small part. Feesers just distributes food. No one would choose the full service option because of lower prices on eggs and potatoes.

The competition between Feesers and Sodexo occurs *before* they buy any food from Michael's. When customers consider switching from self-op to food service management, or vice versa, their decision is not based on the price of a limited number of food items. Indeed, they have no idea what they would be paying for eggs or potatoes at Sodexo. If an institution chooses to self-operate, Sodexo is eliminated from the competition, and if an institution chooses the full food service route, then Feesers cannot compete. Only after the winner of that competition is chosen does the customer actually pay, directly or indirectly, for any food from Michael's.

Even if Feesers and Sodexo did compete, there is no evidence that *competition* has been harmed. As we saw in the *Truett Payne* case, to win here, Feesers must show a connection between lower prices and injury to competition. That evidence is missing.

Mergers and Joint Ventures

The Clayton Act prohibits mergers that are anticompetitive. Companies with substantial assets must notify the FTC *before* consummating a merger.[7] This notification gives the government an opportunity to prevent a merger ahead of time rather than trying to untangle one after the fact.

[7] Under an amendment called Hart-Scott-Rodino, a transaction must be reported if it involves assets of $66 million or higher, or if one party has assets or net revenues of $131.9 million or higher and the other party has at least $13.2 million in assets or net revenues. The FTC adjusts these figures annually for inflation.

Horizontal Mergers

A horizontal merger involves companies that compete in the same market. Traditionally, the government has aggressively sought to prevent horizontal mergers that could lead to a monopoly or even a highly concentrated industry. In the *Von's Grocery* case, decided in 1966, the Supreme Court upheld the Justice Department in its suit to prevent the merger of two grocery chains that represented only 7.5 percent of the grocery market in Los Angeles.[8] Compare that decision with the following landmark case, decided almost 20 years later.

Landmark Case

UNITED STATES v. WASTE MANAGEMENT, INC.

743 F.2d 976, 1984 U.S. App. LEXIS 18843
United States Court of Appeals for the Second Circuit, 1984

Facts: Waste Management, Inc. (WMI) acquired Texas Industrial Disposal, Inc. (TIDI). Both companies were in the trash collection business. In Dallas, their combined market share was 48.8 percent. The trial court held that the merger was illegal and ordered WMI to divest itself of TIDI.

Issue: ***Did WMI violate the Clayton Act by acquiring TIDI?***

Excerpts from Judge Winter's Decision: A post-merger market share of 48.8 percent is sufficient to establish *prima facie* illegality under *United States v. Philadelphia National Bank* and its progeny. That decision held that large market shares are a convenient proxy for appraising the danger of monopoly power resulting from a horizontal merger. Under its rationale, a merger resulting in a large market share is presumptively illegal, rebuttable only by a demonstration that the merger will not have anticompetitive effects.

[In the present case, the *Philadelphia National Bank*] presumption is rebutted by the fact that competitors can enter the Dallas waste hauling market with such ease. WMI argues that it is unable to raise prices over the competitive level because new firms would quickly enter the market and undercut them. A person wanting to start in the trash collection business can acquire a truck, a few containers, drive the truck himself, and operate out of his home. A great deal depends on the individual's personal initiative, and whether he has the desire and energy to perform a high quality of service. If he measures up well by these standards, he can compete successfully with any other company for a portion of the trade, even though a small portion. Over the last 10 years or so, a number of companies have started in the commercial trash collection business.

We conclude that the 48.8 percent market share attributed to WMI does not accurately reflect future market power. Since that power is in fact insubstantial, the merger does not, therefore, substantially lessen competition in the relevant market and does not violate the [Clayton Act].

Traditionally, market share was the most important factor in evaluating mergers. As *Waste Management* indicates, however, market share is no longer the major issue in merger cases. The government and the courts now also consider how the merger will affect competition and consumers. Thus the government cleared a merger between aircraft giants Boeing and McDonnell Douglas, which together had a virtual monopoly on the American aircraft business. But the aircraft market is global, and American companies faced severe competition from Europe's Airbus consortium. Therefore, the government believed that the merger would not harm competition.

[8] *United States v. Von's Grocery Co.*, 384 U.S. 270, 1966 U.S. LEXIS 2823 (1966).

Conversely, the FTC blocked the merger of office supply giants Staples, Inc., and Office Depot. Nationally, these two retailers controlled only 4 percent of the market for office supplies. Was the FTC harking back to the days of *Von's Grocery*? Not exactly. The office superstores' *national* market share was relatively low because they had no stores at all in many areas of the country. Rather than national market share, the FTC focused instead on their ability to control prices *locally*. The agency found that, when both stores operated in the same market, prices were significantly lower than when only one store was present. Thus, a box of file folders cost $1.72 in Orlando, Florida (where both stores competed), and $4.17 in nearby Leesburg (where Office Depot had a monopoly). In the FTC's view, if the two stores combined, they would have had enough power in local markets to raise prices and harm consumers.

Vertical Mergers

A vertical merger involves companies at different stages of the production process—for example, when a producer of a final good acquires a supplier, or vice versa. If Staples bought a paper manufacturer, that would be a vertical merger. This type of merger can also be anticompetitive, especially if it reduces entry into a market by locking up an important supplier or a top distributor. However, the Justice Department's guidelines provide that it will challenge vertical mergers only if they are likely to increase entry barriers in a concentrated market.

Joint Ventures

A joint venture is a partnership for a limited purpose—the companies do not combine permanently, they simply work together on a specific project. The government will usually permit a joint venture, even between competitors with significant market power. The FTC approved, over strenuous objections from competitors, a joint venture between General Motors and Toyota to produce cars.

Aggressive Strategies

The goal of an aggressive strategy is to gain an unfair advantage over competitors.

Monopolization

Aggressive competition is beneficial for consumers—up until the moment a company develops enough power to control a market. One purpose of the Sherman Act is to prevent this type of control. **Under §2 of the act, it is illegal to monopolize or attempt to monopolize a market.** To monopolize means to acquire a monopoly in the wrong way. *Having* a monopoly is legal unless it is *gained* or *maintained* by using wrongful tactics.

To determine if a defendant has illegally monopolized, we must ask three questions:

- **What is the market?** Without knowing the market, it is impossible to determine if someone is controlling it.
- **Does the company control the market?** Without control, there is no monopoly.
- **How did the company acquire or maintain its control?** Monopolization is illegal only if gained or kept in the wrong way.

What Is the Market?

This question is not as easy to answer as it sounds. **The short answer is that if buyers view two products as close substitutes, then the items are in the same market.** The longer answer is that every product actually has two markets. The **product market**

consists of other *items* that a purchaser could buy; the **geographic market** is other *areas* where a purchase could be made.

Imagine that your company sells soft drinks in Smallville. These drinks have unusual food flavors—steak and cheese, among others. For some reason, you are the only company in that area that sells food-flavored soft drinks, so, by definition, you control 100 percent of the market. But is that the *relevant* market? Perhaps the relevant market is flavored drinks or soft drinks or all beverages. The question economists ask is: **How high can your prices rise before your buyers will switch to a different product?** (This concept is called *cross-elasticity of demand*.) If a price increase from $1 to $1.05 a bottle causes many of your customers to buy Coke instead, it is clear you are part of a larger market. Moreover, if changes in the prices of other drinks affect *your* sales, your products and theirs are probably close competitors. However, if you could raise your price to $5 per bottle and still hold on to many of your customers, then you might well be in your own market. **Likewise, the relevant geographic market is the area where buyers will go to buy your drink.** Thus, if you raise your prices in Smallville and then many of your customers begin buying your drinks at a lower price in Metropolis, both cities are in the same geographic market.

EXAM Strategy

Question: Ticketmaster sells tickets online to sports and entertainment events. RMG sued Ticketmaster, alleging that it was engaged in an illegal effort to monopolize national ticket sales. What was the relevant market?

Strategy: RMG had to define both a product market and a geographic market.

Result: If Ticketmaster raises the prices for NFL tickets in Miami, customers will probably not choose instead to buy seats to a Taylor Swift concert in Oakland, CA. Therefore, national ticket sales are not the relevant market. Rather, the markets are small and focused. The court dismissed RMG's monopolization claim because the company had defined the wrong market.

Does the Company Control the Market?

You have 100 percent of the food-flavored soft drink market (although only 1 percent of the overall soft drink market and an infinitesimal percentage of the total beverage market). Traditionally, courts considered a monopoly to be a share anywhere between 70 and 90 percent. However, under modern antitrust law, market share is not important if other competitors can enter the market anytime they want (or anytime you raise your prices or lower your quality). **No matter what your market share, you do not have a monopoly unless you can exclude competitors or control prices.** For example, the Justice Department sued a movie theater chain that possessed a 93 percent share of the box office in Las Vegas. But the court ruled against the Justice Department because the chain's market share decreased to 75 percent within three years. This decline indicated that the company did not control the market and that barriers to entry were low.[9]

[9] *United States v. Syufy Enterprises*, 903 F.2d 659, 1990 U.S. App. LEXIS 7396 (9th Cir. 1990).

© Ivan Cholakov Gostock-dot-net/Shutterstock.com

Because it was easy to enter the movie theater business in Las Vegas, the court found that even a chain with a 93 percent market share did not have a monopoly.

How Did the Company Acquire or Maintain Its Control?

Possessing a monopoly is not necessarily illegal; using *"bad acts"* to acquire or maintain one is. If the law prohibited the mere possession of a monopoly, it might discourage companies from producing excellent products or offering low prices. Anyone who can produce a better product cheaper is entitled to a monopoly. In your case, you have very cleverly developed a secret method for adding flavors to carbonated water. You also have an efficient factory and highly trained workers, so you can sell your drinks for 5¢ a bottle less than your competitors. If, in fact, you do have a monopoly, it is for all the right reasons. You have demonstrated exactly the kind of innovative, efficient behavior that benefits consumers. If you were sued for a violation of the antitrust laws, you would win.

Some companies use ruthless tactics to acquire or maintain a monopoly. It is these "bad acts" that render a monopoly illegal. In the past, the definition of bad acts was broad, and any company with a monopoly could be in violation unless it showed that, despite its best efforts to duck, a monopoly had been *thrust upon* it. In 1945, a famous judge, with the appropriate name of Learned Hand, found that Alcoa's monopoly in the aluminum industry was illegal because the company had repeatedly expanded capacity to anticipate demand.[10] In his view, the company should have waited to expand until demand actually existed. Alcoa was in violation because it could have easily *avoided* a monopoly—the monopoly had not been thrust upon it.

Everyone makes mistakes. Although Learned Hand is generally considered one of the greatest judges of his era, most commentators now believe that *Alcoa* was wrongly decided. *Berkey Photo* is a more typical modern case.[11] Berkey accused Eastman Kodak Co. of repeatedly and unnecessarily changing the size of its cameras to confound competitors who manufactured film to fit them. Although Learned Hand most likely would have found such actions to be illegal, the *Berkey* court rejected the view that monopolies are acceptable only if *thrust upon* the defendant and instead held that aggressive competitive strategies are legal even if they have the effect of hindering competitors. In finding Kodak not liable, the court reasoned that the company would not have repeatedly changed camera and film specifications if consumers had objected. The success or failure of Kodak's strategy ought to be determined in the market and not by the courts.

> Possessing a monopoly is not necessarily illegal; using "*bad acts*" to acquire or maintain one is.

Today, a typical bad act is sham litigation in which a competitor files baseless lawsuits for the sole purpose of harming competition. For example, to prevent Glitzy Restaurant

[10]*United States v. Aluminum Co. of America*, 148 F.2d 416, 1945 U.S. App. LEXIS 4091 (2d Cir. 1945). *Note:* Judge Hand's parents did not necessarily foresee his illustrious career when naming him. "Learned" was his mother's maiden name, and it was the tradition in his family to give the mother's name to one of the children.

[11]*Berkey Photo, Inc. v. Eastman Kodak Co.*, 603 F.2d 263, 1979 U.S. App. LEXIS 13692 (2d Cir. 1979).

from opening its doors, Family Eatery files a suit against Glitzy alleging that this potential competitor has violated Family's trademark, even though Family knows the allegation is not true. That lawsuit would be a bad act.

Predatory Pricing

Predatory pricing occurs when a company lowers its prices below cost to drive competitors out of business. Once the predator has the market to itself, it raises prices to make up lost profits—and more besides.

Recall that, under §2 of the Sherman Act, it is illegal "to monopolize" and also to "attempt to monopolize." Typically, the goal of a predatory pricing scheme is either to win control of a market or to maintain it. A ban on these schemes prevents monopolization and attempts to monopolize. To win a predatory pricing case, the plaintiff must prove three elements:

- The defendant is selling its products *below cost.*
- The defendant *intends* that the plaintiff go out of business.
- If the plaintiff does go out of business, the defendant will be able to earn sufficient profits to *recoup* its prior losses.

The classic example of predatory pricing is a large grocery store that comes into a small town offering exceptionally low prices subsidized by profits from its other branches. Once all the "Ma and Pa" corner groceries go out of business, MegaGrocery raises its prices to much higher levels.

Predatory pricing offers a good example of how attitudes toward antitrust laws have changed. Formerly, courts took predatory pricing very seriously. The term certainly *sounds* bad. But despite its name, courts generally are not as concerned about predatory pricing now as they used to be. For one thing, consumers benefit from price wars, at least in the short run. For another, the cases are hard to prove. Here is why:

- **The defendant is selling its products below cost.** This rule sounds sensible, but what does "cost" mean? As you know from your economics courses, there are many different kinds of costs—total, average variable, marginal, to name a few. Under current law, any price below *average variable cost* is generally presumed to be predatory.[12] The rule may be easy to state, but, in real life, average variable cost is difficult to calculate. First, plaintiffs must obtain most of the data from the defendant. Even if a defendant has a good idea of what its average variable costs are, it will not willingly tell all in court. Moreover, many of the economic decisions about what items fit into which cost category are subjective. It is difficult for the plaintiff to prove that its subjective view is closer to the truth than the defendant's.
- **The defendant intends that the plaintiff go out of business.** Even if Ma and Pa can calculate MegaGrocery's average variable cost to the satisfaction of a court, they will not necessarily win their case. They must prove that MegaGrocery intended to put them out of business. That is a pretty tall order, short of finding some smoking gun like a strategic plan that explicitly says MegaGrocery wants Ma and Pa gone.
- **If the plaintiff does go out of business, the defendant will be able to earn sufficient profits to recoup its prior losses.** Until Ma and Pa go out of business, MegaGrocery will lose money—after all, it is selling food below cost. To win their case, Ma and Pa must show that MegaGrocery will be able to make up all its lost profits once the corner grocery is out of the way. They need to prove, for example, that no other grocery chain will come to town. It is difficult to prove a negative proposition like that, especially in the grocery business where barriers to entry are low.

---

[12]To calculate average variable cost, add all the firm's costs except its fixed costs and then divide by the total quantity of output.

In recent times, plaintiffs have not had much success with predatory pricing suits. For example, Liggett began selling generic cigarettes 30 percent below the price of branded cigarettes. Brown & Williamson retaliated by introducing its own generics at an even lower price. Liggett sued, claiming that Brown's prices were below cost. The Supreme Court agreed that Brown was not only selling below cost but also intended to harm Liggett. Brown still won the case, however, because there was no evidence that it would be able to recover its losses from the below-cost pricing. If Brown raised its prices, other competitors would come back into the market.[13]

Tying Arrangements

Tying arrangement
An agreement to sell a product on the condition that a buyer also purchases another, usually less desirable, product.

A **tying arrangement** is an agreement to sell a product on the condition that the buyer also purchases a different (or tied) product. A tying arrangement is illegal under §3 of the Clayton Act and §1 of the Sherman Act if:

- The two products are clearly separate,
- The seller requires the buyer to purchase the two products together,
- The seller has significant power in the market for the tying product, and
- The seller is shutting out a significant part of the market for the tied product.

Tying product
In a tying arrangement, the product offered for sale on the condition that another product be purchased as well.

Tied product
In a tying arrangement, the product that a buyer must purchase as the condition for being allowed to buy another product.

Six movie distributors refused to sell individual films to television stations. Instead, they insisted that a station buy an entire package of movies. To obtain classics such as *Treasure of the Sierra Madre* and *Casablanca* (the **tying product**), the station also had to purchase such forgettable films as *Nancy Drew Troubleshooter*, *Gorilla Man*, and *Tugboat Annie Sails Again* (the **tied product**).[14] The distributors engaged in an illegal tying arrangement. These are the questions that the court asked:

- **Are the two products clearly separate?** A left and right shoe are not separate products, and a seller can legally require that they be purchased together. *Gorilla Man*, on the other hand, is a separate product from *Casablanca*.
- **Is the seller requiring the buyer to purchase the two products together?** Yes, that is the whole point of these "package deals."
- **Does the seller have significant power in the market for the tying product?** In this case, the tying products are the classic movies. Since they are copyrighted, no one else can show them without the distributor's permission. The six distributors controlled a great many classic movies. So, yes, they do have significant market power.
- **Is the seller shutting out a significant part of the market for the tied product?** In this case, the tied products are the undesirable films like *Tugboat Annie Sails Again*. Television stations forced to take the unwanted films did not buy "B" movies from other distributors. These other distributors were effectively foreclosed from a substantial part of the market.

EXAM Strategy

Question: A group of cemeteries required everyone who purchased a burial plot to also buy the gravestone from the cemetery. Is this an illegal tying arrangement?

---

[13] *Brooke Group Ltd. v. Brown & Williamson Tobacco Corp.*, 509 U.S. 209, 1993 U.S. EXIS 4245 (1993).
[14] *United States v. Loew's Inc.*, 371 U.S. 38, 1962 U.S. LEXIS 2332 (1962).

Strategy: To answer this question, you need to determine if the seller has significant market power. To do that, you must first know what the relevant market is.

Result: The plaintiffs in this case argued that each cemetery was its own market and therefore, controlled the market. But if you look at the section above called "What Is the Market?" you will see that the relevant question is: if a cemetery raises its prices, what will consumers do? The answer is that they will choose another cemetery nearby, of which there are plenty. Thus, the tying arrangement was not illegal because the cemeteries did not have significant market power.[15]

Controlling Distributors and Retailers

The goal of an aggressive strategy is to force competitors out of a market—by undercutting their prices or tying products together, for example. Controlling distributors and retailers is another method for excluding competitors. It is difficult to compete in a market if you are foreclosed from the best distribution channels.

Allocating Customers and Territory

As we saw earlier in this chapter, a *horizontal* agreement by *competitors* to allocate customers and territories is a *per se* violation of §1 of the Sherman Act. **However, a vertical allocation of customers or territory is illegal only if it adversely affects competition in the market as a whole.** It is a rule of reason, not a *per se,* violation.

Suppose that Hot Sound, Inc. produces expensive, high-quality speakers. It grants its distributors the exclusive right to sell in a particular territory or the exclusive right over a particular type of customer (consumers, corporate, automobiles). In return for these exclusive rights, Hot Sound requires the distributors to stock a wide range of inventory, hire highly trained (expensive) sales help, and advertise widely. Such requirements not only increase sales but also enhance distributor loyalty. The distributors have such a large investment in Hot Sound's products that they are reluctant to switch to another manufacturer. A change would mean unloading a large inventory, developing new advertisements, and retraining or laying off some of the sales force.

Hot Sound clearly has good business reasons for adopting such a plan. It is reducing intrabrand competition (among its dealers) but enhancing interbrand competition (between brands). With its committed dealer network, Hot Sound can compete more fiercely against other brands. Vertical allocation is a rule of reason violation, which means that the law will intervene only if Hot Sound's activities have an anticompetitive impact on the market as a whole. But because Hot Sound's plan increases interbrand competition, it is unlikely to have an anticompetitive impact.

Exclusive Dealing Agreements

An **exclusive dealing contract** is one in which a distributor or retailer agrees with a supplier not to carry the products of any other supplier. **Under §1 of the Sherman Act and §3 of the Clayton Act, exclusive dealing contracts are subject to a rule of reason and are illegal only if they have an anticompetitive effect.**

Exclusive dealing contract
A contract in which a distributor or retailer agrees with a supplier not to carry the products of any other supplier.

Consider the case of Ben & Jerry's. With more than $100 million in sales, it was a major player in the ice cream market. And some of its competitors alleged that it was playing hardball. Just ask Amy Miller. She started Amy's Ice Creams in a small storefront in Austin, Texas. Her ice cream was so popular that she decided to begin producing pints for sale in

[15] *Monument Builders v. Michigan Cemetery Association*, 2008 U.S. App. LEXIS 9381.

grocery stores. But when she tried to enter the Houston market, Sunbelt, the dominant distributor in the area, refused to carry her desserts. She thinks Sunbelt turned her down because Ben & Jerry's had forbidden it to carry other premium brands.

Ironically, the ice cream was once in the other bowl, so to speak. When Ben and Jerry were the new boys on the block, they discovered that Pillsbury (owner of Häagen-Dazs) included provisions in its contracts that prohibited distributors from carrying Ben & Jerry's products. When Ben & Jerry's produced written contracts containing these exclusory clauses, Pillsbury backed down immediately. Thereafter, no one in the industry used written distribution contracts.

Amy Miller threatened to sue Ben & Jerry's for violating the antitrust laws with exclusive dealing contracts. In determining if these agreements had an anticompetitive impact on the market, a court would consider the following factors:

- **The number of other distributors available.** Amy said that no one but Sunbelt would do because only the best distributors were able to preserve her ice cream's quality.
- **The portion of the market foreclosed by the exclusive dealing agreements.** Without Sunbelt, Amy's Ice Creams could not penetrate the Houston market, so it had to shut down its pint production line.
- **The ease with which new distributors could enter the market.** Sunbelt had few, if any, competitors. Presumably, the market was a difficult one to enter.
- **The possibility that Amy could distribute the products herself.** Not likely. Amy's talents lay in *making* good ice cream, not distributing it.
- **The legitimate business reasons that might have led the distributor to accept an exclusive contract.** Here is what Sunbelt's vice-president had to say: "We already had our table full with super premium pints. We felt Amy's was an underfinanced product and we would have had to replace a high-volume product to give it a shot. And we personally did not think the product was very good."[16] (Although, in the authors' opinion, her ice cream is very fine indeed.)

Would an exclusive dealing agreement between Ben & Jerry's and Sunbelt be anticompetitive? If so, would their business reasons justify the contract?

Resale Price Maintenance

Resale price maintenance (RPM), also called *vertical price fixing,* means the manufacturer sets *minimum* prices that retailers may charge. In other words, it prevents retailers from discounting. Why does the manufacturer care? After all, once the retailer purchases the item, the manufacturer has made its profit. The only way the manufacturer makes more money is to raise its *wholesale* price, not the *retail* price. RPM guarantees a profit margin for the *retailer.*

Manufacturers care about retail prices because pricing affects the product's image with consumers. Armani men's suits sell for around $2,000. What conclusion do you draw about the quality of those suits? Would your opinion change if you saw Armani suits being sold at discounted prices? You can understand that Armani might want to prohibit retailers from lowering the prices on its suits. Consumer advocates contend, however, that manufacturers such as Armani are simply protecting dealers from competition. Discounting may or may not harm products, but, they insist, RPM certainly hurts consumers. As you saw in the opening scenario, Tempur-Pedic's RPM prevented Sean from negotiating a lower price for his mattress.

---

[16]Rickie Windle, "Ben & Jerry's Creams Amy's," *Austin Business Journal,* Oct. 4, 1993, vol. 13, no. 33, §1, p. 1.

In 1911, the Supreme Court ruled that RPM was a *per se* violation of §1 of the Sherman Act.[17] However, what the Supreme Court giveth, it can also taketh away. In 2007, the Supreme Court overruled itself and held that **RPM is a rule of reason violation.** The following case explains why.

Leegin Creative Leather Products, Inc. v. PSKS, Inc.

127 S. Ct. 2705, 2007 U.S. LEXIS 8668
Supreme Court of the United States, 2007

Facts: Leegin manufactured belts and other women's fashion accessories under the brand name "Brighton." It sold these products only to small boutiques and specialty stores. Sales of the Brighton brand accounted for about half the profits at Kay's Kloset, a boutique in Lewisville, Texas.

Leegin decided it would no longer sell to retailers who discounted Brighton prices. It wanted to ensure that stores could afford to offer excellent service. It was also concerned that discounting harmed Brighton's image. Despite warnings from Leegin, Kay's Kloset persisted in marking down Brighton products by 20 percent. So Leegin cut the store off.

Kay's sued Leegin, alleging that the manufacturer had violated the *per se* rule against RPM. The trial court found for Kay's and entered judgment against Leegin for almost $4 million. The Court of Appeals affirmed. The Supreme Court granted *certiorari*. On appeal, Leegin did not dispute that it had entered into RPM agreements with retailers. Rather, it contended that the rule of reason should apply to those agreements.

Issue: ***Is resale price maintenance a* per se *or rule of reason violation of the Sherman Act?***

Excerpts from Justice Kennedy's Decision:[18] To justify a *per se* prohibition, a restraint must have manifestly anticompetitive effects and lack any redeeming virtue. The few recent studies documenting the competitive effects of resale price maintenance cast doubt on the conclusion that the practice meets the criteria for a *per se* rule.

Minimum resale price maintenance can stimulate interbrand competition—the competition among manufacturers selling different brands of the same type of product—by reducing intrabrand competition—the competition among retailers selling the same brand. A single manufacturer's use of vertical price restraints tends to eliminate intrabrand price competition; this in turn encourages retailers to invest in tangible or intangible services or promotional efforts that aid the manufacturer's position as against rival manufacturers. Resale price maintenance also has the potential to give consumers more options so that they can choose among low-price, low-service brands; high-price, high-service brands; and brands that fall in between.

Absent vertical price restraints, the retail services that enhance interbrand competition might be underprovided. This is because discounting retailers can free-ride on retailers who furnish services and then capture some of the increased demand those services generate. Consumers might learn, for example, about the benefits of a manufacturer's product from a retailer that invests in fine showrooms, offers product demonstrations, or hires and trains knowledgeable employees. Or consumers might decide to buy the product because they see it in a retail establishment that has a reputation for selling high-quality merchandise. If the consumer can then buy the product from a retailer that discounts because it has not spent capital providing services or developing a quality reputation, the high-service retailer will lose sales to the discounter, forcing it to cut back its services to a level lower than consumers would otherwise prefer.

While vertical agreements setting minimum resale prices can have procompetitive justifications, they may have anticompetitive effects in other cases. A manufacturer with market power might use resale price maintenance to give retailers an incentive not to sell the products of smaller rivals or new entrants. If the rule of reason were to apply to vertical price restraints, courts would have to be diligent in eliminating their anticompetitive uses from the market.

Vertical price restraints are to be judged according to the rule of reason.

[17] *Dr. Miles Medical Co. v. John D. Park & Sons*, 220 U.S. 373 (1911).

[18] As an indication of how controversial this issue is, the court split 5-4.

Vertical Maximum Price Fixing

In the case of resale price maintenance, the manufacturer sets the ***minimum*** prices its distributors can charge. **Vertical maximum price fixing (when a manufacturer sets maximum prices), is also a rule of reason violation of the Sherman Act.** The defendant is liable only if the price fixing harms competition. (You remember, from earlier in this chapter, that all *horizontal* price fixing is a *per se* violation.)

When State Oil Co. leased a gas station to Barkat Khan, it set a maximum price that Khan could charge for gas. Khan sued State Oil, but the Supreme Court ruled in favor of the oil company on the grounds that cutting prices to increase business is the very essence of competition and, furthermore, low prices benefit consumers.[19]

Chapter Conclusion

The purpose of the antitrust laws in the United States is to keep businesses on a narrow road. On the one hand, they may not swerve to one side and work too closely with competitors. Nor may they swerve to the other side and attack competitors too aggressively. Although managers sometimes resent the constraints imposed on them by antitrust laws, it is these laws that ensure the fair and open competition necessary for a healthy economy. In the end, the antitrust laws benefit us all.

Exam Review

1. ***PER SE* V. RULE OF REASON** *Per se* violations are automatic; courts do not consider mitigating circumstances. Rule of reason violations, on the other hand, are illegal only if they have an anticompetitive effect. (p. 953)

2. **MARKET DIVISION** Any effort by a group of competitors to divide their market is a *per se* violation of the Sherman Act. Illegal arrangements include agreements to allocate customers, territory, or products. (p. 954)

EXAM Strategy

Question: Harcourt Brace Jovanovich (HBJ) granted BRG an exclusive license to market HBJ's bar review materials for law students in Georgia. HBJ agreed not to compete with BRG in Georgia, and BRG agreed not to compete with HBJ outside the state. HBJ was entitled to receive $100 per student enrolled by BRG and 40 percent of revenues over $350 per student. Did this agreement violate the antitrust laws?

Strategy: These two competitors have agreed to allocate territory. (See the "Result" at the end of this section.)

[19] *State Oil Co. v. Khan*, 522 U.S. 3, 1997 U.S. LEXIS 6705 (1997).

3. **HORIZONTAL PRICE FIXING AND BID RIGGING** Horizontal price fixing and bid rigging are *per se* violations of the Sherman Act. (pp. 955–957)

4. **REFUSALS TO DEAL** The Sherman Act prohibits competitors from joining together in an agreement to exclude a particular supplier, buyer, or even another competitor, if the agreement would have an anticompetitive effect. (pp. 957–958)

5. **RECIPROCAL DEALING AGREEMENT** Under a reciprocal dealing agreement, a buyer refuses to purchase goods from a supplier unless the supplier also purchases items from the buyer. Reciprocal dealing agreements violate the Sherman Act if they foreclose competitors from a significant part of the market. (p. 958)

6. **ROBINSON-PATMAN ACT** The Robinson-Patman Act prohibits companies from selling the same item at different prices if the sale lessens competition. However, a seller may charge different prices if these prices reflect different costs. (p. 959)

7. **MERGERS AND JOINT VENTURES** Under the Clayton Act, the federal government has the authority to prohibit anticompetitive mergers and joint ventures. (pp. 960–962)

8. **MONOPOLIZATION** Possessing a monopoly need not be illegal; acquiring or maintaining it through "bad acts" is. To determine if a company is guilty of monopolization, ask three questions:

- What is the market?
- Does the company control the market?
- How did the company acquire or maintain its control? (pp. 962–965)

EXAM Strategy

Question: Another example of a bar review company behaving badly—this industry is highly competitive because the product is relatively undistinguishable. BAR/BRI was the largest bar review company in the country, with branches in 45 states. Barpassers was a much smaller company located only in Arizona and California. BAR/ BRI distributed pamphlets on campuses falsely suggesting that Barpassers was near bankruptcy. Enrollments in Barpassers' courses dropped, and the company was forced to postpone plans for expansion. Did Barpassers have an antitrust claim against BAR/BRI?

Strategy: It does not matter if BAR/BRI *had* a monopoly. These "bad acts" could have helped the company *acquire* one. (See the "Result" at the end of this section.)

9. **PREDATORY PRICING** To win a predatory pricing case, a plaintiff must prove three elements:

- The defendant is selling its products below cost.
- The defendant intends that the plaintiff go out of business.
- If the plaintiff does go out of business, the defendant will be able to earn sufficient profit to recoup its prior losses. (pp. 965–966)

10. TYING ARRANGEMENT A tying arrangement is illegal if:

- The two products are clearly separate,
- The seller requires that the buyer purchase the two products together,
- The seller has significant power in the market for the tying product, and
- The seller is shutting out a significant part of the market for the tied product. (pp. 966–967)

EXAM Strategy

Question: Two medical supply companies in the San Francisco area provide oxygen to patients at home. The companies are owned by the doctors who prescribe the oxygen. These doctors make up 60 percent of the lung specialists in the area. Does this arrangement create an antitrust problem?

Strategy: Does the seller have significant power in the market for the tying product (lung patients)? Is it shutting out a significant part of the market for the tied product (oxygen)? (See the "Result" at the end of this section.)

11. CONTROLLING DISTRIBUTION Efforts by a manufacturer to allocate customers or territory among its distributors are subject to a rule of reason. These allocations are illegal only if they have an anticompetitive effect. (pp. 967–968)

12. EXCLUSIVE DEALING An exclusive dealing contract is one in which a distributor or retailer agrees with a supplier not to carry the products of any other supplier. These contracts are subject to a rule of reason and are illegal only if they have an anticompetitive effect. (pp. 967–968)

13. RESALE PRICE MAINTENANCE If a manufacturer enters into an agreement with distributors or retailers to fix minimum prices, this arrangement is subject to the rule of reason standard—illegal only if it has an anticompetitive effect. (pp. 968–969)

14. VERTICAL MAXIMUM PRICE FIXING An arrangement whereby a manufacturer sets maximum prices is illegal only if it has an anticompetitive effect. (p. 970)

2. Result: Agreements between competitors to allocate territories are illegal under §1 of the Sherman Act.

8. Result: A jury found that BAR/BRI had violated §2 of the Sherman Act by attempting to create an illegal monopoly. The jury ordered BAR/BRI to pay Barpassers more than $3 million plus attorneys' fees.

10. Result: The FTC accused the doctors of an illegal tying arrangement. Because the doctors effectively controlled such a high percentage of the patients needing the service, other oxygen companies could not enter the market. To settle the FTC charges, the companies agreed that no more than 25 percent of the lung specialists in the area would be affiliated with the companies.

Multiple-Choice Questions

1. Are horizontal price fixing and vertical price fixing *per se* violations of the Sherman Act?
   (a) Yes, Yes
   (b) Yes, No
   (c) No, Yes
   (d) No, No

2. If Sterling Steel (SS) refused to buy concrete from Carat Concrete (CC) unless CC bought steel from SS, would that refusal to deal be a violation of antitrust laws?
   (a) Yes, a *per se* violation.
   (b) It used to be a violation but is no longer.
   (c) Yes, if the competitive impact is highly significant.
   (d) Yes, if SS has a monopoly.

3. Reserve Supply Corp., a cooperative of 379 lumber dealers, charged that Owens-Corning Fiberglass Corp. violated the Robinson-Patman Act by selling at lower prices to Reserve's competitors. It presented proof that these prices had harmed competition. Owens-Corning admitted that it had granted lower prices to a number of Reserve's competitors to meet, but not beat, the prices of other insulation manufacturers. Is Owens-Corning in violation of the RPA?
   (a) Yes, because the RPA requires that manufacturers charge all competitors the same price.
   (b) Yes, because any difference in price is a *per se* violation of the RPA.
   (c) Yes, because these price variations harmed competition.
   (d) No, because a manufacturer is not liable under the RPA if it charges lower prices to meet competition.

4. Oftentimes, if one airline lowers its prices on a particular route, so will all of the others. What is this type of activity called, and is it a violation of the antitrust laws?
   (a) Refusal to deal; it is a rule of reason violation.
   (b) Conscious parallelism; it is not a violation in itself.
   (c) Price discrimination; it is a *per se* violation.
   (d) Resale price maintenance; it is a rule of reason violation.

5. A horizontal merger is illegal if:
   (a) The resulting company controls at least 90 percent of the market.
   (b) The resulting company controls at least 50 percent of the market.
   (c) The resulting company has the ability to exclude competitors.
   (d) The resulting company has assets of $131.9 million or higher.

Essay Questions

1. Samantha manufactures 60 percent of the titanium screws sold in the United States. Does she have a monopoly on this product? What would you need to know to answer this question?

2. Texaco sold gasoline in Spokane, Washington, to independent retailers and also to Gulf Oil, which operated its own filling stations and also sold to retailers. Texaco charged a substantially lower price to Gulf than to the independent retailers. These retailers sued Texaco, alleging that this price structure violated the RPA. At trial, the retailers presented evidence that they could not compete against Gulf. Texaco did not present evidence that the different prices it charged reflected the costs of serving these two sets of customers. Did Texaco violate the RPA?

3. In New York City, 50 bakeries formed an association. They developed a system of distribution under which stores were allowed to buy only from a single baker. A store that wanted to shift to another baker had to consult the association and pay cash to the former baker. The association also decided to raise the retail price of bread. All the association's members printed the new price on their bread sleeves. Are the bakeries in violation of the antitrust laws?

4. **YOU BE THE JUDGE WRITING PROBLEM** American Academic Suppliers (AAS) and Beckley-Cardy (B-C) both sold educational supplies to schools. When B-C's sales began to plummet, it responded by reducing its catalog prices. It also offered an additional discount in states in which AAS was making substantial gains. What claim might AAS make against B-C? Is it likely to prevail in court? **Argument for AAS:** B-C has committed predatory pricing. The company is selling below cost for the purpose of driving us out of business. **Argument for B-C:** Even if we were to drive AAS out of business, we do not have enough market power to recoup our losses.

5. Suppose that Disney insists that retailers cannot sell DVDs of *Ratatouille* for less than $16.99. The company threatens to cut off any retailers who discount that price. But video stores would like to use these movies as a loss leader—selling them at a very low price to lure customers. Is it legal for Disney to cut off retailers who discount prices?

Discussion Questions

1. Proponents of the Post Chicago School argue that federal antitrust regulators should undertake enforcement actions that will lead to lower consumer prices. Look at the five cases in this chapter. Are the courts' decisions likely to cause consumer prices to go up or down? Do you agree with the courts' decisions?

2. Is it appropriate for U. S. antitrust laws to apply overseas? Should businesspeople who never set foot in the United States be liable for activities they conducted in their own countries?

3. **Pricegrabber.com** is a website that helps online shoppers find the lowest-priced goods on the Internet. But it cannot always find the cheapest items because some online sellers are afraid to list their prices. If you go to **Amazon.com**, for example, you will see some items for which there is no price, just the legend, "To see our price, add this item to your cart." Amazon does that for fear that, after the *Leegin* case, manufacturers will refuse to supply items that it sells below the established retail price. Manufacturers worry that if they do not set some floor to their prices, other retailers will drop the products altogether. eBay and Amazon argue that the consumer is best served by a free market that permits them to set whatever prices they want. What is your view on RPM?

4. In Boston, 50 restaurants threatened to stop accepting the American Express card if the company refused to reduce the commission it charged on each purchase. Visa International, one of American Express's rivals, offered to pay the group's legal expenses. American Express then lowered its commission for all restaurants except for those with a volume lower than $1 million a year. Have either the restaurants, Visa, or American Express potentially violated the antitrust laws?

5. After acquiring the Schick brand name and electric shaver assets, North American Phillips controlled 55 percent of the electric shaver industry in the United States. Remington, a competitor, claimed that the acquisition of such a large market share was a violation of the law because the increased competition from Phillips would decrease Remington's profits. Does Remington have a valid claim?

6. **ETHICS** Clarice, a young woman with a mental disability, brought a malpractice suit against a doctor at the Medical Center. As a result, the Medical Center refused to treat her on a nonemergency basis. Clarice then went to another local clinic, which was later acquired by the Medical Center. Because the new clinic also refused to treat her, Clarice had to seek medical treatment in another town 40 miles away. Has the Medical Center violated the antitrust laws? Was it ethical to deny treatment to a patient?

CHAPTER 39

CONSUMER LAW

© Werner H. Kunz/Flickr/Getty

Three women signed up for a lesson at the Arthur Murray dance studio in Washington, D.C. Expecting a session of quiet fun, they instead found themselves in a nightmare of humiliation and coercion:

- "First of all, I did not want the [additional] lesson, and I think it was unpleasant because I had three, maybe four, people, as I say, pressuring me to buy something by a certain time, and I do recall asking that I be let to think, let me think it over, and I was told that the contest would end at 6 o'clock or something to that effect and if I did not sign by a certain time, it would be too late. I think we got under the deadline by maybe a minute or two. If I had been given time to think, I would not have signed that contract."
- "I tried to say no and get out of it and I got very, very upset because I got frightened at paying out all that money and having nothing to fall back on. I remember I started crying and couldn't stop crying. All I thought of was getting out of there. So finally after I don't know how much time, Mr. Mara said, well, I could sign up for 250 hours, which was half the 500 Club, which would amount to $4,300. So I finally signed it. After that, I tried to raise the money from the bank and found I couldn't get a loan for that amount and I didn't have any savings and I had to get a bank loan to pay for it. That was when I went back and asked him to cancel that contract. But Mr. Mara said that he couldn't cancel it."
- "I did not wish to join the carnival, and while it was only an additional $55, I had no desire to join. [My instructor] asked everyone in the room to sit down in a circle around me and he stood me up in that circle, in the middle of the circle, and said, 'Everybody, I want you to look at this woman here who is too cheap to join the carnival. I just want you to look at a woman like that. Isn't it awful?'"

I started crying and couldn't stop crying. All I thought of was getting out of there.

Because of abuses such as these, the Federal Trade Commission (FTC) ordered the Arthur Murray dance studio to halt its high-pressure sales techniques, limit each contract to no more than $1,500 in dance lessons, and permit all contracts to be canceled within seven days.[1]

---

[1] *In re Arthur Murray Studio of Washington, Inc.*, 78 F.T.C. 401, 1971 FTC LEXIS 75 (1971).

Introduction

Years ago, consumers typically dealt with merchants they knew well. A dance instructor in a small town would not stay in business long if he tormented his elderly, vulnerable clients. As the population grew and cities expanded, however, merchants became less and less subject to community pressure. The law has supplemented, if not replaced, these informal policing mechanisms. Both Congress and the states have passed statutes that protect consumers from the unscrupulous. But the legal system is generally too slow and expensive to handle small cases. The women who fell into the web of Arthur Murray had neither the wealth nor the energy to sue the studio themselves. To aid consumers such as these, Congress empowered federal agencies to enforce consumer laws.

Federal Trade Commission

Congress created the FTC in 1915 to regulate business. Although its original focus was on antitrust law, it now regulates a wide range of business activities that affect consumers—everything from advertising to consumer loans to warranties to debt collection practices. It is, if you will, the consumer's best friend in Washington. The FTC has several options for enforcing the law:

- *Voluntary compliance.* When the FTC determines that a business has violated the law, it first asks the offender to sign a voluntary compliance affidavit promising to stop the prohibited activity.
- *Administrative hearings and appeals.* If the company refuses to stop voluntarily, the FTC takes the case to an administrative law judge (ALJ) within the agency. The violator may settle the case at this point by signing a **consent order.** If the case proceeds to a hearing, the ALJ has the right to issue a **cease and desist order,** commanding the violator to stop the offending activity. The FTC issued a cease and desist order against the Arthur Murray dance studio. A defendant can appeal such an order to the five Commissioners of the FTC, from there to a federal appeals court, and ultimately to the United States Supreme Court. Both the Commissioners and the Fifth Circuit Court of Appeals confirmed the cease and desist order against Arthur Murray. The case never reached the Supreme Court.
- *Penalties.* The FTC can impose a fine for each violation of a voluntary compliance affidavit, a consent order, a cease and desist order, an FTC rule, or a cease and desist order issued against *someone else.* For example, the Arthur Murray studio could be liable for violating an FTC cease and desist order prohibiting high-pressure sales by the Fred Astaire studio. In addition, the FTC can file suit in federal court asking for damages on behalf of an injured consumer if (1) the defendant has violated FTC rules and (2) a reasonable person would have known under the circumstances that the conduct was dishonest or fraudulent.

Consumer Financial Protection Bureau

In 2010, Congress created the Consumer Financial Protection Bureau (CFPB) to regulate consumer financial products and services, including mortgages, credit cards, and private student loans. (It does not have the authority to regulate car loans.) Among its goals is to clarify and simplify the terms of credit cards, checking accounts, and mortgage disclosure forms.

© Susan Van Etten

To avoid confusing customers, the FTC required the makers of Aspercreme to disclose that it offers "Aspirin-Free Pain Relief."

SALES

Section 5 of the Federal Trade Commission Act (FTC Act) prohibits "unfair and deceptive acts or practices."

Deceptive Acts or Practices

Many deceptive acts or practices involve advertisements. **Under the FTC Act, an advertisement is deceptive if it contains an important misrepresentation or omission that is likely to mislead a reasonable consumer.** A company advertised that a pain-relief ointment called "Aspercreme" provided "the strong relief of aspirin right where you hurt." From this ad and the name of the product, do you assume that the ointment contains aspirin? Are you a reasonable consumer? Consumers surveyed in a shopping mall believed the product contained aspirin. In fact, it does not. The FTC required the company to disclose that there is no aspirin in Aspercreme.[2]

In another example, Nestlé sold a drink called Boost Kid Essentials, which contained probiotics, good bacteria that aid digestion and fight bad germs. But Nestlé went further than that in its ads, claiming that Boost would prevent children from getting sick or missing school. How could any parent resist that drink? Only Nestlé had no evidence for these claims. In a settlement with the FTC, Nestlé agreed not to make any claims for which it did not have scientific evidence.

In the following case, the court discussed the type of scientific evidence required to support health claims.

FEDERAL TRADE COMMISSION V. DIRECT MARKETING CONCEPTS, INC.

624 F.3d 1; 2010 U.S. App. LEXIS 21743
United States Court of Appeals for the First Circuit, 2010

Facts: Direct Marketing Concepts, Inc., broadcast an infomercial for Coral Calcium that featured a spokesperson named Robert Barefoot. In the ad, his claims were as bare as his feet. He asserted that virtually all diseases—heart disease, cancer, lupus, multiple sclerosis, and Parkinson's, among others—are caused by a condition called acidosis. He further claimed that calcium derived from Okinawan coral cures these diseases by rendering the body more alkaline: "I've had 1,000 people tell me how they've cured their cancer. I've witnessed people get out of wheelchairs with multiple sclerosis just by getting on the coral."

To bolster his claims, Barefoot noted that unspecified articles from the *Journal of the American Medical Association* and the *New England Journal of Medicine* "said that calcium supplements reverse cancer…that's a quote." During an 18-month period, this infomercial generated $54 million in sales.

The FTC filed suit against the company and its owners, alleging that the infomercials were deceptive. The trial court granted the FTC's motion for summary judgment, ruling that the infomercials were misleading as a matter of law and, therefore, there was no need for a trial. The defendants appealed.

Issue: ***Were these infomercials misleading as a matter of law?***

Excerpts from Judge Thompson's Decision: When the FTC brings an action based on the theory that advertising is deceptive because the advertisers lacked a reasonable basis for their claims, the FTC must: (1) demonstrate what evidence would in fact establish such a claim in the

[2] *In re Thompson Medical Co., Inc.*, 104 F.T.C. 648, 1984 FTC LEXIS 6 (1984).

relevant scientific community; and (2) compare the advertisers' evidence to that required by the scientific community to see if the claims have been established.

On the first prong, the FTC produced four expert declarations which demonstrated that the claims could be substantiated by double-blind, placebo-controlled human studies. To be sure, there may be other scientific evidence that could be sufficient. But the government established that some scientific evidence is required for substantiation, and thus satisfied the first prong. Because the Defendants neither produced nor pointed to any evidence to raise even the tiniest of fact issues, summary judgment was appropriate on the first prong.

On the second prong, the FTC relied on the same four expert declarations, in which the experts compared the Defendants' evidence to the available literature and concluded in each case that the Defendants' evidence was woefully inadequate. The experts specifically opined that: (1) there was no evidence that calcium cures cancer; (2) there was some evidence that calcium might lower blood pressure but none that it cures heart disease; (3) there was no evidence whatsoever that calcium has any effect on autoimmune disorders; [and] (4) there has been no research published in the *Journal of the American Medical Association* or the *New England Journal of Medicine* indicating that calcium "reverses" cancer.

The record contains a slew of documents, including excerpts from Barefoot's books, excerpts from Barefoot's deposition testimony, a number of popular science and pseudoscientific articles, and one preliminary study. Barefoot's books present jumbles of quotes from scientists, scientific review articles, and scientific studies interspersed with references to *Reader's Digest* and other general-consumption reductions of these studies. However, none of these scientists or studies supports the panacean claims made in the Coral Calcium infomercial. The Defendants therefore engaged in deceptive advertising as a matter of law.

The Defendants attempt to head off the above analysis by asserting that their infomercials advanced no actual health claims but, instead, presented only puffery which was further attenuated by the presence of general disclaimers. However, specific and measurable claims are not puffery, and may be the subject of deceptive advertising claims. [T]he Defendants' infomercials presented specific and measurable health claims.

Disclaimers or qualifications in any particular ad are not adequate to avoid liability unless they are sufficiently prominent and unambiguous to change the apparent meaning of the claims and to leave an accurate impression. The disclaimers at issue here did nothing to affect the meaning of the infomercials' health claims. The infomercial transcripts reveal only disclaimers that the infomercials are paid advertising. In contrast, the health claims were bold and straightforward, presented by supposed experts as testable observations backed up by clinical trials and studies.

[W]e affirm the district court's grant of summary judgment.

Unfair Practices

The FTC Act also prohibits unfair acts or practices. **The Commission considers a practice to be *unfair* if it meets all of the following three tests:**

- *It causes a substantial consumer injury.* This can mean physical or financial injury. A furnace repair company that dismantled home furnaces for "inspection" and then refused to reassemble them until the consumers agreed to buy services or replacement parts had caused a substantial consumer injury.
- *The harm of the injury outweighs any countervailing benefit.* A pharmaceutical company sold a sunburn remedy without conducting adequate tests to ensure that it worked. The expense of these tests would have forced the company to raise the product's price. The company had demonstrated that the product was safe, and there was evidence in the medical literature that the ingredients when used in other products were effective. The FTC determined that, although the company was technically in violation of its rules, the benefit to consumers of a cheaper product more than outweighed the risk of injury to them.
- *The consumer could not reasonably avoid the injury.* The FTC is particularly vigilant in protecting susceptible consumers—such as the elderly or the ill—who are less able to avoid injury. For instance, the Commission looks especially carefully at those who offer a cure for cancer, as the defendants did in the *Direct Marketing* case.

In addition, the FTC may decide that a practice is unfair simply because it violates public policy, even if it does not meet these three tests. The Commission refused to allow a mail-order company to file collection suits in states far from where the defendants lived because the practice was unfair, whether or not it met the three tests.

Additional Sales Rules

Bait-and-Switch

FTC rules prohibit bait-and-switch advertisements: a merchant may not advertise a product and then disparage it to consumers in an effort to sell a different (more expensive) item.

Bait and switch
A practice where sellers advertise products that are not generally available but are being used to draw interested parties in so that they will buy other products.

Seven websites based in Brooklyn, New York, such as Best Price Photo and 86th Street Photo, engaged in a classic bait-and-switch operation. They advertised products at a much lower price than competitors. That was the **bait**—an alluring offer that sounds almost too good to be true. Of course, it is. Once a customer placed an order, the company tried to sell an upgraded product at a much higher price. That is the **switch**. The real purpose of the advertisement was simply to find customers who were interested in buying. If customers refused the new item, they would be told that the original product was backordered, and the sale was cancelled. If customers agreed to buy the more expensive product, it would turn out to be of poor quality. But the company would not allow returns—either the return fees would be high or the "customer service" department would refuse to answer the phone.

Merchandise Bought by Mail, by Telephone, or Online

Many Americans buy everything, from clothing to medicine to furnishings to food, by mail, telephone, or online. **The FTC has established the following rules for this type of merchandise:**

- Sellers must ship an item within the time stated or, if no time is given, within 30 days after receipt of the order.
- If a company cannot ship the product when promised, it must send the customer a notice with the new shipping date and an opportunity to cancel. If the new shipping date is within 30 days of the original one and the customer does not cancel, the order is still valid.
- If the company cannot ship by the second shipment date it must send the customer another notice. This time, however, the company must cancel the order unless the customer returns the notice, indicating that he still wants the item.

Staples, Inc. violated these FTC rules when it told customers that they were viewing "real-time" inventory and that products would be delivered in one day, even on weekends. In fact, the website was not updated in real time, one-day delivery only applied to customers who lived within 20 miles of a Staples store, and it never happened on weekends. The company paid a fine of $850,000 to settle these charges.

Telemarketing

The telephone rings: "Could I speak with Alexander Johannson? This is Denise from Master Chimney Sweeps." It is 7:30 p.m.; you have just straggled in from work and are looking forward to a peaceful dinner of takeout cuisine. You are known as Sandy, your last name is pronounced "Yohannson," and you live in a modern apartment without a chimney. A telemarketer has struck again! What can you do to protect your peace and quiet?

The FTC prohibits telemarketers from calling any telephone number listed on its do-not-call registry. You can register your home and cell phone numbers with the FTC online at **http://www.donotcall.gov** or by telephone at (888) 382-1222. FTC rules also prohibit telemarketers from blocking their names and telephone numbers on Caller ID systems.

What is even more annoying that telemarketing calls from a live person? Robocalls (prerecorded commercial telemarketing calls) from a machine. Such calls are illegal unless the telemarketer obtains written permission from the person being called. You can file a complaint by calling (877) FTC-HELP or by going to the **ftc.gov** website. Exempted from this ban are informational calls (cancellations of a flight or a school day), debt collection calls (as long as they are not trying to sell anything), political messages, charitable outreach, and health care messages.

Unordered Merchandise

Under §5 of the FTC Act, anyone who receives unordered merchandise in the mail can treat it as a gift. She can use it, throw it away, or do whatever else she wants with it.

There you are, watching an infomercial for Anushka products, guaranteed to fight that scourge of modern life—cellulite! Rushing to your phone, you place an order. The Anushka cosmetics arrive, but for some odd reason, the cellulite remains. A month later, another bottle arrives, like magic, in the mail. The magic spell is broken, however, when you get your credit card bill and see that, without your authorization, the company has charged you for the new supply of Anushka. Is this a hot new marketing technique? Not exactly. The FTC ordered the company to cease and desist this unfair and deceptive practice. The company improperly billed its customers, said the FTC, and should have notified them that they were free to treat the unauthorized products as a gift, to use or throw out as they wished.[3]

Door-to-Door Sales

Consumers at home need special protection from unscrupulous salespeople. In a store, customers can simply walk out, but at home, they may feel trapped. Also, it is difficult at home to compare products or prices offered by competitors. Under the FTC door-to-door rules, **a salesperson is required to notify the buyer that she has the right to cancel the transaction prior to midnight of the third business day thereafter.** This notice must be given both orally and in writing; the actual cancellation must be in writing. The seller must return the buyer's money within 10 days.

EXAM Strategy

Question: Mantra Films sold "Girls Gone Wild" DVDs on the Internet. When customers ordered one DVD, the company would enroll them automatically in a "continuity program" and send them unordered DVDs each month on a "negative-option" basis, charging consumers' credit cards for each DVD until consumers took action to stop the shipments. Is Mantra's marketing plan legal?

Strategy: Review the various sales regulations—more than one is involved in this case.

Result: This marketing plan was deceptive because customers were not told that they would be enrolled in the continuity program. Also, Mantra could not legally bill for the unordered DVDs. Under the unordered merchandise rule, consumers had the right to treat them as gifts.

[3]*In the Matter of Synchronal Corp.*, 116 F.T.C. 1189, 1993 FTC LEXIS 280 (1993).

Consumer Credit

Historically, the practice of charging interest on loans was banned by most countries and by three of the most prominent religions—Christianity, Islam, and Judaism. As the European economy developed, however, moneylending became essential. To compromise, governments began to permit interest charges but limited the maximum rate to 6 percent.

Even in modern times, many states limit the maximum interest rate a lender may charge consumers. (Although, usury laws typically do not apply to credit card debt, mortgages, consumer leases, or commercial loans.) The penalty for violating usury statutes varies among the states. Depending upon the jurisdiction, the borrower may be allowed to keep (1) the interest above the usury limit, (2) all of the interest, or (3) all of the loan and the interest.

Truth in Lending Act—General Provisions

Before Congress passed the Truth in Lending Act (TILA), lenders found many creative methods to disguise the real interest rate from the authorities who enforced usury laws. In this process, they also hid it from borrowers. Indeed, before TILA, many consumers had no idea what interest rate they were really paying. Congress passed this statute to ensure that consumers were adequately informed about credit terms before entering into a loan and could compare the cost of credit. Note, however, TILA does not regulate interest rates or the terms of a loan; these are still set by state law. It simply requires lenders to *disclose* the terms of a loan in an understandable and complete manner. Thus, credit card companies must still comply with TILA, even though they are not governed by state usury statutes.

Applicability

TILA applies to a transaction only if all of the following tests are met:

- *It is a consumer loan.* That means a loan to an individual for personal, family, or household purposes, not a loan to a business. For example, TILA does not apply to a loan on a truck used to sell produce.
- *The loan has a finance charge or will be repaid in more than four installments.* Sometimes finance charges masquerade as installment plans. Boris can pay for his flat-screen TV in six monthly installments of $200 each, or he can pay $900 cash up front. If he chooses the installment plan, he is effectively paying a finance charge of $300. That is why TILA applies to loans with more than four installments.
- *The loan is for less than $50,000, is secured by a mortgage on real estate, or is a private education loan.*[4] If Boris borrows money to buy a $1 million house, TILA applies, but not if he buys a $150,000 yacht.
- *The loan is made by someone in the business of offering credit.* If Boris borrows $5,000 from his friend Ludmilla to buy a riding mower, TILA does not apply. If he borrows the money from Friendly Neighborhood Loan Depot, Inc., however, TILA does apply.

Disclosure

All TILA loans. **In all loans regulated by TILA:**

- *The disclosure must be clear and in meaningful sequence.* A finance company violated TILA when it loaned money to Dorothy Allen. The company made all the required disclosures but scattered them throughout the loan document and intermixed them

[4]This amount adjusts every December 31, to reflect inflation.

with confusing terms that were not required by TILA.[5] A TILA disclosure statement should not be a game of *Where's Waldo?*

- *The lender must disclose the finance charge.* The finance charge is the amount, in dollars, the consumer will pay in interest and fees over the life of the loan. It is important for consumers to know this amount because otherwise, they may not understand the real cost of the loan. Of course, the longer the loan, the higher the finance charge. Someone who borrows $5,000 for 10 years at 10 percent annual interest will pay $500 each year for 10 years, for a total finance charge of $5,000—equal to the principal borrowed. In 30-year mortgages, the finance charge will typically exceed the amount of the principal.
- *The creditor must also disclose the annual percentage rate (APR).* This number is the actual rate of interest the consumer pays on an annual basis. Without this disclosure, it would be easy in a short-term loan to disguise a very high APR because the finance charge is low. Boris borrows $5 for lunch from his employer's credit union. Under the terms of the loan, he must repay $6 the following week. His finance charge is only $1, but his APR is astronomical—20 percent per week—which is over 1,000 percent for a year.

All TILA loans must meet these three requirements. TILA requires additional disclosure for two types of loans: open-end credit (discussed later in the chapter) and closed-end credit.

Closed-end credit. In a closed-end transaction, the loan is a fixed amount and the borrower knows the payment schedule in advance. Boris enters into a closed-end transaction when he buys a $30,000 car and agrees to make specified monthly payments over five years. Before a consumer enters into a closed-end transaction, the lender must disclose

- The cash price;
- The total down payment;
- The amount financed;
- An itemized list of all other charges;
- The number, amount, and due dates of payments;
- The total amount of payments;
- Late payment charges;
- Penalties for prepaying the loan; and
- The lender's security interest in the item purchased.

Advertising. TILA is meant to enable consumers to shop around and compare available financing alternatives. With this goal in mind, the statute requires lenders to advertise their rates accurately. A lender cannot bait and switch; that is, it cannot advertise rates unless they are generally available to anyone who applies. Moreover, if the lender advertises any credit terms, it must tell the whole story. For example, if it advertises "Nothing down, 12 months to pay," it must also disclose the APR and other terms of repayment.

Enforcement. The FTC generally has the right to enforce TILA. In addition, consumers who have been injured by any violation (except for the advertising provisions) have the right to file suit.

Home Loans

Mortgage Loans

TILA prohibits unfair, abusive, or deceptive home mortgage lending practices. Under TILA (as amended by the Dodd-Frank Wall Street Reform and Consumer Protection Act), lenders:

- Must make a good faith effort to determine whether a borrower can afford to repay the loan. (Do lenders really have to be told this? History indicates that they do.)
- May not coerce or bribe an appraiser into misstating a home's value.
- Cannot charge prepayment penalties on adjustable rate mortgages.

Subprime loan
A loan that has an above-market interest rate because the borrower is high-risk.

TILA also regulates so-called **subprime loans** (also known as **higher-priced mortgage loans**). These are loans that have an above-market interest rate because they involve high-risk borrowers.[6] For subprime loans, a lender:

- Must collect property taxes and homeowners insurance for all first mortgages.
- May not make loans that have balloon payments (very large payments at the end).
- May not charge excessive late fees.

Home Equity Loans

Scam artists sometimes prey upon the elderly, who are vulnerable to pressure, and upon the poor, who may not have access to conventional financing. These swindlers offer home equity loans, secured by a second mortgage, to finance fraudulent repairs. (There are, of course, many legitimate lenders in the home equity business.) The following news report shows scam artists at work:

> Mack and Jacqueline Moon of East Baltimore hired a home improvement contractor to install a dropped ceiling, paneling, and cabinets in the unfinished basement of their rowhouse. The couple were determined not to put a second mortgage on their house, anticipating they would need backup money to pay medical expenses for their 10-year-old daughter, who had lupus. They signed the contract a few days later after a second salesman assured them, "We were able to work it out, and you don't have to worry about a mortgage." The Moons were never given copies of the loan documents nor told of the 17 percent interest rate. A year later, when they tried to use their home's equity to pay medical bills for their daughter, who had since died, they discovered they had given a second mortgage to the lender without knowing it.[7]

In response to such scams, Congress amended TILA to provide additional consumer safeguards for home equity installment loans. If a home equity installment loan:

- Has an APR (interest rate) that is more than 10 percentage points higher than Treasury securities, or
- The consumer must pay fees and points at closing that are higher than 8 percent of the total loan amount, then,

---

[6]In the official definition, subprime loans (also referred to as higher-priced loans) are first mortgages that have an APR 1.5 percentage points or more above the average prime offer rate or second mortgages that have an APR 3.5 percentage points or more above that index.

[7]Lorraine Mirabella, "With Hopes of Improving Their Homes, Many Owners Fall Prey to Loan Scams." Copyright 1994 by Baltimore Sun Company. Reproduced by permission of Baltimore Sun Company via Copyright Clearance Center.

- At least three business days before the loan closing, the lender must notify the consumer that (1) he does not have to go through with the loan (even if he has signed the loan agreement) and (2) he could lose his house if he fails to make payments, and
- Loans that are for less than five years may not contain balloon payments (that is, a payment at the end that is more than twice the regular monthly payment).

Rescission

This change in the law came too late to help the Moons, but they found relief in a different TILA provision. Under TILA, consumers have the right to rescind a mortgage for up to three business days after the signing (including Saturdays). However, if the lender does not comply with the disclosure provisions of TILA, the consumer can rescind for up to three *years* from the date of the mortgage.

The Moons were able to rescind the loan because the lender had not made adequate disclosure. This right of rescission does *not* apply to a *first* mortgage used to finance a house purchase or to any refinancing with the consumer's existing lender. (Note that some states have passed, and others are considering, predatory lending laws that more strictly regulate loans with high fees or interest rates.)

The table below summarizes the major provisions of TILA that we have discussed so far.

TILA applies to a transaction only if:	It is a consumer loan.
	The loan has a finance charge or will be repaid in more than four installments.
	The loan is for less than $50,000 or to secure a mortgage on real estate.
	The loan is made by someone in the business of offering credit.
In all loans regulated by TILA:	The disclosure must be clear and in meaningful sequence.
	The lender must disclose the finance charge and the APR.
For regular mortgage loans:	Lenders must verify the borrowers' ability to repay the loan. Lenders may not coerce or bribe an appraiser into misstating a home's value.Lenders cannot charge prepayment penalties on adjustable rate mortgages.
For subprime mortgage loans:	Loans with balloon payments are prohibited.
	Late fees are limited.

Credit Cards

Credit and debit cards are extremely important to most consumers, so lately they have come under increased scrutiny from Congress and the regulatory agencies.

Disclosure

TILA establishes disclosure rules for credit cards, which it calls **open-end credit**. This is a credit transaction in which the lender makes a *series* of loans that the consumer can repay at once or in installments. These rules apply to all consumer credit cards, such as VISA or

MasterCard, which permit installment payments, and even to those, such as American Express, that require the full balance to be paid each month.

In any advertisement or solicitation, the lender must disclose:

- Credit terms.
- In the case of a *teaser rate,* it must clearly disclose that the rate is introductory, when it expires, and the permanent rate that will replace it.

Before establishing an open-end credit account, the lender must disclose to the consumer

- When a finance charge will be imposed, and
- How the finance charge will be calculated (for example, whether it will be based on the account balance at the beginning of the billing cycle, the end, or somewhere in between).

In each monthly statement, the lender must disclose:

- The amount owed at the beginning of the billing cycle (the previous balance);
- Amounts and dates of all purchases, credits, and payments;
- Finance charges and late fees;
- The date by which a bill must be paid to avoid these charges; and
- Either the consequences of making the monthly minimum payment or a toll-free number that can be used to obtain such information.

Regulation of Credit Card Debt

Credit Card Act of 2009. During the economic crisis that began in 2008, many consumers struggled to pay their credit card bills. In response, Congress increased oversight of credit card companies by passing the Credit Card Act of 2009. Under the new rules, these companies:

- Cannot increase the interest rate, fees, or charges on balances a consumer has already run up unless she is more than 60 days late in making the minimum payment.
- Must give 45 days' notice before increasing a card's annual percentage rate (APR) or making any other significant change in credit terms (which gives the consumer a chance to pay off the bill ahead of the increase).
- Must re-evaluate any rate increase every six months, and then, if a decrease is warranted, it must occur within 45 days after the evaluation.
- Must give notice of the consumer's right to cancel a card and pay off the debt once the APR is changed.
- Cannot charge interest on fees or on a bill that is paid on time or during a grace period.
- Cannot charge late payment fees of more than $25 (unless one of the consumer's last six payments was late, in which case the fee may be up to $35 or the company can show that its costs justify a higher fee).
- Cannot charge late fees that are greater than the minimum payment owed;.
- Cannot charge more than one fee per event, such as a single late payment.
- Must mail the bill at least 21 days before the due date, disclose what the due date is, and set the same due date each month.

- Cannot set due dates on weekends or in the middle of the day. If the payment arrives by 5 p.m. on the day it is due, or if it arrives on the weekend after a Friday due date, it is on time.
- Must warn consumers about the impact of making minimum-only payments.
- Must apply any payments to whichever debt on the card has the highest interest rate (say, a cash advance rather than a new purchase).
- Must offer consumers the right to set a fixed credit limit. Consumers cannot be charged a fee if the company accepts charges above that limit unless the consumer has agreed to the fee.
- Cannot issue credit cards to people under 21 unless the young person has income or the application is co-signed by someone who can afford to pay the bills, such as a parent or spouse. The co-signer must also approve any increase in the credit limit.

Ethics Each of the rules in the previous section was aimed at eliminating existing abuses. Should Congress really have to tell credit card companies that they cannot charge interest and fees on a bill that is paid on time? What about setting due dates on a Sunday and then charging a late fee if payment arrives on Monday? To replace income lost by this statute, some companies are now charging $1 per month for any consumer who elects to receive statements by mail. That is a green policy—in more ways than one. What Life Principles might the executives of credit card companies use when setting policies?

Liability

Stolen cards. Your wallet is missing, and with it your cash, your driver's license, a photo of your dog, a Groupon, and—oh, no!—all your credit cards! It is a disaster, to be sure. But it could have been worse. There was a time when you would have been responsible for every charge a thief rang up. **Now, under TILA, you are liable only for the first $50 in charges the thief makes before you notify the credit card company.** If you call the company before any charges are made, you have no liability at all. But if, by the time you contact the company, a speedy robber has completely furnished her apartment on your card, you are still liable only for $50. Of course, if you carry a wallet full of cards, $50 for each one can add up to a sizable total. If the thief steals just your credit card number, but not the card itself, you are not liable for any unauthorized charges.

Disputes with merchants. You use your credit card to buy a new tablet computer at ShadyComputers, but when you take it out of the box, it will not even turn on. You have a major $600 problem. But all is not lost. **In the event of a dispute between a customer and a merchant, the credit card company cannot bill the customer if** (1) she makes a good faith effort to resolve the dispute, (2) the dispute is for more than $50, and (3) the merchant is in the same state where she lives or is within 100 miles of her house.

What happens if the merchant and the consumer cannot resolve their dispute, or if the merchant is not in the same state as the consumer? Clearly, credit card companies do not want to be caught in the middle between consumer and merchant. In practice, they now require all merchants to sign a contract specifying that, in the event of a dispute between the merchant and a customer, the credit card company has the right to charge back the merchant's account. If a customer seems to have a reasonable claim against a merchant, the credit card company will typically transfer the credit it has given the merchant back to the customer's account. Of course, the merchant can try to sue the customer for any money owed.

Disputes with the credit card company. The Fair Credit Billing Act (FCBA) provides additional protection for credit card holders (and for holders of so-called **revolving charge accounts**—such as those from stores). Is there anyone in America who has not sometime or other discovered an error in a credit card bill? Before Congress passed the FCBA in 1975, a dispute with a credit card company often deteriorated into an avalanche of threatening form letters that ignored any response from the hapless cardholder.

Under the FCBA:

- If, within 60 days of receipt of a bill, a consumer writes to a credit card company to complain about the bill, the company must acknowledge receipt of the complaint within 30 days.
- Within two billing cycles (but no more than 90 days) the credit card company must investigate the complaint and respond:
  - In the case of an error, by correcting the mistake and notifying the consumer
  - If there is no error, by writing to the consumer with an explanation
- Whether or not there was a mistake, if the consumer requests it, the credit card company must supply documentary evidence to support its position—for example, copies of the bill signed by the consumer or evidence that the package actually arrived.
- The credit card company cannot try to collect the disputed debt or close or suspend the account until it has responded to the consumer complaint.
- The credit card company cannot report to credit agencies that the consumer has an unpaid bill until 10 days after the response. If the consumer still disputes the charge, the credit card company may report the amount to a credit agency but must disclose that it is disputed.

In the following case, American Express made a big mistake picking on a law professor. The court's opinion was written by Abner J. Mikva, a highly regarded judge on the federal appeals court. He was clearly exasperated by American Express's arguments and used strong language to reprimand the company—and the lower court. Since Judge Mikva had served in Congress, he could speak with some authority about Congress's approach to consumer legislation.

Gray v. American Express Co.

743 F.2d 10, 240 U.S. App. D.C. 10, 1984 U.S. App. LEXIS 19033
United States Court of Appeals for the District of Columbia Circuit, 1984

Facts: In December, Oscar Gray used his American Express credit card to buy airline tickets costing $9,312. American Express agreed that Gray could pay for the tickets in 12 monthly installments. In January, Gray paid $3,500 and then in February, an additional $1,156. In March, American Express billed Gray by mistake for the entire remaining balance, which he did not pay. In April, Gray and his wife went out for dinner to celebrate their wedding anniversary. When he tried to pay with his American Express card, the restaurant told him that the credit card company had not only refused to accept the charges for the meal but had instructed the restaurant to confiscate and destroy the card. While still at the restaurant, Gray spoke on the telephone to an American Express employee, who informed him, "Your account is canceled as of now."

Gray wrote to American Express, pointing out the error. For more than a year, the company failed to respond to Gray or to investigate his claim. It then turned the bill over to a collection agency. Gray sued American Express for violating the Fair Credit Billing Act. The trial court granted summary judgment to American Express and

dismissed the complaint on the grounds that Gray had waived his rights under the act.

Issue: ***Is American Express liable to Gray for violating the FCBA?***

Excerpts from Judge Mikva's Decision: The contract between Gray and American Express provides: "We can revoke your right to use [the card] at any time. We can do this with or without cause and without giving you notice." American Express concludes from this language that the cancellation was not of the kind prohibited by the Act, even though the Act regulates other aspects of the relationship between the cardholder and the card issuer.

[T]he Act states that, during the pendency of a disputed billing, the card issuer shall not cause the cardholder's account to be restricted or closed because of the failure of the obligor to pay the amount in dispute. American Express seems to argue that, despite that provision, it can exercise its right to cancellation for cause unrelated to the disputed amount, or for no cause, thus bringing itself out from under the statute. At the very least, the argument is audacious. American Express would restrict the efficacy of the statute to those situations where the parties had not agreed to a "without cause, without notice" cancellation clause, or to those cases where the cardholder can prove that the sole reason for cancellation was the amount in dispute. We doubt that Congress painted with such a faint brush.

The effect of American Express's argument is to allow the equivalent of a "waiver" of coverage of the Act simply by allowing the parties to contract it away. Congress usually is not so tepid in its approach to consumer problems. The rationale of consumer protection legislation is to even out the inequalities that consumers normally bring to the bargain. To allow such protection to be waived by boiler plate language of the contract puts the legislative process to a foolish and unproductive task. A court ought not impute such nonsense to a Congress intent on correcting abuses in the market place.

The district court's order of summary judgment and dismissal is hereby *vacated.*

Debit Cards

Liability

So your wallet is missing, and with it your *debit* card. No problem, right—it is just like a credit card? Wrong. Debit cards look and feel like credit cards, but legally they are a different plastic altogether. Debit cards work like checks (which is why they are also called **check cards**). When you use your debit card, the bank deducts money directly from your account, which means there is no bill to pay at the end of the month (and no interest charges on unpaid bills). That is the good news.

> Debit cards look and feel like credit cards, but legally they are a different plastic altogether.

The bad news is that your liability for a stolen debit card is much greater. If you report the loss before anyone uses your card, you are not liable for any unauthorized withdrawals. If you report the theft within two days of discovering it, the bank will make good on all losses above $50. If you wait until after two days, your bank will only replace stolen funds above $500. After 60 days of receipt of your bank statement, all losses are yours: the bank will not repay any stolen funds. If an unauthorized transfer takes place using just your number, not your card, then you are not liable at all as long as you report the loss within 60 days of receiving the bank statement showing the loss. After 60 days, however, you are liable for the full amount.

Check card
Another name for a debit card.

Fees

Many people like to use debit cards to help keep track of their spending and to avoid paying the interest rates on credit cards. However, traditionally there was a large downside to debit cards: banks would charge a flat fee of $20 to $30 *each time* cardholders overdrew their bank account, no matter how small the overdraft. A customer could easily be charged

© Dmitriy Shironosov/Shutterstock.com

Did you know that your liability is much greater on a lost or stolen debit card than it is on your credit cards?

$150 in overdraft fees on $50 worth of overdrafts. Suppose that someone makes a $20 overdraft that he repays in two weeks, but in the meantime, he incurs a $27 fee. In that case, he has paid an interest rate of 3,520 percent.

Under new rules, though, banks are not allowed to overdraw an account and charge the fee unless the consumer signs up for an overdraft plan. Of course, this rule means that consumers who do not "opt in" to the overdraft plan will not be able to overdraw their account, no matter how desperate they are. (The same rule applies to ATM withdrawals.)

One other change: merchants can now offer different prices depending on how a consumer pays for a purchase—cash, credit, or debit. But they cannot vary the prices across brands—less for MasterCard than for VISA, say, or by which bank issued the card.

Credit Reports

Accuracy of Credit Reports

Gossip and rumor can cause great harm. Bad enough when whispered behind one's back, worse yet when placed in files and distributed to potential creditors. Most adults rely on credit—to acquire a house, credit cards, overdraft privileges at the bank, or even obtain a job or rent an apartment. A sullied credit report makes life immensely more difficult. A number of statutes, including the Fair Credit Reporting Act (FCRA), the Fair and Accurate Credit Transactions Act (FACTA) and Dodd-Frank regulate credit reports.

Consumer reporting agencies are businesses that supply consumer reports to third parties. A **consumer report** is any communication about a consumer's creditworthiness, character, general reputation, or lifestyle that is considered as a factor in establishing credit, obtaining insurance, securing a job, acquiring a government license, or for any other *legitimate business* need.

Under the FCRA:

- A consumer reporting agency cannot report obsolete information. Ordinary credit information is obsolete after seven years, bankruptcies after 10 years. (But if a consumer is applying for more than $150,000 of credit or life insurance, or for a job that pays more than $75,000 a year, then there is no time limit.)
- **Investigative reports** that discuss character, reputation, or lifestyle become obsolete in three *months*. An investigative report cannot be ordered without first informing the consumer.

Investigative Reports
Discuss character, reputation or lifestyle. They become obsolete in three months.

- A consumer reporting agency cannot report medical information without the consumer's permission.
- An employer cannot request a consumer report on any current or potential employee without the employee's permission. An employer cannot take action because of information in the consumer report without first giving the current or potential employee a copy of the report and a description of the employee's rights under this statute.
- Anyone who makes an adverse decision against a consumer because of a credit report must reveal the name and address of the reporting agency that supplied the information. An "adverse decision" includes denying credit or charging higher rates.

- Upon request from a consumer, a reporting agency must disclose all information in his file, the source of the information (except for investigative reports), the name of anyone to whom a report has been sent in the prior year (two years for employment purposes), and the name of anyone who has requested a report in the prior year.
- If a consumer tells an agency that some of the information in his file is incorrect, the agency must both investigate and forward the data to the information provider. The information provider must investigate and report the results to the agency. If the data are inaccurate, the information provider must so notify all national credit agencies. The consumer also has the right to give the agency a short report telling his side of the story. The agency must then include the consumer's statement with any credit reports it supplies and also, at the consumer's request, send the statement to anyone who has received a report within six months (or two years for employment purposes).

EXAM Strategy

Question: Edo applied for insurance with Geico. In calculating his premium, Geico looked at his credit history and his financial circumstances. It did not offer him the best possible premium, but this was because of his current finances, not his credit history. Was this an "adverse decision" under the FCRA, and was Geico required to notify him?

Strategy: Review the requirements of the FCRA. An adverse decision means that Edo was worse off because of a bad credit report.

Result: Edo's premium was based on his *current* situation, not his credit history. Therefore, Geico did not have to notify Edo of an adverse decision because his premium would have been the same even if his credit report had been neutral.

Access to Credit Reports and Credit Scores

Under FACTA, consumers are entitled by law to one free credit report every year from each of the three major reporting agencies: Equifax, Experian, and TransUnion. You can order these reports at **https://www.annualcreditreport.com**. Consumer advocates recommend that you check your credit reports every year to make sure they are accurate and that no one else has been obtaining credit in your name. If you find any errors, notify the agency in writing and warn it that failing to make corrections is a violation of the law. (Note, though, that many websites with similar names *pretend* to offer a free credit report but instead enroll customers in paid programs to monitor their credit reports. Be sure to go to the right website.)

Although your credit report is valuable information, you do not know how creditors will evaluate it. For that, you need to know your credit score (usually called a FICO score).[8] This number (which ranges between 300 and 850) is based on your credit report and is supposed to predict your ability to pay your bills. However, it is not automatically included as part of your credit report. But now, under Dodd-Frank, anyone who penalizes you because of your score has to give it to you for free, as well as information about how your score compares with others.

[8]It is called a FICO score because it was developed by the Fair Isaac Corporation.

Identity Theft

In identity theft, a fraudster steals the victim's personal information, such as social security number, credit card information, or mother's maiden name, and uses it to obtain credit or goods in the victim's name and otherwise wreak havoc in the victim's life. One goal of FACTA was to reduce identity theft. Therefore, in addition to your right to a free credit report each year, FACTA also created the National Fraud Alert System, which permits consumers who fear they may be the victim of identity theft to place an alert in their credit files, warning financial institutions to investigate carefully before issuing any new credit. It also requires credit bureaus to share information about identity theft.

A fraud alert does not prevent identity theft—culprits may still be able to open a new account or obtain a credit card. Therefore, many states permit a "security freeze," which prohibits any access to a consumer's credit report. Once an account is frozen, no one, including the consumer, can obtain a new line of credit. The downside is that to obtain new credit, the consumer must pay a fee to thaw the account.

Also, under the Gramm-Leach-Bliley Privacy Act of 1999, banks, other financial institutions, and consumer reporting agencies must notify a consumer (1) before disclosing any personal information to a third party or (2) if there has been unauthorized access to the consumer's sensitive personal information.[9] The company cannot disclose private information if the consumer *opts out* (that is, denies permission).

Debt Collection

Have you ever fallen behind on your car payments? That is hardly a crime—but in the past, debt collectors might have *treated* you as a criminal. They might have threatened to arrest you. Or they might have changed the password on your cell-phone account and obtained your cell-phone records so that they could pose as a police officer and call your friends, relatives, and past employers to tell them there was an arrest warrant out for you, even if this was not true.

It is bad enough to be hassled over a debt that one does, in fact, owe, but many times, consumers are threatened and harangued for debts that are not legitimate. Indeed, this author has had such an experience: a hospital billed the wrong insurance company and then notified her (at the wrong address) when the insurance company did not pay. When she failed to pay a bill she had never received and did not owe, the hospital turned it over to a collector who, in violation of state law, called her to yell, harangue, and threaten. In the end, all was resolved (she is, after all, a lawyer aware of her rights), but the experience was terribly unpleasant. Typically, companies sell their consumer debts for pennies on the dollar to collection agencies that are not overly scrupulous in ascertaining whether the debt is legitimate. Hoping for a little help from Washington? In a recent year, the FTC received 66,000 complaints about debt collectors, yet it brought enforcement action against only 10 companies.

The Fair Debt Collection Practices Act (FDCPA) is designed to protect consumers from abusive debt collection efforts. This statute provides that a collector must, within five days of contacting a debtor, send the debtor a written notice containing the amount of the debt, the name of the creditor to whom the debt is owed, and a statement that if the debtor disputes the debt (in writing), the collector will cease all collection efforts until it has sent evidence of the debt. **Also, under the FDCPA, collectors may not:**

- Call or write a debtor who has notified the collector in writing that he wishes no further contact,
- Call or write a debtor who is represented by an attorney,

---

[9]15 U.S.C. §6801.

- Call a debtor before 8:00 a.m. or after 9:00 p.m.,
- Threaten a debtor or use obscene or abusive language,
- Call or visit the debtor at work if the consumer's employer prohibits such contact,
- Imply that they are attorneys or government representatives when they are not, or use a false name,
- Threaten to arrest consumers who do not pay their debts,
- Make other false or deceptive threats—that is, threats that would be illegal if carried out or which the collector has no intention of doing—such as suing the debtor or seizing property,
- Contact acquaintances of the debtor for any reason other than to locate the debtor (and then only once), or
- Tell acquaintances that the consumer is in debt.

Of course, these rules do not prevent the collector from filing suit against the debtor.

In the event of a violation of the FDCPA, the debtor is entitled to damages, court costs, and attorney's fees. The FTC also has authority to enforce the Act.

In the following case, a collection agency skates close to the edge. Does it go too far?

You be the Judge

Brown v. Card Service Center

464 F.3d 450; 2006 U.S. App. LEXIS 24579
United States Court of Appeals for the Third Circuit, 2006

Facts: Card Service Center (CSC) sent Elizabeth Brown a collection letter demanding payment of a delinquent credit card balance of $1,874. The letter said:

> "You are requested to contact the Recovery Unit of the Card Service Center…to discuss your account. Refusal to cooperate could result in a legal suit being filed for collection of the account.
>
> You now have five (5) days to make arrangements for payment of this account. Failure on your part to cooperate could result in our forwarding this account to our attorney with directions to continue collection efforts."

Brown did not contact CSC within five days, and CSC did nothing other than send her more collection letters.

Brown filed suit, alleging that CSC had violated the FDCPA. She alleged that the letter was deceptive because the company never had any intention of carrying out its threats. The district court granted CSC's motion to dismiss. Brown appealed.

Issue: ***Did CSC's letter violate the FDCPA?***

Argument for Brown: CSC's letter indicated that there were two options: a lawsuit or referral to an attorney. Neither happened, and CSC knew when it sent the letter that neither would happen. This letter was an empty threat, plain and simple—exactly the type of behavior the FDCPA prohibits. It is deceptive for CSC to assert that it *could* take an action that it had no intention of taking and has never or very rarely taken before.

It is possible that a sophisticated debtor would realize that CSC had no intention of filing suit against Brown, but the point of the FCDPA is to protect all consumers, even those who are unsophisticated. As Supreme Court Justice Hugo Black observed, our laws "are made to protect the trusting as well as the suspicious."

Argument for CSC: The letter said "could," not "will." It did not imply that legal action was imminent, only that it was possible. This was not a threat, it was a statement of fact—CSC could file suit if it wanted. That was an option available to CSC, whether or not the company elected to pursue it.

Equal Credit Opportunity Act

The Equal Credit Opportunity Act (ECOA) prohibits any creditor from discriminating against a borrower because of race, color, religion, national origin, sex, marital status, age (as long as the borrower is old enough to enter into a legal contract), or because the borrower is receiving welfare. A lender must respond to a credit application within 30 days. If a lender rejects an application, it must either tell the applicant why or notify him that he has the right to a written explanation of the reasons for this adverse action. The following news report illustrates the types of abuses that the ECOA is designed to prevent.

Florence and Joe made an offer to buy a new home at the Meadowood housing development near Tampa. The developer accepted their offer, contingent upon their obtaining a mortgage. When the couple filed an application with Rancho Mortgage and Investment Corp., they were surprised by the hostility of Rancho's loan processor. She requested information they had already supplied and repeatedly questioned them about whether they intended to occupy the house, which was about 80 miles from their jobs. Florence and Joe insisted they wanted to live near their son and daughter-in-law and escape city crime. Rancho turned down their mortgage, refusing to give either an oral or a written explanation. The house was sold to another buyer.

Joe and Florence didn't get mad, they got even. They sued under the ECOA. Rancho was ordered to pay damages to the African American couple.[10]

As the following case illustrates, the ECOA protects against a broad range of wrongdoing.

Treadway v. Gateway Chevrolet Oldsmobile Inc.

362 F.3d 971, 2004 U.S. App. LEXIS 6325
United States Court of Appeals for the Seventh Circuit, 2004

Facts: Gateway Chevrolet Oldsmobile, a car dealership, sent an unsolicited letter to Tonja Treadway notifying her that she was "pre-approved" for the financing to purchase a car. Gateway did not provide financing itself; instead, it arranged loans through banks or finance companies.

Treadway called the dealer to say that she was interested in purchasing a used car. She divulged her social security number so that Gateway could obtain her credit report. Based on this report, the dealer determined that Treadway was not eligible for financing. This was not surprising, given that Gateway had purchased Treadway's name from a list of people who had recently filed for bankruptcy.

Instead of applying for a loan on behalf of Treadway, Gateway called her and invited her to come to the dealership. There, she was told that Gateway had found a bank that would finance her transaction, but only if she purchased a new car and provided a co-signer. Treadway agreed to purchase a new car and came up with Pearlie Smith, her godmother, to serve as a co-signer.

Concerned as it was with customer convenience, Gateway had an agent deliver papers directly to Smith's house to be signed immediately. If Smith had read the papers before she signed them, she might have realized that she had committed herself to be the sole purchaser and owner of the car. But she had no idea that she was the owner until she began receiving bills on the car loan. After Treadway made the first payment on behalf of Smith, both women refused to pay more—Smith because she did not want a new car; Treadway because the car was not hers. The car was repossessed, but the financing company continued to demand payment.

On closer inspection, it appears that Gateway was running a scam. It would lure desperate prospects off the bankruptcy rolls and into the showroom with promises

[10]Robert J. Bruss, "Home Buyers Sue Mortgage Lender for Racial Discrimination," *Tampa Tribune*, November 5, 1994, p. 3.

of financing for a used car, and then sell a new car to their "co-signer" (who was, in fact, the sole signer). Instead of selling a used car to Tonja Treadway, Gateway sold a new car to Pearlie Smith.

Treadway filed suit against Gateway, alleging that it had violated the ECOA by not notifying her that it had taken an adverse action against her. The district court granted Gateway's motion for summary judgment on the grounds that Gateway had not committed an adverse action under the ECOA. An appeal followed.

Issue: ***Did Gateway violate the ECOA?***

Excerpts from Judge Cudahy's Decision: The term "adverse action" is defined in relevant part by the ECOA as "a denial or revocation of credit." By unilaterally deciding not to send Treadway's application to *any* lender, Gateway effectively denied credit to Treadway. Whether it is the lender or the dealership that makes the decision, both the action and the outcome are the same. In both cases, the decision maker (1) reviews the applicant's credit report to determine whether she is creditworthy, (2) makes a determination adverse to the applicant (i.e., that she is not creditworthy), (3) decides not to proceed any further in arranging credit and (4) as a result the applicant is not granted credit. There is no logical reason why these same steps would be considered an "adverse action" when taken by a lender but not when taken by a dealership, given that the result is the same in either case.

If an automobile dealership that decides against referring a particular applicant to any lender need not provide notice of this decision to the applicant, then it becomes significantly easier for it to discriminate. [I]f an applicant never receives notice, it will be difficult for her to ever determine that she was the victim of discrimination. This is particularly true because, as was the case here, without proper notice, the applicant may assume that her application *was* sent to lenders, and it was the lenders who did the rejecting. Car dealers could throw the credit report of every minority applicant in the "circular file" and none would be the wiser.

Therefore, based on the foregoing analysis, we find that Gateway's action constitutes an "adverse action" for purposes of the ECOA.

Consumer Leasing Act

If you, like many other consumers, lease a car rather than buy it, you are protected under the Consumer Leasing Act (CLA). The CLA does not apply to any lease for more than $50,000 or to the rental of real property—that is, to house or apartment leases. **Before a lease is signed, a lessor must disclose the following in writing:**

- All required payments, including deposits, down payments, taxes, and license fees,
- The number and amount of each monthly payment and how payments are calculated,
- Balloon payments (that is, payments due at the end of the lease),
- Required insurance payments,
- Annual mileage allowance,
- The total amount the consumer will have paid by the end of the lease,
- Available warranties,
- Maintenance requirements and a description of the lessor's wear and use standards,
- Penalties for late payments,
- The consumer's right to purchase the leased property, and at what price,
- The consumer's right to terminate a lease early, and
- Any penalties for early termination.

EXAM Strategy

Question: Clyde goes into a Tesla dealership to investigate buying an electric sports car. He does not look as if he can afford a six-figure purchase, so the sales staff orders a credit report on him. After all, no point in wasting their time. Do they have the right to order a report on Clyde? Which consumer statute applies?

Strategy: The FCRA regulates the issuance of consumer reports. These reports can be used only for a legitimate business need.

Result: A car dealership cannot obtain a consumer report on someone who simply asks general questions about prices and financing or who wants to test-drive a car; nor can the dealer order a report to use in negotiations. However, a dealer has the right to a report that is needed to arrange financing requested by the consumer or to verify a buyer's creditworthiness when he presents a personal check to pay for the vehicle.

Magnuson-Moss Warranty Act

When Senator Frank E. Moss sponsored the Magnuson-Moss Warranty Act, this is how he explained the need for such a statute:

> [W]arranties have for many years confused, misled, and frequently angered American consumers.... Consumer anger is expected when purchasers of consumer products discover that their warranty may cover a 25-cent part but not the $100 labor charge, or that there is full coverage on a piano so long as it is shipped at the purchaser's expense to the factory.... There is a growing need to generate consumer understanding by clearly and conspicuously disclosing the terms and conditions of the warranty and by telling the consumer what to do if his guaranteed product becomes defective or malfunctions.[11]

The Magnuson-Moss Warranty Act does not require manufacturers or sellers to provide a warranty on their products. **The Act does require any supplier that offers a written warranty on a consumer product that costs more than $15 to disclose the terms of the warranty in simple, understandable language *before the sale*.** This statute applies only to written warranties on goods (not services) sold to consumers. It does cover sales by catalog or on the Internet. Required disclosure includes the following:

- The name and address of the person the consumer should contact to obtain warranty service,
- The parts that are covered and those that are not,
- What services the warrantor will provide, at whose expense, and for what period of time, and
- A statement of what the consumer must do and what expenses he must pay.

Although suppliers are not required to offer a warranty, if they do offer one, they must indicate whether it is *full* or *limited*. Under a **full warranty,** the warrantor must promise to fix a defective product for a reasonable time without charge. If, after a reasonable number of

[11] Quoted in David G. Epstein and Steve H. Nickles, *Consumer Law* (Eagan, Minn.: West, 1981).

efforts to fix the defective product, it still does not work, the consumer must have the right to a refund or a replacement without charge; but the warrantor is not required to cover damage caused by the consumer's unreasonable use.

Consumer Product Safety

In 1969, the federal government estimated that consumer products caused 30,000 deaths, 110,000 disabling injuries, and 20 million trips to the doctor. Toys were among the worst offenders, injuring 700,000 children a year. Children were cut by Etch-a-Sketch glass panels, choked by Zulu gun darts, and burned by Little Lady toy ovens. Although injured consumers had the right to seek damages under tort law, the goal of the Consumer Product Safety Act of 1972 (CPSA) was to prevent injuries in the first place. This act created the Consumer Product Safety Commission (CPSC) to evaluate consumer products and develop safety standards. Manufacturers must report all potentially hazardous product defects within 24 hours of discovery. The Commission can impose civil and criminal penalties on those who violate its standards. Individuals have the right to sue under the CPSA for damages, including attorney's fees, from anyone who knowingly violates a consumer product safety rule. You can find out about product recalls or file a report on an unsafe product at the Commission's website (**http://www.cpsc.gov**) or at **saferproducts.gov.**

Ethics Imagine that you are Robert Eckert, chairman and CEO of Mattel, Inc. Your company has sold millions of Jeep Wrangler Power Wheels. These toys are designed for children as young as two years old. You have just been notified that 150 of the cars have caught on fire, while thousands of others have overheated. In some cases, these toys have burned so fiercely that they have caught their garages on fire, endangering all of the home's occupants. You know that under CPSC rules, you are required to report toy defects within 24 hours. You also know that making the required report could have a significant impact on Mattel's profitability. What would you do?

In reality, Mattel decided that it ought to figure out what the problem was before reporting anything to the CPSC. In the end, it delayed months. Eckert was quoted as saying that the law was unreasonable and the company would not follow it.[12]

Is Mattel's stance ethical? What Life Principle is he applying?

Chapter Conclusion

Virtually no one will go through life without reading an advertisement, ordering online, borrowing money, acquiring a credit report, or using a consumer product. It is important to know your rights.

[12]Based on an article by Nicholas Casey and Andy Pasztor, "Safety Agency, Mattel Clash Over Disclosures," *The Wall Street Journal*, September 4, 2007, p. A1.

Exam Review

1. **UNFAIR PRACTICES** The Federal Trade Commission (FTC) prohibits "unfair and deceptive acts or practices." A practice is unfair if it violates public policy or if it meets the following three tests:
   - It causes a substantial consumer injury.
   - The harm of the injury outweighs any countervailing benefit.
   - The consumer could not reasonably avoid the injury. (pp. 979–980)

2. **DECEPTIVE ADVERTISEMENTS** The FTC considers an advertisement to be deceptive if it contains an important misrepresentation or omission that is likely to mislead a reasonable consumer. (pp. 978–979)

3. **BAIT-AND-SWITCH** FTC rules prohibit bait-and-switch advertisements. A merchant may not advertise a product and then disparage it to consumers in an effort to sell a different item. (p. 980)

4. **MERCHANDISE BOUGHT BY MAIL, BY TELEPHONE, OR ONLINE** Under FTC rules for this type of merchandise, sellers must ship an item within the time stated or, if no time is given, within 30 days after receipt of the order. (p. 980)

5. **DO-NOT-CALL REGISTRY** The FTC prohibits telemarketers from calling telephone numbers listed on its do-not-call registry. Telemarketers may not make robocalls unless without written permission from the person being called. (p. 980)

6. **UNORDERED MERCHANDISE** Consumers may keep as a gift any unordered merchandise that they receive in the mail. (p. 981)

7. **DOOR-TO-DOOR RULES** Under the FTC door-to-door rules, a salesperson is required to notify the buyer that she has the right to cancel the transaction prior to midnight of the third business day thereafter. (p. 981)

8. **TILA DISCLOSURE** In all loans regulated by the Truth in Lending Act, the disclosure must be clear and in meaningful sequence. The lender must disclose the finance charge and the annual percentage rate. (pp. 982–983)

9. **MORTGAGES** Lenders must make a good faith effort to determine whether a borrower can afford to repay the loan. They may not coerce or bribe an appraiser into misstating a home's value. Nor may they charge prepayment penalties. (p. 984)

10. **SUBPRIME LOANS** For subprime loans, a lender:
    - May not make loans with balloon payments.
    - Is limited in the late fees it may charge. (p. 984)

11. **HOME EQUITY LOANS** In the case of a high-rate home equity loan, the lender must notify the consumer at least three business days before the closing that (1) he does not have to go through with the loan (even if he has signed the loan agreement) and (2) he could lose his house if he fails to make payments. If the

duration of a high-rate home equity loan is less than five years, it may not contain balloon payments. (pp. 984–985)

12. **RESCINDING A MORTGAGE** Under TILA, consumers have the right to rescind a mortgage (other than a first mortgage) for three business days after the signing if the lender is not the same as for the first mortgage. If the lender does not comply with the disclosure provisions of TILA, the consumer may rescind for up to three years from the date of the mortgage. (p. 985)

EXAM Strategy

Question: In August, Ethel went to First American Mortgage and Loan Association of Virginia (the Bank) to sign a second mortgage on her home. Her first mortgage was with a different bank. She left the closing without a copy of the required TILA disclosure forms. Ethel defaulted on her loan payments, and, the following May, the Bank began foreclosure proceedings on her house. In June, she notified the Bank that she wished to rescind the loan. Does Ethel have a right to rescind the loan 10 months after it was made?

Strategy: In questions about mortgages, it is important to notice if the question involves a first or subsequent mortgage because the rules are different. Also, it matters whether the bank is the same for both mortgages. (See the "Result" at the end of this section.)

13. **CREDIT V. DEBIT CARDS** Under TILA, a *credit* card holder is liable only for the first $50 in unauthorized charges made before the credit card company is notified that the card was stolen. If, however, you wait more than two days to report the loss of a *debit* card, your bank will reimburse you only for losses in excess of $500. If you fail to report the lost debit card within 60 days of receipt of your bank statement, the bank is not liable at all. (p. 989)

14. **CREDIT CARD DEBT** Credit card companies cannot increase the interest rate, fees, or charges on balances unless the consumer is more than 60 days late in making the minimum payment, nor can they charge interest or fees on a bill that is paid on time or during the grace period. Credit card companies must give 45 days' notice before increasing a card's APR. (pp. 986–987)

15. **CREDIT CARD DISPUTE** In the event of a dispute between a customer and a merchant, the credit card company cannot bill the customer if:

- She makes a good faith effort to resolve the dispute,
- The dispute is for more than $50, and
- The merchant is in the same state where she lives or is within 100 miles of her house. (pp. 987–989)

16. **MORE CREDIT CARD DISPUTES** Under the Fair Credit Billing Act, a credit card company must promptly investigate and respond to any consumer complaints about a credit card bill. (p. 988)

17. **DEBIT CARD FEES** Banks may not overdraw an account and charge an overdraft fee unless the consumer signs up for an overdraft plan. (pp. 989–990)

18. CREDIT REPORTS Under the Fair Credit Reporting Act:

- A consumer report can be used only for a legitimate business need,
- A consumer reporting agency cannot report obsolete information,
- An employer cannot request a consumer report on any current or potential employee without the employee's permission, and
- Anyone who makes an adverse decision against a consumer because of a credit report must reveal the name and address of the reporting agency that supplied the negative information. (pp. 990–991)

19. ACCESS TO CREDIT REPORTS AND CREDIT SCORES The Fair and Accurate Credit Transactions Act permits consumers to obtain one free credit report every year from each of the three major reporting agencies. Also, anyone who penalizes a consumer because of her credit score must give it to her at no charge. (p. 991)

20. DEBT COLLECTION Under the Fair Debt Collection Practices Act, a debt collector may not harass or abuse debtors. (pp. 992–993)

21. ECOA The Equal Credit Opportunity Act prohibits any creditor from discriminating against a borrower on the basis of race, color, religion, national origin, sex, marital status, age, or because the borrower is receiving welfare. (pp. 994–995)

EXAM Strategy

Question: Kathleen, a single woman, applied for an Exxon credit card. Exxon rejected her application without giving any specific reason and without providing the name of the credit bureau it had used. When Kathleen asked for a reason for the rejection, she was told that the credit bureau did not have enough information about her to establish creditworthiness. In fact, Exxon had denied her credit application because she did not have a major credit card or a savings account, she had been employed for only one year, and she had no dependents. Did Exxon violate the law?

Strategy: Exxon violated two laws. Review the statutes in the "Consumer Credit" section of the chapter. (See the "Result" at the end of this section.)

22. CONSUMER LEASING ACT This statute applies to any lease up to $50,000 (except for real property). The lessor is required to make certain disclosures before the lease is signed. (pp. 995–996)

23. WARRANTIES The Magnuson-Moss Warranty Act requires any supplier that offers a written warranty on a consumer product costing more than $15 to disclose the terms of the warranty in simple and readily understandable language before the sale. (pp. 996–997)

24. CONSUMER PRODUCT SAFETY The Consumer Product Safety Commission evaluates consumer products and develops safety standards. (p. 997)

Question: Joel was two years old and his brother, Joshua, was three when their father left both children asleep in the rear seat of his automobile while visiting a friend. A cigarette lighter was on the dashboard of the car. After awaking, Joshua began playing with the lighter and set fire to Joel's diaper. Do the parents have a claim against the manufacturer of the lighter under the Consumer Product Safety Act?

Strategy: The CPSA regulates unsafe products. Was the cigarette lighter unsafe? (See the "Result" at the end of this section.)

12. Result: Ethel entered into a second mortgage that was not from the same bank as her first mortgage. Therefore, under TILA, Ethel had an automatic right to rescind for three business days. However, because the lender did not give the required forms to her at the closing, she could rescind for up to three years.

21. Result: The court held that Exxon violated both the Fair Credit Reporting Act (FCRA) and the Equal Credit Opportunity Act (ECOA). The FCRA requires Exxon to tell Kathleen the name of the credit bureau that it used. Under the ECOA, Exxon was required to tell Kathleen the real reasons for the credit denial.

24. Result: The court held that the plaintiff did not have a claim because there was no evidence that the manufacturer had knowingly violated a consumer product safety rule.

Multiple-Choice Questions

1. Dell advertised that a computer came with particular software. In fact, the software was not available for several months. Instead, Dell sent customers a coupon for the software "when available." What did Dell do wrong?

I. Failed to offer buyers the opportunity to cancel their orders
II. Did not automatically cancel the orders
III. Did not ship the software within 30 days

(a) I and II
(b) I, II, and III
(c) I and III
(d) II and III

2.

> **GET ENOUGH BROADLOOM TO CARPET ANY AREA OF YOUR HOME OR APARTMENT UP TO 150 SQUARE FEET CUT, MEASURED, AND READY FOR INSTALLATION FOR ONLY $77.**
> **GET 100% DUPONT CONTINUOUS FILAMENT NYLON PILE BROADLOOM.**
> **CALL COLLECT**

When customers called the number provided, New Rapids Carpet Center, Inc., sent salespeople to visit them at home to sell them carpet that was not as advertised—it

was not continuous filament nylon pile broadloom, and the price was not $77. What set of rules has New Rapids violated?

(a) Unordered merchandise
(b) Consumer Product Safety Act
(c) Bait and switch
(d) Fair Credit Reporting Act

3. Which of the following laws set limits on interest rates?

(a) State usury laws
(b) TILA and state usury laws
(c) TILA
(d) None; there are no limits on interest rates

4. Companies must obtain permission from a consumer before charging for overdrafts on:

(a) Debit cards
(b) Credit cards
(c) Neither
(d) Both

5. You notice a charge on your credit card bill of $149.99 for a kayak. This seems very strange to you because you have not purchased a kayak. What do you need to do to avoid having to pay this charge?

(a) Call the store
(b) Call the credit card company
(c) Write the store
(d) Write the credit card company

Essay Questions

1. **YOU BE THE JUDGE WRITING PROBLEM** Process cheese food slices must contain at least 51 percent natural cheese. Imitation cheese slices, by contrast, contain little or no natural cheese and consist primarily of water, vegetable oil, flavoring, and fortifying agents. Kraft, Inc., makes Kraft Singles, which are individually wrapped process cheese food slices. When Kraft began losing market share to imitation slices that were advertised as both less expensive and equally nutritious as Singles, Kraft responded with a series of advertisements informing consumers that Kraft Singles cost more than imitation slices because they are made from 5 ounces of milk. Kraft does use 5 ounces of milk in making each Kraft Single, but 30 percent of the calcium contained in the milk is lost during processing. Imitation slices contain the same amount of calcium as Kraft Singles. Are the Kraft advertisements deceptive? **Argument for Kraft:** This statement is completely true—Kraft does use 5 ounces of milk in each Kraft Single. The FTC is assuming that the only value of milk is the calcium. In fact, people might prefer having milk rather than vegetable oil, regardless of the calcium. **Argument for the FTC:** It is deceptive to advertise more milk if the calcium is the same after all the processing.

2. Josephine was a 60-year-old widow who suffered from high blood pressure and epilepsy. A bill collector from Collections Accounts Terminal, Inc., called her and demanded that she pay $56 she owed to Cabrini Hospital. She told him that Medicare was supposed to pay the bill. Shortly thereafter, Josephine received a letter from Collections that stated:

   > You have shown that you are unwilling to work out a friendly settlement with us to clear the above debt. Our field investigator has now been instructed to make an investigation in your neighborhood and to personally call on your employer. The immediate payment of the full amount, or a personal visit to this office, will spare you this embarrassment.

   Has Collections violated the law?

3. Thomas worked at a Sherwin-Williams paint store that James managed. Thomas and James had a falling out when, according to Thomas, "a relationship began to bloom between Thomas and one of the young female employees, the one James was obsessed with." After Thomas quit, James claimed that Thomas owed the store $121. Sherwin-Williams reported this information to the Chilton credit reporting agency. Thomas sent a letter to Chilton disputing the accuracy of the Sherwin-Williams charges. Chilton contacted James who confirmed that Thomas still owed the money. Chilton failed to note in Thomas's file that a dispute was pending. Thereafter, two of Thomas's requests for credit cards were denied. Have James and Chilton violated the Fair Credit Reporting Act?

4. In October, Renie Guimond discovered that her credit report at TransUnion incorrectly stated that she was married, used the name "Ruth Guimond," and had a credit card from Saks Fifth Avenue. After she reported the errors, TransUnion wrote her in November to say that it had removed this information. However, in March, TransUnion again published the erroneous information. The following October, TransUnion finally removed the incorrect information from her file. Guimond was never denied credit because of these mistakes. Is TransUnion liable for violating the Fair Credit Reporting Act?

5. Thomas Waldock purchased a used BMW 320i from Universal Motors, Inc. It was warranted "to be free of defects in materials or workmanship for a period of three years or 36,000 miles, whichever occurs first." Within the warranty period, the car's engine failed, and upon examination, it was found to be extensively damaged. Universal denied warranty coverage because it concluded that Waldock damaged the engine by over-revving it. Waldock vehemently disputed BMW's contention. He claimed that, while the car was being driven at a low speed, the engine emitted a gear-crunching noise, ceased operation, and would not restart. Is Universal in violation of the law?

6. **ETHICS** After TNT Motor Express hired Joseph Bruce Drury as a truck driver, it ordered a background check from Robert Arden & Associates. TNT provided Drury's social security number and date of birth, but not his middle name. Arden discovered that a Joseph *Thomas* Drury, who coincidentally had the same birth date as Joseph *Bruce* Drury, had served a prison sentence for drunk driving. Not knowing that it had the wrong Drury, Arden reported this information to TNT, which promptly fired Drury. When he asked why, the TNT executive refused to tell him. Did TNT violate the law? Whether or not TNT was in violation, did its executives behave ethically? Who would have been harmed or helped if TNT managers had informed Drury of the Arden report?

Discussion Questions

1. Should employers use credit checks as part of the hiring process? On one hand, each year employers suffer losses of $55 million because of workplace violence, while retailers lose $30 *billion* a year from employee theft. Those who commit fraud are often living above their means. On the other hand, there is no evidence that workers with poor credit reports are more likely to be violent, steal from their employers, or quit their jobs. And refusing to hire someone with a low credit score may simply be kicking him when he is down. What would you do if you were an employer?

2. The fee on a debit card overdraft can be as high or higher than the amount taken out. Instead of overdrawing their accounts, consumers would be much better off either not spending the money, using a credit card, or paying cash. Typically, the people most likely to sign up for overdraft "protection" are those who can least afford it—they have maxed out their credit cards and used up any home equity. Is it ethical for a bank to offer an overdraft plan?

3. Look at the section entitled "Credit Card Act of 2009" on page 986. All of these activities used to be legal. Which ones were unethical?

4. Go to **youtube.com** and search for "free credit reports." Watch the advertisements for **freecreditreport.com.** Although the characters repeat the word, "free" over and over, in fact the reports are not free unless the consumer signs up for the paid credit monitoring service. At the end of the ad, a voice quickly says, "Offer applies with enrollment in Triple Advantage." Are these ads deceptive under FTC rules? Are they ethical according to your Life Principles?

5. Advertisements for Listerine mouthwash claimed that it was as effective as flossing in preventing tooth plaque and gum disease. This statement was true, but only if the flossing was done incorrectly. In fact, many consumers do floss incorrectly. However, if flossing is done right, it is more effective against plaque and gum disease than Listerine. Is this advertisement deceptive?

CHAPTER 40

Environmental Law

© Werner H. Kunz/Flickr/Getty

"When my mother was left a widow almost 50 years ago, she taught school to support her family. A few years after my father's death, she took her savings and bought a small commercial building on a downtown lot in our little town in Oregon. The building, she said, would offer what my father couldn't—a source of support in her old age. In one half of the building was a children's clothing store, in the other a dry cleaner. The two stores served Main Street shoppers for years."

The building that once represented security has produced a menace with the potential to bankrupt my mother.

"Now the building that once represented security has produced a menace with the potential to bankrupt my mother. The discovery of contamination in city park well water triggered groundwater tests in the area. Waste products discarded by dry cleaners were identified as a likely source of contamination. Although a dry cleaner hasn't operated for 20 years on my mother's property, chemicals remain in the soil. Mother knew nothing of this hazard until a letter came from the Oregon Department of Environmental Quality. It said she should decide if she would oversee further testing and cleanup herself or if she would let the government handle it. In either case, my mother would pay the costs."

"The building is worth just under $70,000. Cleanup costs will be at least $200,000. At 84, my mother has enough savings to preserve her independence. She does not have enough money to bear the enormous costs of new community standards. The dry cleaner that operated in my mother's building disposed of chemicals the same way other dry cleaners did. None of these businesses was operated in a negligent fashion. They followed standards accepted by the community at the time. Now we are learning that we must live more carefully if we are to survive in a world that is safe and clean. My question is: Who will pay? Who will be responsible for cleaning up environmental messes made before we knew better?"[1]

[1]Excerpt from Carolyn Scott Kortge, "Taken to the Cleaners," *Newsweek*, October 23, 1995, p.16. Reprinted with permission of the author.

Introduction

The environmental movement in the United States began in 1962 with the publication of Rachel Carson's book *Silent Spring.* She was the first to expose the deadly—and lingering— impact of DDT and other pesticides. These chemicals spread a wide web, poisoning not only the targeted insects, but the entire food chain—fish, birds, and even humans. Since Carson first sounded the alarm, environmental issues have appeared regularly in the news—everything from acute disasters such as the 2010 explosion of BP's Deepwater Horizon drilling platform in the Gulf of Mexico to chronic concerns over pesticide residues in food.

The environmental movement began with the fervor of a moral crusade. How could anyone be against a clean environment? It has become clear, however, that the issue is more complex. It is not enough simply to say, "We are against pollution." As the opening vignette reveals, the question is: who will pay? Who will pay for past damage inflicted before anyone understood the harm that pollutants cause? Who will pay for current changes necessary to prevent damage now and in the future? Are car owners willing to spend $100 or $1,000 more per car to prevent air pollution? Are easterners ready to ban oil drilling in the Arctic National Wildlife Refuge in Alaska if that means higher prices for heating oil? Will loggers in the West give up their jobs to protect endangered species? Are all consumers willing to pay more to insulate their homes?

The first President George Bush, a Republican, said, "Beyond all the studies, the figures, and the debates, the environment is a moral issue." But Newt Gingrich, the Republican Speaker of the House of Representatives, called the Environmental Protection Agency "the biggest job-killing agency in inner-city America."[2]

The cost-benefit trade-off is particularly complex in environmental issues because those who pay the cost often do not receive the benefit. If a company dumps toxic wastes into a stream, its shareholders benefit by avoiding the expense of safe disposal. Those who fish or drink the waters pay the real cost without receiving any of the benefit. Economists use the term ***externality*** to describe the situation in which people do not bear the full cost of their decisions. Externalities prevent the market system from achieving a clean environment on its own. Most commonly, government involvement is required to realign costs and benefits.

Externality
When people do not bear the full cost of their decisions.

Environmental Protection Agency

Forty years ago, environmental abuses were (ineffectively) governed by tort law and a smattering of local ordinances. Now, environmental law is a mammoth structure of federal and state regulation. In 1970, Congress created the Environmental Protection Agency (EPA) to consolidate environmental regulation under one roof. When Congress passes a new environmental law, the EPA issues regulations to implement it. The agency can bring administrative enforcement action against those who violate its regulations.

Those who violate environmental laws are liable for civil damages. In addition, some statutes, such as the Clean Water Act, the Resource Conservation and Recovery Act, and the Endangered Species Act, provide for *criminal* penalties, including imprisonment. The EPA is not shy about seeking criminal prosecutions of those who knowingly violate these statutes and of those corporate officers who fail to prevent criminal negligence by their employees.

[2]Both men are quoted in Robert V. Percival, Alan S. Miller, Christopher H. Schroeder, and James P. Leape, *Environmental Regulation* (Boston: Little, Brown & Co., 1992), p. 1, and 1995 supp. p. 2.

AIR POLLUTION

On October 26, 1948, almost half of the 10,000 people in Donora, Pennsylvania, fell ill from air pollution. A weather inversion trapped industrial pollutants in the air, creating a lethal smog. Twenty residents ultimately died. Although air pollution rarely causes this type of acute illness, it can cause or increase the severity of diseases that are annoying, chronic, or even fatal—such as pneumonia, bronchitis, emphysema, cancer and heart disease. Exposure before birth is linked to lower IQ scores in children.

There are three major sources of air pollution: coal-burning utility plants, factories, and motor vehicles. Residential furnaces, farm operations, forest fires, and dust from mines and construction sites also contribute. Local regulation is ineffective in controlling air pollution. For instance, when cities limited pollution from factory smokestacks, plants simply built taller stacks that sent the pollution hundreds, or even thousands, of miles away. Local governments had little incentive to prevent this long-distance migration. Recognizing the national nature of the problem, Congress passed the Clean Air Act of 1963.

Clean Air Act

The Clean Air Act has four major provisions:

- **Primary standards.** Congress directed the EPA to establish **national ambient air quality standards** (NAAQSs) for primary pollution, that is, pollution that harms the public health. The EPA has created NAAQS for carbon monoxide, ozone, mercury, nitrogen dioxide, and many other substances. The EPA's mandate was to set standards that protected public health and provided an adequate margin of safety *without regard to cost*. Pollution may not exceed these limits anyplace in the country. The EPA must regularly update the rules to reflect the latest scientific evidence.
- **Secondary standards.** Congress also directed the EPA to establish NAAQSs for pollution that may not be a threat to health but has other unpleasant effects, such as obstructing visibility and harming plants or other materials.
- **State implementation plans (SIPs).** The Clean Air Act envisioned a partnership between the EPA and the states. After the EPA set primary and secondary standards, states would produce SIPs to meet the primary standards within three years and the secondary standards within a reasonable time. If a SIP was not acceptable, the EPA would produce its own plan for that state. In formulating their SIPs, states were required to identify the major sources of pollution. Each polluter would then be given a pollution limit to bring the area into compliance with national standards. The worse the pollution in a particular area, the tougher the regulations. Sanctions for unsatisfactory SIPs include withholding of federal highway funding.
- **Citizen suits.** The Clean Air Act (and many other environmental statutes) permits anyone who is or might be adversely affected by any violation to file suit against a polluter or against the EPA for failing to enforce the statute. Citizens have often been more assertive than the EPA in enforcing environmental statutes. For instance, the Arizona Center for Law in the Public Interest has sued the EPA many times for failing to impose sufficiently strict air quality standards on Phoenix and Tucson.

Is improving winter visibility at the Grand Canyon by 7 percent worth half a billion dollars?

In the following case, a power plant argued that the EPA had imposed a solution whose cost far outweighed its benefit. There is only one Grand Canyon. Should visibility there be preserved at any cost?

You be the Judge

Central Arizona Water Conservation District v. EPA

990 F.2d 1531, 1993 U.S. App. LEXIS 5881
United States Court of Appeals for the Ninth Circuit, 1993

Facts: In the Clean Air Act, Congress directed the EPA to issue regulations that would protect visibility at national landmarks. The Navaho Generating Station (NGS) is a power plant 12 miles from the Grand Canyon. In response to a citizen suit filed by the Environmental Defense Fund under the Clean Air Act, the EPA ordered NGS to reduce its sulfur dioxide emissions by 90 percent. To do so would cost NGS $430 million initially in capital expenditures and then $89.6 million annually. Average winter visibility in the Grand Canyon would be improved by at most 7 percent, but perhaps less. NGS sued to prevent implementation of the EPA's order. A court may nullify an EPA order if it determines that the agency action was arbitrary and capricious.

You Be the Judge: ***Did the EPA act arbitrarily and capriciously in requiring NGS to spend half a billion dollars to improve winter visibility at the Grand Canyon by at most 7 percent?***

Argument for NGS: This case is a perfect example of environmentalism run amok. Half a billion dollars for the *chance* of increasing winter visibility at the Grand Canyon by 7 percent? No rational person would choose to spend his own money that way, but the EPA is happy to spend NGS's. Winter visitors to the Grand Canyon would undoubtedly prefer that NGS provide them with a free lunch rather than a 7 percent improvement in visibility. The EPA order is simply a waste of money.

Argument for the EPA: Under the Clean Air Act, Congress instructed the EPA to protect visibility at national landmarks such as the Grand Canyon. How can NGS, or anyone else, measure the benefit of protecting a national treasure like the Grand Canyon? Even people who never have and never will visit it during the winter sleep better at night knowing that the canyon is protected. NGS has been causing harm to the Grand Canyon, and now it should remedy the damage.

Courts generally defer to federal agencies, whose experts deal with similar problems all the time. The EPA has greater expertise in these matters than either NGS or this court.

New Sources of Pollution

Some states had air so clean that they could have allowed air quality to decline and still have met EPA standards. However, the Clean Air Act declared that one of its purposes was to "protect and enhance" air quality. Using this phrase, the Sierra Club sued the EPA to prevent it from approving any SIPs that met EPA standards but nonetheless permitted a decline in air quality. As a result of this suit, the EPA developed a **prevention of significant deterioration (PSD)** program. **No one may undertake a building project that will cause a major increase in pollution without first obtaining a permit from the EPA.** The agency will grant permits only if an applicant can demonstrate that (1) its emissions will not cause an overall decline in air quality and (2) it has installed the **best available control technology** for every pollutant.

The PSD program prohibits any deterioration in current air quality, *regardless of health impact.* In essence, national policy values a clean environment for its own sake, apart from any health benefits.

Acid Rain

In some places, rain is now 10 times more acidic than it would naturally be. The results of acid rain are visible in the eastern United States and Canada—damaged forests, crops, and lakes. Acid is primarily created by sulfur dioxide emissions from large coal-burning utility

plants in Pennsylvania and the Midwest. Many of these plants were built before the Clean Air Act, when the easiest way to meet state and local standards (while keeping electricity prices low) was to build tall stacks that would send the sulfur dioxide far away. Terrific for Ohio, not so wonderful for Maine.

The Clean Air Act required power plants to cut their sulfur dioxide emissions using one of four methods: **(1) installing scrubbers, (2) using low-sulfur coal, (3) switching to alternative fuels (such as natural gas), or (4) trading emissions allowances.** This last alternative (often referred to as **cap and trade**) requires some explanation. Each year, every utility receives an emissions allowance, meaning that it is allowed to emit a certain number of tons of pollutants. If a company does not need its entire allowance because it uses cleaner fuels or has installed pollution control devices, it can sell the leftover allowance to other companies or stockpile the allowance for future use. Plants with high levels of pollution either buy more allowances or reduce their own emissions, depending on which alternative is cheaper. In effect, the government establishes the maximum amount of pollution, and then the market sets the price for meeting the national standard.

Cap and trade
A market-based system for reducing emissions.

The market for sulfur dioxide emissions had become reasonably efficient and effective because power plants had a financial incentive to reduce pollution through innovation. However, in 2008, a federal appeals court struck down parts of the cap and trade rules.[3] In response, the EPA issued new rules that rely more on changes in the power plants themselves than on cap and trade. The new program has its own set of allowances, rendering the old ones essentially worthless. At this writing, it is not clear if the cap and trade system will remain as effective under these new rules.

There is one additional problem in regulating sulfur dioxide emissions: **new source review**. Originally, Congress had exempted the oldest power plants and factories from the Clean Air Act on the theory that they would be very expensive to upgrade and would be replaced soon enough anyway. As it turned out, many companies discovered it was easier to patch up the old plants than it was to replace them with new, clean operations. Congress amended the Act to impose the new source review system: companies are required to upgrade pollution devices any time they renovate a plant (but not when they undertake routine maintenance). In the end, though, few plants have complied with the new source review requirements, at least in part because the EPA issued weak regulations to implement the law. For instance, the EPA defined routine maintenance as any activity that cost less than 20 percent of the value of the generating unit—which meant a company could spend hundreds of millions of dollars on so-called routine maintenance and not be required to upgrade pollution facilities. The American Lung Association termed these rules "the most harmful and unlawful air-pollution initiative ever undertaken by the federal government."[4]

Greenhouse Gases and Global Warming

During the last 100 years, the average temperature worldwide has increased between 0.5 degree and 1.1 degrees F. Thus far in this century, every year has been warmer than any year in the last century except 1998. If current trends continue, the world's average temperature during the next 100 years will rise another 2 to 6 degrees F, producing the warmest climate in the history of humankind. (By comparison, the planet is only 5 to 9 degrees F warmer than during the last Ice Age.)

The impact of this climate change is potentially catastrophic: a devastating decline in fishing stocks, the death of major forests, and a loss of farmland worldwide. Already, grain yields are down because of droughts. But even worse is the flooding that will result from a worldwide rise in sea levels. Hundreds of millions of people—including two-thirds of the world's megacities—are in coastal areas. To take one example, Bangladesh is slightly

[3] *North Carolina v. EPA*, 531 F.3d 896 (D.C. Cir., 2008).
[4] Bruce Barcott, "Changing All the Rules," *New York Times*, April 4, 2004, §6, p. 38.

smaller than Iowa, but it has a population of 160 million people, with most living at sea level. Where will they go if their country floods? What will happen to that country's nearest neighbor, India, if 100 million people swarm its borders?

Scientific evidence underlying the theory of global warming has been debated for a long time, but today, scientists accept that the burning of fossil fuels produces gases—carbon dioxide, methane, and nitrous oxide—that create a greenhouse effect by trapping heat in the Earth's atmosphere. Because rays from the sun have a high frequency, they pass easily through these gases on their way to the Earth. But once sunlight is absorbed by the Earth, it is re-emitted as infrared radiation, which cannot pass through the gases as easily. In short, more energy enters the Earth's atmosphere than leaves it. The result is global warming.[5]

Identifying the problem, however, does not illuminate the solution. Global warming is the most complex environmental problem of the new millennium because any solution requires international political cooperation coupled with major behavioral changes.

International Treaties

The United States plays a particularly important role in finding a solution because even though it has only 5 percent of the world's population, it consumes 25 percent of the world's energy. However, it is the only leading industrialized nation that refused to ratify the 1997 Kyoto Protocol. This treaty required emissions of greenhouse gases (GHGs) in developed nations to be reduced by the year 2012 to a level 5.2 percent below 1990 amounts. It did so by setting emission levels for each country. From the perspective of the United States, there were two problems with the treaty: (1) developing countries such as China and India, which are important economic competitors of the United States, were not bound by the treaty; and (2) economists had estimated the cost of compliance at $5 trillion, with little benefit to the United States.

In any event, the Kyoto Protocol has had little impact on GHGs, and not just because the United States did not taken part. Many countries were well over their treaty quotas. The same impasse continues over the second phase of the treaty (beginning in 2013)—the United States will not be bound by a treaty that excludes China and India, while those countries will not enter into an agreement when America has no real plan to cut its emissions. However, in Copenhagen in 2009, delegates of 193 countries, including both the United States and China, agreed to a "statement of intention" to reduce GHGs, to supply developing countries with green technology, and to help them adapt to climate change.

In short, while countries continue to meet and discuss solutions to climate change, they have been unable to reach an effective, binding agreement. Some commentators suggest that more effort should now focus on adapting to climate change rather than preventing it.

Domestic Regulation

The EPA had traditionally refused to regulate GHGs, arguing that it did not have statutory authority over issues of global climate change. However, in 2007, the Supreme Court ruled that the EPA must regulate these gases if they were found to endanger health or welfare.[6] Beginning in 2011, the EPA has required plants that produce at least 100,000 tons of GHGs a year (or that increase their production by 75,000 tons) to obtain a permit from the EPA. Under the permitting process, plants must use the best available technology to reduce emissions.

In addition, states are able to set their own standards, so long as they do not conflict with federal rules. Ten eastern states, including New York and New England, have adopted a cap and trade plan for GHGs that applies only to electric utilities. California has instituted a broader cap and trade program but, in 2011, a California judge halted the program, ruling that the state had to consider other alternatives. In any event, whether these limited plans can affect an international problem is uncertain.

[5]For an explanation of the physics, see Michio Kaku, *Physics of the Future* (New York: Doubleday Press, 2011).
[6]*Massachusetts v. Environmental Protection Agency*, 549 U.S. 497; 2007 U.S. LEXIS 3785.

Automobile Pollution

The Clean Air Act directed the EPA to reduce automobile pollution levels by 90 percent within six years. That goal was not achieved, although there has been significant progress. Thanks to catalytic converters and other innovations, new cars run 97 percent cleaner than 1970 models. Each car may be cleaner, but Americans are driving more—and bigger—cars more miles on more trips. As a result, motor vehicles are still a major source of air pollution, releasing more than 50 percent of the hazardous pollutants in the air.

Car manufacturers long fought federal emission standards, but after General Motors (GM) and Chrysler received a substantial government bailout in 2008, they became more cooperative with government regulators. In 2010, for the first time, the EPA issued regulations on car and light truck emissions of GHGs. By 2016, each manufacturer must produce vehicles that have an average fuel economy of 35.5 miles per gallon. These cars and trucks will be almost 40 percent more fuel efficient and cleaner than existing vehicles. The EPA predicts that these new rules will reduce climate changing gases by 30 percent between 2012 and 2016 and save owners $3,000 in fuel over a vehicle's life. But new cars will cost an average of $1,000 more.

These national standards are based on rules first issued by California. Generally, states are not permitted to adopt their own vehicle emission standards because automobile makers would struggle to meet 50 different sets of rules. But because California regulated automobile pollution before the Clean Air Act was passed, the Act grants it special permission to set even stricter pollution standards. Other states then have the right to adopt California standards instead of federal rules. California is already beginning to develop standards for 2017 so that car manufacturers will have time to comply.

Soot Particles

Produced primarily by power plants and diesel fuel, microscopic soot particles substantially increase the risk of premature death from lung cancer and other breathing and heart disorders. Because of these particles, residing in a city has the same impact on a person's lungs as living with a smoker. The life expectancy of residents in cities with the cleanest air is on average two years longer than those in the dirtiest cities. In 1997, the EPA issued regulations limiting soot. However, a lawsuit by power plant operators and automobile manufacturers delayed the rules until 2001, when the Supreme Court ruled that the EPA had the right to impose these new regulations without conducting a cost-benefit analysis.[7] In 2005, the EPA set standards for soot emissions from buses and power plants that were weaker than its own Scientific Advisory Committee had recommended. In 2009, a federal appeals court ruled that the EPA's rules did not adequately protect public health and had to be revised.[8] In 2011, an EPA report agreed that its standards were inadequate. At this writing, it has not issued new rules.

Air Toxics

Some pollutants are so potent that even tiny amounts cause harm. For instance, the EPA has never been able to identify a safe level of exposure to asbestos. Each year, 2.7 billion pounds of toxics spew into the air in the United States, causing an estimated annual increase of 3,000 cancer deaths. Two-thirds of Americans face an increased cancer risk from exposure to toxic chemicals in the air. The Clean Air Act directed the EPA to set so-called National Emission Standards for Hazardous Air Pollutants (NESHAPS), which are safety standards for toxics that provide an adequate margin of safety without regard to cost.

---

[7] *Whitman v. American Trucking Associations*, 531 U.S. 457; 2001 U.S. LEXIS 1952.

[8] *Am. Farm Bureau Fedn v. EPA*, 559 F.3d 512 (D.C. Cir., 2009).

The Environmental Defense Fund sued the EPA to force compliance with the law. Nevertheless, by 1990, the agency had proposed standards for only seven substances. Although these standards do not eliminate health risks, they are set at the lowest feasible level given existing technology, and the courts have upheld them.

In 1990 amendments to the Clean Air Act, Congress directed the EPA to set standards for each of 189 specific pollutants and any other toxics the EPA wanted to include. The EPA was permitted to base these standards initially on the **maximum achievable control technology (MACT)**.

However, it was not until 2011, more than 20 years later, that the EPA issued regulations on air toxics. For example, it has ruled that power plants must reduce these pollutants by 91 percent within five years. The EPA blames congressional budget cuts for its tardiness.

EXAM Strategy

Question: Suppose that the legislature of the state of Kentucky was unhappy with the national automobile emissions standards set by the EPA. Under the Clean Air Act, could it pass a statute setting a different standard? What if it wanted its standards for air toxics to be different from those set by the EPA?

Strategy: There are different rules for automobile emissions and other air pollutants. Why is that?

Result: Kentucky does not have the right to create its own standards for auto pollution, but it does have the right to adopt California's rules. States can set tighter, but not looser, standards for other air pollutants. It is important to have national standards for auto emissions because car manufacturers cannot produce different vehicles for each state. For the other pollutants, uniformity does not matter.

WATER POLLUTION

One day in 1993, thousands of Milwaukeeans began to suffer nausea, cramps, and diarrhea. The suspected culprit? *Cryptosporidium*, a tiny protozoan that usually resides in the intestines of cattle and other animals. Ironically, the parasite may have entered Milwaukee's water supply at a purification plant on Lake Michigan. Officials suspect that infected runoff from dairy farms spilled into Lake Michigan near the plant's intake pipe. Doctors advised those with a damaged immune system (such as AIDS patients) to avoid drinking municipal water. Most Milwaukeeans were taking no chances—more than 800,000 switched to boiled or bottled water.

> Polluted water can cause a number of loathsome diseases.

Polluted water can cause a number of loathsome diseases, such as typhus and dysentery. But by 1930, most American cities had dramatically reduced outbreaks of waterborne diseases by chlorinating their water. (The parasite that caused the Milwaukee outbreak is relatively immune to chlorine.) However, industrial discharges into the water supply have increased rapidly, with a significant impact on water quality. These industrial wastes may not induce acute illnesses like typhus, but they can cause serious diseases such as cancer. There is more at stake than health; clean water is valued for esthetics, recreation, and fishing.

Clean Water Act

In 1972, Congress passed a statute, now called the Clean Water Act (CWA), with two ambitious goals: (1) to make all navigable water suitable for swimming and fishing by 1983, and (2) to eliminate the discharge of pollutants into navigable water by 1985. Like the Clean Air Act, the CWA leaves enforcement primarily to the states, with oversight by the EPA, and permits citizen suits. Also, like the Clean Air Act, the CWA's goals have not been met.

Traditionally, the courts had interpreted the term "navigable water" very broadly to include wetlands, intermittent streams (those that do not flow all the time), and ponds that might affect other bodies of water. This definition gave the EPA the right to regulate virtually all water polluters. But the Supreme Court changed the interpretation of navigable water to *exclude* (1) intermittent streams or wetlands, (2) ponds or lakes that are not connected to open bodies of water, and (3) waterways that are all within one state, even though pollutants can leak from them into drinking water.[9] The EPA estimates that almost one-third of the nation's population drinks water fed by waterways that are no longer covered by the CWA.

The uncertainty created by these rulings has led the EPA to cut its water pollution investigations dramatically. Almost half of the largest polluters are not being investigated, simply because proving jurisdiction would be too difficult. EPA lawsuits against water polluters have fallen by almost half since the Supreme Court decided these cases.

In the case about the Grand Canyon that you read earlier, the court dealt with the issue of cost benefit analysis under the Clean Air Act. In the following case, the Supreme Court takes up the same issue under the CWA. Until this case, the CWA had been interpreted to prevent the EPA from using cost-benefit analysis (except in a situation in which the cost of technology was so high as to make it not "available"). The EPA was required to prevent pollution at any cost. The Supreme Court has now changed that interpretation of the CWA.

Entergy Corporation v. Riverkeeper, Inc.

129 S. Ct. 1498; 2009 U.S. Lexis 2498
Supreme Court of the United States, 2009

Facts: Power plants generate lots of heat. To cool down, they flush vast amounts of water through a cooling system (called "cooling water intake structures"). In the process, aquatic organisms (fish, shellfish, and plants) that live in this water get squashed against the screens ("impingement") or in the cooling system itself ("entrainment"). Under the Clean Water Act, these cooling systems must use the "best technology available for minimizing adverse environmental impact."

It took the EPA three decades to issue regulations for these structures. For new power plants, the EPA required the best technology available, which would reduce fish mortality by 98 percent. But for existing plants, the EPA permitted technology that reduced impingement by 80 to 95 percent and entrainment by 60 to 90 percent. The agency made this choice because the cost of converting existing plants to the better system would be $3.5 billion per year, which was nine times the cost of the cheaper version. In addition, the EPA reserved the right to reduce standards for specific plants if they demonstrated that the costs of compliance would be significantly greater than the benefits.

Riverkeeper, Inc., an environmental organization, challenged these regulations. The appeals court ruled that the EPA could only consider costs in two circumstances: (1) determining if they could be "reasonably borne" by the industry, or (2) if there were two ways to achieve the same goal, the EPA could mandate the cheapest option. The court said, however, that the EPA could not compare the costs and benefits of various methods and choose the technology with the best net benefits. Nor could the EPA alter standards for specific sites based on cost-benefit analysis. The Supreme Court granted *certiorari.*

Issue: ***Is the EPA permitted to use cost-benefit analysis when issuing regulations?***

---

[9] *Solid Waste Agency v. United States Army Corps of Eng'Rs*, 531 U.S. 159 (S.Ct. 2001); *Rapanos v. United States*, 547 U.S. 715 (S.Ct. 2006).

Excerpts from Justice Scalia's Decision: [The CWA] instructs the EPA to set standards for cooling water intake structures that reflect "the best technology available for minimizing adverse environmental impact." The Second Circuit took that language to mean the technology that achieves the greatest reduction in adverse environmental impacts at a cost that can reasonably be borne by the industry. That is certainly a plausible interpretation of the statute. But "best technology" may also describe the technology that *most efficiently* produces some good. In common parlance, one could certainly use the phrase "best technology" to refer to that which produces a good at the lowest per-unit cost, even if it produces a lesser quantity of that good than other available technologies.

[Plaintiffs] contend that this latter reading is precluded by the statute's use of the phrase "for minimizing adverse environmental impact." Minimizing, they argue, means reducing to the smallest amount possible, and the "best technology available for minimizing adverse environmental impacts" must be the economically feasible technology that achieves the greatest possible reduction in environmental harm. But "minimize" is a term that admits of degree and is not necessarily used to refer exclusively to the "greatest possible reduction." It seems to us, therefore, that the phrase "best technology available," even with the added specification "for minimizing adverse environmental impact," does not unambiguously preclude cost-benefit analysis.

[I]t was well within the bounds of reasonable interpretation for the EPA to conclude that cost-benefit analysis is not categorically forbidden. In the requirements challenged here, the EPA sought only to avoid extreme disparities between costs and benefits. The agency limited variances from the national performance standards to circumstances where the costs are significantly greater than the benefits of compliance. And finally, the EPA's assessment of the relatively meager financial benefits of the regulations that it adopted—reduced impingement and entrainment of 1.4 billion aquatic organisms, with annualized benefits of \$83 million, when compared to annual costs of \$389 million, demonstrates quite clearly that the agency did not select the regulatory requirements because their benefits equaled their costs.

While not conclusive, it surely tends to show that the EPA's current practice is a reasonable and hence legitimate exercise of its discretion to weigh benefits against costs. In the last analysis, even [plaintiffs] ultimately recognize that some form of cost-benefit analysis is permissible. They acknowledge that the statute's language is "plainly not so constricted as to require EPA to require industry petitioners to spend billions to save one more fish or plankton." This concedes the principle—the permissibility of at least some cost-benefit analysis—and we see no statutory basis for limiting its use to situations where the benefits are *de minimis* rather than significantly disproportionate.

The judgment of the Court of Appeals is reversed.

Industrial Discharges

Point source
A single producer of pollution.

The CWA prohibits any single producer from discharging pollution into water without a permit from the EPA. Before granting a permit, the EPA must set limits, by industry, on the amount of each type of pollution any single producer (called a **point source**) can discharge. These limits must be based on the **best available technology.** The EPA faces a gargantuan task in determining the best available technology that *each* industry can use to reduce pollution. Furthermore, standards become obsolete quickly as technology changes.

The CWA also requires the EPA to measure water quality broadly to determine if the permit system is working. Until clean water standards are met, every point source is held to the same standard, whether it is discharging into a clean ocean that can handle more pollution or a stagnant lake that cannot. Since determining the impact of a particular discharge may not be possible, especially when it is mingled with others, it is easier for the EPA to set the same standards for everyone. Easier and fairer—Congress did not want states to lure industry with promises of laxer pollution rules.

The EPA faces a major challenge regulating water discharges from power plants. To meet EPA air quality standards, many plants installed scrubbers that pull pollutants out of the air and into wastewater. This water is then discharged into rivers and lakes, where it can pollute drinking water supplies. An EPA report indicates that some people living near power plant discharges face a cancer risk that is 2,000 times normal. Although these discharges may violate the CWA, the EPA does not have enough resources to impose meaningful sanctions. In 2009, the EPA announced its intention to set new standards for discharges from power plants, but it has not done so yet.

Water Quality Standards

The CWA requires states to set EPA-approved water quality standards and develop plans to achieve them. The first step in developing a plan is to determine how each body of water is used. Standards may vary depending upon the designated use—higher for recreational lakes than for a river used to irrigate farmland. No matter what the water's designated use, standards may not be set at a level lower than its current condition. Congress is not in the business of permitting *more* pollution.

States are supposed to pay special attention to so-called **non-point sources**, that is, pollutants with no single source, such as water runoff from agricultural land or city streets. This runoff may contain gasoline, pesticides, or bacteria. Congress left non-point source pollution to the states because it is so difficult to regulate. This regulation also involves complex issues such as land use planning that are, in theory, better handled at the local level than by national fiat. However optimistic Congress may have been, to date the states have not successfully implemented this section of the CWA. They appear to lack both the political will and the technical know-how, for which they are not totally to blame. Determining the impact of individual pollutants on the overall quality of a body of water used for many different purposes is a complex problem. Land use planning requires a delicate and volatile mix of consensus and control.

Non-point source
When pollutants have no single source, such as water run-off from city streets.

As the ambitious goals set by the CWA have not been met, Congress has granted numerous extensions. At the same time, environmental advocates have filed citizen suits to force the EPA to toughen its enforcement.

Wetlands

Wetlands are the transition areas between land and open water. They may look like swamps, they may even be swamps, but their unattractive appearance should not disguise their vital role in the aquatic world. They are natural habitats for many fish and wildlife. They also serve as a filter for neighboring bodies of water, trapping chemicals and sediments. Moreover, they are an important aid in flood control because they can absorb a high level of water and then release it slowly after the emergency is past.

The CWA prohibits any discharge of dredge and fill material into wetlands without a permit. Although filling in wetlands requires a permit, many other activities that harm wetlands, such as draining them, originally did not. (However, many states require permits for draining wetlands.) After some particularly egregious abuses, the EPA issued regulations to limit the destruction of wetlands. These new regulations were, however, successfully challenged in the courts.[10] The EPA then rewrote the regulations to accomplish the same goal within the parameters set out by the courts.

Although, in theory, the government's official policy is no net loss of wetlands, the reality has been different. Since the country was settled, about half of the original 230 million acres of wetlands in the continental United States have been destroyed. In 2002, the Bush administration amended the "no net loss" rule so that it could issue waivers in some cases.

Sewage

Plumbing drains must be attached to either a septic system or a sewer line. A septic system is, in effect, a freestanding waste treatment plant. A sewer line, on the other hand, feeds into a publicly owned wastewater treatment plant, also known as a *municipal sewage plant.* **Under the CWA, a municipality must obtain a permit for any discharge from a wastewater treatment plant.** To obtain a permit, the municipality must first treat the waste to reduce its toxicity. However, taxpayers have resisted the large increases in taxes or fees necessary to

[10]*National Mining Ass'n v. U.S. Army Corps of Engineers*, 145 F.3d 1399 (D.C. Cir. 1998).

fund required treatments. Since the fines imposed by the EPA are almost always less than the cost of treatment, some cities have been slow to comply.

Between 2006 and 2009, more than a third of the sewage systems in this country admitted to violating the law by dumping incompletely treated human waste and harmful chemicals into waterways. Fewer than 20 percent of those were penalized. There have, however, been some notable successes. For instance, the Charles River in Boston, which was the inspiration for the pop song, "Dirty Water," recently received a grade of B+ by the EPA—an impressive improvement over the D it received in 1995. The river is now almost always safe for boating and is swimmable 62 percent of the time.

Other Water Pollution Statutes

The Safe Drinking Water Act of 1974:

- Requires the EPA to set national standards for contaminants potentially harmful to human health that are found in drinking water,
- Assigns enforcement responsibility to the states but permits the EPA to take enforcement action against states that do not adhere to the standards,
- Prohibits the use of lead in any pipes through which drinking water flows, and
- Requires community water systems to send every customer an annual *consumer confidence report* disclosing the level of contaminants in the drinking water. (We can only hope that consumers will remain confident after receiving the report.)

Between 2004 and 2009, 15 percent of the U.S. population had drinking water that contained hazardous chemicals and bacteria from human waste. Violations of the Safe Drinking Water Act have occurred in every state. The EPA is reluctant to sanction local governments because they are often short of money.

This 15 percent calculation is probably low, because it only includes 91 chemicals out of the 80,000 currently sold in the United States. The EPA does not regulate the others. It has not added any chemicals to the regulatory list since 2000.

The **Ocean Dumping Act of 1972** prohibits the dumping of wastes in ocean water without a permit from the EPA.

Congress passed the **Oil Pollution Act of 1990** in response to the mammoth 1989 *Exxon Valdez* tanker oil spill in Prince William Sound, Alaska. To prevent defective boats from leaking oil, this statute sets design standards for ships operating in U.S. waters. It also requires shipowners to pay for damage caused by oil discharged from their ships.

EXAM Strategy

Question: Edward lives on a ranch near Wind River. He uses water from the river for irrigation. To divert more water to his ranch, he builds a dike in the river using scrap metal, cottonwood trees, car bodies, and a washing machine. This material does not harm downstream water. Has Edward violated the CWA?

Strategy: The CWA prohibits the discharge of pollution. Was this pollution?

Result: Yes, the court ruled that the material Edward placed in the water was pollution. It was irrelevant that the material did not flow downstream.

Waste Disposal

The time is 1978. The place is 96th Street in Niagara Falls, New York. Six women are afflicted with breast cancer, one man has bladder cancer, another suffers from throat cancer. A seven-year-old boy suddenly goes into convulsions and dies of kidney failure. Other residents have chromosomal abnormalities, epilepsy, respiratory problems, and skin diseases. This street is three blocks away from Love Canal.

In 1945, Hooker Chemical Co. disposed of 21,800 tons of 82 different chemicals by dumping them into Love Canal or burying them nearby. An internal memorandum warned that this decision would lead to "potential future hazard" and be a "potential source of lawsuits." A year later, the company's lawyer wrote that "children in the neighborhood use portions of the water for swimming and, as a matter of fact, just before we left the site, we saw several young children walking down the path with what appeared to be bathing costumes in hand." He suggested that Hooker build a fence around the canal, but the company never did. Instead, it sold the land to the local school board to build an elementary school. When the company's executive vice president recommended against the sale, the company inserted a clause in the deed to eliminate the company's liability.

Schoolchildren tripped over drums of chemicals that worked their way up to the surface. Some children were burned playing with hot balls of chemical residue—what they called "fire stones"—that popped up through the ground. Homeowners noticed foul odors in their basements after heavy rains. Finally, a national health emergency was declared at Love Canal, and a joint federal-state program relocated 800 families. In 1994, Occidental Chemical Corp. (which had since bought Hooker) agreed to pay the state of New York $98 million to settle a lawsuit over Love Canal.[11] Two years later, the EPA settled its lawsuit with Occidental for $129 million. In the end, the cleanup cost almost $400 million and took 21 years to complete.

In its time, what Hooker did was not unusual. Companies historically dumped waste in waterways, landfills, or open dumps. Out of sight was out of mind. Waste disposal continues to be a major problem in the United States. It has been estimated that the cost of cleaning up existing waste products will exceed $1 *trillion*. At the same time, the country continues to produce more than 6 billion tons of agricultural, commercial, industrial, and domestic waste each year.

Two major statutes regulate wastes. The Resource Conservation and Recovery Act (RCRA) focuses on *preventing* future Love Canals by regulating the production, transportation and disposal of solid wastes, both toxic and otherwise. It also regulates spills at RCRA regulated facilities. The Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), often referred to as **Superfund**, focuses on *cleaning up* inactive or abandoned hazardous waste sites.

Resource Conservation and Recovery Act

The RCRA establishes rules for treating both hazardous wastes and other forms of solid waste (such as ordinary garbage).

Solid Waste

Before 1895, the city of New York did not collect garbage. Residents simply piled it up in the streets, causing the streets to rise 5 feet in height over the century. At present, each American generates 4.3 pounds of solid waste a *day*, an increase of 60 percent since 1960 and more waste per capita than any other country.

[11]William Glaberson, "Love Canal: Suit Focuses on Records from 1940s," *New York Times*, October 22, 1990, p. B1. Copyright © 1990 by The New York Times Co.

But most Americans never gave much thought to their waste until the infamous case of the garbage barge. The trouble arose in 1983, when the New York legislature banned new landfills (garbage dumps) on Long Island. Three years later, the landfill began to fill up in Islip, a bedroom community outside New York City. Lowell Herrelson, an Alabama businessman, offered to put the Islip garbage on a barge and ship it to another state. But once he filled the barge, no other state would take the garbage. Loaded with 3,186 tons of waste, the barge traveled over 6,000 miles in five months and was turned away by six states and three countries before returning to New York and anchoring near the Statue of Liberty. Its movements were reported daily in the newspapers and even became the subject of the *Tonight Show* monologue: "The only town to send its garbage on a 6,000-mile cruise." The garbage was ultimately burned in a Brooklyn incinerator. Islip introduced recycling and built a $38 million garbage incinerator.

The disposal of nonhazardous solid waste has generally been left to the states, but they must follow guidelines set by the RCRA. **The RCRA:**

- Bans new open dumps,
- Requires that garbage be sent to sanitary landfills,
- Sets minimum standards for landfills,
- Requires landfills to monitor nearby groundwater,
- Requires states to develop a permit program for landfills, and
- Provides some financial assistance to aid states in waste management.

Ethics Computers and other consumer electronic devices have created the most rapidly growing waste problem in the world. Containing chemicals such as lead and mercury, these products produce not only large volume, but also dangerous toxicity. Industrialized nations have found a simple solution—between 50 and 80 percent of the "e-waste" collected for recycling is sent to countries such as China, India, and Pakistan.

Once the e-waste is in Asia, adults and children, working without any protective clothing or equipment, burn the plastic casings in the open air, dismantle toner cartridges by hand, and melt circuit boards. The ground, air, and water are polluted with the residue of these toxic components. Because this disposal method is so easy and cheap (for the industrialized nations), manufacturers have not attempted to reduce toxic components in electronic products and governments have not forced them to take responsibility for safe disposal at the end of the product's life.[12]

What is the ethical obligation of developed nations to dispose of toxic e-waste?

What will you do with your old computer when you buy a new one? Staples will safely recycle e-waste, whether or not it was bought at the store, for a fee of $10. Would you pay that sum?

Underground Storage Tanks

Concerned that underground gasoline storage tanks were leaking into water supplies, Congress required the EPA to issue regulations for detecting and correcting leaks in existing tanks and establishing specifications for new receptacles. Anyone who owns property with an underground storage tank must notify the EPA and comply with regulations that require installation of leak detectors, periodic testing, and, in some cases, removal of old tanks.

[12]The Basel Action Networks, "Exporting Harm: The Techno-Trashing of Asia," February 25, 2002, available at **http://www.ban.org**.

Identifying Hazardous Wastes

The EPA must establish criteria for determining what is, and is not, hazardous waste. It must then prepare a list of wastes that qualify as hazardous.

Tracking Hazardous Wastes

Anyone who creates, transports, stores, treats, or disposes of more than a certain quantity of hazardous wastes must apply for an EPA permit. All hazardous wastes must be tracked from creation to final disposal. They must be disposed of at a certified facility. Any company that generates more than 100 kilograms of hazardous waste in any month must obtain an identification number for its wastes. When it ships this waste to a disposal facility, it must send along a manifest that identifies the waste, the transporter, and the destination. The company must notify the EPA if it does not receive a receipt from the disposal site indicating that the waste has been received.

Superfund

In the vignette that opened this chapter, an elderly woman faced financial ruin from the cost of cleaning up pollutants that her dry cleaner tenants had left. The RCRA was designed to ensure safe disposal of current hazardous wastes. In contrast, the goal of Superfund (also known as CERCLA) is to clean up hazardous wastes improperly dumped in the past.

The philosophy of Superfund is "the polluter pays." **Therefore, anyone who has *ever owned or operated* a site on which hazardous wastes are found, or who has transported wastes to the site, or who has arranged for the disposal of wastes that were released at the site, is liable for (1) the cost of cleaning up the site, (2) any damage done to natural resources, and (3) any required health assessments.** All polluters at a site are jointly and severally liable unless they can show that they were only responsible for a portion of the damages. In practical terms, this means that the EPA seeks full recovery from whichever polluters are financially sound. These defendants then seek to reduce their liability by showing that they were only responsible for part of the damage at the site.

In a "shovels first, lawyers later" approach, Congress established a revolving trust fund for the EPA to use in cleaning up sites even before obtaining reimbursement from those responsible for the damage. The trust fund was initially financed by a tax on the oil and chemical industries, which produce the bulk of hazardous waste. In 1995, however, the taxes expired, and Congress refused to renew them. Since then, the EPA has had to rely on reimbursements from polluters and congressional appropriations of about $1.2 billion a year. That sounds like a lot of money, but according to the EPA, there could be as many as 355,000 hazardous waste sites that would require up to $250 billion to restore. Currently, the EPA has a list of about 1,300 sites that represent a "'significant risk to human health or the environment."

Property owners have complained, and litigated, bitterly because:

- Current and former owners are liable even though they did nothing illegal at the time, and indeed even if they did nothing more than own property where someone else dumped hazardous wastes. In addition, officers or controlling shareholders in closely held corporations can be personally liable for operations of the company.
- Joint and several liability means that a small amount of pollution can lead to a very large damage claim.
- The expense of a Superfund cleanup can be devastating—higher than $100 million on some sites. Property owners have often viewed litigation as a better investment.
- Congress requires that land be returned to pristine condition. Owners point to scientific evidence indicating that this goal is often impossible to achieve, given

existing knowledge. Once again, cost-benefit analysis enters the picture, as property owners argue that the cost of perfection is higher than the benefit. To encourage redevelopment of contaminated land, the EPA has implemented a "Brownfields" program that bases the cleanup levels for some property on potential risk to human health. However, Superfund proponents counter that, to be safe, all hazardous wastes should be removed. They offer as Exhibit A the Forrest Glen real estate development in upstate New York. The developers knew they could buy the land cheap because it had been used as a hazardous waste dump. Instead of cleaning it up, they slapped on a bucolic name. Then chemicals oozed up on lawns.

EXAM Strategy

Question: Leo was an auto mechanic who owned his own business. One morning, after a heavy rainstorm, he noticed the edge of what turned out to be an underground storage tank sticking out of the ground. He dug it up and, without looking to see what was inside it, sent the tank to an auto salvage site. Has Leo violated the law?

Strategy: Review the requirements on waste disposal.

Result: Leo did violate the law. To start, he should have notified the EPA of the underground tank. Second, he needed to determine if the tank contained any hazardous wastes. If it did, then he needed an EPA permit to dispose of the waste. He also should have sent the tank to a certified facility, not to an auto salvage site.

Chemicals

More than 70,000 chemicals are used in food, drugs, cosmetics, pesticides, and other products. Some of these chemicals are known to accumulate in human tissue and cause, among other harm, cancer, birth defects, and neurological damage. However, only 2 percent of these 70,000 chemicals have been adequately tested to determine their total health impact. Almost 70 percent have not been tested at all. Moreover, scientists know virtually nothing about their impact on the health of wildlife.

Several federal agencies share responsibility for regulating chemicals. The Food and Drug Administration (FDA) has control over foods, drugs, and cosmetics. The Occupational Safety and Health Administration (OSHA) is responsible for protecting workers from exposure to toxic chemicals. The Nuclear Regulatory Commission (NRC) regulates radioactive substances. The EPA regulates pesticides and other toxic chemicals.

Federal Insecticide, Fungicide, and Rodenticide Act

The Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) requires manufacturers to register all pesticides with the EPA. Before registering a pesticide, the EPA must ensure that its benefits exceed its (then-known) risks. However, many of the 50,000 pesticides currently registered with the EPA were approved at a time when little was known about their risks. In 1972, Congress directed the EPA to reevaluate all registered pesticides and cancel those whose risks exceed their benefits. This process has been very slow. Before the EPA cancels a registration, the manufacturer is entitled to a formal hearing, which may take several years. In the event of an emergency, the EPA may order an immediate suspension;

otherwise, the chemical stays on the market until the hearing. If a pesticide is banned, the EPA must reimburse end users of the chemicals for their useless inventory.

Federal Food, Drug, and Cosmetic Act

The Federal Food, Drug, and Cosmetic Act requires the EPA to set maximum levels for pesticide residue in raw or processed food. The FDA can confiscate food with pesticide levels that exceed the EPA standards.

Food Quality Protection Act of 1996

The Food Quality Protection Act requires the EPA to set pesticide standards at levels that are safe for children. If the data for children are unclear, the EPA must reduce levels to one-tenth the amount now permitted in food. The EPA must also consider all sources of exposure. Thus, for example, in setting limits for pesticides on grapes, the EPA must factor in other sources of pesticides, such as drinking water.

This statute is highly controversial. The pesticide industry argues that the EPA could effectively ban many valuable chemicals for years while careful research into their impact on children is conducted. Environmental advocates, on the other hand, are dismayed that the EPA has not demanded more thorough research before setting standards for some pesticides.

Toxic Substances Control Act

The Toxic Substances Control Act (TSCA) regulates chemicals other than pesticides, foods, drugs, and cosmetics. For example, it regulates lead in gasoline and paints. **Before selling a new chemical (or an old chemical being used for a new purpose), the manufacturer must register it with the EPA.** However, *registering* a chemical under the TSCA does not require *testing* it. Under the TSCA, the EPA can require testing of a chemical only if there is evidence that it is dangerous. Since this statute was passed in 1976, the EPA has required testing of only 200 of the more than 80,000 chemicals currently sold in the United States. Thus, for example, many manufacturers have elected to remove Bisphenol A (BPA) from their products because of concern that it is dangerous, particularly for children. But they have replaced BPA with untested chemicals, such as Polyethersulfone (PES) plastic, which have some of the same characteristics as BPA—not a reassuring choice for parents trying to buy a safe bottle for their children.

Natural Resources

Thus far, this chapter has focused on the regulation of pollution. Congress has also passed statutes whose purpose is to preserve the country's natural resources.

National Environmental Policy Act

The National Environmental Policy Act of 1969 (NEPA) requires all *federal agencies* to prepare an *environmental impact statement* (EIS) for every major federal action significantly affecting the quality of the human environment. An agency need not prepare an EIS for a particular proposal if it finds, on the basis of a shorter environmental assessment (EA), that the action will not have a significant impact on the environment. An EIS is a major undertaking—often hundreds, if not thousands, of pages long. It must discuss (1) environmental consequences of the proposed action, (2) available alternatives, (3) direct and indirect effects, (4) energy requirements, (5) impact on urban quality, historic, and cultural resources, and (6) the means to mitigate adverse environmental impacts. Once a draft report is ready, the federal agency must hold a hearing to allow for outside comments.

The EIS requirement applies not only to actions *undertaken* by the federal government, but also to activities *regulated* or *approved* by the government. For instance, the following projects required an EIS:

- Expanding the Snowmass ski area in Aspen, Colorado, because approval was required by the Forest Service;
- Killing a herd of wild goats that was causing damage at the Olympic National Park (outside Seattle);
- Closing a road to create a beachside pavilion in Redondo Beach, California; and
- Creating a golf course outside Los Angeles, because the project required a government permit to build in wetlands.

The EIS process is controversial. If a project is likely to have an important impact, environmentalists almost always litigate the adequacy of the EIS. Industry advocates argue that environmentalists are simply using the EIS process to delay—or halt—any projects they oppose. In 1976, seven years after NEPA was passed, a dam on the Teton River in Idaho burst, killing 17 people and causing $1 billion in property damage. The Department of the Interior had built the dam in the face of allegations that its EIS was incomplete; it did not, for example, confirm that a large, earth-filled dam resting on a riverbed was safe. To environmentalists, this tragedy graphically illustrated the need for a thorough EIS.

Researchers have found that the EIS process generally has a beneficial impact on the environment. The mere prospect of preparing an EIS tends to eliminate the worst projects. Litigation over the EIS eliminates the next weakest group. If an agency does a good faith EIS, honestly looking at the available alternatives, projects tend to be kinder to the environment, at little extra cost.

In the following case, the Navy argues that it should be exempt from EIS requirements. Do you agree?

You be the Judge

Winter v. Natural Resources Defense Council, Inc.

555 U.S. 7; 2008 U.S. Lexis 8343
Supreme Court of the United States, 2008

Facts: The Navy wanted to conduct training exercises off the coast of California for sonar submarines. Scientists were concerned that the sounds emitted by the sonar would harm marine mammals, such as whales, dolphins, and sea lions. The Navy's EA determined that the sonar training would not adversely affect the animals or the environment, and therefore, it did not have to prepare an EIS.

Environmental groups filed suit, asking that the Navy be required to prepare an EIS and also requesting an injunction to prevent it from conducting the training exercises until the EIS was complete. The trial court ruled that the Navy had to prepare an EIS, but could nonetheless proceed with the exercises beforehand, if it took certain steps to mitigate harm to the marine mammals.

The Navy appealed, but the appellate court affirmed this decision. The Supreme Court granted *certiorari.*

You Be the Judge: ***Must the Navy prepare an EIS before it can conduct sonar training exercises?***

Argument for the Environmental Groups: Even the Navy admits that the training exercises would cause hundreds of physical injuries to marine mammals, as well as 170,000 disturbances of marine mammals' behavior. But the sonar can cause much more serious injuries than the Navy acknowledges, including permanent hearing loss, decompression sickness, and major behavioral disruptions. Moreover, in the past, sonar has been associated with mass strandings of marine mammals. Certain species—such as beaked whales—are uniquely susceptible to injury from sonar. These injuries

would not necessarily be detected by the Navy because these whales are very deep divers that spend little time at the surface.

The trial court found that there was a "near certainty" of irreparable injury to the environment and that this injury outweighed any possible harm to the Navy. The appeals court ruled that the Navy report was cursory, unsupported by evidence, and unconvincing.

The trial court did not ban all sonar exercises—it simply established rules to protect the marine mammals. Since the Navy has never tried operating under these rules, it cannot say that they are harmful. Once it prepares an EIS, it may well be able to go ahead with the sonar exercises without any limitation. But in the meantime, it is important, and required by law, to protect the animals from irreparable harm.

Argument for the Navy: Antisubmarine warfare is currently the Pacific fleet's top priority. With all due respect to the lower courts, the Navy is in the best position to determine how much harm this ban on sonar will cause to its training process. Moreover, the president—the commander in chief—determined that training with sonar is essential to national security. As the Supreme Court said last term, "Neither members of this Court nor most federal judges begin the day with briefings that may describe new and serious threats to our Nation and its people." The courts are not the best judges of national security issues.

Moreover, an EIS is only required if an action affects the quality of the *human* environment. Plaintiffs argue that they like to go on whale watching trips, observe marine mammals underwater, conduct scientific research, and photograph these animals in their natural habitats. But these pursuits are minor compared with the Navy's interest in protecting the safety of our nation.

Also, the Navy conducted an EA which revealed that these training exercises would not have a significant environmental impact. Indeed, the Navy has been conducting sonar training exercises for 40 years without a single documented sonar-related injury to any marine mammal. At most, sonar may cause temporary hearing loss or brief disruptions of marine mammals' behavioral patterns.

While it is true that, even without an EIS, the lower court would permit some use of sonar in the exercises, Navy officers testified that these restrictions would greatly undermine the value of the training. Essentially, the trial court would require submarines to turn off the sonar any time a marine animal was within 2,200 yards. The sailors would have to spend all of their time looking for animals and turning equipment on and off. The training would be virtually useless.

We do not discount the importance of plaintiffs' ecological, scientific, and recreational interests in marine mammals. Those interests, however, are plainly outweighed by the Navy's need to conduct realistic training exercises. The tradeoff in this case is simple: on the one hand is possible harm to an unknown number of marine mammals. On the other is the safety of the U.S. fleet. Any delay—and certainly the delay required to prepare an EIS—jeopardizes the safety of all of us. It is clear where the public interest lies.

Endangered Species Act

Worldwide, 25 percent of mammals, 22 percent of reptiles, and 13 percent of birds are threatened with extinction. This threat is largely caused by humans. **The Endangered Species Act (ESA):**

- Requires the Department of the Interior's Fish and Wildlife Service (FWS) to prepare a list of species that are in danger of becoming extinct;
- Requires the government to develop plans to revive these species;
- Requires all federal agencies to ensure that their actions will not jeopardize an endangered species;
- Prohibits any sale or transport of these species;
- Makes any taking of an endangered animal species unlawful (taking is defined as harassing, harming, killing, or capturing any endangered species or modifying its habitat in such a way that its population is likely to decline); and
- Prohibits the taking of any endangered plant species on federal property.

No environmental statute has been more controversial than the ESA. In theory, everyone is in favor of saving endangered species. To quote the House of Representatives Report on the ESA:

> As we homogenize the habitats in which these plants and animals evolved ... we threaten their—and our own—genetic heritage.... Who knows, or can say, what potential cures for cancer or other scourges, present or future, may lie locked up in the structures of plants which may yet be undiscovered, much less analyzed?

In practice, however, the cost of saving a species can be astronomical. One of the earliest ESA battles involved the snail darter—a 3-inch fish that lived in the Little Tennessee River. The Supreme Court upheld a decision under the ESA to halt work on a dam that would have blocked the river, flooding 16,500 acres of farmland and destroying the snail darter's habitat. To the dam's supporters, this decision was ludicrous: stopping a dam (on which $100 million in taxpayer money had already been spent) to save a little fish that no one had ever even thought of before the dam (or damn) controversy. The real agenda, they argued, was simply to halt development. Environmental advocates argued, however, that the wanton destruction of whole species will ultimately and inevitably lead to disaster for humankind. In the end, Congress overruled the Supreme Court and authorized completion of the dam. It turned out that the snail darter survived in other rivers.

© Kevin Schafer / Alamy

What price are we willing to pay to save the San Joaquin kit fox?

The snail darter was the first in a long line of ESA controversies that have included charismatic animals such as bald eagles, grizzly bears, bighorn sheep, and rockhopper penguins, but also more obscure fauna such as the Banbury Springs limpet and the triple-ribbed milkvetch. In 2007, a federal court moved to protect the delta smelt by ordering officials to shut down temporarily pumps that supplied as much as one-third of southern California's water.[13] Opponents argue that too much time and money have been spent to save too few species of too little importance.

The FWS is having an enormous battle with environmental organizations, who complain that it is too slow in listing endangered species. In the four decades since Congress passed the ESA, species have been listed at a rate of about 35 a year. Nearly 100 species have become extinct while on the list or waiting to be listed. Over the past few years, these environmental groups have asked that 1,200 species be listed as endangered. Under the statute, once the FWS receives a petition requesting endangered status for a species, it must make a ruling within 12 months. But it often misses that statutory deadline, and then environmental groups sue, which uses up agency resources in responding to the suits.

[13] *Natural Resources Defense Council v. Kempthorne*, 2007 U.S. Dist. LEXIS 91968.

The following case discusses the advantages of protecting endangered species.

Gibbs v. Babbitt

214 F.3D 483, 2000 U.S. App. Lexis 12280
United States Court of Appeals for the Fourth Circuit, 2000

Facts: The red wolf used to roam throughout the southeastern United States. Owing to wetlands drainage, dam construction, and hunting, this wolf is now on the endangered species list. The Fish and Wildlife Service (FWS) trapped the remaining red wolves, placed them in a captive breeding program, and then reintroduced them into the wild. Ultimately, the FWS reintroduced 75 wolves into the 120,000-acre Alligator River National Wildlife Refuge in eastern North Carolina and the Pocosin Lakes National Wildlife Refuge in Tennessee.

After reintroduction, about 41 red wolves wandered from federal refuges onto private property. Richard Mann shot a red wolf that he feared might attack his cattle. Mann pled guilty to violating a provision of the ESA that prohibits the taking of any endangered species without a permit.

Two individuals and two counties in North Carolina filed suit against the U.S. government, alleging that the anti-taking regulation as applied to the red wolves on private land exceeded Congress's power under the interstate Commerce Clause of the U.S. Constitution.

Issue: ***Is the anti-taking provision of the ESA constitutional?***

Excerpts from Justice Wilkinson's Decision: Congress' commerce authority includes the power to regulate those activities having a substantial relation to interstate commerce. Although the connection to economic or commercial activity plays a central role in whether a regulation will be upheld under the Commerce Clause, economic activity must be understood in broad terms.

The red wolves are part of a $29.2 billion national wildlife-related recreational industry that involves tourism and interstate travel. Many tourists travel to North Carolina from throughout the country for "howling events"—evenings of listening to wolf howls accompanied by educational programs. According to a study conducted by Dr. William E. Rosen of Cornell University, the recovery of the red wolf and increased visitor activities could result in a significant regional economic impact. Rosen estimates that northeastern North Carolina could see an increase of between $39.61and $183.65 million per year in tourism-related activities, and that the Great Smoky Mountains National Park could see an increase of between $132.09 and $354.50 million per year. This is hardly a trivial impact on interstate commerce.

The regulation of red wolf takings is also closely connected to a second interstate market—scientific research. Scientific research generates jobs. It also deepens our knowledge of the world in which we live. The red wolf reintroduction program has already generated numerous scientific studies. Scientific research can also reveal other uses for animals—for instance, approximately 50 percent of all modern medicines are derived from wild plants or animals.

The anti-taking regulation is also connected to a third market—the possibility of a renewed trade in fur pelts. Wolves have historically been hunted for their pelts. In such a case, businessmen may profit from the trading and marketing of that species for an indefinite number of years, where otherwise it would have been completely eliminated from commercial channels. The American alligator is a case in point. In 1975, the American alligator was nearing extinction and listed as endangered, but by 1987 conservation efforts restored the species. Now there is a vigorous trade in alligator hides.

Finally, the taking of red wolves is connected to interstate markets for agricultural products and livestock. For instance, appellant landowners find red wolves a menace because they threaten livestock and other animals of economic and commercial value. This effect on commerce, however, still qualifies as a legitimate subject for regulation.

It is well-settled under Commerce Clause cases that a regulation can involve the promotion or the restriction of commercial enterprises and development.

It is anything but clear that red wolves harm farming enterprises. They may in fact help them, and in so doing confer additional benefits on commerce. For instance, red wolves prey on animals like raccoons, deer, and rabbits—helping farmers by killing the animals that destroy their crops.

[I]t is reasonable for Congress to decide that conservation of species will one day produce a substantial commercial benefit to this country and that failure to preserve a species will result in permanent, though

unascertainable, commercial loss. If a species becomes extinct, we are left to speculate forever on what we might have learned or what we may have realized. If we conserve the species, it will be available for the study and benefit of future generations. We therefore hold that the anti-taking provision at issue here involves regulable economic and commercial activity as understood by current Commerce Clause jurisprudence.

The government has introduced the Habitat Conservation Plan (HCP) as a blueprint for compromise over the ESA. In an HCP, developers agree to conserve some land in return for developing other property as they want. These deals contain a "no surprises" clause, meaning that the government has no right to retrieve land once it has been approved for development, even if scientists later determine that a particular species needs that habitat for survival. Unfortunately, the natural world is full of surprises, and environmentalists worry about the ultimate impact of these HCPs. In the short run, however, the success has been striking. For example, to save the gnatcatcher, a songbird found near San Diego, federal and local governments agreed to set aside 82,000 acres that they owned. They bought an additional 27,000 acres and developers donated 63,000 acres more. In return, the developers earned the right to build on their remaining land without limitation. More than 16 million acres, including 10 percent of timberland in the Pacific Northwest, are now designated HCPs.

Chapter Conclusion

Environmental laws have a pervasive impact on our lives. The cost has been great, whether it is higher prices for fuel-efficient cars or the time spent filling out environmental impact statements. Some argue that cost is irrelevant—that a clean environment has incalculable value for its own sake. Others insist on a more pragmatic approach and want to know if the benefits outweigh the costs. They worry that environmental regulations hurt employment.

What benefits has the country gained from environmental regulation? Since 1970, when Congress created the EPA, the record on common air pollutants, such as lead, has been extraordinarily successful. Total emissions of lead nationwide have declined by 96 percent. Before 1970, emissions of sulfur dioxide had been increasing rapidly. Since then, in spite of strong economic growth and an increase in population, these emissions have dropped. Despite this progress, however, many Americans live in areas that still do not meet EPA quality standards.

As for water, wetland acreage continues to decline at a rapid rate. However, the number of Americans whose sewage goes to wastewater treatment facilities has more than doubled. Two-thirds of the nation's waters are safe for fishing and swimming, up from only one-third when the Clean Water Act was passed.

Despite this progress, as a nation we still face many intractable problems. We have not developed a political consensus on global warming. The health effects of pesticides in our food supply are uncertain. Superfund and the Endangered Species Act are mired in a thornbush of litigation. The EPA is overwhelmed by its obligations, sometimes taking decades to issue regulations. Yet, Congress has reduced its budget.

Although many people, and many politicians, readily acknowledge the importance of the environment to both present and future generations, when the time comes to allocate funds, change lifestyles, make tough choices, the consensus too often breaks down, with the result that resources are spent on litigation instead of the environment.

EXAM REVIEW

1. **ENVIRONMENTAL STATUTES** The following table provides a list of environmental statutes:

Air Pollution	Water Pollution	Waste Disposal	Chemicals	Natural Resources
Clean Air Act	Clean Water Act	Resource Conservation and Recovery Act	Federal Insecticide, Fungicide, and Rodenticide Act	National Environmental Policy Act
	Safe Drinking Water Act			
	Ocean Dumping Act	Comprehensive Environmental Response, Compensation, and Liability Act (Superfund or CERCLA)	Federal Food, Drug, Cosmetic Act	Endangered Species Act
	Oil Pollution Act		Food Quality Protection Act	
			Toxic Substances Control Act	

2. **AIR** Under the Clean Air Act of 1963, the EPA must establish national ambient air quality standards for both primary and secondary pollution. States must produce implementation plans to meet the EPA standards. The EPA must also regulate greenhouse gases. (pp. 1007–1012)

3. **WATER** The Clean Water Act (CWA) prohibits the discharge of pollution into navigable water without a permit from the EPA. States must set EPA-approved water quality standards and develop plans to achieve them. The Clean Water Act also prohibits any discharge of dredge and fill material into a wetland without a permit. (pp. 1012–1016)

Question: In theory, Astro Circuit Corp. in Lowell, Massachusetts, pretreated its industrial waste to remove toxic metals. In practice, however, the factory was producing twice as much wastewater as the treatment facility could handle, and therefore, it was dumping the surplus directly into the city sewer. It was David Boldt's job to keep the production line moving. Has Boldt violated the law by dumping polluted water into the city sewer? What penalties might he face?

Strategy: Whenever water is involved, look at the provisions of the CWA. (See the "Result" at the end of this section.)

4. **DRINKING WATER** The Safe Drinking Water Act requires the EPA to set national standards for every contaminant potentially harmful to human health that is found in drinking water. (p. 1016)

5. **OCEANS** The Ocean Dumping Act prohibits the dumping of wastes in ocean water without a permit from the EPA. (p. 1016)

6. **SHIPS** The Oil Pollution Act of 1990 sets design standards for ships operating in U.S. waters and requires shipowners to pay for damage caused by oil discharged from their ships. (p. 1016)

7. **RCRA** The Resource Conservation and Recovery Act establishes rules for treating hazardous wastes and other forms of solid waste. (pp. 1017–1019)

8. **SUPERFUND** Under Superfund (CERCLA), anyone who has ever owned or operated a site on which hazardous wastes are found, who has transported wastes to the site, or who has arranged for the disposal of wastes that were released at the site is liable for (1) the cost of cleaning up the site, (2) any damage done to natural resources, and (3) any required health assessments. (pp. 1019–1020)

EXAM Strategy

Question: In 1963, FMC Corp. purchased a manufacturing plant in Virginia from American Viscose Corp., the owner of the plant since 1937. During World War II, the government's War Production Board had commissioned American Viscose to make rayon for airplanes and truck tires. In 1982, inspections revealed carbon disulfide, a chemical used to manufacture this rayon, in groundwater near the plant. American Viscose was out of business. Who is responsible for cleaning up the carbon disulfide? Under what statute?

Strategy: Look at the statutes that govern waste disposal. (See the "Result" at the end of this section.)

9. **PESTICIDES**

- The Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) requires manufacturers to register all pesticides with the EPA.
- The Federal Food, Drug, and Cosmetic Act requires the EPA to set maximum levels for pesticide residue in raw or processed food.
- The Food Quality Protection Act (FQPA) requires the EPA to set pesticide standards at levels that are safe for children. (pp. 1020–1021)

10. **CHEMICALS** Under the Toxic Substances Control Act, manufacturers must register new chemicals with the EPA. (pp. 1020–1021)

11. **NEPA** The National Environmental Policy Act requires all federal agencies to prepare an environmental impact statement (EIS) for every major federal action significantly affecting the quality of the environment. (pp. 1021–1022)

Question: The U.S. Forest Service planned to build a road in the Nez Perce National Forest in Idaho to provide access to loggers. Is the Forest Service governed by any environmental statutes? Must it seek permission before building the road?

Strategy: Does a road significantly affect the quality of the environment? Is an EIS required? (See the "Result" at the end of this section.)

12. ESA The Endangered Species Act requires the FWS to list endangered species and then prohibits activities that harm them. (pp. 1023–1026)

3. Result: Although Boldt was in an unfortunate situation—he could have lost his job if he had not been willing to dump the industrial waste—he was found guilty of a criminal violation of the CWA. There are worse things than being fired—such as being fired *and* sent to prison.

8. Result: Both FMC and the U.S. government were liable for cleanup under CERCLA.

11. Result: As an agency of the federal government, the Forest Service must prepare an EIS (under the National Environmental Policy Act) for every action that significantly affects the quality of the environment. Although the road itself may not have been significant enough to require an impact statement, its purpose was to provide access for logging, which did require an EIS.

Multiple-Choice Questions

1. Suppose that you are the manager of a General Motors plant that is about to start producing Hummers. The Hummer requires special protective paint that, as it turns out, reacts with other chemicals during the application process to create a pollutant. What does the Clean Air Act require of you?

(a) Reduce other emissions from the plant so that the total quantity of pollutants is the same

(b) Provide an analysis showing that the benefits outweigh the costs

(c) Provide the EPA with evidence that your plant meets the national ambient air quality standards

(d) Obtain a PSD certificate from the EPA

2. The EPA ________ have authority to regulate greenhouse gases. The states ________ impose their own standards for these gases.

(a) Does, can

(b) Does, cannot

(c) Does not, cannot

(d) Does not, can

3. For purposes of the Clean Water Act, Farmer Brown's fields ________ a point source. A canal that collects rainwater and discharges it into the Everglades ________ a point source.
   (a) are, is
   (b) are, is not
   (c) are not, is
   (d) are not, is not

4. You own property on which hazardous wastes are found. You know the identity of three former owners. You are:
   (a) Liable for all the costs of the cleanup because you are the current owner
   (b) Liable for one-quarter of the costs of the cleanup
   (c) Liable for the percentage of the harm that you are able to show that you actually caused
   (d) Not liable for any of the costs of the cleanup because the damage occurred before you bought the land

5. The Toxic Substances Control Act:
   (a) Requires manufacturers to test for safety all chemicals before they can be used in products
   (b) Requires the EPA to test for safety all chemicals before they can be used in products
   (c) Requires the EPA to test all chemicals, even if they are already being used in products
   (d) Permits the EPA to require testing of a chemical only if there is evidence that it is dangerous.

Essay Questions

1. Tariq Ahmad decided to dispose of some of his laboratory's hazardous chemicals by shipping them to his home in Pakistan. He sent the chemicals to Castelazo (a company in the United States) to prepare the materials for shipment. Ahmad did not tell the driver who picked up the chemicals that they were hazardous, nor did he give the driver any written documentation. Has Ahmad violated U.S. law? What penalties might he face?

2. The marbled murrelet is a seabird on the list of endangered species. Pacific Lumber Co. received permission to harvest trees from land on which the murrelet nested, on the condition that it would cooperate with regulators to protect the murrelet. But the company went in one weekend and cut down trees before it met the condition. Caught in the act, it promised no more logging until it had a plan to protect the birds. It waited until the long weekend over Thanksgiving to take down some more trees. A federal court then ordered a permanent halt to any further logging. There was no evidence that the company had harmed the murrelet. Had it violated the law?

3. **YOU BE THE JUDGE WRITING PROBLEM** The Lordship Point Gun Club operated a trap and skeet shooting club in Stratford, Connecticut, for 70 years. During this time, customers deposited millions of pounds of lead shot and clay target fragments on land around the club and in the Long Island Sound. Forty-five percent of sediment samples taken from the Sound exceeded the established limits for lead. Was the Gun Club in violation of the RCRA? **Argument for the Gun Club**: The Gun Club does not *dispose* of hazardous wastes, within the meaning of the RCRA. Congress meant the statute to apply only to companies in the business of manufacturing articles that produce hazardous waste. If the Gun Club happens to produce wastes, that is only *incidental* to the normal use of a product. **Argument for the Plaintiff**: Under the RCRA, lead shot is hazardous waste. The law applies to anyone who produces hazardous waste, no matter how.

4. Shell Oil sold pesticides to B&B, which allowed these chemicals to leak into the ground. Shell was aware that the leaks were occurring. B&B ultimately went bankrupt. Is Shell liable for the costs of cleaning up this site? Under what law?

5. Before the Department of Agriculture issued regulations on genetically modified beets, what steps did it need to take under the environmental statutes?

Discussion Questions

1. Life is about choices. Never more so than with the environment. Being completely honest, which of the following are you willing to do:
   - Drive a smaller, lighter, more fuel-efficient car?
   - Take public transportation or ride your bike to work?
   - Vote for political candidates who are willing to impose higher taxes on pollutants?
   - Insulate your home?
   - Unplug appliances when not in use?
   - Recycle your wastes?
   - Pay higher taxes to clean up Superfund sites?
   - Buy (more expensive) pesticide-free produce?

2. Externalities pose an enormous problem for the environment. Often, the people making decisions do not bear the full cost of their choices. Thus, the owners of a power plant that emits tons of greenhouse gases are shifting some of these costs to the rest of the world, and even to future generations. Businesses tend to fight efforts to make them pay these externalities. For example, CropLife America lobbied against a bill that would support research on the effects of chemicals on children. On the other hand, Nike recently announced that it had resigned its seat on the board of the United States Chamber of Commerce in response to the Chamber's active lobbying against legislation that would regulate greenhouse gases. But Nike will remain a member of this group. What ethical obligation do American companies have to support environmental legislation that may impose higher costs? Do they have an obligation to look out for the greater good, or should they focus on maximizing their shareholder returns? What Life Principles would you apply?

3. Is cost-benefit analysis an effective tool in environmental disputes? How do we measure the costs and benefits? How do we know what benefits we might gain from saving endangered species, or improving visibility at the Grand Canyon? In the *Entergy* case, how does the EPA calculate the benefits of not squashing fish against intake screens? Should you survey people to ask them how much it is worth? Or just think in terms of lives saved or sick days avoided? Or should we protect the environment regardless of cost?

4. Many of the environmental statutes permit citizen suits. As a result, environmental groups bring many lawsuits against both the EPA and polluters, alleging violations of these statutes. Are these suits a good idea? The Fish and Wildlife Service says that it spends so much of its resources responding to litigation over why it has not listed endangered species that it has no resources left to actually to do the listing. Businesses argue that it is unfair for every citizen to be a cop on the beat. On the other hand, environmental groups often supplement the limited resources of the EPA.

5. The *Winter* case deals with the balance between national security and the environment. Consider these additional issues: What if the president felt it was important to national security to store reserves of oil in a manner that could harm groundwater? Or permit drilling in areas that are environmentally fragile, such as Alaska or the Gulf Coast? Would you support such decisions? Should there be a review process for these decisions?

Property and Cyberlaw

CHAPTER 41

CYBERLAW

© Steve Allen/Jupiterimages

Garrett always said that his computer was his best friend. He was online all the time, g-chatting with his friends, listening to music, doing research for his courses, and, okay, maybe playing a few games now and again. Occasionally, the computer could be annoying. It would crash once in a while, trashing part of a paper before he saved it. And there was the time that a copy of an email he sent Lizzie complaining about Caroline somehow ended up in Caroline's inbox. He was pretty irritated when the White Sox tickets he bought in an online auction turned out to be for a Little League team. And he was tired of all the spam advertising pornographic websites. But these things happen and, despite the petty annoyances, his computer was an important part of his life.

Then one day, Garrett received a panicked text message from a teammate on the college wrestling squad telling him to click on a certain website pronto to see someone they knew. Garrett eagerly clicked on the website and discovered, to his horror, that *he* was featured—in the nude. The website was selling DVDs showing him and other members of the wrestling team in the locker room in various states of undress. Other DVDs, from other locker and shower rooms, were for sale, too, showing football players and wrestlers from dozens of universities. The DVDs had titles like "Straight Off the Mat" and "Voyeur Time." No longer trusting technology, Garrett pulled on his running shoes and dashed over to the office of his business law professor.

Garrett eagerly clicked on the website and discovered, to his horror, that he was featured—in the nude.

Computers and the Internet—cyberspace—together comprise one of the great technological developments of modern times.[1] And its importance and impact continue to grow. Beginning in December 2010, the world watched the "Arab Spring"—popular uprisings throughout the Middle East that brought down governments in Tunisia, Egypt, and Libya, and challenged leaders throughout the area. These movements were organized and fueled by the Internet. In response, threatened governments fought back by trying to limit access to the Internet generally and social media sites in particular. In Syria, police demanded the Facebook passwords of suspected protest organizers. Meanwhile, in England, a different type of protest challenged a court ruling. A married soccer player obtained an injunction prohibiting newspapers from revealing his alleged affair, or even the existence of the injunction. Within days, Ryan Giggs and his affair was one of the top topics on Twitter.

Cyberspace is a disruptive technology which, depending on your perspective, can fight repression or undermine legitimate laws. It has brought change to every aspect of our lives—how we make friends, buy things, obtain news, campaign for election, start revolutions, challenge the status quo.

Inevitably, new technologies create the need for new law. In the 13th century, England was one of the first countries to develop passable roads. Like the Internet, these roadways greatly enhanced communication, creating social and business opportunities, but also enabled new crimes. Good roads meant that bad guys could sneak out of town without paying their bills. Parliament responded with laws to facilitate the collection of out-of-town debts. Similarly, while the Internet has opened up enormous opportunities in both our business and personal lives, it has also created the need for new laws, both to pave the way for these opportunities and to limit their dangers.

The process of lawmaking never stops. Judges sit and legislatures meet—all in an effort to create better rules and a better society. However, in an established area of law, such as contracts, the basic structure changes little. Cyberlaw is different because it is still very much in its infancy. Not only are new laws being created almost daily, but whole areas of regulation are, as yet, unpaved roads. Although the process of rule making has progressed well, much debate still surrounds cyberspace law and much work remains to be done. This chapter focuses on the existing rules and also discusses the areas of regulation that are still incomplete and being debated.

Cyberlaw affects many areas of our lives. This chapter, however, deals with issues that are unique to the cyberworld, such as online privacy, spam, and cybercrimes.

Before beginning the chapter in earnest, let's return briefly to Garrett, the wrestler. What recourse does Garrett have for his Internet injuries? The nude video incident happened at Illinois State University and seven other colleges. Approximately 30 athletes filed suit against GTE and PSINet for selling the videos online, but the two web hosts were found not to be liable under the Communications Decency Act because they had not produced the videos themselves—they had simply permitted the sale of someone else's content. What about Garrett's other computer injuries? Lizzie was not being a good friend, but it was perfectly legal for her to forward Garrett's email to Caroline. The seller of the White Sox tickets violated both federal and state fraud statutes. The federal CAN-SPAM Act regulates spam—unsolicited commercial email—but a lawsuit is a slow and awkward tool for killing such a flourishing weed.

---

[1]The term "Internet" means "the international computer network of both Federal and non-Federal interoperable packet switched data networks," according to 47 U.S. Section 230 (f)(1). It began in the 1960s as a project to link military contractors and universities. Now, it is a giant network that connects smaller groups of linked computer networks. The World Wide Web was created in 1991 by Tim Berners-Lee as a subnetwork of the Internet. It is a decentralized collection of documents containing text, pictures, and sound. Users can move from document to document using links that form a "web" of information.

Privacy

The Internet has vastly increased our ability to communicate quickly and widely. In the pre-Internet era, setting up a meeting required days of phone tag. Intraoffice memos were typed, photocopied, and then hand-delivered by messengers. Catalog orders were sent via regular mail, a slow, inefficient, and costly method. As wonderful as cybercommunication can be, though, it is not without its dangers.

Tracking Tools

Consumers enter the most personal data—credit card numbers, bank accounts, lists of friends, medical information, product preferences—on the Internet. Because our interactions with a computer often take place in isolation (sitting alone at home, at work or in a cafe), the experience *feels* private. It is anything but. In effect, the Internet provides a very large window through which the government, employers, businesses, and criminals can find out more than they should about you and your money, habits, beliefs, and health. Even email has its dangers: who has not been embarrassed by an email that ended up in the wrong mailbox?

The most troubling aspect of these Internet privacy issues is that consumers are often unaware of who has access to what personal information, how it is being used, and with what consequences. As a result, a privacy discussion seems abstract. But the reality is that the Internet provides many opportunities for good guys and bad to secretly gather information for their own purposes, both good and bad.

It used to be that marketers geared their ads to specific websites, but now they target individual consumers. The 50 most popular websites in America (which account for 40 percent of all page views) install thousands of tracking tools on the computers of people who visit their sites. Called "behavioral targeting," these tools not only collect data on *all* the websites someone visits, they also record keystrokes to keep track of whatever information the consumer has entered online. These tools are placed on computers without notice or warning to the consumer. In a recent report, **Dictionary.com** was the worst offender, placing over 200 tools on the computers of unaware visitors. On the other hand, **Wikipedia.org** is one highly popular site that installs none.[2] To take another example of privacy issues, as part of its Street View program that provides photographs of streets around the world, Google (accidentally, it says) captured data from home Wi-Fi networks.

Once the trackers have gathered financial, health, and other personal information, they sell it to data-gathering companies that build profiles which, while technically anonymous, can include so much personal information that it is possible to identify individuals. How many times have you revealed your ZIP code, birth date, and gender on the Internet? Those three pieces of information are usually enough to identify an individual's name and address. The profiles are then sold to advertisers on stock market-like exchanges. Now that cell phones have GPS tracking devices and readers use electronic books, where you have been and what you are reading is also available. In a recent Dilbert cartoon, the boss refers to a smart phone as an "employee locator device."

Suppose, for example, that you look online at puppies in shelters. You may find that the next time you go to your gmail account, there will be dog ads. One company markets a databank with the names of 150 million registered voters. Anyone can buy a list of voters that is sliced and diced however they want (say, Republicans between the ages of 45 and 60 with Hispanic surnames and incomes greater than $50,000 who live in Kansas City). Puppy ads seem harmless, or even beneficial, but if marketers can put together a databank of

---

[2]Julia Angwin and Tom McGinty, "Sites Feed Personal Details to New Tracking Industry," *The Wall Street Journal*, July 30, 2010.

Hispanic Republican voters, they can also find out who has visited a website for recovering alcoholics or unrecovered gamblers or Nazi sympathizers. Or who uses antidepressants or reads socialist writings. Do you want all this information available to anyone who is willing to pay for it? What if employers buy information about job candidates so that they can refuse to hire someone with health issues?

In short, Internet users are inadvertently providing intensely personal data to unknown people for unknown uses. The problem is likely to grow. The newest web language, HTML5, permits tracking software to store larger amounts of data. Also, software developers have created tracking tools that are harder to delete. Every browser uses a different deletion system, which makes life even more complicated for the concerned consumer.

Many commentators argue that without significant changes in the law, our privacy will be obliterated. But, so far, consumers have been relatively unconcerned. They tend to be unaware of the dangers, and they appreciate the benefits—for example, this tracking software can be used to store passwords so that when you log on to **Amazon.com**, the site recognizes you and lets you in without your having to enter your email address and password. Consumers can also benefit from targeted advertisements—long-distance runners may like seeing ads for running shoes, not cigarettes. Industry representatives argue that without the revenue from ads, many Internet sites would not be free to consumers. As a result, privacy on the Internet is very much like the weather—everyone talks about it, but (so far) no one has done much about it. But this you should believe: highly personal information about *you* has been collected without your knowledge or approval.

Regulation of Online Privacy

There is a wide range of possible sources of laws and regulations to protect online privacy, but they are in an early, and relatively ineffective, stage of development.

Self-Regulation

In an effort to forestall government regulation, several marketing trade groups issued their own report, "Self-Regulatory Principles for Online Behavioral Advertising." These principles require websites that use tracking tools to provide notice of data collection that is "clear, prominent, and conveniently located." In addition, the websites must permit consumers to opt out of tracking with only a few clicks. However, we have been unable to find a single website that complies with these principles, even among the companies that sponsored the report.

Members of Congress have filed many bills to regulate online privacy. So intense, however, is the debate between industry and consumer advocates that no consensus—and little law—has emerged. There is, however, some applicable government regulation.

The First Amendment

How would you like to be called a cockroach, mega-scumbag, and crook in front of thousands of people? Or be accused of having a fake medical degree, fat thighs, and poor feminine hygiene? What would you think if your ex-wife told 55,000 people that your insensitivity made her so sick she was throwing up every day? **The First Amendment to the Constitution protects free speech,** and that includes these postings—and worse—which have appeared on Internet message boards and blogs. As upsetting as they may be, they are protected as free speech under the First Amendment so long as the poster is not violating some other law. In these cases, the plaintiffs argued that the statements were defamatory but the courts disagreed, ruling that they were simply opinions.

Explaining its ruling in one of the cases, the court said:

> Users [of the Internet] are able to engage freely in informal debate and criticism, leading many to substitute gossip for accurate reporting and often to adopt a provocative, even combative tone. Hyperbole and exaggeration are common, and 'venting' is at least as common as careful and

considered argumentation. Some commentators have likened cyberspace to a frontier society free from the conventions and constraints that limit discourse in the real world.

It hardly need be said that this [court does not] condone [these] rude and childish posts; indeed, [the] intemperate, insulting, and often disgusting remarks understandably offended plaintiff and possibly many other readers. Nevertheless, the fact that society may find speech offensive is not a sufficient reason for suppressing it. Indeed, if it is the speaker's opinion that gives offense, that consequence is a reason for according it constitutional protection.[3]

In the following case, a teacher received hostile emails. Should the First Amendment protect the anonymous person who sent them?

[3]*Krinsky v. Doe*, 6159 Cal. App. 4th 1154, 2008 Cal. App. LEXIS 180.

You be the Judge

Juzwiak v. John/Jane Doe

415 N.J. Super. 442; 2 A.3d 428; 2010 N.J. Super. LEXIS 154
Superior Court of New Jersey, Appellate Division, 2010

Facts: Juzwiak was a tenured teacher at Hightstown High School in New Jersey. He received three emails from someone who signed himself "Josh," with the address, "Josh Hartnett **jharthat@yahoo.com.**" The teacher did not know anyone of that name. These emails said:

1. Subject line: "Hopefully you will be gone permanently"

   Text: "We are all praying for that. Josh"
2. Subject line: "I hear Friday is 'D' day for you"

   Text: "I certainly hope so. You don't deserve to be allowed to teach anymore. Not just in Hightstown but anywhere. If Hightstown bids you farewell I will make it my lifes [sic] work to ensure that wherever you look for work they know what you have done."
3. Subject line: "Mr. Juzwiak in the Hightstown/East Windsor School System."

   Text: It has been brought to my attention and I am sure many of you know that Mr. J is reapplying for his position as a teacher in this town. It has further been pointed out that certain people are soliciting supporters for him. This is tantamount to supporting the devil himself. I am not asking anyone to speak out against Mr. J but I urge you to then be silent as we can not continue to allow the children of this school system nor the parents to be subjected to his evil ways. Thank you. Josh

It seems that this third email was sent to other people, but it was not clear to whom.

Because Juzwiak did not know who "Josh" was, he filed a complaint against "John/Jane Doe," seeking damages for intentional infliction of emotional distress. As part of the lawsuit, he served a subpoena on Yahoo!, asking it to reveal "Josh's" identity. When Yahoo! notified "Josh" of the lawsuit, he asked the court to quash the subpoena.

In a court hearing, Juzwiak testified that the threatening emails had severely disrupted his life, causing deep anger and depression as well as insomnia that had impaired his ability to concentrate and function effectively. In addition, this emotional stress had exacerbated his back problems and caused him to lose 20 pounds. Although he had already been taking antidepressants, a psychiatrist prescribed four additional drugs for depression, anxiety, and insomnia, which were not effective in reducing his symptoms. Juzwiak also stated that he had thoughts of hurting himself and the entire episode had consumed his life for several months.

When the trial court refused to issue the subpoena against Yahoo!, Juzwiak appealed.

You Be the Judge: ***Should the trial court have issued the subpoena? Which interest is more important: "Josh's" First Amendment right to free speech or Juzwiak's protection from harassing emails?***

Argument for "Josh": Free speech is the first, and most important, right in the Bill of Rights. To ensure a vibrant marketplace of ideas, the First Amendment protects not

only open but also anonymous speech. Sometimes speakers must be allowed to withhold their identities to protect themselves from harassment and persecution.

Nothing in these messages was a realistic threat to the teacher's safety. "Hopefully you will be gone permanently" could easily mean "Hope you will move out of town." Juzwiak reported these emails to the police, but they took no action. Presumably they would have done so if there had been any real threat.

Nor did these emails constitute an intentional infliction of emotional distress. They were not so extreme and outrageous as to be utterly intolerable in a civilized community. "Josh" did not accuse Juzwiak of vile or criminal acts. The language was not obscene or profane. In short, if Juzwiak is going to teach high school, he needs to develop a thicker skin and a better sense of humor.

Argument for Juzwiak: The right to speak anonymously is not absolute. "*Josh*" requires protection from harassment? That is an absurd argument.

These emails contained death threats: "Hopefully you will be gone permanently" and "I hear Friday is 'D' day for you." Juzwiak was frightened enough to go to the police. He suffered serious physical and emotional harm. These emails are not entitled to the protection of the First Amendment.

Furthermore, the emails constituted intentional infliction of emotional distress. They were extreme and outrageous conduct designed to cause harm. They achieved their goal.

In balancing the rights in this case, why would the court protect "Josh," who has set out to cause harm, over the innocent teacher?

The Fourth Amendment

The Fourth Amendment to the Constitution prohibits unreasonable searches and seizures by the government. In enforcing this provision of the Constitution, the courts ask: did the person being searched have a legitimate expectation of privacy in the place searched or the item seized? If yes, then the government must obtain a warrant from a court before conducting the search. (For more on this topic, investigate Chapter 8, on crime.) The Fourth Amendment applies to computers.

The architecture professor in the following case would have benefited from a course in business law, and perhaps in computer science, too.

UNITED STATES OF AMERICA V. ANGEVINE

281 F.3d 1130, 2002 U.S. App. LEXIS 2746
United States Court of Appeals for the Tenth Circuit, 2002

Facts: Professor Eric Angevine taught architecture at Oklahoma State University. The university provided him with a computer that was linked to the university network, and through it to the Internet. Professor Angevine used this computer to download more than 3,000 pornographic images of young boys. After viewing the images and printing some of them, he deleted the files. Tipped off by Professor Angevine's wife, police officers seized the computer without first obtaining a search warrant. They then turned the machine over to a police computer expert, who retrieved the pornographic files that the professor had deleted.

The Oklahoma State University computer policy stated that:

- The contents of all storage media owned or stored on university computing facilities are the property of the university.
- Employees cannot use university computers to access obscene material.
- The university reserves the right to view or scan any file or software stored on a computer or passing

through the network and will do so periodically to audit the use of university resources. The university cannot guarantee confidentiality of stored data.

- System administrators keep logs of file names that may indicate why a particular data file is being erased, when it was erased, and what user identification has erased it.

The trial court held that federal agents did not need a warrant to search Professor Angevine's office computer because he had no expectation of privacy. He was sentenced to 51 months in prison for "knowing possession of child pornography." The professor appealed.

Issue: ***Did Professor Angevine have a reasonable expectation of privacy in his office computer?***

Excerpts from Judge Brorby's Decision: Oklahoma State University policies and procedures prevent its employees from reasonably expecting privacy in data downloaded from the Internet onto University computers. The University computer-use policy reserved the right to randomly audit Internet use and to monitor specific individuals suspected of misusing University computers. The policy explicitly cautions computer users that information flowing through the University network is not confidential either in transit or in storage on a University computer. These office practices and procedures should have warned reasonable employees not to access child pornography with University computers.

While Professor Angevine did attempt to erase the child pornography, the University computer policy warned system administrators kept file logs recording when and by whom files were deleted. Moreover, given his transmission of the pornographic data through a monitored University network, deleting the files alone was not sufficient to establish a reasonable expectation of privacy.

We hold Professor Angevine could not have an objectively reasonable expectation of privacy.

This case involved someone who transmitted information through an electronic system owned by his employer. What happens if a suspect in a crime sends emails through a system that he personally pays for? Does he have a reasonable expectation of privacy? The following case answers these questions.

UNITED STATES OF AMERICA V. WARSHAK

631 F.3d 266; 2010 U.S. App. LEXIS 25415
United States Court of Appeals for the Sixth Circuit, 2010

Facts: Steven Warshak owned Berkeley Premium Nutraceuticals, Inc., a company that sold herbal supplements. The company had only been modestly successful until it began to market Enzyte, a supplement that promised to increase masculine endowment. At its peak, Berkeley had annual sales of around $250 million.

As is the case with all such products, Enzyte was a fraud. Advertisements quoted surveys that had never been conducted and doctors who did not exist. As a result, customers typically did not buy the product a second time. Warshak had a solution to this problem—an auto-ship program. A man would order a free sample, providing his credit card to pay for the shipping. Berkeley would then automatically send him more product, and, of course, charge his credit card.

Without obtaining a search warrant first, a federal prosecutor asked Warshak's Internet service provider (ISP) for copies of his emails. Based on the evidence contained in these 25,000 emails, Warshak was convicted of mail, wire, and bank fraud and sentenced to 25 years in prison. He appealed on the grounds that the government had violated the Fourth Amendment by obtaining emails without a search warrant. He argued that he had had a reasonable expectation of privacy.

Issue: ***Did Warshak have a reasonable expectation of privacy in his emails?***

Excerpts from Justice Boggs's Decision: Warshak plainly manifested an expectation that his emails would be shielded from outside scrutiny. [H]is entire business and personal life was contained within the emails seized. Given the often sensitive and sometimes damning substance of his emails, we think it highly unlikely that Warshak expected them to be made public, for people

seldom unfurl their dirty laundry in plain view. Therefore, we conclude that Warshak had a subjective expectation of privacy in the contents of his emails.

The next question is whether society is prepared to recognize that expectation as reasonable. This question is one of grave import and enduring consequence, given the prominent role that email has assumed in modern communication. Since the advent of email, the telephone call and the letter have waned in importance, and an explosion of Internet-based communication has taken place. People are now able to send sensitive and intimate information, instantaneously, to friends, family, and colleagues half a world away. Lovers exchange sweet nothings, and businessmen swap ambitious plans, all with the click of a mouse button. Commerce has also taken hold in email. Online purchases are often documented in email accounts, and email is frequently used to remind patients and clients of imminent appointments.

In short, "account" is an apt word for the conglomeration of stored messages that comprises an email account, as it provides an account of its owner's life. By obtaining access to someone's email, government agents gain the ability to peer deeply into his activities.

[T]he Fourth Amendment must keep pace with the inexorable march of technological progress, or its guarantees will wither and perish. While a letter is in the mail, the police may not intercept it and examine its contents unless they first obtain a warrant based on probable cause. If we accept that an email is analogous to a letter or a phone call, it is manifest that agents of the government cannot compel a commercial ISP to turn over the contents of an email without triggering the Fourth Amendment. Emails must pass through an ISP's servers to reach their intended recipient. Thus, the ISP is the functional equivalent of a post office or a telephone company. [T]he police may not storm the post office and intercept a letter, and they are likewise forbidden from using the phone system to make a clandestine recording of a telephone call—unless they get a warrant, that is. It only stands to reason that, if government agents compel an ISP to surrender the contents of a subscriber's emails, those agents have thereby conducted a Fourth Amendment search, which necessitates compliance with the warrant requirement.

Accordingly, we hold that a subscriber enjoys a reasonable expectation of privacy in the contents of emails that are stored with, or sent or received through, a commercial ISP. The government may not compel a commercial ISP to turn over the contents of a subscriber's emails without first obtaining a warrant based on probable cause.

As the *Warshak* court observes, electronic communications—email, text messages, instant messaging—have for many people taken the place of letters and telephone calls. So it is important to know your privacy rights. **Although the courts are feeling their way in this new territory, at this writing, for criminal cases:**

1. If your employer has a reasonably articulated policy notifying you that it has the right to access and read electronic communications on a system that it provides, then you do not have a reasonable expectation of privacy when using that system. The police need not obtain a search warrant before reading your messages.
2. You do have a reasonable right to privacy on a system that you provide for yourself, so the police must obtain a search warrant before accessing these messages.

Note that both of these Fourth Amendment cases involve criminal defendants. However, Fourth Amendment protections also apply to *government* workers in civil cases. For example, when a police officer persistently exceeded his monthly quota of text messages, his superior accessed these communications to determine if they were work-related. It turned out that they were mostly sexually suggestive texts sent to the married officer's mistress. After the officer was disciplined, he filed suit alleging that the department had violated his Fourth Amendment rights. The Supreme Court held that a government employer has the right to review its employee's electronic communications for a work-related purpose, if the search was "justified at its inception" and if "the measures adopted are reasonably related to the objectives of the search and not excessively intrusive in light of the circumstances giving rise to the search."[4]

[4]*City of Ontario v. Quon*, 130 S. Ct. 2619; 2010 U.S. LEXIS 4972 (S.Ct. 2010).

The FTC

Section 5 of the FTC Act prohibits unfair and deceptive acts or practices. The Federal Trade Commission (FTC) applies this statute to online privacy policies. It does not require websites to have a privacy policy, but if they do have one, they must comply with it, and it cannot be deceptive. For example, Sears paid consumers who visited **sears.com** and **kmart.com** websites $10 to become members of the "My SHC Community" and participate in "exciting, engaging, and on-going interactions—always on your terms and always by your choice." As part of this process, consumers downloaded "research" software that tracked their online browsing. Only at the end of a lengthy user agreement did Sears reveal the full extent of the data collected, that it could include the contents of shopping carts, online bank statements, drug prescription records, DVD rental records, and some personal email information. In a consent decree with the FTC, Sears agreed to stop collecting data from consumers who downloaded the software and to destroy all data it had previously collected.

The FTC also brought action against Twitter after hackers gained access through its administrative system to Twitter accounts. Twitter had allowed any employee access to the administrative system, which was protected by an easy-to-guess password. The hackers reset passwords and sent fake tweets. For example, an unauthorized person sent a tweet from President-elect Barack Obama's Twitter account offering free gasoline to users who took an Internet poll (which seems benign compared with what the hacker could have said, but still not a good situation). The FTC found that Twitter had engaged in deceptive acts because its (lack of) security practices had violated the company's promise to users that it would protect their information from unauthorized access. As part of the settlement, Twitter agreed to strengthen its security practices.

In addition to cases the FTC has brought against individual companies, it also issued a report entitled "Self-Regulatory Principles for Online Behavioral Advertising." As the name implies, these rules are voluntary. They provide that companies should clearly disclose the information that they collect and also offer consumers an easy-to-use, easy-to-find method for opting out. However, we have not found a website that complies with this policy. The FTC has been working on a binding privacy policy for years, with no result yet.

One more cyberlaw issue: imagine that you are reading a blog that favorably reviews a new Microsoft product. Before clicking on the Buy button, would you want to know that Microsoft had given the blogger a free computer? The FTC thinks you should. Under FTC rules, bloggers face fines as high as $1,000 if they do not disclose all compensation they receive (either in cash or free products) for writing product reviews. Moreover, celebrities must disclose their relationships with advertisers when making endorsements outside of traditional ads, such as on talk shows or in social media.

Electronic Communications Privacy Act of 1986

The Electronic Communications Privacy Act of 1986 (ECPA) is a federal statute that prohibits unauthorized interception of, access to, or disclosure of wire and electronic communications. The definition of electronic communication includes email and transmissions from pagers and cell phones. Violators are subject to both criminal and civil penalties. An action does not violate the ECPA if it is unintentional or if either party consents. Also, the USA Patriot Act, passed after the September 11th attacks, has broadened the *government's* right to monitor electronic communications.

Under the ECPA:

1. **Any intended recipient of an electronic communication has the right to disclose it.** Thus, if you sound off in an email to a friend about your boss, the (erstwhile) friend may legally forward that email to the boss or anyone else.

2. **Internet service providers (ISPs) are generally prohibited from disclosing electronic messages to anyone other than the addressee,** unless this disclosure is necessary for the performance of their service or for the protection of their own rights or property.

3. **An employer has the right to monitor workers' electronic communications if (1) the employee consents, (2) the monitoring occurs in the ordinary course of business, or (3) in the case of email, if the employer provides the computer system.**[5] Note that an employer has the right to monitor electronic communication even if it does not relate to work activities.

One lesson from the ECPA: email is not private, and it is dangerous. Although the *Warshak* court ruled that defendants have an expectation of privacy in emails they have sent over a system that they provide for themselves, that simply means the police must first obtain a search warrant before accessing emails, which is not that difficult. To get a search warrant, the police just need probable cause that they will find evidence of a crime in the place to be searched.

The majority of employers monitor their employees' email. In the event of litigation, the opposing party can access all emails—even messages that have in theory been deleted. Many people who should have known better have been caught in the email trap. Merrill Lynch stock analyst Henry Blodget praised stocks to the public even as he was referring to them in emails as a "piece of s***." He has been banned for life from the securities industry. Then there was Harry Stonecipher, the CEO of Boeing, who sent explicit emails to the employee with whom he was having an extramarital affair. When copies of the emails were sent to the board of directors, he was fired. In the following case, two important principles are at stake. Which one should win?

[5]The ECPA provides that, under certain circumstances, the police can access email without a warrant, but the *Warshak* court declared that provision unconstitutional.

You be the Judge

Scott v. Beth Israel Medical Center Inc.

847 N.Y.S.2d 436; 2007 N.Y. Misc. LEXIS 7114
Supreme Court of New York, 2007

Facts: Beth Israel Medical Center (BI)'s email policy stated:

> All information and documents created, received, saved, or sent on the Medical Center's computer or communications systems are the property of the Medical Center. Employees have no personal privacy right in any material created, received, saved, or sent using Medical Center communication or computer systems. The Medical Center reserves the right to access and disclose such material at any time without prior notice.

Dr. Norman Scott was head of the orthopedics department at BI. His contract with the hospital provided for $14 million in severance pay if he was fired without cause. BI did fire him, and the question was whether it was for cause or not. In preparation for a lawsuit against BI, Scott used the hospital's computer system to send emails to his lawyer. Each of these emails included the following notice:

> This message is intended only for the use of the Addressee and may contain information that is privileged and confidential.

If you are not the intended recipient, you are hereby notified that any dissemination of this communication is strictly prohibited. If you have received this communication in error, please erase all copies of the message and its attachments and notify us immediately.

BI obtained copies of all of Scott's emails. It notified him that it had copies of the emails to his lawyer. No one at BI had read the emails yet, but they intended to do so. Communications between a client and lawyer are generally protected, but a client waives this privilege if he publicly discloses the information. When Scott requested that the emails be returned to him unread, BI refused. Scott filed a motion seeking the return of the documents.

You Be the Judge: ***Did Scott have a right to privacy in emails he sent to his lawyer using the BI system?***

Argument for Scott: Despite BI's policy, all the emails Scott sent asserted that they were confidential. That should be enough to protect them. The attorney-client privilege is a foundation of our legal system. It is absolutely crucial for justice that clients be able to communicate with their lawyers in confidence. In a test between a core principle such as attorney-client privilege and a private entity's email policy, the privilege must win. The hospital should not be allowed to read Scott's emails.

Argument for BI: Scott was aware of BI's policy and knew that emails were the property of the hospital. Therefore, when he sent the emails, he was disclosing them publicly. If the communications were that important, he should have made a greater effort to protect them. BI has the right to read them.

Children's Online Privacy Protection Act of 1998

The Children's Online Privacy Protection Act of 1998 (COPPA) prohibits Internet operators from collecting information from children under 13 without parental permission. It also requires sites to disclose how they will use any information they acquire. Enforcement is in the hands of the FTC. The website for Mrs. Fields cookies offered birthday coupons for free cookies to children under 13. Although the company did not share information with outsiders, it did collect personal information without parental consent from 84,000 children. This information included names, home addresses, and birth dates. Mrs. Fields paid a penalty of $100,000 and agreed not to violate the law again.

But first you have to give me some personal information.

State Regulation

An exhaustive list of state laws is beyond the scope of this book, but be aware that some states have passed their own online privacy laws. To take some examples, the constitution of the state of California confers the right to privacy. Further, the California Online Privacy Act of 2003 requires any website that collects personal information from California residents to post a privacy policy conspicuously and then abide by its terms. Connecticut, Nebraska, and Pennsylvania also regulate online privacy policies.

Two states, Minnesota and Nevada, require ISPs to obtain their customers' consent before providing information about them. Connecticut and Delaware require employers to notify their workers before monitoring emails or Internet usage.

European Law

The European Convention on Human Rights declares, "Everyone has the right to respect for his private and family life, his home, and his correspondence." The European Union's e-Privacy Directive requires an opt-in system, under which tracking tools cannot

be used unless the consumer is told how the tools will be used and then specifically grants permission for their use. However, this directive may be interpreted to mean that consumers have granted permission for tracking tools if they fail to change the default privacy settings on their web browsers. At this writing, European nations are just beginning to implement the e-Privacy Directive, so it may be some time before the impact of these rules is clear.

In theory, even companies outside Europe will have to comply with European rules if they interact with European customers. Recently, European agencies insisted that Google, Microsoft, and Yahoo! enhance their protection of users' search histories; and a court in Italy held that Google had violated that country's privacy laws by posting a video of students bullying an autistic boy. Stay tuned.

Spyware

Is your computer running sluggishly? Does it crash frequently? Has the home page on your web browser suddenly changed without your consent? Is there a program in your systems tray that you do not recognize? You might have **spyware** on your computer.

Spyware
A computer program that enters a user's computer without permission and monitors and reports the user's activities.

Congress has considered legislation to control spyware but has not taken final action. California has enacted the Consumer Protection Against Computer Spyware Act, which makes spyware illegal.

SPAM

Spam is officially known as *unsolicited commercial email (UCE)* or *unsolicited bulk email (UBE)*. Whatever it is called, it is one of the most annoying aspects of email. It has been estimated that 90 percent of email is spam. And roughly half of these messages were fraudulent—either in content (promoting a scam) or in packaging (the headers or return address are false). Aside from the annoyance factor, bulk email adds to the cost of connecting to the Internet as ISPs increase server capacity to handle the millions of spam emails.

The Controlling the Assault of Non-Solicited Pornography and Marketing Act (CAN-SPAM) is a federal statute that does not prohibit spam but instead regulates it. This statute applies to virtually all promotional emails, whether or not the sender has a preexisting relationship with the recipient. Under this statute, commercial email:

- May not have deceptive headings (From, To, Reply To, Subject),
- Must offer an opt-out system permitting the recipient to unsubscribe (and must honor those requests promptly),
- Must clearly indicate that the email is an advertisement,
- Must provide a valid physical return address (not a post office box), and
- Must clearly indicate the nature of pornographic messages.

A company can avoid these requirements by obtaining advance permission from the recipients.

CAN-SPAM seems to have had little impact on the quantity of spam (although it has made opt-out provisions more common in legitimate commercial emails). More effective have been the tools developed by online security firms and governments that prevent as much as 98 percent of spam from reaching your email inbox.

But spammers have found other outlets. They post messages in the comment sections of websites and on social media sites such as Facebook and Twitter. Their goal is to entice you to click on a link that may take you to a website that sells

foolproof "investments" or that simply steals bank information from your computer. If that link seems to come from a Facebook friend or someone whom you follow on Twitter, it seems more reliable. A recent study found that 8 percent of links sent via Twitter are fraudulent, but they are 20 times more likely to be clicked than those in spam email.[6]

EXAM Strategy

Question: **Cruise.com** operated a website selling cruise vacations. It sent unsolicited email advertisements—dubbed "E-deals"—to prospective customers. Eleven of these "E-deals" went to **inbox@webguy.net**. Each message offered the recipient an opportunity to be removed from the mailing list by clicking on a line of text or by writing to a specific postal address. Has **Cruise.com** violated the CAN-SPAM Act?

Strategy: Remember that this Act does not prohibit all unsolicited emails.

Result: **Cruise.com** was not in violation because it offered the recipients a way to unsubscribe. Also, it provided a valid physical return address.

Internet Service Providers and Web Hosts: Communications Decency Act of 1996

ISPs are companies, such as Earthlink, that provide connection to the Internet. Web hosts post web pages on the Internet. Both play important roles in cyberspace. As the legal structure that supports the Internet develops, so have legal issues involving these players.

The Internet is an enormously powerful tool for disseminating information. But what if some of this information happens to be false or in violation of our privacy rights? Is an ISP liable for transmitting it to the world? In 1995, a trial judge in New York held that an ISP, Prodigy Services Company, was potentially liable for defamatory statements that an unidentified person posted on one of its bulletin boards.[7] The message alleged that the president of an investment bank had committed "criminal and fraudulent acts." It was not only a false statement—it was posted on the most widely read financial computer bulletin board in the country. Although one can only feel sympathy for the target of this slur, the decision nonetheless alarmed many observers who argued that there was no way ISPs could review every piece of information that hurtles through their portals. The next year, Congress overruled the Prodigy case by passing the Communications Decency Act of 1996 (CDA).[8] **Under the CDA, ISPs and web hosts are not liable for information that is**

[6] "Long life spam," *The Economist*, November 20, 2010, p. 67.
[7] *Stratton Oakmont, Inc. v. Prodigy Services Company*, 1995 N.Y. Misc. LEXIS 229.
[8] 47 U.S.C. 230.

provided by someone else. Only content providers are liable. The following case lays out the arguments in favor of the CDA, but also illustrates some of the costs of the statute (and of the Internet).

Carafano v. Metrosplash.com, Inc.[9]

339 F.3d 1119, 2003 U.S. App. LEXIS 16548
United States Court of Appeals for the Ninth Circuit, 2003

Facts: **Matchmaker.com** is an Internet dating service that permits members to post profiles of themselves and to view the profiles of other members. Matchmaker reviews photos for impropriety before posting them but does not examine the profiles.

Christianne Carafano is an actor who uses the stage name Chase Masterson. She has appeared in numerous films and television shows, such as *Star Trek: Deep Space Nine* and *General Hospital*. Without her knowledge, someone in Berlin posted a profile of her in the Los Angeles section of Matchmaker. In answer to the question "Main source of current events?" the person posting the profile put "*Playboy Playgirl*" and for "Why did you call?" responded "Looking for a one-night stand." In addition, the essays indicated that she was looking for a "hard and dominant" man with "a strong sexual appetite" and that she "liked sort of being controlled by a man, in and out of bed." Pictures of the actor taken off the Internet were included with the profile. The profile also provided her home address and an email address, which, when contacted, produced an automatic email reply stating, "You think you are the right one? Proof it!!" [sic], and providing Carafano's home address and telephone number.

Unaware of the improper posting, Carafano began receiving sexually explicit messages on her home voice mail, as well as a sexually explicit fax that threatened her and her son. She received numerous phone calls, letters, and email from male fans, expressing concern that she had given out her address and phone number (but simultaneously indicating an interest in meeting her). Feeling unsafe, Carafano and her son moved out of their home for several months.

One Saturday a week or two after the profile was first posted, Carafano's assistant, Siouxzan Perry, learned of the false profile through a message from "Jeff." Acting on Carafano's instructions, Perry contacted Matchmaker, demanding that the profile be removed immediately. The Matchmaker employee did not remove it then because Perry herself had not posted it, but on Monday morning, the company blocked the profile from public view and then deleted it the following day.

Carafano filed suit against Matchmaker alleging invasion of privacy, misappropriation of the right of publicity, defamation, and negligence. The district court rejected Matchmaker's argument for immunity under the CDA on the grounds that the company provided part of the profile content.

Issue: ***Does the CDA protect Matchmaker from liability?***

Excerpts from Judge Thomas's Decision: Through [the CDA], Congress granted most Internet services immunity from liability for publishing false or defamatory material so long as the information was provided by another party. As a result, Internet publishers are treated differently from corresponding publishers in print, television, and radio. Congress enacted this provision for two basic policy reasons: to promote the free exchange of information and ideas over the Internet and to encourage voluntary monitoring for offensive or obscene material.

Interactive computer services have millions of users. It would be impossible for service providers to screen each of their millions of postings for possible problems. Faced with potential liability for each message republished by their services, interactive computer service providers might choose to severely restrict the number and type of messages posted. Congress considered the weight of the speech interests implicated and chose to immunize service providers to avoid any such restrictive effect. Under [the CDA], therefore, so long as a third party willingly provides the essential published content, the interactive service provider receives full immunity regardless of the specific editing or selection process.

The fact that some of the content [in Carafano's fake profile] was formulated in response to Matchmaker's questionnaire does not [make Matchmaker liable]. Doubtless, the questionnaire facilitated the expression of information

[9] **Matchmaker.com**, Inc. changed its legal name to **Metrosplash.com**, Inc. but continued to do business as **Matchmaker.com**.

by individual users. However, the selection of the content was left exclusively to the user. Matchmaker cannot be considered an "information content provider" under the statute because no profile has any content until a user actively creates it.

Further, even assuming Matchmaker could be considered an information content provider, the statute would still bar Carafano's claims unless Matchmaker created or developed the particular information at issue. In this case, critical information about Carafano's home address and the email address that revealed her phone number were transmitted unaltered to profile viewers. Thus, Matchmaker did not play a significant role in creating, developing, or "transforming" the relevant information.

Thus, despite the serious and utterly deplorable consequences that occurred in this case, we conclude that Congress intended that service providers such as Matchmaker be afforded immunity from suit.

Note that the CDA does not protect web hosts or ISPs that engage in wrongdoing. For example, Bright Builders, Inc, hosted **copycatclubs.com**, a website that, as you might guess, sold counterfeit golf clubs. The court held that Bright Builders was liable despite the CDA because it participated in the design, building, marketing, and support of **copycatclubs.com**. It even helped locate the counterfeit clubs that the website sold.[10] Ultimately, a jury returned a verdict of $770,750 against Bright Builders.

Also, the CDA does not protect web hosts and ISPs from contract liability. For example, after Cynthia Barnes broke up with her boyfriend, he created a profile of her on a Yahoo! website. He then spitefully posted nude photos of the two of them taken without her knowledge, together with her addresses and phone numbers at home and at work. He also suggested that she was interested in sex with random strangers. Many men were willing to oblige. For months, Yahoo! did not even respond to Barnes's request to remove the profile. Not until a TV show prepared to run a story about the incident did the company's director of communications contact Barnes to promise that the profile would be removed immediately. Still Yahoo! took no action until two months later, when Barnes sued. The appeals court ruled that Barnes could bring a contract claim against Yahoo! under a theory of promissory estoppel–that she had relied on the company's promise.[11]

EXAM Strategy

Question: Someone posted an anonymous review on **TripAdvisor.com** alleging that the owner of a restaurant had entertained a prostitute there. The allegation was false. TripAdvisor refused to investigate or remove the review. Does the restaurant owner have a valid claim against the website?

Strategy: Remember that web hosts are liable only if they have engaged in wrongdoing.

Result: As a web host, TripAdvisor is not liable for content. It would be liable only if it promised to take down the review and then did not.

[10]*Roger Cleveland Golf Co. v. Price*, 2010 U.S. Dist. LEXIS 128044.

[11]*Barnes v. Yahoo!, Inc.*, 570 F.3d 1096 (9th Cir., 2008). Promissory estoppel is discussed at greater length in Chapter 10.

Crime on the Internet

Despite its great benefits, the Internet has also opened new frontiers in crime for the dishonest and unscrupulous.

Hacking

During the 2008 presidential campaign, college student David Kernell guessed Sarah Palin's email password, accessed her personal Yahoo! account, and published the content of some of her emails. To many, his actions seemed like an amusing prank. The joke turned out not to be so funny when Kernell was sentenced to one year in prison.

Gaining unauthorized access to a computer system is called **hacking**. It is a major crime. The Federal Bureau of Investigation ranks cybercrime as its third-highest priority, right behind terrorism and spying. The Pentagon reports that hackers make more than 250,000 attempts annually on its computers. The goal of hackers is varied; some do it for little more than the thrill of the challenge. The objective for other hackers may be industrial espionage, extortion, theft of credit card information, or revenge for perceived slights. Kernell hoped to prevent Palin from being elected vice president.

Hacking
Gaining unauthorized access to a computer system.

Hacking is a crime under the federal Computer Fraud and Abuse Act of 1986 (CFAA).[12] This statute applies to any computer, cell phone, iPod, or other gadget attached to the Internet. **The CFAA prohibits:**

- Accessing a computer without authorization and obtaining information from it,
- Computer espionage,
- Theft of financial information,
- Theft of information from the U.S. government,
- Theft from a computer,
- Computer fraud,
- Intentional, reckless, and negligent damage to a computer,
- Trafficking in computer passwords, and
- Computer extortion.

The CFAA also provides for civil remedies so that someone who has been harmed by a hacker can personally recover damages from the wrongdoer. Employers have begun to use the CFAA to bring civil cases against former employees who take company information with them when they go to work for a competitor. At this writing, the courts are inconsistent on the issue of whether such an activity constitutes "unauthorized access" and is, therefore, a violation of the CFAA. Also, database owners sometimes claim that an unauthorized user who "shares" the login credentials of a legitimate purchaser has violated the CFAA. Because the courts have split on these issues, the outcome of such a case depends on geography.[13]

There are two problems with the CFAA. First, while the statute prohibits the use of a virus to harm a computer, it does not ban the creation of viruses that someone else could use for

---

[12] 18 U.S.C. Section 1030.

[13] See, for example, *Int'l Airport Centers LLC v. Citrin*, 440 F 3d 418 (7th Cir., 2006); *Lasco Foods, Inc. v. Hall & Shaw Sales*, 600 F. Supp. 2d 1045 (E. Dist. Mo, 2009); *Orbit One Communications Inc. v. Numerex Corp*, 692 F. Supp. 2d 373 (S.D.N.Y. 2010); *State Analysis Inc. v. American Financial Services Assoc*, 621 F. Supp. 2d 309 (E.D. Va., 2009); and *AtPac Inc. v. Aptitude Solutions Inc.*, 730 F. Supp. 2d 1174, (E.D. CA, 2010).

hacking. Thus, it is legal for websites to sell source code for viruses—codes that even beginners can use destructively.

Second, the CFAA applies only to U.S. criminals. Because the Internet is truly international, cybercriminals do not always fall within the jurisdiction of American laws. For example, a computer virus called ILOVEYOU caused an estimated $7 billion worth of damage worldwide. Although the perpetrator would have been subject to prosecution under the CFAA in the United States, he lived in the Philippines, which did not have laws prohibiting cybercrime. Nor could the suspect be extradited automatically to the United States because the extradition treaty only applied if both nations had the same law. The Philippines ultimately dropped all charges against the suspect.

Is this the real deal, or a cheap imitation?

Fraud

Fraud is a growth business on the Internet. The Internet's anonymity and speed facilitate fraud, and computers help criminals identify and contact victims. Common scams include advance fee scams,[14] the sale of merchandise that is either defective or nonexistent, the so-called Nigerian letter scam,[15] billing for services that are touted as "free," fake scholarship search services, romance fraud (you meet someone online who wants to visit you but needs money for travel expenses), and credit card scams (for a fee, you can get a credit card, even with a poor credit rating). One of the new scams involves *over*payment. You are renting out a house, selling a pet, or accepting a job, and "by accident," you are sent too much money. You wire the excess back, only to find out that the initial check or funds transfer was no good.

Fraud is the deception of another person for the purpose of obtaining money or property from him. It can be prosecuted under state law or the Computer Fraud and Abuse Act. In addition, federal mail and wire fraud statutes prohibit the use of mail or wire communication in furtherance of a fraudulent scheme.[16] The FTC can bring civil cases under Section 5 of the FTC Act. (Chapter 8, on crime, discusses fraud.)

Auctions

Internet auctions are the number one source of consumer complaints about online fraud. Wrongdoers either sell goods they do not own, provide defective goods, or offer fakes. In a recent case—which will not reduce the amount of auction fraud—a court held that eBay, the Internet auction site, was not liable to Tiffany & Company for the counterfeit Tiffany products sold on the site. The jewelry company had sued after discovering that most items advertised on eBay as Tiffany products were, in fact, fakes. The court held that eBay's only legal obligation was to remove products once told that they were counterfeit.[17]

[14]As in, "If you are willing to pay a fee in advance, then you will have access to (pick your choice) favorable financing, lottery winnings from overseas, attractive investment opportunities that will make you rich."

[15]Victims receive an email from someone alleging to be a Nigerian government official who has stolen money from the government. He needs some place safe to park the money for a short time. The official promises that, if the victim will permit her account to be used for this purpose, she will be allowed to keep a percentage of the stolen money. Instead, of course, once the "official" has the victim's bank information, he cleans out the account.

[16]U.S.C. Sections 1341–1346.

[17]*Tiffany Inc. v. eBay, Inc.*, 600 F.3d 93, 2010 U.S. App. LEXIS 6735 (2nd Cir., 2010) and, on remand, 2010 U.S. Dist. LEXIS 96596 (S.D.N.Y, 2010).

Shilling is an increasingly popular online auction fraud. **Shilling means that a seller either bids on his own goods or agrees to cross-bid with a group of other sellers.** Shilling is prohibited because the owner drives up the price of his own item by bidding on it. Thus, for example, Kenneth Walton, a San Francisco lawyer, put up for auction on eBay an abstract painting purportedly by famous artist Richard Diebenkorn. A bidder offered $135,805 before eBay withdrew the item in response to charges that Walton had placed a bid on the painting himself and had also engaged in cross-bidding with a group of other eBay users. Although Walton claimed that he had placed the bids for friends, he ultimately pleaded guilty to charges of federal wire and mail fraud. He was sentenced to almost four years in prison and paid almost $100,000 in restitution to those who overpaid for the items he bid on.

Shilling
When a seller at auction either bids on his own goods or agrees to cross-bid with a group of other sellers.

To date, eBay has generally responded to shillers by suspending them. Shillers are also subject to suit under general anti-fraud statutes. In addition, some states explicitly prohibit shilling.[18]

Identity Theft

Identity theft is one of the scariest crimes against property. Thieves steal the victim's social security number and other personal information such as bank account numbers and mother's maiden name, which they use to obtain loans and credit cards. The money owed is never repaid, leaving victims to prove that they were not responsible for the debts. The thieves may even commit (additional) crimes under their new identities. Meanwhile, the victim may find himself unable to obtain a credit card, loan, or job. One victim spent several nights in jail after he was arrested for a crime that his alter ego had committed.

Although identity fraud existed before computers, the Internet has made it much easier. For example, consumer activists were able to purchase the social security numbers of the director of the CIA, the Attorney General of the United States, and other top administration officials. The cost? Only $26 each. No surprise then that 8 million Americans are victims of this crime each year.

A number of federal statutes deal with identity theft or its consequences. **The Identity Theft and Assumption Deterrence Act of 1998 prohibits the use of false identification to commit fraud or other crime and it also permits the victim to seek restitution in court.**[19] The Truth in Lending Act limits liability on a stolen credit card to $50. The Social Security Protection Act of 2010 prohibits government agencies from printing social security numbers on checks.

A number of states have also passed identity theft statutes. Almost every state now requires companies to notify consumers when their personal information has been stolen. Many states also restrict the use and disclosure of social security numbers.

What can you do to prevent the theft of your identity?

1. Check your credit reports at least once a year. (Consumers are entitled by law to one free credit report every year from each of the three major reporting agencies. You can order these reports at **https://www.annualcreditreport.com**.)
2. Place a freeze on your credit report so that anyone who is about to issue a loan or credit card will double-check with you first.
3. If you suspect that your identity has been stolen, contact the FTC at 877-IDTHEFT, 877-438-4338, or google "ftc identity theft" to get to the FTC's identity theft site. Also, file a police report immediately and keep a copy to show creditors. Notify the three credit agencies.

---

[18]For example, New Mexico law provides that "It shall be unlawful to employ shills or puffers at any such auction sale or to offer or to make or to procure to be offered or made any false bid or offer any false bid to buy or pretend to buy any article sold or offered for sale." N.M. Stat. Section 61-16-14.
[19]18 U.S. Section 1028.

Phishing

Phishing
A fraudster sends a message directing the recipient to enter personal information on a website that is an illegal imitation of a legitimate site.

Have you ever received an instant message from a Facebook friend saying, "Hey, what's up?" with a link to an IQ test? This instant message is not from a friend, but rather from a fraudster hoping to lure the recipient into revealing her personal information. In this case, people who clicked on the link were told that they had to provide their cell phone number to get the test results. Next thing they knew, they had been signed up for some expensive cell phone service. This scam is part of one of the most rapidly growing areas of Internet fraud: **phishing. In this crime, a fraudster sends a message directing the recipient to enter personal information on a website that is an illegal imitation of a legitimate site.**

In a traditional phishing scam, large numbers of generic emails are sprayed over the Internet asking millions of people to log on to, say, a fake bank site. But the latest development—called **spear phishing**—involves personalized messages sent from someone the victim knows. For example, your sister asks for your social security number so she can add you as a beneficiary to her life insurance policy. In reality, this email has come from a fraudster who hacked into her Facebook account to gain access to her lists of friends and family.[20] Even "Like" buttons can be "clickjacked" to take unwary users to bogus sites.

Prosecutors can bring criminal charges against phishers for fraud. The companies whose websites have been copied can sue these criminals for fraud, trademark infringement, false advertising, and cybersquatting (discussed further in Chapter 42, on intellectual property).

No reputable company will ask customers to respond to an email with personal information. When in doubt, close the suspicious email, relaunch your web browser, and then go to the company's main website. If the legitimate company needs information from you, it will so indicate on the site.

EXAM Strategy

Question: TruePrint sent emails to thousands of consumers, advertising its business card service. The subject line said, "FREE GIFT!" Consumers who opened the email, were then asked to click on a link, which led to a web page that asked for personal information. After filling in the information and clicking a "Continue" button, they landed on a second web page. In the fine print at the bottom of this page was the following statement: "Printing is free. Pay only for shipping and processing. Please see our Free Offer Details for more information." Finally, at the end of the process on the next web page, consumers learned that shipping the free gift would cost $5.67, payable by credit card or check. The email did not make any reference to TruePrint. Has TruePrint violated the law?

Strategy: Indeed, TruePrint has violated two laws.

Result: First, it has advertised a "free gift" when, in fact, the gift costs $5.67. That is fraud. Second, it has violated the CAN-SPAM act because the subject line of the email is untrue—the gift is not free. It has further violated CAN-SPAM by its failure to provide TruePrint's valid physical return address.

[20] To prevent your Facebook account from being hijacked, be careful when accessing it over a public network (such as in a hotel or airport), where fraudsters might be able to capture your password. If you text "otp" to 32665, you will receive a password that can be used only once (a "one-time password"). Fraudsters thus cannot use this password to access your account.

Chapter Conclusion

The Internet has changed our lives in ways that were inconceivable a generation ago, and the law is rushing to catch up. Courts will apply some old laws in new ways and, as legislators and courts learn from experience, new laws will be enacted.

Inevitably, the law of cyberspace will become increasingly international. What does Europe accomplish by regulating Internet privacy if its citizens spend a good portion of their time on American websites? What will the FTC do if scam artists or spammers operate offshore? Effective regulation of cyberspace will require cooperation among nations and between government and industry.

EXAM REVIEW

1. **THE FIRST AMENDMENT** The First Amendment to the Constitution protects speech on the Internet so long as the speech does not violate some other law. (pp. 1037–1039)

2. **THE FOURTH AMENDMENT** The Fourth Amendment to the Constitution prohibits unreasonable searches and seizures by the government. This provision applies to computers. (pp. 1039–1041)

3. **REASONABLE EXPECTATION OF PRIVACY** If your employer has a reasonably articulated policy notifying you that it has the right to access and read electronic communications on a system that it provides, then you do not have a reasonable expectation of privacy when using that system. You do have a reasonable right to privacy on a system that you provide for yourself. (pp. 1039–1040)

EXAM Strategy

Question: Three travel agents use fictitious accounts to steal millions of frequent flyer miles. Must the police obtain a warrant before searching their email accounts?

Strategy: The answer depends on what type of email account the agents used.

4. **THE FTC ACT** Section 5 of the FTC Act prohibits unfair and deceptive practices. The FTC does not require websites to have a privacy policy, but if they do have one, it cannot be deceptive and they must comply with it. (p. 1042)

5. **THE ECPA** The Electronic Communications Privacy Act of 1986 is a federal statute that prohibits unauthorized interception or disclosure of wire and electronic communications. However, it permits an employer to monitor workers' electronic communications if (1) the employee consents, (2) the monitoring occurs in the ordinary course of business, or (3) the employer provides the computer system (in the case of email). (pp. 1042–1044)

6. **COPPA** The Children's Online Privacy Protection Act of 1998 prohibits Internet operators from collecting information from children under 13 without parental permission. It also requires sites to disclose how they will use any information they acquire. (p. 1044)

7. **E-PRIVACY DIRECTIVE** The European Union's e-Privacy Directive requires an opt-in system under which tracking tools cannot be used unless the consumer is told how the tools will be used and then specifically grants permission for their use. (pp. 1044–1045)

8. **CAN-SPAM** The Controlling the Assault of Non-Solicited Pornography and Marketing Act (CAN-SPAM) is a federal statute that does not prohibit spam but instead regulates it. Under this statute, commercial email:
   - May not have deceptive headings (From, To, Reply To, Subject),
   - Must offer an opt-out system permitting the recipient to unsubscribe (and must honor those requests promptly),
   - Must clearly indicate that the email is an advertisement,
   - Must provide a valid physical return address (not a post office box), and
   - Must clearly indicate the nature of pornographic messages. (p. 1045)

9. **THE CDA** Under the Communications Decency Act of 1996, ISPs and web hosts are not liable for information that is provided by someone else. (pp. 1046–1048)

EXAM Strategy

Question: Ton Cremers was the director of security at Amsterdam's famous Rijksmuseum and the operator of the Museum Security Network (the Network) website. Robert Smith, a handyman working for Ellen Batzel in North Carolina, sent an email to the Network alleging that Batzel was the granddaughter of Heinrich Himmler (one of Hitler's henchmen) and that she had art that Himmler had stolen. These allegations were completely untrue. Cremers posted Smith's email on the Network's website and sent it to the Network's subscribers. Cremers exercised some editorial discretion in choosing which emails to send to subscribers, generally omitting any that were unrelated to stolen art. Is Cremers liable to Batzel for the harm that this inaccurate information caused?

Strategy: Cremers is liable only if he is a content provider. (See the "Result" at the end of this section.)

10. **THE CFAA** Hacking is a crime under the federal Computer Fraud and Abuse Act of 1986. The CFAA prohibits:
    - Accessing a computer without authorization and obtaining information from it,
    - Computer espionage,
    - Theft of financial information,
    - Theft of information from the U.S. government,

- Theft from a computer,
- Computer fraud,
- Intentional, reckless, and negligent damage to a computer,
- Trafficking in computer passwords, and
- Computer extortion. (pp. 1049–1050)

Question: To demonstrate the inadequacies of existing computer security systems, Cornell student Robert Morris created a computer virus. His plan, however, went awry, as plans sometimes do. He thought his virus would be relatively harmless, but it ran amok, crashing scores of computers at universities, military sites, and medical research sites. Has he committed a crime, or is he liable only for civil penalties? Does it matter that he did not intend to cause damage?

Strategy: Review the provisions of the CFAA. (See the "Result" at the end of this section.)

11. **FRAUD** Fraud is the deception of another person for the purpose of obtaining money or property from him. (pp. 1050–1052)

12. **IDENTITY THEFT** The Identity Theft and Assumption Deterrence Act of 1998 prohibits the use of false identification to commit fraud or other crime. (p. 1051)

3. Result: If their employer owns the email system, the agents have no expectation of privacy and the police do not need a search warrant. If, however, they are sending emails over a system they are paying for themselves, then the police do need a warrant.

9. Result: The court found that Cremers was not liable under the CDA.

10. Result: Morris was convicted of a crime under the CFAA. He intended to trespass on a computer, so it did not matter that he had no intent to cause harm.

Multiple-Choice Questions

1. Beth sent fraudulent emails through both her account at work and her personal account at home. Although Beth had never read her employer's handbook, it said the company had the right to access work emails. The police ________ obtain a search warrant before reading her work emails. They ________ obtain a search warrant before reading the emails from her personal account.

   (a) need to, need to

   (b) need not, need not

   (c) need to, need not

   (d) need not, need to

2. Because Blaine Blogger reviews movies on his blog, cinemas allow him in for free. Nellie Newspaper Reporter also gets free admission to movies. Blaine ________ disclose on his blog that he receives free tickets. Nellie ________ disclose in her articles that she receives free tickets.

(a) must, must

(b) need not, need not

(c) must, need not

(d) need not, must

3. An employer has the right to monitor workers' electronic communications if

(a) The employee consents.

(b) The monitoring occurs in the ordinary course of business.

(c) The employer provides the computer system.

(d) All of the above

(e) None of the above

4. Spiro Spammer sends millions of emails a day asking people to donate to his college tuition fund. Oddly enough, many people do. Everything in the emails is accurate (including his 1.9 GPA). Which of the following statements is true?

(a) Spiro has violated the CAN-SPAM Act because he has sent unsolicited commercial emails.

(b) Spiro has violated the CAN-SPAM Act if he has not offered recipients an opportunity to unsubscribe.

(c) Spiro has violated the CAN-SPAM Act because he is asking for money.

(d) Spiro has violated the CAN-SPAM Act unless the recipients have granted permission to him to send these emails.

5. Sushila suspects that her boyfriend is being unfaithful. While he is asleep, she takes his iPod out from under his pillow and goes through all his playlists. Then she finds what she has been looking for: Plum's Playlist. It is full of romantic songs. Sushila sends Plum an email that says, "You are the most evil person in the universe!" Which law has Sushila violated?

(a) The First Amendment

(b) The CDA

(c) The ECPA

(d) The CFAA

(e) None

Essay Questions

1. ETHICS Chitika, Inc., provided online tracking tools on websites. When consumers clicked the "opt-out" button, indicating that they did not want to be tracked, they were not—for 10 days. After that, the software would resume tracking. Is there a legal problem with Chitika's system? An ethical problem? What Life Principles were operating here?

2. **YOU BE THE JUDGE WRITING PROBLEM** Jerome Schneider wrote several books on how to avoid taxes. These books were sold on **Amazon.com**. Amazon permits visitors to post comments about items for sale. Amazon's policy suggests that these comments should be civil (e.g., no profanity or spiteful remarks). The comments about Schneider's books were not so kind. One person alleged Schneider was a felon. When Schneider complained, an Amazon representative agreed that some of the postings violated its guidelines and promised that they would be removed within one to two business days. Two days later, the posting had not been removed. Schneider filed suit. **Argument for Schneider:** Amazon has editorial discretion over the posted comments. It both establishes guidelines and then monitors the comments to ensure that they comply with the guidelines. These activities make Amazon an information content provider, not protected by the Communications Decency Act. Also, Amazon violated its promise to take down the content. **Argument for Amazon:** The right to edit material is not the same thing as creating the material in the first place.

3. Over the course of 10 months, Joseph Melle sent more than 60 million unsolicited email advertisements to AOL members. What charges could be brought against him? Would you need more information before deciding?

4. What can you do to protect your privacy online? Draw up a concrete list of steps that you might reasonably consider. Are there some actions that you would not be willing to take because they are not worth it to you?

5. Craig Hare offered computers and related equipment for sale on various Internet auction websites. He accepted payment but not responsibility—he never shipped the goods. Which government agencies might bring charges against him?

Discussion Questions

1. Marina Stengart used her company laptop to communicate with her lawyer via her personal, password-protected, web-based email account. The company's policy stated:

   > E-mail and voice mail messages, internet use and communication, and computer files are considered part of the company's business and client records. Such communications are not to be considered private or personal to any individual employee. Occasional personal use is permitted; however, the system should not be used to solicit for outside business ventures, charitable organizations, or for any political or religious purpose, unless authorized by the Director of Human Resources.

   After she filed an employment lawsuit against her employer, the company hired an expert to access her emails that had been automatically stored on the laptop. Are these emails protected by the attorney-client privilege? How does this case compare with *Scott v. Beth Israel* earlier in the chapter?

2. **Roommates.com** operated a website designed to match people renting spare rooms with those looking for a place to live. Before subscribers could search listings or post housing opportunities on Roommate's website, they had to create profiles, a process that required them to answer a series of questions that included the subscriber's sex, sexual orientation, and whether he would bring children to a household. The site also

encouraged subscribers to provide "Additional Comments," describing themselves and their desired roommate in an open-ended essay. Here are some typical ads:

- "I am not looking for Muslims."
- "Not acceptable: freaks, geeks, prostitutes (male or female), druggies, pet cobras, drama queens, or mortgage brokers."
- "Must be a black gay male!"
- We are 3 Christian females who Love our Lord Jesus Christ .... We have weekly bible studies and bi-weekly times of fellowship."

Many of the ads violated the Fair Housing Act. Is **Roommates.com** liable?

3. **ETHICS** Matt Drudge published a report on his website (**http://www.drudgereport.com**) that White House aide Sidney Blumenthal "has a spousal abuse past that has been effectively covered up .... There are court records of Blumenthal's violence against his wife." The *Drudge Report* is an electronic publication focusing on Hollywood and Washington gossip. AOL paid Drudge $3,000 a month to make the *Drudge Report* available to AOL subscribers. Drudge emailed his reports to AOL, which then posted them. Before posting, however, AOL had the right to edit content. Drudge ultimately retracted his allegations against Blumenthal, who sued AOL. He alleged that under the Communications Decency Act of 1996, AOL was a "content provider" because it paid Drudge and edited what he wrote. Do you agree? Putting liability aside, what moral obligation did AOL have to its members? To Blumenthal? Should AOL be liable for content it bought and provided to its members?

4. Lori Drew created a fake MySpace profile, pretending to be a teenage boy. Through that boy's identity, she bullied 13-year-old Megan Meier. The girl killed herself shortly after receiving a message saying, "The world would be a better place without you." MySpace requires all users to agree to its terms of service which require "truthful and accurate" information. Has Drew violated the CFAA?

5. Tracking tools provide benefits to consumers but they also carry risks. Should Congress regulate them? If so, what should the law provide?

CHAPTER 42

INTELLECTUAL PROPERTY

© Steve Allen/Jupiterimages

Cooper is a producer at a small indie film company in Los Angeles. He puts together packages that have a script, a director, and actors. He then finds investors who pay to make the movie and distributors who purchase the right to release it in cinemas, on TV, and on DVD. (Although most people think that box office results are what count, the reality is that, historically, over half of most movies' revenue came from home entertainment options such as DVD rentals and sales.)

On a flight to New York in search of investors, Cooper finds himself sitting next to a man who is watching a movie on his computer.... Clearly, the man has downloaded it from an illegal website.

Cooper is pretty excited about two packages he has put together: one stars established actor Robert de Niro, and the other features an up-and-coming director working with movie star Clive Owen. But his excitement has turned to disappointment—shockingly, he cannot find anyone willing to invest in either movie. Cooper hears the same thing from everyone: "DVD sales are way down, so we know we won't get the payback we used to. We can't afford to invest in as many movies."

On a flight to New York in search of investors, Cooper finds himself sitting next to a man who is watching a movie on his computer. Cooper knows this movie has not even been released to DVD yet. Clearly, the man has downloaded it from an illegal website. Cooper slowly crushes the plastic cup in his hand. What's wrong with that guy? Doesn't he know that movies cost money to make? Doesn't he realize people like him are killing an industry?

INTRODUCTION

For much of history, land was the most valuable form of property. It was the primary source of wealth and social status. Today, intellectual property is a major source of wealth. New ideas—for manufacturing processes, computer programs, medicines, books—bring both affluence and influence.

Although both can be valuable assets, land and intellectual property are fundamentally different. The value of land lies in the owner's right to exclude, to prevent others from entering it. Intellectual property, however, has little economic value unless others use it. This ability to share intellectual property is both good news and bad. On the one hand, the owner can produce and sell unlimited copies of, say, a software program, but on the other hand, the owner has no easy way to determine if someone is using the program for free. The high cost of developing intellectual property, combined with the low cost of reproducing it, makes it particularly vulnerable to theft.

Because intellectual property is nonexclusive, many people see no problem with using it for free. But when consumers take intellectual property—movies, songs, and books—without paying for it, they ensure that fewer of these items will be produced.

Some commentators suggest that the United States has been a technological leader partly because its laws have always provided strong protection for intellectual property. The Constitution provided for patent protection early in the country's history.

The conflict between those who have intellectual property and those who want to use it has taken on a global dimension. Developing countries argue that American intellectual property laws increase the price of medicines, such as AIDS drugs and vaccines, that could save more lives if only they were cheaper and, therefore, more readily available. "Patents kill" is their slogan. The United States responds that without patent protection, there would be no innovation, no miracle drugs.

But even U.S. drug companies admit that patents can sometimes stifle innovation. The pharmaceutical company Bristol-Meyers Squibb says that it cannot conduct research on many cancer-fighting drugs because of patents held by its competitors. Information technology firms make a similar complaint. In a study of the American semiconductor business, researchers found that more patents did not necessarily mean more innovation. Instead, some companies were simply more aggressive about patenting every possible aspect of their research. Nor was there any evidence that innovation increased as patent rights were enhanced.

The role of intellectual property law is to balance the rights of those who create intellectual property and those who would enjoy it. And as this chapter reveals, such a balancing act is no easy feat.

PATENTS

Patent

A grant by the government permitting the inventor exclusive use of an invention for a specified period.

A **patent** is a grant by the government permitting the inventor exclusive use of an invention for 20 years from the date of filing (or 14 years from the date of issuance in the case of design patents). During this period, no one may make, use, or sell the invention without permission. In return, the inventor publicly discloses information about the invention that anyone can use upon expiration of the patent.

Types of Patents

There are three types of patents: utility patents, design patents, and plant patents.

Utility Patent

Whenever people use the word "patent" by itself, they are referring to a utility patent. This type of patent is available to those who invent (or significantly improve) any of the following:

Type of Invention	Example
Mechanical invention	A hydraulic jack used to lift heavy aircraft
Electrical invention	A prewired, portable wall panel for use in large, open-plan offices
Chemical invention	The chemical 2-chloroethylphosphonic acid used as a plant growth regulator
Process	A method for applying a chemical compound to an established plant such as rice in order to inhibit the growth of weeds selectively; the application can be patented separately from the actual chemical
Machine	A device that enables a helicopter pilot to control all flight functions (pitch, roll, and heave) with one hand
Composition of matter	A sludge used as an explosive at construction sites; the patent specifies the water content, the density, and the types of solids contained in the mixture

What about an electronic signal—is that patentable? An inventor filed a patent application for a method of encoding additional information on electronic signals emitted from digital audio files. The process was very useful, but the court ruled that it was not patentable because the signal is not a mechanical, electrical, or chemical invention, a process, a machine, or the composition of matter.[1]

A patent is not available solely for an idea, but only for its tangible application. Thus patents are not available for laws of nature, scientific principles, mathematical algorithms, or formulas such as $a^2 + b^2 = c^2$.

Business Method Patents. In recent years, so-called "business method patents" have been controversial. These patents involve a particular way of doing business that often includes data processing or mathematical calculations. Business method patents have been particularly common in e-commerce. For example, Amazon.com patented its One-Click method of instant ordering. The company then obtained an injunction to prevent barnesandnoble.com from using its Express Lane service that was similar to One-Click. The judge directed barnesandnoble.com to add another step to its ordering process. The Patent and Trademark Office (PTO) affirmed the Amazon patent, which will expire in 2017.

Facebook has been granted a patent on a process that "dynamically provides a news feed about a user of a social network." Most social media sites, such as LinkedIn, Twitter, and Flickr, use some version of this technology. At this writing, two important issues are unknown: the exact scope of the patent and how aggressive Facebook will be in enforcing it.

It would be very helpful if the courts provided more clarity—and certainty—about the scope and enforceability of business method patents. In a recent case, *Bilski v. Kappos*, the Supreme Court ruled that business methods are *generally* patentable, even as it held that the *particular* patent in the case (a method for hedging risk in commodities trading) was too abstract to be acceptable.[2] In the same case, the Supreme Court encouraged lower courts to

[1] *In re Nuijten*, 500 F.3d 1346; 2007 U.S. App. LEXIS 22426.
[2] 2010 U.S. LEXIS 5521 (S.Ct. 2010).

narrow the scope of business method patents, but did not offer guidance as to what these limits should be. For the time being, it seems that inventors will continue to apply for business method patents while waiting for lower courts to develop standards that meet the approval of the Supreme Court. This could be a lengthy wait—in the *Bilski* case, 13 years elapsed from the filing of the patent application until the Supreme Court decision.

However, in 2011 Congress passed the America Invents Act (AIA). Under this statute, anyone who has been charged with infringement of certain *financial service* business method patents has the right (from 2012 to 2020) to challenge the validity of that patent.

Patents on Living Organisms. In 1980, the Supreme Court ruled that living organisms could be patented.[3] That case involved genetically engineered bacteria that was used to treat oil spills. The bacteria could be patented because it was different from anything found in nature and was also useful.

As a result of this ruling, the PTO began issuing patents on human genetic material. A total of 20 percent of all genes were patented, and the companies that owned these patents were valued at billions of dollars. Then, in 2010, a federal district court ruled that genes could not be patented. The patent at issue in this case allowed laboratories to isolate DNA that contained certain genes and then test them for mutations associated with breast and ovarian cancer. However, a federal appeals court overruled the district court, holding that the genes could be patented (but, in this case, not the process by which the genes were compared).[4] It seems likely that the Supreme Court will weigh in on this dispute.

Design Patent

A design patent protects the appearance, not the function, of an item. It is granted to anyone who invents a new, original, and ornamental design for an article. For example, Braun, Inc., patented the look of its handheld electric blenders. Design patents last 14 years from the date of issuance, not 20 years from the date of filing.

Plant Patent

Anyone who creates a new type of plant can patent it, provided that the inventor is able to reproduce it asexually—through grafting, for instance, rather than by planting its seeds. For example, one company patented its unique heather plant.

Braun patented the appearance not the function, of this blender.

Requirements for a Patent

To receive a patent, an invention must be:

- **Novel**. An invention is not patentable if it (1) is known or has already been used in this country, (2) has been described in a publication here or overseas, or (3) is otherwise available to the public. For example, an inventor discovered a new use for existing chemical compounds but was not permitted to patent it because the compounds had already been described in prior publications, though the new uses had not.[5]
- **Nonobvious**. An invention is not patentable if it is obvious to a person with ordinary skill in that particular area. An inventor was

[3]*Diamond v. Chakrabarty*, 447 U.S. 303 (S. Ct. 1980).
[4]*Ass'n for Molecular Pathology v. United States PTO*, 2011 U.S. App. LEXIS 15649, 99 U.S.P.Q.2D (BNA) 1398. (Fed, Cir., 2011).
[5]*In re Schoenwald*, 964 F.2d 1122, 1992 U.S. App. LEXIS 10181 (Fed. Cir. 1992).

not allowed to patent a waterflush system designed to remove cow manure from the floor of a barn because it was obvious.[6]

- **Useful**. To be patented, an invention must be useful. It need not necessarily be commercially valuable, but it must have some current use. Being merely of scientific interest is not enough. Thus, a company was denied a patent for a novel process for making steroids because they had no therapeutic value.[7]

EXAM Strategy

Question: In 1572, during the reign of Queen Elizabeth I of England, a patent application was filed for a knife with a bone handle rather than a wooden one. Would this patent be granted under current U.S. law?

Strategy: Was a bone handle novel, nonobvious, and useful?

Result: It was useful—no splinters from a bone handle. It was novel—no one had ever done it before. But the patent was denied because it was obvious.

Patent Application and Issuance

To obtain a patent, the inventor must file a complex application with the PTO. If a patent examiner determines that the application meets all legal requirements, the PTO will issue the patent. If an examiner denies a patent application for any reason, the inventor can appeal that decision to the Patent Trial and Appeal Board in the PTO and from there to the Court of Appeals for the Federal Circuit in Washington.[8]

Under the AIA, third parties have the right to submit so-called "prior art"—that is, evidence that the invention is not novel. Even after a patent has been granted, third parties have limited rights to challenge its validity.

Priority Between Two Inventors

When two people invent the same product, who is entitled to a patent—the first to invent or the first to file an application? Until 2013, the person who invents and puts the invention into practice has priority over the first filer. But in 2013, the AIA changes the law so that the first person to *file* a patent application has priority. Because inventors will now be applying earlier than they have done in the past, this statute makes it easier for them to amend their applications. The AIA brings the United States into conformity with most of the rest of the world.

Prior Sale

An inventor must apply for a patent within one year of selling the product commercially. The purpose of this rule is to encourage prompt disclosure of inventions. It prevents someone from inventing a product, selling it for years, and then obtaining a 20-year monopoly with a patent.

[6] *Sakraida v. Ag Pro, Inc.*, 425 U.S. 273, 96 S. Ct. 1532, 1976 U.S. LEXIS 146 (1976).
[7] *Brenner v. Manson*, 383 U.S. 519, 86 S. Ct. 1033, 1966 U.S. LEXIS 2907 (1966).
[8] Recall from Chapter 3 that the Court of Appeals for the Federal Circuit is the 13th United States Court of Appeals. It hears appeals from specialized trial courts.

Provisional Patent Application

Inventors who are unable to assess the market value of their ideas sometimes hesitate to file a patent application because the process is expensive and cumbersome. A successful application can cost tens of thousands of dollars because the PTO charges a separate fee for each step of the process. Thus, for example, an inventor must pay a fee each time a patent examiner raises a legitimate question that requires an amendment to the application. Even if the examiner is wrong, the applicant may have to pay a fee even to file a disagreement. Thus, an inventor may struggle to raise sufficient funds in the one-year filing window to pay for the patent process. However, the AIA now permits the PTO to charge lower fees to individuals or small entities.

In addition, the PTO permits inventors to make a simpler, shorter filing called a **provisional patent application (PPA)**. This application provides a provable date of filing. Once filed, the application sits dormant for a year, giving the inventors an opportunity to show their ideas to potential investors without incurring the full expense of a patent application. PPA protection lasts only one year. To maintain protection after that time, the inventor must file a nonprovisional patent application.

Duration of a Patent

Patents are valid for 20 years from the date of *filing* the application (except design patents, which are valid for 14 years from date of *issuance*). In the last 15 years, the number of patent applications has increased from 950 a day to 2,000. And the typical patent application is longer and more complicated. As a result, more than 1 million applications are now pending. Approval of a patent can take anywhere from 3 to 6 years from the date of filing. These delays mean that patent holders effectively receive much less than 20 years of protection (although in the case of exceptional delays, it is possible to request an extension). They also threaten the ability of American inventors to attract investors, monetize their inventions, and compete with foreign businesses.

Infringement

A patent holder has the exclusive right to use the invention during the term of the patent. A holder can prohibit others from using any product that is substantially the same, license the product to others for a fee, and recover damages from anyone who uses the product without permission.

Patent Trolls

As we have seen, the patent office must deal with a growing caseload. As a result, the examiners typically spend less than 25 hours reviewing each application. Applicants are not required to demonstrate that the invention is novel, and often the examiner neither knows nor has the time to research the issue. Thus, patents are sometimes issued for inventions that are not really new.

Patent troll
Someone who buys a portfolio of patents for the purpose of making patent infringement claims.

Traditionally, this issue was not that important because companies with overlapping patents did not litigate who the real inventor was. They were too busy developing products to sell. But then came **patent trolls**. They do not make or market products—they simply buy portfolios of patents for the purpose of bringing patent infringement claims against companies already using the technology. Typically, patent trolls request an injunction to prevent the use of the technology during litigation, potentially harming a multimillion-dollar product over a patent worth much less. Because the trolls are not using the technology themselves, they do not have to worry about a cross-injunction against them. Oftentimes, patent trolls are simply hoping that even legitimate users will pay them to go away. In a recent report, the FTC found that these practices "can deter innovation by raising costs and risks without making a technological contribution."[9] In response to criticism, patent trolls argue that they are encouraging innovation by making patents more valuable.

---

[9] U.S. Fed. Trade Comm'n, *The Evolving IP Marketplace: Aligning Patent Notice and Remedies with Competition* (March 7, 2011).

Some hedge funds have entered the patent troll business. In addition, a company owned by Paul Allen, one of Microsoft's founders, recently began filing suit against companies that are using technology that his research lab allegedly invented prior to 2005. These suits have been filed against most of the major players in Silicon Valley—Apple, eBay, Facebook, Google, and Netflix—for their use of technology that improves users' online experience. (Such as suggestions for related reading and pop-up ads or stock quotes.) The technology at issue is key to these companies.

Ethics Is the patent troll business ethical? Under what circumstances would you be willing to engage in this practice? Paul Allen is wealthy beyond most people's dreams. Why would he be involved in this litigation? What is your Life Principle in this case?

International Patent Treaties

About half of all patent applications are filed in more than one country. This process used to be a logistical nightmare because almost every country had its own unique filing procedures and standards. Companies were reluctant to develop products based on technology that they were not sure they actually owned. Several treaties now facilitate this process, although it is still not the one-stop (or one-click) effort that inventors desire. These treaties were drafted by the World Intellectual Property Organization (WIPO) of the United Nations.

The Paris Convention for the Protection of Industrial Property (Paris Convention) requires each member country to grant to citizens of other member countries the same rights under patent law as its own citizens enjoy. Thus, the patent office in each member country must accept and recognize all patent and trademark applications filed with it by anyone who lives in any member country. For example, the French patent office cannot refuse to accept an application from an American, so long as the American has complied with French law. Under this treaty, inventors who file in one country have up to one year to file elsewhere and still maintain patent protection.

The Patent Law Treaty requires that countries use the same standards for the form and content of patent applications (whether submitted on paper or electronically). This treaty reduces the procedural conflicts over issues such as translations and fees.

The **Patent Cooperation Treaty** (PCT) is a step toward providing more coordinated patent review across many countries. Inventors who pay a fee and file a so-called PCT patent application are granted patent protection in the 143 PCT countries for up to 30 months. During this time, they can decide how many countries they actually want to file in. (Inventors have one year of protection under the Paris Convention; this treaty grants an additional 18 months.)

Once a PCT application is filed, one of the major patent offices prepares an "international search report"

WIPO headquarters in Geneva, Switzerland.

and issues a nonbinding opinion on whether the invention is patentable. This report, while nonbinding, helps applicants assess the patentability of their inventions and provides persuasive evidence to national patent offices. Inventors who wish to proceed internationally must then have the report translated and file it with applications and fees in whichever countries they want a patent.

The United States PTO has bilateral agreements with 16 other patent offices under a so-called **Patent Prosecution Highway**. Under this system, once a patent is approved by one country, it goes to the head of the line for patent examination in the other country.

In addition to these treaties, any country that joins the World Trade Organization (WTO) must agree to trade-related aspects of intellectual property rights (TRIPS). This agreement does not create an international patent system, but it does require all participants to meet minimum standards for the protection of intellectual property. How individual countries achieve that goal is left to them.

Finally, the European Union is in the process of developing a single European patent that would require only one application.

Copyrights

The holder of a copyright owns the *particular tangible expression* of an idea, but not the underlying idea or method of operation. Abner Doubleday could have copyrighted a book setting out his particular version of the rules of baseball, but he could not have copyrighted the rules themselves, nor could he have required players to pay him a royalty. Similarly, the inventor of double-entry bookkeeping could copyright a pamphlet explaining his system, but not the system itself.

Unlike patents, the ideas underlying copyrighted material need not be novel. For example, three movies—*Like Father Like Son, Vice Versa, and Freaky Friday*—are about a parent and child who switch bodies. The movies all have the same plot, but there is no copyright violation because their *expressions* of the basic idea are different.

The Copyright Act protects literature, music, drama, choreography, pictures, sculpture, movies, recordings, architectural works, and computer databases, and computer programs "to the extent that they incorporate authorship in the programmer's expression of original ideas, as distinguished from the ideas themselves."

A work is copyrighted *automatically* once it is in tangible form. For example, once a songwriter puts notes on paper, the work is copyrighted without further ado. But if she whistles a happy tune without writing it down, the song is not copyrighted, and anyone else can use it without permission. Registration with the Copyright Office of the Library of Congress is necessary only if the holder wishes to bring suit to enforce the copyright. Although authors still routinely place the copyright symbol (©) on their works, such a precaution is not necessary in the United States. However, some lawyers still recommend using the copyright symbol because other countries recognize it. Also, the penalties for intentional copyright infringement are heavier than for unintentional violations, and the presence of a copyright notice is evidence that the infringer's actions were intentional.

In the following case, you can imagine the author's frustration when a celebrity stole her thunder and her sales by writing a book on the very same topic. But did the celebrity violate copyright law? This case also anticipates our discussion of trademarks.

LAPINE V. SEINFELD

375 Fed. Appx. 81; 2010 U.S. App. Lexis 8778
United States Court of Appeals for the Second Circuit, 2010

Facts: Missy Chase Lapine wrote a book called *The Sneaky Chef: Simple Strategies for Hiding Healthy Foods in Kids' Favorite Meals*, which was about how to disguise vegetables so that children would eat them. Her strategy was to add pureed vegetables to food that children like, such as macaroni and cheese. (We are not making this up.) Four months later, Jessica Seinfeld, wife of comedian Jerry Seinfeld, published a book entitled *Deceptively Delicious: Simple Secrets To Get Your Kids Eating Good Food*, which featured recipes involving pureed vegetables in (guess what?) macaroni and cheese and other kid-friendly foods.

Lapine filed suit against Seinfeld, alleging violation of her copyright in the content of the book, as well as her trademark in the name and cover design. The district court granted Seinfeld's motion for summary judgment, and Lapine appealed.

Issue: ***Did Seinfeld violate Lapine's copyright and trademark in* The Sneaky Chef?**

Excerpts from the Decision of the Court:

1. Copyright Infringement
   Plaintiffs assert that the two works are substantially similar in their unique and innovative expression of the idea of sneaking vegetables into children's food by means of a cookbook containing comprehensive instructions for making and storing a variety of vegetable purees in advance, and then using the purees in specially created recipes for children's favorite foods. We are not persuaded.

Stockpiling vegetable purees for covert use in children's food is an idea that cannot be copyrighted. In no case does copyright protection for an original work of authorship extend to any idea, procedure, process, system, method of operation, concept, principle, or discovery, regardless of the form in which it is described, explained, illustrated, or embodied in such work. It is a fundamental principle of our copyright doctrine that ideas, concepts, and processes are not protected from copying.

Further, to the extent the two works have general and abstract similarities—including their vaguely similar titles and inclusion of illustrations of prepared dishes, health advice, personal narrative, descriptions of how to make purees, instructions for preparing dishes, and language about children's healthy eating—the district court correctly concluded that these elements do not raise a fact issue for trial because they are "scenes a faire," or unprotectible elements that follow naturally from the work's theme rather than from the author's creativity.

AP Photo

Rob Loud/Getty Images

Did Seinfeld (on the right) violate Lapine's copyright?

Our independent comparison of the two cookbooks confirms that the total concept and feel of *Deceptively Delicious* is very different from that of *The Sneaky Chef. Deceptively Delicious* lacks the extensive discussion of child behavior, food philosophy, and parenting that pervades *The Sneaky Chef.* Unlike *The Sneaky Chef,* which uses primarily black, gray, and shades of brownish orange, *Deceptively Delicious* employs bright colors and more photographs. While *The Sneaky Chef* assumes greater familiarity with cooking, recommends thirteen methods for hiding healthy foods, and provides recipes for multiple-ingredient purees, *Deceptively Delicious* instructs readers about only single-ingredient purees and contains more basic instructions.

Plaintiffs correctly note that no plagiarist can excuse the wrong by showing how much of her work she did not pirate. Like the district court, we nevertheless conclude as a matter of law that the two cookbooks lack the substantial similarity required to support an inference of copyright infringement.

2. Trademark Infringement
Having considered the overall impression on a consumer and the context in which the competing marks are displayed, we reach the same conclusion as the district court: the marks are not confusingly similar. Defendants' depictions of a winking woman holding brownies near carrots or simply "shushing" are very different from plaintiffs' considerably less detailed and less colorful image of a female chef winking and "shushing" while holding carrots behind her back. Further, defendants' use of the famous "Seinfeld" name reduces any likelihood of confusion regarding the marks. In sum, like the district court, we conclude that dissimilarity of the marks is dispositive.

Copyright Term

More than 300 years ago, on April 10, 1710, Queen Anne of England approved the first copyright statute. Called the Statute of Anne, it provided copyright protection for 14 years, which could be extended by another 14 years if the copyright owner was still alive when the first term expired. Many credit the Statute of Anne with greatly expanding the burst of intellectual activity that we now refer to as the Enlightenment.

American law adopted these same time limits, which stayed in effect until the 20th century. Since then, copyright holders have fought aggressively to lengthen the copyright period. These efforts have been led by the Walt Disney Company, which wants to protect its rights in Mickey Mouse. Today, a copyright is valid until 70 years after the death of the work's only or last living author, or, in the case of works owned by a corporation, the copyright lasts 95 years from publication or 120 years from creation, whichever is shorter. Once a copyright expires, anyone may use the material. Mark Twain died in 1910, so anyone may now publish *Tom Sawyer* without permission and without paying a copyright fee.

Infringement

Anyone who uses copyrighted material without permission is violating the Copyright Act. **To prove a violation, the plaintiff must present evidence that the work was original** and that either:

- The infringer actually copied the work, or
- The infringer had access to the original and the two works are substantially similar.

A court may (1) prohibit the infringer from committing further violations, (2) order destruction of the infringing material, and (3) require the infringer to pay damages, profits earned, and attorney's fees. Damages can be substantial. In a recent case, a jury ordered SAP to pay Oracle $1.3 *billion* for copyright infringement of Oracle's software.

First Sale Doctrine

Suppose you buy a CD that, in the end, you do not like. Under the ***first sale doctrine,*** you have the legal right to sell that CD. **The first sale doctrine permits a person who owns a lawfully made copy of a copyrighted work to sell or otherwise dispose of the copy**. Note, however, that the first sale doctrine does not permit the owner to *make a copy and sell it.* If you listen to a CD and then decide to sell it, that is legal. But it is not legal to copy the CD onto your iPod and then sell the original or any copy of it.

Fair Use

Because the period of copyright protection is so long, it has become even more important to uphold the exceptions to the law. Bear in mind that the point of copyright laws is to encourage creative work. A writer who can control, and profit from, artistic work will be inclined to produce more. If enforced oppressively, however, the copyright laws could stifle creativity by denying access to copyrighted work. **The fair use doctrine** permits limited use of copyrighted material without permission of the author for purposes such as criticism, comment, news reporting, scholarship, or research. Courts generally do not permit a use that will decrease revenues from the original work by, say, competing with it. A reviewer is permitted, for example, to quote from a book without the author's permission, but could not reproduce so much that the review was competing with the book itself.

Fair use doctrine
Permits limited use of copyrighted material without permission of the author for purposes such as criticism, comment, news reporting, scholarship, or research.

Fair use has become a highly controversial issue in this age of the Internet. For example, Universal Music demanded that YouTube remove a home video of a toddler dancing to a Prince song. A director making a documentary on torture was denied permission to use a short clip showing torture on the TV show *24*. Then J. K. Rowling, the author of the *Harry Potter* series of books, sued to prevent the publication of the *Harry Potter Lexicon*, an unauthorized reference guide to the books that contained direct quotations, paraphrases, and plot summaries. The court ruled that although such a guide can be fair use, this one was not because the author had copied too much of Rowling's distinctive original language.[10]

Also under the fair use doctrine, faculty members are permitted to photocopy and distribute copyrighted materials to students, so long as the materials are brief and the teacher's action is spontaneous. If, over his breakfast coffee one morning, Professor Learned spots a terrific article in *Mad Magazine* that perfectly illustrates a point he intends to make in class that day, the fair use doctrine permits him to photocopy the page and distribute it to his class. However, under a misinterpretation of the fair use doctrine, some faculty had been in the habit of routinely preparing lengthy course packets of copyrighted material without permission of the authors. In *Basic Books, Inc. v. Kinkos Graphic Corp.*,[11] a federal court held that this practice violated the copyright laws because the material was more than one short passage and because it was sold to students. Now, when professors put together course packets, they (or the copy shop) must obtain permission and pay a royalty for the use of copyrighted material. Likewise, it is illegal for students to make photocopies of a classmate's course packet or textbook.

Parody

Parody has a long history in the United States—some of our most cherished songs have been based on parodies. Before Francis Scott Key wrote the words to "The Star-Spangled Banner," other lyrics that mocked colonial governors had been set to the same music. (The tune was well known as a drinking song.)

---

[10] *Warner Bros. Entertainment Inc. v. RDR Books*, 575 F. Supp. 2d 513; 2008 U.S. Dist. LEXIS 67771, (S.D.N.Y., 2008).

[11] 758 F. Supp. 1522, 1991 U.S. Dist. LEXIS 3804 (S.D.N.Y. 1991). A federal appeals court reached the same result in *Princeton University Press v. Michigan Document Services, Inc.*, 99 F.3d 1381, 1996 U.S. App. LEXIS 29132 (6th Cir. 1996).

I wish you good luck on your journey to deny our First Amendment rights.

Because of the political and social commentary that is inherent in many parodies, courts have long granted them special respect. In a case involving a 2 Live Crew parody of the song "Pretty Woman," the Supreme Court decided in favor of 2 Live Crew, holding that **parody is a fair use of copyrighted material so long as the use of the original is not excessive.**[12] The parody may copy enough to remind the audience of the original work, but not so much that the parody harms the market for the original.

The following email exchange between Richard Saperstein, a movie producer, and Tom Strickler, a talent agent, which zapped around Hollywood, illustrates the importance of the 2 Live Crew case (to which Strickler refers).

> [From Saperstein to Strickler:]
> Tom—
> Please give me a call about a spec script Elia Infascelli-Smith has gone out with called $40,000 MAN. As you know, along with Universal, we control the rights to SIX MILLION DOLLAR MAN. My understanding is this spec includes characters we own.
> Best—Richard
>
> [Strickler's response:]
> Richard:
> Good news. As you may know, The United States Supreme Court has affirmed the right of Parody as an unassailable First Amendment Right. This has enabled you to make movies like *Scream* and *Scary Movie,* in which you parody many films which Dimension does not own or control.
> The script is a parody, and if you have any problems, I suggest you hire a Constitutional lawyer and file a brief with the US Supreme Court. This will be an uphill battle—the court voted 9 to 0 when this last hit the docket and those stubborn justices all believe in Stare Decisis.
> And if you succeed at the Supreme Court—you will have to stop making *Scream* and *Scary Movie.*
> This will take about 5 to 7 years … and lawyers are an expensive breed, but I wish you good luck on your journey to deny our First Amendment rights.
> All the best,
> Tom

Digital Music and Movies

One of the major challenges for legal institutions in regulating copyrights is simply that modern intellectual property is so easy to copy. Many consumers are in the habit of violating the law by downloading copyrighted material—music, movies and books—for free. They seem to believe that if it is easy to steal something, then the theft is somehow acceptable. In one survey of adolescents aged 12 to 17, 75 percent agreed with the statement, "file-sharing is so easy to do, it's unrealistic to expect people not to do it."[13]

The entertainment world used to turn a blind eye, but illegal downloading is threatening the viability of recording companies, movie studios, and publishers. The statistics are compelling: in 2008, 40 *billion* songs were downloaded illegally, which is as much as 95 percent of all downloaded music! In the first decade of this century, music sales at American

---

[12]*Campbell v. Acuff-Rose Music, Inc.*, 510 U.S. 569, 114 S. Ct. 1164, 1994 U.S. LEXIS 2052 (1994).
[13]*http://pewinternet.org/Reports/2009/9-The-State-of-Music-Online-Ten-Years-After-Napster/The-State-of-Music-Online-Ten-Years-After-Napster.aspx?view=all#footnote25* or google *"pew 10 years after napster"*.

record labels declined by 58 percent. Without profitable record labels, who will find and promote new stars? As we saw in the opening scenario, which is a true story, this type of theft is having a profound effect on entertainment and publishing. But it is not just "big companies" that suffer—it is also the artists, musicians, actors, and writers, most of whom are not wealthy rock stars.

Government and industry are striking back. The Prioritizing Resources and Organization for Intellectual Property Act (Pro-IP) permits law enforcement officials to confiscate any equipment used to steal copyrighted material. In addition, the Recording Industry Association of America (RIAA) developed a strategy of aggressively suing those who download music illegally. Then a coalition of entertainment businesses sued two companies that distributed the software used by many consumers to violate copyright law. So important was this issue that the Supreme Court waded into these murky waters.

Metro-Goldwyn-Mayer Studios, Inc. v. Grokster, Ltd.

125 S. Ct. 2764, 2005 U.S. Lexis 5212
Supreme Court of the United States, 2005

Facts: Grokster, Ltd., and StreamCast Networks, Inc., distributed free software that allowed computer users to share electronic files through peer-to-peer networks, so called because users' computers communicated directly with each other, not through central servers. The Grokster and StreamCast software could be used for legal purposes. Indeed, peer-to-peer networks were utilized by universities, government agencies, corporations, libraries, and individuals, among others. Even the briefs in this very case could be downloaded legally with the StreamCast software.

Nonetheless, nearly 90 percent of the files available for download through Grokster or StreamCast were copyrighted. Billions of files were shared each month—the probable scope of copyright infringement was staggering. The two companies encouraged the illegal uses of their software. For example, the chief technology officer of StreamCast said that "the goal is to get in trouble with the law and get sued. It's the best way to get in the news."

A group of copyright holders (MGM and others) sued Grokster and StreamCast, alleging that they were violating the copyright law by knowingly and intentionally distributing their software to users who would reproduce and distribute copyrighted works illegally. Both parties moved for summary judgment. The trial court held for Grokster and StreamCast; the appeals court affirmed. The Supreme Court granted *certiorari*.

Issue: ***Were Grokster and StreamCast violating copyright law?***

Excerpts from Justice Souter's Decision: The more artistic protection is favored, the more technological innovation may be discouraged; the administration of copyright law is an exercise in managing the trade-off. [T]he indications are that the ease of copying songs or movies using software like Grokster's is fostering disdain for copyright protection. When a widely shared service or product is used to commit infringement, it may be impossible to enforce rights in the protected work effectively against all direct infringers, the only practical alternative being to go against the distributor of the copying device. We hold that one who distributes a device with the object of promoting its use to infringe copyright, as shown by clear expression or other affirmative steps taken to foster infringement, is liable for the resulting acts of infringement by third parties.

We are, of course, mindful of the need to keep from trenching on regular commerce or discouraging the development of technologies with lawful and unlawful potential. Accordingly, mere knowledge of infringing potential or of actual infringing uses would not be enough here to subject a distributor to liability. The inducement rule, instead, premises liability on purposeful, culpable expression and conduct, and thus does nothing to compromise legitimate commerce or discourage innovation having a lawful promise.

Grokster distributed an electronic newsletter containing links to articles promoting its software's ability to access popular copyrighted music. And both companies communicated a clear message by responding affirmatively to requests for help in locating and playing

copyrighted materials. [N]either company attempted to develop filtering tools or other mechanisms to diminish the infringing activity using their software. It is useful to recall that StreamCast and Grokster make money by selling advertising space, by directing ads to the screens of computers employing their software. As the record shows, the more the software is used, the more ads are sent out and the greater the advertising revenue becomes. Since the extent of the software's use determines the gain to the distributors, the commercial sense of their enterprise turns on high-volume use, which the record shows is infringing. The unlawful objective is unmistakable.

In addition to intent to bring about infringement and distribution of a device suitable for infringing use, [MGM must show] evidence of actual infringement by recipients of the software. As the account of the facts indicates, there is evidence of infringement on a gigantic scale.

On remand, reconsideration of MGM's motion for summary judgment will be in order.

The No Electronic Theft Act

Enacted in 1997, the **No Electronic Theft Act** is intended to deter the downloading of copyrighted material. It provides for criminal penalties for the reproduction or distribution of copyrighted material that has a retail value greater than $1,000, even if the offender has no profit motive. Thus, for instance, if a student photocopied for 10 of her friends a textbook that is worth $150, she could be subject to criminal penalties, including a prison term of one year. Originally, the Justice Department did not enforce this statute, but it has now begun to do so, particularly against those who set up networks to trade games, movies, and music.

The Family Entertainment and Copyright Act

Under the **Family Entertainment and Copyright Act,** it is a criminal offense to use a camcorder to film a movie in the theater. This statute also establishes criminal penalties for willful copyright infringement that involves distributing software, music, or film on a computer network.

The Digital Millennium Copyright Act

The good news is that Mary Schmich wrote an influential article in the *Chicago Tribune*. The bad news is that people deleted her name, attributed the article to Kurt Vonnegut, and sent it around the world via email. Tom Tomorrow's cartoon was syndicated to 100 newspapers, but by the time the last papers received it, the cartoon had already gone zapping around cyberspace. Because his name had been deleted from the original, some editors thought he had plagiarized it.

In response to such incidents, Congress passed the **Digital Millennium Copyright Act** (DMCA), which provides that:

- **It is illegal to delete copyright information, such as the name of the author or the title of the article**. It is also illegal to distribute false copyright information. Thus, anyone who emailed Schmich's article without her name on it, or who claimed it was his own work, would be violating the law.
- **It is illegal to circumvent encryption or scrambling devices that protect copyrighted works**. For example, some software programs are designed so that they can only be copied once. Anyone who overrides this protective device to make another copy is violating the law. (The statute does permit purchasers of copyrighted software to make one backup copy.) If you buy a Disney DVD that prevents you from fast-forwarding through commercials, you are violating the DMCA if you figure out how to do it anyway.
- **It is illegal to distribute tools and technologies used to circumvent encryption devices.** If you tell others how to fast-forward through the Disney commercials, you have violated the statute.

- **Online service providers (OSPs) are not liable for posting copyrighted material so long as they are unaware that the material is illegal and they remove it promptly after receiving notice that it violates copyright law.** This type of provision is called a safe harbor.

EXAM Strategy

Question: Many of the videos posted on YouTube are copyrighted material, including thousands of hours of shows owned by Viacom, such as *The Colbert Report* and *The Daily Show*. Viacom sued YouTube for violating its copyrights. Among the evidence Viacom presented was an email from one YouTube founder to another, saying, "... please stop putting stolen videos on the site. We're going to have a tough time defending the fact that we're not liable for the copyrighted material on the site because we didn't put it up when one of the co-founders is blatantly stealing content from other sites and trying to get everyone to see it."[14] YouTube presented evidence that it had responded within one day to Viacom's "takedown notice." Is YouTube liable?

Strategy: Viacom argued that YouTube was well aware that much of its content was illegal. YouTube responded that it met the requirements of the Safe Harbor provision.

Result: The court found for YouTube. General awareness that many postings infringed copyrights did not impose a duty for YouTube to monitor its videos. Its only requirement was to respond when notified of infringement. YouTube did just that in this case.[15]

International Copyright Treaties

The Berne Convention requires member countries to provide automatic copyright protection to any works created in another member country. The protection does not expire until 50 years after the death of the author.[16] The WIPO Copyright Treaty and the WIPO Performances and Phonograms Treaty add computer programs, movies, and music to the list of copyrightable materials.

In 2004, Congress enacted a law that permits the president to appoint a copyright law enforcement officer charged with the responsibility for stopping copyright infringement overseas. Also, for the first time, Congress funded the National Intellectual Property Law Enforcement Coordination Council, which was established to protect American intellectual property internationally.

---

[14]Quoted in "Federal Judge Hands Google Victory in Viacom's $1 Billion Suit Over YouTube Content" by Michael Liedtke on Law.com, June 24, 2010.

[15]*Viacom Int'l, Inc. v. YouTube, Inc.*, 718 F. Supp. 2d 514 (S.D.N.Y., 2010).

[16]Under U.S. law, copyrights last 70 years. The United States must grant works created in other signatory countries a copyright that lasts either 50 years or the length of time granted in that country, whichever is longer, but in no case longer than 70 years.

TRADEMARKS

Trademark
Any combination of words and symbols that a business uses to identify its products or services and distinguish them from others.

A **trademark** is any combination of words and symbols that a business uses to identify its products or services and distinguish them from others. Trademarks are important to both consumers and businesses. Consumers use trademarks to distinguish between competing products. People who feel that Nike shoes fit their feet best can rely on the Nike trademark to know they are buying the shoe they want. A business with a high-quality product can use a trademark to develop a loyal base of customers who are able to distinguish its product from another.

Types of Marks

There are four different types of marks:

- **Trademarks** are affixed to *goods* in interstate commerce.
- **Service marks** are used to identify *services*, not products. Fitness First, Burger King, and Weight Watchers are service marks. In this chapter, the terms "trademark" and "mark" are used to refer to both trademarks and service marks.
- **Certification marks** are words or symbols used by a person or organization to attest that products and services produced by others meet certain standards. The Good Housekeeping Seal of Approval means that the Good Housekeeping organization has determined that a product meets its standards.
- **Collective marks** are used to identify members of an organization. The Lions Club, the Girl Scouts of America, and the Masons are examples of collective marks.

Ownership and Registration

Under common law, the first person to use a mark in trade owns it. Registration with the federal government is not necessary. However, under the federal Lanham Act, the owner of a mark may register it on the Lanham Act Principal Register. A trademark owner may use the symbol ™ at any time, even before registering it, but not until the mark is registered can the symbol ® be placed next to it. Registration has several advantages:

- Even if a mark has been used in only one or two states, registration makes it valid nationally.
- Registration notifies the public that a mark is in use because anyone who applies for registration first searches the Public Register to ensure that no one else has rights to the mark.
- Five years after registration, a mark becomes virtually incontestable because most challenges are barred.
- The damages available under the Lanham Act are higher than under common law.
- The holder of a registered trademark generally has the right to use it as an Internet domain name.

Under the Lanham Act, the owner files an application with the PTO. The PTO will accept an application only if the owner has already used the mark attached to a product in interstate commerce or promises to use the mark within six months after the filing. In addition, the applicant must be the *first* to use the mark in interstate commerce. Initially, the trademark is valid for 10 years, but the owner can renew it for an unlimited number of 10-year terms as long as the mark is still in use.

Valid Trademarks

Words (Reebok), symbols (Microsoft's flying window logo), phrases (Nike's "Just do it"), shapes (Apple's iPod), sounds (NBC's three chimes), colors (Owens Corning's pink insulation), and even scents (plumeria blossoms on sewing thread) can be trademarked. **To be valid, a trademark must be distinctive**—that is, the mark must clearly distinguish one product from another. There are five basic categories of distinctive marks:

- **Fanciful marks** are made-up words such as Kodak or Saucony.
- **Arbitrary marks** use existing words that do *not* describe the product—Prince tennis racquets, for example. No one really thinks that these racquets are designed by or for royalty.
- **Suggestive marks** *indirectly* describe the product's function. "Greyhound" implies that the bus line is swift, and "Coppertone" suggests what customers will look like after applying the product.
- Marks with **secondary meaning** cannot, by themselves, be trademarked unless they have been used for so long that they are now associated with the product in the public's mind. When a film company released a movie called *Ape*, it used as an illustration a picture that looked like a scene from *King Kong*—a gigantic gorilla astride the World Trade Center in New York City. The court held that the movie posters of *King Kong* had acquired a secondary meaning in the mind of the public, so the *Ape* producers were forced to change their poster.[17]
- **Trade dress** is the image and overall appearance of a business or product. It may include size, shape, color, or texture. The Supreme Court held that a Mexican restaurant was entitled to protection under the Lanham Act for the shape and general appearance of the exterior of its building as well as the decor, menu, servers' uniforms, and other features reflecting the total image of the restaurant.[18]

The following categories *cannot* be trademarked:

- **Similar to an existing mark**. To avoid confusion, the PTO will not grant a trademark that is similar to one already in existence on a similar product. Once the PTO had granted a trademark for "Pledge" furniture polish, it refused to trademark "Promise" for the same product. "Chat noir" and "black cat" were also too similar because one is simply a translation of the other. Houghton-Mifflin Co. successfully sued to prevent a punk rock band from calling itself Furious George because the name is too similar to Curious George, the star of a series of children's books.
- **Generic trademarks**. No one is permitted to trademark an item's ordinary name—"shoe" or "book," for example.

© Susan Van Etten

Is Furious George too similar to Curious George?

---

[17] *Paramount Pictures Corp. v. Worldwide Entertainment Corp.*, 2 Media L. Rep. 1311, 195 U.S.P.Q. (BNA) 539, 1977 U.S. Dist. LEXIS 17931 (S.D.N.Y. 1977).

[18] *Two Pesos, Inc. v. Taco Cabana, Inc.*, 505 U.S. 763, 112 S. Ct. 2753, 1992 U.S. LEXIS 4533 (1992).

Sometimes, however, a word begins as a trademark and later becomes a generic name. Zipper, escalator, aspirin, linoleum, thermos, yo-yo, band-aid, ping-pong, and nylon all started out as trademarks but became generic. Once a name is generic, the owner loses the trademark because the name can no longer be used to distinguish one product from another—all products are called the same thing. That is why Xerox Corp. encourages people to say, "I'll photocopy this document," rather than "I'll xerox it." Jeep, Rollerblade, and TiVo are names that began as trademarks and may now be generic. What about "app store"? Microsoft has sued Apple, disputing its right to trademark this term. Meanwhile, Facebook has trademarked, "face," "book," "like," "wall," and "poke." The goal is not to prevent consumers from using these terms but rather to warn off other companies.

- **Descriptive marks**. Words cannot be trademarked if they simply describe the product—such as "low-fat," "green," or "crunchy." Descriptive words can, however, be trademarked if they do *not* describe that particular product because they then become distinctive rather than descriptive. "Blue Diamond" is an acceptable trademark for nuts so long as the nuts are neither blue nor diamond-shaped.
- **Names.** The PTO generally will not grant a trademark in a surname because other people are already using it and have the right to continue. No one could register "Jefferson" as a trademark. However, a surname can be used as part of a longer title—"Jefferson Home Tours," for instance. Similarly, no one can register a geographical name such as "Boston" unless it is also associated with another word, such as "Boston Ale."
- **Deceptive marks**. The PTO will not register a mark that is deceptive. It refused to register a trademark with the words "National Collection and Credit Control" and an eagle superimposed on a map of the United States because this trademark gave the false impression that the organization was an official government agency.
- **Scandalous or immoral trademarks**. The PTO refused to register a mark that featured a nude man and woman embracing. In upholding the PTO's decision, the court was unsympathetic to arguments that this was the perfect trademark for a newsletter on sex.[19] This author once had a client who wanted to apply for a trademark for marijuana: "Sweet Mary Jane, she never lets you down." However, the client was unwilling to admit to affixing the name to his product and shipping it in interstate commerce. Now, medical marijuana is legal in 16 states but the PTO refuses to register marijuana trademarks.

Infringement

To win an infringement suit, the trademark owner must show that the defendant's trademark is likely to deceive customers about who has made the goods or provided the services. As we saw in the *Seinfeld* case, the court ruled there was no trademark infringement because consumers would not be confused by the names or covers of the two books.

In the event of infringement, the rightful owner is entitled to (1) an injunction prohibiting further violations, (2) destruction of the infringing material, (3) up to three times actual damages, (4) any profits the infringer earned on the product, and (5) attorney's fees.

What about a perfume for dogs? Would a reasonable consumer confuse Pucci with Gucci, Bono Sports with Ralph Lauren Polo Sports, or Miss Claybone for Liz Claiborne? None of these companies challenged the parody use of their names for a dog perfume. But Tommy Hilfiger Licensing, Inc. did not see the humor in the name Timmy Holedigger. The court,

[19] *In re McGinley*, 660 F.2d 481, 211 U.S.P.Q. (BNA) 668, 1981 CCPA LEXIS 177 (C.C.P.A. 1981).

however, advised Hilfiger "to chill," pointing out that there was no evidence of actual confusion.[20] On the other hand, auction website eBay did prevent a seller of perfumes from using the name Perfumebay. The court ruled that the use of "ebay" confused consumers.[21]

The following case raises an issue of confusion in cyberspace. Once again, the Internet is challenging intellectual property laws that were not conceived with this technology in mind.

You be the Judge

NETWORK AUTOMATION, INC. v. ADVANCED SYSTEMS CONCEPTS, INC.

2011 U.S. App. Lexis 4488
United States Court of Appeals for the Ninth Circuit, 2011

Facts: Network Automation and Advanced Systems Concepts both sold job scheduling and management software, and both advertised on the Internet. Network sold its software under the trademarked name Auto-Mate, while Systems used the trademark ActiveBatch. Customers paid between $995 and $10,995 to use these software programs.

Google AdWords is a program that sells "keywords," which are search terms that trigger the display of a sponsor's advertisement. When a user enters a keyword, Google displays the links generated by its own algorithm in the main part of the page, along with advertisements in a separate "Sponsored Links" section next to or above the objective results. Multiple advertisers can purchase the same keyword.

Although ActiveBatch was Systems's trademark, Network purchased it as a keyword. This purchase meant that anyone who googled "ActiveBatch" would see a web page where the top results were links to Systems' own website and various articles about the product. But in the "Sponsored Sites" section of the page, users would see the following ad:

> Job Scheduler
> Windows Job Scheduling + Much More. Easy to Deploy, Scalable. D/L Trial *www.NetworkAutomation.com*

Sometimes, they would also see an equivalent ad for Systems' software—the real ActiveBatch.

Systems alleged that this use of ActiveBatch was a violation of its trademark on the word. The trial court issued an injunction prohibiting Network's purchase of the Google keyword. Network appealed.

You Be the Judge: ***Has Network violated Systems's trademark by purchasing it as a Google keyword?***

Argument for Systems: Network and Systems are direct competitors. Their two products—AutoMate and ActiveBatch—perform the same functions and are both advertised on the Internet. Network is deliberately confusing customers about whose product ActiveBatch really is.

When consumers use the Internet, they tend not to read carefully—they just click away. Few customers analyze the web address of an ad to make sure they are going to the right website. Indeed, customers may not even be aware of who owns ActiveBatch. The Network ad certainly does not reveal that Systems owns this software. Customers could easily assume that whatever web address comes up belongs to the rightful owner.

When customers search for a generic term, they know that they will encounter links from a variety of sources, but when they look for a trade name, their expectation is that they will only be linked to that specific product. For this reason, the use of another company's trade name can create tremendous confusion.

Network has bought the right to use Systems's trademark as a ruse to fool potential customers. This subterfuge is exactly the sort of behavior that trademark laws are designed to prevent.

Argument for Network: Today, most consumers are sophisticated about the Internet. They skip from site to site, ready to hit the Back button whenever they are not satisfied with a site's contents. They fully expect to find some sites that are not what they imagine based on a glance at the domain name or search engine summary. Consumers do not form any firm expectations about the sponsorship of a website until they have seen the landing page—if then.

Even if Systems's arguments were true for consumer purchases, the typical customer for this software is a sophisticated businessperson buying an expensive product. These purchasers are likely to be very careful and will not be confused by Google ads. Also, they will probably understand the mechanics of Internet search engines and the nature of sponsored links.

In the end, Network's intent was not to confuse consumers but rather to allow them to compare its product to ActiveBatch. That goal is a completely appropriate use of a trademark.

Federal Trademark Dilution Act of 1995

Before Congress passed the Federal Trademark Dilution Act of 1995 (FTDA), a trademark owner could win an infringement lawsuit only by proving that consumers would be deceived about who had really made the product. **This statute prevents others from using a trademark in a way that (1) dilutes its value, even though consumers are not confused about the origin of the product; or (2) tarnishes it by association with unwholesome goods or services**. For example, Barbie's Playhouse was a website with a font and colors similar to those used by Mattel for its copyrighted Barbie doll. Also, the doll at the bottom of the website looked like a Barbie doll. The court found that Barbie's Playhouse had violated the FTDA.[22]

Domain Names

Over 130 million Internet addresses, known as *domain names*, are currently active, so it is often difficult to find a distinctive name for a new business. Domain names can be immensely valuable as they are an important component of doing business. Suppose you want to buy a new pair of jeans. Without thinking twice, you type in **http://www.jcrew.com** and there you are, ready to order. What if that address took you to a different site altogether, say, the personal site of one Jackie Crew? The store might lose out on a sale. Companies not only want to own their own domain name, they want to prevent complaint sites such as **http://www.untied.com** (about United Airlines), **http://www.ihatestarbucks.com**, or the always popular variation on the "sucks" theme, such as **http://macdonaldssucks.com**. Generic domain names can be valuable, too. Shopping.com paid $750,000 to acquire its domain name from the previous (lucky) owner.

Cybersquatting. Who has the right to a domain name? In the beginning, the National Science Foundation, which maintained the Internet, granted Network Solutions, Inc. (NSI), a private company, the right to allocate domain names. NSI charged no fee for domain names and the rule was "first come, first served." Then so-called cybersquatters began to register domain names, not to use, but to sell to others. Someone, for example, tried to sell the name "Bill Gates" for $1 million.

In response to complaints, NSI began suspending any domain name that was challenged by the holder of a registered trademark. For instance, NSI would not allow Princeton Review to keep kaplan.com, which Princeton had acquired simply to inconvenience its arch rival in the test preparation business. Congress then passed the **Anticybersquatting Consumer Protection Act (ACPA), which permits both trademark owners and famous people to sue anyone who registers their name as a domain name in "bad faith."** The rightful owner of a trademark is entitled to damages of up to $100,000. Verizon was awarded damages of $33.15 million against OnlineNIC Inc., which had registered 663 domain names that were confusingly similar to Verizon trademarks.

---

[22] *Mattel, Inc. v. Jcom, Inc.*, 1998 U.S. Dist. LEXIS 16195.

ICANN. As both the value and the number of domain names soared, the U.S. government transferred management of the Internet, including the allocation of names, to a private, nonprofit, international organization, the Internet Corporation for Assigned Names and Numbers (ICANN). Disputes over domain names can be decided by arbitration under ICANN's Uniform Domain Name Dispute Resolution Policy (UDRP) rather than by litigation under the ACPA. For example, Jay Leno used the ICANN process to win a cybersquatting case against someone who was using thejaylenoshow.com to attract viewers to his own real estate website.

To bring a UDRP case, the complainant (i.e., the plaintiff) must allege that:

- The domain name creates confusion because it is similar to a registered trademark.
- The respondent (i.e., the defendant) has no legitimate reason to use the domain name.
- The respondent registered the domain name in bad faith. If the respondent is a competitor of the complainant and has acquired the domain name to disrupt the complainant's business (à la Princeton Review), that is evidence of bad faith. So is an attempt by the respondent to sell the name to the complainant.

If the complainant wins, it is entitled either to take over the domain name or to cancel it. For example, in a dispute over wal-martsucks.com, the WIPO arbitrator ordered that the name be transferred to Wal-Mart. The respondent had demonstrated his bad faith by attempting to sell the name for $530,000. In a similar case, however, the WIPO arbitrator found for a respondent who had registered Wallmartcanadasucks.com. In this case, the respondent had not tried to sell the name and was using the website to criticize Wal-Mart. As the arbitrator stated in his opinion: "Posting defamatory material on a website would not justify revocation of a domain name. The Policy should not be used to shut down robust debate and criticism." Either party has the option before or after an ICANN arbitration to litigate the issue in court.

At this writing, the courts have also held that criticism sites do not violate the ACPA so long as they do not have a bad faith intent to make a profit. The sites do not violate trademark law unless they create consumer confusion.[23]

Theft of domain name. In this crowded world, few people are the first to do anything. David Goncalves achieved this distinction in an unfortunate way—he became the first person in the United States to be convicted of stealing a domain name. After hacking into the files of a domain name registrar, he transferred to himself ownership of P2P.com. He then sold this name for $111,211 to professional basketball player Mark Madsen, who was running a business that bought and sold domain names. P2P could be a valuable name for someone who wanted to operate a peer-to-peer network. Goncalves was convicted under a state fraud statute as well as the Computer Fraud and Abuse Act (which we discussed in Chapter 41, on cyberlaw).

Trademarking a domain name. Our discussion thus far has been about registering a trademark as a domain name. Sometimes businesses want to do the opposite—trademark a domain name. The PTO will issue such a trademark only for services offered via the Internet. Thus, it trademarked "eBay" for "on-line trading services in which seller posts items to be auctioned and bidding is done electronically." The PTO will not trademark a domain name that is merely an address and does not identify the service provided.

---

[23]See, for example, *Career Agents Network, Inc. v. careeragentsnetwork.biz*, 2010 U.S. Dist. LEXIS 17263 (E.D.MI, 2010).

International Trademark Treaties

Under the **Paris Convention**, if someone registers a trademark in one country, then he has a grace period of six months, during which he can file in any other country using the same original filing date. Under the **Madrid Agreement**, any trademark registered with the international registry is valid in all signatory countries. (The United States is a signatory.) The **Trademark Law Treaty** simplifies and harmonizes the process of applying for trademarks around the world. Now, a U.S. firm seeking international trademark protection need only file one application, in English, with the PTO, which sends the application to the WIPO, which transmits it to each country in which the applicant would like trademark protection.

EXAM Strategy

Question: Jerry Falwell was a nationally known Baptist minister. You can read about him on falwell.com. You can also read about him at fallwell.com—a site critical of his views on homosexuality. This site has a disclaimer indicating that it is not affiliated with Reverend Falwell. The minister sued fallwell.com, alleging a violation of trademark law and the anti-cybersquatting statute. Was there a violation?

Strategy: To win a trademark claim, the reverend had to show that there was some confusion between the two sites. To win the cybersquatting claim, he had to show bad faith on the part of fallwell.com.

Result: The reverend lost on both counts. The court ruled that there was no confusion— fallwell.com had a clear disclaimer. Also, there was no indication of bad faith. The court was reluctant to censor political commentary.

Trade Secrets

Trade secret
A formula, device, process, method, or compilation of information that, when used in business, gives the owner an advantage over competitors.

What do the formulas for Coke and motor oil have in common with computer circuitry, a machine for making adhesive tape, and a procedure for applying hair dye? They are all trade secrets. **A trade secret is a formula, device, process, method, or compilation of information that, when used in business, gives the owner an advantage over competitors who do not know it**. In determining if information is a trade secret, courts consider:

- How difficult (and expensive) was the information to obtain? Was it readily available from other sources?
- Does the information create an important competitive advantage?
- Did the company make a reasonable effort to protect it?

It has been estimated that the theft of trade secrets costs U.S. businesses $100 billion a year. In response, most states have now adopted the **Uniform Trade Secrets Act (UTSA)**. Anyone who misappropriates a trade secret is liable to the owner for (1) actual damages, (2) unjust enrichment, or (3) a reasonable royalty. If the misappropriation was willful or malicious, the court may award attorney's fees and double damages. A jury awarded Avery Dennison Corp. $40 million in damages from a competitor that had misappropriated secret information about the adhesives used in self-stick stamps.

Although a company can patent some types of trade secrets, it may be reluctant to do so because patent registration requires that the formula be disclosed publicly. In addition, patent protection expires after 20 years. Some types of trade secrets cannot be patented—customer lists, business plans, manufacturing processes, and marketing strategies.

The following case deals with a typical issue: how much information can employees take with them when they start their own, competing business?

Pollack v. Skinsmart Dermatology and Aesthetic Center P.C.

2004 Pa. Dist. & Cnty. Dec. Lexis 214
Common Pleas Court of Philadelphia County, Pennsylvania, 2004

Facts: Dr. Andrew Pollack owned the Philadelphia Institute of Dermatology (PID), a dermatology practice. Drs. Toby Shawe and Samy Badawy worked for PID as independent contractors, receiving a certain percentage of the revenues from each patient they treated. Natalie Wilson was Dr. Pollack's medical assistant.

Pollack tentatively agreed to sell the practice to Shawe and Badawy. But instead of buying his practice, the two doctors decided to start their own, which they called Skinsmart. They executed a lease for the Skinsmart office space, offered Wilson a job, and instructed PID staff members to make copies of their appointment books and printouts of the patient list. Then they abruptly resigned from PID. Wilson called PID patients to reschedule procedures at Skinsmart. The two doctors also called patients and sent out a mailing to patients and referring physicians to tell them about Skinsmart.

Pollack filed suit, alleging that the two doctors had misappropriated trade secrets.

Issue: ***Did Shawe and Badawy misappropriate trade secrets from PID?***

Excerpts from Judge Cohen's Decision: The right of a business person to be protected against unfair competition stemming from the usurpation of his or her trade secrets must be balanced against the right of an individual to the unhampered pursuit of the occupations and livelihoods for which he or she is best suited. For this reason, to qualify for protection, the information must be the particular secrets of the complaining employer, not general secrets of the trade in which he is engaged.

Against this backdrop, it is clear the patient list is a trade secret, worthy of protection. As conceded by defendants, the confidentiality of patient information ensures that it remain unknown to those outside the practice and makes the patient list valuable. Through the substantial efforts of plaintiff, the patient list was compiled over numerous years, and contained 20,000 names with related information. PID spent money for computers, software, and employees to keep and maintain the patient list. Within the offices of PID, the information was not universally known or accessible. Not every staff member, including the practicing physicians, could pull the records. Wilson did not have access to them and the doctors relied on other PID employees to access the patient list. These same factors demonstrate that plaintiff sought to protect the secrecy of the information.

The plaintiff must demonstrate that the trade secret has value and importance to him and his business. As noted above, defendants acknowledge the value of the patient list to PID's practice. In addition, plaintiff relied upon the patient list as the core component of his practice.

To have the rights to the use of the trade secret, the plaintiff needs to show he either discovered or owned the trade secret. Plaintiff compiled the patient list over numerous years. The patient list was maintained on PID's computers by PID's employees. Plaintiff's tax returns show that PID was owned solely by plaintiff. These facts establish plaintiff's ownership of the patient list.

Summary judgment is granted on the issue of liability against defendants Shawe, Badawy, and Wilson.

Only civil penalties are available under the Uniform Trade Secrets Act. To safeguard national security and maintain the nation's industrial and economic edge, Congress passed the **Economic Espionage Act of 1996, which makes it a *criminal* offense to steal (or attempt to steal) trade secrets for the benefit of someone other than the owner, including for the**

benefit of any foreign government. Xiaodong Sheldon Meng was convicted of violating this statute after he was caught stealing computer code used in military weapons. He had committed the theft on behalf of the government of China. Meng was sentenced to 24 months in prison. Timothy Kissane received the same sentence for stealing computer source code from an employer. He planned to sell it to the company's competitors.

Chapter Conclusion

Intellectual property takes many different forms. It can be an Internet domain name, a software program, a cartoon character, a formula for motor oil, or a process for making drugs. Because of its great variety, intellectual property can be difficult to protect. Yet, for many individuals and companies, intellectual property is the most valuable asset they will ever own. As its economic value increases, so does the need to understand the rules of intellectual property law.

Exam Review

	Patent	**Copyright**	**Trademark**	**Trade Secrets**
Protects:	Mechanical, electrical, chemical inventions; processes; machines; composition of matter; designs; plants	The tangible expression of an idea, but not the idea itself	Words and symbols that a business uses to identify its products or services	A formula, device, process, method, or compilation of information that, when used in business, gives the owner an advantage over competitors who do not know it
Requirements for Legal Protection:	Application approved by PTO	An item is automatically copyrighted once it is in tangible form	Use is the only requirement; registration is not necessary but does offer some benefits	Must be kept confidential
Duration:	20 years after the application is filed (14 years from date of issuance for a design patent)	70 years after the death of the work's only or last living author or, for a corporation, 95 years from publication or 120 years from creation	Valid for 10 years but the owner can renew for an unlimited number of terms as long as the mark is still being used	As long as it is kept confidential

Multiple-Choice Questions

1. Thomas's English muffins wanted to protect the method by which it makes muffins with air pockets—what it calls "nooks and crannies." What would be the best way to achieve this goal?
   (a) Patent
   (b) Copyright
   (c) Trademark
   (d) Trade secret
   (e) This method cannot be protected.

2. VitaminWater has become such a success that other companies are also now selling similar (but not identical) flavored colored water. Some competitors bottle their drinks in a similar bell-shaped bottle with a two-toned label that has a horizontal color band. What is the best infringement claim for VitaminWater to make against these competitors?
   (a) Patent
   (b) Copyright
   (c) Trademark
   (d) Trade secret
   (e) There is no good claim

3. Faber-Castell began manufacturing pencils in 1761. Although pencils and erasers had both existed for some time, the company did not begin putting erasers on the ends of its pencils until the 1870s. The company was sued by an inventor who had previously patented this idea. The case went to the Supreme Court. Who won the case?
   (a) The patent holder, because no one had ever put an erase on a pencil before
   (b) The patent holder, because the PTO had approved his patent
   (c) Faber-Castell, because the pencil with an eraser was not novel
   (d) Faber-Castell, because the pencil with an eraser was not useful

4. If you buy a DVD, you have the legal right to:
   (a) Watch it as many times as you want and then give it away.
   (b) Copy it to your computer and then give it to a friend.
   (c) Copy it to your computer and sell it on eBay.
   (d) All of the above.
   (e) a and b only.

5. A couple thought of a clever name for an automobile. They wanted to protect this name so that they could ultimately sell it to a car manufacturer. What would be the best method to obtain this goal?
   (a) Patent
   (b) Copyright
   (c) Trademark
   (d) Trade secret
   (e) This name cannot be protected.

Essay Questions

1. In the documentary movie *Expelled: No Intelligence Allowed*, there was a 15-second clip of "Imagine," a song by John Lennon. The purpose of the scene was to criticize the song's message. His wife and sons, who held the copyright, sued to block this use of the song. Under what theory did the movie makers argue that they had the right to use this music? Did they win?

2. **ETHICS** After Edward Miller left his job as a salesperson at the New England Insurance Agency, Inc., he took some of his New England customers to his new employer. At New England, the customer lists had been kept in file cabinets. Although the company did not restrict access to these files, it claimed there was a "You do not peruse my files and I do not peruse yours" understanding. The lists were not marked "confidential" or "not to be disclosed." Did Miller steal New England's trade secrets? Whether or not he violated the law, was it ethical for him to use this information at his new job? What is your Life Principle?

3. Rebecca Reyher wrote (and copyrighted) a children's book entitled *My Mother Is the Most Beautiful Woman in the World*. The story was based on a Russian folk tale told to her by her own mother. Years later, the children's TV show *Sesame Street* televised a skit entitled "The Most Beautiful Woman in the World." The *Sesame Street* version took place in a different locale and had fewer frills, but the sequence of events in both stories was identical. Has *Sesame Street* infringed Reyher's copyright?

4. Roger Schlafly applied for a patent for two prime numbers. (A prime number cannot be evenly divided by any number other than itself and 1. Examples of primes are 2, 3, 5, 7, 11, and 13.) Schlafly's numbers are a bit longer—one is 150 digits, the other is 300. His numbers, when used together, can help perform the type of mathematical operation necessary for exchanging coded messages by computer. Should the PTO issue this patent?

5. Frank B. McMahon wrote one of the first psychology textbooks to feature a light, easily readable style. He also included many colloquialisms and examples that appealed to a youthful student market. Charles G. Morris wrote a psychology textbook that copied McMahon's style. Has Morris infringed McMahon's copyright?

6. Victoria's Secret, a well-known lingerie company, found out that a man named Victor Moseley was running a small store in Kentucky named "Victor's Little Secret." Moseley's shop sold clocks, patches, temporary tattoos, stuffed animals, coffee mugs, leather biker wallets, Zippo lighters, diet formula, jigsaw puzzles, handcuffs, hosiery, greeting cards, incense burners, car air fresheners, sunglasses, jewelry, candles, and adult novelties. Women's lingerie represented about 5 percent of its sales. Does Victoria's Secret have a valid intellectual property claim?

7. Question: DatagraphiX manufactured and sold computer graphics equipment that allowed users to transfer large volumes of information directly from computers to microfilm. Customers were required to keep maintenance documentation on site for the DatagraphiX service personnel. The service manual carried this legend: "No other use, direct or indirect, of this document or of any information derived there from is authorized. No copies of any part of this document shall be made without written approval by DatagraphiX." In addition, on every page of the maintenance manual, the company placed warnings that the information was proprietary and not to be duplicated. Frederick J. Lennen left DatagraphiX to start his own company that serviced DatagraphiX equipment. Can DatagraphiX prevent Lennen from using its manuals?

Strategy: With trade secrets, the key is that the owner has made a reasonable effort to protect them. (See the "Result" at the end of this section.)

8. Question: "Hey, Paula," a pop hit that spent months on the music charts, was back on the radio 30 years later, but in a form the song's author never intended. Talk-show host Rush Limbaugh played a version with the same music as the original but with lyrics that poked fun at President Bill Clinton's alleged sexual misconduct with Paula Jones. Has Limbaugh violated the author's copyright?

Strategy: Although this example may look like a copyright violation, it falls under an exception. (See the "Result" at the end of this section.)

9. Question: Research Corp. applied for a patent for a so-called halftoning technique that uses a mathematical formula to enable monitors and printers with limited color options to simulate a wider range of colors. Is this technique patentable?

Strategy: Are these inventors attempting to patent a mathematical algorithm or formula? (See the "Result" at the end of this section.)

7. Result: The court held that these manuals were DatagraphiX's trade secrets.

8. Result: Parody (especially about politics!) is a fair use of copyrighted material so long as use of the original is not excessive.

9. Result: The trial court ruled that this patent application was invalid because it was too abstract. But the appellate court overruled, holding that, although the patent used mathematical algorithms, the inventors were patenting the process not the algorithms. It upheld the patent.[24]

[24] *Research Corporation Technologies, Inc., v. Microsoft Corporation*, 627 F.3d 859; 2010 U.S. App. LEXIS 24984; 97 U.S.P.Q.2D (BNA) 1274, (Fed. Cir., 2010).

Discussion Questions

1. **ETHICS** Virtually any TV show, movie, or song can be downloaded for free on the Internet. Most of this material is copyrighted and was very expensive to produce. Most of it is also available for a fee through such legitimate sites as iTunes. What is your ethical obligation? Should you pay $1.99 to download an episode of *American Idol* from iTunes or take it for free from an illegal site? What is your Life Principle?

2. For much of history, the copyright term was limited to 28 years. Now it is as long as 120 years. What is a fair copyright term? Some commentators argue that because so much intellectual property is stolen, owners need longer protection. Do you agree with this argument?

3. Do you agree with the court that the band Furious George violated the copyright of Curious George?

4. Should Amazon be able to patent the One-Click method of ordering? What about Facebook's patent on a process that "dynamically provides a news feed about a user of a social network"? Were these inventions really novel and nonobvious? What should the standard be for business method patents?

5. Fredrik Colting wrote a book entitled *60 Years Later: Coming Through the Rye*, a riff on J. D. Salinger's famous *Catcher in the Rye*. Colting's book imagined how Salinger's protagonist, Holden Caulfield, would view life as a 76-year old. Alice Randall wrote a novel entitled *The Wind Done Gone*, which retells the Civil War novel *Gone with the Wind* from the perspective of Scarlett O'Hara's (imagined) black half-sister. Both Colting and Randall were sued and both alleged fair use. Should they win?

6. The Susan G. Komen breast cancer charity trademarked the term "for the cure." It has brought suit against other charities that use the term, as in "run for the cure" or "kites for the cure." It also sues charities that use the same shade of pink that it has long used on its ribbons. Should Komen be able to trademark "for the cure" and the color pink?

7. Should a wildflower garden be eligible for intellectual property protection?

CHAPTER 43

© Steve Allen/Jupiterimages

Real Property and Landlord-Tenant Law

Some men have staked claims to land for its oil, others for its gold. But Paul Termarco and Gene Murdoch are staking their claim to an island using … hot dogs. Their quest to market frankfurters in the New Jersey wilderness has made their children blush with embarrassment, their wives shrug in bewilderment, and strangers burst into laughter.

Paul Termarco and Gene Murdoch are staking their claim to an island using … hot dogs.

But for three years, the two friends from West Milford have sold chili dogs, cheese dogs, and the ever traditional, hold-everything-but-the-mustard hot dogs from a tiny island in Greenwood Lake. Now it seems as though everyone knows about "Hot Dog Island."

"People love it," said Termarco. "They say, 'Thank you for being here.' I always say, 'No. Thank *you*.'" The personalized service and the inexpensive prices (hot dogs cost $1.75; chili dogs, cheese dogs, and sauerkraut, $2) have cultivated a base of regulars. "I think it's great. It's better than going to a restaurant for two hours and spending a lot of money," said Joan Vaillant, who frequently jet skis to the island for hot dogs slathered in mustard.

At two-eighths of an acre, the island's craggy rocks, scrubby bushes, and ash trees are difficult to spot. Termarco doesn't mind. "Not everyone can say they own an island," he boasted. Termarco and Murdoch decided to claim the slip of land after chatting with a local restaurateur a few years ago. Termarco had just finished suggesting that the man expand his lakeside business to the island when Murdoch kicked his friend under the table.

"We left thinking, 'We can do this ourselves,'" said Murdoch, who rushed to the township offices the following day to see who owned the island.

Property records showed that the state owned the lake and lake floor, but nobody owned the island. An attorney told them about the law of adverse possession written in the

1820's. If Murdoch and Termarco could show that they used the island for five years, it would be theirs. As crazy as the scheme sounded, Murdoch figured it was worth trying.[1]

Can two friends acquire an island simply by *pretending* they own it? Yes. As we will see, the law of adverse possession permits people to obtain title to land by using it, if they meet certain stringent criteria. We examine the rules later in the chapter and decide how likely Murdoch and Termarco are to succeed. For now, the lesson is that real property law can provide surprises—and profit.

Nature of Real Property

Property falls into three categories: real, personal, and intellectual. Real property, which is the focus of this chapter, consists of the following:

- **Land.** Land is the most common and important form of real property. In England, land was historically the greatest source of wealth and social status, far more important than industrial or commercial enterprises. As a result, the law of real property has been of paramount importance for nearly 1,000 years, developing very gradually to reflect changing conditions. Some real property terms sound medieval for the simple reason that they *are* medieval. By contrast, the common law of torts and contracts is comparatively new.

  Real property usually also includes anything underground (subsurface right), and some amount of airspace above land (air rights).
- **Buildings.** Buildings are real property. Houses, office buildings, apartment complexes, and factories all fall in this category.
- **Plant life.** Plant life growing on land is real property whether the plants are naturally occurring, such as trees, or cultivated crops. When a landowner sells his property, plant life is automatically included in the sale unless the parties agree otherwise. A landowner may also sell the plant life separately if he wishes. A sale of the plant life alone, without the land, is a sale of goods. (Goods, as you may recall, are movable things.) If Douglas agrees to sell all of the fir trees on his property, this sale of goods will be governed by the Uniform Commercial Code (UCC), regardless of whether Douglas or the buyer is obligated to cut the trees.[2]
- **Fixtures.** Fixtures are goods that have become attached to real property. A house (which is real property) contains many fixtures. The furnace and heating ducts were goods when they were manufactured and when they were sold to the builder because they were movable. But when the builder attached them to the house, the items became fixtures. By contrast, neither the refrigerator nor the grand piano is a fixture.

When an owner sells real property, the buyer normally obtains the fixtures unless the parties specify otherwise. Sometimes it is difficult to determine whether something is a fixture. The general rule is this: **an object is a fixture if a reasonable person would consider**

[1]Leslie Haggin, "Pair Stake Their Claim to Hot Dog Island," *Record* (Bergen, N.J.), Sep. 5, 1994, p. A12. Excerpted with permission of *The Record*, Hackensack, N.J.
[2]UCC §2-107(2).

the item to be a permanent part of the property, taking into account attachment, adaptation, and other objective manifestations of permanence:

- *Attachment.* If an object is attached to property in such a way that removing it would damage the property, it is probably a fixture. Heating ducts could be removed from a house, but only by ripping open walls and floors, so they are fixtures.
- *Adaptation.* Something that is made or adapted *especially for attachment* to the particular property is probably a fixture, such as custom-made bookshelves fitted in a library.
- *Other manifestations of permanence.* If the owner of the property clearly intends the item to remain permanently, it is probably a fixture. Suppose a homeowner constructs a large concrete platform in his backyard, then buys a heavy metal shed and bolts it to the platform. His preparatory work indicates that he expects the shed to remain permanently, and a court would likely declare it a fixture.

For many, beef is a dietary fixture. Is the cattle scale a fixture?

Freeman v. Barrs

237 S.W.3d 285
Missouri Court of Appeals, 2007

Facts: Mary Ann Barrs paid $3.5 million to Francis Freeman for 4,000 acres of ranch land, including a covered "pole-barn," which had open sides, a large cattle scale, and an enclosed veterinarian's office. The parties used a form contract, which stated that all fixtures were included with the sale. The document offered space for the parties to specify items that were included or excluded with the sale, but neither party listed the cattle scale as either in or out of the deal. After the agreement went through, Barrs and Freeman got into a beef over who owned the scale. The trial judge grilled numerous witnesses and ultimately weighed in on the side of Barrs, declaring the scale a fixture that belonged to the real estate. Broiling, Freeman appealed.

Issue: ***Was the cattle scale a fixture?***

Excerpts from Judge Parrish's Decision: Steve McFadden, the president of Sooner Scale, Inc., the maker of the scale, testified that he had designed the present scale. The scale was designed to be portable, and 70% of the scales he sold were installed in the present manner. He further stated that he could move the present scales by cutting away a welded metal fence and lifting the scale with heavy machinery, [a] process he often performs. McFadden further stated that the removal of the fence would take approximately one hour with use of a cutting torch, and thereafter the scale could be moved within fifteen minutes.

Characterization of an item as a fixture depends upon the finding of three elements: annexation to the realty, adaptation to the use to which the realty is devoted, and intent of the annexor that the object become a permanent accession to the freehold. The latter two elements, adaptation and intent, are more important in determining whether a chattel became a fixture than the method by which the chattel is affixed to a freehold.

Annexation. The scale was purchased by plaintiff to "start selling cattle from the ranch and not sending them to the sale barn to keep the price up a little." The scale weighs approximately 6,500 pounds. A fence and gates within the structure had to be cut off in order to install the scale. A concrete slab was poured in the structure for placement of the scale. The scale was placed on pipes on the ground and pushed with a tractor across the pipes onto the slab. Concrete ramps were installed on two sides of the scale and fencing was constructed to direct cattle onto the scale. The metal posts for the fence were set in the concrete. The scale has remained in place since its installation.

Adaptation. Ray Stone had been ranch manager for plaintiff. At the time of trial he had an agreement with defendant that permitted him to run cattle on the property. He "just kind of saw after the place" for her. He told the court that the scale was integral to a cattle-working facility. The scale was used to weigh cattle for sale and to determine required dosages of medicine administered to cattle.

Intent. The manufacturer sold peripheral items that permitted the scale to be moved. This included a trailer and an inverter. Plaintiff did not buy that equipment. Ray Stone told the court that the scale was purchased "to be stationary whether it was portable or not."

This court concludes that the scale was a fixture; that, therefore, the sale of the real estate on which it was situate included the sale of the scale. A 6,500-pound scale placed on a specially sized concrete pad and surrounded by metal pole fencing set in the concrete is annexed to the real estate on which the concrete pad is poured. The permanency of the installation is emphasized by the fact the facility is covered and has a veterinary office in which the printer for the scale may be operated. The scale was put in place to facilitate the cattle operation on the premises. It had been used for that purpose since its purchase. Its adaptation for that purpose enhanced the operation of the cattle ranch.

Affirmed.

Estates in Real Property

Use and ownership of real estate can take many different legal forms. A person may own property outright, having the unrestricted use of the land and an unlimited right to sell it. Such a person owns a **fee simple absolute**. However, someone may also own a lesser interest in real property. The different rights that someone can hold in real property are known as **estates** or **interests.** Both terms simply indicate specified rights in property.

Fee simple absolute
Full ownership privileges in a property.

Concurrent Estates

When two or more people own real property at the same time, they have **concurrent estates**. The most common forms of concurrent estates are tenancy in common, joint tenancy, and tenancy by the entirety.

Concurrent estate
Two or more people owning property at the same time.

Tenancy in Common

The most common form of concurrent estate is **tenancy in common**. Suppose Patricia owns a house. Patricia agrees to sell her house to Quincy and Rebecca. When she **conveys** the deed, that is, transfers the deed, "to Quincy and Rebecca," those two now have a tenancy in common. This kind of estate can also be created in a will. If Patricia had died still owning the house, and left it in her will to "Sam and Tracy," then Sam and Tracy would have a tenancy in common. Tenancy in common is the "default setting" when multiple people acquire property. Co-owners are automatically considered tenants in common unless another type of interest (joint tenancy, tenancy by the entirety) is specified.

Tenancy in common
Two or more people holding equal interest in a property, but with no right of survivorship.

A tenancy in common might have 2 owners, or 22, or any number. The tenants in common do not own a particular section of the property; they own an equal interest in the entire property. Quincy and Rebecca each own a 50 percent interest in the entire house.

Any co-tenant may convey her interest in the property to another person. Thus, if Rebecca moves 1,000 miles away, she may sell her 50 percent interest in the house to Sidney. Further, when a co-tenant dies, her interest in the property passes to her heirs, along with all of her other assets.

Partition Since any tenant in common has the power to convey her interest, some people may find themselves sharing ownership with others they do not know or, worse, dislike. What to do? Partition, or division of the property among the co-tenants. Any co-tenant is entitled to demand partition of the property. If the various co-tenants cannot agree on a fair division, a co-tenant may request a court to do it. **All co-tenants have an absolute right to partition.**

A court will normally attempt a **partition by kind,** meaning that it actually divides the land equally among the co-tenants. If three co-tenants own a 300-acre farm and the court

can divide the land so that the three sections are of roughly equal value, it will perform a partition in kind, even if one or two of the co-tenants oppose partition. If partition by kind is impossible because there is no fair way to divide the property, the court will order the real estate sold and the proceeds divided equally.

Image Source/Jupiterimages

Partition by kind might be the best way to divide a piece of property like this vineyard.

Joint Tenancy

Joint tenancy is similar to tenancy in common but is used less frequently. The parties, called joint tenants, again own a percentage of the entire property and also have the absolute right of partition. The primary difference is that a **joint tenancy** includes the right of survivorship. This means that when one joint tenant dies, his interest in the property passes to *the surviving joint tenants*. Recall that a tenant in common, by contrast, has the power to leave his interest in the real estate to his heirs. Because a joint tenant cannot leave the property to his heirs, courts do not favor this form of ownership. The law presumes that a concurrent estate is a tenancy in common; a court will interpret an estate as a joint tenancy only if the parties creating it clearly intended that result.

Joint tenancy
Two or more people holding equal interest in a property, with the right of survivorship.

Joint tenancy has one other curious feature. Although joint tenants may not convey their interest by will, they may do so during their lifetime. If Frank and George own vacation property as joint tenants, Frank has the power to sell his interest to Harry. But as soon as he does so, the joint tenancy is **severed,** that is, broken. Harry and George are now tenants in common, and the right of survivorship is destroyed.

But when does a severance officially take place? The answer was of critical importance in the following case.

Jackson v. Estate of Green

771 N.W.2d 675
Supreme Court of Michigan, 2009

Facts: Green and Jackson owned land as joint tenants. Green filed a petition asking a court to partition the parcels, but he died while the partition was still pending.

The lower courts found that because the partition was not complete at the time of Green's death, the land reverted to Jackson.

Green's estate appealed.

Issue: *Does* **filing** *for the partition of a joint tenancy terminate survivorship rights?*

Excerpts from Justice Corrigan's Decision: We agree with the Court of Appeals that defendant's interest in the parcel of land automatically reverted to plaintiff when defendant died. Thus, defendant's estate has no interest in the property, and even if defendant's partition action survived his death under Michigan's survival statute, nothing remains to partition.

The principal characteristic of the joint tenancy is the right of survivorship. Upon the death of one joint tenant, the surviving tenant or tenants take the whole estate. An ordinary joint tenancy may be severed, and the right of survivorship thereby destroyed, by an act of the parties, conveyance by either party, or levy and sale on an execution against one of the parties.

A party can sever a joint tenancy by compelling a partition. Until an order of partition has been entered,

however, a partition has not been compelled and, thus, the joint tenancy has not been severed. It is not the filing of the partition action which terminates the joint tenancy, but only the judgment in such action which has that effect.

This rule is based on two related concepts: First, the theory of survivorship—that at the moment of death, ownership vests exclusively in the surviving joint tenant or tenants—and second, the doctrine that severance of the joint tenancy does not occur until the partition suit reaches final judgment.

Accordingly, we would hold that the filing of the partition action did not sever the joint tenancy because an order effectuating a partition had not entered at the time of defendant's death. Therefore, regardless whether defendant's partition action survived his death under the survival statute, his interest in the parcel of land did not.

Affirmed.

Exhibit 43.1 illustrates tenancy in common and joint tenancy.

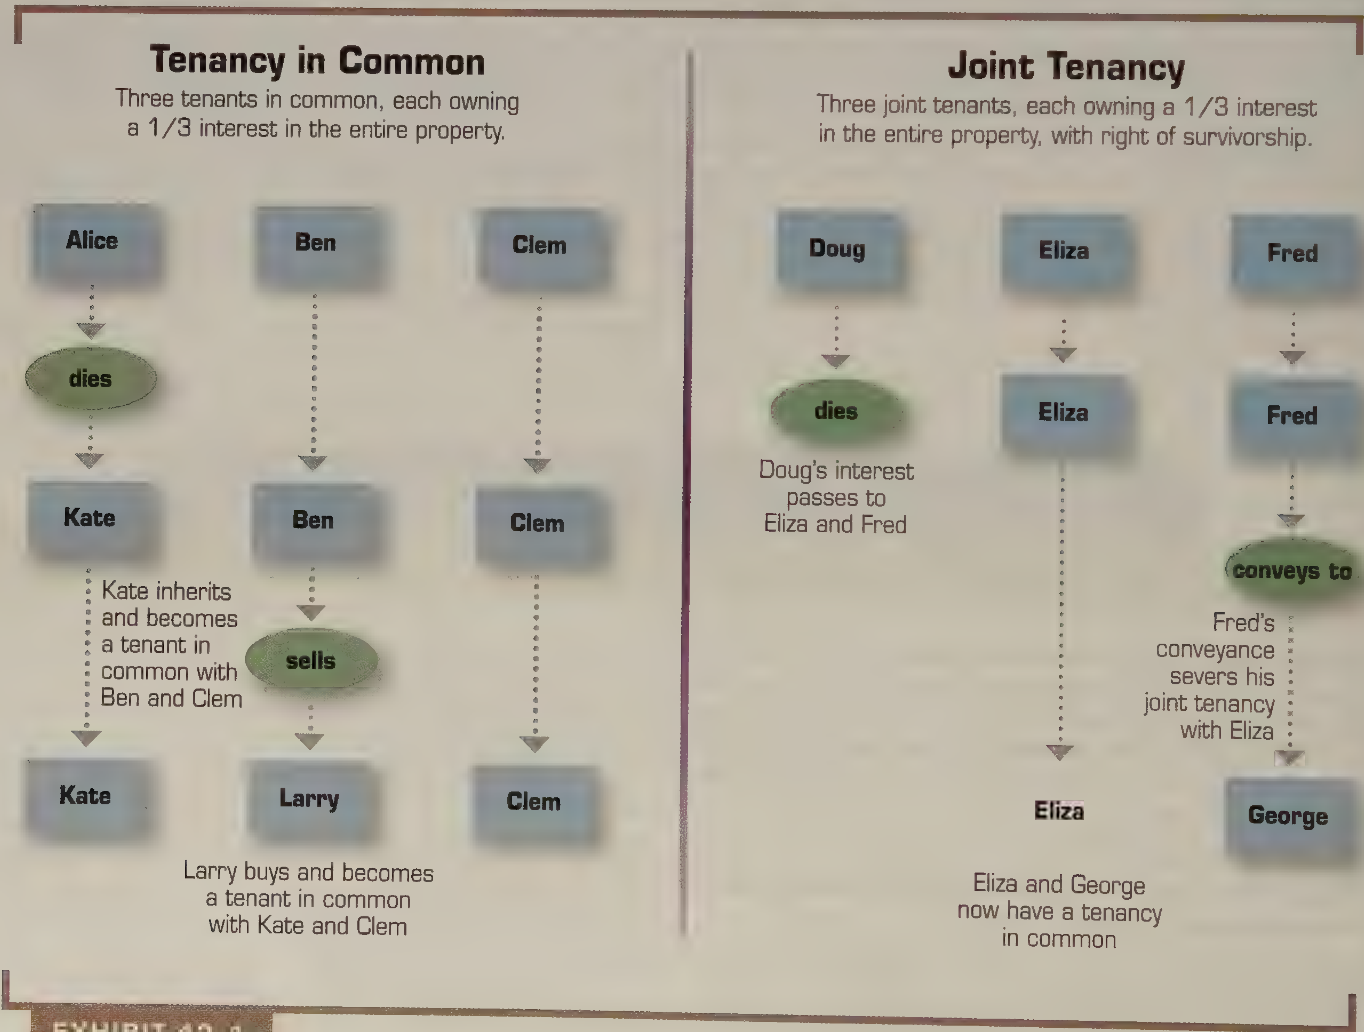

EXHIBIT 43.1

EXAM Strategy

Question: Thomas, aged 80, has spent a lifetime accumulating unspoiled land in Oregon. He owns 16,000 acres, which he plans to leave to his five children. He is not so crazy about his grandchildren. Thomas cringes at the problems the grandchildren would cause if some of them inherited an interest in the land and became part-owners along with Thomas's own children. Should Thomas leave his land to his children as tenants in common or joint tenants?

Strategy: When a co-tenant dies, her interest in property passes to her heirs. When a joint tenant dies, his interest in the property passes to the surviving joint tenants.

Result: Thomas is better off leaving the land to his children as joint tenants. That way, when one of his children dies, that child's interest in the land will go to Thomas's surviving children, not to his grandchildren. (There are other approaches Thomas could take, such as creation of a trust, and they are discussed in Chapter 45, on planning for the future.)

Tenancy by the Entirety This form of ownership exists in slightly over half of the states. **The husband and wife each own the entire property, and they both have a right of survivorship.** So when the husband dies, his one-half interest in the property automatically passes to his wife. Neither party has a right to convey his or her interest. If the parties wish to sell their interests, they must do so together. An advantage of this is that no creditor may seize the property based on a debt incurred by only one spouse. If a husband goes bankrupt, creditors may not take his house if he and his wife own it as tenants by the entirety. Divorce terminates a tenancy by the entirety and leaves the two parties as tenants in common.

Community Property French and Spanish settlers brought **community property** law to the South and West, and nine states still use this form of ownership for a married couple.[3] This system allows the husband and wife to maintain separate ownership of assets they bring to the marriage or inherit. Those assets are called **separate property.** They remain the private property of each spouse during the marriage. Either spouse may convey separate property to another person during the marriage and may leave the separate property to anyone he or she wishes. But income or assets that either party *earns* during the marriage are considered **community property, which must be equally shared** during the marriage, regardless of who earns it. Neither party may convey community property without the consent of the other. When a spouse dies, one-half of the community property goes to the surviving spouse, and the other half goes to the heirs of the deceased.

Suppose Margarita marries Jean Claude in Texas, a community property state. At the time of the marriage, Jean Claude owns a ranch but Margarita owns nothing. Jean Claude's ranch is separate property. He is free to convey it to someone else during his lifetime, and at his death, he may leave it to anyone he wishes. During the marriage, Margarita inherits a Renoir painting worth \$3 million; it is separate property, which she may freely dispose of. While married, Jean Claude earns \$6,000 per year, translating children's poetry. Margarita earns \$900,000 producing gory television shows. The income is community property, and each spouse is entitled to \$453,000 per year.

[3]Arizona, California, Idaho, Louisiana, Nevada, New Mexico, Texas, and Washington all have a community property law, while Wisconsin's system is a variation of the same principle.

Future Interests

Life estate
Ownership of property for the lifetime of a particular person.

A property owner may convey less than all of his rights to another person. For example, if Andrew has a fee simple absolute in Serenity Farm, he may convey a **life estate** to Claire, meaning that Claire gets the property only for her life. The remaining rights in the land are called *future interests*.

We look at two future interests: a reversion and a remainder.

Reversion

Reversion
The right of an owner (or her heirs) to property upon the death of a life tenant.

If Andrew conveys Serenity Farm "to Claire for her life," Claire has a life estate in the property. Andrew has a **reversion**, meaning that upon Claire's death, the property automatically returns to him or to his heirs. The significance of a future interest is this: even though Claire may live for 50 more years, Andrew may convey his reversion at any time. The right to own Serenity Farm upon Claire's death is a valuable right, and Andrew may sell the reversion. Once a sale is made, however, the buyer has to bide his time until Claire's death, but when she dies, the land is his.

Remainder

Suppose Andrew conveys Tranquility Farm "to Douglas for life, and then to Ernie." Douglas has a life estate and Ernie has a **remainder.** A remainder has exactly the same value as a reversion. The difference is that when the life tenant dies, the property goes to a named third person, not to the original owner.

Example: Andrew owns a fee simple absolute in property and ...	What was conveyed?	What future interest remains?
Conveys the property "to Betty."	Sale of the entire estate	None
Conveys the property "to Claire for her life."	Life estate	Andrew has a reversion. The property reverts to him or his heirs upon Claire's death.
Conveys the property "to Douglas for his life and then to Ernie."	Life estate	Ernie has a remainder and Andrew has nothing.

Nonpossessory Interests

All of the estates and interests that we have examined thus far focused on one thing: possession of the land. Now we look at interests that *never* involve possession. These interests may be very valuable, even though the holder never lives on the land.

Easements

The Alabama Power Co. drove a flatbed truck over land owned by Thomas Burgess, damaging the property. The power company did this to reach its power lines and wooden transmission poles. Burgess had never given Alabama Power permission to enter his land, and he sued for the damage that the heavy trucks caused. He recovered—nothing. Alabama Power had an *easement* to use Burgess's land.

An **easement** gives one person the right to enter land belonging to another and make a limited use of it, without taking anything away. Burgess had bought his land from a man named Denton, who years earlier had sold an easement to Alabama Power. The easement gave the power company the right to construct several transmission poles on one section of Denton's land and to use reasonable means to reach the poles. Alabama Power owned that easement forever, and when Burgess bought the land, he took it subject to the easement. Alabama Power drove its trucks across a section of land where the power company had never gone before, and the easement did not explicitly give the company this right. But the court found that the company had no other way to reach its poles, and therefore, the easement allowed this use. Burgess is stuck with his uninvited guest as long as he owns the land.[4]

Easement
The right to enter land belonging to another and make limited use of it.

There are two kinds of easements. The first, an **easement appurtenant,** benefits its owner in the use of *another parcel of land*. Suppose Madeline buys vacation land that is near a lake but without waterfront access. Wade owns lakefront land, and he sells Madeline an easement, allowing her to cross his property, on foot or in a car, to reach the water. This is an easement appurtenant since it benefits its owner (Madeline) in the use of her land. Madeline's land is the **dominant tenement;** that is, the property that benefits from the easement. Wade's parcel is the **servient tenement,** the land that is burdened by the easement. Typically, the dominant tenement is adjacent to the servient, but it need not be.

An easement appurtenant *runs with the land*, meaning that if the owner of the dominant tenement sells her land, the buyer acquires the easement as well. However, the owner may *not* sell an easement by itself to someone else. If Madeline sells her property to Jason, he acquires the right to waltz across Wade's land. But Madeline has no right to sell only the easement to Jason while retaining her property.

The second kind of easement, an **easement in gross,** benefits its owner, but *not in the use of other land*. The Alabama Power Co. had an easement in gross in Burgess's land. The company had the right to install power lines across the property and use reasonable means to reach them. However, this right did not benefit any other property owned by the company, so it was an easement in gross. Most easements in gross *may* be sold. If Alabama Power no longer needed its power lines on Burgess's land, it could sell its easement to another company, for example, a cable television company.[5]

Creation of Easements

Grant or Reservation Property owners normally create easements in one of two ways. A **grant** occurs when a landowner expressly intends to convey an easement to someone else. This is how Alabama Power acquired its easement. The company offered to buy the right to use the land, and Denton agreed to sell. The parties signed an agreement and *recorded* the easement, meaning they placed it on file in the land registry, so that interested parties were on notice. When Burgess bought the land from Denton, he knew (or should have known) about the easement.

A **reservation** occurs when an owner sells land but keeps some right to enter the property. A farmer might sell 40 acres to a developer but reserve an easement giving him the right to drive his equipment across a specified strip of the land.

Implication or Necessity Easements are less frequently created in these two ways. An **easement by implication** arises when an owner subdivides land in a way that *clearly implies* the creation of an easement in favor of the new parcels. Suppose Jason owns

[4] *Burgess v. Alabama Power Co.*, 658 So. 2d 435, 1995 Ala. LEXIS 119 (Ala. 1995).

[5] A related nonpossessory estate—and one that can benefit society and posterity—is a **conservation easement,** in which a property owner agrees to forbid certain development on her property, forever.

lakefront property with a boat ramp. He subdivides his land and sells several parcels that do not reach the lake, promising all purchasers use of the boat ramp. This subdivision clearly implies the right to cross Jason's land to use the boat ramp since there is no other access. The new owners have an easement by implication.

An **easement by necessity** arises when the dominant tenement *absolutely must* make use of other property. Yolanda leases a ninth-floor apartment to Darrin. Darrin has an easement by necessity to use the stairs and elevators since he has no other method of reaching his apartment, short of skydiving.

Prescription Joseph Leto bought undeveloped land in 1946 and used it on weekends for family gatherings, picnicking, and nature walks. He reached his property by using a jeep trail that crossed land he did not own, land eventually purchased by Digital Equipment Corp. (DEC). Leto continued to use the trail for nearly 30 years, until DEC sued to keep him off its property. Neither DEC nor the previous owner had ever given Leto permission to use the land. Did Leto have an easement? Yes, he had an **easement by prescription.**[6] An easement by prescription may arise when someone makes use of property belonging to another, if his use is:

- Open and notorious,
- Adverse to the owner, and
- Continuous and uninterrupted for the number of years required by local statute.

The theory of easement by prescription is that landowners must take some initiative to protect their property rights. If they fail to do so, they may lose certain rights in their land (or, as we will see in the section on adverse possession later in this chapter, they may lose the land altogether). But someone seeking an easement by prescription must satisfy each element. His use of the property must be open and notorious, so that a reasonable landowner would be aware of what is happening and have a chance to stop it. The use must be adverse to the owner, meaning without the owner's permission. A landowner who *permits* another to cross his land nullifies any possibility of easement by implication. Finally, the use must continue without interruption for as long as required by the state statute, which is often 7 years but may be more or less in a particular state. Joseph Leto continued his use of the trail for nearly 30 years, much longer than the local statute required. Once he acquired the easement by prescription, it was potentially his forever, and when DEC acquired the land, it did so subject to Leto's easement.

During the 19th century, many railroads obtained easements to lay down rails, and, by 1900, trains ran on over 300,000 miles of track throughout the country. Today, railroads use less than half that much track. What happens to the thousands of miles of unused land? Some state laws, and some contracts, require property to revert to the owner when an easement is abandoned. Yet federal, state, and local governments have turned many miles of unused track into trails for hiking and biking. Many environmentalists strongly support this "rails to trails" conversion. Some property owners believe that their reversionary rights are being violated and demand compensation. Local governments point out that they continue to shore up and maintain the original rail bank for possible future train use, and that the easements are therefore not abandoned.

Profit

Profit
The right to enter land belonging to another and take something from it.

A **profit** gives one person the right to enter land belonging to another and take something away. You own 100 acres of vacation property, and suddenly a mining company informs you that the land contains valuable nickel deposits. You may choose to sell a profit to the mining

[6] *Digital Equipment Corp. v. Leto*, Mass. Lawyers Weekly No. 14-008-94 (Mass. Land Court 1994).

company, allowing it to enter your land and take away the nickel. You receive cash up front, and the company earns money from the sale of the mineral. The rules about creating and transferring easements apply to profits as well.

License

A **license** gives the holder temporary permission to enter another's property. Unlike an easement or profit, a license is a *temporary* right. When you attend a basketball game by buying a ticket, the basketball team that sells you the ticket is the licensor and you are the licensee. You are entitled to enter the licensor's premises, namely the basketball arena, and to remain during the game, though the club can revoke the license if you behave unacceptably.

License
The right to enter land belonging to another temporarily.

Mortgage

Generally, in order to buy a house, a prospective owner must borrow money. The bank or other lender will require security before it hands over its money, and the most common form of security for a real estate loan is a mortgage. A **mortgage** is a security interest in real property. The homeowner who borrows money is the **mortgagor** because she is *giving* the mortgage to the lender. The lender, in turn, is the **mortgagee**, the party acquiring a security interest. The mortgagee in most cases obtains a **lien** on the house, meaning the right to foreclose on the property if the mortgagor fails to pay back the money borrowed. A mortgagee forecloses by taking legal possession of the property, auctioning it to the highest bidder, and using the proceeds to pay off the loan.

Mortgage
A security interest in real property.

Mortgagor
An owner who gives a security interest in property in order to obtain a loan.

Mortgagee
The party acquiring a security interest in property.

Adverse Possession

You may recall Paul Termarco and Gene Murdoch, who opened this chapter by trying to sell you—and all the world—a hot dog from an island in the middle of a New Jersey lake. As we mentioned then, Termarco and Murdoch had their sights set on more than mustard and relish: they hoped that by using the island *as if* they owned it, they *would* own it. They were relying on the doctrine of adverse possession. This old rule of law is analogous to easement by prescription, which we analyzed earlier. Under certain conditions, easement by prescription permits a person who makes use of land continuously to establish an easement for that use. Adverse possession goes even further, allowing someone to take title to land if she meets certain tests.

In most states, to gain ownership of land by adverse possession, the user must prove:

- Entry and exclusive possession,
- Open and notorious possession,
- A claim adverse to the owner, and
- Continuous possession for a statutory period.

Entry and Exclusive Possession

The user must take physical possession of the land and must be the only one to do so. If the owner is still occupying the land, or if other members of the public share its use, there can be no adverse possession.

Open and Notorious Possession

The user's presence must be visible and generally known in the area, so that the owner is on notice that his title is contested. This ensures that the owner can protect his property by ejecting the user. Someone making secret use of the land gives the owner no opportunity to do this, and hence acquires no rights in the land.

A Claim Adverse to the Owner

The user must clearly assert that the land is his. He does not need to register a deed or take other legal steps, but he must act as though he is the sole owner. If the user occupies the land with the owner's permission, there is no adverse claim and the user acquires no rights in the property. To succeed, the user must protect his possession of the land against all others the way any normal landowner would. This may mean erecting a home if the area is residential, or fencing property that is used to graze cattle, or posting "No Trespassing" signs in a wilderness area.

Must the user *believe* he has a title, or only act as though he does? The states are divided on this question. Many states focus only on the adverse *acts* of the user: it is sufficient if his conduct indicates he is the sole owner, regardless of what he thinks. This is the modern trend. But other states require a mistaken *belief* that the user has title to the land. For example, some states require that the user demonstrate "color of title," meaning that he has some document that *he believed* gave him good title to the land, though in reality it never did.

Continuous Possession for the Statutory Period

State statutes on adverse possession prescribe a period of years for continuous use of the land. Originally, most states required about 20 years to gain adverse possession, but the trend has been to shorten this period. Many states now demand 10 years, and a few require only 5 years' use. The reason for shortening the period is to reward those who *make use* of land. Even within a single state, statutes may prescribe various periods for different types of land. For example, adverse possession in a wilderness area may require more than 20 years' possession.

Regardless of the length of time required, the use must be continuous. In a residential area, the user would have to occupy the land year round for the prescribed period. In a wilderness area generally used only in the summer, a user could gain ownership by seasonal use.

A user may be able to meet the statutory period by **tacking,** which permits her to add on to her years of occupancy any years certain predecessors were in possession. The predecessors must have been in *privity* with the current user, meaning there was some legal relationship. Suppose that for 12 years, Martha adversely possesses land owned by Jake. Martha then moves, selling her interest in the land to Nancy, who occupies the land for 9 years. The total of 21 years is sufficient for adverse possession in any state, and Nancy now owns the land.

Sailing back to Hot Dog Island, how did Murdoch and Termarco fare? They certainly entered on the land and established themselves as the exclusive occupants. Their use has been open and notorious, allowing anyone who claimed ownership to take steps to eject them from the property. Their actions have been adverse to anyone else's claim. If the two hot dog entrepreneurs have grilled those dogs for the full statutory period, they should take title to the island.[7]

In the following case, the couple claiming adverse possession must do without friendly hot dog sellers because they have taken up residence in a ghost town.

[7]Unfortunately, there are no press accounts to inform us of the island's current status.

Ray v. Beacon Hudson Mountain Corp.

88 N.Y.2d 154, 666 N.E.2d 532, 1996 N.Y. LEXIS 676
Court of Appeals of New York, 1996

Facts: In 1931, Rose Ray purchased a cottage in a mountaintop resort town in the Adirondacks, at the same time agreeing to rent the land on which the structure stood. The long-term lease required her to pay the real estate taxes and provided that when the tenancy ended, the landlord would buy back the cottage at fair market value. In 1960, the landlord terminated the lease of everyone in the town, so Ray and all other residents packed up and left. She died in 1962, without ever getting a penny for the cottage. The next year, Mt. Beacon Incline Lands, Inc., bought all rights to the abandoned 156-acre resort.

Robert and Margaret Ray, the son and daughter-in-law of Rose Ray, reentered the cottage and began to use it one month per year, every summer from 1963 to 1988. They paid taxes, insured the property, installed utilities, and posted "No Trespassing" signs.

In 1978, Beacon Hudson bought the resort in a tax foreclosure sale. Finally, in 1988, the Rays filed suit, claiming title to the cottage by adverse possession. Beacon Hudson counterclaimed, seeking to eject the Rays. The trial court ruled for the couple. The appellate court reversed, stating that the Rays had been absent too frequently to achieve adverse possession. The Rays appealed to New York's highest court.

Issue: ***Did the Rays acquire title by adverse possession?***

Excerpts from Judge Titone's Decision: The element of continuity will be defeated where the adverse possessor interrupts the period of possession by abandoning the premises. However, the hostile claimant's actual possession of the property need not be constant to satisfy the "continuity" element of the claim. Rather, the requirement of continuous possession is satisfied when the adverse claimant's acts of possessing the property are consistent with acts of possession that ordinary owners of like properties would undertake.

Here, defendant claims that plaintiffs' possession of the property was not continuous because they were physically present there for only one month out of the summer season. However, this argument fails to take into consideration plaintiffs' other acts of dominion and control over the premises that are indicative of their actual possession of an estate in land. Here, plaintiffs' installation of utilities and overall preservation of the cottage, a permanent and substantial structure, in a veritable ghost town, for the duration of the statutory period demonstrates continuous, actual occupation of land by improvement. Thus, plaintiffs' actual summertime use for a full month each season, coupled with their repeated acts of repelling trespassers, improving, posting, padlocking, and securing of the property in their absences throughout the statutory period, demonstrated their continuous dominion and control over, and thus possession of, the property.

Such seasonal presence, coupled with plaintiffs' preservation of the premises for the statutory period of 10 years—which was made more obvious by the fact that all neighboring structures had collapsed due to vandalism and abandonment—was sufficient to place the record owner on notice of their hostile and exclusive claim of ownership.

[The appellate court is reversed and the Rays obtain title by adverse possession.]

Land Use Regulation

Nuisance Law

A **nuisance** is an unprivileged interference with a person's use and enjoyment of her property. Offensive noise, odors, or smoke often give rise to nuisance claims. Courts typically balance the utility of the act that is causing the problem against the harm done to neighboring property owners. If a suburban homeowner begins to raise pigs in her backyard, the neighbors may find the bouquet offensive; a court will probably issue an **abatement,** that is, an order requiring the homeowner to eliminate the nuisance.

Community members can use the old doctrine of nuisance for more serious problems than pigs. An apartment building in Berkeley, California, became widely known as a drug house, and the neighbors suffered. Here is how two of the neighbors described their lives:

> I have been confronted by the drug dealers, drug customers, and prostitutes that frequent and work around and from 1615–1617 Russell Street. Weekly I have lost many hours of sleep from the cars that burn rubber after each drug buy in the middle of the night.
>
> Because of this illegal activity, my child is unable to use our front yard, and I even have to check the back yard since it has been intruded upon from time to time by people running from the police. He is learning to count by how many gunshots he hears and can't understand why he can't even enjoy our rose garden.

These were but two of the affidavits written by neighbors of a 36-unit building owned by Albert Lew. Month after month neighbors complained to Lew that his tenants were destroying the neighborhood. But Lew refused to evict the drug dealers or take any serious steps to limit the crime. So the neighbors used the law of nuisance to restore their community.

Sixty-six neighbors of the drug house each filed a small claims case against Lew, claiming that he was permitting a nuisance to exist on his property. The neighbors won their small claims cases, but Lew appealed, as he had a right to, for a new trial in Superior Court. A sergeant testified that he had been to the building over 250 times during two years. Residents testified about how frightening life had become. The Superior Court awarded damages of $218,325 to the neighbors and the court of appeals affirmed the award, holding that neighbors injured by a nuisance may seek an abatement and damages. As Lew discovered, the law of nuisance can be a powerful weapon for creating a better neighborhood.[8]

Zoning

Zoning statutes are state laws that permit local communities to regulate building and land use. The local communities, whether cities, towns, or counties, then pass zoning ordinances that control many aspects of land development. For example, a town's zoning ordinance may divide the community into an industrial zone where factories may be built, a commercial zone in which stores of a certain size are allowed, and several residential zones in which only houses may be constructed. Within the residential zones, there may be further divisions, for example, permitting two-family houses in certain areas and requiring larger lots in others.

An owner prohibited by an ordinance from erecting a certain kind of building, or adding on to his present building, may seek a **variance** from the zoning board, meaning an exception granted for special reasons unique to the property. Whether a board will grant a variance generally depends upon the type of the proposed building, the nature of the community, the reason the owner claims he is harmed by the ordinance, and the reaction of neighbors.

Ethics Many people abhor "adult" businesses, such as strip clubs and pornography shops. Urban experts agree that a large number of these concerns in a neighborhood often causes crime to increase and property values to drop. Nonetheless, many people patronize such businesses, which can earn a good profit. Should a city have the right to restrict adult businesses? New York City officials determined that the number of sex

[8] *Lew v. Superior Court*, 20 Cal. App. 4th 866, 1993 Cal. App. LEXIS 1198 (Cal. Ct. App. 1993).

shops had grown steadily for two decades and that their presence harmed various neighborhoods. With the support of community groups, the city passed a zoning ordinance that prohibited adult businesses from all residential neighborhoods, from some commercial districts, *and* from being within 500 feet of schools, houses of worship, day-care centers, or other sex shops (to avoid clustering). Owners and patrons of these shops protested, claiming that the city was unfairly denying the public access to a form of entertainment that it obviously desired. Is the New York City zoning ordinance reasonable?

Eminent Domain

Eminent domain is the power of the government to take private property for public use. A government may need land to construct a highway, airport, university, or public housing. All levels of government—federal, state, and local—have this power. But the Fifth Amendment of the United States Constitution states: ". . . nor shall private property be taken for public use, without just compensation." The Supreme Court has held that this clause, the Takings Clause, applies not only to the federal government but also to state and local governments. So, although all levels of government have the power to take property, they must pay the owner a fair price.

Eminent domain
The power of the government to take private property for public use.

A "fair price" generally means the reasonable market value of the land. Generally, if the property owner refuses the government's offer, the government will file suit seeking **condemnation** of the land, that is, a court order specifying what compensation is just and awarding title to the government.

A related issue concerns local governments requiring property owners to *dedicate* some of their land to public use in exchange for zoning permission to build or expand on their own property. For example, if a store owner wishes to expand his store, a town might grant zoning permission only if the owner dedicates a different part of his property for use as a public bike path. The Supreme Court has recently diminished the power of local governments to require such dedication.[9]

LANDLORD-TENANT LAW

Apartments are certainly a type of real property, and many students are keenly interested in renters' rights. We now turn our attention to landlord-tenant law.

A freehold estate is the right to possess real property and use it in any lawful manner. What we think of as "owning" land is in fact a freehold estate. **When an owner of a freehold estate allows another person temporary, exclusive possession of the property, the parties have created a landlord-tenant relationship.** The freehold owner is the **landlord**, and the person allowed to possess the property is the **tenant**. The landlord has conveyed a leasehold interest to the tenant, meaning the right to temporary possession. Courts also use the word *tenancy* to describe the tenant's right to possession.

Landlord
The owner of a freehold estate who allows another person temporarily to live on his property.

Tenant
A person given temporary possession of the landlord's property.

A leasehold may be commercial or residential. In a commercial tenancy, the owner of a building may rent retail space to a merchant, offices to a business, or industrial space to a manufacturer. When someone rents an apartment or house, he has a residential leasehold.

[9]The Supreme Court's ruling came in *Dolan v. City of Tigard*, 512 U.S. 374, 114 S. Ct. 2309, 1994 U.S. LEXIS 4836 (1994), which we discuss in more detail in Chapter 5, on constitutional law.

Three Legal Areas Combined

Lease
An agreement in which an owner gives a tenant the right to use property.

Property law influences landlord-tenant cases because the landlord is conveying rights in real property to the tenant. She is also keeping a **reversionary interest** in the property, meaning the right to possess the property when the lease ends. Contract law plays a role because the basic agreement between the landlord and tenant is a contract. A **lease** is a contract that creates a landlord-tenant relationship. And negligence law increasingly determines the liability of landlord and tenant when there is an injury to a person or property. Many states have combined these three legal issues into landlord-tenant statutes.

Lease

The statute of frauds generally requires that a lease be in writing. Some states will enforce an oral lease if it is for a short term, such as one year or less, but even when an oral lease is permitted, it is wiser for the parties to put their agreement in writing because a written lease avoids many misunderstandings. At a minimum, a lease must state the names of the parties, the premises being leased, the duration of the agreement, and the rent. But a well-drafted lease generally includes many provisions, called *covenants* and *conditions*. A **covenant** is simply a promise by either the landlord or the tenant to do something or refrain from doing something. For example, most leases include a covenant concerning the tenant's payment of a security deposit and the landlord's return of the deposit, a covenant describing how the tenant may use the premises, and several covenants about who must maintain and repair the property. Generally, tenants may be fined but not evicted for violating lease covenants. A **condition** is similar to a covenant, but it allows for a landlord to evict a tenant if there is a violation. In many states, conditions in leases must be clearly labeled as "conditions" or "evictable offenses."

Types of Tenancy

There are four types of tenancy: a tenancy for years, a periodic tenancy, a tenancy at will, and a tenancy at sufferance. The most important feature distinguishing one from the other is how each tenancy terminates. In some cases, a tenancy terminates automatically, while in others, one party must take certain steps to end the agreement.

Tenancy for Years

Tenancy for years
A lease for a stated, fixed period.

Any lease for a stated, fixed period is a **tenancy for years**. If a landlord rents a summer apartment for the months of June, July, and August of next year, that is a tenancy for years. A company that rents retail space in a mall beginning January 1, 2012, and ending December 31, 2015, also has a tenancy for years. A tenancy for years terminates automatically when the agreed period ends.

Periodic Tenancy

Periodic tenancy
A lease for a fixed period, automatically renewable unless terminated.

A **periodic tenancy** is created for a fixed period and then automatically continues for additional periods until either party notifies the other of termination. This is probably the most common variety of tenancy, and the parties may create one in either of two ways. Suppose a landlord agrees to rent you an apartment "from month to month, rent payable on the first." That is a periodic tenancy. The tenancy automatically renews itself every month unless either party gives adequate notice to the other that she wishes to terminate. A periodic tenancy could also be for one-year periods—in which case it automatically renews for an additional year if neither party terminates—or for any other period.

The parties also create a periodic tenancy if, when a *tenancy for years* expires, the tenant continues to pay rent and the landlord accepts it. Ariadne agrees to rent property called Naxos for three years, with rent payable once per month. When the three years are up, the tenancy for years expires automatically. Ariadne continues to pay the monthly rent, however, and the landlord accepts her checks. The parties have created a periodic tenancy.

What is the period? If the tenant is renting *commercial property*, the new periodic tenancy is for the same period as the old tenancy for years, up to a maximum of one year. In other words, if Naxos is an office building, Ariadne's new periodic tenancy is for one year (since her original lease was for more than a year). Once the landlord accepts a single monthly rental check, both he and Ariadne are bound for the full year. In many states, if the property is *residential*, the new periodic tenancy is month-to-month. If Naxos is a vacation house, either party can end the lease with 30 days' notice. A landlord's notice terminating a tenancy is often called a **notice to quit**.

Notice to quit
A landlord's notice terminating a tenancy.

Tenancy at Will

A **tenancy at will** has no fixed duration and may be terminated by either party at any time. Tenancies at will are unusual tenancies.[10] Typically, the agreement is vague, with no specified rental period and with payment, perhaps, to be made in kind. The parties might agree, for example, that a tenant farmer could use a portion of his crop as rent. Since either party can end the agreement at any time, it provides no security for either landlord or tenant.

Tenancy at will
A tenancy with no fixed duration, which may be terminated by either party at any time.

Tenancy at Sufferance

A **tenancy at sufferance** occurs when a tenant remains on the premises, against the wishes of the landlord, after the expiration of a true tenancy. Thus, a tenancy at sufferance is not a true tenancy because the tenant is staying without the landlord's agreement. The landlord has the option of seeking to evict the tenant or of forcing the tenant to pay a *use and occupancy fee* for as long as she stays. These distinctions are technical but important.

Tenancy at sufferance
A tenancy that exists without the permission of the landlord, after the expiration of a true tenancy.

In the following case, all parties acknowledged that the tenant refused to pay rent. But it was the landlord's failure to understand different types of tenancy that proved more important and led to a surprising result.

Elwell v. Minor

2006 WL 1920562
Connecticut Superior Court, 2006

Facts: Winfield Elwell orally agreed to rent an apartment in Vernon, Connecticut, to Lucille Minor on a month-to-month basis. The rent was $575. Four years later, Elwell increased the rent to $625, and the next year to $650, taking effect that September. Minor tendered $625 and included a letter explaining that she did not want to pay the increased rent for September or October but that she would pay the increase in later months. Elwell rejected the payment. Minor then tendered the check a second time, and Elwell again returned it.

[10]The courts of some states, annoyingly, use the term "tenancy at will" for what are, in reality, periodic tenancies. They do this to bewilder law students and even lawyers, a goal at which they are quite successful. This text uses tenancy at will in its more widely known sense, meaning a tenancy terminable at any time.

Elwell told Minor to pay $650 or vacate. She did neither, so Elwell began eviction proceedings (called "summary process") by serving on Minor a Notice to Quit for nonpayment of rent. After additional negotiations failed, Elwell served a second Notice to Quit. At trial, Minor argued that nonpayment of *rent* was an improper grounds for evicting a tenant at sufferance. She asked the court to dismiss the case.

Issue: ***May a landlord evict a tenant at sufferance for nonpayment of rent?***

Excerpts from Judge White's Decision: During the month of September, Minor and Elwell corresponded extensively. In her letters, Minor refused to pay the increased rental amount which Elwell demanded. She gave reasons why she did not want to pay $650 instead of $625 and even attempted to negotiate postponing the rent increase until later months. Elwell rejected Minor's efforts by returning the checks that she tendered and continuing to insist on a $650 rental amount. These communications reveal a definite dispute between the parties which precludes the formation of a new one-month lease.

Because Minor remained in possession of the premises without a new monthly contract, she should be treated as a holdover occupying the apartment without the legal right to do so [in other words, as a tenant at sufferance]. In this case, the defendant was not a tenant at will, because such a tenancy exists only when the occupation of the property is with the landlord's consent, continuing during the tenancy. Elwell also served Minor with the first notice to quit for nonpayment of rent expressing his intention to terminate the lease. Once the lease terminated, Minor became a tenant at sufferance.

Nonpayment of rent is not a proper ground for the eviction of a tenant at sufferance because a tenant at sufferance is not required to pay rent, but only use and occupancy. When two parties enter into a month-to-month lease, they do not ordinarily designate a definite date when the lease, by its own terms, will expire. Instead the parties establish a tenancy at will which the tenant may terminate by moving out and the landlord may terminate by serving a notice to quit. Such a lease could never expire by lapse of time because there is no term defining the temporal existence of the lease. So, the law treats a month-to-month lease as a series of individual leases which expire at the end of the month and are ordinarily renewed each month by implication. Once the agreement expires by operation of law, the tenant's obligation to pay rent transforms into an obligation to pay a reasonable sum for the use and occupancy of the premises. Without an obligation to pay rent there can be no summary process for nonpayment of rent.

The proper statutory basis for pursuing summary process against a tenant who failed to pay a reasonable sum for use and occupancy would be that the tenant originally had the right or privilege to occupy the premises but such right or privilege has terminated. Elwell's second notice to quit cites improper grounds for the eviction of a tenant at sufferance. The notice to quit is defective and deprives this court of subject matter jurisdiction in this summary process action. This action is dismissed.

Landlord's Duties

Duty to Deliver Possession

The landlord's first important duty is to deliver possession of the premises at the beginning of the tenancy, that is, to make the rented space available to the tenant. In most cases, this presents no problems and the new tenant moves in. But what happens if the previous tenant has refused to leave when the new tenancy begins?

The **"English rule"** obligates the landlord to remove the previous tenant in time for the new tenant to take possession. The majority of American states enforce this rule. If the old tenant is still in possession when the new tenant arrives, the landlord has breached the lease. The new tenant has two alternative remedies. She may terminate the lease and sue the landlord for costs she incurs obtaining other accommodations. Or she may affirm the lease, refuse to pay rent for the period in which she cannot take possession, sue for the cost of other accommodations, and then take possession when the old tenant is finally evicted.

The **"American rule"** is more favorable to the landlord. (Although called the American rule, this is in fact the minority rule in this country—anything to keep you off balance.) This

rule holds that the landlord has no duty to deliver actual possession of the premises. If the previous tenant remains in possession, the landlord has not breached the lease. Under this rule, the new tenant generally has the power to act as a landlord toward the old tenant. The new tenant may evict the old tenant and recover damages caused by her delay in leaving. Alternatively, the new tenant may treat the holdover as a tenant at will for a new rental period and may charge the normal rent for that period.

Quiet Enjoyment

All tenants are entitled to quiet enjoyment of the premises, meaning the right to use the property without the interference of the landlord. Most leases expressly state this covenant of quiet enjoyment. And if a lease includes no such covenant, the law implies the right of quiet enjoyment anyway, so all tenants are protected. If a landlord interferes with the tenant's quiet enjoyment, he has breached the lease, entitling the tenant to damages.

The most common interference with quiet enjoyment is an **eviction**, meaning some act that forces the tenant to abandon the premises. Of course, some evictions are legal, as when a tenant fails to pay the rent. But some evictions are illegal. There are two types of eviction: actual and constructive.

Eviction
An act that forces a tenant to abandon the property.

Actual Eviction

If a landlord prevents the tenant from possessing the premises, he has actually evicted her. Suppose a landlord decides that a group of students are "troublemakers." Without going through lawful eviction procedures in court, the landlord simply waits until the students are out of the apartment and changes all the locks. By denying the students access to the premises, the landlord has actually evicted them and has breached their right of quiet enjoyment. He is liable for all expenses they suffer, such as retrieving their possessions, the cost of alternate housing, and moving expenses. In some states, he may be liable for punitive damages for failing to go through proper eviction procedures.

Even a partial eviction is an interference with quiet enjoyment. Suppose Louise rents an apartment with a storage room. If the landlord places his own goods in the storage room, he has partially evicted Louise because a tenant is entitled to the *exclusive* possession of the premises. In all states, Louise would be allowed to deduct from her rent the value of the storage space, and in many states, she would not be obligated to pay any rent for the apartment as long as the landlord continued the partial eviction.

Constructive Eviction

If a landlord substantially interferes with the tenant's use and enjoyment of the premises, he has constructively evicted her. Courts construe certain behavior as the equivalent of an eviction. In these cases, the landlord has not actually prevented the tenant from *possessing* the premises but has instead interfered so greatly with her *use and enjoyment* that the law regards the landlord's actions as equivalent to an eviction. Suppose the heating system in an apartment house in Juneau, Alaska, fails during January. The landlord, an avid sled dog racer, tells the tenants he is too busy to fix the problem. If the tenants move out, the landlord has constructively evicted them and is liable for all expenses they suffer.

To claim a constructive eviction, the tenant must vacate the premises. The tenant must also prove that the interference was sufficiently serious and lasted long enough that she was forced to move out. A lack of hot water for two days is not fatal, but lack of any water for two weeks creates a constructive eviction.

Other Interference

A landlord's conduct may interfere with quiet enjoyment even when it is not so harmful as to force a constructive eviction. Suppose a landlord, living in the ground-floor unit, gives trumpet lessons in his apartment six nights a week until 1:00 a.m., producing such a

cacophony that a group of students living upstairs can neither study nor sleep. If the students continue to live in the apartment because they cannot afford a better place, there has been no constructive eviction. But the landlord's conduct interferes with the tenants' quiet enjoyment, and the students are entitled to damages.

Duty to Maintain Premises

Historically, the common law placed no burden on the landlord to repair and maintain the premises. This made sense because rental property had traditionally been farmland. Buildings, such as a house or barn, were far less important than the land itself, and no one expected the landlord to fix a leaking roof. Today, the vast majority of rental property is used for housing or business purposes. Space in a building is frequently all that a tenant is renting, and the condition of the building is of paramount importance. Most states have changed the common law rule and placed various obligations on the landlord to maintain the property.

In most states, a landlord has a duty to deliver the premises in a habitable condition and a continuing duty to maintain the habitable condition. This duty overlaps with the quiet enjoyment obligation, but it is not identical. The tenant's right to quiet enjoyment focuses primarily on the tenant's *ability to use* the rented property. The landlord's duty to maintain the property focuses on whether the property *meets a particular legal standard*. The required standard may be stated in the lease, created by a state statute, or implied by law.

Lease

The lease itself generally obligates the landlord to maintain the exterior of any buildings and the common areas. If a lease does not do so, state law may imply the obligation.

A landlord's duty to maintain the premises may be stated in the lease, created by statute, or implied by law.

Building Codes

Many state and local governments have passed building codes, which mandate minimum standards for commercial and/or residential property. The codes are likely to be stricter for residential property and may demand such things as minimum room size, sufficient hot water, secure locks, proper working kitchens and bathrooms, absence of insects and rodents, and other basics of decent housing. Generally, all rental property must comply with the building code, whether the lease mentions the code or not.

Implied Warranty of Habitability

Students Maria Ivanow, Thomas Tecza, and Kenneth Gearin rented a house from Les and Martha Vanlandingham. The monthly rent was $900. But the roommates failed to pay any rent for the final five months of the tenancy. After they moved out, the Vanlandinghams sued. How much did the landlords recover? Nothing. The landlords had breached the implied warranty of habitability.

The implied warranty of habitability requires that a landlord meet all standards set by the local building code, or that the premises be fit for human habitation. Most states, though not all, *imply* this warranty of habitability, meaning that the landlord must meet this standard whether the lease includes it or not. In some states, the implied warranty means that the premises must at least satisfy the local building code. Other states require property that is "fit for human habitation," which means that a landlord

might comply with the building code, yet still fail the implied warranty of habitability if the rental property is unfit to live in.

The Vanlandinghams breached the implied warranty. The students had complained repeatedly about a variety of problems. The washer and dryer, which were included in the lease, frequently failed. A severe roof leak caused water damage in one of the bedrooms. Defective pipes flooded the bathroom. The refrigerator frequently malfunctioned, and the roommates repaired it several times. The basement often flooded, and when it was dry, rats and opossums lived in it. The heat sometimes failed.

The basement often flooded, and when it was dry, rats and opossums lived in it.

In warranty of habitability cases, a court normally considers the severity of the problems and their duration. If the defective conditions seriously interfere with the tenancy, the court declares the implied warranty breached and orders a **rent abatement;** that is, a reduction in the rent owed. The longer the defects continued and the greater their severity, the more the rent is abated. In the case of Maria Ivanow and friends, the court abated the rent 50 percent. The students had already paid more than the abated rent to the landlord, so they owed nothing for the last five months.[11]

Duty to Return Security Deposit

Most landlords require tenants to pay a security deposit, in case the tenant damages the premises. In many states, a landlord must either return the security deposit soon after the tenant has moved out or notify the tenant of the damage and the cost of the repairs. In addition, landlords are often obligated to credit tenants with interest earned on the deposit. In many states, a landlord who fails to return the deposit in a timely fashion can be forced to pay double or even triple damages to the tenant, a question raised in the following dispute.

Mishkin v. Young

107 P.3d 393, 2005 WL 452168
Supreme Court of Colorado, 2005

Facts: A Colorado statute required a landlord either to return a security deposit or provide an accounting of why money was being withheld. The landlord had to do this within one month of the tenant's surrender of the property, or up to 60 days if the lease permitted. If the landlord failed to refund the money, the tenant, after giving seven days' notice, could sue for treble damages. The landlord could avoid the treble damages by refunding the deposit within those seven days.

Marc Mishkin leased an apartment from Dean Young, paying a security deposit of $1,625. The lease stated that the deposit would be returned no later than 45 days after the tenant moved out. After Mishkin left, Young did not return the money. Forty-eight days after leaving, Mishkin sent a demand for the deposit, notifying Young that in seven days, he would sue for treble damages. Six days later, Young gave Mishkin a statement detailing $1,574.60 worth of property damage along with a check for $50.40.

[11] *Vanlandingham v. Ivanow*, 246 Ill. App. 3d 348, 615 N.E.2d 1361, 1993 Ill. App. LEXIS 985 (Ill. Ct. App. 1993).

Mishkin sued. The trial court ruled that Young was entitled to withhold the money because of the damages. Mishkin appealed. The appellate court ruled that the Colorado statute required the landlord to return the full security deposit within the seven-day period. Young appealed.

Issue: ***May a landlord avoid the treble damages by accounting for the security deposit within seven days of the tenant's notice to sue?***

Excerpts from Justice Kourlis's Decision: [Earlier] cases implicitly indicate that a landlord's failure to account for a security deposit as required by subsection (1) [of the statute] constitutes a forfeiture of all rights to withhold any portion of the deposit and subjects the landlord to treble damages. A landlord may avoid treble damages only by returning the entire security deposit during the seven days following a tenant's demand notice. An accounting during this seven-day period does not protect a landlord from treble damages because this period is beyond the statutory deadline of subsection (1) and the landlord has already forfeited all rights to retain the deposit. The purpose of the seven-day notice provision is to give landlords one last week to avoid treble damages by returning the security deposit. It does not give landlords a second chance to account for the deposit. The money actually belongs to the tenant; it was only security for the landlord, who has by unilateral action forfeited all right to retain any of it. Therefore, we now make explicit what has been implicit in our prior rulings: We hold that a landlord may not avoid treble damages by accounting for a security deposit during the seven-day period following a tenant's demand notice.

Contrary to the landlord's contention, our interpretation does not render the remaining provisions of the Act meaningless. Subsection (2) [which states that the landlord forfeits the entire deposit if he fails to return the money or account for it within the statutory period] performs a critical function by encouraging most landlords to expeditiously account for their tenants' security deposits. Yet the case may arise where a landlord finds forfeiture an insufficient inducement to account for the withholding of a tenant's security deposit. In such situations, the prospect of treble damages provided for by subsection (3) proves instrumental. Not only do treble damages act as a formidable deterrent to landlords who might otherwise wrongfully withhold a tenant's security deposit, but they also give tenants an enticing legal remedy where the alternative is to forgo a relatively small but often vital sum of money.

[Affirmed.]

Final Word on Security Deposits The discussion and case both concerned residential leases, where security deposits are almost inevitable. Note that, in a commercial lease, the tenant may have less statutory protection but more bargaining power. A financially sound company might negotiate a lease with no security deposit or perhaps offer a letter of credit for security instead of cash. The interest saved over several years could be substantial.

Tenant's Duties

Duty to Pay Rent

Rent
Compensation paid by a tenant to a landlord.

Rent is the compensation the tenant pays the landlord for use of the premises, and paying the rent is the tenant's foremost obligation. The lease normally specifies the amount of rent and when it must be paid. Typically, the landlord requires that rent be paid at the beginning of each rental period, whether that is monthly, annually, or otherwise.

Escalator clause
A lease clause allowing the landlord to raise the rent for specified reasons.

Both parties must be certain they understand whether the rent includes utilities such as heat and hot water. Some states mandate that the landlord pay certain utilities, such as water. Many leases include an **escalator clause**, permitting the landlord to raise the rent during the course of the lease if his expenses increase for specified reasons. For example, a tax escalator clause allows the landlord to raise the rent if his real estate taxes go up. Any escalator clause should state the percentage of the increase that the landlord may pass on to the tenant.

Landlord's Remedies for Nonpayment of Rent

If the tenant fails to pay rent on time, the landlord has several remedies. She is entitled to apply the security deposit to the unpaid rent. She may also sue the tenant for nonpayment of rent, demanding the unpaid sums, cost of collection, and interest. Finally, the landlord may evict a tenant who has failed to pay rent.

State statutes prescribe the steps a landlord must take to evict a tenant for nonpayment. Typically, the landlord must serve a termination notice on the tenant and wait for a court hearing. At the hearing, the landlord must prove that the tenant has failed to pay rent on time. If the tenant has no excuse for the nonpayment, the court grants an order evicting him. The order authorizes a sheriff to remove the tenant's goods and place them in storage, at the tenant's expense. However, if the tenant was withholding rent because of unlivable conditions, the court may refuse to evict.

EXAM Strategy

Question: Leo rents an apartment from Donna for $900 per month, both parties signing a lease. After six months, Leo complains about defects, including bugs, inadequate heat, and window leaks. He asks Donna to fix the problems, but she responds that the heat is fine and that Leo caused the insects and leaks. Leo begins to send in only $700 for the monthly rent. Donna repeatedly phones Leo, asking for the remaining rent. When he refuses to pay, she waits until he leaves for the day, then has a moving company place his belongings in storage. She changes the locks, making it impossible for him to re-enter. Leo sues. What is the likely outcome?

Strategy: A landlord is entitled to begin proper eviction proceedings against a tenant who has not paid rent. However, the landlord must follow specified steps, including a termination notice and a court hearing. Review the consequences for actual eviction, described in the section "Quiet Enjoyment."

Result: Donna has ignored the legal procedures for evicting a tenant. Instead, she engaged in *actual eviction*, which is quick, and in the short term, effective. However, by breaking the law, Donna has ensured that Leo will win his lawsuit. He is entitled to possession of the apartment, as well as damages for rent he may have been forced to pay elsewhere, injury to his possessions, and the cost of retrieving them. He may receive punitive damages as well. Bad strategy, Donna.

Duty to Mitigate

Pickwick & Perkins, Ltd., was a store in the Burlington Square Mall in Burlington, Vermont. Pickwick had a five-year lease but abandoned the space almost two years early and ceased paying rent. The landlord waited approximately eight months before renting the space to a new tenant and then sued, seeking the unpaid rent. Pickwick defended on the grounds that Burlington had failed to **mitigate damages,** that is, to keep its losses to a minimum by promptly seeking another tenant. Burlington argued that it had no legal obligation to mitigate. Burlington's position accurately reflected the common law rule, which permitted the landlord to let the property lie vacant and allow the damages to add up. But the common law evolves over time, and this time, the Vermont Supreme Court changed the rule. The judges pointed out that, historically, a lease was a conveyance of an estate, and property law had never required mitigation. However, the court asserted, a lease

is now regarded as both a contract and a conveyance. Under contract law, the nonbreaching party must make a reasonable effort to minimize losses, and that same rule applies, said the court, to a landlord. Burlington lost. The Vermont ruling is typical of current decisions, although some courts still do not require mitigation.[12]

Duty to Use Premises for Proper Purpose

A lease normally lists what a tenant may do in the premises and prohibits other activities. For example, a residential lease allows the tenant to use the property for normal living purposes, but not for any retail, commercial, or industrial purpose. A commercial lease might allow a tenant to operate a retail clothing store but not a restaurant. A landlord may evict a tenant who violates the lease by using the premises for prohibited purposes.

A tenant may not use the premises for any illegal activity, such as gambling or selling drugs. The law itself implies this condition in every lease, so a tenant who engages in illegal acts on the leased property is subject to eviction, regardless of whether the lease mentions such conduct.

Duty Not to Damage Premises

A tenant is liable to the landlord for any significant damage he causes to the property. The tenant is not liable for normal wear and tear. If, however, he knocks a hole in a wall or damages the plumbing, the landlord may collect the cost of repairs, either by using the security deposit or by suing, if necessary. A landlord may also seek to evict a tenant for serious damage to the property.

A tenant is permitted to make reasonable changes in the leased property so that he can use it as intended. Someone leasing an apartment is permitted to hang pictures on the wall. But a tenant leasing commercial space should make certain that the lease specifies the alterations he can make and whether he is obligated to return the premises to their original condition at the end of the lease.

Recall that a **fixture** is an item of personal property that is permanently attached to real estate. A furnace is a fixture, as are custom cabinets installed in a kitchen. The common law rule held that all fixtures belonged to the landlord. The contemporary trend, though, is the opposite. In commercial leases, it is common for tenants to install expensive equipment as part of their business, for example, commercial ovens in a restaurant. These are called **trade fixtures.** Most states permit commercial tenants to remove trade fixtures, provided the tenant restores the property to its original condition. In residential leases, some states still prohibit the tenant from removing a fixture, but courts today are likelier to permit removal, provided the tenant does not harm the premises in the process.

Duty Not to Disturb Other Tenants

Most leases, commercial and residential, include a covenant that the tenant will not disturb other tenants in the building. A landlord may evict a tenant who unreasonably disturbs others. The test is *reasonableness.* A landlord does not have the right to evict a residential tenant for giving one loud party but may evict a tenant who repeatedly plays loud music late at night and disturbs the quiet enjoyment of other tenants.

---

[12] *O'Brien v. Black,* 162 Vt. 448, 648 A.2d 1374, 1994 Vt. LEXIS 89 (1994).

INJURIES

You invite a friend to dinner in your rented home, but after the meal, she slips and falls, seriously injuring her back. Are you liable? Is the landlord?

Tenant's Liability

A tenant is generally liable for injuries occurring within the premises she is leasing, whether that is an apartment, a store, or otherwise. If a tenant permits grease to accumulate on a kitchen floor and a guest slips and falls, the tenant is liable. If a merchant negligently installs display shelving that tips onto a customer, the merchant pays for the harm. Generally, a tenant is not liable for injuries occurring in common areas over which she has no control, such as exterior walkways. If a tenant's dinner guest falls because the building's common stairway has loose steps, the landlord is probably liable.

Landlord's Liability

Common Law Rules

Historically, the common law held a landlord responsible for injuries on the premises only in a limited number of circumstances, which we will describe. In reading these common law rules, be aware that many states have changed them, dramatically increasing the landlord's liability.

Latent Defects If the landlord knows of a dangerous condition on the property and realizes the tenant will not notice it, the landlord is liable for any injuries. For example, if a landlord knows that a porch railing is weak and fails to inform the tenant, the landlord is responsible if the tenant plunges off the porch. But notice that, under the common law, if the landlord notifies the tenant of the latent defect, he is no longer liable.

Common Areas The landlord is usually responsible for maintaining the common areas, and along with this obligation may go liability for torts. As we saw above, if your guest falls downstairs in a common hallway because the stairs were defective, the landlord is probably liable.

Negligent Repairs Even in areas where the landlord has no duty to make repairs, if he volunteers to do so and does the work badly, he is responsible for resulting harm.

Public Use If the premises are to be used for a public purpose, such as a store or office, the landlord is generally obligated to repair any dangerous defects, although the tenant is probably liable as well. The purpose of this stricter rule is to ensure that the general public can safely visit commercial establishments. If a landlord realizes that the plate glass in a store's door is loose, he must promptly repair it or suffer liability for any injuries.

Modern Trend

Increasingly, state legislatures and courts are discarding the common law classifications described above and holding landlords liable under the normal rules of negligence law. **In many states, a landlord must use reasonable care to maintain safe premises and is liable for foreseeable harm.** For example, the common law rule merely required a landlord to notify a tenant of a latent defect, such as a defective porch railing. Most states now have building codes that require a landlord to maintain structural elements such as railings in safe condition. States further imply a warranty of habitability, which mandates reasonably safe living conditions. So, in many states, a landlord is no longer saved from negligence suits merely by giving notice of defects—he has to fix them.

Exculpatory Clauses

Exculpatory clause

A lease clause that relieves a landlord of liability for injuries.

You have found an apartment you can afford, in the right neighborhood, and the landlord presents you with a lease to sign. You notice an **exculpatory clause**, which states that the landlord is *not* liable for any injuries that occur on the rented premises, whether to you or your guests, regardless of the cause. You feel uncomfortable about the clause because it seems to suggest that the landlord can ignore serious defects and still escape liability. Should you sign the lease?

Today, **exculpatory clauses are generally void in residential leases.** Courts dislike such clauses because the parties typically have unequal bargaining power, and the goal of the law is to encourage safe housing managed by responsible landlords. So courts in many states simply ignore exculpatory clauses and apply normal rules of negligence to determine whether or not a landlord is liable for an injury. However, this is not universally the case; in some states, a court may still enforce an exculpatory clause in a residential lease. A concerned tenant should learn the local law before signing such a lease.

Chapter Conclusion

Real property law is ancient but forceful. Although real property today is not the dominant source of wealth that it was in medieval England, it is still the greatest asset that most people will ever possess—and is worth understanding.

When property is rented, a special relationship exists between landlord and tenant. Each has numerous obligations to the other. The current trend is clearly for expanded landlord liability, but how far that will continue is impossible to divine.

Exam Review

1. **REAL PROPERTY; FIXTURES** Real property includes land, buildings, air and subsurface rights, plant life, and fixtures. A fixture is any good that has become attached to other real property, such as land. (pp. 1088–1090)

EXAM Strategy

Question: Paul and Shelly Higgins had two wood stoves in their home. Each rested on, but was not attached to, a built-in brick platform. The downstairs wood stove was connected to the chimney flue and was used as part of the main heating system for the house. The upstairs stove, in the master bedroom, was purely decorative. It had no stovepipe connecting it to the chimney. The Higginses sold their house to Jack Everitt, and neither party said anything about the two stoves. Is Everitt entitled to either stove? Both stoves?

Strategy: An object is a fixture if a reasonable person would consider the item to be a permanent part of the property, taking into account attachment, adaptation, and other objective manifestations of permanence. (See the "Result" at the end of this section.)

2. **CONCURRENT ESTATES** When two or more people own real property at the same time, they have a concurrent estate. In both a tenancy in common and a joint tenancy, all owners have a share in the entire property. The primary difference is that joint tenants have the right of survivorship, meaning that when a joint tenant dies, his interest passes to the other joint tenants. A tenant in common has the power to leave her estate to her heirs. (pp. 1090–1093)

EXAM Strategy

Question: Howard Geib, Walker McKinney, and John D. McKinney owned two vacation properties as joint tenants with right of survivorship. The parties were not getting along well, and Geib petitioned the court to partition the properties. The trial court ruled that the fairest way to do this was to sell both properties and divide the proceeds. The two McKinneys appealed, claiming that a partition by sale was improper because it would destroy their right of survivorship. Comment.

Strategy: Do joint tenants have a right to partition? Are there any limits on that right? (See the "Result" at the end of this section.)

3. **FUTURE INTERESTS** Future interests are presently existing nonpossessory rights that may or may not develop later. (p. 1094)

4. **ADVERSE POSSESSION** Adverse possession permits the user of land to gain title if he can prove entry and exclusive possession, open and notorious possession, a claim adverse to the owner, and continuous possession for the required statutory period. (pp. 1097–1099)

5. **GOVERNMENT REGULATION** Nuisance law, zoning ordinances, and eminent domain all permit a government to regulate property and in some cases to take it for public use. (pp. 1099–1101)

6. **LANDLORD-TENANT** When an owner of a freehold estate allows another person temporary, exclusive possession of the property, the parties have created a landlord-tenant relationship. (pp. 1101–1102)

7. **TENANCIES** Any lease for a stated, fixed period is a tenancy for years. A periodic tenancy is created for a fixed period and then automatically continues for additional periods until either party notifies the other of termination. A tenancy at will has no fixed duration and may be terminated by either party at any time. A tenancy at sufferance occurs when a tenant remains, against the wishes of the landlord, after the expiration of a true tenancy. (pp. 1102–1104)

8. **QUIET ENJOYMENT** All tenants are entitled to the quiet enjoyment of the premises, without the interference of the landlord. (pp. 1105–1106)

9. **SECURITY DEPOSITS**. Landlords may require tenants to post a deposit that can be used to pay for repairs if a tenant damages the property. But many landlords fail to promptly return security deposits to tenants who leave no damage behind. In those cases, tenants are often able to sue for as much as three times their security deposit. (pp. 1107–1108)

10. RENT The tenant is obligated to pay the rent, and the landlord may evict for nonpayment. The modern trend is to require a landlord to mitigate damages caused by a tenant who abandons the premises before the lease expires. (pp. 1108–1109)

EXAM Strategy

Question: Loren Andreo leased retail space in his shopping plaza to Tropical Isle Pet Shop for five years, at a monthly rent of $2,100. Tropical Isle vacated the premises 18 months early, turned in the key to Andreo, and acknowledged liability for the unpaid rent. Andreo placed a "for rent" sign in the store window and spoke to a commercial real estate broker about the space. But he did not enter into a formal listing agreement with the broker, or take any other steps to rent the space, for about nine months. With approximately nine months remaining on the unused part of Tropical's lease, Andreo hired a commercial broker to rent the space. He also sued Tropical for 18 months' rent. Comment.

Strategy: When a tenant abandons leased property early, the landlord is obligated to mitigate damages. Did Andreo? (See the "Result" at the end of this section.)

11. DAMAGE A tenant is liable to the landlord for any significant damage he causes to the property. (p. 1110)

12. DISTURBANCES A tenant must not disturb other tenants. (p. 1110)

EXAM Strategy

Question: Doris Rowley rented space from the city of Mobile, Alabama, to run the Back Porch Restaurant. Her lease prohibited assignment or subletting without the landlord's permission. Rowley's business became unprofitable, and she asked the city's real estate officer for permission to assign her lease. She told the officer that she had "someone who would accept if the lease was assigned." Rowley provided no other information about the assignee. The city refused permission. Rowley repeated her requests several times without success, and finally she sued. Rowley alleged that the city had unreasonably withheld permission to assign and had caused her serious financial losses as a result. Comment.

Strategy: A landlord may not unreasonably refuse permission to assign a lease. Was the city's refusal unreasonable? (See the "Result" at the end of this section.)

13. PERSONAL INJURY At common law, a landlord had very limited liability for injuries on the premises, but today many courts require a landlord to use reasonable care and hold her liable for foreseeable harm. (pp. 1111–1112)

1. Result: A buyer normally takes all fixtures. The downstairs stove was permanently attached to the house and used as part of the heating system. The owner who installed it *intended* that it remain, and it was a fixture; Everitt got it. The upstairs stove was not permanently attached and was not a fixture; the sellers could take it with them.

2. Result: The McKinneys lost. Any co-tenant (including a joint tenant) has an absolute right to partition. Difficulties in partitioning are irrelevant.

10. Result: For about nine months, Andreo made no serious effort to lease the store. The court rejected his rent claim for that period, permitting him to recover unpaid money only for the period he made a genuine effort to lease the space.

12. Result: A landlord is allowed to evaluate a prospective assignee, including its financial stability and intended use of the property. Mobile could not do that because Rowley provided no information about the proposed assignee. Mobile wins.

Multiple-Choice Questions

1. Quick, Onyx, and Nash were deeded a piece of land as tenants in common. The deed provided that Quick owned one-half the property and Onyx and Nash owned one-quarter each. If Nash dies, the property will be owned as follows:
(a) Quick 1⁄2, Onyx 1⁄2
(b) Quick 5⁄8, Onyx 3⁄8
(c) Quick 1⁄3, Onyx 1⁄3, Nash's heirs 1⁄3
(d) Quick 1⁄2, Onyx 1⁄4, Nash's heirs 1⁄4

2. Which of the following forms of tenancy will be created if a tenant stays in possession of leased premises without the landlord's consent, after the tenant's one-year written lease expires?
(a) Tenancy at will
(b) Tenancy for years
(c) Periodic tendency
(d) Tenancy at sufferance

3. To be enforceable, a long-term residential real estate lease must:
(a) Require the tenant to obtain liability insurance
(b) Define the tenant's duty to mitigate
(c) Be in writing
(d) Specify a due date for rent
(e) All of the above

4. A tenant renting an apartment under a three-year written lease that does not contain any specific restrictions may be evicted for:
(a) Counterfeiting money in the apartment
(b) Keeping a dog in the apartment
(c) Failing to maintain a liability insurance policy on the apartment
(d) Making structural repairs to the apartment

5. A tenant's personal property will become a fixture and belong to the landlord if its removal would:
   (a) Increase the value of the personal property
   (b) Cause a material change to the personal property
   (c) Result in substantial harm to the landlord's property
   (d) Change the use of the landlord's property back to its prior use

Essay Questions

1. In 1944, W. E. Collins conveyed land to the Church of God of Prophecy. The deed said: "This deed is made with the full understanding that should the property fail to be used for the Church of God, it is to be null and void and property to revert to W. E. Collins or heirs." In the late 1980s, the church wished to move to another property and sought a judicial ruling that it had the right to sell the land. The trial court ruled that the church owned a fee simple absolute and had the right to sell the property. Comment.

2. Nome 2000, a partnership, owned a large tract of wilderness land in Alaska. The Fagerstrom family had used the property for camping and holidays since about 1944. In 1966, Charles and Peggy Fagerstrom marked off an area for a cabin and brought material to build the cabin, but never did so. In about 1970, they built a picnic area on the land, and in about 1974, they placed a camper trailer on the land, where it remained until the lawsuit. In 1987, Nome 2000 sued to eject the Fagerstroms from the land. The Fagerstroms had used the land only during the summer months. No one lived in the area during the winter months, when it was virtually uninhabitable. Has the family adversely possessed the land from Nome 2000?

3. **YOU BE THE JUDGE WRITING PROBLEM** Frank Deluca and his son David owned the Sportsman's Pub on Fountain Street in Providence, Rhode Island. The Delucas applied to the city for a license to employ topless dancers in the pub. Did the city have the power to deny the Delucas' request? **Argument for the Delucas:** Our pub is perfectly legal. Further, no law in Rhode Island prohibits topless dancing. We are morally and legally entitled to present this entertainment. The city should not use some phony moralizing to deny customers what they want. **Argument for Providence:** This section of Providence is zoned to prohibit topless dancing, just as it is zoned to bar manufacturing. There are other parts of town where the Delucas can open one of their sleazy clubs if they want to, but we are entitled to deny a permit in this area.

4. Kenmart Realty sued to evict Mr. and Ms. Alghalabio for nonpayment of rent and sought the unpaid monies, totaling several thousand dollars. In defense, the Alghalabios claimed that their apartment was infested with rats. They testified that there were numerous rat holes in the walls of the living room, bedroom, and kitchen, that there were rat droppings all over the apartment, and that on one occasion, they saw their toddler holding a live rat. They testified that the landlord had refused numerous requests to exterminate. Please rule on the landlord's suit.

5. Lisa Preece rented an apartment from Turman Realty, paying a $300 security deposit. Georgia law states: "Any landlord who fails to return any part of a security deposit which is required to be returned to a tenant pursuant to this article shall be liable to the tenant in the amount of three times the sum improperly withheld plus reasonable attorney's fees." When Preece moved out, Turman did not return her security deposit, and she sued for triple damages plus attorney's fees, totaling $1,800. Turman offered evidence that its failure to return the deposit was inadvertent and that it had procedures reasonably designed to avoid such errors. Is Preece entitled to triple damages? Attorney's fees?

Discussion Questions

1. The Estates is a suburb outside of Los Angeles. Local zoning ordinances require that lots be "at least 1 acre in size." Al owns a 1-acre lot in The Estates which has never been developed. He needs cash and wants to sell the property.

   Al finds a potential buyer who offers him $100,000 for the acre. But he also finds a pair of interested buyers who each offer him $75,000 for half of his acre. Al is furious that he cannot divide his acre and sell it to two buyers. "I need that extra $50,000," he rants. "It's my land, and I should be able to do what I want with it!"

   Do you sympathize with Al, or do you think the zoning restriction is reasonable?

2. Donny Delt and Sammy Sigma are students and roommates. They lease a house in a neighborhood near campus. Few students live on the block.

   The students do not have large parties, but they often have friends over at night. The friends sometimes play high-volume music in their cars and sometimes speak loudly when going to and from their cars. Also, departing late-night guests often leave beer cans and fast-food wrappers in the street.

   Neighbors complain about being awakened in the wee hours of the morning. They are considering filing a nuisance lawsuit against Donny and Sammy. Would such an action be reasonable? Do you think Donny and Sammy are creating a nuisance? If so, why? If not, where is the line—what amount of late-night noise does amount to a nuisance?

3. In 1966, Arketex Ceramic Corp. sold land in rural Indiana to Malcolm Aukerman. The deed described the southern boundary as the section line between sections 11 and 14 of the land. Farther south than this section line stood a dilapidated fence running east to west. Aukerman and Arketex both believed that this fence was the actual southern boundary of his new land, though in fact it lay on Arketex's property.

   Aukerman installed a new electrified fence, cleared the land on "his" side of the new fence, and began to graze cattle there. In 1974, Harold Clark bought the land that bordered Aukerman's fence, assuming that the fence was the correct boundary. In 1989, Clark had his land surveyed and discovered that the true property line lay north of the electric fence. Aukerman filed suit, seeking a court order that he had acquired the disputed land by adverse possession. The statutory period in Indiana is 20 years. Who wins? Who *ought* to win? Does adverse possession make sense as a social policy? Why or why not?

4. Imagine that you sign a lease and that you are to move into your new apartment on August 15. When you arrive, the previous tenant has not moved out. In fact, he has no intention of moving out. Compare the English and the American rules. Should the landlord be in charge of getting rid of the old tenant, or should you have the obligation to evict him?

5. When landlords wrongfully withhold security deposits, they can often be sued for three times the amount of the security deposit. Is this reasonable? Should a landlord have to pay $3,000 for a $1,000 debt? What if you fail to pay a rent on time? Should you have to pay three times the amount of your normal rent? If your answers to these two questions are different, why?

CHAPTER 44

© Steve Allen/Jupiterimages

PERSONAL PROPERTY AND BAILMENT

"My only child is a no-good thief," Riley murmurs sadly to his visitors. "He has always treated me contemptuously. Now he's been sentenced to five years for stealing from a children's charity. He is my only heir, but why should I leave him everything?"

> My only child is a no-good thief. He is my only heir, but why should I leave him everything?

Riley continues talking to his three guests: a bishop, a rabbi, and Earnest, a Boy Scout leader. "I have $500,000 in stocks and bonds in my bank deposit box. Tomorrow morning, I'm going to go down to the bank, take out all the papers, and hand them over to the Boy Scouts so that other kids won't turn out so bad." Everyone applauds his generosity, and they photograph Riley and Earnest shaking hands. But the following morning, on his way to the bank, Riley is struck by an ambulance and killed. A dispute arises over the money. The three witnesses assure the court that Riley was on his way to give the money to the Boy Scouts. From prison, the ne'er-do-well son demands the money as Riley's sole heir. Who wins? Personal property law holds the answer.

Personal property
All tangible property other than real property.

Personal property means all tangible property other than real property. In Chapter 43, we saw that real property is land and things firmly attached to it, such as buildings, crops, and minerals. All other physical objects are personal property—a bus, a toothbrush, a share of stock.

In this chapter, we look at several ways in which personal property can be acquired. In the section on gifts, we learn that Riley's no-good son gets the money. Riley intended to give the stocks and bonds to the Boy Scouts the following day, but he never completed a valid gift because he failed to *deliver* the papers. We will then turn to disputes over found property. And finally, we examine bailments, which occur when the owner of personal property permits another to possess it.

GIFTS

Gift
A voluntary transfer of property from one person to another, without consideration.

Donor
A person who gives property away.

Donee
A person who receives a gift of property.

A **gift** is a voluntary transfer of property from one person to another without any consideration. Recall from Chapter 12 that, for consideration to exist, parties must normally make an exchange. But a gift is a one-way transaction, without anything given in return. The person who gives property away is the **donor**, and the one who receives it is the **donee**.

A gift involves three elements:

- The donor *intends to transfer* ownership of the property to the donee immediately.
- The donor *delivers* the property to the donee.
- The donee *accepts* the property.

If all three elements are met, the donee becomes the legal owner of the property. If the donor later says, "I've changed my mind, give that back!" the donee is free to refuse.

Intention to Transfer Ownership

The donor must intend to transfer ownership to the property right away, immediately giving up all control of the item. Notice the two important parts of this element. First, the donor's intention must be to *transfer ownership;* that is, to give title to the donee. Merely proving that the owner handed you property does not guarantee that you have received a gift; if the owner only intended that you *use* the item, there is no gift, and she can demand it back.

Second, the donor must also intend the property to transfer *immediately*. A promise to make a gift in the future is unenforceable. Promises about future behavior are governed by contract law, and a contract is unenforceable without consideration. If Sarah hands Lenny the keys to a $600,000 yacht and says, "Lenny, it's yours," then it *is* his, since Sarah intends to transfer ownership right away. But if Sarah says to Max, "Next week, I'm going to give you my yacht," Max has not received a gift because Sarah did not intend an immediate transfer. Nor does Max have an enforceable contract since there is no consideration for Sarah's promise.

A *revocable gift* is governed by a special rule, and it is actually not a gift at all. Suppose Harold tells his daughter Faith, "The mule is yours from now on, but if you start acting stupid again, I'm taking her back." Harold has retained some control over the animal, which means he has not intended to transfer ownership. There is no gift, and no transfer of ownership. Harold still owns the mule.

When Dominic Tenaglia's automobile broke down, his brother Nick generously offered to give him a replacement car. Nick delivered a Chevrolet to Dominic, and both brothers understood that the car was a gift. Nick wrote "gift" on the car's certificate of title, but he did not immediately give the certificate to Dominic. A week later, while Dominic was driving the Chevrolet, he was involved in an accident. Both brothers had insurance, through different insurers, for cars they owned. The two companies disputed which one was liable for Dominic's accident. The court determined that Nick's company was still liable for any damage caused by the Chevrolet. Nick had presented the car to Dominic but had not relinquished *all* control over it. Ownership of a car is unlike ownership of a computer or a sweater because it requires

possession of the certificate of title. Because Nick still had the certificate at the time of the accident, he had the power to take back the Chevrolet whenever he wanted. He had not made a valid gift of the automobile, and Dominic's insurer won the case.[1]

Delivery

Physical Delivery

The donor must deliver the property to the donee. Generally, this involves physical delivery—a handoff, if you will. If Anna hands Eddie a Rembrandt drawing, saying "I want you to have this forever," she has satisfied the delivery requirement. In the chapter opening, Riley promised to give half a million dollars to the Boy Scouts the following day. But he never delivered the stocks and bonds, so there was no gift. The Boy Scouts received nothing, and all of the money became part of Riley's estate, to be inherited by his unworthy son.

Constructive Delivery

Physical delivery is the most common and the surest way to make a gift, but it is not always necessary. **A donor makes constructive delivery by transferring ownership without a physical delivery.** Most courts permit constructive delivery only when physical delivery is impossible or extremely inconvenient. Suppose Anna wants to give her niece Jen a blimp, which is parked in a hangar at the airport. The blimp will not fit through the doorway of Jen's dorm. Instead of flying the aircraft to the university, Anna may simply deliver to Jen the certificate of title and the keys to the blimp. When she has done that, Jen owns the aircraft.

Delivery to an Agent

A donor might deliver the property to an agent, either someone working for him or for the donee. Assume that Randolph says to Mortimer, "Old boy, I should like for you to have my Rolls Royce." If Randolph gives the keys and the title to his own butler, there is no gift. By definition, the agent works for the donor, and thus the donor still has control and ownership of the property. But if the donor delivers the property to the donee's agent, the gift is made. So, If Randolph delivers the car to Mortimer's butler, then Mortimer owns the car.

Property Already in Donee's Possession

Sometimes a donor decides to give property to a donee who already has possession of it. In that case, no delivery is required, and the donee need only demonstrate that the donor intended to transfer present *ownership*. Larry lends a grand piano to Leslie for the summer. At the end of the summer, Larry announces that she can keep the instrument. As long as Larry clearly intends that Leslie gets ownership of the piano, the gift is completed.

Inter Vivos Gifts and Gifts *Causa Mortis*

A gift can be either *inter vivos* or *causa mortis*. An ***inter vivos* gift** means a gift made "during life," that is, when the donor is not under any fear of impending death. The vast majority of gifts are *inter vivos*, involving a healthy donor and donee. Shirley, age 30 and in good health, gives Terry an eraser for his birthday. This is an *inter vivos* gift, which is absolute. The gift becomes final upon delivery, and the donor may *not* revoke it. If Shirley and Terry have a fight the next day, Shirley has no power to erase her eraser gift.

***Inter vivos* gift**
A gift made during the donor's life, with no fear of impending death.

A **gift *causa mortis*** is one made in contemplation of approaching death. The gift is valid if the donor dies as expected, but it is revoked if he recovers. Suppose Lenny's doctors have told him he will probably die of a liver ailment within a month. Lenny calls Jane to his bedside and hands her a fistful of cash, saying, "I'm dying, this money is yours." Jane sheds a tear, then

Gift *causa mortis*
A gift made in contemplation of approaching death.

[1]*Motorists Mutual Insurance Co. v. State Farm Mutual Automobile Insurance Co.*, 1990 Ohio App. LEXIS 3027 (Ohio Ct. App. 1990).

sprints to the bank. If Lenny dies of the liver ailment within a few weeks, Jane gets to keep the money. The law permits the gift *causa mortis* to act as a kind of substitute for a will since the donor's delivery of the property clearly indicates his intentions. But note that this kind of gift is revocable. Since a gift *causa mortis* is conditional (upon the donor's death), the donor has the right to revoke it at any time before he dies. If Lenny telephones Jane the next day and says that he has changed his mind, he gets the money back. Further, if the donor recovers and does not die as expected, the gift is automatically revoked.

Acceptance

The donee must accept the gift. This rarely leads to disputes, but if a donee should refuse a gift and then change her mind, she is out of luck. Her repudiation of the donor's offer means there is no gift, and she has no rights in the property.

EXAM Strategy

Question: Julie does good deeds for countless people, and many are deeply grateful. On Monday, Wilson tells Julie, "You are a wonderful person, and I have a present for you. I am giving you this baseball, which was the 500th home run hit by one of the great players of all time." He hands her the ball, which is worth nearly half a million dollars.

Julie's good fortune continues on Tuesday, when another friend, Cassandra, tells Julie, "I only have a few weeks to live. I want you to have this signed first edition of *Ulysses*. It is priceless, and it is yours." The book is worth about $200,000. On Wednesday, Wilson and Cassandra decide they have been foolhardy, and both demand that Julie return the items. Must she do so?

Strategy: Both of these donors are attempting to revoke their gifts. An *inter vivos* gift cannot be revoked, but a gift *causa mortis* can be. To answer the question, you must know what kind of gifts these were.

Result: A gift *causa mortis* is one made in fear of approaching death, and this rule applies to Cassandra. Such a gift is revocable any time before the donor dies, so Cassandra gets her book back. A gift *inter vivos* is one made without any such fear of death. Most gifts fall in this category, and they are irrevocable. Wilson was not anticipating his demise, so his was a gift *inter vivos*. Julie keeps the baseball.

The following case offers a combination of love, alcohol, and diamonds—always a volatile mix.

You be the Judge

ALBINGER V. HARRIS
2002 Mont. 118, 2002 WL 1226858
Montana Supreme Court, 2002

Facts: Michelle Harris and Michael Albinger lived together, on and off, for three years. Their roller-coaster relationship was marred by alcohol abuse and violence. When they announced their engagement, Albinger gave Harris a $29,000 diamond ring, but the couple broke off their wedding plans because of emotional and physical turmoil. Harris returned the ring. Later, they reconciled and resumed their marriage plans, and Albinger gave his fiancée the ring again. This cycle repeated several times over the three years. Each time they broke off their relationship, Harris returned the ring to Albinger, and each time they made up, he gave it back to her.

On one occasion, Albinger held a knife over Harris as she lay in bed, threatening to chop off her finger if she

didn't remove the ring. He beat her and forcibly removed the ring. Criminal charges were brought but then dropped when, inevitably, the couple reconciled. Another time, Albinger told her to "take the car, the horse, the dog, and the ring and get the hell out." Finally, mercifully, they ended their stormy affair, and Harris moved to Kentucky—keeping the ring.

Albinger sued for the value of the ring. The trial court found that the ring was a conditional gift, made in contemplation of marriage, and ordered Harris to pay its full value. She appealed. The Montana Supreme Court had to decide, in a case of first impression, whether an engagement ring was given in contemplation of marriage. (In Montana, and many states, neither party to a broken engagement may sue for breach of contract.)

You Be the Judge: ***Who owns the ring?***

Argument for Harris: The main problem with calling the ring a "conditional gift" is that there is no such thing. The elements of a gift are intent, delivery, and acceptance, and Harris has proven all three. A gift is not a contract, nor is it a loan. Once a gift has been accepted, the donor has no more rights in the property and may not demand its return. Hundreds of years of litigation have resulted in only one exception to this rule—a gift *causa mortis*—and despite some cynical claims to the contrary, marriage is not death. If this court carves a new exception to the long-standing rule, other unhappy donors will dream up more "conditions" that supposedly entitle them to their property. What is more, to create a special rule for engagement rings would be blatant gender bias because the exception would only benefit men. This court should stick to settled law and permit the recipient of a gift to keep it.

Argument for Albinger: The symbolism of an engagement ring is not exactly news. For decades, Americans have given rings—frequently diamond—in contemplation of marriage. All parties understand why the gift is made and what is expected if the engagement is called off: the ring must be returned. Albinger's *intent,* to focus on one element, was conditional—and Michelle Harris understood that. Each time the couple separated, she gave the ring back. She knew that she could wear this beautiful ring in anticipation of their marriage, but that custom and decency required its return if the wedding was off. She knew it, that is, until greed got the better of her and she fled to Kentucky, attempting to profit at the expense of Albinger's generosity. We are not asking for new law, but for confirmation of what everyone has known for generations: there is no wedding ring when there is no wedding.

The following table distinguishes between a contract and a gift:

A Contract and a Gift Distinguished	
A Contract:	
Lou: I will pay you $2,000 to paint the house, if you promise to finish by July 3.	Abby: I agree to paint the house by July 3, for $2,000.
Lou and Abby have a contract. Each promise is consideration in support of the other promise. Lou and Abby can each enforce the other's promise.	
A Gift:	
Lou hands Phil two opera tickets, saying: I want you to have these two tickets to *Rigoletto.*"	Phil says, "Hey, thanks."
This is a valid *inter vivos* gift. Lou intended to transfer ownership immediately and delivered the property to Phil, who now owns the tickets.	
Neither Contract nor Gift:	
Lou: You're a great guy. Next week, I'm going to give you two tickets to *Rigoletto.*	Jason: Hey, thanks.
There is no gift because Lou did not intend to transfer ownership immediately, and he did not deliver the tickets. There is no contract because Jason has given no consideration to support Lou's promise.	

FOUND PROPERTY

Dejected and ashamed, you walk to the university with your head hung low, knowing that your failure to study means you will fare poorly on today's quiz concerning *found property*. Suddenly, there is a gleam of light, not in your mind (which is vacant), but right there on the sidewalk. You stoop to pick it up—a ring! You stop in at the local jewelry shop, where you learn the ruby marvel is worth just over $7,000. Dazzled and delighted, you walk into the classroom and take the test. Question 1 reads: "A student discovers a ruby ring while walking to class. May the student keep the ring?" You have no idea what the answer is and you cannot concentrate anyway. So you write the two safest words in the law: "It depends." That is a fine start, but to learn the full answer, read on.

The law of found property has bewitched the courts of this country for nearly two centuries. Judges have made valiant attempts to base their rulings on principles of sound public policy, but the results have been confusing and contradictory. **The primary goal of the common law has been to get found property back to its proper owner, if possible.** The finder must make a good faith effort to locate the owner of the property and return the goods to him. In some states, the finder is obligated to notify the police of what she has found and entrust the property to them until the owner can be located or until a stated period has passed. **A second policy has been to reward the finder if no owner can be located.** But courts are loath to encourage trespassing, so finders who discover personal property on someone else's land generally cannot keep it. Those basic policies yield various outcomes, depending on the nature of the property. In the end, the law recognizes four kinds of found property:

- **Abandoned property** is something that the owner has knowingly discarded because she no longer wants it. A vase thrown into a garbage can is abandoned. Generally, a finder is permitted to keep abandoned property. But because the owner loses all rights in abandoned property, a court never *presumes* abandonment. The finder must prove that the owner intended to relinquish all rights.

- **Lost property** is something accidentally given up. A ring that falls off a finger into the street is lost property. Usually, the finder of lost property has rights superior to all the world except the true owner. If the true owner comes forward, he gets his property back; otherwise, the finder may keep it. However, if the finder has discovered the item on land belonging to another, the landowner is probably entitled to keep it.

- **Mislaid property** is something the owner has intentionally placed somewhere and then forgotten. A book deliberately placed on a bus seat by an owner who forgets to take it with her is mislaid property. Generally, the finder gets no rights in property that has simply been mislaid. If the true owner cannot be located, the mislaid item belongs to the owner of the premises where the item was found.

- **Treasure trove** is coins or currency concealed by an owner so long ago that it is likely the owner has died. A sackful of gold coins minted in 1860, found under the roots of a 150-year-old tree, is treasure trove. The finder can generally keep treasure trove.

Finding statutes
Laws that govern found property. Also known as estray statutes.

Many states have enacted laws, called **finding statutes** or **estray statutes**, governing found property. In some cases, the legislation incorporates the common law principles outlined above, but in other states, the new law modifies the old rules. A New York statute, for example, has removed the distinction between lost and mislaid property and now generally permits the finder to keep what he has discovered, regardless of where he found it. The finder is, however, required to turn over the property either to the police or the owner of the premises where the item was found. If the true owner is not located during a stated period, the finder is then entitled to whatever he found.

The following case has contributed significantly to modern legal ideas on found property. It may seem to come from a Charles Dickens novel, but it actually happened. A villainous goldsmith sought to take advantage of a poor chimney sweep's boy. Would he get away with it? Read on.

Landmark Case

ARMORIE V. DELAMIRIE

93 ER 664 Middlesex, 1722

Facts: Before Parliament banned the practice in 1840, many English chimney sweeps forced young children to climb the narrow flues and do the cleaning. Armorie was one such boy. But fortune smiled on him, and he found a jeweled ring. To discover its value, he carried the ring to a local goldsmith.

Armorie handed the ring to the goldsmith's apprentice, who removed the jewels from the ring and pretended to weigh it. He called out to the goldsmith that the ring was worth three halfpence. The goldsmith then offered that amount to Armorie.

Not being a fool, Armorie refused the offer and demanded that the ring be returned. The apprentice gave him the ring, but without the jewels.

Issue: ***Did the chimney sweep have a legal right to retain possession of the found jewels?***

Excerpts from Justice Pratt's Decision: The finder of a jewel, though he does not by such finding acquire an absolute property or ownership, has such a property as will enable him to keep it against all but the rightful owner. As to the value of the jewel, the Chief Justice directed the jury that unless the defendant did produce the jewel, and shew it not to be of the finest water, they should presume the strongest against him, and make the value of the best jewels the measure of their damages: which they accordingly did.

ACCESSION

Accession occurs when one person uses labor, materials, or both to add value to personal property belonging to another. This generally occurs by agreement. Suppose Leasing Corp. agrees to lease a truck to Delivery Co., for use in its business. The contract may permit Delivery to modify the truck's storage space to meet its special needs. If so, the agreement should also state whether Delivery has to return the truck to its original condition at the end of the lease and whether Delivery is entitled to any payment for improvements made.

Accession
Occurs when one person uses labor, materials, or both to add value to personal property belonging to another person.

Sometimes one party makes accessions without agreement. If the improvements can be "undone" without damage to the property, then the improver must do that. For example, if Delivery Co. simply bolts a few shelves into the truck, it should remove them before returning the truck. Problems arise when the improvements cannot be removed without damaging the property. Assuming the property has become more valuable, must the owner pay the improver for the work done? It normally depends upon whether the improver acted wrongfully, or merely made a mistake.

Wrongful Accessions

If the improver knows he is making accessions without authority, the owner may generally take the improved property without paying for the work done. Suppose the lease between Leasing Corp. and Delivery Co. states that Delivery may not modify the truck without

written permission. Delivery goes ahead anyway and reconfigures the truck to meet its needs. Even if the work substantially increases the truck's value, Leasing Corp. probably owes nothing for the accessions.

Mistaken Accessions

If the improver mistakenly believes he is entitled to add accessions, the owner probably has to pay for the increased value. Suppose that, based on its previous leases with Leasing Corp., Delivery Co. believes it has the right to modify its new truck, though in fact it has no such permission. If the modifications increase the value of the vehicle, Leasing probably has to pay for the accessions.

Bailment

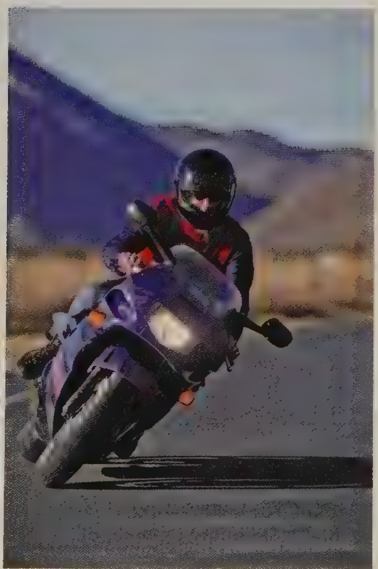
Bailment
The rightful possession of goods by one who is not the owner, usually by mutual agreement between the bailor and bailee.

A **bailment** is the rightful possession of goods by someone who is not the owner. The one who delivers the goods is the **bailor** and the one in possession is the **bailee.** Bailments are common. Suppose you are going out of town for the weekend and loan your motorcycle to Stan. You are the bailor, and your friend is the bailee. When you check your suitcase with the airline, you are again the bailor and the airline is the bailee. If you rent a car at your destination, you become the bailee while the rental agency is the bailor. In each case, someone other than the true owner has rightful, temporary possession of personal property.

Involuntary bailment
A bailment that occurs without an agreement between the bailor and bailee.

Parties generally create a bailment by agreement. In each of the examples above, the parties agreed to the bailment. In two cases, the agreement included payment, which is common but not essential. When you buy your airline ticket, you pay for your ticket, and the price includes the airline's agreement, as bailee, to transport your suitcase. When you rent a car, you pay the bailor for the privilege of using it. By loaning your motorcycle, you engage in a bailment without either party paying compensation.

A bailment without any agreement is called a **constructive,** or involuntary, **bailment**. Suppose you find a wristwatch in your house that you know belongs to a friend. As we saw in the section above, you are obligated to return the watch to the true owner, and until you do so, you are the bailee, liable for harm to the property. This is called a constructive bailment because, with no agreement between the parties, the law is *construing* a bailment.



Karl Weatherly/Getty Images
When you loan your motorcycle to Stan, you are the bailor and Stan is the bailee.

Control

To create a bailment, the bailee must assume physical control of an item with intent to possess. A bailee may be liable for loss or damage to the property, and so it is not fair to hold him liable unless he has taken physical control of the goods, intending to possess them.

Disputes about whether someone has taken control often arise in parking lot cases. When a car is damaged or stolen, the lot's owner may try to avoid liability by claiming it lacked control of the parked auto and therefore was not a bailee. If the lot is a "park and lock" facility, where the car's owner retains the key and the lot owner exercises *no control at all,* there is probably no bailment and no liability for damage.

By contrast, when a driver leaves her keys with a parking attendant, the lot clearly is exercising control of the auto, and the parties have created a bailment. The lot is probably liable for loss or damage in that case.

EXAM Strategy

Question: Jack arrives at Airport Hotel's valet parking area in a Ferrari, just as Kim drives up in her Smart Car. A valet drives Kim's car away, but the supervisor asks Jack to park the Ferrari himself, in the hotel's lot across the street. Jack parks as instructed, locking the Ferrari and keeping the keys. During the night, both vehicles are stolen. The owners sue for the value of their vehicles—about $10,000 for Kim's Smart Car and $350,000 for Jack's Ferrari. Each owner will win if there was a bailment but lose if there was not. Can either or both prove a bailment?

Strategy: To create a bailment, the bailee must assume physical control with intent to possess.

Result: When the valet drove Kim's car away, the hotel assumed control with intent to possess. The parties created a bailment, and the hotel is liable. But Jack loses. The hotel never had physical control of the Ferrari. Employees did not park the vehicle, and Jack kept the keys. Jack's was a "park and lock" case, with no bailment.

Rights of the Bailee

The bailee's primary right is possession of the property. **Anyone who interferes with the bailee's rightful possession is liable to her.** Suppose that, after you loan your motorcycle to Stan, Mel sees Stan park the bike, realizes Stan isn't the owner, rides the motorcycle away, and locks it up until you return. Mel is liable to Stan for any damages Stan suffered while deprived of transportation.

Even a bailor is liable if he wrongfully takes back property from a bailee. If a car agency rents Francine a car for a three-day weekend but then repossesses it for use elsewhere, it is liable to her for any damages, even though it owns the car. The bailor must abide by the agreement.

The bailee is typically, though not always, permitted to use the property. Obviously, a customer is permitted to drive a car rented from an agency. When a farmer loans his tractor to a neighbor, the bailee is entitled to use the machine for normal farm purposes. But some bailees have no authority to use the goods. If you store your furniture in a warehouse, the storage company is your bailee, but it has no right to curl up in your bed. The bailee may be entitled to compensation. This depends upon the agreement. If Owner leaves a power boat at the boatyard for repairs, the boatyard, a bailee, is entitled to payment for the work it does. As with any contract, the exact compensation should be clearly agreed upon before any work begins. If there is no agreement, the boatyard will probably receive the reasonable value of its services.

If you store your furniture in a warehouse, the storage company is your bailee, but it has no right to curl up in your bed.

Duties of the Bailee

The bailee is strictly liable to redeliver the goods on time to the bailor, or to whomever the bailor designates. Strict liability means there are virtually no exceptions. Rudy stores his $6,000 drum set with Melissa's Warehouse while he is on vacation. Blake arrives at the

warehouse and shows a forged letter, supposedly from Rudy, granting Blake permission to remove the drums. If Melissa permits Blake to take the drums, she will owe Rudy $6,000, even if the forgery was a high-quality job.

Due Care

The bailee is obligated to exercise due care. **The level of care required depends upon who receives the benefit of the bailment.** There are three possibilities:

- *Sole benefit of bailee.* If the bailment is for the sole benefit of the bailee, the bailee is required to use **extraordinary care** with the property. Generally, in these cases, the bailor loans something for free to the bailee. Since the bailee is paying nothing for the use of the goods, most courts consider her the only one to benefit from the bailment. If your neighbor loans you a power lawn mower, the bailment is probably for your sole benefit. You are liable if you are even slightly inattentive in handling the lawn mower and can expect to pay for virtually any harm done.
- *Mutual benefit.* When the bailment is for the mutual benefit of bailor and bailee, the bailee must use **ordinary care** with the property. Ordinary care is what a reasonably prudent person would use under the circumstances. When you rent a car, you benefit from the use of the car, and the agency profits from the fee you pay. When the airline hauls your suitcase to your destination, both parties benefit. Most bailments benefit both parties, and courts decide the majority of bailment disputes under this standard.
- *Sole benefit of bailor.* When the bailment benefits only the bailor, the bailee must use only **slight care.** This kind of bailment is called a **gratuitous bailment,** and the bailee is liable only for **gross negligence.** Sheila enters a pie-eating contest and asks you to hold her $14,000 diamond engagement ring while she competes. You put the ring in your pocket. Sheila wins the $20 first prize, but the ring has disappeared. This was a gratuitous bailment, and you are not liable to Sheila unless she can prove gross negligence on your part. If the ring dropped from your pocket or was stolen, you are not liable. If you used the ring to play catch with friends, you are liable.

Burden of Proof

In an ordinary negligence case, the plaintiff has the burden of proof to demonstrate that the defendant was negligent and caused the harm alleged. In bailment cases, the burden of proof is reversed. **Once the bailor has proven the existence of a bailment and loss or harm to the goods, a presumption of negligence arises, and the burden shifts to the bailee to prove adequate care.** This is a major change from ordinary negligence cases. Georgina's car is struck by another auto. If Georgina sues for negligence, it is her burden to prove that the defendant was driving unreasonably and caused the harm. By comparison, assume that Georgina rents Chance her sailboat for a month. At the end of the month, Chance announces that the boat is at the bottom of Lake Michigan. If Georgina sues Chance, she only needs to demonstrate that the parties had a bailment and that Chance failed to return the boat. The burden then shifts to Chance to prove that the boat was lost through no fault of his own. If Chance cannot meet that burden, Georgina recovers the full value of the boat.

The following case raises many of the issues in this section. Long before his time as president, Abraham Lincoln was a lawyer who argued more than 150 cases before the Supreme Court of Illinois. The case for Weedman is modeled after the arguments that a young Lincoln actually made.

You be the Judge

JOHNSON V. WEEDMAN

5 Ill. 495
Supreme Court of Illinois, 1843

Facts: Johnson left his horse with Weedman, paying him to board and feed the animal. Johnson did not grant Weedman permission to ride the horse. Nonetheless, Weedman took the horse for a 15-mile ride.

Later that day, the horse died. However, the trial court found that Weedman had not abused the animal and that the ride had not caused the horse's death. The court did not grant damages to Johnson, and Johnson appealed.

You Be the Judge: ***Should Weedman pay for Johnson's dead horse?***

Argument for Johnson: Your honor, Weedman was in possession of my client's horse only to feed him and see to his basic needs. My client did not give him permission to take the horse out of the pasture. Weedman made personal use of my client's property when he took a 15-mile ride that was in no way necessary. The trial court's finding that Weedman did not abuse the horse during the ride is irrelevant. My client must be compensated for the loss of his animal.

Argument for Weedman: My client had a legal right to possession of the horse. Riding the horse was not a substantial abuse of his rights as bailee. The horse was returned to the pasture in good condition. It was not abandoned and was not devalued in any way by the ride. The plaintiff is therefore not entitled to any compensation. The coincidental death of the horse does not change that fact.

Exculpatory Clauses

Bailees often use exculpatory clauses in an effort to limit their liability. Recall that an **exculpatory clause** is any part of a contract that attempts to relieve one of the parties of future liability. Exculpatory clauses are commonly employed in parking garages, coat check locations in restaurants, warehouses, suitcase lockers, and so forth. An exculpatory clause at a coat check counter might state that the restaurant is not responsible for any loss or damage to the customer's coat, for example. Are such clauses valid? That depends upon several factors.

Exculpatory clause
A contract clause that attempts to relieve one of the parties from future liability.

If the bailor is a corporation and it has bargaining power roughly equal to the bailee's, a court will probably enforce an exculpatory clause. If a manufacturer agrees to park five of its aircraft in a hangar owned by Hannah Corp., and Hannah's storage contract states that it is not responsible for any losses caused by fire, flood, or hurricane, then Hannah is probably protected when fire destroys the manufacturer's planes. Both parties are businesses, and the law assumes they should live with whatever agreement they bargained for. However, even if the parties have equal bargaining power, an exculpatory clause is generally unenforceable if it attempts to exclude an intentional tort or reckless behavior.

When the bailor is a consumer, the exculpatory clause stands on shaky ground because judges generally presume the parties have unequal bargaining power. Courts look to see whether the clause was clearly written and easily visible.

EXAM Strategy

Question: A producer shot a low-budget horror movie and then delivered 10 reels of negative film to Filmprocess Corp, for processing. Filmprocess lost the reels. The producer sued for $5 million, the cost of production. Filmprocess based its defense on an exculpatory clause in the parties' contract, which stated that the producer accepted

the full risk of loss for any film delivered to Filmprocess and that the producer would insure against such loss. Who will win the lawsuit?

Strategy: The producer delivered its film to Filmprocess. What relationship did that create? A bailment is the rightful possession of goods by one who is not the owner. The parties have created a bailment. Are exculpatory clauses enforced in bailments? If the bailor is a corporation and it has bargaining power roughly equal to the bailee's, a court will probably enforce a bailment exculpatory clause, except in cases of intentional tort or gross negligence.

Result: The producer will lose its claim for $5 million. Both parties were corporations, with roughly equal bargaining power, and the exculpatory clause is valid. There was no intentional tort or gross negligence, so the clause will be enforced.

The following case arises in a familiar setting and indicates the wide reach of bailment principles.

Tannenbaum v. New York Dry Cleaning, Inc.

2001 N.Y. Slip Op. 40076 (U), 2001 WL 913272
Civil Court of the City of New York, 2001

Facts: When Rob Tannenbaum picked up his $160 shirt at the dry cleaners, he found it badly torn. He sued, claiming negligence. New York Cleaners denied causing the tearing. In addition, the cleaner claimed that even if the company damaged the shirt, an exculpatory clause on the back of the ticket limited its liability to 10 times the cleaning fee of $2, or $20.

Issues: ***Was the cleaner negligent? If so, did the exculpatory clause limit the company's liability?***

Excerpts from Judge Samuels' Decision: To the customer, it doesn't seem reasonable that he should be able to recover only $20 for the destruction of the $160 shirt he took to the dry cleaner to be laundered.

The Limitation Clause reads as follows:

> In laundering, we cannot guarantee against color loss, and shrinkage; or against damage to weak and tender fabrics. The company's liability with respect to any lost article shall not exceed 10 times our charge for processing it.

The foregoing is printed in gray type, against a light yellow background, and is significantly more difficult for a person with good eyesight to read than the text on the front of the claim ticket.

This case is clearly one of bailment for hire. When a bailee is unable to return the bailed item, or (as here) returns it in damaged condition, a rebuttable presumption arises that the loss of, or damage to, the item is attributable to the bailee's negligence.

At trial, Defendant denied that the Shirt had been damaged while in its care, but did not offer, in the alternative, any explanation negating the presumption of negligence. Accordingly, Defendant is liable for negligence, unless its disclaimer is effective.

New York law has long disfavored exculpatory clauses that relieve a party to a contract from liability for the consequences of its own negligence. The law's disfavor has been expressed in strict requirements that the disclaimer of liability for negligence be made explicit and be communicated in such a way as to ensure that the party who is to be bound by the disclaimer has knowingly accepted such disclaimer.

It appears that Defendant sought to enjoy the protections of a disclaimer without alarming its customers by causing them actually to contemplate the Limitation Clause. Defendant offered no evidence that it had taken any steps to call Claimant's attention to its terms beyond giving him the Claim Ticket. [T]he Court finds that Claimant was not aware of, and did not assent to be bound by, the Limitation Clause.

Claimant is awarded judgment in the amount of $160, plus interest and costs.

Rights and Duties of the Bailor

The bailor's rights and duties are the reverse of the bailee's. The bailor is entitled to the return of his property on the agreed-upon date. He is also entitled to receive the property in good condition and to recover damages for harm to the property if the bailee failed to use adequate care.

Liability for Defects

Depending upon the type of bailment, the bailor is potentially liable for known or even unknown defects in the property. **If the bailment is for the sole benefit of the bailee, the bailor must notify the bailee of any known defects.** Suppose Megan lends her stepladder to Dave. The top rung is loose and Megan knows it, but she forgets to tell Dave. The top rung crumbles, and Dave falls onto his girlfriend's iguana. Megan is liable to Dave and the girlfriend unless the defect in the ladder was obvious. Notice that Megan's liability is not only to the bailee, but also to any others injured by the defects. Megan would not be liable if she had notified Dave of the defective rung.

In a mutual-benefit bailment, the bailor is liable not only for known defects but also for unknown defects that the bailor could have discovered with reasonable diligence. Suppose RentaLot rents a power sander to Dan. RentaLot does not realize that the sander has faulty wiring, but a reasonable inspection would have revealed the problem. When Dan suffers a serious shock from the defect, RentaLot is liable to him, even though it was unaware of the problem.

If the bailor is in the business of renting property, the bailment is probably subject to implied warranties. As we saw in Chapter 22 on product liability, the Uniform Commercial Code creates various implied warranties for goods sold or leased by a merchant. Recall that a merchant is someone in the business of selling or leasing that type of goods. A car rental company is a merchant with respect to its cars, so it rents the autos subject to implied warranties that they are fit for their normal purposes. Because these warranties are implied by law, they normally exist whether the parties say anything about them or not. Bailors may attempt to limit these implied warranties by provisions in the bailment agreement, but courts disfavor such limitations, especially when the bailee is a consumer.

Common Carriers and Contract Carriers

A carrier is a company that transports goods for others. It is a bailee of every shipment entrusted to it. There are two kinds of carriers: common carriers and contract carriers. The distinction is important because each type of company has a different level of liability.

A **common carrier** makes its services available on a regular basis to the general public. For example, a trucking company located in St. Louis that is willing to haul freight for anyone, to any destination in the country, is a common carrier. **Generally, a common carrier is strictly liable for harm to the bailor's goods.** Common carriers are governed by a statute known as the Carmack Amendment.[2] Under this law, a bailor needs only to establish that it delivered property to the carrier in good condition and that the cargo arrived damaged. The carrier is then liable unless it can show that it was not negligent *and* that the loss was caused by an act of God (such as a hurricane), an act of a public enemy (a nation at war with the United States), an act of the bailor itself (for example, by packaging the goods improperly), an act of a public authority (for example, a state inspector forcing a delay), or the inherent nature of the goods (such as fruit that spoiled naturally). These defenses are difficult to prove, and in most cases, a common carrier is liable for harm to the property.

Common carrier
A company that transports goods and makes its services regularly available to the general public.

A common carrier is, however, allowed to limit its liability by contract. For example, a common carrier might offer the bailor the choice of two shipping rates: a low rate, with a

[2] 49 U.S.C. §11707.

© Ryan McVay/Jupiterimages

In some states, there is a limit on a hotel's liability.

Contract carrier
A company that transports goods for particular customers.

maximum liability, say, of $10,000, or a higher shipping rate, with full liability for any harm to the goods. In that case, if the bailor chooses the lower rate, the limitation on liability is enforceable. Even if the bailor proves a loss of $300,000, the carrier owes merely $10,000.

A **contract carrier** does not make its services available to the general public but engages in continuing agreements with particular customers. Assume that Steel Curtain Shipping is a trucking company in Pittsburgh that hauls cargo to California for two or three steel producers and carries manufactured goods from California to Pennsylvania and New York for a few West Coast companies. Steel Curtain is a contract carrier. **A contract carrier does not incur strict liability.** The normal bailment rules apply, and a contract carrier can escape liability by demonstrating that it exercised due care of the property.

Innkeepers

Hotels, motels, and inns frequently act as bailees of their guests' property. Most states have special innkeeper statutes that regulate liability.

Hotel patrons often assume that anything they bring to a hotel is safe. But some state innkeeper statutes impose an absolute limit on a hotel's liability. Other statutes require guests to leave valuables in the inn's safe deposit box. And even that may not be enough to protect them fully. For example, a state statute might require the guest to register the nature and value of the goods with the hotel. These statutes are designed to limit risk—but of course, some people *like* risk. In the following case, a high-stakes gambler placed a large bet ... on his hotel dresser.

GNOC Corp. v. Powers

2006 WL 560687 N.J. Superior Court, Appellate Division, 2006

Facts: David Powers liked to wager. He and a friend arrived at the Hilton Casino in Atlantic City for a two-day stay. It was Powers' fourth visit to the hotel. They checked in at the front desk and received electronic room keys. Clearly visible signs, posted there and in each room, notified guests that the hotel was not responsible "for valuables or other property left in room," and that the hotel had a safe for valuables.

Powers won $76,000, which he converted into $25,000 cash, 10 gray chips worth $5,000 each, and 1 white $1,000 chip. He and his friend retired to their rooms. During the night, both Powers and his friend had various room service deliveries. Sometime before he went to bed, Powers placed his cash, chips, and a money clip on the dresser. At 4:19 a.m., the front desk issued a second key to Powers's room to an unknown person. Powers awoke to discover that his cash, chips, and clip were gone.

Powers ended up $25,000 in debt to the casino, and when he refused to pay, the hotel sued. Powers claimed that the Hilton owed him $76,000 for the stolen merchandise. The trial judge ruled in favor of the Hilton based on New Jersey's innkeeper statute, which states:

> If the proprietor of any hotel shall provide a safe or other depository in the hotel's office or in another convenient place, for the safekeeping of *any valuables belonging to guests* of the hotel, and shall place, in a conspicuous position in the room or rooms occupied by each guest, a notice stating the fact that a safe is provided in which valuables may be deposited, and any guest shall neglect to deliver valuables to the person in charge of the safe, the proprietor shall not be liable in any sum for the loss of valuables sustained by that guest, by theft or otherwise. . . . "Valuables" *includes* money, bank notes, bonds, precious stones, jewelry, ornaments [etc] and *any other articles of similar value.*

Powers appealed.

Issue: ***Did the innkeeper statute protect the hotel?***

Excerpts from the *Per Curiam* decision: It is defendant's contention that because casino chips are not specifically enumerated in [the innkeeper statute] and are not items of value as they are merely an accounting mechanism to evidence a debt owed by the casino, [the statute] does not apply to them. Further, he asserts that the chips do not "belong to guests," pointing to [a related statute] which provides:

> Each gaming chip and plaque is solely evidence of a debt that the issuing casino licensee owes to the person legally in possession of the gaming chip or plaque, and *shall remain in the property of the issuing casino licensee.*

To be sure, casino chips are not specifically listed as one of the enumerated items in the definition of "valuables." But the list is not exhaustive, as it is preceded by the word "includes" and followed by the words "any other articles of similar value." Included under the statutory definition of valuables are "money, bank notes, bonds, securities, checks, business papers, documents." As the motion judge observed: "While the statute may not say casino chips, it does have in there the things that have, like chips, no intrinsic value of their own [but] are evidence of either value or debt." And too, although the hotel owns the chips, while they are in the possession of the guest they belong to that guest until redeemed for cash.

So too, defendant's reliance upon [an earlier case called *Heinz*] is misplaced. *Heinz* concerned strict compliance with the statutorily required notice. Here, defendant concedes that the Hilton complied with the statutory notice requirements. Where, as here, a hotel is in strict compliance with the notice requirements, the Act operates as a bar to plaintiff's recovery.

Affirmed.

Chapter Conclusion

Personal property law plays an almost daily role in all of our lives. The manager of a dry cleaning company, the finder of lost property, and a bank officer who rents safe deposit boxes must all realize that they could incur substantial liability for personal property, whether they intend to accept that obligation or not. Understanding personal property law can be worth a lot of chips—but do not leave them lying around your hotel room.

Exam Review

1. **GIFTS** A gift is a voluntary transfer of property from one person to another without consideration. The elements of a gift are intention to transfer ownership immediately, delivery, and acceptance. (pp. 1120–1123)

2. **FOUND PROPERTY** The finder of property must attempt to locate the true owner unless the property was abandoned. State estray statutes have made some changes in the common law, but the following principles generally govern:

    - Abandoned property—the finder may keep it.
    - Lost property—the finder generally has rights superior to everyone but the true owner, except that if she found it on land belonging to another, the property owner generally is entitled to it.
    - Mislaid property—generally, the finder has no rights in the property.
    - Treasure trove—generally, the finder may keep it. (pp. 1124–1125)

EXAM Strategy

Question: The government accused Carlo Francia and another person of stealing a purse belonging to Frances Bainlardi. A policeman saw Francia sorting through the contents of the purse, which included a photo identification of Bainlardi. Francia kept some items, such as cash, while discarding others. At trial, Francia claimed that he had thought the purse was lost or abandoned. Besides the fact that Francia's accomplice was holding burglary tools, what is the weakness in Francia's defense?

Strategy: The finder of property must attempt to locate the true owner unless the property was abandoned. Is there any likelihood that the purse was abandoned? If it was not abandoned, did Francia attempt to locate the owner? (See the "Result" at the end of this section.)

3. **ACCESSION** Accession occurs when one person uses labor, materials, or both to add value to personal property belonging to another. If the improver knows he is making accessions without authority, the owner may generally take the improved property without compensating for the work done. If the improver mistakenly believes that he is entitled to add accessions, the owner probably has to pay for the increased value. (pp. 1125–1126)

4. **BAILMENT** A bailment is the rightful possession of goods by one who is not the owner. The one who delivers the goods is the bailor, and the one in possession is the bailee. To create a bailment, the bailee must assume physical control with intent to possess. (pp. 1127–1133)

5. **BAILEE'S RIGHTS** The bailee is always entitled to possess the property, is frequently allowed to use it, and may be entitled to compensation. (p. 1127)

6. **REDELIVERY** The bailee is strictly liable to redeliver the goods to the bailor. (pp. 1127–1128)

EXAM Strategy

Question: Shannon borrows Marty's car, but when she returns the auto, she hands the keys to Scott, who claims he is Marty's brother. Scott offers a driver's license and passport to reassure Shannon. Scott is actually a con artist. Marty sues Shannon. Outcome?

a. Marty will win.

b. Marty will win only if a *reasonable person* would have spotted the fraud.

c. Marty will win only if he in fact has no brother named Scott.

d. Marty will lose because Scott offered reasonable identification.

Strategy: Make sure you know the standard a bailee must meet for redelivering goods. (See the "Result" at the end of this section.)

7. **BAILEE'S DUTY OF CARE** The bailee is obligated to exercise due care. The level of care required depends upon who receives the benefit of the bailment: if the bailee is the sole beneficiary, she must use extraordinary care; if the parties mutually benefit, the bailee must use ordinary care; and if the bailor is the sole beneficiary of the bailment, the bailee must use only slight care. (p. 1128)

8. PRESUMPTION OF NEGLIGENCE Once the bailor has proven the existence of a bailment and loss, a presumption of negligence arises, and the burden shifts to the bailee to prove adequate care. (pp. 1128–1129)

Question: Lonny Joe owned two rare 1955 Ford Thunderbird automobiles, one red and one green, both in mint condition. He stored the cars in his garage. His friend Stephanie wanted to use the red car in a music video, so Lonny Joe rented it to her for two days, for $300 per day. When she returned the red car, Lonny Joe discovered a long scratch along one side. That same day, he noticed a long scratch along the side of the green car. He sued Stephanie for harm to the red car. Lonny Joe sued an electrician for damage to the green car, claiming that the scratch occurred while the electrician was fixing a heater in the garage. Explain the different burdens of proof in the two cases.

Strategy: In an ordinary negligence case, the plaintiff must prove all elements by a preponderance of the evidence. However, in a bailment, a *presumption* of negligence arises. To answer this question, you need to know whether Lonny Joe established a bailment with either or both defendants. (See the "Result" at the end of this section.)

9. EXCULPATORY CLAUSES Exculpatory clauses, seeking to relieve a bailee of liability for damage to the goods, may be enforced between two corporations of equal bargaining power but are seldom enforced against a consumer. (pp. 1129–1130)

10. DEFECTS The bailor must keep the property in suitable repair, free of any hidden defects. If the bailor is in the business of renting property, the bailment is probably subject to implied warranties. (p. 1131)

11. COMMON CARRIERS Generally, a common carrier is strictly liable for harm to the bailor's goods. A contract carrier incurs only normal bailment liability. (pp. 1131–1132)

12. INNKEEPERS The liability of an innkeeper is regulated by state statute. A guest intending to store valuables with an innkeeper must follow the statute to the letter. (pp. 1132–1133)

2. Result: Abandoned property is something that the owner has knowingly discarded because she no longer wants it. The burden is on the finder to prove that the property was abandoned, which will be impossible in this case since no one would throw away cash and credit cards. Because the purse contained photo identification, Francia could easily have located its owner. He made no attempt to do so, and his defense is unpersuasive.

6. Result: The bailee is strictly liable to redeliver the goods to the bailor. There are no excuses. The "reasonable person" standard does not apply. The correct answer is (a).

8. Result: Lonny Joe had no bailment with the electrician because the electrician never assumed control of the car. To win that case, Lonny Joe must prove that the electrician behaved unreasonably and caused the scratch. However, when Lonny Joe rented Stephanie the red car, the parties created a bailment, and the law *presumes* Stephanie caused the damage unless she can prove otherwise. That is a hard burden, and Stephanie will likely lose.

Multiple-Choice Questions

1. Which of the following requirements must be met to create a bailment?

I. Delivery of personal property to the intended bailee

II. Possession by the intended bailee

(a) I only

(b) II only

(c) Both I and II

(d) None of the above

2. Consider the following:

I. A house (value: $150,000)

II. A giant high-definition television in the house (value: $4,999)

III. The land that the house sits upon (value: $30,000)

IV. An old car in the house's garage (value: $5,001)

How many of these items are personal property?

(a) All four of them

(b) Three of them

(c) Two of them

(d) One of them

(e) None of them

3. Holding out an envelope, Alan says, "Ben, I'm giving you these opera tickets." Without taking the envelope, Ben replies, "Why would I want opera tickets? Loser." Alan leaves, crestfallen. Later that day, a girl whom Ben has liked for some time says, "I sure wish I were going to the opera tonight." Ben scrambles, calls Alan, and says, "Alan, old buddy, I accept your gift of the opera tickets. I'm on my way over to pick them up."

Does Ben have a legal right to the tickets?

(a) Yes, because Alan intended to transfer ownership

(b) Yes, because offers to give gifts cannot be revoked

(c) No, because no consideration was given

(d) No, because Ben did not accept the gift when offered

4. Gina has season tickets to Cardinals games. One Monday, she promises to give her tickets to Friday's game to Ed, a friend who works across town. On Tuesday, Gina hands the tickets to Al, an administrative assistant. An hour later, when Al still has the tickets and has not given them to Ed, Gina returns. "Sorry," she says, "but my cousins are coming to town this weekend. I'll need those tickets back." Gina is entitled to get the tickets back if Al works for ...

(a) Gina

(b) Ed

(c) Both A and B

(d) None of the above

5. Craig finds a rare 1955 double-date penny, worth $4,000, on a city sidewalk outside a coin collectors' convention. The penny is ____________ property. If the true owner cannot be found, then the penny will belong to ____________.
   (a) lost, Craig
   (b) lost, the city
   (c) abandoned, Craig
   (d) abandoned, the city
   (e) mislaid, Craig

Essay Questions

1. During her second year at the Juilliard School of Music in New York City, Ann Rylands had a chance to borrow for one month a rare Guadagnini violin made in 1768. She returned the violin to the owner in Philadelphia, but then she telephoned her father to ask if he would buy it for her. He borrowed money from his pension fund and paid the owner. Ann traveled to Philadelphia to pick up the violin. She had exclusive possession of the violin for the next 20 years, using it in her professional career. Unfortunately, she became an alcoholic, and during one period when she was in a treatment center, she entrusted the violin to her mother for safekeeping. At about that time, her father died. When Ann was released from the center, she requested return of the violin, but her mother refused. Who owns the violin?

2. Ronald Armstead worked for First American Bank as a courier. His duties included making deliveries between the bank's branches in Washington, D.C. Armstead parked the bank's station wagon near the entrance of one branch in violation of a sign saying: "No Parking—Rush Hour Zone." In the rear luggage section of the station wagon were four locked bank dispatch bags containing checks and other valuable documents. Armstead had received tickets for illegal parking at this spot on five occasions. Shortly after Armstead entered the bank, a tow truck arrived and its operator prepared to tow the station wagon. Transportation Management, Inc., operated the towing service on behalf of the District of Columbia. Armstead ran out to the vehicle and told the tow truck operator that he was prepared to drive the vehicle away immediately. But the operator drove away with the station wagon in tow. One-and-a-half hours later, a bank employee paid for the car's release, but one dispatch bag, containing documents worth $107,000, was missing. First American sued Transportation Management and the District of Columbia. The defendants sought summary judgment, claiming they *could not* be liable. Were they correct?

3. During the Great Depression of the 1930s, the federal government's Works Progress Administration hired artists to create public works of art. The goal was to provide employment and beautify the nation. The artist James Daugherty painted six murals on the walls of the public high school in Stamford, Connecticut. During the 1970s, the city began to restore its high school. The architect and school officials agreed that the Daugherty murals should be preserved. They arranged for the construction workers to remove the murals to prevent harm. By accident, the workers rolled them up and placed them near the trash dumpsters for disposal. A student found the murals and took them home, and later notified the federal government's General Services Administration (GSA) of his find. The GSA arranged to transport the murals to an art

restorer named Hiram Hoelzer for storage and eventual restoration, when funds could be arranged. Over *19 years* went by before anyone notified the Stamford School system where the murals were. In the meantime, neither the GSA nor anyone else paid Hoelzer for the storage or restoration. By 1989, the murals were valued at $1.25 million by Sotheby's, an art auction house. Hoelzer filed suit, seeking a declaration that the murals had been abandoned. Were they abandoned? What difference would that make when determining ownership?

4. Marjan International Corp. sells handmade Oriental rugs. V. K. Putman, Inc., is a Montana trucking company. Marjan delivered valuable rugs to Putman for shipment from New York City to Tacoma, Washington. Unfortunately, there were several delays in transit. The truck driver encountered snowstorms and closed roads. His truck also overheated and required repairs in a garage. Before the driver resumed the trip, he stopped to pick up and load other goods. When the truck finally arrived in Tacoma, two bales of rugs were missing. Marjan sued on the grounds that Putman was a common carrier, but Putman claimed it was a contract carrier. What difference does it make whether Putman was a common carrier or a contract carrier, and how is that determined?

5. **YOU BE THE JUDGE WRITING PROBLEM** Eileen Murphy often cared for her elderly neighbor, Thomas Kenney. He paid her $25 per day for her help and once gave her a bank certificate of deposit worth $25,000. She spent the money. Murphy alleged that shortly before his death, Kenney gave her a large block of shares in three corporations. He called his broker, intending to instruct him to transfer the shares to Murphy's name, but the broker was ill and unavailable. So Kenney told Murphy to write her name on the shares and keep them, which she did. Two weeks later, Kenney died. When Murphy presented the shares to Kenney's broker to transfer ownership to her, the broker refused because Kenney had never endorsed the shares as the law requires—that is, signed them over to Murphy. Was Murphy entitled to the $25,000? To the shares? **Argument for Murphy:** The purpose of the law is to do what a donor intended, and it is obvious that Kenney intended Murphy to have the $25,000 and the shares. Why else would he have given them to her? A greedy estate should not be allowed to interfere with the deceased's intentions. **Argument for the Estate:** Murphy is not entitled to the $25,000 because we have no way of knowing what Kenney's intentions were when he gave her the money. She is not entitled to the shares of stock because Kenney's failure to endorse them over to her meant he never *delivered* them, and that is an essential element of a gift.

Discussion Questions

1. Consider revocable gifts. The example early in the chapter was, "The mule is yours from now on, but if you ever start acting stupid again, I'm taking her back." In such a case, the giver still owns the mule and can take it back at any time. Is this reasonable? Should stating a condition "cancel" a gift, or should the gift recipient in this example own the mule?

2. Is it sensible to distinguish between *inter vivos* gifts and gifts *causa mortis*? Should someone "on his deathbed" be able to change his mind so easily?

3. In the case of a gratuitous bailment, the bailee is liable only if he is grossly negligent. Is this good policy? If you agree to watch someone's property, shouldn't you be required to be careful even if you are not being paid?

4. Common carriers are not usually liable when property is damaged, but they are not liable for "acts of God"—floods, hurricanes, and the like. Is this fair? If you send a friend an important item via UPS and the UPS truck is hit by a tornado, who should pay for the lost item? Isn't UPS in a better financial position to pay for the loss? (In the end, they might well offer to pay for the loss, but they would not be legally *required* to do so.)

5. Dan checks into a nice beachfront hotel. He does not want to expose his $10,000 Patek Phillipe wristwatch to salt water, so he leaves it in the dresser in the room. When he returns from the beach, the watch is gone. He is shocked to learn that the hotel is not legally responsible for the value of his watch. Is the law reasonable in such cases? *Should* the hotel be liable? Why or why not?

CHAPTER 45

PLANNING FOR THE FUTURE: WILLS, TRUSTS, AND INSURANCE

© Steve Allen/Jupiterimages

Emily and Nick had been friends since childhood. In high school, they were teammates on the cross-country squad; in college, they often commiserated over tough courses and difficult romances. After college, Emily went to business school, and from there to a hedge fund. Nick followed his lifelong dream of becoming a high school teacher. But they still kept in touch and were members of the same running club. They even purchased houses near each other. When an old estate went on the market, Emily bought the manor house, Nick the gatekeeper's cottage.

By age 45, Nick was married with two children. Although his salary was modest, he saved carefully, purchased enough life insurance to replace his income if he died prematurely, and signed a will that would divide his assets in an orderly way. To pay the premiums on his life insurance, his family gave up resort vacations and went to visit their families instead.

To pay the premiums on his life insurance, his family gave up resort vacations.

"Boring!" thought Emily. "I can't believe you spend so much on life insurance," she scolded Nick. "You can't afford it." For her part, Emily was making a fortune each and every year. She had been divorced once, was currently separated from her second husband, had one child by each marriage, and was involved in a passionate affair with her personal trainer. Her husband was living in the house with their child, while Emily resided with her boyfriend in a fancy condo she owned downtown. She took lavish vacations, bought expensive jewelry and artwork, and kept intending to write a will. She earned so much money, she figured she did not need life insurance.

One bright fall day, Emily and Nick were driving in Emily's new Viper sports car to a road race. She was so busy showing Nick all the gadgets that she did not notice when the truck in front of them stopped suddenly. Her car plowed into the truck, killing them both instantly.

Nick's widow was devastated. But because of Nick's careful planning, she was able to keep her house and maintain her family's lifestyle. Emily's extended family did not fare so well. The ex-spouse, estranged spouse, children, and boyfriend spent years and hundreds of thousands of dollars squabbling and ultimately litigating the rights to her money, the house, the downtown condo, and the rest of her estate. Her hedge fund went out of business and was unable to pay her pension or even her salary for the last year. Because her ex-spouse and her husband were no longer receiving support from her, they had to sell their houses and move the children to new school districts. For children who were already suffering from the loss of their mother, this was an added emotional blow.

Bad things happen to good people (and good businesses). This chapter is about mitigating the risks of these bad things by planning for the future. Virtually everyone should have a will, and absolutely everyone should make careful, considered decisions on how much and what kinds of insurance coverage they need.

Introduction to Estate Planning

There is one immutable law of the universe: "you can't take it with you." Regardless of your fame or wealth, eventually you and your material goods will part. But you *can* control where your assets go after your death. Or you can decide not to bother with an estate plan and leave all in chaos behind you.

Definitions

Like many areas of the law, estate planning uses its own terminology:

- **Estate planning.** The process of giving away property after (or in anticipation of) death.
- **Estate.** The legal entity that holds title to assets after the owner dies and before the property is distributed.
- **Decedent.** The person who has died.
- **Testator** or **testatrix.** Someone who has signed a valid will. **Testatrix** is the female version (from the Latin).
- **Intestate.** To die without a will.
- **Heir.** Technically, the term *heir* refers to someone who inherits from a decedent who died intestate. **Devisee** means someone who inherits under a will. However, common parlance and many courts use *heir* to refer to anyone who inherits property, and we follow that usage in this chapter.

- **Probate.** The process of carrying out the terms of a will.
- **Executor** or **executrix.** A personal representative *chosen by the decedent* to carry out the terms of the will. An **executrix** is a female executor.
- **Administrator** or **administratrix.** A personal representative appointed *by the probate court* to oversee the probate process for someone who has died intestate (or without appointing an executor). As you can guess, an **administratrix** is a female administrator.
- **Grantor or settlor.** Someone who creates a trust.
- **Donor.** Someone who makes a gift or creates a trust.

Throughout this chapter, we use the masculine and feminine versions of *testator*, *executor*, and *administrator* interchangeably. These are dated terms that reflect a sexist era when men and women had different legal rights. It would be more progressive to bury these words in the same graveyard as *authoress* and *poetess*, but courts and lawyers still use them, and so must we.

Purpose

Estate planning has two primary goals: to ensure that property is distributed as the owner desires and to minimize estate taxes. Although tax issues are beyond the scope of this chapter, they are an important element of estate planning, often affecting not only how people transfer their property but, in some cases, to whom. For instance, wealthy people may give money to charity, at least in part, to minimize the taxes on the rest of their estate. In the *Paradee* case discussed later in this chapter, grandparents set up an insurance trust as a means of passing money tax-free to their grandchild.

Probate Law

The federal government and many states levy estate taxes (although traditionally, state taxes have been much lower). But only the states, and not the federal government, have probate codes to regulate the creation and implementation of wills and trusts. These codes vary from state to state. This chapter, therefore, speaks only of general trends among the states. Certainly, anyone who is preparing a will must consult the laws of the relevant state. To make probate law more consistent, the National Conference of Commissioners on Uniform State Laws issued a Uniform Probate Code (UPC). However, fewer than half of the states have adopted it.

Wills

Will
A legal document that disposes of the testator's property after death.

A will is a legal document that disposes of the testator's property after death. It can, in most instances, be revoked or altered at any time until death. Virtually every adult, even those with only modest assets, should have a will to:

- Ensure that their assets (modest though they may be) are distributed in accordance with their wishes.
- Select a personal representative to oversee the estate. If the decedent does not name an executor in a will, the court will appoint an administrator. Generally, people prefer to have a friend, rather than a court, in charge of their property.
- Avoid unnecessary expenses. Those who die intestate often leave behind issues for lawyers to resolve. A properly drafted will can also reduce the estate tax bill.

- Provide guardians for minor children. If parents do not appoint a guardian before they die, a court will. Presumably, the parents are best able to make this choice.

The following examples suggest another purpose for a will: to say what you really think.[1]

> I give to the Lieutenant-General Cromwell one of my words ... which he must want, seeing that he hath never kept any of his own.
>
> —Philip, fifth Earl of Pembroke, seventeenth century

> Seeing that I had the misfortune to be married to the aforesaid Elizabeth, who, ever since our union, has tormented me in every possible way; that not content with making game of all my remonstrances, she has done all she could to render my life miserable; that Heaven seems to have sent her into the world solely to drive me out of it; that the strength of Samson, the genius of Homer, the prudence of Augustus, the skill of Pyrrhus, the patience of Job, the philosophy of Socrates, the subtlety of Hannibal, the vigilance of Hermogenes, would not suffice to subdue the perversity of her character ... weighing seriously all these considerations ... I bequeath, to my said wife Elizabeth, the sum of one shilling.
>
> —John George, 1791

> I leave Parson Chavasse (Maggy's husband) the snuff box I got from the Sarnia Militia, as a small token of gratitude for the service he has done my family in taking a sister that no man of taste would have taken.
>
> —William Dunlop, Canada, 1842

> Before anything else is to be done, 50 cents is to be paid to my son-in-law to enable him to buy for himself a good stout rope with which to hang himself, and thus rid mankind of one of the most infamous scoundrels that ever roamed this broad land or dwelt outside of a penitentiary.
>
> —Garvey B. White, 1908

Requirements for a Valid Will

Generally speaking, a person may leave his assets to whomever he wants. However, the testatrix must be:

- Of **legal age** (which is 18).
- Of **sound mind.** That is, she must be able to understand what a will is, more or less what she owns, who her relatives are, and how she is disposing of her property.
- Acting without **undue influence.** Undue influence means that one person has enough power over another to force him to do something against his free will.

Legal Technicalities

A testator must comply with the legal requirements for executing a will: it must be in writing, and the testator must sign it or direct someone else to sign it for him, if he is too weak. Generally, two witnesses must also sign the will. Under the 2008 amendment to the UPC, a notarized will does not require any witnesses, but only a few states have passed this amendment. No one named in a will should also serve as a witness because, in many states, a witness may not inherit under a will. The importance of abiding by the legal technicalities cannot be overstated. No matter what the testator's intent, courts generally do not enforce a will unless each requirement of the law has been fully met. As we have observed before, close only counts in horseshoes and hand grenades.

---

[1] Jeff Stryker, "They Couldn't Resist: Oh, One Last Thing ...," *New York Times*, May 21, 2000, §4, p. 7.

Holographic Will

Holographic will
A will that is handwritten and signed by the testator, but not witnessed.

Some states recognize a **holographic will:** a will that is handwritten and signed by the testatrix, but not witnessed. Note that a holographic *must* be written in a testator's own handwriting—it cannot be typed. Suppose Rowena is on a plane that suffers engine trouble. For 15 minutes, the pilot struggles to control the plane. Despite his efforts, it crashes, killing everyone aboard. During those 15 minutes, Rowena writes on a Post-it note, "This is my last will and testament. I leave all my assets to the National Gallery of Art in Washington, D.C." She signs her name, but her fellow passengers are too frantic to witness it. This note is found in the wreckage of the plane. Her previous will, signed and witnessed in a lawyer's office, left everything to her beau, Ivan. If Rowena resides in one of the majority of states that accepts a holographic will, then Ivan is out of luck and the National Gallery will inherit all. One court has, indeed, accepted as a will a handwritten Post-it note that had not been witnessed.

Nuncupative Will

Some states will also accept a nuncupative will. This is the formal term for an oral will. For a nuncupative will to be valid, the testatrix must know she is dying, there must be three witnesses, and these witnesses must know that they are listening to her will. Suppose that Rowena survives the airplane crash for a few hours. Instead of writing a will on the plane, she whispers to a nurse in the hospital, "I'd like all my property to go to the Angell Memorial Cat Hospital." This oral will is valid if there are two other witnesses and Rowena also says, "I'm dying. Please witness my oral will." The cat hospital, however, is only entitled to her personal property. Nuncupative wills cannot be used to dispose of real estate. Ivan would inherit her farm.

Spouse's Share

Forced share
The percentage of a decedent's estate that a spouse is entitled to claim under state law. Also known as a **statutory share.**

A spouse is entitled to a **forced share** of the decedent's estate (unless she waives that right by written contract). In community property states, a spouse can override the will and claim one-half of all marital property acquired during the marriage, except property that the testator inherited or received as a gift.[2] Although this rule sounds easy and fair, implementation can be troublesome. If a couple has been married for many years and has substantial assets, it can be very difficult to sort out what is and is not community property. Suppose that the testatrix inherited a million dollars 20 years before her death. She and her husband both earned sizable incomes during their careers. How can a court tell what money bought which asset? Anyone in a situation such as this should keep detailed records.

In most non–community property states, a spouse can override the will and claim some percentage of the decedent's probate estate (again, unless he has waived that right by written contract). The Uniform Probate Code (UPC), provides a complex formula that depends on how long the couple was married and what percentage of marital assets each held.

Children's Share

Parents are not required to leave assets to their children. They may disinherit their children for any reason.[3] In most states, this is true even if the children are minors whom the testator was obligated to support while alive.

---

[2]Arizona, California, Idaho, Louisiana, Nevada, New Mexico, Texas, and Washington all have community property law; Wisconsin's system is a variation of the same principle.
[3]The only exception to this rule is Louisiana, whose laws are based on the French model.

However, the law presumes that a **pretermitted child** (that is, a child left nothing in the parent's will) was omitted by accident unless the parent clearly indicates in the will that he has omitted the child on purpose. To do so, he must either leave her some nominal amount, such as $1, or specifically write in the will that the omission was intentional: "I am making no bequest to my daughter because she has chosen a religion of which I disapprove."

Pretermitted child
A child who is left nothing under the parent's will.

If a pretermitted child is left out by accident, she is generally entitled to the same share she would have received if her parent had died intestate, that is, without a will. Does this rule make sense? How likely is it that a parent with sufficient mental capacity to make a valid will would *forget* a child? Do you think the father in the following case simply forgot?

Issue
A person's direct descendants, such as children and grandchildren.

In re Estate of Josiah James Treloar, Jr.

151 N.H. 460; 859 A.2d 1162; 2004 N.H. LEXIS 177
Supreme Court of New Hampshire, 2004

Facts: Josiah James Treloar, Jr.'s first will left his estate to his wife unless she died before he did, in which case one piece of land was to go to his daughter Evelyn, another to his son, Rodney, and the rest of his estate was to be divided equally among Evelyn, Rodney, and another daughter, Beverly.

After his daughter Evelyn died, Josiah executed a new will. To help his lawyer in preparing this document, Josiah gave him a copy of the old will with handwritten changes, including Evelyn's name crossed out. The new will left the estate to Rodney and Beverly equally. Evelyn's children and her husband, Leon, got nothing, although Leon, was named as executor. Josiah referred to Leon as "my son-in-law."

Under New Hampshire law, all **issue** (including children and grandchildren) can qualify as pretermitted heirs. The law assumes that if the testator does not leave anything to his issue or does not refer to them in his will, it is because he has forgotten them. They are therefore entitled to a share of his estate. If Josiah had mentioned Evelyn, then the assumption would be that he had not forgotten her or her children. Evelyn's children argued that they were entitled to a share of Josiah's estate because he had not left her or them out on purpose. Josiah's attorney was serving as executor (not Leon). When he refused to pay the children, they sued.

Issue: ***Are Evelyn's children entitled to a share of Josiah's estate?***

Excerpts from Justice Galway's Decision:[4] The purpose of the statute [on pretermitted heirs] is to prevent a mistake or unintended failure by the testator to remember the natural object of his or her bounty. This rule of law is conclusive unless there is evidence in the will itself that the omission was intentional. To be a pretermitted heir, the child must not be named in the will, referred to in the will, or be a devisee or legatee under the will.

The executor asserts that, although the will names neither Evelyn nor her children, there are sufficient indirect references to Evelyn to satisfy the statute. The executor first argues that the reference in the will to revoking "all prior wills and testamentary instruments" coupled with evidence of the prior will, which specifically named Evelyn, and the testator's handwritten changes to it, demonstrate that he had Evelyn in mind when he prepared the will.

The court's task is not to investigate the circumstances to divine the intent of the testator; rather, it is to review the language contained within the four corners of the will for a determination of whether the testator named or referred to Evelyn's children. We disagree with the executor that we must read the wills together. [The new] will stands on its own.

The executor next argues that the reference to Leon as the testator's "son-in-law" showed that he had Evelyn in mind when he drafted the [new] will. [T]he testator did

[4]For readability, we use the term "Evelyn's children" instead of "respondents" and "executor" instead of "petitioner."

not use his daughter's name. Nor did he use the phrase "son-in-law" in a bequest. Rather, he used the phrase "son-in-law" to identify the individual he wished to appoint as his executor.

Even if the will indirectly referred to Evelyn, these indirect references would not satisfy the statute for the purposes of disinheriting Evelyn's children. [T]he naming of one person, however closely related to another, without more, is no reference to that other. It is well established that there must be a reference in the will to the child himself. It is not sufficient to infer that the child was not forgotten because a sibling or other relative was remembered in the will.

For all of the above reasons, we conclude that Evelyn's children are pretermitted heirs.

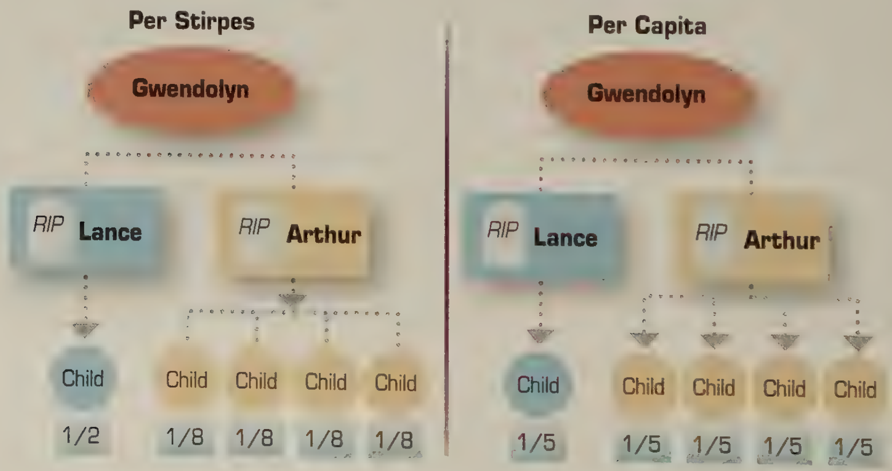
As we have observed before, the laws regarding wills are very precise. It seems highly unlikely that Josiah remembered his son-in-law but forgot the daughter to whom the son-in-law had been married. No matter—the will did not meet the requirements of the statute, so Evelyn's children were in luck.

In drafting a will, lawyers almost always use the term **issue** instead of children. *Issue* means all direct descendants, such as children, grandchildren, great-grandchildren, and so on. If the will leaves property to "my children" and one child dies before the testator, the child's children would not inherit their parent's share. But if the will says "to my issue" and one child dies first, her children will inherit her share.

Per stirpes
Each branch of the family receives an equal share.

Per capita
Each heir receives the same amount.

The will must also indicate whether issue are to inherit per stirpes or per capita. **Per stirpes** means that each *branch* of the family receives an equal share. Each child of the decedent receives the same amount, and, if a child has already died, her heirs inherit her share. **Per capita** means that each *heir* receives the same amount. If the children have died, then each grandchild inherits the same amount. Suppose that Gwendolyn has two children, Lance and Arthur. Lance has one child, Arthur has four. Both sons predecease their mother. If Gwendolyn's will says "per stirpes," Lance's child will inherit her father's entire share, which is half of Gwendolyn's estate. Arthur's four children will share their father's portion, so each will receive one-eighth (¼ × ½). If Gwendolyn's will says, "per capita," each of her grandchildren will inherit one-fifth of her estate. Although it might sound fairer to give all grandchildren the same inheritance, most people choose a per stirpes distribution on the theory that they are treating their *children* equally. The following chart illustrates the difference between per stirpes and per capita.



Amending a Will

Codicil
An amendment to a will.

A testator can generally revoke or alter a will at any time prior to death. In most states, he can revoke a will by destroying it, putting an *X* through it, writing "revoked" (or some synonym) on it, or signing a new will. He can also execute an amendment—called a **codicil**—to change specific terms of the will while keeping the rest of it intact. A codicil must meet all the requirements of a will, such as two witnesses. Suppose that Uncle Herman, who has a long and elaborate will, now wants his sterling silver Swiss Army knife to go to Cousin Larry rather than Niece Shannon. Instead of redoing his whole will, he can ask his lawyer to draw up a codicil changing only that one provision.

A change in family situation may also revoke part or all of a will automatically. Under the UPC, divorce or annulment cancels the ex-spouse's inheritance under a will. In some states, marriage, divorce, or the birth of a child revokes a will unless the instrument was clearly executed with that event in mind. A testatrix can state in the will, for instance, that she is making it in anticipation of her marriage.

Intestacy

When singer John Denver died unexpectedly in a plane accident, he had had several marriages, children, and platinum albums. His estate was worth $20 million. What he did not have was a will, as is the case with 60 percent of Americans. When someone dies intestate, the law steps in and determines how to distribute the decedent's property. Although, in theory, intestacy laws are supposed to be based on what most people would prefer, in practice, they are not. The vast majority of married people, for instance, leave all their assets to their surviving spouse. Most intestacy laws do not. In some states, if a married person dies intestate, some portion of her property (one-half or two-thirds) goes to her spouse, and the remainder to her issue (including grandchildren). Few people would actually want grandchildren to take a share of their estate in preference to their spouse. In other states, the decedent's estate is shared among her issue, her spouse, and her parents. If she has no issue, her spouse shares the estate with her parents. The moral of the story? As the late great law professor A. James Casner used to say, "Only a fool would die without a will."

Power of Attorney

A **power of attorney** is a document that permits the **attorney-in-fact** to act for the principal. (An attorney-in-fact need not be a lawyer.) Typically, a power of attorney expires if the principal revokes it, becomes incapacitated, or dies. But a **durable** power is valid even if the principal can no longer make decisions for herself. An **immediate power** becomes effective when signed; a **springing power** is effective at some time in the future, typically when the principal becomes incompetent and is no longer able to manage his affairs.

Lawyers generally recommend that their clients execute a durable power of attorney, particularly if they are elderly or in poor health. The power of attorney permits the client not only to choose an attorney-in-fact, but also to give advance instructions, such as "loan money to my son, Billy, if ever he needs it." If a client becomes incompetent and has no power of attorney, a court will appoint a guardian. As a general rule, it is better to make choices yourself rather than leave them to a court.

Probate

The testatrix cannot implement the terms of the will from beyond the grave, so she appoints an executor for this task. Typically, the executor is a family member, lawyer, or close friend. If the decedent does not select an executor, the probate court appoints an administrator to fulfill the same functions. The executor (or the administrator) has important responsibilities and, in a large estate, may spend a significant amount of time carrying out his functions. He has a

fiduciary duty to the estate and is potentially liable to the heirs for any mistakes—from bad investment choices to errors in property valuation. Both the executor and the administrator are entitled to reasonable compensation—typically between 1 and 5 percent of the estate's value, although family members and friends often waive the fee.

Property Not Transferred by Will

A will does not control the distribution of joint property, retirement benefits, or life insurance. As explained in Chapter 43, property that is held in a joint tenancy automatically passes to the surviving owner, regardless of provisions in the decedent's will. This form of ownership is often used by family members—spouses or parents and children—as a simple method of transferring ownership without a will. Pension plans, other retirement benefits, and life insurance are also excluded from the decedent's estate and pass to whomever is named as beneficiary.

Anatomical Gifts

As immunosuppressant drugs improve, doctors are increasingly successful at transplanting human organs. The demand for these organs—hearts, corneas, kidneys, livers, pituitary glands, skin—is much greater than the supply. **The Uniform Anatomical Gift Act (UAGA) allows an individual to indicate her desire to be a donor either by putting a provision in her will or by signing an organ donation card in the presence of two witnesses.** Alternatively, DonateLives is an iPhone app that allows users to register as organ donors. The UAGA also provides that, unless a decedent has affirmatively indicated her desire not to be a donor, family members have the right to make a gift of her organs after death.

Living Wills

At the age of 32, Nancy Cruzan was in a devastating car accident. Lying facedown in a ditch, she stopped breathing for 14 minutes. Medics revived her, but she remained in a deep coma, unable to interact with her surroundings, although she did seem to feel pain. For seven years, she lay in a fetal position in a hospital bed. Her hands were so twisted that her nails cut her wrists. No one in her situation had ever recovered, but if she were fed, she could live 25 years. Cruzan's parents asked a court for permission to stop feeding her.

Ultimately, the Supreme Court upheld a Missouri law that family members cannot choose to discontinue treatment for an incompetent person unless there is clear and convincing evidence the patient would have made that choice herself.[5] After the Supreme Court decision, the probate court in Missouri heard new witnesses testify that Cruzan had said she would not want to live "like a vegetable." The lower court considered this clear and convincing evidence about Cruzan's wishes and granted the family permission to withhold feeding.

Living will
In the event that a person is unable to make medical decisions, this document indicates her preferences and may also appoint someone else to makes these decisions for her. Also known as an **advance directive.**

Health care proxy
Someone who has authority to make health care decisions for a person who is incompetent.

Spurred by the *Cruzan* case, many people executed so-called **living wills** or **advance directives.** Living wills permit adults to refuse medical treatment that would unreasonably prolong their lives, such as artificial feeding, cardiac resuscitation, or mechanical respiration. In addition, a living will can be used to appoint a **health care proxy** to make decisions for a person who has become incompetent. Concerned that living wills are not detailed enough, the Center for Ethics in Health Care developed POLST (Physician Orders for Life-Sustaining Treatment). These forms provide more detailed instructions on specific interventions.

Experts estimate that more than 75 percent of the population will not be capable of making their own medical decisions at the end of their lives. What happens if their family members disagree about what to do? A living will can resolve those disputes. Terri Schiavo was only 26 years old when her heart stopped beating one evening, causing brain damage that put her in a persistent vegetative state. Her husband said she would not have wanted to live

---

[5] *Cruzan v. Director, Missouri Department of Health,* 497 U.S. 261, 1990 U.S. LEXIS 3301 (1990).

that way and asked to have her feeding tube removed; her parents disagreed and fought him through the courts. Even Congress intervened to try to keep the tube in place. Her husband ultimately prevailed and the tube was removed, but only after 15 years of litigation and public uproar. If Schiavo had had a living will, her family would have had more privacy, fewer legal bills, and, perhaps, greater peace.

Doctors are permitted to shorten a patient's life by withholding medical treatment. Can they go the next step and prescribe medication to end the life of a terminal patient who is suffering intolerably? Montana, Oregon, and Washington are the only states that specifically allow doctors to prescribe a fatal dose of drugs to a dying patient. In Oregon and Washington, about 50 terminally ill people die from **assisted suicide** each year.

If Schiavo had had a living will, her family would have had more privacy, fewer legal bills, and, perhaps, greater peace.

Assisted suicide
The process of hastening death for a terminally ill patient at the request of the patient.

EXAM Strategy

Question: Tim's will leaves all his money to his cat, Princess Ida. After he dies, his widow and children claim that they are entitled to a share of his estate. Is this true? Will Princess Ida be living like royalty?

Strategy: The answer is different for his wife and children.

Result: Tim's wife is entitled to a share of his assets unless she signed a contract waiving that right. His children are entitled to a share of his assets unless he clearly indicated in his will that he intended to leave them out.

Trusts

Trusts are an increasingly popular method for managing assets, both during life and after death. In the United States, over a trillion dollars are held in personal trusts. A **trust** is an entity that separates legal and beneficial ownership. It involves three people: the grantor (also called the settlor or donor), who creates and funds it; the trustee, who manages the assets; and the beneficiary, who receives the financial proceeds. The trustee technically owns the property, but she must use it for the good of the beneficiary. In other words, the trustee holds **legal** title, while the beneficiary holds **equitable** title. A grantor can create a trust during her lifetime or after her death through her will. **There are four requirements for establishing a trust:**

Trust
An entity that separates the legal and beneficial ownership of assets.

- **Legal capacity.** As with any contract, the grantor must be of legal age and sound mind.
- **Trustee.** The grantor must appoint at least one trustee (who may be the grantor himself). The trust does not end if the appointed trustee dies or resigns. Either the trust instrument provides for successor trustees or a court can appoint one.
- **Beneficiary.** A trust must have specific beneficiaries, although it need not list them by name. It can instead list a class, such as "living children of the grantors."
- **Trust property.** The grantor must transfer specific assets to the trust, although these assets can be nominal. A grantor might, for instance, establish a trust with $10 and then add other assets later.

The Uniform Trust Code (UTC) establishes consistent laws on the creation and administration of trusts. About half the states have passed some version of this code.

Advantages and Disadvantages

Why do people use trusts? These are among the advantages:

- **Control.** The grantor can control her assets after her death. In the trust document, she can direct the trustees to follow a specific investment strategy, and she can determine how much income the beneficiaries receive. As an example, suppose the grantor has a husband and children. She wants to provide her husband with adequate income after her death, but she does not want him to spend so lavishly that nothing is left for the children. Nor does she want him to spend all her money on his second wife. The grantor could create a trust in her will that allows her husband to spend the income and, upon his death, gives the principal to their children.
- **Caring for children.** Minor children cannot legally manage property on their own, so parents or grandparents often establish trusts to take care of these assets until the children grow up.
- **Tax savings.** Although tax issues are beyond the scope of this chapter, it is worth noting that trusts can reduce estate taxes. For example, many married couples use a **marital trust** and parents or grandparents can establish **generation-skipping trusts** to reduce the estate tax bill.
- **Privacy.** A will is filed in probate court and becomes a matter of public record. Anyone can obtain a copy of it. Some companies are even in the business of providing copies to celebrity hounds. Jacqueline Kennedy Onassis's will is particularly popular. Trusts, however, are private documents and are not available to the public.
- **Probate.** Because a will must go through the often-lengthy probate process, the heirs may not receive assets for some time. Assets that are put into a trust *before the grantor dies* do not go through probate; the beneficiaries have immediate access to them.
- **Protecting against creditors.** A few states now permit so-called asset protection trusts. These trusts permit someone to place all his assets in a trust. He can spend trust funds himself, but his creditors have no right to the assets. For example, Hartwell has an unfortunate alcohol and drug problem, but he is no fool. When he inherited millions on his 21st birthday, he placed them all in an asset protection trust. Later he married, had children, and got divorced. He also was in a car accident that caused the death of a young investment banker. Both his wife and the banker's husband sued him, looking for financial support. But they are both out of luck. His assets are protected from all creditors.

Ethics Is an asset protection trust fair? Why would states permit their citizens to hide money from legitimate creditors? The short answer: to attract trust business from out of state. Trusts generate billions of dollars in fees each year. If you were a state legislator, how would you vote when this legislation came up for approval? If you had substantial assets, would you put them in such a trust? What Life Principles apply here?

The major *disadvantage* of a trust is expense. Although it is always possible for the grantor to establish a trust himself with the aid of software or form books, trusts are complex

instruments with many potential pitfalls. Do-it-yourself trusts are a recipe for disaster. In addition to the legal fees required to establish a trust, the trustees may have to be paid. Professional trustees typically charge an annual fee of about 1 percent of the trust's assets. Family members usually do not expect payment. Trusts can also save some money, however, because the grantor will have fewer assets to probate, and therefore the executor's fees will be lower.

Types of Trusts

Depending upon the goal in establishing a trust, a grantor has two choices.

Living Trust

Also known as an *inter vivos trust*, a **living trust** is established while the grantor is still alive. In the typical living trust, the grantor serves as trustee during his lifetime. He maintains total control over the assets and avoids a trustee's fee. If the grantor becomes disabled or dies, the successor trustee, who is named in the trust instrument, takes over automatically. All of the assets stay in the trust and avoid probate. Most (but not all) living trusts are **revocable**, meaning that the grantor can terminate or change the trust at any time.

Living trust
A trust established while the grantor is still alive.

Revocable trust
A trust that can be terminated or changed at any time.

Testamentary Trust

A **testamentary trust** is created by a will. It goes into effect when the grantor dies. Naturally, it is **irrevocable** because the grantor is dead. The grantor's property must first go through probate on its way to the trust. Living trusts are particularly popular with older people because they want to ensure that their assets will be properly managed if they become disabled. Younger people typically opt for a testamentary trust because the probability they will become disabled any time soon is remote. Also they want to avoid the effort of transferring their assets to the trust while they are still alive.

Testamentary trust
A trust that goes into effect when a grantor dies.

Trust Administration

The primary obligation of trustees is to carry out the terms of the trust. They may exercise any powers expressly granted to them in the trust instrument and any implied powers reasonably necessary to implement the terms of the trust, unless that power has been specifically prohibited. **In carrying out the terms of the trust, the trustees have a fiduciary duty to the beneficiary.** This fiduciary duty includes:

- **A duty of loyalty.** In managing the trust, the trustees must put the interests of the beneficiaries first. They must disclose any relevant information to the beneficiaries. They may not commingle their own assets with those of the trust, do business with the trust (unless expressly permitted by the terms of the trust), or favor one beneficiary over another.
- **A duty of care.** The trustee must act as a reasonable person would when managing the assets of *another*. (This is a higher standard than requiring a trustee to act as a reasonable person would when managing his *own* affairs.) The trustee must make careful investments, keep accurate records, and collect debts owed the trust.

A trustee is liable to the beneficiaries of the trust if she breaches her duty. The following case provides an excellent example of a trustee who violated her fiduciary duty. The bad trustee was not only liable for violating *her* duty but also for aiding *someone else's* misbehavior.

Paradee v. Paradee

2010 Del. Ch. LEXIS 212
Court of Chancery of Delaware, 2010

Facts: Charles Paradee, Sr. (Senior) had a son, Charles Jr. (Junior), and a grandson, Charles III (who was called Trey). Senior's first wife died. When he was 71 years old, he married Eleanor, age 54. Junior and Eleanor grew to despise each other, thereby ending the relationship between Junior and Senior. But Senior maintained a loving relationship with Trey.

To provide for Trey, Senior created an irrevocable trust. He gave the Trust $366,000, which it used to buy an insurance policy on the lives of Senior and Eleanor. Once both of them died, Trey would receive $1.7 million. Eugene Sterling, the life insurance agent who sold the policy to the Trust, was the initial trustee, but Trey had the right to become trustee when he turned 30.

Senior began to slip mentally. He and Eleanor sent Sterling a letter instructing him to revoke the Trust. But the family lawyer, Joanna Reiver, told Eleanor that, oddly enough, irrevocable trusts are irrevocable. It turned out, however, that the trustee did have the right to loan its assets. Although lawyers told Sterling that any loan had to be on the same terms as an arms-length transaction, Sterling ignored this advice. He borrowed money from the insurance company, with the policy as security. He then loaned this money to Senior and Eleanor on terms that were highly favorable to them. If the Trust did not pay the interest it owed to the insurance company, the policy would lapse.

Senior died. At that point, the Trust had the right to call the loan, but Sterling made no effort to collect it. Trey turned 30, but Sterling did not tell him that he was entitled to be trustee. When Sterling died, Eleanor appointed herself as trustee. She stopped paying interest to the Trust, which meant that it could not pay what it owed to the insurance company, and the policy lapsed.

When Trey finally found out about the trust, he filed suit against Eleanor alleging that she had violated her fiduciary duties and that she had also aided and abetted Sterling in the violation of his.

Issue: ***Did Eleanor violate her fiduciary duty? Is she liable for aiding and abetting Sterling?***

Excerpts from Judge Laster's Decision[6]: Reiver testified at trial about Eleanor's motive in allowing the Policy to lapse: "I think that she did not want Trey to be in a position where he would be better off on her death, and know about it, and be in control of it." Eleanor consciously, intentionally, and vengefully refused to take any action to protect or preserve the Policy because she did not want Trey to benefit.

To prevail on a claim for aiding and abetting a breach of fiduciary duty, Trey had to prove (1) the existence of a fiduciary relationship; (2) that the fiduciary breached his duty; (3) that the non-fiduciary defendant knowingly participated in the breach; and (4) damages resulting from the concerted action of the fiduciary and the non-fiduciary.

At the time he made the Trust Loan, Sterling was Trustee and a fiduciary for the Trust. Instead of evaluating what was in the best interests of the Trust, he evaluated whether he could please his longtime clients, the Paradees. Sterling should have asked himself whether the Trust Loan was good for the Trust. He chose instead to ask whether there was a plausible reason to think the Trust Loan could be extended without harming the Trust. As Sterling stated in his letter to Reiver, "I can find no reason not to loan out a portion of the Policy value." He should have examined the Trust Loan from precisely the opposite point of view: whether there was any reason *to* loan a portion of the Policy value. If Sterling had considered what was best for the Trust, he would have refused the Paradees' request. There was no upside to the Trust in loaning funds to the Paradees.

It is bedrock law that the conduct of one who knowingly joins with a fiduciary in breaching a fiduciary obligation is equally culpable. Eleanor induced Sterling to breach his fiduciary duties by taking advantage of his primary loyalty to the Paradees. She is liable to the same extent as Sterling would have been, had he not passed away.

[Eleanor does] not dispute that once she became Trustee after Sterling's death, [she] should have informed Trey about the Trust and should have used Trust assets to maintain the Policy.

For the loss of the Policy, I award damages of [what the policy would have been worth if it had not lapsed]. Trey asks that [Eleanor] be ordered to pay his attorneys' fees and expenses. Having intentionally destroyed the Trust's value, Eleanor must bear the cost of remedying her breaches of fiduciary duty.

[6]For ease of reading, we refer to Trey by name rather than as "petitioner."

By the time Trey found out about the trust, Sterling was dead and thus no longer liable. But he was the trustee who had caused the most harm (by making the loan). If Eleanor had not been liable for aiding and abetting Sterling, Trey would not have been able to recover the full amount lost.

Termination

A trust ends upon the occurrence of any of these events:

- On the date indicated by the grantor.
- If the trust is revocable, when revoked by the grantor. Even if the trust is irrevocable, the grantor and all the beneficiaries can agree to revoke it.
- When the purpose of the trust has been fulfilled. If the grantor established the trust to pay college tuition for his grandchildren, the trust ends when the last grandchild graduates.

Even if one of these events does not occur, the **Rule Against Perpetuities** provides that a trust must end within 21 years of the death of some named person who is alive when the trust is created. For centuries, the Rule Against Perpetuities has been the law in England and the United States. However, nearly half the states now permit trusts that last forever—so-called **dynasty** or **perpetual trusts.** These trusts avoid estate taxes and generally allow donors to control their money forever. Whether or not eternal control is a good idea is best left to psychology texts.

Perpetual trust
A trust that lasts forever. Also known as a **dynasty trust.**

EXAM Strategy

Question: Maddie set up a trust for her children, with Field as trustee. Field decided to sell a piece of trust real estate to his wife without obtaining an appraisal, attempting to market the property, or consulting a real estate agent. Maddie was furious and ordered him not to make the sale. Can she stop him? Would she have to go to court?

Strategy: The answer depends upon what type of trust she has established.

Result: If the trust is revocable, Maddie can simply terminate it and take the property back. If it is irrevocable, she could still prevent the sale by going to court because Field has violated the duties he owes to the beneficiaries. He has violated the duty of loyalty by selling trust property to his wife. He has violated the duty of care by failing to act as a reasonable seller would.

Introduction to Insurance

No matter how careful our behavior, we are all subject to risk—from automobile accidents, injury, illness, fires, early death, and other catastrophes. No wonder that, from the earliest times, people have sought insurance against these unpredictable and unpreventable dangers.

Insurance has its own terminology, so it is important to begin by defining key terms:

- **Person.** An individual, corporation, partnership, or any other legal entity.
- **Insurance.** A contract in which one person, in return for a fee, agrees to guarantee another against loss caused by a specific type of danger.

- **Insurer.** The person who issues the insurance policy and serves as guarantor.
- **Insured.** The person whose loss is the subject of the insurance policy.
- **Owner.** The person who enters into the insurance contract and pays the premiums.
- **Premium.** The consideration that the owner pays under the policy.
- **Beneficiary.** The person who receives the proceeds from the insurance policy.

The beneficiary, the insured, and the owner can be, but are not necessarily, the same person. If a homeowner buys fire insurance for her house, she is the insured, the owner, and the beneficiary because she bought the policy and receives the proceeds if her house burns down. If a mother buys a life insurance policy on her son that is payable to his children in the event of his death, then the mother is the owner, the son is the insured, and the grandchildren are the beneficiaries.

Before beginning a study of insurance law, it is important to understand the economics of the insurance industry. Suppose that you have recently purchased a $500,000 house. The probability your house will burn down in the next year is 1 in 1,000. That is a low risk, but the consequences would be devastating, especially since you could not afford to rebuild. Instead of bearing that risk yourself, you take out a fire insurance policy. You pay an insurance company $1,200 in return for a promise that, if your house burns down in the next 12 months, the company will pay you $500,000. The insurance company sells the same policy to 1,000 similar homeowners, expecting that on average one of these houses will burn down. If all 1,000 policyholders pay $1,200, the insurance company takes in $1.2 million each year, but expects to pay out only $500,000. It will put some money aside in case two houses burn down, or even worse, a major forest fire guts a whole tract of houses. It must also pay overhead expenses, such as marketing and administration. And, of course, shareholders expect profits.

Insurance Contract

An insurance policy must meet all the common law requirements for a contract. There must be an offer, acceptance, and consideration. The owner must have legal capacity; that is, he must be an adult of sound mind. Fraud, duress, and undue influence invalidate a policy. In theory, insurance contracts need not be in writing because the Statute of Frauds does not apply to any contract that can be performed within one year, and it is possible that the house may burn down or the car may crash within a year. Some states, however, specifically require insurance contracts to be in writing.

Offer and Acceptance

The purchaser of a policy makes an offer by delivering an application and a premium to the insurer. The insurance company then has the option of either accepting or rejecting the offer. **It can accept by oral notice, by written notice, or by delivery of the policy. It also has a fourth option—a written binder.** A *binder* is a short document acknowledging receipt of the application and premium. It indicates that a policy is *temporarily* in effect, but it does not constitute final acceptance. The insurer still has the right to reject the offer once it has examined the application carefully. Kyle buys a house on April 1 and wants insurance right away. The insurance company issues a binder to him the same day. If Kyle's house burns down on April 2, the insurer must pay, even though it has not yet issued the final policy. If, however, there is no fire, but on April 2, the company decides Kyle is a bad risk, it has the right to reject his application at that time.

Limiting Claims by the Insured

Insurance policies can sometimes look like a quick way to make easy money. More than one person suffering from overwhelming financial pressure has insured a building to the hilt and then burned it down for the insurance money. Unbelievably, more than one parent has killed a child to collect the proceeds of a life insurance policy. Therefore, the law has created a number of rules to protect insurance companies from fraud and bad faith on the part of insureds.

Insurable Interest

Insurable interest
Someone would suffer a loss if the insured event occurs.

An insurance contract is not valid unless the owner has an insurable interest in the subject matter of the policy. To understand why an insurable interest is important, read this tragic story. To celebrate their engagement, Deana Wild and James Coates took a sightseeing trip along the California coast with Coates's mother, Virginia Rearden. They seemed to be just one big happy family. Tragically, Wild slipped while walking along the edge of a cliff at Big Sur and fell to her death. That would have been the end of the story except that, the day before, Rearden had taken out a $35,000 life insurance policy on Wild, naming Coates and Rearden as beneficiaries. When the insurance company investigated, it learned that Coates was married to someone else. Therefore, he could not be Wild's fiance, and neither he nor Rearden had an insurable interest in Wild. It also turned out that Rearden had taken out the policy without Wild's knowledge. Ultimately, a jury determined that Rearden had pushed Wild over the cliff and convicted her of first degree murder. She was sentenced to life in prison without parole.

These are the rules on insurable interest:

- **Definition.** A person has an **insurable interest** if she would be harmed by the danger that she has insured against. If Jessica takes out a fire insurance policy on her own barn, she will presumably be reluctant to burn it down. However, if she buys a policy on Nathan's barn, she will not mind—she may even be delighted—when fire sweeps through the building. It is a small step to saying that she might even burn the barn down herself.
- **Amount of loss.** The insurable interest can be no greater than the actual amount of loss suffered. If the barn is worth $50,000, but Jessica insures it (and pays premiums) for $100,000, she will recover only $50,000 when it burns down. The goal is to make sure that Jessica does not profit from the policy.
- **Life insurance.** A person always has an insurable interest in his own life and the life of his spouse or fiancee. Parents and minor children also have an insurable interest in each other. Creditors have a legitimate interest in someone who owes them money. For some states, the standard is that you have an insurable interest in someone if the person is worth more to you alive than dead.
- **Work relationships.** Business partners, employers, and employees have an insurable interest in each other if they would suffer some financial harm from the death of the insured. For example, companies sometimes buy **key person life insurance** on their officers as compensation if they were to die.

© Ron Kacmarcik/Shutterstock.com

Virginia Rearden pushed Deana Wild to her death from a Big Sur cliff. If the insurance company had known that Rearden did not have an insurable interest in Wild, the company would have refused to issue the policy, and Wild might not have died.

Material
Important to the insurer's decision to issue a policy or set a premium amount.

Misrepresentation

Insurers have the right to void a policy if, during the application process, the insured makes a material misstatement or conceals a material fact. The policy is voidable whether the misstatement was oral or in writing, and in many states, whether it was intentional or unintentional. **Material** means that the misstatement or omission affected the insurer's decision to issue the policy or set a premium amount. Note that a lie can void a policy even if it does not relate to the actual loss.

For example, John Cummings tested positive for cocaine during a visit to a hospital for treatment of a gunshot wound to his chest. When he applied for life insurance six months later, he said on the application that, in the prior five years, he had not used any controlled drugs without a prescription by a physician. He also specifically denied using cocaine. A year later, Cummings died of a gunshot wound to his head. (He truly should have upgraded his circle of friends.) In investigating his death, the insurance company obtained medical records from the hospital which revealed the cocaine use. Of course, the insurance company refused to pay on the policy. His beneficiary sued, but the court ruled that a misrepresentation can be material even if it is not related to the actual cause of death. If the company had known about his drug use, it would not have issued the policy or it would have demanded a higher premium. Cummings's policy was void.[7]

Bad Faith by the Insurer

Insurance policies often contain a *covenant of good faith and fair dealing*. Even if the policy itself does not *explicitly* include such a provision, an increasing number of courts (but not all) *imply* this covenant. An insurance company can violate the covenant of good faith and fair dealing by (1) fraudulently inducing someone to buy a policy, (2) refusing to pay a valid claim, or (3) refusing to accept a reasonable settlement offer that has been made to an insured. When an insurance company violates the covenant of good faith and fair dealing, it becomes liable for both compensatory and punitive damages.

Fraud

In recent years, a number of insurance companies have paid serious damages to settle fraud charges involving the sale of life insurance. The companies trained their salespeople to tell elderly customers that a new policy was better when, in fact, it was much worse. State Farm Insurance agreed to pay its customers $200 million to settle such a suit. Officials in Florida ordered Prudential Insurance Company of America to pay as much as $2 billion in damages after they determined that, for more than a decade, the company had deliberately cheated its customers. Prudential also trained agents to target the elderly.

Ethics Presumably, the agents knew that defrauding elderly people was wrong. Why did they do it? How could you protect yourself from being in that situation?

Refusing to Pay a Valid Claim

Perhaps because juries feel sympathy for those who must deal with an immovable bureaucracy, damage awards are often sizeable when an insurance company has refused to pay a legitimate claim. For example, a jury in Ohio entered a $13 million verdict against Buckeye Union Insurance Co. for its bad faith refusal to pay a claim. An Ohio sheriff stopped the

[7] *Cummings v. American General Life Insurance Co.*, 2008 U.S. Dist. LEXIS 37157 (Fed. Dist. Ct. 2008).

automobile of 19-year-old Eugene Leber. As the sheriff approached Leber's car, he slipped on ice and his gun discharged. By incredibly bad luck, the bullet struck Leber, permanently paralyzing him from the rib cage down. The insurance company recognized that it was liable under the policy, but it nonetheless fought the case for *16* years.

Consumers complain that insurance companies often "lowball"—that is, they make an unreasonably low offer to settle a claim. Some insurance companies even set claims quotas that limit how much their adjusters can pay out each year, regardless of the merits of each individual claim. If juries continue to award multimillion-dollar verdicts, insurance companies may decide simply to pay the claims.

In the following case, the insurance company ultimately paid the claim, but not fast enough to satisfy the jury.

Goodson v. American Standard Insurance Company of Wisconsin

89 P.3d 409, 2004 Colo. LEXIS 388
Supreme Court of Colorado, 2004

Facts: Dawn Goodson and her two children were in an automobile accident while driving a car owned by Chet Weber. He was insured by American Standard Insurance Company of Wisconsin.

To treat injuries that she and her children suffered in the accident, Goodson sought care from a chiropractor. She submitted these bills, totaling about $8,000, to American Standard. The insurance company offered a number of erroneous reasons why it should not pay the claims: that the chiropractor was not a member of American Standard's preferred provider organization, that Weber's policy was not in effect at the time of the accident, and that Goodson and her children needed to undergo an independent medical evaluation to determine whether their injuries were related to the accident and whether their medical treatment was reasonable and necessary. In the end, American Standard did pay Goodson's bills, but it took 18 months to do so.

Goodson filed suit against American Standard, alleging that it had engaged in a bad faith breach of the insurance contract. Although the company's delay in payment had not actually cost Goodson any money, it had caused her substantial emotional distress. The jury awarded Goodson and her children $75,000 in actual damages and an additional $75,000 in punitive damages. The appeals court overturned the verdict. Goodson appealed to the state Supreme Court.

Issue: ***Can Goodson recover damages for emotional distress without showing any economic loss caused by American Standard's delay in paying her claim?***

Excerpts from Justice Hobbs's Decision: To establish that the insurer breached its duties of good faith and fair dealing, the insured must show that a reasonable insurer under the circumstances would have paid or otherwise settled the claim. Compensatory damages for economic and non-economic losses are available to make the insured whole and, where appropriate, punitive damages are available to punish the insurer and deter wrongful conduct by other insurers. Non-economic losses recognized under the rubric of compensatory damages include emotional distress; pain and suffering; inconvenience; fear and anxiety; and impairment of the quality of life. To recover punitive damages, the insured must establish that the insurer's breach was accompanied by circumstances of fraud, malice, or willful and wanton conduct. A punitive damages award cannot exceed the amount of actual damages and, in certain situations, may be increased or decreased by the court.

Goodson proved to the jury that she suffered emotional distress as a result of this delay. The anxiety, fear, stress, and uncertainty she experienced occurred as a result of her worry about whether she would be financially responsible for her medical bills, which American Standard refused to pay. An insured purchases insurance in the first place so as not to suffer such anxiety, fear, stress, and uncertainty. The fact that an insurer finally pays in full does not erase the distress caused by the bad faith conduct.

Accordingly, we reverse the court of appeals and remand the case to that court with instructions to reinstate the trial court's judgment entered on the jury verdict.

Refusing to Accept a Settlement Offer

An insurer also violates the covenant of good faith and fair dealing when it wrongfully refuses to settle a claim. Suppose that Dmitri has a $100,000 automobile insurance policy. After he injures Tanya in a car accident, she sues him for $5 million. As provided in the policy, Dmitri's insurance company defends him against Tanya's claim. She offers to settle for $100,000, but the insurance company refuses because it only has $100,000 at risk anyway. It may get lucky with the jury. Instead, a jury comes in with a $2 million verdict. The insurance company is only liable for $100,000, but Dmitri must pay $1.9 million. A court might well find that the insurance company had violated its covenant of good faith and fair dealing.

EXAM Strategy

Question: Geoff takes out renter's insurance with Fastball Insurance Co. On the application where it asks if he has any pets, he fills in "poodle." Although he does not know it, his "poodle" is really a Portuguese water dog. The two breeds look a lot alike. A month later, his apartment is robbed. Fastball investigates and discovers that Geoff does not have a poodle after all. It denies his claim. Geoff files suit. What result?

Strategy: There are two issues here: Was Geoff's answer on the application a *material* misstatement? Was Fastball's denial in bad faith?

Result: Geoff's misrepresentation was not material—the difference between these two breeds of dog would not have affected liability on the renter's policy. If he had said he had an attack dog such as a Doberman, perhaps the premium would have been lower because the dog would scare off intruders (or higher because the dog would also attack friends and neighbors), but poodles and Portuguese water dogs are equally friendly. Fastball would be liable for refusing to pay the claim.

Types of Insurance

Insurance is available for virtually any risk. Bruce Springsteen insured his voice and Jamie Lee Curtis her legs. When Kerry Wallace shaved her head to promote the *Star Trek* films, she bought insurance in case her hair failed to grow back. Food critic Egon Ronay insured his taste buds. And an amateur dramatics group took out insurance to protect against the risk that a member of the audience might die laughing. Most people, however, get by with six different types of insurance: property, life, health, disability, liability, and automobile.

Property insurance
Covers physical damage to real estate, personal property, or inventory from causes such as fire, smoke, lightning, wind, riot, vandalism, or theft.

Property Insurance

Property insurance (also known as **casualty insurance**) covers physical damage to real estate, personal property (boats, furnishings), or inventory from causes such as fire, smoke, lightning, wind, riot, vandalism, or theft.

Life insurance
Provides for payments to a beneficiary upon the death of the insured.

Life Insurance

Life insurance is really death insurance—it provides for payments to a beneficiary upon the death of the insured. The purpose is to replace at least some of the insured's income so that her family will not be financially devastated.

Term Insurance

Term insurance is the simplest, cheapest life insurance option. It is purchased for a specific period, such as 1, 5, or 20 years. If the insured dies during the period of the policy, the insurance company pays the policy amount to the beneficiary. If the owner stops paying premiums, the policy terminates and the beneficiary receives nothing. As the probability of death rises with age, so do the premiums. A $200,000 10-year term policy on a 25-year-old nonsmoking woman in good health costs as little as $95 annually; at age 60, the same policy costs about $400. Term insurance is the best choice for a person who simply wants to protect his family by replacing his income if he dies young.

Whole Life Insurance

Whole life or **straight life** insurance is designed to cover the insured for his entire life. A portion of the premiums pays for insurance, and the remainder goes into savings. This savings portion is called the **cash value** of the policy. The company pays dividends on this cash value and typically, after some years, the dividends are large enough to cover the premium so that the owner does not have to pay any more. The cash value accrues without being taxed until the policy is cashed in. The owner can borrow against the cash value, in many cases at a below-market rate. In addition, if the owner cancels the policy, the insurance company will pay her the policy's cash value. When the owner purchases the policy, the company typically sets a premium that stays constant over the life of the policy. A healthy 25-year-old nonsmoking woman pays annual premiums of roughly $1,900 per year on a $200,000 policy.

The advantage of a whole life policy is that it forces people to save. It also has some significant disadvantages:

- The investment returns from the savings portion of whole life insurance have traditionally been mediocre. Mutual funds may offer better investment opportunities.
- A significant portion of the premium for the first year goes to pay overhead and commissions. Agents have a great incentive to sell whole life policies, rather than term, because their commissions are much higher.
- Unless the customer holds a policy for about 20 years, it will typically generate little cash value. Half of all whole life policyholders drop their policies in the first seven or eight years. At that point, the policy has generated little more than commissions for the agent.
- Whole life insurance provides the same amount of insurance throughout the insured's life. In contrast, most people need more insurance when they have young children and less as they approach retirement age.

Universal Life

Universal life insurance is a flexible combination of whole life and term. The owner can adjust the premiums over the life of the policy and also adjust the allocation of the premiums between insurance and savings. The options are complex and often difficult for the customer to understand.

Annuities

As life expectancy has increased, people have begun to worry as much about supporting themselves in their old age as they do about dying young. **Annuities** are the reverse of life insurance—they make payments *until* death, whereas life insurance pays *after* death. In the basic annuity contract, the owner makes a lump-sum payment to an insurance company in return for a fixed annual income for the rest of her life, no matter how long she lives. If she dies tomorrow, the insurance company makes a huge profit. If she lives to be 95, the company loses money. But whatever happens, she knows she will have an income until the day she dies.

Annuity
Payment to a beneficiary during his lifetime.

In a **deferred annuity contract,** the owner makes a lump-sum payment but receives no income until some later date, say, in 10 or 20 years when he retires. From that date forward, he will receive payments for the rest of his life.

Health Insurance

Traditional health insurance plans are **pay for service.** The insurer pays for virtually any treatment that any doctor orders. The good news under this system is that policyholders have the largest possible choice of doctor and treatment. The bad news is that doctors and patients have an incentive to overspend on health care because the insurance company picks up the tab. It has been estimated that as many as one-third of the medical procedures performed in pay for service plans have little medical justification, which in the end is not good for the patient.

Instead of, or in addition to, pay for service plans, many insurers offer **managed care plans.** There are many variations on this theme, but they all work to limit treatment choices. In some plans, the patient has a primary care physician who must approve all visits to specialists. In **health maintenance organizations,** known as **HMOs,** the patient can be treated only by doctors in the organization unless there is some extraordinary need for an outside specialist.

Neither type of plan is perfect. In pay for service plans, doctors have an incentive to overtreat. In managed care plans, they may have an incentive to undertreat. For example, a recent study revealed that managed care plans tend to treat mental illness primarily with drugs. A combination of drugs and therapy tends to be more successful, but it is also more expensive.

Disability Insurance

Disability insurance
Replaces the insured's income if he becomes unable to work because of illness or injury.

Disability insurance replaces the insured's income if he becomes unable to work because of illness or injury. Perhaps you are thinking, "That will never happen to me." In fact, the average person is seven times more likely to be disabled for at least 90 days than she is to die before age 65. A significant percentage of all mortgage foreclosures are caused by an owner's disability. Everyone should have disability insurance to replace between 60 and 75 percent of their income. (There is no need for 100 percent replacement because expenses while unemployed are lower.) Many employers provide disability protection.

Liability Insurance

Liability insurance
Reimburses the insured for any liability she incurs by accidentally harming someone else.

Most insurance—property, life, health, disability—is designed to reimburse the insured (or her family) for any harm she suffers. **Liability insurance** is different. **Its purpose is to reimburse the insured for any liability she incurs by (accidentally) harming someone else.** This type of insurance covers tort claims by:

- Those injured on property owned by the insured—the mail carrier who slips and falls on the front sidewalk, or the parents of the child who drowns in the pool,
- Those injured by the insured away from home or business—the jogger crushed by an insured who loses control of his rollerblades, and
- Those whose property is damaged by the insured—the owner whose stone wall is pulverized by the insured's swerving car.

These are the types of claims covered in a *personal* liability policy. *Business* liability policies may also protect against other sorts of claims:

- Professional malpractice on the part of an accountant, architect, doctor, engineer, or lawyer.
- Product liability for any injuries caused by the company's products.

- Employment practices liability insurance to protect employers against claims of sexual harassment, discrimination, and wrongful termination on the part of an employee. Note that this insurance typically does not protect the person who actually commits the wrongdoing—the sexual harasser, for instance—but it does protect the innocent insureds, such as the company itself.

The following case explores the boundaries of liability policies.

You be the Judge

METROPOLITAN PROPERTY AND CASUALTY INSURANCE COMPANY V. MARSHALL

2010 NY Slip Op 51149U; 2010 N.Y. Misc. LEXIS 2824
Supreme Court of New York, 2010

Facts: Jacqueline Marshall's son, Evan, lived in a psychiatric facility. The hospital gave him a weekend pass to visit his mother. While at his mother's house, he murdered Denise Fox, decapitating and dismembering her and depositing her body in his mother's garbage cans. He pleaded guilty and was sentenced to 30 years to life.

Fox's family sued Jacqueline Marshall, alleging that she was negligent in not notifying the neighbors that her son was out on a weekend pass, and not telling them that he had a basement room in which he liked to dismember mannequins and watch violent pornography. Marshall said that she did not even know the hospital had issued a pass to her son.

Marshall had a homeowners liability policy with Metropolitan Property. Ordinarily, if an insured is sued, the insurance company represents her at trial. But instead, Metropolitan asked a court to rule that Marshall's policy did not cover this murder and the company did not have to represent her in the case brought by Fox's family.

Marshall's policy:

- Covered damages caused by an accident,
- Defined an accident as an event that is "unexpected, unusual, and unforeseeable," and
- Excluded coverage for an intentional act committed by an insured or at the direction of the insured.

Metropolitan refused coverage on the grounds that Evan's acts were intentional, not accidental.

You Be the Judge: ***Was Fox's murder an accident for purposes of the policy? Is Marshall covered by her insurance policy?***

Argument for Metropolitan: Newspapers described this murder as "one of the most gruesome murders in Long Island history." This crime was the opposite of an accident; it was cold-blooded and deliberate.

Insurance policies are not intended to protect against this type of behavior. Indeed, it would be bad public policy if they did. As a society, we want people to be held responsible for murders and not have insurance companies pay their liabilities. Besides, the policy clearly states that it does not apply to any intentional act.

Argument for Marshall: Jacqueline Marshall did not murder Denise Fox; her son did. The intentional act was his, not hers. If he had been the insured, the policy would not apply, but such was not the case.

Clearly, this murder was unexpected—the psychiatric hospital would never have released Evan if the doctors had known how dangerous he was. From Marshall's perspective, it was an accident. Nothing could have been more "unexpected, unusual, and unforeseeable."

Automobile Insurance

An automobile insurance policy is a combination of several different types of coverage that, depending on state law, are either mandatory or optional. These are the basic types of coverage:

- **Collision** covers the cost of repairing or replacing a car that is damaged in an accident.
- **Comprehensive** covers fire, theft, and vandalism—but not collision.

- **Liability** covers harm that the owner causes to other people or their property—such as their bodies, cars, or stone walls. Most states require drivers to carry liability insurance.
- **Uninsured motorist** covers the owner and anyone else in the car who is injured by an uninsured motorist.

Chapter Conclusion

Life is a risky business. Cars crash, people die, houses burn. So what can we do? Sign a will, buy insurance, and get on with our lives, knowing that we have prepared as best we can.

Exam Review

1. **WILL** A legal document that disposes of the testator's property after death. (pp. 1142–1149)

2. **HOLOGRAPHIC WILL** A will that is handwritten and signed by the testator but not witnessed. (p. 1144)

3. **NUNCUPATIVE WILL** The formal term for an oral will. (p. 1144)

EXAM Strategy

Question: If you were in an emergency situation and desperately wanted to prepare a new will, under what circumstances would a holographic will be preferable to the nuncupative option?

Strategy: The two types of wills have different requirements for witnesses. (See the "Result" at the end of this section.)

4. **SURVIVING SPOUSE AND CHILDREN** A spouse is entitled to a certain share of the decedent's estate. Children have no automatic right to share in a parent's estate so long as the parent indicates in his will that the pretermitted children have been left out on purpose. (pp. 1144–1146)

EXAM Strategy

Question: Josh was a crotchety fellow, often at odds with his family. In his will, he left his son an autographed copy of his book, *A Guide to Federal Prisons*. He completely omitted his daughter, instead leaving the rest of his substantial estate to the Society for the Assistance of Convicted Felons. Which child fared better?

Strategy: Pretermitted children fare differently from those named in the will. (See the "Result" at the end of this section.)

5. **PER STIRPES V. PER CAPITA** In a will, a per stirpes distribution means that each *branch* of the family receives an equal share. Per capita means that each *heir* receives the same amount. (p. 1146)

6. **REVOCATION OF A WILL** A testator may generally revoke or alter a will at any time prior to death. (p. 1147)

7. **INTESTACY** Sixty percent of Americans die intestate—that is, without a will. In this event, the law determines how the decedent's property will be distributed. (p. 1147)

8. **PROPERTY NOT COVERED BY A WILL** A will does not control the distribution of joint property, life insurance, or retirement benefits. (p. 1148)

9. **LIVING WILL** A living will permits an adult to refuse medical treatment that would prolong life. (pp. 1148–1149)

10. **TRUST** A trust is an entity that separates legal and beneficial ownership. (pp. 1149–1153)

11. **TRUSTEE'S DUTY** In carrying out the terms of a trust, the trustee has a fiduciary duty to the beneficiary. (pp. 1151–1153)

12. **CONTRACT** An insurance policy must meet all the common law requirements for a contract—offer, acceptance, and consideration. (pp. 1154–1158)

13. **INSURABLE INTEREST** A person has an insurable interest if she would be harmed by the danger that she has insured against. (p. 1155)

14. **MATERIAL MISREPRESENTATION** Insurers have the right to void a policy if the insured makes a material misstatement or conceals a material fact. (p. 1156)

EXAM Strategy

Question: When Mark applied for life insurance with Farmstead, he indicated on the application that he had not received any traffic tickets in the preceding five years. In fact, he had received several such citations for driving while intoxicated. Two years later, Mark was shot to death. When Farmstead discovered the traffic tickets, it denied coverage to his beneficiary. Was Farmstead in the right?

Strategy: A misrepresentation is material if it affects the insurer's decision to issue a policy or set a premium amount. (See the "Result" at the end of this section.)

15. **BAD FAITH BY INSURER** Many courts have held that insurance policies contain a covenant of good faith and fair dealing and have found insurance companies liable for compensatory and punitive damages if they commit fraud, refuse to pay legitimate claims in a timely manner, or wrongfully refuse to settle a claim. (pp. 1156–1158)

16. **PROPERTY INSURANCE** Property insurance covers physical damage to real estate, personal property (boats, furnishings), or inventory from causes such as fire, smoke, lightning, wind, riot, vandalism, or theft. (p. 1158)

17. **ANNUITIES** Annuities are the reverse of life insurance policies; they make payments *until* death. (pp. 1159–1160)

18. **HEALTH INSURANCE** Health insurance is available in pay for service plans, managed care plans, or HMOs. (p. 1160)

19. **DISABILITY INSURANCE** Disability insurance replaces the insured's income if he becomes unable to work because of illness or injury. (p. 1160)

20. **LIABILITY INSURANCE** Liability insurance reimburses the insured for any liability that she incurs by accidentally harming someone else. (pp. 1160–1161)

3. Result: A holographic will does not require witnesses, a nuncupative will requires three.

4. Result: Because the son was not totally omitted from the will, he is entitled to nothing more than the book, while the daughter who received nothing under the will gets more than her brother—she receives whatever share she would be entitled to if Josh had died intestate.

14. Result: If Mark had told the truth, Farmstead still would have issued the policy, but the premium would have been higher. It can refuse to pay the claim, even though the issue that he lied about was not a factor in his death.

Multiple-Choice Questions

1. **CPA QUESTION** A decedent's will provided that the estate was to be divided among the decedent's issue per capita and not per stirpes. If there are two surviving children and three grandchildren who are children of a predeceased child at the time the will is probated, how will the estate be divided?
   (a) 1⁄2 to each surviving child
   (b) 1⁄3 to each surviving child and 1⁄9 to each grandchild
   (c) 1⁄4 to each surviving child and 1⁄6 to each grandchild
   (d) 1⁄5 to each surviving child and grandchild

2. **CPA QUESTION** A personal representative of an estate would breach her fiduciary duties if she:
   (a) Combined personal funds with funds of the estate so that both could purchase Treasury bills
   (b) Represented the estate in a lawsuit brought against it by a disgruntled relative of the decedent
   (c) Distributed property in satisfaction of the decedent's debts
   (d) Engaged a non-CPA to prepare the records for the estate's final accounting

3. Blake tells his client that there are five good reasons to set up a trust. Which of the following is *not* a good reason?

(a) To pay his grandchildren's college tuition if they go to the same college he attended

(b) To save money, since a trust is cheaper than a will

(c) To make sure the money is properly invested

(d) To avoid probate

(e) To safeguard his privacy

4. A(n) ________ power of attorney becomes effective when signed. A(n) ________ power of attorney becomes effective at a later date. A(n) ________ power of attorney is valid even if the principal becomes incapacitated.

(a) durable, springing, immediate

(b) springing, durable, durable

(c) immediate, springing, durable

(d) immediate, durable, durable

5. If Chip buys an insurance policy covering his daughter Sarah's apartment, then ________ is the insured, ________ is the beneficiary, and ________ is the owner.

(a) Sarah, Sarah, Sarah,

(b) Chip, Chip, Chip

(c) Sarah, Chip, Chip

(d) Sarah, Sarah, Chip

ESSAY QUESTIONS

1. If your grandparents were to die leaving a large estate, and all of their children were also dead, would you prefer a per stirpes or per capita distribution?

2. YOU BE THE JUDGE WRITING PROBLEM Linda and Eddie had two children before they were divorced. Under the terms of their divorce, Eddie became the owner of their house. When he died suddenly, their children inherited the property. Linda moved into the house with the children and began paying the mortgage that was in Eddie's name. She also took out fire insurance. When the house burned down, the insurance company refused to pay the policy because she did not have an insurable interest. Do you agree? **Argument for the Insurance Company:** Linda did not own the house; therefore, she had no insurable interest. **Argument for Linda:** She was harmed when the house burned down because she and her children had no place to live. She was paying the mortgage, so she also had a financial interest.

3. Dannie Harvey sued her employer, O. R. Whitaker, for sexual harassment, discrimination, and defamation. Whitaker counterclaimed for libel and slander, requesting $1 million in punitive damages. Both Whitaker and Harvey were insured by Allstate under identical homeowner's policies. This policy explicitly promised to defend Harvey against the exact claim Whitaker had made against her. Harvey's

Allstate agent, however, told her that she was not covered. Because the agent kept all copies of Harvey's insurance policies in his office, she took him at his word. She had no choice but to defend against the claim on her own. Whitaker mounted an exceedingly hostile litigation attack, taking 80 depositions. After a year, Allstate agreed to defend Harvey. However, instead of hiring the lawyer who had been representing her, it chose another lawyer who had no expertise in this type of case and was a close friend of Whitaker's attorney. Harvey's new lawyer refused to meet her or to attend any depositions. Harvey and Whitaker finally settled. Whitaker had spent $1 million in legal fees, Harvey $169,000, and Allstate $2,513. Does Harvey have a claim against Allstate?

4. Clyde received a letter from his automobile insurance company notifying him that it would not renew his policy that was set to expire on February 28. Clyde did not obtain another policy, and, in a burst of astonishingly bad luck, on March 1, at 2:30 a.m., he struck another vehicle, killing two men. Later that day, Clyde applied for insurance coverage. As part of this application, he indicated that he had not been involved in any accident in the last three years. The new policy was effective as of 12:01 a.m. on March 1. Will the estates of the two dead men be able to recover under this policy?

5. Da-Keen is the trustee of a trust that was established by his parents to pay his children's college tuition. One of his children is going to Princeton, where the tuition is more than $50,000. Another child is attending a state university, where the tuition is one-tenth of Princeton's. He is paying both of these tuition bills. In addition, he has used trust assets to buy bonds issued by Harvard, the college he attended. Has Da-Keen violated his fiduciary duty?

Discussion Questions

1. Suzy Tomlinson, 74, met a tragic end—she drowned, fully clothed, in her bathtub after a night out partying with 36-year-old J. B. Carlson. He had taken her home at 1 a.m. and was the last person to see her alive. The two were not only party buddies; Suzy was on the board of directors of a company J. B. had started. Her family was stunned to find out that she had a $15 million life insurance policy, with the proceeds payable to a company J. B. controlled. He said it was a key person policy. He wanted to protect the company if she died because she had frequently introduced him to potential investors. Is the life insurance policy valid?

2. Should you have a will? Do you have one?

3. Is an asset protection trust fair? Should wealthy people be able to avoid paying their liabilities? What about perpetual trusts that avoid estate taxes forever? If you were a state legislator, how would you vote when this legislation came up for approval? If you had substantial assets, would you put them in such a trust? What Life Principles apply here?

4. Billionaire Warren Buffett said that children should inherit enough money so that they can do anything, but not so much that they can do nothing. Is it good for people to inherit money? How much? At what age? How much would you like to leave your children?

5. **ETHICS** Donna and Carl Nichols each bought term life insurance from Prudential Insurance Company of America. These policies contained a provision stating that if the insured became disabled, the premiums did not have to be paid and the policy would still stay in effect. This term is called a "waiver of premium." Carl became totally disabled, and his premiums were waived. Some years later, two Prudential sales managers convinced the Nicholses to convert their term life insurance policies into whole life insurance policies. They promised that, once Carl made the conversion, he would only have to pay premiums on the new policy for a six-month waiting period. They even wrote "WP to be included in this policy" on the application form. "WP" stood for waiver of premium benefit. Only after the new policy was issued did the Nicholses learn that Prudential would not waive the premium. The Nicholses had exchanged a policy on which they owed nothing further for a policy on which they now had to pay premiums that they could not afford. Do the Nicholses have a claim against Prudential? Regardless of the legal outcome, did Prudential have an ethical obligation to the Nicholses?

APPENDIX A

The Constitution of the United States

Preamble

We the People of the United States, in Order to form a more perfect Union, establish Justice, insure domestic Tranquility, provide for the common defense, promote the general Welfare, and secure the Blessings of Liberty to ourselves and our Posterity, do ordain and establish this Constitution for the United States of America.

ARTICLE I

Section 1.

All legislative Powers herein granted shall be vested in a Congress of the United States, which shall consist of a Senate and House of Representatives.

Section 2.

The House of Representatives shall be composed of Members chosen every second Year by the People of the several States, and the Electors in each State shall have the Qualifications requisite for Electors of the most numerous Branch of the State Legislature.

No Person shall be a Representative who shall not have attained to the Age of twenty five Years, and been seven Years a Citizen of the United States, and who shall not, when elected, be an Inhabitant of that State in which he shall be chosen.

Representatives and direct Taxes shall be apportioned among the several States which may be included within this Union, according to their respective Numbers, which shall be determined by adding to the whole Number of free Persons, including those bound to Service for a Term of Years, and excluding Indians not taxed, three fifths of all other Persons. The actual Enumeration shall be made within three Years after the first Meeting of the Congress of the United States, and within every subsequent Term of ten Years, in such Manner as they shall by Law direct. The number of Representatives shall not exceed one for every thirty Thousand, but each State shall have at Least one Representative; and until such enumeration shall be made, the State of New Hampshire shall be entitled to chuse three, Massachusetts eight, Rhode Island and Providence Plantations one, Connecticut five, New-York six, New Jersey four, Pennsylvania eight, Delaware one, Maryland six, Virginia ten, North Carolina five, South Carolina five, and Georgia three.

When vacancies happen in the Representation from any State, the Executive Authority thereof shall issue Writs of Election to fill such vacancies.

The House of Representatives shall chuse their Speaker and other Officers; and shall have the sole Power of Impeachment.

Section 3.

The Senate of the United States shall be composed of two Senators from each State, chosen by the Legislature thereof, for six Years; and each Senator shall have one Vote.

Immediately after they shall be assembled in Consequence of the first Election, they shall be divided as equally as may be into three Classes. The Seats of the Senators of the first Class shall be vacated at the Expiration of the second Year, of the second Class at the Expiration of the fourth Year, and of the third Class at the Expiration of the sixth Year, so that one third may be chosen every second Year; and if Vacancies happen by Resignation or otherwise, during the Recess of the Legislature of any State, the Executive thereof may make temporary Appointments until the next Meeting of the Legislature, which shall then fill such Vacancies.

No Person shall be a Senator who shall not have attained to the Age of thirty Years, and been nine Years a Citizen of the United States, and who shall not, when elected, be an Inhabitant of that State for which he shall be chosen.

The Vice President of the United States shall be President of the Senate, but shall have no Vote, unless they be equally divided.

The Senate shall chuse their other Officers, and also a President pro tempore, in the Absence of the Vice President, or when he shall exercise the Office of President of the United States.

The Senate shall have the sole power to try all Impeachments. When sitting for that Purpose, they shall be an Oath or Affirmation. When the President of the United States is tried, the Chief Justice shall preside: And no Person shall be convicted without the Concurrence of two thirds of the Members present.

Judgment in Cases of Impeachment shall not extend further than to removal from Office, and disqualification to hold and enjoy any Office of honor, Trust or Profit under the United States: but the Party convicted shall nevertheless be liable and subject to Indictment, Trial, Judgment and Punishment, according to Law.

Section 4.

The Times, Places and Manner of holding Elections for Senators and Representatives, shall be prescribed in each State by the Legislature thereof: but the Congress may at any time by Law make or alter such Regulations, except as to the Places of chusing Senators.

The Congress shall assemble at least once in every Year, and such Meeting shall be on the first Monday in December, unless they shall by Law appoint a different Day.

Section 5.

Each House shall be the Judge of the Elections, Returns and Qualifications of its own Members, and a Majority of each shall constitute a Quorum to do Business; but a smaller Number may adjourn from day to day, and may be authorized to compel the Attendance of absent Members, in such Manner, and under such Penalties as each House may provide.

Each House may determine the Rules of its Proceedings, punish its Members for disorderly Behaviour, and, with the Concurrence of two thirds, expel a Member.

Each House shall keep a Journal of its Proceedings, and from time to time publish the same, excepting such Parts as may in their Judgment require Secrecy; and the Yeas and Nays of the Members of either House on any question shall, at the Desire of one fifth of those Present, be entered on the Journal.

Neither House, during the Session of Congress, shall, without the Consent of the other, adjourn for more than three days, nor to any other Place than that in which the two Houses shall be sitting.

Section 6.

The Senators and Representatives shall receive a Compensation for their Services, to be ascertained by Law, and paid out of the Treasury of the United States. They shall in all Cases, except Treason, Felony and Breach of the Peace, be privileged from Arrest during their Attendance at the Session of their respective Houses, and in going to and returning from the same; and for any Speech or Debate in either House, they shall not be questioned in any other Place.

No Senator or Representative shall, during the Time for which he was elected, be appointed to any civil Office under the Authority of the United States, which shall have been created, or the Emoluments whereof shall have been encreased during such time; and no Person holding any Office under the United States, shall be a Member of either House during his Continuance in Office.

Section 7.

All Bills for raising Revenue shall originate in the House of Representatives; but the Senate may propose or concur with Amendments as on other Bills.

Every Bill which shall have passed the House of Representatives and the Senate, shall, before it become a Law, be presented to the President of the United States; If he approve he shall sign it, but if not he shall return it, with his Objections to that House in which it shall have originated, who shall enter the Objections at large on their Journal, and proceed to reconsider it. If after such Reconsideration two thirds of that House shall agree to pass the Bill, it shall be sent, together with the Objections, to the other House, by which it shall likewise be reconsidered, and if approved by two thirds of that House, it shall become a Law. But in all such Cases the Votes of both Houses shall be determined by Yeas and Nays, and the Names of the Persons voting for and against the Bill shall be entered on the Journal of each House respectively. If any Bill shall not be returned by the President within ten Days (Sundays excepted) after it shall have been presented to him, the Same shall be a Law, in like Manner as if he had signed it, unless the Congress by their Adjournment prevent its Return, in which Case it shall not be a Law.

Every Order, Resolution, or Vote to which the Concurrence of the Senate and House of Representatives may be necessary (except on a question of Adjournment) shall be presented to the President of the United States; and before the Same shall take Effect, shall be approved by him, or being disapproved by him, shall be repassed by two thirds of the Senate and House of Representatives, according to the Rules and Limitations prescribed in the Case of a Bill.

Section 8.

The Congress shall have Power to lay and collect Taxes, Duties, Imposts and Excises, to pay the Debts and provide for the common Defence and general Welfare of the United States; but all Duties, Imposts and Excises shall be uniform throughout the United States;

To borrow Money on the credit of the United States;

To regulate Commerce with foreign Nations, and among the several States, and with the Indian Tribes;

To establish an uniform Rule of Naturalization, and uniform Laws on the subject of Bankruptcies throughout the United States;

To coin Money, regulate the Value thereof, and of foreign Coin, and fix the Standard of Weights and Measures;

To provide for the Punishment of counterfeiting the Securities and current Coin of the United States;

To establish Post Offices and post Roads;

To promote the Progress of Science and useful Arts, by securing for limited Times to Authors and Inventors the exclusive Right to their respective Writings and Discoveries;

To constitute Tribunals inferior to the Supreme Court;

To define and punish Piracies and Felonies committed on the high Seas, and Offenses against the Law of Nations;

To declare War, grant Letters of Marque and Reprisal, and make Rules concerning Captures on Land and Water;

To raise and support Armies, but no Appropriation of Money to that Use shall be for a longer Term than two Years;

To provide and maintain a Navy;

To make Rules for the Government and Regulation of the land and naval Forces;

To provide for calling forth the Militia to execute the Laws of the Union, suppress Insurrections and repel Invasions;

To provide for organizing, arming, and disciplining, the Militia, and for governing such Part of them as may be employed in the Service of the United States, reserving to the States respectively, the Appointment of the Officers, and the Authority of training the Militia according to the discipline described by Congress;

To exercise exclusive Legislation in all Cases whatsoever, over such District (not exceeding ten Miles square) as may, by Cession of particular States, and the Acceptance of Congress, become the Seat of the Government of the United States, and to exercise like Authority over all Places purchased by the Consent of the Legislature of the State in which the Same shall be, for the Erection of Forts, Magazines, Arsenals, dock-Yards, and other needful Buildings;—And

To make all Laws which shall be necessary and proper for carrying into Execution the foregoing Powers, and all other Powers vested by this Constitution in the Government of the United States, or in any Department or Officer thereof.

Section 9.

The Migration or Importation of such Persons as any of the States now existing shall think proper to admit, shall not be prohibited by the Congress prior to the Year one thousand eight hundred and eight, but a Tax or Duty may be imposed on such Importation, not exceeding ten dollars for each Person.

The Privilege of the Writ of Habeas Corpus shall not be suspended, unless when in Cases of Rebellion or Invasion the public Safety may require it.

No Bill of Attainder or ex post facto Law shall be passed.

No Capitation, or other direct, Tax shall be laid, unless in Proportion to the Census or Enumeration herein before directed to be taken.

No Tax or Duty shall be laid on Articles exported from any State.

No Preference shall be given by any Regulation of Commerce or Revenue to the Ports of one State over those of another; nor shall Vessels bound to, or from, one State, be obliged to enter, clear, or pay Duties in another.

No Money shall be drawn from the Treasury, but in Consequence of Appropriations made by Laws; and a regular Statement and Account of the Receipts and Expenditures of all public Money shall be published from time to time.

No Title of Nobility shall be granted by the United States: And no Person holding any Office of Profit or Trust under them, shall, without the Consent of the Congress, accept of any present, Emolument, Office, or Title, of any kind whatever, from any King, Prince, or foreign State.

Section 10.

No State shall enter into any Treaty, Alliance, or Confederation; grant Letters of Marque and Reprisal; coin Money; emit Bills of Credit; make any Thing but gold and silver Coin a Tender in Payment of Debts; pass any Bill of Attainder, ex post facto Law, or Law impairing the Obligation of Contracts, or grant any Title of Nobility.

No State shall, without the Consent of the Congress, lay any Imposts or Duties on Imports or Exports, except what may be absolutely necessary for executing its inspection Laws: and the net Produce of all Duties and Imposts, laid by any State on Imports or Exports, shall be for the Use of the Treasury of the United States; and all such Laws shall be subject to the Revision and Controul of the Congress.

No State shall, without the Consent of Congress, lay any Duty of Tonnage, keep Troops, or Ships of War in time of Peace, enter into any Agreement or Compact with another State, or with a foreign Power, or engage in War, unless actually invaded, or in such imminent Danger as will not admit of delay.

ARTICLE II

Section 1.

The executive Power shall be vested in a President of the United States of America. He shall hold his Office during the Term of four Years, and, together with the Vice President, chosen for the same Term, be elected, as follows:

Each State shall appoint, in such Manner as the Legislature thereof may direct, a Number of Electors, equal to the whole Number of Senators and Representatives to which the State may be entitled in the Congress: but no Senator or Representative, or Person holding an Office of Trust or Profit under the United States, shall be appointed an Elector.

The Electors shall meet in their respective States, and vote by Ballot for two Persons, of whom one at least shall not be an Inhabitant of the same State with themselves. And they shall make a list of all the Persons voted for, and of the Number of Votes for each; which List they shall sign and certify, and transmit sealed to the Seat of the Government of the United States, directed to the President of the Senate. The President of the Senate shall, in the presence of the Senate and House of Representatives, open all the Certificates, and the Votes shall be counted. The Person having the greatest Number of Votes shall be the President, if such Number be a Majority of the whole Number of Electors appointed; and if there be more than one who have such Majority, and have an equal Number of Votes, then the House of Representatives shall immediately chuse by Ballot one of them for President; and if no Person have a Majority, then from the five highest on the List the said House shall in like Manner chuse the President. But in chusing the President, the Votes shall be taken by States, the Representation from each State having one Vote; A quorum for this Purpose shall consist of a Member or Members from two thirds of the States, and a Majority of all the States shall be necessary to a Choice. In every Case, after the Choice of the President, the Person having the greatest Number of Votes of the Electors shall be the Vice President. But if there should remain two or more who have equal Votes, the Senate shall chuse from them by Ballot the Vice President.

The Congress may determine the Time of Chusing the Electors, and the Day on which they shall give their Votes; which Day shall be the same throughout the United States.

No Person except a natural born Citizen, or a Citizen of the United States, at the time of the Adoption of this Constitution, shall be eligible to the Office of President; neither shall any Person be eligible to that Office who shall not have attained to the Age of thirty five Years, and been fourteen Years a Resident within the United States.

In Case of the Removal of the President from Office, or of his Death, Resignation, or Inability to discharge the Powers and Duties of the said Office, the Same shall devolve on the Vice President, and the Congress may by Law provide for the Case of Removal, Death, Resignation or Inability, both of the President and Vice President, declaring what Officer shall then act as President, and such Officer shall act accordingly, until the Disability be removed, or a President shall be elected.

The President shall, at stated Times, receive for his Services, a Compensation, which shall neither be encreased nor diminished during the Period for which he shall have been elected, and he shall not receive within that Period any other Emolument from the United States, or any of them.

Before he enter on the Execution of his Office, he shall take the following Oath or Affirmation:—"I do solemnly swear (or affirm) that I will faithfully execute the Office of President of the United States, and will to the best of my Ability, preserve, protect and defend the Constitution of the United States."

Section 2.

The President shall be Commander in Chief of the Army and Navy of the United States, and of the Militia of the several States, when called into the actual Service of the United States; he may require the Opinion, in writing, of the principal Officer in each of the executive Departments, upon any Subject relating to the Duties of their

respective Offices, and he shall have Power to grant Reprieves and Pardons for Offenses against the United States, except in Cases of Impeachment.

He shall have Power, by and with the Advice and Consent of the Senate, to make Treaties, providing two thirds of the Senators present concur; and he shall nominate, and by and with the Advice and Consent of the Senate, shall appoint Ambassadors, other public Ministers and Consuls, Judges of the supreme Court, and all other Officers of the United States, whose Appointments are not herein otherwise provided for, and which shall be established by Law: but the Congress may by Law vest the Appointment of such inferior Officers, as they think proper, in the President alone, in the Courts of Law, or in the Heads of Departments.

The President shall have Power to fill up all Vacancies that may happen during the Recess of the Senate, by granting Commissions which shall expire at the End of their next Session.

Section 3.

He shall from time to time give to the Congress Information of the State of the Union, and recommend to their Consideration such Measures as he shall judge necessary and expedient; he may, on extraordinary Occasions, convene both Houses, or either of them, and in Case of Disagreement between them, with Respect to the Time of Adjournment, he may adjourn them to such Time as he shall think proper, he shall receive Ambassadors and other public Ministers; he shall take Care that the Laws be faithfully executed, and shall Commission all the Offices of the United States.

Section 4.

The President, Vice President and all civil Officers of the United States, shall be removed from Office on Impeachment for, and Conviction of, Treason, Bribery, or other high Crimes and Misdemeanors.

ARTICLE III

Section 1.

The judicial Power of the United States, shall be vested in one supreme Court, and in such inferior Courts as the Congress may from time to time ordain and establish. The Judges, both of the supreme and inferior Courts, shall hold their Offices during good Behaviour, and shall, at Times, receive for their Services, a Compensation, which shall not be diminished during their Continuance in Office.

Section 2.

The judicial Power shall extend to all Cases, in Law and Equity, arising under this Constitution, the Laws of the United States, and Treaties made, or which shall be made, under their Authority;—to all Cases affecting Ambassadors, other public Ministers and Consuls;—to all Cases of admiralty and maritime Jurisdiction;—to Controversies to which the United States shall be a Party;—to controversies between two or more States;—between a State and Citizens of another State;—between Citizens of different States;—between Citizens of the same State claiming Lands under Grants of different States; and between a State, or the Citizens thereof, and foreign States, Citizens or Subjects.

In all Cases affecting Ambassadors, other public Ministers and Consuls, and those in which a State shall be Party, the supreme Court shall have original Jurisdiction. In all the other Cases before mentioned, the supreme Court shall have appellate Jurisdiction, both as to Law and Fact, with such Exceptions, and under such Regulations as the Congress shall make.

The Trial of all Crimes, except in Cases of Impeachment, shall be by Jury; and such Trial shall be held in the State where the said Crimes shall have been committed; but when not committed within any State, the Trial shall be at such Place or Places as the Congress may by Law have directed.

Section 3. Treason against the United States, shall consist only in levying War against them, or in adhering to their Enemies, giving them Aid and Comfort. No Person shall be convicted of Treason unless on the Testimony of two Witnesses to the same overt Act, or on Confession in open Court.

The Congress shall have Power to declare the Punishment of Treason, but no Attainder of Treason shall work Corruption of Blood, or Forfeiture except during the Life of the Person attainted.

ARTICLE IV

Section 1. Full Faith and Credit shall be given in each State to the public Acts, Records, and judicial Proceedings of every other State. And the Congress may by general Laws prescribe the Manner in which such Acts, Records and Proceedings shall be proved, and the Effect thereof.

Section 2. The Citizens of each State shall be entitled to all Privileges and Immunities of Citizens in the several States.

A Person charged in any State with Treason, Felony, or other Crime, who shall flee from Justice, and be found in another State, shall on Demand of the executive Authority of the State from which he fled, be delivered up, to be removed to the State having Jurisdiction of the Crime.

No Person held to Service or Labour in one State, under the Laws thereof, escaping into another, shall, in Consequence of any Law or Regulation therein, be discharged from such Service or Labour, but shall be delivered up on Claim of the Party to whom such Service or Labour may be due.

Section 3. New States may be admitted by the Congress into this Union; but no new State shall be formed or erected within the Jurisdiction of any other State; nor any State be formed by the Junction of two or more States, or Parts of States, without the Consent of the Legislatures of the States concerned as well as the Congress.

The Congress shall have Power to dispose of and make all needful Rules and Regulations respecting the Territory or other Property belonging to the United States; and nothing in this Constitution shall be so construed as to Prejudice any Claims of the United States, or of any particular State.

Section 4. The United States shall guarantee to every State in this Union a Republican Form of Government, and shall protect each of them against Invasion; and on Application of the Legislature, or of the Executive (when the Legislature cannot be convened) against domestic Violence.

ARTICLE V

The Congress, whenever two thirds of both Houses shall deem it necessary, shall propose Amendments to this Constitution, or, on the Application of the Legislatures of two thirds of the several States, shall call a Convention for proposing Amendments, which, in either Case, shall be valid to all Intents and Purposes, as Part of this Constitution, when ratified by the Legislatures of three fourths of the several States,

or by Conventions in three fourths thereof, as the one or the other Mode of Ratification may be proposed by the Congress; Provided that no Amendment which may be made prior to the Year One thousand eight hundred and eight shall in any Manner affect the first and fourth Clauses in the Ninth Section of the first Article; and that no State, without its Consent, shall be deprived of its equal Suffrage in the Senate.

ARTICLE VI

All Debts contracted and Engagements entered into, before the Adoption of this Constitution, shall be as valid against the United States under this Constitution, as under the Confederation.

This Constitution, and the Laws of the United States which shall be made in Pursuance thereof; and all Treaties made, or which shall be made, under the Authority of the United States, shall be the supreme Law of the Land; and the Judges in every State shall be bound thereby, any Thing in the Constitution or Laws of any State to the Contrary notwithstanding.

The Senators and Representatives before mentioned, and the Members of the several State Legislatures, and all executive and judicial Officers, both of the United States and of the Several States, shall be bound by Oath or Affirmation, to support this Constitution; but no religious Test shall ever be required as a Qualification to any Office or public Trust under the United States.

ARTICLE VII

The Ratification of the Conventions of nine States, shall be sufficient for the Establishment of this Constitution between the States so ratifying the Same.

Amendment I [1791].

Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof; or abridging the freedom of speech, or the press; or the right of the people peaceably to assemble, and to petition the Government for a redress of grievances.

Amendment II [1791].

A well regulated Militia, being necessary to the security for a free State, the right of the people to keep and bear Arms, shall not be infringed.

Amendment III [1791].

No Soldier shall, in time of peace be quartered in any house, without the consent of the Owner, nor in time of war, but in a manner to be prescribed by law.

Amendment IV [1791].

The right of the people to be secure in their persons, houses, papers, and effects, against unreasonable searches and seizures, shall not be violated, and no Warrants shall issue, but upon probable cause, supported by Oath or Affirmation, and particularly describing the place to be searched, and the persons or things to be seized.

Amendment V [1791].

No person shall be held to answer for a capital, or otherwise infamous crime, unless on a presentment or indictment of a Grand Jury, except in cases arising in the land or naval forces, or in the Militia, when in actual service in time of War or public danger;

nor shall any person be subject for the same offense to be twice put in jeopardy of life or limb; nor shall be compelled in any criminal case to be a witness against himself, nor be deprived of life, liberty, or property, without due process of law; nor shall private property be taken for public use, without just compensation.

Amendment VI [1791].

In all criminal prosecutions, the accused shall enjoy the right to a speedy and public trial, by an impartial jury of the State and district wherein the crime shall have been committed, which district shall have been previously ascertained by law, and to be informed of the nature and cause of the accusation; to be confronted with the Witnesses against him; to have compulsory process for obtaining witnesses in his favor, and to have the Assistance of counsel for his defence.

Amendment VII [1791].

In suits at common law, where the value in controversy shall exceed twenty dollars, the right of trial by jury shall be preserved, and no fact tried by a jury, shall be otherwise re-examined in any Court of the United States, than according to the rules of the common law.

Amendment VIII [1791].

Excessive bail shall not be required, no excessive fines imposed, nor cruel and unusual punishments inflicted.

Amendment IX [1791].

The enumeration in the Constitution, of certain rights, shall not be construed to deny or disparage others retained by the people.

Amendment X [1791].

The powers not delegated to the United States by the Constitution, nor prohibited by it to the States, are reserved to the States respectively, or to the people.

Amendment XI [1798].

The judicial power of the United States shall not be construed to extend to any suit in law or equity, commenced or prosecuted against one of the United States by Citizens of another State, or by Citizens or Subjects of any Foreign State.

Amendment XII [1804].

The Electors shall meet in their respective states and vote by ballot for President and Vice-President, one of whom, at least, shall not be an inhabitant of the same state with themselves; they shall name in their ballots the person voted for as President, and in distinct ballots the person voted for as Vice-President, and they shall make distinct lists of all persons voted for as President, and of all persons voted for as Vice-President, and of the number of votes for each, which lists they shall sign and certify, and transmit sealed to the seat of the government of the United States, directed to the President of the Senate;—The President of the Senate shall, in the presence of the Senate and House of Representatives, open all the certificates and the votes shall then be counted;—The person having the greatest number of votes for President, shall be the President, if such number be a majority of the whole number of Electors appointed; and if no person have such majority, then from the persons having the highest numbers not exceeding three on the list of those voted for as President, the House of Representatives shall choose immediately, by ballot, the President. But in choosing the President, the votes shall be taken by states, the representation from each state having one vote; a quorum for this purpose shall consist of a member or members from two-thirds of the states, and a majority of all the states shall be necessary to a choice. And if the House of Representatives shall not choose a President whenever the right of choice shall devolve upon them, before the fourth day of March next following, then the Vice-President shall act as President, as in the case of the death or other constitutional disability of the President. The person having

the greatest number of votes as Vice-President, shall be the Vice-President, if such number be a majority of the whole number of Electors appointed, and if no person have a majority, then from the two highest numbers on the list, the Senate shall choose the Vice-President; a quorum for the purpose shall consist of two-thirds of the whole number of Senators, and a majority of the whole number shall be necessary to a choice. But no person constitutionally ineligible to the office of President shall be eligible to that of the Vice-President of the United States.

Amendment XIII [1865].

Section 1. Neither slavery nor involuntary servitude, except as a punishment for crime whereof the party shall have been duly convicted, shall exist within the United States, or any place subject to their jurisdiction.

Section 2. Congress shall have power to enforce this article by appropriate legislation.

Amendment XIV [1868].

Section 1. All persons born or naturalized in the United States, and subject to the jurisdiction thereof, are citizens of the United States and of the State wherein they reside. No State shall make or enforce any law which shall abridge the privileges or immunities of citizens of the United States; nor shall any State deprive any person of life, liberty, or property, without due process of law; nor deny to any person within its jurisdiction the equal protection of the laws.

Section 2. Representatives shall be appointed among the several States according to their respective numbers, counting the whole number of persons in each State, excluding Indians not taxed. But when the right to vote at any election for the choice of electors for President and Vice President of the United States, Representatives in Congress, the Executive and Judicial officers of a State, or the members of the Legislature thereof, is denied to any of the male inhabitants of such State, being twenty-one years of age, and citizens of the United States, or in any way abridged, except for participation in rebellion, or other crime, the basis of representation therein shall be reduced in the proportion which the number of such male citizens shall bear the whole number of male citizens twenty-one years of age in such State.

Section 3. No person shall be a Senator or Representative in Congress, or elector of President and Vice President, or hold any office, civil or military, under the United States, or under any State, who, having previously taken an oath, as a member of Congress, or as an officer of the United States, or as a member of any State legislature, or as an executive or judicial officer of any State, to support the Constitution of the United States, shall have engaged in insurrection or rebellion against the same, or given aid or comfort to the enemies thereof. But Congress may by a vote of two-thirds of each House, remove such disability.

Section 4. The validity of the public debt of the United States, authorized by law, including debts incurred for payment of pensions and bounties for services in suppressing insurrection or rebellion, shall not be questioned. But neither the United States nor any State shall assume or pay any debt or obligation incurred in aid of insurrection of rebellion against the United States, or any claim for the loss or emancipation of any slave; but all such debts, obligations and claims shall be held illegal and void.

Section 5. The Congress shall have power to enforce, by appropriate legislation, the provisions of this article.

Amendment XV [1870].

Section 1. The right of citizens of the United States to vote shall not be denied or abridged by the United States or by any State on account of race, color, or previous condition of servitude.

Section 2. The Congress shall have power to enforce this article by appropriate legislation.

Amendment XVI [1913].

The Congress shall have power to lay and collect taxes on incomes, from whatever source derived, without apportionment among the several States, and without regard to any census or enumeration.

Amendment XVII [1913].

The Senate of the United States shall be composed of two Senators from each State, elected by the people thereof, for six years; and each Senator shall have one vote. The electors in each State shall have the qualifications requisite for electors of the most numerous branch of the State legislatures.

When vacancies happen in the representation of any State in the Senate, the executive authority of each State shall issue writs of election to fill such vacancies; *Provided,* That the legislature of any State may empower the executive thereof to make temporary appointments until the people fill the vacancies by election as the legislature may direct.

This amendment shall not be construed as to affect the election or term of any Senator chosen before it becomes valid as part of the Constitution.

Amendment XVIII [1919].

Section 1. After one year from the ratification of this article the manufacture, sale, or transportation of intoxicating liquors within, the importation thereof into, or the exportation thereof from the United States and all territory subject to the jurisdiction thereof for beverage purposes is hereby prohibited.

Section 2. The Congress and the several States shall have concurrent power to enforce this article by appropriate legislation.

Section 3. This article shall be inoperative unless it shall have been ratified as an amendment to the Constitution by the legislatures of the several States, as provided in the Constitution, within seven years from the date of the submission hereof to the States by the Congress.

Amendment XIX [1920].

The right of citizens of the United States to vote shall not be denied or abridged by the United States or by any State on account of sex.

Congress shall have power to enforce this article by appropriate legislation.

Amendment XX [1933].

Section 1. The terms of the President and Vice President shall end at noon on the 20th day of January, and the terms of Senators and Representatives at noon on the 3d day of January, of the years in which such terms would have ended if this article had not been ratified; and the terms of their successors shall then begin.

Section 2. The Congress shall assemble at least once in every year, and such meeting shall begin at noon on the 3d day of January, unless they shall by law appoint a different day.

Section 3. If, at the time fixed for the beginning of the term of the President, the President elect shall have died, the Vice President elect shall become President. If a President shall not have been chosen before the time fixed for the beginning of his term, or if the President elect shall have failed to qualify, then the Vice President elect shall act as President until a President shall have qualified; and the Congress may by law provide for the case wherein neither a President elect nor a Vice President elect shall have qualified, declaring who shall then act as President, or the manner in which one who is to act shall be selected, and such person shall act accordingly until a President or Vice President shall have qualified.

Section 4. The Congress may by law provide for the case of the death of any of the persons from whom the House of Representatives may choose a President whenever the right of choice shall have devolved upon them, and for the case of the death of any of the persons from whom the Senate may choose a Vice President whenever the right of choice shall have devolved upon them.

Section 5. Sections 1 and 2 shall take effect on the 15th day of October following the ratification of this article.

Section 6. This article shall be inoperative unless it shall have been ratified as an amendment to the Constitution by the legislatures of three-fourths of the several States within seven years from the date of its submission.

Amendment XXI [1933].

Section 1. The eighteenth article of amendment to the Constitution of the United States is hereby repealed.

Section 2. The transportation or importation into any State, Territory, or possession of the United States for delivery or use therein of intoxicating liquors, in violation of the laws thereof, is hereby prohibited.

Section 3. This article shall be inoperative unless it shall have been ratified as an amendment to the Constitution by conventions in the several States, as provided in the Constitution, within seven years from the date of the submission hereof to the States by the Congress.

Amendment XXII [1951].

Section 1. No person shall be elected to the office of the President more than twice, and no person who has held the office of President, or acted as President, for more than two years of a term to which some other person was elected President shall be elected to the office of the President more than once. But this Article shall not apply to any person holding the office of President when this Article was proposed by the Congress, and shall not prevent any person who may be holding the office of President, or acting as President, during the term within which this Article becomes operative from holding the office of President, or acting as President during the remainder of such term.

Section 2. This article shall be inoperative unless it shall have been ratified as an amendment to the Constitution by the legislatures of three-fourths of the several States within seven years from the date of its submission to the States by the Congress.

Amendment XXIII [1961].

Section 1. The District constituting the seat of Government of the United States shall appoint in such manner as the Congress may direct:

A number of electors of President and Vice President equal to the whole number of Senators and Representatives in Congress to which the District would be entitled if it were a State, but in no event more than the least populous State; they shall be in addition to those appointed by the States, but they shall be considered, for the purposes of the election of President and Vice President, to be electors appointed by a State; and they shall meet in the District and perform such duties as provided by the twelfth article of amendment.

Section 2. The Congress shall have power to enforce this article by appropriate legislation.

Amendment XXIV [1964].

Section 1. The right of citizens of the United States to vote in any primary or other election for President or Vice President, for electors for President or Vice President, or for Senator or Representative in Congress, shall not be denied or abridged by the United States or any State by reason of failure to pay any poll tax or other tax.

Section 2. The Congress shall have power to enforce this article by appropriate legislation.

Amendment XXV [1967].

Section 1. In case of the removal of the President from office or of his death or resignation, the Vice President shall become President.

Section 2. Whenever there is a vacancy in the office of the Vice President, the President shall nominate a Vice President who shall take office upon confirmation by a majority vote of both Houses of Congress.

Section 3. Whenever the President transmits to the President pro tempore of the Senate and the Speaker of the House of Representatives his written declaration that he is unable to discharge the powers and duties of his office, and until he transmits to them a written declaration to the contrary, such powers and duties shall be discharged by the Vice President as Acting President.

Section 4. Whenever the Vice President and a majority of either the principal officers of the executive departments or of such other body as Congress may by law provide, transmit to the President pro tempore of the Senate and the Speaker of the House of Representatives their written declaration that the President is unable to discharge the powers and duties of his office, the Vice President shall immediately assume the powers and duties of the office as Acting President.

Thereafter, when the President transmits to the President pro tempore of the Senate and the Speaker of the House of Representatives his written declaration that no inability exists, he shall resume the powers and duties of his office unless the Vice President and a majority of either the principal officers of the executive department or of such other body as Congress may by law provide, transmit within four days to the President pro tempore of the Senate and the Speaker of the House of Representatives their written declaration that the President is unable to discharge the powers and duties of his office. Thereupon Congress shall decide the issue, assembling within forty-eight hours for that purpose if not in session. If the Congress, within twenty-one days after receipt of the latter written declaration, or, if Congress is not in session, within twenty-one days after Congress is required to assemble, determines by two-thirds vote of both Houses that the President is unable to discharge the powers and duties of his office, the Vice President shall continue to discharge the same as Acting President; otherwise, the President shall resume the powers and duties of his office.

Amendment XXVI [1971].

Section 1. The right of citizens of the United States, who are eighteen years of age or older, to vote shall not be denied or abridged by the United States or by any State on account of age.

Section 2. The Congress shall have power to enforce this article by appropriate legislation.

Amendment XXVII [1992].

No law, varying the compensation for the services of the Senators and Representatives, shall take effect, until an election of Representatives shall have intervened.

APPENDIX B

UNIFORM COMMERCIAL CODE (SELECTED PROVISIONS)

The code consists of the following articles:

Art.

1. General provisions
2. Sales

2A. Leases

3. Negotiable instruments
4. Bank deposits and collections

4A. Fund transfers

5. Letters of credit
6. Repealer of Article 6—Bulk Transfers and [Revised] Article 6—Bulk sales
7. Warehouse Receipts, Bills of Lading and Other Documents of Title
8. Investment Securities
9. Secured Transactions
10. Effective Date and Repealer
11. Effective Date and Transmission provisions

ARTICLE I GENERAL PROVISIONS

PART 1 Short Title, Construction, Application and Subject Matter of the Act

§ 1-101. Short Title.

This Act shall be known and may be cited as Uniform Commercial Code.

§ 1-102. Purposes; Rules of Construction; Variation by Agreement.

(1) This Act shall be liberally construed and applied to promote its underlying purposes and policies.

(2) Underlying purposes and policies of this Act are

(a) to simplify, clarify and modernize the law governing commercial transactions;

(b) to permit the continued expansion of commercial practices through custom, usage and agreement of the parties;

(c) to make uniform the law among the various jurisdictions.

(3) The effect of provisions of this Act may be varied by agreement, except as otherwise provided in this Act and except that the obligations of good faith, diligence, reasonableness and care prescribed by this Act may not be disclaimed by agreement but the parties may by agreement determine the standards by which the performance of such obligations is to be measured if such standards are not manifestly unreasonable.

(4) The presence in certain provisions of this Act of the words "unless otherwise agreed" or words of similar import does not imply that the effect of other provisions may not be varied by agreement under subsection (3).

(5) In this Act unless the context otherwise requires

(a) words in the singular number include the plural, and in the plural include the singular;

(b) words of the masculine gender include the feminine and the neuter, and when the sense so indicates words of the neuter gender may refer to any gender.

§ 1-103. Supplementary General Principles of Law Applicable.

Unless displaced by the particular provisions of this Act, the principles of law and equity, including the law merchant and the law relative to capacity to contract, principal and agent, estoppel, fraud, misrepresentation, duress, coercion, mistake, bankruptcy, or other validating or invalidating cause shall supplement its provisions.

§ 1-104. Construction Against Implicit Repeal.

This Act being a general act intended as a unified coverage of its subject matter, no part of it shall be deemed to be impliedly repealed by subsequent legislation if such construction can reasonably be avoided.

§ 1-105. Territorial Application of the Act; Parties' Power to Choose Applicable Law.

(1) Except as provided hereafter in this section, when a transaction bears a reasonable relation to this state and also to

another state or nation the parties may agree that the law either of this state or of such other state or nation shall govern their rights and duties. Failing such agreement this Act applies to transactions bearing an appropriate relation to this state.

(2) Where one of the following provisions of this Act specifies the applicable law, that provision governs and a contrary agreement is effective only to the extent permitted by the law (including the conflict of laws rules) so specified:

Rights of creditors against sold goods. Section 2–402.

Applicability of the Article on Leases. Sections 2A–105 and 2A–106.

Applicability of the Article on Bank Deposits and Collections. Section 4–102.

Governing law in the Article on Funds Transfers. Section 4A–507.

Letters of Credit, Section 5–116.

Bulk sales subject to the Article on Bulk Sales. Section 6–103.

Applicability of the Article on Investment Securities. Section 8–106.

Law governing perfection, the effect of perfection or nonperfection, and the priority of security interests and agricultural liens. Sections 9–301 through 9–307.

As amended in 1972, 1987, 1988, 1989, 1994, 1995, and 1999.

§ 1–106. Remedies to Be Liberally Administered.

(1) The remedies provided by this Act shall be liberally administered to the end that the aggrieved party may be put in as good a position as if the other party had fully performed but neither consequential or special nor penal damages may be had except as specifically provided in this Act or by other rule of law.

(2) Any right or obligation declared by this Act is enforceable by action unless the provision declaring it specifies a different and limited effect.

§ 1–107. Waiver or Renunciation of Claim or Right After Breach.

Any claim or right arising out of an alleged breach can be discharged in whole or in part without consideration by a written waiver or renunciation signed and delivered by the aggrieved party.

§ 1–108. Severability.

If any provision or clause of this Act or application thereof to any person or circumstances is held invalid, such invalidity shall not affect other provisions or applications of the Act which can be given effect without the invalid provision or application, and to this end the provisions of this Act are declared to be severable.

§ 1–109. Section Captions.

Section captions are parts of this Act.

PART 2 General Definitions and Principles of Interpretation

§ 1–201. General Definitions.

Subject to additional definitions contained in the subsequent Articles of this Act which are applicable to specific Articles or Parts thereof, and unless the context otherwise requires, in this Act:

(1) "Action" in the sense of a judicial proceeding includes recoupment, counterclaim, set-off, suit in equity and any other proceedings in which rights are determined.

(2) "Aggrieved party" means a party entitled to resort to a remedy.

(3) "Agreement" means the bargain of the parties in fact as found in their language or by implication from other circumstances including course of dealing or usage of trade or course of performance as provided in this Act (Sections 1–205 and 2–208). Whether an agreement has legal consequences is determined by the provisions of this Act, if applicable; otherwise by the law of contracts (Section 1–103). (Compare "Contract".)

(4) "Bank" means any person engaged in the business of banking.

(5) "Bearer" means the person in possession of an instrument, document of title, or certificated security payable to bearer or indorsed in blank.

(6) "Bill of lading" means a document evidencing the receipt of goods for shipment issued by a person engaged in the business of transporting or forwarding goods, and includes an airbill. "Airbill" means a document serving for air transportation as a bill of lading does for marine or rail transportation, and includes an air consignment note or air waybill.

(7) "Branch" includes a separately incorporated foreign branch of a bank.

(8) "Burden of establishing" a fact means the burden of persuading the triers of fact that the existence of the fact is more probable than its non-existence.

(9) "Buyer in ordinary course of business" means a person that buys goods in good faith, without knowledge that the sale violates the rights of another person in the goods, and in the ordinary course from a person, other than a pawnbroker, in the business of selling goods of that kind. A person buys goods in the ordinary course if the sale to the person comports with the usual or customary practices in the kind of business in which the seller is engaged or with the seller's own usual or customary practices. A person that sells oil, gas, or other minerals at the wellhead or minehead is a person in the business of selling goods of that kind. A buyer in ordinary course of business may buy for cash, by exchange of other property, or on secured or unsecured credit, and may acquire goods or documents of title

under a pre-existing contract for sale. Only a buyer that takes possession of the goods or has a right to recover the goods from the seller under Article 2 may be a buyer in ordinary course of business. A person that acquires goods in a transfer in bulk or as security for or in total or partial satisfaction of a money debt is not a buyer in ordinary course of business.

(10) "Conspicuous": A term or clause is conspicuous when it is so written that a reasonable person against whom it is to operate ought to have noticed it. A printed heading in capitals (as: NON-NEGOTIABLE BILL OF LADING) is conspicuous. Language in the body of a form is "conspicuous" if it is in larger or other contrasting type or color. But in a telegram any stated term is "conspicuous". Whether a term or clause is "conspicuous" or not is for decision by the court.

(11) "Contract" means the total legal obligation which results from the parties' agreement as affected by this Act and any other applicable rules of law. (Compare "Agreement".)

(12) "Creditor" includes a general creditor, a secured creditor, a lien creditor and any representative of creditors, including an assignee for the benefit of creditors, a trustee in bankruptcy, a receiver in equity and an executor or administrator of an insolvent debtor's or assignor's estate.

(13) "Defendant" includes a person in the position of defendant in a cross-action or counterclaim.

(14) "Delivery" with respect to instruments, documents of title, chattel paper, or certificated securities means voluntary transfer of possession.

(15) "Document of title" includes bill of lading, dock warrant, dock receipt, warehouse receipt or order for the delivery of goods, and also any other document which in the regular course of business or financing is treated as adequately evidencing that the person in possession of it is entitled to receive, hold and dispose of the document and the goods it covers. To be a document of title a document must purport to be issued by or addressed to a bailee and purport to cover goods in the bailee's possession which are either identified or are fungible portions of an identified mass.

(16) "Fault" means wrongful act, omission or breach.

(17) "Fungible" with respect to goods or securities means goods or securities of which any unit is, by nature or usage of trade, the equivalent of any other like unit. Goods which are not fungible shall be deemed fungible for the purposes of this Act to the extent that under a particular agreement or document unlike units are treated as equivalents.

(18) "Genuine" means free of forgery or counterfeiting.

(19) "Good faith" means honesty in fact in the conduct or transaction concerned.

(20) "Holder" with respect to a negotiable instrument, means the person in possession if the instrument is payable to bearer or, in the cases of an instrument payable to an identified person, if the identified person is in possession. "Holder" with respect to a document of title means the person in possession if the goods are deliverable to bearer or to the order of the person in possession.

(21) To "honor" is to pay or to accept and pay, or where a credit so engages to purchase or discount a draft complying with the terms of the credit.

(22) "Insolvency proceedings" includes any assignment for the benefit of creditors or other proceedings intended to liquidate or rehabilitate the estate of the person involved.

(23) A person is "insolvent" who either has ceased to pay his debts in the ordinary course of business or cannot pay his debts as they become due or is insolvent within the meaning of the federal bankruptcy law.

(24) "Money" means a medium of exchange authorized or adopted by a domestic or foreign government and includes a monetary unit of account established by an intergovernmental organization or by agreement between two or more nations.

(25) A person has "notice" of a fact when

(a) he has actual knowledge of it; or

(b) he has received a notice or notification of it; or

(c) from all the facts and circumstances known to him at the time in question he has reason to know that it exists.

A person "knows" or has "knowledge" of a fact when he has actual knowledge of it. "Discover" or "learn" or a word or phrase of similar import refers to knowledge rather than to reason to know. The time and circumstances under which a notice or notification may cease to be effective are not determined by this Act.

(26) A person "notifies" or "gives" a notice or notification to another by taking such steps as may be reasonably required to inform the other in ordinary course whether or not such other actually comes to know of it. A person "receives" a notice or notification when

(a) it comes to his attention; or

(b) it is duly delivered at the place of business through which the contract was made or at any other place held out by him as the place for receipt of such communications.

(27) Notice, knowledge or a notice or notification received by an organization is effective for a particular transaction from the time when it is brought to the attention of the individual conducting that transaction, and in any event from the time when it would have been brought to his attention if the organization had exercised due diligence. An organization exercises due diligence if it maintains reasonable routines for communicating significant information to the person conducting the transaction and there is reasonable compliance with the routines. Due diligence does not require an individual acting for the organization to communicate information unless such communication is part of his regular duties or unless he has reason to know of the transaction and that the transaction would be materially affected by the information.

(28) "Organization" includes a corporation, government or governmental subdivision or agency, business trust, estate, trust, partnership or association, two or more persons having a joint or common interest, or any other legal or commercial entity.

(29) "Party", as distinct from "third party", means a person who has engaged in a transaction or made an agreement within this Act.

(30) "Person" includes an individual or an organization (See Section 1–102).

(31) "Presumption" or "presumed" means that the trier of fact must find the existence of the fact presumed unless and until evidence is introduced which would support a finding of its non-existence.

(32) "Purchase" includes taking by sale, discount, negotiation, mortgage, pledge, lien, issue or re-issue, gift or any other voluntary transaction creating an interest in property.

(33) "Purchaser" means a person who takes by purchase.

(34) "Remedy" means any remedial right to which an aggrieved party is entitled with or without resort to a tribunal.

(35) "Representative" includes an agent, an officer of a corporation or association, and a trustee, executor or administrator of an estate, or any other person empowered to act for another.

(36) "Rights" includes remedies.

(37) "Security interest" means an interest in personal property or fixtures which secures payment or performance of an obligation. The term also includes any interest of a consignor and a buyer of accounts, chattel paper, a payment intangible, or a promissory note in a transaction that is subject to Article 9. The special property interest of a buyer of goods on identification of those goods to a contract for sale under Section 2–401 is not a "security interest", but a buyer may also acquire a "security interest" by complying with Article 9. Except as otherwise provided in Section 2–505, the right of a seller or lessor of goods under Article 2 or 2A to retain or acquire possession of the goods is not a "security interest", but a seller or lessor may also acquire a "security interest" by complying with Article 9. The retention or reservation of title by a seller of goods notwithstanding shipment or delivery to the buyer (Section 2–401) is limited in effect to a reservation of a "security interest".

Whether a transaction creates a lease or security interest is determined by the facts of each case; however, a transaction creates a security interest if the consideration the lessee is to pay the lessor for the right to possession and use of the goods is an obligation for the term of the lease not subject to termination by the lessee, and

(a) the original term of the lease is equal to or greater than the remaining economic life of the goods,

(b) the lessee is bound to renew the lease for the remaining economic life of the goods or is bound to become the owner of the goods,

(c) the lessee has an option to renew the lease for the remaining economic life of the goods for no additional consideration or nominal additional consideration upon compliance with the lease agreement, or

(d) the lessee has an option to become the owner of the goods for no additional consideration or nominal additional consideration upon compliance with the lease agreement.

A transaction does not create a security interest merely because it provides that

(a) the present value of the consideration the lessee is obligated to pay the lessor for the right to possession and use of the goods is substantially equal to or is greater than the fair market value of the goods at the time the lease is entered into,

(b) the lessee assumes risk of loss of the goods, or agrees to pay taxes, insurance, filing, recording, or registration fees, or service or maintenance costs with respect to the goods,

(c) the lessee has an option to renew the lease or to become the owner of the goods,

(d) the lessee has an option to renew the lease for a fixed rent that is equal to or greater than the reasonably predictable fair market rent for the use of the goods for the term of the renewal at the time the option is to be performed, or

(e) the lessee has an option to become the owner of the goods for a fixed price that is equal to or greater than the reasonably predictable fair market value of the goods at the time the option is to be performed.

For purposes of this subsection (37):

(x) Additional consideration is not nominal if (i) when the option to renew the lease is granted to the lessee the rent is stated to be the fair market rent for the use of the goods for the term of the renewal determined at the time the option is to be performed, or (ii) when the option to become the owner of the goods is granted to the lessee the price is stated to be the fair market value of the goods determined at the time the option is to be performed. Additional consideration is nominal if it is less than the lessee's reasonably predictable cost of performing under the lease agreement if the option is not exercised;

(y) "Reasonably predictable" and "remaining economic life of the goods" are to be determined with reference to the facts and circumstances at the time the transaction is entered into; and

(z) "Present value" means the amount as of a date certain of one or more sums payable in the future, discounted to the date certain. The discount is determined by the interest rate specified by the parties if the rate is not manifestly unreasonable at the time the transaction is entered into; otherwise, the discount is determined by a commercially reasonable rate that takes into account the facts and circumstances of each case at the time the transaction was entered into.

(38) "Send" in connection with any writing or notice means to deposit in the mail or deliver for transmission by any other usual means of communication with postage or cost of transmission provided for and properly addressed and in the case of an instrument to an address specified thereon or otherwise agreed, or if there be none to any address reasonable under the circumstances. The receipt of any writing or notice within the time at which it would have arrived if properly sent has the effect of a proper sending.

(39) "Signed" includes any symbol executed or adopted by a party with present intention to authenticate a writing.

(40) "Surety" includes guarantor.

(41) "Telegram" includes a message transmitted by radio, teletype, cable, any mechanical method of transmission, or the like.

(42) "Term" means that portion of an agreement which relates to a particular matter.

(43) "Unauthorized" signature means one made without actual, implied or apparent authority and includes a forgery.

(44) "Value". Except as otherwise provided with respect to negotiable instruments and bank collections (Sections 3–303, 4–210 and 4–211) a person gives "value" for rights if he acquires them

(a) in return for a binding commitment to extend credit or for the extension of immediately available credit whether or not drawn upon and whether or not a chargeback is provided for in the event of difficulties in collection; or

(b) as security for or in total or partial satisfaction of a pre-existing claim; or

(c) by accepting delivery pursuant to a preexisting contract for purchase; or

(d) generally, in return for any consideration sufficient to support a simple contract.

(45) "Warehouse receipt" means a receipt issued by a person engaged in the business of storing goods for hire.

(46) "Written" or "writing" includes printing, typewriting or any other intentional reduction to tangible form.

§ 1–202. Prima Facie Evidence by Third Party Documents.

A document in due form purporting to be a bill of lading, policy or certificate of insurance, official weigher's or inspector's certificate, consular invoice, or any other document authorized or required by the contract to be issued by a third party shall be prima facie evidence of its own authenticity and genuineness and of the facts stated in the document by the third party.

§ 1–203. Obligation of Good Faith.

Every contract or duty within this Act imposes an obligation of good faith in its performance or enforcement.

§ 1–204. Time; Reasonable Time; "Seasonably".

(1) Whenever this Act requires any action to be taken within a reasonable time, any time which is not manifestly unreasonable may be fixed by agreement.

(2) What is a reasonable time for taking any action depends on the nature, purpose and circumstances of such action.

(3) An action is taken "seasonably" when it is taken at or within the time agreed or if no time is agreed at or within a reasonable time.

§ 1–205. Course of Dealing and Usage of Trade.

(1) A course of dealing is a sequence of previous conduct between the parties to a particular transaction which is fairly to be regarded as establishing a common basis of understanding for interpreting their expressions and other conduct.

(2) A usage of trade is any practice or method of dealing having such regularity of observance in a place, vocation or trade as to justify an expectation that it will be observed with respect to the transaction in question. The existence and scope of such a usage are to be proved as facts. If it is established that such a usage is embodied in a written trade code or similar writing the interpretation of the writing is for the court.

(3) A course of dealing between parties and any usage of trade in the vocation or trade in which they are engaged or of which they are or should be aware give particular meaning to and supplement or qualify terms of an agreement.

(4) The express terms of an agreement and an applicable course of dealing or usage of trade shall be construed wherever reasonable as consistent with each other; but when such construction is unreasonable express terms control both course of dealing and usage of trade and course of dealing controls usage trade.

(5) An applicable usage of trade in the place where any part of performance is to occur shall be used in interpreting the agreement as to that part of the performance.

(6) Evidence of a relevant usage of trade offered by one party is not admissible unless and until he has given the other party such notice as the court finds sufficient to prevent unfair surprise to the latter.

§ 1–206. Statute of Frauds for Kinds of Personal Property Not Otherwise Covered.

(1) Except in the cases described in subsection (2) of this section a contract for the sale of personal property is not enforceable by way of action or defense beyond five thousand dollars in amount or value of remedy unless there is some writing which indicates that a contract for sale has been made between the parties at a defined or stated price, reasonably identifies the subject matter, and is signed by the party against whom enforcement is sought or by his authorized agent.

(2) Subsection (1) of this section does not apply to contracts for the sale of goods (Section 2–201) nor of securities (Section 8–113) nor to security agreements (Section 9–203).

As amended in 1994.

§ 1–207. Performance or Acceptance Under Reservation of Rights.

(1) A party who with explicit reservation of rights performs or promises performance or assents to performance in a manner demanded or offered by the other party does not thereby prejudice the rights reserved. Such words as "without prejudice", "under protest" or the like are sufficient.

(2) Subsection (1) does not apply to an accord and satisfaction.

As amended in 1990.

§ 1–208. Option to Accelerate at Will.

A term providing that one party or his successor in interest may accelerate payment or performance or require collateral or additional collateral "at will" or "when he deems himself insecure"

or in words of similar import shall be construed to mean that he shall have power to do so only if he in good faith believes that the prospect of payment or performance is impaired. The burden of establishing lack of good faith is on the party against whom the power has been exercised.

§ 1-209. Subordinated Obligations.

An obligation may be issued as subordinated to payment of another obligation of the person obligated, or a creditor may subordinate his right to payment of an obligation by agreement with either the person obligated or another creditor of the person obligated. Such a subordination does not create a security interest as against either the common debtor or a subordinated creditor. This section shall be construed as declaring the law as it existed prior to the enactment of this section and not as modifying it. Added 1966.

Note: *This new section is proposed as an optional provision to make it clear that a subordination agreement does not create a security interest unless so intended.*

ARTICLE II
SALES

PART 1 Short Title, General Construction and Subject Matter

§ 2-101. Short Title.

This Article shall be known and may be cited as Uniform Commercial Code—Sales.

§ 2-102. Scope; Certain Security and Other Transactions Excluded From This Article.

Unless the context otherwise requires, this Article applies to transactions in goods; it does not apply to any transaction which although in the form of an unconditional contract to sell or present sale is intended to operate only as a security transaction nor does this Article impair or repeal any statute regulating sales to consumers, farmers or other specified classes of buyers.

§ 2-103. Definitions and Index of Definitions.

(1) In this Article unless the context otherwise requires

(a) "Buyer" means a person who buys or contracts to buy goods.

(b) "Good faith" in the case of a merchant means honesty in fact and the observance of reasonable commercial standards of fair dealing in the trade.

(c) "Receipt" of goods means taking physical possession of them.

(d) "Seller" means a person who sells or contracts to sell goods.

(2) Other definitions applying to this Article or to specified Parts thereof, and the sections in which they appear are:

"Acceptance". Section 2–606.
"Banker's credit". Section 2–325.
"Between merchants". Section 2–104.
"Cancellation". Section 2–106(4).
"Commercial unit". Section 2–105.
"Confirmed credit". Section 2–325.
"Conforming to contract". Section 2–106.
"Contract for sale". Section 2–106.
"Cover". Section 2–712.
"Entrusting". Section 2–403.
"Financing agency". Section 2–104.
"Future goods". Section 2–105.
"Goods". Section 2–105.
"Identification". Section 2–501.
"Installment contract". Section 2–612.
"Letter of Credit". Section 2–325.
"Lot". Section 2–105
"Merchant". Section 2–104.
"Overseas". Section 2–323.
"Person in position of seller". Section 2–707.
"Present sale". Section 2–106.
"Sale". Section 2–106.
"Sale on approval". Section 2–326.
"Sale or return". Section 2–326.
"Termination". Section 2–106.

(3) The following definitions in other Articles apply to this Article:

"Check". Section 3–104.
"Consignee". Section 7–102.
"Consignor". Section 7–102.
"Consumer goods". Section 9–109.
"Dishonor". Section 3–507.
"Draft". Section 3–104.

(4) In addition Article 1 contains general definitions and principles of construction and interpretation applicable throughout this Article.

As amended in 1994 and 1999.

§ 2-104. Definitions: "Merchant"; "Between Merchants"; "Financing Agency".

(1) "Merchant" means a person who deals in goods of the kind or otherwise by his occupation holds himself out as having knowledge or skill peculiar to the practices or goods involved in the transaction or to whom such knowledge or skill may be attributed by his employment of an agent or broker or other intermediary who by his occupation holds himself out as having such knowledge or skill.

(2) "Financing agency" means a bank, finance company or other person who in the ordinary course of business makes advances against goods or documents of title or who by arrangement with either the seller or the buyer intervenes in ordinary course to

make or collect payment due or claimed under the contract for sale, as by purchasing or paying the seller's draft or making advances against it or by merely taking it for collection whether or not documents of title accompany the draft. "Financing agency" includes also a bank or other person who similarly intervenes between persons who are in the position of seller and buyer in respect to the goods (Section 2–707).

(3) "Between merchants" means in any transaction with respect to which both parties are chargeable with the knowledge or skill of merchants.

§ 2–105. Definitions: Transferability; "Goods"; "Future" Goods; "Lot"; "Commercial Unit".

(1) "Goods" means all things (including specially manufactured goods) which are movable at the time of identification to the contract for sale other than the money in which the price is to be paid, investment securities (Article 8) and things in action. "Goods" also includes the unborn young of animals and growing crops and other identified things attached to realty as described in the section on goods to be severed from realty (Section 2–107).

(2) Goods must be both existing and identified before any interest in them can pass. Goods which are not both existing and identified are "future" goods. A purported present sale of future goods or of any interest therein operates as a contract to sell.

(3) There may be a sale of a part interest in existing identified goods.

(4) An undivided share in an identified bulk of fungible goods is sufficiently identified to be sold although the quantity of the bulk is not determined. Any agreed proportion of such a bulk or any quantity thereof agreed upon by number, weight or other measure may to the extent of the seller's interest in the bulk be sold to the buyer who then becomes an owner in common.

(5) "Lot" means a parcel or a single article which is the subject matter of a separate sale or delivery, whether or not it is sufficient to perform the contract.

(6) "Commercial unit" means such a unit of goods as by commercial usage is a single whole for purposes of sale and division of which materially impairs its character or value on the market or in use. A commercial unit may be a single article (as a machine) or a set of articles (as a suite of furniture or an assortment of sizes) or a quantity (as a bale, gross, or carload) or any other unit treated in use or in the relevant market as a single whole.

§ 2–106. Definitions: "Contract"; "Agreement"; "Contract for Sale"; "Sale"; "Present Sale"; "Conforming" to Contract; "Termination"; "Cancellation".

(1) In this Article unless the context otherwise requires "contract" and "agreement" are limited to those relating to the present or future sale of goods. "Contract for sale" includes both a present sale of goods and a contract to sell goods at a future time. A "sale" consists in the passing of title from the seller to the buyer for a price (Section 2–401). A "present sale" means a sale which is accomplished by the making of the contract.

(2) Goods or conduct including any part of a performance are "conforming" or conform to the contract when they are in accordance with the obligations under the contract.

(3) "Termination" occurs when either party pursuant to a power created by agreement or law puts an end to the contract otherwise than for its breach. On "termination" all obligations which are still executory on both sides are discharged but any right based on prior breach or performance survives.

(4) "Cancellation" occurs when either party puts an end to the contract for breach by the other and its effect is the same as that of "termination" except that the cancelling party also retains any remedy for breach of the whole contract or any unperformed balance.

§ 2–107. Goods to Be Severed From Realty: Recording.

(1) A contract for the sale of minerals or the like (including oil and gas) or a structure or its materials to be removed from realty is a contract for the sale of goods within this Article if they are to be severed by the seller but until severance a purported present sale thereof which is not effective as a transfer of an interest in land is effective only as a contract to sell.

(2) A contract for the sale apart from the land of growing crops or other things attached to realty and capable of severance without material harm thereto but not described in subsection (1) or of timber to be cut is a contract for the sale of goods within this Article whether the subject matter is to be severed by the buyer or by the seller even though it forms part of the realty at the time of contracting, and the parties can by identification effect a present sale before severance.

(3) The provisions of this section are subject to any third party rights provided by the law relating to realty records, and the contract for sale may be executed and recorded as a document transferring an interest in land and shall then constitute notice to third parties of the buyer's rights under the contract for sale.

As amended in 1972.

PART 2 Form, Formation and Readjustment of Contract

§ 2–201. Formal Requirements; Statute of Frauds.

(1) Except as otherwise provided in this section a contract for the sale of goods for the price of $500 or more is not enforceable by way of action or defense unless there is some writing sufficient to indicate that a contract for sale has been made between the parties and signed by the party against whom enforcement is sought or by his authorized agent or broker. A writing is not insufficient because it omits or incorrectly states a term agreed upon but the contract is not enforceable under this paragraph beyond the quantity of goods shown in such writing.

(2) Between merchants if within a reasonable time a writing in confirmation of the contract and sufficient against the sender is received and the party receiving it has reason to know its contents, it satisfies the requirements of subsection (1) against such party unless written notice of objection to its contents is given within ten days after it is received.

(3) A contract which does not satisfy the requirements of subsection (1) but which is valid in other respects is enforceable

(a) if the goods are to be specially manufactured for the buyer and are not suitable for sale to others in the ordinary course of the seller's business and the seller, before notice of repudiation is received and under circumstances which reasonably indicate that the goods are for the buyer, has made either a substantial beginning of their manufacture or commitments for their procurement; or

(b) if the party against whom enforcement is sought admits in his pleading, testimony or otherwise in court that a contract for sale was made, but the contract is not enforceable under this provision beyond the quantity of goods admitted; or

(c) with respect to goods for which payment has been made and accepted or which have been received and accepted (Sec. 2–606).

§ 2–202. Final Written Expression: Parol or Extrinsic Evidence.

Terms with respect to which the confirmatory memoranda of the parties agree or which are otherwise set forth in a writing intended by the parties as a final expression of their agreement with respect to such terms as are included therein may not be contradicted by evidence of any prior agreement or of a contemporaneous oral agreement but may be explained or supplemented

(a) by course of dealing or usage of trade (Section 1–205) or by course of performance (Section 2–208); and

(b) by evidence of consistent additional terms unless the court finds the writing to have been intended also as a complete and exclusive statement of the terms of the agreement.

§ 2–203. Seals Inoperative.

The affixing of a seal to a writing evidencing a contract for sale or an offer to buy or sell goods does not constitute the writing a sealed instrument and the law with respect to sealed instruments does not apply to such a contract or offer.

§ 2–204. Formation in General.

(1) A contract for sale of goods may be made in any manner sufficient to show agreement, including conduct by both parties which recognizes the existence of such a contract.

(2) An agreement sufficient to constitute a contract for sale may be found even though the moment of its making is undetermined.

(3) Even though one or more terms are left open a contract for sale does not fail for indefiniteness if the parties have intended to make a contract and there is a reasonably certain basis for giving an appropriate remedy.

§ 2–205. Firm Offers.

An offer by a merchant to buy or sell goods in a signed writing which by its terms gives assurance that it will be held open is not revocable, for lack of consideration, during the time stated or if no time is stated for a reasonable time, but in no event may such period of irrevocability exceed three months; but any such term of assurance on a form supplied by the offeree must be separately signed by the offeror.

§ 2–206. Offer and Acceptance in Formation of Contract.

(1) Unless other unambiguously indicated by the language or circumstances

(a) an offer to make a contract shall be construed as inviting acceptance in any manner and by any medium reasonable in the circumstances;

(b) an order or other offer to buy goods for prompt or current shipment shall be construed as inviting acceptance either by a prompt promise to ship or by the prompt or current shipment of conforming or nonconforming goods, but such a shipment of non-conforming goods does not constitute an acceptance if the seller seasonably notifies the buyer that the shipment is offered only as an accommodation to the buyer.

(2) Where the beginning of a requested performance is a reasonable mode of acceptance an offeror who is not notified of acceptance within a reasonable time may treat the offer as having lapsed before acceptance.

§ 2–207. Additional Terms in Acceptance or Confirmation.

(1) A definite and seasonable expression of acceptance or a written confirmation which is sent within a reasonable time operates as an acceptance even though it states terms additional to or different from those offered or agreed upon, unless acceptance is expressly made conditional on assent to the additional or different terms.

(2) The additional terms are to be construed as proposals for addition to the contract. Between merchants such terms become part of the contract unless:

(a) the offer expressly limits acceptance to the terms of the offer;

(b) they materially alter it; or

(c) notification of objection to them has already been given or is given within a reasonable time after notice of them is received.

(3) Conduct by both parties which recognizes the existence of a contract is sufficient to establish a contract for sale although the writings of the parties do not otherwise establish a contract. In such case the terms of the particular contract consist of those

terms on which the writings of the parties agree, together with any supplementary terms incorporated under any other provisions of this Act.

§ 2–208. Course of Performance or Practical Construction.

(1) Where the contract for sale involves repeated occasions for performance by either party with knowledge of the nature of the performance and opportunity for objection to it by the other, any course of performance accepted or acquiesced in without objection shall be relevant to determine the meaning of the agreement.

(2) The express terms of the agreement and any such course of performance, as well as any course of dealing and usage of trade, shall be construed whenever reasonable as consistent with each other; but when such construction is unreasonable, express terms shall control course of performance and course of performance shall control both course of dealing and usage of trade (Section 1–205).

(3) Subject to the provisions of the next section on modification and waiver, such course of performance shall be relevant to show a waiver or modification of any term inconsistent with such course of performance.

§ 2–209. Modification, Rescission and Waiver.

(1) An agreement modifying a contract within this Article needs no consideration to be binding.

(2) A signed agreement which excludes modification or rescission except by a signed writing cannot be otherwise modified or rescinded, but except as between merchants such a requirement on a form supplied by the merchant must be separately signed by the other party.

(3) The requirements of the statute of frauds section of this Article (Section 2–201) must be satisfied if the contract as modified is within its provisions.

(4) Although an attempt at modification or rescission does not satisfy the requirements of subsection (2) or (3) it can operate as a waiver.

(5) A party who has made a waiver affecting an executory portion of the contract may retract the waiver by reasonable notification received by the other party that strict performance will be required of any term waived, unless the retraction would be unjust in view of a material change of position in reliance on the waiver.

§ 2–210. Delegation of Performance; Assignment of Rights.

(1) A party may perform his duty through a delegate unless otherwise agreed or unless the other party has a substantial interest in having his original promisor perform or control the acts required by the contract. No delegation of performance relieves the party delegating of any duty to perform or any liability for breach.

(2) Except as otherwise provided in Section 9–406, unless otherwise agreed, all rights of either seller or buyer can be assigned except where the assignment would materially change the duty of the other party, or increase materially the burden or risk imposed on him by his contract, or impair materially his chance of obtaining return performance. A right to damages for breach of the whole contract or a right arising out of the assignor's due performance of his entire obligation can be assigned despite agreement otherwise.

(3) The creation, attachment, perfection, or enforcement of a security interest in the seller's interest under a contract is not a transfer that materially changes the duty of or increases materially the burden or risk imposed on the buyer or impairs materially the buyer's chance of obtaining return performance within the purview of subsection (2) unless, and then only to the extent that, enforcement actually results in a delegation of material performance of the seller. Even in that event, the creation, attachment, perfection, and enforcement of the security interest remain effective, but (i) the seller is liable to the buyer for damages caused by the delegation to the extent that the damages could not reasonably by prevented by the buyer, and (ii) a court having jurisdiction may grant other appropriate relief, including cancellation of the contract for sale or an injunction against enforcement of the security interest or consummation of the enforcement.

(4) Unless the circumstances indicate the contrary a prohibition of assignment of "the contract" is to be construed as barring only the delegation to the assigness of the assignor's performance.

(5) An assignment of "the contract" or of "all my rights under the contract" or an assignment in similar general terms is an assignment of rights and unless the language or the circumstances (as in an assignment for security) indicate the contrary, it is a delegation of performance of the duties of the assignor and its acceptance by the assignee constitutes a promise by him to perform those duties. This promise is enforceable by either the assignor or the other party to the original contract.

(6) The other party may treat any assignment which delegates performance as creating reasonable grounds for insecurity and may without prejudice to his rights against the assignor demand assurances from the assignee (Section 2–609).

As amended in 1999.

PART 3 General Obligation and Construction of Contract

§ 2–301. General Obligations of Parties.

The obligation of the seller is to transfer and deliver and that of the buyer is to accept and pay in accordance with the contract.

§ 2–302. Unconscionable Contract or Clause.

(1) If the court as a matter of law finds the contract or any clause of the contract to have been unconscionable at the time it was made the court may refuse to enforce the contract, or it may enforce the remainder of the contract without the

unconscionable clause, or it may so limit the application of any unconscionable clause as to avoid any unconscionable result.

(2) When it is claimed or appears to the court that the contract or any clause thereof may be unconscionable the parties shall be afforded a reasonable opportunity to present evidence as to its commercial setting, purpose and effect to aid the court in making the determination.

§ 2-303. Allocations or Division of Risks.

Where this Article allocates a risk or a burden as between the parties "unless otherwise agreed", the agreement may not only shift the allocation but may also divide the risk or burden.

§ 2-304. Price Payable in Money, Goods, Realty, or Otherwise.

(1) The price can be made payable in money or otherwise. If it is payable in whole or in part in goods each party is a seller of the goods which he is to transfer.

(2) Even though all or part of the price is payable in an interest in realty the transfer of the goods and the seller's obligations with reference to them are subject to this Article, but not the transfer of the interest in realty or the transferor's obligations in connection therewith.

§ 2-305. Open Price Term.

(1) The parties if they so intend can conclude a contract for sale even though the price is not settled. In such a case the price is a reasonable price at the time for delivery if

(a) nothing is said as to price; or

(b) the price is left to be agreed by the parties and they fail to agree; or

(c) the price is to be fixed in terms of some agreed market or other standard as set or recorded by a third person or agency and it is not so set or recorded.

(2) A price to be fixed by the seller or by the buyer means a price for him to fix in good faith.

(3) When a price left to be fixed otherwise than by agreement of the parties fails to be fixed through fault of one party the other may at his option treat the contract as cancelled or himself fix a reasonable price.

(4) Where, however, the parties intend not to be bound unless the price be fixed or agreed and it is not fixed or agreed there is no contract. In such a case the buyer must return any goods already received or if unable so to do must pay their reasonable value at the time of delivery and the seller must return any portion of the price paid on account.

§ 2-306. Output, Requirements and Exclusive Dealings.

(1) A term which measures the quantity by the output of the seller or the requirements of the buyer means such actual output or requirements as may occur in good faith, except that no quantity unreasonably disproportionate to any stated estimate or in the absence of a stated estimate to any normal or otherwise comparable prior output or requirements may be tendered or demanded.

(2) A lawful agreement by either the seller or the buyer for exclusive dealing in the kind of goods concerned imposes unless otherwise agreed an obligation by the seller to use best efforts to supply the goods and by the buyer to use best efforts to promote their sale.

§ 2-307. Delivery in Single Lot or Several Lots.

Unless otherwise agreed all goods called for by a contract for sale must be tendered in a single delivery and payment is due only on such tender but where the circumstances give either party the right to make or demand delivery in lots the price if it can be apportioned may be demanded for each lot.

§ 2-308. Absence of Specified Place for Delivery.

Unless otherwise agreed

(a) the place for delivery of goods is the seller's place of business or if he has none his residence; but

(b) in a contract for sale of identified goods which to the knowledge of the parties at the time of contracting are in some other place, that place is the place for their delivery; and

(c) documents of title may be delivered through customary banking channels.

§ 2-309. Absence of Specific Time Provisions; Notice of Termination.

(1) The time for shipment or delivery or any other action under a contract if not provided in this Article or agreed upon shall be a reasonable time.

(2) Where the contract provides for successive performances but is indefinite in duration it is valid for a reasonable time but unless otherwise agreed may be terminated at any time by either party.

(3) Termination of a contract by one party except on the happening of an agreed event requires that reasonable notification be received by the other party and an agreement dispensing with notification is invalid if its operation would be unconscionable.

§ 2-310. Open Time for Payment or Running of Credit; Authority to Ship Under Reservation.

Unless otherwise agreed

(a) payment is due at the time and place at which the buyer is to receive the goods even though the place of shipment is the place of delivery; and

(b) if the seller is authorized to send the goods he may ship them under reservation, and may tender the documents of title, but the buyer may inspect the goods after their arrival before payment is due unless such inspection is inconsistent with the terms of the contract (Section 2–513); and

(c) if delivery is authorized and made by way of documents of title otherwise than by subsection (b) then payment is due at the time and place at which the buyer is to receive the documents regardless of where the goods are to be received; and

(d) where the seller is required or authorized to ship the goods on credit the credit period runs from the time of shipment but post-dating the invoice or delaying its dispatch will correspondingly delay the starting of the credit period.

§ 2–311. Options and Cooperation Respecting Performance.

(1) An agreement for sale which is otherwise sufficiently definite (subsection (3) of Section 2–204) to be a contract is not made invalid by the fact that it leaves particulars of performance to be specified by one of the parties. Any such specification must be made in good faith and within limits set by commercial reasonableness.

(2) Unless otherwise agreed specifications relating to assortment of the goods are at the buyer's option and except as otherwise provided in subsections (1)(c) and (3) of Section 2–319 specifications or arrangements relating to shipment are at the seller's option.

(3) Where such specification would materially affect the other party's performance but is not seasonably made or where one party's cooperation is necessary to the agreed performance of the other but is not seasonably forthcoming, the other party in addition to all other remedies

(a) is excused for any resulting delay in his own performance; and

(b) may also either proceed to perform in any reasonable manner or after the time for a material part of his own performance treat the failure to specify or to cooperate as a breach by failure to deliver or accept the goods.

§ 2–312. Warranty of Title and Against Infringement; Buyer's Obligation Against Infringement.

(1) Subject to subsection (2) there is in a contract for sale a warranty by the seller that

(a) the title conveyed shall be good, and its transfer rightful; and

(b) the goods shall be delivered free from any security interest or other lien or encumbrance of which the buyer at the time of contracting has no knowledge.

(2) A warranty under subsection (1) will be excluded or modified only by specific language or by circumstances which give the buyer reason to know that the person selling does not claim title in himself or that he is purporting to sell only such right or title as he or a third person may have.

(3) Unless otherwise agreed a seller who is a merchant regularly dealing in goods of the kind warrants that the goods shall be delivered free of the rightful claim of any third person by way of infringement or the like but a buyer who furnishes specifications to the seller must hold the seller harmless against any such claim which arises out of compliance with the specifications.

§ 2–313. Express Warranties by Affirmation, Promise, Description, Sample.

(1) Express warranties by the seller are created as follows:

(a) Any affirmation of fact or promise made by the seller to the buyer which relates to the goods and becomes part of the basis of the bargain creates an express warranty that the goods shall conform to the affirmation or promise.

(b) Any description of the goods which is made part of the basis of the bargain creates an express warranty that the goods shall conform to the description.

(c) Any sample or model which is made part of the basis of the bargain creates an express warranty that the whole of the goods shall conform to the sample or model.

(2) It is not necessary to the creation of an express warranty that the seller use formal words such as "warrant" or "guarantee" or that he have a specific intention to make a warranty, but an affirmation merely of the value of the goods or a statement purporting to be merely the seller's opinion or commendation of the goods does not create a warranty.

§ 2–314. Implied Warranty: Merchantability; Usage of Trade.

(1) Unless excluded or modified (Section 2–316), a warranty that the goods shall be merchantable is implied in a contract for their sale if the seller is a merchant with respect to goods of that kind. Under this section the serving for value of food or drink to be consumed either on the premises or elsewhere is a sale.

(2) Goods to be merchantable must be at least such as

(a) pass without objection in the trade under the contract description; and

(b) in the case of fungible goods, are of fair average quality within the description; and

(c) are fit for the ordinary purposes for which such goods are used; and

(d) run, within the variations permitted by the agreement, of even kind, quality and quantity within each unit and among all units involved; and

(e) are adequately contained, packaged, and labeled as the agreement may require; and

(f) conform to the promises or affirmations of fact made on the container or label if any.

(3) Unless excluded or modified (Section 2–316) other implied warranties may arise from course of dealing or usage of trade.

§ 2-315. Implied Warranty: Fitness for Particular Purpose.

Where the seller at the time of contracting has reason to know any particular purpose for which the goods are required and that the buyer is relying on the seller's skill or judgment to select or furnish suitable goods, there is unless excluded or modified under the next section an implied warranty that the goods shall be fit for such purpose.

§ 2-316. Exclusion or Modification of Warranties.

(1) Words or conduct relevant to the creation of an express warranty and words or conduct tending to negate or limit warranty shall be construed wherever reasonable as consistent with each other; but subject to the provisions of this Article on parol or extrinsic evidence (Section 2–202) negation or limitation is inoperative to the extent that such construction is unreasonable.

(2) Subject to subsection (3), to exclude or modify the implied warranty of merchantability or any part of it the language must mention merchantability and in case of a writing must be conspicuous, and to exclude or modify any implied warranty of fitness the exclusion must be by a writing and conspicuous. Language to exclude all implied warranties of fitness is sufficient if it states, for example, that "There are no warranties which extend beyond the description on the face hereof."

(3) Notwithstanding subsection (2)

(a) unless the circumstances indicate otherwise, all implied warranties are excluded by expressions like "as is", "with all faults" or other language which in common understanding calls the buyer's attention to the exclusion of warranties and makes plain that there is no implied warranty; and

(b) when the buyer before entering into the contract has examined the goods or the sample or model as fully as he desired or has refused to examine the goods there is no implied warranty with regard to defects which an examination ought in the circumstances to have revealed to him; and

(c) an implied warranty can also be excluded or modified by course of dealing or course of performance or usage of trade.

(4) Remedies for breach of warranty can be limited in accordance with the provisions of this Article on liquidation or limitation of damages and on contractual modification of remedy (Sections 2–718 and 2–719).

§ 2-317. Cumulation and Conflict of Warranties Express or Implied.

Warranties whether express or implied shall be construed as consistent with each other and as cumulative, but if such construction is unreasonable the intention of the parties shall determine which warranty is dominant. In ascertaining that intention the following rules apply:

(a) Exact or technical specifications displace an inconsistent sample or model or general language of description.

(b) A sample from an existing bulk displaces inconsistent general language of description.

(c) Express warranties displace inconsistent implied warranties other than an implied warranty of fitness for a particular purpose.

§ 2-318. Third Party Beneficiaries of Warranties Express or Implied.

Note: If this Act is introduced in the Congress of the United States this section should be omitted. (States to select one alternative.)

Alternative A A seller's warranty whether express or implied extends to any natural person who is in the family or household of his buyer or who is a guest in his home if it is reasonable to expect that such person may use, consume or be affected by the goods and who is injured in person by breach of the warranty. A seller may not exclude or limit the operation of this section.

Alternative B A seller's warranty whether express or implied extends to any natural person who may reasonably be expected to use, consume or be affected by the goods and who is injured in person by breach of the warranty. A seller may not exclude or limit the operation of this section.

Alternative C A seller's warranty whether express or implied extends to any person who may reasonably be expected to use, consume or be affected by the goods and who is injured by breach of the warranty. A seller may not exclude or limit the operation of this section with respect to injury to the person of an individual to whom the warranty extends.

As amended 1966.

§ 2-319. F.O.B. and F.A.S. Terms.

(1) Unless otherwise agreed the term F.O.B. (which means "free on board") at a named place, even though used only in connection with the stated price, is a delivery term under which

(a) when the term is F.O.B. the place of shipment, the seller must at that place ship the goods in the manner provided in this Article (Section 2–504) and bear the expense and risk of putting them into the possession of the carrier; or

(b) when the term is F.O.B. the place of destination, the seller must at his own expense and risk transport the goods to that place and there tender delivery of them in the manner provided in this Article (Section 2–503);

(c) when under either (a) or (b) the term is also F.O.B. vessel, car or other vehicle, the seller must in addition at his own expense and risk load the goods on board. If the term is F.O.B. vessel the buyer must name the vessel and in an appropriate case the seller must comply with the provisions of this Article on the form of bill of lading (Section 2–323).

(2) Unless otherwise agreed the term F.A.S. vessel (which means "free alongside") at a named port, even though used only in connection with the stated price, is a delivery term under which the seller must

(a) at his own expense and risk deliver the goods alongside the vessel in the manner usual in that port or on a dock designated and provided by the buyer; and

(b) obtain and tender a receipt for the goods in exchange for which the carrier is under a duty to issue a bill of lading.

(3) Unless otherwise agreed in any case falling within subsection (1)(a) or (c) or subsection (2) the buyer must seasonably give any needed instructions for making delivery, including when the term is F.A.S. or F.O.B. the loading berth of the vessel and in an appropriate case its name and sailing date. The seller may treat the failure of needed instructions as a failure of cooperation under this Article (Section 2–311). He may also at his option move the goods in any reasonable manner preparatory to delivery or shipment.

(4) Under the term F.O.B. vessel or F.A.S. unless otherwise agreed the buyer must make payment against tender of the required documents and the seller may not tender nor the buyer demand delivery of the goods in substitution for the documents.

§ 2–320. C.I.F. and C. & F. Terms.

(1) The term C.I.F. means that the price includes in a lump sum the cost of the goods and the insurance and freight to the named destination. The term C. & F. or C.F. means that the price so includes cost and freight to the named destination.

(2) Unless otherwise agreed and even though used only in connection with the stated price and destination, the term C.I.F. destination or its equivalent requires the seller at his own expense and risk to

(a) put the goods into the possession of a carrier at the port for shipment and obtain a negotiable bill or bills of lading covering the entire transportation to the named destination; and

(b) load the goods and obtain a receipt from the carrier (which may be contained in the bill of lading) showing that the freight has been paid or provided for; and

(c) obtain a policy or certificate of insurance, including any war risk insurance, of a kind and on terms then current at the port of shipment in the usual amount, in the currency of the contract, shown to cover the same goods covered by the bill of lading and providing for payment of loss to the order of the buyer or for the account of whom it may concern; but the seller may add to the price the amount of the premium for any such war risk insurance; and

(d) prepare an invoice of the goods and procure any other documents required to effect shipment or to comply with the contract; and

(e) forward and tender with commercial promptness all the documents in due form and with any indorsement necessary to perfect the buyer's rights.

(3) Unless otherwise agreed the term C. & F. or its equivalent has the same effect and imposes upon the seller the same obligations and risks as a C.I.F. term except the obligation as to insurance.

(4) Under the term C.I.F. or C. & F. unless otherwise agreed the buyer must make payment against tender of the required documents and the seller may not tender nor the buyer demand delivery of the goods in substitution for the documents.

§ 2–321. C.I.F. or C. & F.: "Net Landed Weights"; "Payment on Arrival"; Warranty of Condition on Arrival.

Under a contract containing a term C.I.F. or C. & F.

(1) Where the price is based on or is to be adjusted according to "net landed weights", "delivered weights", "out turn" quantity or quality or the like, unless otherwise agreed the seller must reasonably estimate the price. The payment due on tender of the documents called for by the contract is the amount so estimated, but after final adjustment of the price a settlement must be made with commercial promptness.

(2) An agreement described in subsection (1) or any warranty of quality or condition of the goods on arrival places upon the seller the risk of ordinary deterioration, shrinkage and the like in transportation but has no effect on the place or time of identification to the contract for sale or delivery or on the passing of the risk of loss.

(3) Unless otherwise agreed where the contract provides for payment on or after arrival of the goods the seller must before payment allow such preliminary inspection as is feasible; but if the goods are lost delivery of the documents and payment are due when the goods should have arrived.

§ 2–322. Delivery "Ex-Ship".

(1) Unless otherwise agreed a term for delivery of goods "ex-ship" (which means from the carrying vessel) or in equivalent language is not restricted to a particular ship and requires delivery from a ship which has reached a place at the named port of destination where goods of the kind are usually discharged.

(2) Under such a term unless otherwise agreed

(a) the seller must discharge all liens arising out of the carriage and furnish the buyer with a direction which puts the carrier under a duty to deliver the goods; and

(b) the risk of loss does not pass to the buyer until the goods leave the ship's tackle or are otherwise properly unloaded.

§ 2–323. Form of Bill of Lading Required in Overseas Shipment; "Overseas".

(1) Where the contract contemplates overseas shipment and contains a term C.I.F. or C. & F. or F.O.B. vessel, the seller unless otherwise agreed must obtain a negotiable bill of lading stating that the goods have been loaded on board or, in the case of a term C.I.F. or C. & F., received for shipment.

(2) Where in a case within subsection (1) a bill of lading has been issued in a set of parts, unless otherwise agreed if the documents are not to be sent from abroad the buyer may demand tender of

the full set; otherwise only one part of the bill of lading need be tendered. Even if the agreement expressly requires a full set

(a) due tender of a single part is acceptable within the provisions of this Article on cure of improper delivery (subsection (1) of Section 2–508); and

(b) even though the full set is demanded, if the documents are sent from abroad the person tendering an incomplete set may nevertheless require payment upon furnishing an indemnity which the buyer in good faith deems adequate.

(3) A shipment by water or by air or a contract contemplating such shipment is "overseas" insofar as by usage of trade or agreement it is subject to the commercial, financing or shipping practices characteristic of international deep water commerce.

§ 2–324. "No Arrival, No Sale" Term.

Under a term "no arrival, no sale" or terms of like meaning, unless otherwise agreed,

(a) the seller must properly ship conforming goods and if they arrive by any means he must tender them on arrival but he assumes no obligation that the goods will arrive unless he has caused the non-arrival; and

(b) where without fault of the seller the goods are in part lost or have so deteriorated as no longer to conform to the contract or arrive after the contract time, the buyer may proceed as if there had been casualty to identified goods (Section 2–613).

§ 2–325. "Letter of Credit" Term; "Confirmed Credit".

(1) Failure of the buyer seasonably to furnish an agreed letter of credit is a breach of the contract for sale.

(2) The delivery to seller of a proper letter of credit suspends the buyer's obligation to pay. If the letter of credit is dishonored, the seller may on seasonable notification to the buyer require payment directly from him.

(3) Unless otherwise agreed the term "letter of credit" or "banker's credit" in a contract for sale means an irrevocable credit issued by a financing agency of good repute and, where the shipment is overseas, of good international repute. The term "confirmed credit" means that the credit must also carry the direct obligation of such an agency which does business in the seller's financial market.

§ 2–326. Sale on Approval and Sale or Return; Rights of Creditors.

(1) Unless otherwise agreed, if delivered goods may be returned by the buyer even though they conform to the contract, the transaction is

(a) a "sale on approval" if the goods are delivered primarily for use, and

(b) a "sale or return" if the goods are delivered primarily for resale.

(2) Goods held on approval are not subject to the claims of the buyer's creditors until acceptance; goods held on sale or return are subject to such claims while in the buyer's possession.

(3) Any "or return" term of a contract for sale is to be treated as a separate contract for sale within the statute of frauds section of this Article (Section 2–201) and as contradicting the sale aspect of the contract within the provisions of this Article or on parol or extrinsic evidence (Section 2–202).

As amended in 1999.

§ 2–327. Special Incidents of Sale on Approval and Sale or Return.

(1) Under a sale on approval unless otherwise agreed

(a) although the goods are identified to the contract the risk of loss and the title do not pass to the buyer until acceptance; and

(b) use of the goods consistent with the purpose of trial is not acceptance but failure seasonably to notify the seller of election to return the goods is acceptance, and if the goods conform to the contract acceptance of any part is acceptance of the whole; and

(c) after due notification of election to return, the return is at the seller's risk and expense but a merchant buyer must follow any reasonable instructions.

(2) Under a sale or return unless otherwise agreed

(a) the option to return extends to the whole or any commercial unit of the goods while in substantially their original condition, but must be exercised seasonably; and

(b) the return is at the buyer's risk and expense.

§ 2–328. Sale by Auction.

(1) In a sale by auction if goods are put up in lots each lot is the subject of a separate sale.

(2) A sale by auction is complete when the auctioneer so announces by the fall of the hammer or in other customary manner. Where a bid is made while the hammer is falling in acceptance of a prior bid the auctioneer may in his discretion reopen the bidding or declare the goods sold under the bid on which the hammer was falling.

(3) Such a sale is with reserve unless the goods are in explicit terms put up without reserve. In an auction with reserve the auctioneer may withdraw the goods at any time until he announces completion of the sale. In an auction without reserve, after the auctioneer calls for bids on an article or lot, that article or lot cannot be withdrawn unless no bid is made within a reasonable time. In either case a bidder may retract his bid until the auctioneer's announcement of completion of the sale, but a bidder's retraction does not revive any previous bid.

(4) If the auctioneer knowingly receives a bid on the seller's behalf or the seller makes or procures such as bid, and notice has not been given that liberty for such bidding is reserved, the buyer may at his option avoid the sale or take the goods at the price of the last good faith bid prior to the completion of the sale. This subsection shall not apply to any bid at a forced sale.

PART 4 Title, Creditors and Good Faith Purchasers

§ 2-401. Passing of Title; Reservation for Security; Limited Application of This Section.

Each provision of this Article with regard to the rights, obligations and remedies of the seller, the buyer, purchasers or other third parties applies irrespective of title to the goods except where the provision refers to such title. Insofar as situations are not covered by the other provisions of this Article and matters concerning title became material the following rules apply:

(1) Title to goods cannot pass under a contract for sale prior to their identification to the contract (Section 2–501), and unless otherwise explicitly agreed the buyer acquires by their identification a special property as limited by this Act. Any retention or reservation by the seller of the title (property) in goods shipped or delivered to the buyer is limited in effect to a reservation of a security interest. Subject to these provisions and to the provisions of the Article on Secured Transactions (Article 9), title to goods passes from the seller to the buyer in any manner and on any conditions explicitly agreed on by the parties.

(2) Unless otherwise explicitly agreed title passes to the buyer at the time and place at which the seller completes his performance with reference to the physical delivery of the goods, despite any reservation of a security interest and even though a document of title is to be delivered at a different time or place; and in particular and despite any reservation of a security interest by the bill of lading

(a) if the contract requires or authorizes the seller to send the goods to the buyer but does not require him to deliver them at destination, title passes to the buyer at the time and place of shipment; but

(b) if the contract requires delivery at destination, title passes on tender there.

(3) Unless otherwise explicitly agreed where delivery is to be made without moving the goods,

(a) if the seller is to deliver a document of title, title passes at the time when and the place where he delivers such documents; or

(b) if the goods are at the time of contracting already identified and no documents are to be delivered, title passes at the time and place of contracting.

(4) A rejection or other refusal by the buyer to receive or retain the goods, whether or not justified, or a justified revocation of acceptance revests title to the goods in the seller. Such revesting occurs by operation of law and is not a "sale".

§ 2-402. Rights of Seller's Creditors Against Sold Goods.

(1) Except as provided in subsections (2) and (3), rights of unsecured creditors of the seller with respect to goods which have been identified to a contract for sale are subject to the buyer's rights to recover the goods under this Article (Sections 2–502 and 2–716).

(2) A creditor of the seller may treat a sale or an identification of goods to a contract for sale as void if as against him a retention of possession by the seller is fraudulent under any rule of law of the state where the goods are situated, except that retention of possession in good faith and current course of trade by a merchant-seller for a commercially reasonable time after a sale or identification is not fraudulent.

(3) Nothing in this Article shall be deemed to impair the rights of creditors of the seller

(a) under the provisions of the Article on Secured Transactions (Article 9); or

(b) where identification to the contract or delivery is made not in current course of trade but in satisfaction of or as security for a pre-existing claim for money, security or the like and is made under circumstances which under any rule of law of the state where the goods are situated would apart from this Article constitute the transaction a fraudulent transfer or voidable preference.

§ 2-403. Power to Transfer; Good Faith Purchase of Goods; "Entrusting".

(1) A purchaser of goods acquires all title which his transferor had or had power to transfer except that a purchaser of a limited interest acquires rights only to the extent of the interest purchased. A person with voidable title has power to transfer a good title to a good faith purchaser for value. When goods have been delivered under a transaction of purchase the purchaser has such power even though

(a) the transferor was deceived as to the identity of the purchaser, or

(b) the delivery was in exchange for a check which is later dishonored, or

(c) it was agreed that the transaction was to be a "cash sale", or

(d) the delivery was procured through fraud punishable as larcenous under the criminal law.

(2) Any entrusting of possession of goods to a merchant who deals in goods of that kind gives him power to transfer all rights of the entruster to a buyer in ordinary course of business.

(3) "Entrusting" includes any delivery and any acquiescence in retention of possession regardless of any condition expressed between the parties to the delivery or acquiescence and regardless of whether the procurement of the entrusting or the possessor's disposition of the goods have been such as to be larcenous under the criminal law.

(4) The rights of other purchasers of goods and of lien creditors are governed by the Articles on Secured Transactions (Article 9), Bulk Transfers (Article 6) and Documents of Title (Article 7).

As amended in 1988.

PART 5 Performance

§ 2-501. Insurable Interest in Goods; Manner of Identification of Goods.

(1) The buyer obtains a special property and an insurable interest in goods by identification of existing goods as goods to which the contract refers even though the goods so identified are non-conforming and he has an option to return or reject them. Such identification can be made at any time and in any manner explicitly agreed to by the parties. In the absence of explicit agreement identification occurs

(a) when the contract is made if it is for the sale of goods already existing and identified;

(b) if the contract is for the sale of future goods other than those described in paragraph (c), when goods are shipped, marked or otherwise designated by the seller as goods to which the contract refers;

(c) when the crops are planted or otherwise become growing crops or the young are conceived if the contract is for the sale of unborn young to be born within twelve months after contracting or for the sale of crops to be harvested within twelve months or the next normal harvest season after contracting whichever is longer.

(2) The seller retains an insurable interest in goods so long as title to or any security interest in the goods remains in him and where the identification is by the seller alone he may until default or insolvency or notification to the buyer that the identification is final substitute other goods for those identified.

(3) Nothing in this section impairs any insurable interest recognized under any other statute or rule of law.

§ 2-502. Buyer's Right to Goods on Seller's Insolvency.

(1) Subject to subsections (2) and (3) and even though the goods have not been shipped a buyer who has paid a part or all of the price of goods in which he has a special property under the provisions of the immediately preceding section may on making and keeping good a tender of any unpaid portion of their price recover them from the seller if:

(a) in the case of goods bought for personal, family, or household purposes, the seller repudiates or fails to deliver as required by the contract; or

(b) in all cases, the seller becomes insolvent within ten days after receipt of the first installment on their price.

(2) The buyer's right to recover the goods under subsection (1)(a) vests upon acquisition of a special property, even if the seller had not then repudiated or failed to deliver.

(3) If the identification creating his special property has been made by the buyer he acquires the right to recover the goods only if they conform to the contract for sale.

As amended in 1999.

§ 2-503. Manner of Seller's Tender of Delivery.

(1) Tender of delivery requires that the seller put and hold conforming goods at the buyer's disposition and give the buyer any notification reasonably necessary to enable him to take delivery. The manner, time and place for tender are determined by the agreement and this Article, and in particular

(a) tender must be at a reasonable hour, and if it is of goods they must be kept available for the period reasonably necessary to enable the buyer to take possession; but

(b) unless otherwise agreed the buyer must furnish facilities reasonably suited to the receipt of the goods.

(2) Where the case is within the next section respecting shipment tender requires that the seller comply with its provisions.

(3) Where the seller is required to deliver at a particular destination tender requires that he comply with subsection (1) and also in any appropriate case tender documents as described in subsections (4) and (5) of this section.

(4) Where goods are in the possession of a bailee and are to be delivered without being moved

(a) tender requires that the seller either tender a negotiable document of title covering such goods or procure acknowledgment by the bailee of the buyer's right to possession of the goods; but

(b) tender to the buyer of a non-negotiable document of title or of a written direction to the bailee to deliver is sufficient tender unless the buyer seasonably objects, and receipt by the bailee of notification of the buyer's rights fixes those rights as against the bailee and all third persons; but risk of loss of the goods and of any failure by the bailee to honor the non-negotiable document of title or to obey the direction remains on the seller until the buyer has had a reasonable time to present the document or direction, and a refusal by the bailee to honor the document or to obey the direction defeats the tender.

(5) Where the contract requires the seller to deliver documents

(a) he must tender all such documents in correct form, except as provided in this Article with respect to bills of lading in a set (subsection (2) of Section 2–323); and

(b) tender through customary banking channels is sufficient and dishonor of a draft accompanying the documents constitutes non-acceptance or rejection.

§ 2-504. Shipment by Seller.

Where the seller is required or authorized to send the goods to the buyer and the contract does not require him to deliver them at a particular destination, then unless otherwise agreed he must

(a) put the goods in the possession of such a carrier and make such a contract for their transportation as may be reasonable having regard to the nature of the goods and other circumstances of the case; and

(b) obtain and promptly deliver or tender in due form any document necessary to enable the buyer to obtain possession of the goods or otherwise required by the agreement or by usage of trade; and

(c) promptly notify the buyer of the shipment.

Failure to notify the buyer under paragraph (c) or to make a proper contract under paragraph (a) is a ground for rejection only if material delay or loss ensues.

§ 2-505. Seller's Shipment under Reservation.

(1) Where the seller has identified goods to the contract by or before shipment:

(a) his procurement of a negotiable bill of lading to his own order or otherwise reserves in him a security interest in the goods. His procurement of the bill to the order of a financing agency or of the buyer indicates in addition only the seller's expectation of transferring that interest to the person named.

(b) a non-negotiable bill of lading to himself or his nominee reserves possession of the goods as security but except in a case of conditional delivery (subsection (2) of Section 2–507) a non-negotiable bill of lading naming the buyer as consignee reserves no security interest even though the seller retains possession of the bill of lading.

(2) When shipment by the seller with reservation of a security interest is in violation of the contract for sale it constitutes an improper contract for transportation within the preceding section but impairs neither the rights given to the buyer by shipment and identification of the goods to the contract nor the seller's powers as a holder of a negotiable document.

§ 2-506. Rights of Financing Agency.

(1) A financing agency by paying or purchasing for value a draft which relates to a shipment of goods acquires to the extent of the payment or purchase and in addition to its own rights under the draft and any document of title securing it any rights of the shipper in the goods including the right to stop delivery and the shipper's right to have the draft honored by the buyer.

(2) The right to reimbursement of a financing agency which has in good faith honored or purchased the draft under commitment to or authority from the buyer is not impaired by subsequent discovery of defects with reference to any relevant document which was apparently regular on its face.

§ 2-507. Effect of Seller's Tender; Delivery on Condition.

(1) Tender of delivery is a condition to the buyer's duty to accept the goods and, unless otherwise agreed, to his duty to pay for them. Tender entitles the seller to acceptance of the goods and to payment according to the contract.

(2) Where payment is due and demanded on the delivery to the buyer of goods or documents of title, his right as against the seller to retain or dispose of them is conditional upon his making the payment due.

§ 2-508. Cure by Seller of Improper Tender or Delivery; Replacement.

(1) Where any tender or delivery by the seller is rejected because non-conforming and the time for performance has not yet expired, the seller may seasonably notify the buyer of his intention to cure and may then within the contract time make a conforming delivery.

(2) Where the buyer rejects a non-conforming tender which the seller had reasonable grounds to believe would be acceptable with or without money allowance the seller may if he seasonably notifies the buyer have a further reasonable time to substitute a conforming tender.

§ 2-509. Risk of Loss in the Absence of Breach.

(1) Where the contract requires or authorizes the seller to ship the goods by carrier

(a) if it does not require him to deliver them at a particular destination, the risk of loss passes to the buyer when the goods are duly delivered to the carrier even though the shipment is under reservation (Section 2–505); but

(b) if it does require him to deliver them at a particular destination and the goods are there duly tendered while in the possession of the carrier, the risk of loss passes to the buyer when the goods are there duly so tendered as to enable the buyer to take delivery.

(2) Where the goods are held by a bailee to be delivered without being moved, the risk of loss passes to the buyer

(a) on his receipt of a negotiable document of title covering the goods; or

(b) on acknowledgment by the bailee of the buyer's right to possession of the goods; or

(c) after his receipt of a non-negotiable document of title or other written direction to deliver, as provided in subsection (4)(b) of Section 2–503.

(3) In any case not within subsection (1) or (2), the risk of loss passes to the buyer on his receipt of the goods if the seller is a merchant; otherwise the risk passes to the buyer on tender of delivery.

(4) The provisions of this section are subject to contrary agreement of the parties and to the provisions of this Article on sale on approval (Section 2–327) and on effect of breach on risk of loss (Section 2–510).

§ 2-510. Effect of Breach on Risk of Loss.

(1) Where a tender or delivery of goods so fails to conform to the contract as to give a right of rejection the risk of their loss remains on the seller until cure or acceptance.

(2) Where the buyer rightfully revokes acceptance he may to the extent of any deficiency in his effective insurance

coverage treat the risk of loss as having rested on the seller from the beginning.

(3) Where the buyer as to conforming goods already identified to the contract for sale repudiates or is otherwise in breach before risk of their loss has passed to him, the seller may to the extent of any deficiency in his effective insurance coverage treat the risk of loss as resting on the buyer for a commercially reasonable time.

§ 2–511. Tender of Payment by Buyer; Payment by Check.

(1) Unless otherwise agreed tender of payment is a condition to the seller's duty to tender and complete any delivery.

(2) Tender of payment is sufficient when made by any means or in any manner current in the ordinary course of business unless the seller demands payment in legal tender and gives any extension of time reasonably necessary to procure it.

(3) Subject to the provisions of this Act on the effect of an instrument on an obligation (Section 3–310), payment by check is conditional and is defeated as between the parties by dishonor of the check on due presentment.

As amended in 1994.

§ 2–512. Payment by Buyer Before Inspection.

(1) Where the contract requires payment before inspection non-conformity of the goods does not excuse the buyer from so making payment unless

(a) the non-conformity appears without inspection; or

(b) despite tender of the required documents the circumstances would justify injunction against honor under this Act (Section 5–109(b)).

(2) Payment pursuant to subsection (1) does not constitute an acceptance of goods or impair the buyer's right to inspect or any of his remedies.

As amended in 1995.

§ 2–513. Buyer's Right to Inspection of Goods.

(1) Unless otherwise agreed and subject to subsection (3), where goods are tendered or delivered or identified to the contract for sale, the buyer has a right before payment or acceptance to inspect them at any reasonable place and time and in any reasonable manner. When the seller is required or authorized to send the goods to the buyer, the inspection may be after their arrival.

(2) Expenses of inspection must be borne by the buyer but may be recovered from the seller if the goods do not conform and are rejected.

(3) Unless otherwise agreed and subject to the provisions of this Article on C.I.F. contracts (subsection (3) of Section 2–321), the buyer is not entitled to inspect the goods before payment of the price when the contract provides

(a) for delivery "C.O.D." or on other like terms; or

(b) for payment against documents of title, except where such payment is due only after the goods are to become available for inspection.

(4) A place or method of inspection fixed by the parties is presumed to be exclusive but unless otherwise expressly agreed it does not postpone identification or shift the place for delivery or for passing the risk of loss. If compliance becomes impossible, inspection shall be as provided in this section unless the place or method fixed was clearly intended as an indispensable condition failure of which avoids the contract.

§ 2–514. When Documents Deliverable on Acceptance; When on Payment.

Unless otherwise agreed documents against which a draft is drawn are to be delivered to the drawee on acceptance of the draft if it is payable more than three days after presentment; otherwise, only on payment.

§ 2–515. Preserving Evidence of Goods in Dispute.

In furtherance of the adjustment of any claim or dispute

(a) either party on reasonable notification to the other and for the purpose of ascertaining the facts and preserving evidence has the right to inspect, test and sample the goods including such of them as may be in the possession or control of the other; and

(b) the parties may agree to a third party inspection or survey to determine the conformity or condition of the goods and may agree that the findings shall be binding upon them in any subsequent litigation or adjustment.

PART 6 Breach, Repudiation and Excuse

§ 2–601. Buyer's Rights on Improper Delivery.

Subject to the provisions of this Article on breach in installment contracts (Section 2–612) and unless otherwise agreed under the sections on contractual limitations of remedy (Sections 2–718 and 2–719), if the goods or the tender of delivery fail in any respect to conform to the contract, the buyer may

(a) reject the whole; or

(b) accept the whole; or

(c) accept any commercial unit or units and reject the rest.

§ 2–602. Manner and Effect of Rightful Rejection.

(1) Rejection of goods must be within a reasonable time after their delivery or tender. It is ineffective unless the buyer seasonably notifies the seller.

(2) Subject to the provisions of the two following sections on rejected goods (Sections 2–603 and 2–604),

(a) after rejection any exercise of ownership by the buyer with respect to any commercial unit is wrongful as against the seller; and

(b) if the buyer has before rejection taken physical possession of goods in which he does not have a security interest under the provisions of this Article (subsection (3) of Section 2–711), he is under a duty after rejection to hold them with reasonable care at the seller's disposition for a time sufficient to permit the seller to remove them; but

(c) the buyer has no further obligations with regard to goods rightfully rejected.

(3) The seller's rights with respect to goods wrongfully rejected are governed by the provisions of this Article on Seller's remedies in general (Section 2–703).

§ 2–603. Merchant Buyer's Duties as to Rightfully Rejected Goods.

(1) Subject to any security interest in the buyer (subsection (3) of Section 2–711), when the seller has no agent or place of business at the market of rejection a merchant buyer is under a duty after rejection of goods in his possession or control to follow any reasonable instructions received from the seller with respect to the goods and in the absence of such instructions to make reasonable efforts to sell them for the seller's account if they are perishable or threaten to decline in value speedily. Instructions are not reasonable if on demand indemnity for expenses is not forthcoming.

(2) When the buyer sells goods under subsection (1), he is entitled to reimbursement from the seller or out of the proceeds for reasonable expenses of caring for and selling them, and if the expenses include no selling commission then to such commission as is usual in the trade or if there is none to a reasonable sum not exceeding ten per cent on the gross proceeds.

(3) In complying with this section the buyer is held only to good faith and good faith conduct hereunder is neither acceptance nor conversion nor the basis of an action for damages.

§ 2–604. Buyer's Options as to Salvage of Rightfully Rejected Goods.

Subject to the provisions of the immediately preceding section on perishables if the seller gives no instructions within a reasonable time after notification of rejection the buyer may store the rejected goods for the seller's account or reship them to him or resell them for the seller's account with reimbursement as provided in the preceding section. Such action is not acceptance or conversion.

§ 2–605. Waiver of Buyer's Objections by Failure to Particularize.

(1) The buyer's failure to state in connection with rejection a particular defect which is ascertainable by reasonable inspection precludes him from relying on the unstated defect to justify rejection or to establish breach

(a) where the seller could have cured it if stated seasonably; or

(b) between merchants when the seller has after rejection made a request in writing for a full and final written statement of all defects on which the buyer proposes to rely.

(2) Payment against documents made without reservation of rights precludes recovery of the payment for defects apparent on the face of the documents.

§ 2–606. What Constitutes Acceptance of Goods.

(1) Acceptance of goods occurs when the buyer

(a) after a reasonable opportunity to inspect the goods signifies to the seller that the goods are conforming or that he will take or retain them in spite of their nonconformity; or

(b) fails to make an effective rejection (subsection (1) of Section 2–602), but such acceptance does not occur until the buyer has had a reasonable opportunity to inspect them; or

(c) does any act inconsistent with the seller's ownership; but if such act is wrongful as against the seller it is an acceptance only if ratified by him.

(2) Acceptance of a part of any commercial unit is acceptance of that entire unit.

§ 2–607. Effect of Acceptance; Notice of Breach; Burden of Establishing Breach After Acceptance; Notice of Claim or Litigation to Person Answerable Over.

(1) The buyer must pay at the contract rate for any goods accepted.

(2) Acceptance of goods by the buyer precludes rejection of the goods accepted and if made with knowledge of a non-conformity cannot be revoked because of it unless the acceptance was on the reasonable assumption that the non-conformity would be seasonably cured but acceptance does not of itself impair any other remedy provided by this Article for non-conformity.

(3) Where a tender has been accepted

(a) the buyer must within a reasonable time after he discovers or should have discovered any breach notify the seller of breach or be barred from any remedy; and

(b) if the claim is one for infringement or the like (subsection (3) of Section 2–312) and the buyer is sued as a result of such a breach he must so notify the seller within a reasonable time after he receives notice of the litigation or be barred from any remedy over for liability established by the litigation.

(4) The burden is on the buyer to establish any breach with respect to the goods accepted.

(5) Where the buyer is sued for breach of a warranty or other obligation for which his seller is answerable over

(a) he may give his seller written notice of the litigation. If the notice states that the seller may come in and defend and that if the seller does not do so he will be bound in any action against him by his buyer by any determination of fact common to the two litigations, then unless the seller after seasonable receipt of the notice does come in and defend he is so bound.

(b) if the claim is one for infringement or the like (subsection (3) of Section 2–312) the original seller may demand in writing that his buyer turn over to him control of the litigation including settlement or else be barred from any remedy over and if he also agrees to bear all expense and to satisfy any adverse judgment, then unless the buyer after seasonable receipt of the demand does turn over control the buyer is so barred.

(6) The provisions of subsections (3), (4) and (5) apply to any obligation of a buyer to hold the seller harmless against infringement or the like (subsection (3) of Section 2–312).

§ 2–608. Revocation of Acceptance in Whole or in Part.

(1) The buyer may revoke his acceptance of a lot or commercial unit whose non-conformity substantially impairs its value to him if he has accepted it

(a) on the reasonable assumption that its nonconformity would be cured and it has not been seasonably cured; or

(b) without discovery of such non-conformity if his acceptance was reasonably induced either by the difficulty of discovery before acceptance or by the seller's assurances.

(2) Revocation of acceptance must occur within a reasonable time after the buyer discovers or should have discovered the ground for it and before any substantial change in condition of the goods which is not caused by their own defects. It is not effective until the buyer notifies the seller of it.

(3) A buyer who so revokes has the same rights and duties with regard to the goods involved as if he had rejected them.

§ 2–609. Right to Adequate Assurance of Performance.

(1) A contract for sale imposes an obligation on each party that the other's expectation of receiving due performance will not be impaired. When reasonable grounds for insecurity arise with respect to the performance of either party the other may in writing demand adequate assurance of due performance and until he receives such assurance may if commercially reasonable suspend any performance for which he has not already received the agreed return.

(2) Between merchants the reasonableness of grounds for insecurity and the adequacy of any assurance offered shall be determined according to commercial standards.

(3) Acceptance of any improper delivery or payment does not prejudice the party's right to demand adequate assurance of future performance.

(4) After receipt of a justified demand failure to provide within a reasonable time not exceeding thirty days such assurance of due performance as is adequate under the circumstances of the particular case is a repudiation of the contract.

§ 2–610. Anticipatory Repudiation.

When either party repudiates the contract with respect to a performance not yet due the loss of which will substantially impair the value of the contract to the other, the aggrieved party may

(a) for a commercially reasonable time await performance by the repudiating party; or

(b) resort to any remedy for breach (Section 2–703 or Section 2–711), even though he has notified the repudiating party that he would await the latter's performance and has urged retraction; and

(c) in either case suspend his own performance or proceed in accordance with the provisions of this Article on the seller's right to identify goods to the contract notwithstanding breach or to salvage unfinished goods (Section 2–704).

§ 2–611. Retraction of Anticipatory Repudiation.

(1) Until the repudiating party's next performance is due he can retract his repudiation unless the aggrieved party has since the repudiation cancelled or materially changed his position or otherwise indicated that he considers the repudiation final.

(2) Retraction may be by any method which clearly indicates to the aggrieved party that the repudiating party intends to perform, but must include any assurance justifiably demanded under the provisions of this Article (Section 2–609).

(3) Retraction reinstates the repudiating party's rights under the contract with due excuse and allowance to the aggrieved party for any delay occasioned by the repudiation.

§ 2–612. "Installment Contract"; Breach.

(1) An "installment contract" is one which requires or authorizes the delivery of goods in separate lots to be separately accepted, even though the contract contains a clause "each delivery is a separate contract" or its equivalent.

(2) The buyer may reject any installment which is non-conforming if the non-conformity substantially impairs the value of that installment and cannot be cured or if the non-conformity is a defect in the required documents; but if the non-conformity does not fall within subsection (3) and the seller gives adequate assurance of its cure the buyer must accept that installment.

(3) Whenever non-conformity or default with respect to one or more installments substantially impairs the value of the whole contract there is a breach of the whole. But the aggrieved party reinstates the contract if he accepts a non-conforming installment without seasonably notifying of cancellation or if he brings an action with respect only to past installments or demands performance as to future installments.

§ 2-613. Casualty to Identified Goods.

Where the contract requires for its performance goods identified when the contract is made, and the goods suffer casualty without fault of either party before the risk of loss passes to the buyer, or in a proper case under a "no arrival, no sale" term (Section 2–324) then

(a) if the loss is total the contract is avoided; and

(b) if the loss is partial or the goods have so deteriorated as no longer to conform to the contract the buyer may nevertheless demand inspection and at his option either treat the contract as voided or accept the goods with due allowance from the contract price for the deterioration or the deficiency in quantity but without further right against the seller.

§ 2-614. Substituted Performance.

(1) Where without fault of either party the agreed berthing, loading, or unloading facilities fail or an agreed type of carrier becomes unavailable or the agreed manner of delivery otherwise becomes commercially impracticable but a commercially reasonable substitute is available, such substitute performance must be tendered and accepted.

(2) If the agreed means or manner of payment fails because of domestic or foreign governmental regulation, the seller may withhold or stop delivery unless the buyer provides a means or manner of payment which is commercially a substantial equivalent. If delivery has already been taken, payment by the means or in the manner provided by the regulation discharges the buyer's obligation unless the regulation is discriminatory, oppressive or predatory.

§ 2-615. Excuse by Failure of Presupposed Conditions.

Except so far as a seller may have assumed a greater obligation and subject to the preceding section on substituted performance:

(a) Delay in delivery or non-delivery in whole or in part by a seller who complies with paragraphs (b) and (c) is not a breach of his duty under a contract for sale if performance as agreed has been made impracticable by the occurrence of a contingency the nonoccurrence of which was a basic assumption on which the contract was made or by compliance in good faith with any applicable foreign or domestic governmental regulation or order whether or not it later proves to be invalid.

(b) Where the causes mentioned in paragraph (a) affect only a part of the seller's capacity to perform, he must allocate production and deliveries among his customers but may at his option include regular customers not then under contract as well as his own requirements for further manufacture. He may so allocate in any manner which is fair and reasonable.

(c) The seller must notify the buyer seasonably that there will be delay or non-delivery and, when allocation is required under paragraph (b), of the estimated quota thus made available for the buyer.

§ 2-616. Procedure on Notice Claiming Excuse.

(1) Where the buyer receives notification of a material or indefinite delay or an allocation justified under the preceding section he may by written notification to the seller as to any delivery concerned, and where the prospective deficiency substantially impairs the value of the whole contract under the provisions of this Article relating to breach of installment contracts (Section 2–612), then also as to the whole,

(a) terminate and thereby discharge any unexecuted portion of the contract; or

(b) modify the contract by agreeing to take his available quota in substitution.

(2) If after receipt of such notification from the seller the buyer fails so to modify the contract within a reasonable time not exceeding thirty days the contract lapses with respect to any deliveries affected.

(3) The provisions of this section may not be negated by agreement except in so far as the seller has assumed a greater obligation under the preceding section.

PART 7 Remedies

§ 2-701. Remedies for Breach of Collateral Contracts Not Impaired.

Remedies for breach of any obligation or promise collateral or ancillary to a contract for sale are not impaired by the provisions of this Article.

§ 2-702. Seller's Remedies on Discovery of Buyer's Insolvency.

(1) Where the seller discovers the buyer to be insolvent he may refuse delivery except for cash including payment for all goods theretofore delivered under the contract, and stop delivery under this Article (Section 2–705).

(2) Where the seller discovers that the buyer has received goods on credit while insolvent he may reclaim the goods upon demand made within ten days after the receipt, but if misrepresentation of solvency has been made to the particular seller in writing within three months before delivery the ten day limitation does not apply. Except as provided in this subsection the seller may not base a right to reclaim goods on the buyer's fraudulent or innocent misrepresentation of solvency or of intent to pay.

(3) The seller's right to reclaim under subsection (2) is subject to the rights of a buyer in ordinary course or other good faith purchaser under this Article (Section 2–403). Successful reclamation of goods excludes all other remedies with respect to them.

§ 2-703. Seller's Remedies in General.

Where the buyer wrongfully rejects or revokes acceptance of goods or fails to make a payment due on or before delivery or repudiates with respect to a part or the whole, then with respect

to any goods directly affected and, if the breach is of the whole contract (Section 2–612), then also with respect to the whole undelivered balance, the aggrieved seller may

(a) withhold delivery of such goods;

(b) stop delivery by any bailee as hereafter provided (Section 2–705);

(c) proceed under the next section respecting goods still unidentified to the contract;

(d) resell and recover damages as hereafter provided (Section 2–706);

(e) recover damages for non-acceptance (Section 2–708) or in a proper case the price (Section 2–709);

(f) cancel.

§ 2–704. Seller's Right to Identify Goods to the Contract Notwithstanding Breach or to Salvage Unfinished Goods.

(1) An aggrieved seller under the preceding section may

(a) identify to the contract conforming goods not already identified if at the time he learned of the breach they are in his possession or control;

(b) treat as the subject of resale goods which have demonstrably been intended for the particular contract even though those goods are unfinished.

(2) Where the goods are unfinished an aggrieved seller may in the exercise of reasonable commercial judgment for the purposes of avoiding loss and of effective realization either complete the manufacture and wholly identify the goods to the contract or cease manufacture and resell for scrap or salvage value or proceed in any other reasonable manner.

§ 2–705. Seller's Stoppage of Delivery in Transit or Otherwise.

(1) The seller may stop delivery of goods in the possession of a carrier or other bailee when he discovers the buyer to be insolvent (Section 2–702) and may stop delivery of carload, truckload, planeload or larger shipments of express or freight when the buyer repudiates or fails to make a payment due before delivery or if for any other reason the seller has a right to withhold or reclaim the goods.

(2) As against such buyer the seller may stop delivery until

(a) receipt of the goods by the buyer; or

(b) acknowledgment to the buyer by any bailee of the goods except a carrier that the bailee holds the goods for the buyer; or

(c) such acknowledgment to the buyer by a carrier by reshipment or as warehouseman; or

(d) negotiation to the buyer of any negotiable document of title covering the goods.

(3) (a) To stop delivery the seller must so notify as to enable the bailee by reasonable diligence to prevent delivery of the goods.

(b) After such notification the bailee must hold and deliver the goods according to the directions of the seller but the seller is liable to the bailee for any ensuing charges or damages.

(c) If a negotiable document of title has been issued for goods the bailee is not obliged to obey a notification to stop until surrender of the document.

(d) A carrier who has issued a non-negotiable bill of lading is not obliged to obey a notification to stop received from a person other than the consignor.

§ 2–706. Seller's Resale Including Contract for Resale.

(1) Under the conditions stated in Section 2–703 on seller's remedies, the seller may resell the goods concerned or the undelivered balance thereof. Where the resale is made in good faith and in a commercially reasonable manner the seller may recover the difference between the resale price and the contract price together with any incidental damages allowed under the provisions of this Article (Section 2–710), but less expenses saved in consequence of the buyer's breach.

(2) Except as otherwise provided in subsection (3) or unless otherwise agreed resale may be at public or private sale including sale by way of one or more contracts to sell or of identification to an existing contract of the seller. Sale may be as a unit or in parcels and at any time and place and on any terms but every aspect of the sale including the method, manner, time, place and terms must be commercially reasonable. The resale must be reasonably identified as referring to the broken contract, but it is not necessary that the goods be in existence or that any or all of them have been identified to the contract before the breach.

(3) Where the resale is at private sale the seller must give the buyer reasonable notification of his intention to resell.

(4) Where the resale is at public sale

(a) only identified goods can be sold except where there is a recognized market for a public sale of futures in goods of the kind; and

(b) it must be made at a usual place or market for public sale if one is reasonably available and except in the case of goods which are perishable or threaten to decline in value speedily the seller must give the buyer reasonable notice of the time and place of the resale; and

(c) if the goods are not to be within the view of those attending the sale the notification of sale must state the place where the goods are located and provide for their reasonable inspection by prospective bidders; and

(d) the seller may buy.

(5) A purchaser who buys in good faith at a resale takes the goods free of any rights of the original buyer even though the seller fails to comply with one or more of the requirements of this section.

(6) The seller is not accountable to the buyer for any profit made on any resale. A person in the position of a seller (Section 2–707) or a buyer who has rightfully rejected or justifiably revoked acceptance must account for any excess over the amount of his security interest, as hereinafter defined (subsection (3) of Section 2–711).

§ 2–707. "Person in the Position of a Seller".

(1) A "person in the position of a seller" includes as against a principal an agent who has paid or become responsible for the price of goods on behalf of his principal or anyone who otherwise holds a security interest or other right in goods similar to that of a seller.

(2) A person in the position of a seller may as provided in this Article withhold or stop delivery (Section 2–705) and resell (Section 2–706) and recover incidental damages (Section 2–710).

§ 2–708. Seller's Damages for Non-Acceptance or Repudiation.

(1) Subject to subsection (2) and to the provisions of this Article with respect to proof of market price (Section 2–723), the measure of damages for non-acceptance or repudiation by the buyer is the difference between the market price at the time and place for tender and the unpaid contract price together with any incidental damages provided in this Article (Section 2–710), but less expenses saved in consequence of the buyer's breach.

(2) If the measure of damages provided in subsection (1) is inadequate to put the seller in as good a position as performance would have done then the measure of damages is the profit (including reasonable overhead) which the seller would have made from full performance by the buyer, together with any incidental damages provided in this Article (Section 2–710), due allowance for costs reasonably incurred and due credit for payments or proceeds of resale.

§ 2–709. Action for the Price.

(1) When the buyer fails to pay the price as it becomes due the seller may recover, together with any incidental damages under the next section, the price

(a) of goods accepted or of conforming goods lost or damaged within a commercially reasonable time after risk of their loss has passed to the buyer; and

(b) of goods identified to the contract if the seller is unable after reasonable effort to resell them at a reasonable price or the circumstances reasonably indicate that such effort will be unavailing.

(2) Where the seller sues for the price he must hold for the buyer any goods which have been identified to the contract and are still in his control except that if resale becomes possible he may resell them at any time prior to the collection of the judgment. The net proceeds of any such resale must be credited to the buyer and payment of the judgment entitles him to any goods not resold.

(3) After the buyer has wrongfully rejected or revoked acceptance of the goods or has failed to make a payment due or has repudiated (Section 2–610), a seller who is held not entitled to the price under this section shall nevertheless be awarded damages for non-acceptance under the preceding section.

§ 2–710. Seller's Incidental Damages.

Incidental damages to an aggrieved seller include any commercially reasonable charges, expenses or commissions incurred in stopping delivery, in the transportation, care and custody of goods after the buyer's breach, in connection with return or resale of the goods or otherwise resulting from the breach.

§ 2–711. Buyer's Remedies in General; Buyer's Security Interest in Rejected Goods.

(1) Where the seller fails to make delivery or repudiates or the buyer rightfully rejects or justifiably revokes acceptance then with respect to any goods involved, and with respect to the whole if the breach goes to the whole contract (Section 2–612), the buyer may cancel and whether or not he has done so may in addition to recovering so much of the price as has been paid

(a) "cover" and have damages under the next section as to all the goods affected whether or not they have been identified to the contract; or

(b) recover damages for non-delivery as provided in this Article (Section 2–713).

(2) Where the seller fails to deliver or repudiates the buyer may also

(a) if the goods have been identified recover them as provided in this Article (Section 2–502); or

(b) in a proper case obtain specific performance or replevy the goods as provided in this Article (Section 2–716).

(3) On rightful rejection or justifiable revocation of acceptance a buyer has a security interest in goods in his possession or control for any payments made on their price and any expenses reasonably incurred in their inspection, receipt, transportation, care and custody and may hold such goods and resell them in like manner as an aggrieved seller (Section 2–706).

§ 2–712. "Cover"; Buyer's Procurement of Substitute Goods.

(1) After a breach within the preceding section the buyer may "cover" by making in good faith and without unreasonable delay any reasonable purchase of or contract to purchase goods in substitution for those due from the seller.

(2) The buyer may recover from the seller as damages the difference between the cost of cover and the contract price together with any incidental or consequential damages as hereinafter defined (Section 2–715), but less expenses saved in consequence of the seller's breach.

(3) Failure of the buyer to effect cover within this section does not bar him from any other remedy.

§ 2–713. Buyer's Damages for Non-Delivery or Repudiation.

(1) Subject to the provisions of this Article with respect to proof of market price (Section 2–723), the measure of damages for non-delivery or repudiation by the seller is the difference between the market price at the time when the buyer learned of the breach and the contract price together with any incidental and consequential damages provided in this Article (Section 2–715), but less expenses saved in consequence of the seller's breach.

(2) Market price is to be determined as of the place for tender or, in cases of rejection after arrival or revocation of acceptance, as of the place of arrival.

§ 2–714. Buyer's Damages for Breach in Regard to Accepted Goods.

(1) Where the buyer has accepted goods and given notification (subsection (3) of Section 2–607) he may recover as damages for any non-conformity of tender the loss resulting in the ordinary course of events from the seller's breach as determined in any manner which is reasonable.

(2) The measure of damages for breach of warranty is the difference at the time and place of acceptance between the value of the goods accepted and the value they would have had if they had been as warranted, unless special circumstances show proximate damages of a different amount.

(3) In a proper case any incidental and consequential damages under the next section may also be recovered.

§ 2–715. Buyer's Incidental and Consequential Damages.

(1) Incidental damages resulting from the seller's breach include expenses reasonably incurred in inspection, receipt, transportation and care and custody of goods rightfully rejected, any commercially reasonable charges, expenses or commissions in connection with effecting cover and any other reasonable expense incident to the delay or other breach.

(2) Consequential damages resulting from the seller's breach include

(a) any loss resulting from general or particular requirements and needs of which the seller at the time of contracting had reason to know and which could not reasonably be prevented by cover or otherwise; and

(b) injury to person or property proximately resulting from any breach of warranty.

§ 2–716. Buyer's Right to Specific Performance or Replevin.

(1) Specific performance may be decreed where the goods are unique or in other proper circumstances.

(2) The decree for specific performance may include such terms and conditions as to payment of the price, damages, or other relief as the court may deem just.

(3) The buyer has a right of replevin for goods identified to the contract if after reasonable effort he is unable to effect cover for such goods or the circumstances reasonably indicate that such effort will be unavailing or if the goods have been shipped under reservation and satisfaction of the security interest in them has been made or tendered. In the case of goods bought for personal, family, or household purposes, the buyer's right of replevin vests upon acquisition of a special property, even if the seller had not then repudiated or failed to deliver.

As amended in 1999.

§ 2–717. Deduction of Damages From the Price.

The buyer on notifying the seller of his intention to do so may deduct all or any part of the damages resulting from any breach of the contract from any part of the price still due under the same contract.

§ 2–718. Liquidation or Limitation of Damages; Deposits.

(1) Damages for breach by either party may be liquidated in the agreement but only at an amount which is reasonable in the light of the anticipated or actual harm caused by the breach, the difficulties of proof of loss, and the inconvenience or nonfeasibility of otherwise obtaining an adequate remedy. A term fixing unreasonably large liquidated damages is void as a penalty.

(2) Where the seller justifiably withholds delivery of goods because of the buyer's breach, the buyer is entitled to restitution of any amount by which the sum of his payments exceeds

(a) the amount to which the seller is entitled by virtue of terms liquidating the seller's damages in accordance with subsection (1), or

(b) in the absence of such terms, twenty per cent of the value of the total performance for which the buyer is obligated under the contract or $500, whichever is smaller.

(3) The buyer's right to restitution under subsection (2) is subject to offset to the extent that the seller establishes

(a) a right to recover damages under the provisions of this Article other than subsection (1), and

(b) the amount or value of any benefits received by the buyer directly or indirectly by reason of the contract.

(4) Where a seller has received payment in goods their reasonable value or the proceeds of their resale shall be treated as payments for the purposes of subsection (2); but if the seller has notice of the buyer's breach before reselling goods received in part performance, his resale is subject to the conditions laid down in this Article on resale by an aggrieved seller (Section 2–706).

§ 2–719. Contractual Modification or Limitation of Remedy.

(1) Subject to the provisions of subsections (2) and (3) of this section and of the preceding section on liquidation and limitation of damages,

(a) the agreement may provide for remedies in addition to or in substitution for those provided in this Article and may limit or alter the measure of damages recoverable under this Article, as by limiting the buyer's remedies to return of the goods and repayment of the price or to repair and replacement of nonconforming goods or parts; and

(b) resort to a remedy as provided is optional unless the remedy is expressly agreed to be exclusive, in which case it is the sole remedy.

(2) Where circumstances cause an exclusive or limited remedy to fail of its essential purpose, remedy may be had as provided in this Act.

(3) Consequential damages may be limited or excluded unless the limitation or exclusion is unconscionable. Limitation of consequential damages for injury to the person in the case of consumer goods is prima facie unconscionable but limitation of damages where the loss is commercial is not.

§ 2–720. Effect of "Cancellation" or "Rescission" on Claims for Antecedent Breach.

Unless the contrary intention clearly appears, expressions of "cancellation" or "rescission" of the contract or the like shall not be construed as a renunciation or discharge of any claim in damages for an antecedent breach.

§ 2–721. Remedies for Fraud.

Remedies for material misrepresentation or fraud include all remedies available under this Article for non-fraudulent breach. Neither rescission or a claim for rescission of the contract for sale nor rejection or return of the goods shall bar or be deemed inconsistent with a claim for damages or other remedy.

§ 2–722. Who Can Sue Third Parties for Injury to Goods.

Where a third party so deals with goods which have been identified to a contract for sale as to cause actionable injury to a party to that contract

(a) a right of action against the third party is in either party to the contract for sale who has title to or a security interest or a special property or an insurable interest in the goods; and if the goods have been destroyed or converted a right of action is also in the party who either bore the risk of loss under the contract for sale or has since the injury assumed that risk as against the other;

(b) if at the time of the injury the party plaintiff did not bear the risk of loss as against the other party to the contract for sale and there is no arrangement between them for disposition of the recovery, his suit or settlement is, subject to his own interest, as a fiduciary for the other party to the contract;

(c) either party may with the consent of the other sue for the benefit of whom it may concern.

§ 2–723. Proof of Market Price: Time and Place.

(1) If an action based on anticipatory repudiation comes to trial before the time for performance with respect to some or all of the goods, any damages based on market price (Section 2–708 or Section 2–713) shall be determined according to the price of such goods prevailing at the time when the aggrieved party learned of the repudiation.

(2) If evidence of a price prevailing at the times or places described in this Article is not readily available the price prevailing within any reasonable time before or after the time described or at any other place which in commercial judgment or under usage of trade would serve as a reasonable substitute for the one described may be used, making any proper allowance for the cost of transporting the goods to or from such other place.

(3) Evidence of a relevant price prevailing at a time or place other than the one described in this Article offered by one party is not admissible unless and until he has given the other party such notice as the court finds sufficient to prevent unfair surprise.

§ 2–724. Admissibility of Market Quotations.

Whenever the prevailing price or value of any goods regularly bought and sold in any established commodity market is in issue, reports in official publications or trade journals or in newspapers or periodicals of general circulation published as the reports of such market shall be admissible in evidence. The circumstances of the preparation of such a report may be shown to affect its weight but not its admissibility.

§ 2–725. Statute of Limitations in Contracts for Sale.

(1) An action for breach of any contract for sale must be commenced within four years after the cause of action has accrued. By the original agreement the parties may reduce the period of limitation to not less than one year but may not extend it.

(2) A cause of action accrues when the breach occurs, regardless of the aggrieved party's lack of knowledge of the breach. A breach of warranty occurs when tender of delivery is made, except that where a warranty explicitly extends to future performance of the goods and discovery of the breach must await the time of such performance the cause of action accrues when the breach is or should have been discovered.

(3) Where an action commenced within the time limited by subsection (1) is so terminated as to leave available a remedy by another action for the same breach such other action may be commenced after the expiration of the time limited and within six months after the termination of the first action unless the termination resulted from voluntary discontinuance or from dismissal for failure or neglect to prosecute.

(4) This section does not alter the law on tolling of the statute of limitations nor does it apply to causes of action which have accrued before this Act becomes effective.

ARTICLE II AMENDMENTS (EXCERPTS)[1]

PART 1 Short Title, General Construction and Subject Matter

§ 2-103. Definitions and Index of Definitions.

* * * *

(1) In this article unless the context otherwise requires

* * * *

(b) "Conspicuous", with reference to a term, means so written, displayed, or presented that a reasonable person against which it is to operate ought to have noticed it. A term in an electronic record intended to evoke a response by an electronic agent is conspicuous if it is presented in a form that would enable a reasonably configured electronic agent to take it into account or react to it without review of the record by an individual. Whether a term is "conspicuous" or not is a decision for the court. Conspicuous terms include the following:

(i) for a person:

(A) a heading in capitals equal to or greater in size than the surrounding text, or in contrasting type, font, or color to the surrounding text of the same or lesser size;

(B) language in the body of a record or display in larger type than the surrounding text, or in contrasting type, font, or color to the surrounding text of the same size, or set off from surrounding text of the same size by symbols or other marks that call attention to the language; and

(ii) for a person or an electronic agent, a term that is so placed in a record or display that the person or electronic agent cannot proceed without taking action with respect to the particular term.

(c) "Consumer" means an individual who buys or contracts to buy goods that, at the time of contracting, are intended by the individual to be used primarily for personal, family, or household purposes.

(d) "Consumer contract" means a contract between a merchant seller and a consumer.

* * * *

(j) "Good faith" means honesty in fact and the observance of reasonable commercial standards of fair dealing.

(k) "Goods" means all things that are movable at the time of identification to a contract for sale. The term includes future goods, specially manufactured goods, the unborn young of animals, growing crops, and other identified things attached to realty as described in Section 2–107. The term does not include information, the money in which the price is to be paid, investment securities under Article 8, the subject matter of foreign exchange transactions, and choses in action.

* * * *

(m) "Record" means information that is inscribed on a tangible medium or that is stored in an electronic or other medium and is retrievable in perceivable form.

(n) "Remedial promise" means a promise by the seller to repair or replace the goods or to refund all or part of the price upon the happening of a specified event.

* * * *

(p) "Sign" means, with present intent to authenticate or adopt a record,

(i) to execute or adopt a tangible symbol; or

(ii) to attach to or logically associate with the record an electronic sound, symbol, or process.

* * * *

PART 2 Form, Formation, Terms and Readjustment of Contract; Electronic Contracting

§ 2-201. Formal Requirements; Statute of Frauds.

(1) A contract for the sale of goods for the price of $5,000 or more is not enforceable by way of action or defense unless there is some record sufficient to indicate that a contract for sale has been made between the parties and signed by the party against whom which enforcement is sought or by the party's authorized agent or broker. A record is not insufficient because it omits or incorrectly states a term agreed upon but the contract is not enforceable under this subsection beyond the quantity of goods shown in the record.

(2) Between merchants if within a reasonable time a record in confirmation of the contract and sufficient against the sender is received and the party receiving it has reason to know its contents, it satisfies the requirements of subsection (1) against such party the recipient unless notice of objection to its contents is given in a record within 10 days after it is received.

(3) A contract which does not satisfy the requirements of subsection (1) but which is valid in other respects is enforceable

(a) if the goods are to be specially manufactured for the buyer and are not suitable for sale to others in the ordinary course of the seller's business and the seller, before notice of repudiation is received and under circumstances which reasonably indicate that the goods are for the buyer, has made either a substantial beginning of their manufacture or commitments for their procurement; or

(b) if the party against whom which enforcement is sought admits in the party's pleading, or in the party's testimony or otherwise under oath that a contract for sale was made, but the contract is not enforceable under this paragraph beyond the quantity of goods admitted; or

(c) with respect to goods for which payment has been made and accepted or which have been received and accepted (Sec. 2–606).

(4) A contract that is enforceable under this section is not rendered unenforceable merely because it is not capable of being performed within one year or any other applicable period after its making.

* * * *

§ 2–207. Terms of Contract; Effect of Confirmation.

If (i) conduct by both parties recognizes the existence of a contract although their records do not otherwise establish a contract, (ii) a contract is formed by an offer and acceptance, or (iii) a contract formed in any manner is confirmed by a record that contains terms additional to or different from those in the contract being confirmed, the terms of the contract, subject to Section 2–202, are:

(a) terms that appear in the records of both parties;

(b) terms, whether in a record or not, to which both parties agree; and

(c) terms supplied or incorporated under any provision of this Act.

* * * *

PART 3 General Obligation and Construction of Contract

* * * *

§ 2–312. Warranty of Title and Against Infringement; Buyer's Obligation Against Infringement.

(1) Subject to subsection (2) there is in a contract for sale a warranty by the seller that

(a) the title conveyed shall be good, good and its transfer rightful and shall not, because of any colorable claim to or interest in the goods, unreasonably expose the buyer to litigation; and

(b) the goods shall be delivered free from any security interest or other lien or encumbrance of which the buyer at the time of contracting has no knowledge.

(2) Unless otherwise agreed a seller that is a merchant regularly dealing in goods of the kind warrants that the goods shall be delivered free of the rightful claim of any third person by way of infringement or the like but a buyer that furnishes specifications to the seller must hold the seller harmless against any such claim that arises out of compliance with the specifications.

(3) A warranty under this section may be disclaimed or modified only by specific language or by circumstances that give the buyer reason to know that the seller does not claim title, that the seller is purporting to sell only the right or title as the seller or a third person may have, or that the seller is selling subject to any claims of infringement or the like.

§ 2–313. Express Warranties by Affirmation, Promise, Description, Sample; Remedial Promise.

(1) In this section, "immediate buyer" means a buyer that enters into a contract with the seller.

* * * *

(4) Any remedial promise made by the seller to the immediate buyer creates an obligation that the promise will be performed upon the happening of the specified event.

§ 2–313A. Obligation to Remote Purchaser Created by Record Packaged with or Accompanying Goods.

(1) This section applies only to new goods and goods sold or leased as new goods in a transaction of purchase in the normal chain of distribution. In this section:

(a) "Immediate buyer" means a buyer that enters into a contract with the seller.

(b) "Remote purchaser" means a person that buys or leases goods from an immediate buyer or other person in the normal chain of distribution.

(2) If a seller in a record packaged with or accompanying the goods makes an affirmation of fact or promise that relates to the goods, provides a description that relates to the goods, or makes a remedial promise, and the seller reasonably expects the record to be, and the record is, furnished to the remote purchaser, the seller has an obligation to the remote purchaser that:

(a) the goods will conform to the affirmation of fact, promise or description unless a reasonable person in the position of the remote purchaser would not believe that the affirmation of fact, promise or description created an obligation; and

(b) the seller will perform the remedial promise.

(3) It is not necessary to the creation of an obligation under this section that the seller use formal words such as "warrant" or "guarantee" or that the seller have a specific intention to undertake an obligation, but an affirmation merely of the value of the goods or a statement purporting to be merely the seller's opinion or commendation of the goods does not create an obligation.

(4) The following rules apply to the remedies for breach of an obligation created under this section:

(a) The seller may modify or limit the remedies available to the remote purchaser if the modification or limitation is furnished to the remote purchaser no later than the time of purchase or if the modification or limitation is contained in the record that contains the affirmation of fact, promise or description.

(b) Subject to a modification or limitation of remedy, a seller in breach is liable for incidental or consequential damages under Section 2–715, but the seller is not liable for lost profits.

(c) The remote purchaser may recover as damages for breach of a seller's obligation arising under subsection (2) the loss resulting in the ordinary course of events as determined in any manner that is reasonable.

(5) An obligation that is not a remedial promise is breached if the goods did not conform to the affirmation of fact, promise or description creating the obligation when the goods left the seller's control.

§ 2–313B. Obligation to Remote Purchaser Created by Communication to the Public.

(1) This section applies only to new goods and goods sold or leased as new goods in a transaction of purchase in the normal chain of distribution. In this section:

(a) "Immediate buyer" means a buyer that enters into a contract with the seller.

(b) "Remote purchaser" means a person that buys or leases goods from an immediate buyer or other person in the normal chain of distribution.

(2) If a seller in advertising or a similar communication to the public makes an affirmation of fact or promise that relates to the goods, provides a description that relates to the goods, or makes a remedial promise, and the remote purchaser enters into a transaction of purchase with knowledge of and with the expectation that the goods will conform to the affirmation of fact, promise, or description, or that the seller will perform the remedial promise, the seller has an obligation to the remote purchaser that:

(a) the goods will conform to the affirmation of fact, promise or description unless a reasonable person in the position of the remote purchaser would not believe that the affirmation of fact, promise or description created an obligation; and

(b) the seller will perform the remedial promise.

(3) It is not necessary to the creation of an obligation under this section that the seller use formal words such as "warrant" or "guarantee" or that the seller have a specific intention to undertake an obligation, but an affirmation merely of the value of the goods or a statement purporting to be merely the seller's opinion or commendation of the goods does not create an obligation.

(4) The following rules apply to the remedies for breach of an obligation created under this section:

(a) The seller may modify or limit the remedies available to the remote purchaser if the modification or limitation is furnished to the remote purchaser no later than the time of purchase. The modification or limitation may be furnished as part of the communication that contains the affirmation of fact, promise or description.

(b) Subject to a modification or limitation of remedy, a seller in breach is liable for incidental or consequential damages under Section 2–715, but the seller is not liable for lost profits.

(c) The remote purchaser may recover as damages for breach of a seller's obligation arising under subsection (2) the loss resulting in the ordinary course of events as determined in any manner that is reasonable.

(5) An obligation that is not a remedial promise is breached if the goods did not conform to the affirmation of fact, promise or description creating the obligation when the goods left the seller's control.

* * * *

§ 2–316. Exclusion or Modification of Warranties.

* * * *

(2) Subject to subsection (3), to exclude or modify the implied warranty of merchantability or any part of it in a consumer contract the language must be in a record, be conspicuous and state "The seller undertakes no responsibility for the quality of the goods except as otherwise provided in this contract," and in any other contract the language must mention merchantability and in case of a record must be conspicuous. Subject to subsection (3), to exclude or modify the implied warranty of fitness the exclusion must be in a record and be conspicuous. Language to exclude all implied warranties of fitness in a consumer contract must state "The seller assumes no responsibility that the goods will be fit for any particular purpose for which you may be buying these goods, except as otherwise provided in the contract," and in any other contract the language is sufficient if it states, for example, that "There are no warranties which extend beyond the description on the face hereof." Language that satisfies the requirements of this subsection for the exclusion and modification of a warranty in a consumer contract also satisfies the requirements for any other contract.

(3) Notwithstanding subsection (2):

(a) unless the circumstances indicate otherwise, all implied warranties are excluded by expressions like "as is", "with all faults" or other language which in common understanding calls the buyer's attention to the exclusion of warranties, makes plain that there is no implied warranty, and in a consumer contract evidenced by a record is set forth conspicuously in the record; and

(b) when the buyer before entering into the contract has examined the goods or the sample or model as fully as desired or has refused to examine the goods after a demand by the seller there is no implied warranty with regard to defects which an examination ought in the circumstances to have revealed to the buyer; and

(c) an implied warranty can also be excluded or modified by course of dealing or course of performance or usage of trade.

* * * *

§ 2–318. Third Party Beneficiaries of Warranties Express or Implied.

(1) In this section:

(a) "Immediate buyer" means a buyer that enters into a contract with the seller.

(b) "Remote purchaser" means a person that buys or leases goods from an immediate buyer or other person in the normal chain of distribution.

Alternative A to subsection (2) (2) A seller's warranty whether express or implied to an immediate buyer, a seller's remedial promise to an immediate buyer, or a seller's obligation to a remote purchaser under Section 2–313A or 2–313B extends to any natural person who is in the family or household of the immediate buyer or the remote purchaser or who is a guest in the home of either if it is reasonable to expect that the person may use, consume or be affected by the goods and who is injured in person by breach of the warranty, remedial promise or obligation. A seller may not exclude or limit the operation of this section.

Alternative B to subsection (2) (2) A seller's warranty whether express or implied to an immediate buyer, a seller's remedial promise to an immediate buyer, or a seller's obligation to a remote purchaser under Section 2–313A or 2–313B extends to any natural person who may reasonably be expected to use, consume or be affected by the goods and who is injured in person by breach of the warranty, remedial promise or obligation. A seller may not exclude or limit the operation of this section.

Alternative C to subsection (2) (2) A seller's warranty whether express or implied to an immediate buyer, a seller's remedial promise to an immediate buyer, or a seller's obligation to a remote purchaser under Section 2–313A or 2–313B extends to any person that may reasonably be expected to use, consume or be affected by the goods and that is injured by breach of the warranty, remedial promise or obligation. A seller may not exclude or limit the operation of this section with respect to injury to the person of an individual to whom the warranty, remedial promise or obligation extends.

* * * *

PART 5 Performance

* * * *

§ 2–502. Buyer's Right to Goods on Seller's Insolvency.

(1) Subject to subsections (2) and (3) and even though the goods have not been shipped a buyer who that has paid a part or all of the price of goods in which the buyer has a special property under the provisions of the immediately preceding section may on making and keeping good a tender of any unpaid portion of their price recover them from the seller if:

(a) in the case of goods bought by a consumer, the seller repudiates or fails to deliver as required by the contract; or

(b) in all cases, the seller becomes insolvent within ten days after receipt of the first installment on their price.

(2) The buyer's right to recover the goods under subsection (1) vests upon acquisition of a special property, even if the seller had not then repudiated or failed to deliver.

(3) If the identification creating the special property has been made by the buyer, the buyer acquires the right to recover the goods only if they conform to the contract for sale.

* * * *

§ 2–508. Cure by Seller of Improper Tender or Delivery; Replacement.

(1) Where the buyer rejects goods or a tender of delivery under Section 2–601 or 2–612 or except in a consumer contract justifiably revokes acceptance under Section 2–608(1)(b) and the agreed time for performance has not expired, a seller that has performed in good faith, upon seasonable notice to the buyer and at the seller's own expense, may cure the breach of contract by making a conforming tender of delivery within the agreed time. The seller shall compensate the buyer for all of the buyer's reasonable expenses caused by the seller's breach of contract and subsequent cure.

(2) Where the buyer rejects goods or a tender of delivery under Section 2–601 or 2–612 or except in a consumer contract justifiably revokes acceptance under Section 2–608(1)(b) and the agreed time for performance has expired, a seller that has performed in good faith, upon seasonable notice to the buyer and at the seller's own expense, may cure the breach of contract, if the cure is appropriate and timely under the circumstances, by making a tender of conforming goods. The seller shall compensate the buyer for all of the buyer's reasonable expenses caused by the seller's breach of contract and subsequent cure.

§ 2–509. Risk of Loss in the Absence of Breach.

(1) Where the contract requires or authorizes the seller to ship the goods by carrier

(a) if it does not require the seller to deliver them at a particular destination, the risk of loss passes to the buyer when the goods are delivered to the carrier even though the shipment is under reservation (Section 2–505); but

(b) if it does require the seller to deliver them at a particular destination and the goods are there tendered while in the possession of the carrier, the risk of loss passes to the buyer when the goods are there so tendered as to enable the buyer to take delivery.

(2) Where the goods are held by a bailee to be delivered without being moved, the risk of loss passes to the buyer

(a) on the buyer's receipt of a negotiable document of title covering the goods; or

(b) on acknowledgment by the bailee to the buyer of the buyer's right to possession of the goods; or

(c) after the buyer's receipt of a non-negotiable document of title or other direction to deliver in a record, as provided in subsection (4)(b) of Section 2–503.

(3) In any case not within subsection (1) or (2), the risk of loss passes to the buyer on the buyer's receipt of the goods.

* * * *

§ 2–513. Buyer's Right to Inspection of Goods.

* * * *

(3) Unless otherwise agreed, the buyer is not entitled to inspect the goods before payment of the price when the contract provides

(a) for delivery on terms that under applicable course of performance, course of dealing, or usage of trade are interpreted to preclude inspection before payment; or

(b) for payment against documents of title, except where such payment is due only after the goods are to become available for inspection.

* * * *

PART 6 Breach, Repudiation and Excuse

* * * *

§ 2–605. Waiver of Buyer's Objections by Failure to Particularize.

(1) The buyer's failure to state in connection with rejection a particular defect or in connection with revocation of acceptance a defect that justifies revocation precludes the buyer from relying on the unstated defect to justify rejection or revocation of acceptance if the defect is ascertainable by reasonable inspection

(a) where the seller had a right to cure the defect and could have cured it if stated seasonably; or

(b) between merchants when the seller has after rejection made a request in a record for a full and final statement in record form of all defects on which the buyer proposes to rely.

(2) A buyer's payment against documents tendered to the buyer made without reservation of rights precludes recovery of the payment for defects apparent on the face of the documents.

* * * *

§ 2–607. Effect of Acceptance; Notice of Breach; Burden of Establishing Breach After Acceptance; Notice of Claim or Litigation to Person Answerable Over.

(3) Where a tender has been accepted

(a) the buyer must within a reasonable time after the buyer discovers or should have discovered any breach notify the seller; however, failure to give timely notice bars the buyer from a remedy only to the extent that the seller is prejudiced by the failure and

(b) if the claim is one for infringement or the like (subsection (3) of Section 2–312) and the buyer is sued as a result of such a breach the buyer must so notify the seller within a reasonable time after the buyer receives notice of the litigation or be barred from any remedy over for liability established by the litigation.

* * * *

§ 2–608. Revocation of Acceptance in Whole or in Part.

* * * *

(4) If a buyer uses the goods after a rightful rejection or justifiable revocation of acceptance, the following rules apply:

(a) Any use by the buyer that is unreasonable under the circumstances is wrongful as against the seller and is an acceptance only if ratified by the seller.

(b) Any use of the goods that is reasonable under the circumstances is not wrongful as against the seller and is not an acceptance, but in an appropriate case the buyer shall be obligated to the seller for the value of the use to the buyer.

* * * *

§ 2–612. "Installment Contract"; Breach.

* * * *

(2) The buyer may reject any installment which is -non-conforming if the non-conformity substantially impairs the value of that installment to the buyer or if the non-conformity is a defect in the required documents; but if the non-conformity does not fall within subsection (3) and the seller gives adequate assurance of its cure the buyer must accept that installment.

(3) Whenever non-conformity or default with respect to one or more installments substantially impairs the value of the whole contract there is a breach of the whole. But the aggrieved party reinstates the contract if the party accepts a non-conforming installment without seasonably notifying of cancellation or if the party brings an action with respect only to past installments or demands performance as to future installments.

* * * *

PART 7 Remedies

§ 2–702. Seller's Remedies on Discovery of Buyer's Insolvency.

* * * *

(2) Where the seller discovers that the buyer has received goods on credit while insolvent the seller may reclaim the goods upon demand made within a reasonable time after the buyer's receipt of the goods. Except as provided in this subsection the seller may not base a right to reclaim goods on the buyer's fraudulent or innocent misrepresentation of solvency or of intent to pay.

* * * *

§ 2–705. Seller's Stoppage of Delivery in Transit or Otherwise.

(1) The seller may stop delivery of goods in the possession of a carrier or other bailee when the seller discovers the buyer to be insolvent (Section 2–702) or when the buyer repudiates or fails to make a payment due before delivery or if for any other reason the seller has a right to withhold or reclaim the goods.

* * * *

§ 2-706. Seller's Resale Including Contract for Resale.

(1) In an appropriate case involving breach by the buyer, the seller may resell the goods concerned or the undelivered balance thereof. Where the resale is made in good faith and in a commercially reasonable manner the seller may recover the difference between the contract price and the resale price together with any incidental or consequential damages allowed under the provisions of this Article (Section 2–710), but less expenses saved in consequence of the buyer's breach.

* * * *

§ 2-708. Seller's Damages for Non-Acceptance or Repudiation.

(1) Subject to subsection (2) and to the provisions of this Article with respect to proof of market price (Section 2–723)

(a) the measure of damages for non-acceptance by the buyer is the difference between the contract price and the market price at the time and place for tender together with any incidental or consequential damages provided in this Article (Section 2–710), but less expenses saved in consequence of the buyer's breach; and

(b) the measure of damages for repudiation by the buyer is the difference between the contract price and the market price at the place for tender at the expiration of a commercially reasonable time after the seller learned of the repudiation, but no later than the time stated in paragraph (a), together with any incidental or consequential damages provided in this Article (Section 2–710), but less expenses saved in consequence of the buyer's breach.

(2) If the measure of damages provided in subsection (1) or in Section 2–706 is inadequate to put the seller in as good a position as performance would have done then the measure of damages is the profit (including reasonable overhead) which the seller would have made from full performance by the buyer, together with any incidental or consequential damages provided in this Article (Section 2–710).

§ 2-709. Action for the Price.

(1) When the buyer fails to pay the price as it becomes due the seller may recover, together with any incidental or consequential damages under the next section, the price

(a) of goods accepted or of conforming goods lost or damaged within a commercially reasonable time after risk of their loss has passed to the buyer; and

(b) of goods identified to the contract if the seller is unable after reasonable effort to resell them at a reasonable price or the circumstances reasonably indicate that such effort will be unavailing.

* * * *

* * * *

* * * *

§ 2-710. Seller's Incidental and Consequential Damages.

(1) Incidental damages to an aggrieved seller include any commercially reasonable charges, expenses or commissions incurred in stopping delivery, in the transportation, care and custody of goods after the buyer's breach, in connection with return or resale of the goods or otherwise resulting from the breach.

(2) Consequential damages resulting from the buyer's breach include any loss resulting from general or particular requirements and needs of which the buyer at the time of contracting had reason to know and which could not reasonably be prevented by resale or otherwise.

(3) In a consumer contract, a seller may not recover consequential damages from a consumer.

* * * *

§ 2-713. Buyer's Damages for Non-Delivery or Repudiation.

(1) Subject to the provisions of this Article with respect to proof of market price (Section 2–723), if the seller wrongfully fails to deliver or repudiates or the buyer rightfully rejects or justifiably revokes acceptance

(a) the measure of damages in the case of wrongful failure to deliver by the seller or rightful rejection or justifiable revocation of acceptance by the buyer is the difference between the market price at the time for tender under the contract and the contract price together with any incidental or consequential damages provided in this Article (Section 2–715), but less expenses saved in consequence of the seller's breach; and

(b) the measure of damages for repudiation by the seller is the difference between the market price at the expiration of a commercially reasonable time after the buyer learned of the repudiation, but no later than the time stated in paragraph (a), and the contract price together with any incidental or consequential damages provided in this Article (Section 2–715), but less expenses saved in consequence of the seller's breach.

* * * *

§ 2-725. Statute of Limitations in Contracts for Sale.

(1) Except as otherwise provided in this section, an action for breach of any contract for sale must be commenced within the later of four years after the right of action has accrued under subsection (2) or (3) or one year after the breach was or should have been discovered, but no longer than five years after the right of action accrued. By the original agreement the parties may reduce the period of limitation to not less than one year but may not extend it; however, in a consumer contract, the period of limitation may not be reduced.

(2) Except as otherwise provided in subsection (3), the following rules apply:

(a) Except as otherwise provided in this subsection, a right of action for breach of a contract accrues when the breach occurs, even if the aggrieved party did not have knowledge of the breach.

(b) For breach of a contract by repudiation, a right of action accrues at the earlier of when the aggrieved party elects to treat the repudiation as a breach or when a commercially reasonable time for awaiting performance has expired.

(c) For breach of a remedial promise, a right of action accrues when the remedial promise is not performed when due.

(d) In an action by a buyer against a person that is answerable over to the buyer for a claim asserted against the buyer, the buyer's right of action against the person answerable over accrues at the time the claim was originally asserted against the buyer.

(3) If a breach of a warranty arising under Section 2–312, 2–313 (2), 2–314, or 2–315, or a breach of an obligation other than a remedial promise arising under Section 2–313A or 2–313B, is claimed the following rules apply:

(a) Except as otherwise provided in paragraph (c), a right of action for breach of a warranty arising under Section 2–313(2), 2–314 or 2–315 accrues when the seller has tendered delivery to the immediate buyer, as defined in Section 2–313, and has completed performance of any agreed installation or assembly of the goods.

(b) Except as otherwise provided in paragraph (c), a right of action for breach of an obligation other than a remedial promise arising under Section 2–313A or 2–313B accrues when the remote purchaser, as defined in sections 2–313A and 2–313B, receives the goods.

(c) Where a warranty arising under Section 2–313(2) or an obligation other than a remedial promise arising under 2–313A or 2–313B explicitly extends to future performance of the goods and discovery of the breach must await the time for performance the right of action accrues when the immediate buyer as defined in Section 2–313 or the remote purchaser as defined in Sections 2–313A and 2–313B discovers or should have discovered the breach.

(d) A right of action for breach of warranty arising under Section 2–312 accrues when the aggrieved party discovers or should have discovered the breach. However, an action for breach of the warranty of non-infringement may not be commenced more than six years after tender of delivery of the goods to the aggrieved party.

* * * *

ARTICLE IIA
LEASES

PART 1 General Provisions

§ 2A–101. Short Title.

This Article shall be known and may be cited as the Uniform Commercial Code—Leases.

§ 2A–102. Scope.

This Article applies to any transaction, regardless of form, that creates a lease.

§ 2A–103. Definitions and Index of Definitions.

(1) In this Article unless the context otherwise requires:

(a) "Buyer in ordinary course of business" means a person who in good faith and without knowledge that the sale to him [or her] is in violation of the ownership rights or security interest or leasehold interest of a third party in the goods buys in ordinary course from a person in the business of selling goods of that kind but does not include a pawnbroker. "Buying" may be for cash or by exchange of other property or on secured or unsecured credit and includes receiving goods or documents of title under a pre-existing contract for sale but does not include a transfer in bulk or as security for or in total or partial satisfaction of a money debt.

(b) "Cancellation" occurs when either party puts an end to the lease contract for default by the other party.

(c) "Commercial unit" means such a unit of goods as by commercial usage is a single whole for purposes of lease and division of which materially impairs its character or value on the market or in use. A commercial unit may be a single article, as a machine, or a set of articles, as a suite of furniture or a line of machinery, or a quantity, as a gross or carload, or any other unit treated in use or in the relevant market as a single whole.

(d) "Conforming" goods or performance under a lease contract means goods or performance that are in accordance with the obligations under the lease contract.

(e) "Consumer lease" means a lease that a lessor regularly engaged in the business of leasing or selling makes to a lessee who is an individual and who takes under the lease primarily for a personal, family, or household purpose [, if the total payments to be made under the lease contract, excluding payments for options to renew or buy, do not exceed $______].

(f) "Fault" means wrongful act, omission, breach, or default.

(g) "Finance lease" means a lease with respect to which:

(i) the lessor does not select, manufacture or supply the goods;

(ii) the lessor acquires the goods or the right to possession and use of the goods in connection with the lease; and

(iii) one of the following occurs:

(A) the lessee receives a copy of the contract by which the lessor acquired the goods or the right to possession and use of the goods before signing the lease contract;

(B) the lessee's approval of the contract by which the lessor acquired the goods or the right to possession and use of the goods is a condition to effectiveness of the lease contract;

(C) the lessee, before signing the lease contract, receives an accurate and complete statement designating the promises and warranties, and any disclaimers of warranties, limitations or

modifications of remedies, or liquidated damages, including those of a third party, such as the manufacturer of the goods, provided to the lessor by the person supplying the goods in connection with or as part of the contract by which the lessor acquired the goods or the right to possession and use of the goods; or

(D) if the lease is not a consumer lease, the lessor, before the lessee signs the lease contract, informs the lessee in writing (a) of the identity of the person supplying the goods to the lessor, unless the lessee has selected that person and directed the lessor to acquire the goods or the right to possession and use of the goods from that person, (b) that the lessee is entitled under this Article to any promises and warranties, including those of any third party, provided to the lessor by the person supplying the goods in connection with or as part of the contract by which the lessor acquired the goods or the right to possession and use of the goods, and (c) that the lessee may communicate with the person supplying the goods to the lessor and receive an accurate and complete statement of those promises and warranties, including any disclaimers and limitations of them or of remedies.

(h) "Goods" means all things that are movable at the time of identification to the lease contract, or are fixtures (Section 2A–309), but the term does not include money, documents, instruments, accounts, chattel paper, general intangibles, or minerals or the like, including oil and gas, before extraction. The term also includes the unborn young of animals.

(i) "Installment lease contract" means a lease contract that authorizes or requires the delivery of goods in separate lots to be separately accepted, even though the lease contract contains a clause "each delivery is a separate lease" or its equivalent.

(j) "Lease" means a transfer of the right to possession and use of goods for a term in return for consideration, but a sale, including a sale on approval or a sale or return, or retention or creation of a security interest is not a lease. Unless the context clearly indicates otherwise, the term includes a sublease.

(k) "Lease agreement" means the bargain, with respect to the lease, of the lessor and the lessee in fact as found in their language or by implication from other circumstances including course of dealing or usage of trade or course of performance as provided in this Article. Unless the context clearly indicates otherwise, the term includes a sublease agreement.

(l) "Lease contract" means the total legal obligation that results from the lease agreement as affected by this Article and any other applicable rules of law. Unless the context clearly indicates -otherwise, the term includes a sublease contract.

(m) "Leasehold interest" means the interest of the lessor or the lessee under a lease contract.

(n) "Lessee" means a person who acquires the right to possession and use of goods under a lease. Unless the context clearly indicates otherwise, the term includes a sublessee.

(o) "Lessee in ordinary course of business" means a person who in good faith and without knowledge that the lease to him [or her] is in violation of the ownership rights or security interest or leasehold interest of a third party in the goods, leases in ordinary course from a person in the business of selling or leasing goods of that kind but does not include a pawnbroker. "Leasing" may be for cash or by exchange of other property or on secured or unsecured credit and includes receiving goods or documents of title under a pre-existing lease contract but does not include a transfer in bulk or as security for or in total or partial satisfaction of a money debt.

(p) "Lessor" means a person who transfers the right to possession and use of goods under a lease. Unless the context clearly indicates otherwise, the term includes a sublessor.

(q) "Lessor's residual interest" means the lessor's interest in the goods after expiration, termination, or cancellation of the lease contract.

(r) "Lien" means a charge against or interest in goods to secure payment of a debt or performance of an obligation, but the term does not include a security interest.

(s) "Lot" means a parcel or a single article that is the subject matter of a separate lease or delivery, whether or not it is sufficient to perform the lease contract.

(t) "Merchant lessee" means a lessee that is a merchant with respect to goods of the kind subject to the lease.

(u) "Present value" means the amount as of a date certain of one or more sums payable in the future, discounted to the date certain. The discount is determined by the interest rate specified by the parties if the rate was not manifestly unreasonable at the time the transaction was entered into; otherwise, the discount is determined by a commercially reasonable rate that takes into account the facts and circumstances of each case at the time the transaction was entered into.

(v) "Purchase" includes taking by sale, lease, mortgage, security interest, pledge, gift, or any other voluntary transaction creating an interest in goods.

(w) "Sublease" means a lease of goods the right to possession and use of which was acquired by the lessor as a lessee under an existing lease.

(x) "Supplier" means a person from whom a lessor buys or leases goods to be leased under a finance lease.

(y) "Supply contract" means a contract under which a lessor buys or leases goods to be leased.

(z) "Termination" occurs when either party pursuant to a power created by agreement or law puts an end to the lease contract otherwise than for default.

(2) Other definitions applying to this Article and the sections in which they appear are:

"Accessions". Section 2A–310(1).
"Construction mortgage". Section 2A–309(1)(d).
"Encumbrance". Section 2A–309(1)(e).
"Fixtures". Section 2A–309(1)(a).
"Fixture filing". Section 2A–309(1)(b).
"Purchase money lease". Section 2A–309(1)(c).

(3) The following definitions in other Articles apply to this Article:

"Accounts". Section 9–106.
"Between merchants". Section 2–104(3).
"Buyer". Section 2–103(1)(a).
"Chattel paper". Section 9–105(1)(b).
"Consumer goods". Section 9–109(1).
"Document". Section 9–105(1)(f).
"Entrusting". Section 2–403(3).
"General intangibles". Section 9–106.
"Good faith". Section 2–103(1)(b).
"Instrument". Section 9–105(1)(i).
"Merchant". Section 2–104(1).
"Mortgage". Section 9–105(1)(j).
"Pursuant to commitment". Section 9–105(1)(k).
"Receipt". Section 2–103(1)(c).
"Sale". Section 2–106(1).
"Sale on approval". Section 2–326.
"Sale or return". Section 2–326.
"Seller". Section 2–103(1)(d).

(4) In addition Article 1 contains general definitions and principles of construction and interpretation applicable throughout this Article.

As amended in 1990 and 1999.

§ 2A–104. Leases Subject to Other Law.

(1) A lease, although subject to this Article, is also subject to any applicable:

(a) certificate of title statute of this State: (list any certificate of title statutes covering automobiles, trailers, mobile homes, boats, farm tractors, and the like);

(b) certificate of title statute of another jurisdiction (Section 2A–105); or

(c) consumer protection statute of this State, or final consumer protection decision of a court of this State existing on the effective date of this Article.

(2) In case of conflict between this Article, other than Sections 2A–105, 2A–304(3), and 2A–305(3), and a statute or decision referred to in subsection (1), the statute or decision controls.

(3) Failure to comply with an applicable law has only the effect specified therein.

As amended in 1990.

§ 2A–105. Territorial Application of Article to Goods Covered by Certificate of Title.

Subject to the provisions of Sections 2A–304(3) and 2A–305(3), with respect to goods covered by a certificate of title issued under a statute of this State or of another jurisdiction, compliance and the effect of compliance or noncompliance with a certificate of title statute are governed by the law (including the conflict of laws rules) of the jurisdiction issuing the certificate until the earlier of (a) surrender of the certificate, or (b) four months after the goods are removed from that jurisdiction and thereafter until a new certificate of title is issued by another jurisdiction.

§ 2A–106. Limitation on Power of Parties to Consumer Lease to Choose Applicable Law and Judicial Forum.

(1) If the law chosen by the parties to a consumer lease is that of a jurisdiction other than a jurisdiction in which the lessee resides at the time the lease agreement becomes enforceable or within 30 days thereafter or in which the goods are to be used, the choice is not enforceable.

(2) If the judicial forum chosen by the parties to a consumer lease is a forum that would not otherwise have jurisdiction over the lessee, the choice is not enforceable.

§ 2A–107. Waiver or Renunciation of Claim or Right After Default.

Any claim or right arising out of an alleged default or breach of warranty may be discharged in whole or in part without consideration by a written waiver or renunciation signed and delivered by the aggrieved party.

§ 2A–108. Unconscionability.

(1) If the court as a matter of law finds a lease contract or any clause of a lease contract to have been unconscionable at the time it was made the court may refuse to enforce the lease contract, or it may enforce the remainder of the lease contract without the unconscionable clause, or it may so limit the application of any unconscionable clause as to avoid any unconscionable result.

(2) With respect to a consumer lease, if the court as a matter of law finds that a lease contract or any clause of a lease contract has been induced by unconscionable conduct or that unconscionable conduct has occurred in the collection of a claim arising from a lease contract, the court may grant appropriate relief.

(3) Before making a finding of unconscionability under subsection (1) or (2), the court, on its own motion or that of a party, shall afford the parties a reasonable opportunity to present evidence as to the setting, purpose, and effect of the lease contract or clause thereof, or of the conduct.

(4) In an action in which the lessee claims unconscionability with respect to a consumer lease:

(a) If the court finds unconscionability under subsection (1) or (2), the court shall award reasonable attorney's fees to the lessee.

(b) If the court does not find unconscionability and the lessee claiming unconscionability has brought or maintained an action he [or she] knew to be groundless, the court shall award reasonable attorney's fees to the party against whom the claim is made.

(c) In determining attorney's fees, the amount of the recovery on behalf of the claimant under subsections (1) and (2) is not controlling.

§ 2A-109. Option to Accelerate at Will.

(1) A term providing that one party or his [or her] successor in interest may accelerate payment or performance or require collateral or additional collateral "at will" or "when he [or she] deems himself [or herself] insecure" or in words of similar import must be construed to mean that he [or she] has power to do so only if he [or she] in good faith believes that the prospect of payment or performance is impaired.

(2) With respect to a consumer lease, the burden of establishing good faith under subsection (1) is on the party who exercised the power; otherwise the burden of establishing lack of good faith is on the party against whom the power has been exercised.

PART 2 Formation and Construction of Lease Contract

§ 2A-201. Statute of Frauds.

(1) A lease contract is not enforceable by way of action or defense unless:

(a) the total payments to be made under the lease contract, excluding payments for options to renew or buy, are less than $1,000; or

(b) there is a writing, signed by the party against whom enforcement is sought or by that party's authorized agent, sufficient to indicate that a lease contract has been made between the parties and to describe the goods leased and the lease term.

(2) Any description of leased goods or of the lease term is sufficient and satisfies subsection (1)(b), whether or not it is specific, if it reasonably identifies what is described.

(3) A writing is not insufficient because it omits or incorrectly states a term agreed upon, but the lease contract is not enforceable under subsection (1)(b) beyond the lease term and the quantity of goods shown in the writing.

(4) A lease contract that does not satisfy the requirements of subsection (1), but which is valid in other respects, is enforceable:

(a) if the goods are to be specially manufactured or obtained for the lessee and are not suitable for lease or sale to others in the ordinary course of the lessor's business, and the lessor, before notice of repudiation is received and under circumstances that reasonably indicate that the goods are for the lessee, has made either a substantial beginning of their manufacture or commitments for their procurement;

(b) if the party against whom enforcement is sought admits in that party's pleading, testimony or otherwise in court that a lease contract was made, but the lease contract is not enforceable under this provision beyond the quantity of goods admitted; or

(c) with respect to goods that have been received and accepted by the lessee.

(5) The lease term under a lease contract referred to in subsection (4) is:

(a) if there is a writing signed by the party against whom enforcement is sought or by that party's authorized agent specifying the lease term, the term so specified;

(b) if the party against whom enforcement is sought admits in that party's pleading, testimony, or otherwise in court a lease term, the term so admitted; or

(c) a reasonable lease term.

§ 2A-202. Final Written Expression: Parol or Extrinsic Evidence.

Terms with respect to which the confirmatory memoranda of the parties agree or which are otherwise set forth in a writing intended by the parties as a final expression of their agreement with respect to such terms as are included therein may not be contradicted by evidence of any prior agreement or of a contemporaneous oral agreement but may be explained or supplemented:

(a) by course of dealing or usage of trade or by course of performance; and

(b) by evidence of consistent additional terms unless the court finds the writing to have been intended also as a complete and exclusive statement of the terms of the agreement.

§ 2A-203. Seals Inoperative.

The affixing of a seal to a writing evidencing a lease contract or an offer to enter into a lease contract does not render the writing a sealed instrument and the law with respect to sealed instruments does not apply to the lease contract or offer.

§ 2A-204. Formation in General.

(1) A lease contract may be made in any manner sufficient to show agreement, including conduct by both parties which recognizes the existence of a lease contract.

(2) An agreement sufficient to constitute a lease contract may be found although the moment of its making is undetermined.

(3) Although one or more terms are left open, a lease contract does not fail for indefiniteness if the parties have intended to make a lease contract and there is a reasonably certain basis for giving an appropriate remedy.

§ 2A-205. Firm Offers.

An offer by a merchant to lease goods to or from another person in a signed writing that by its terms gives assurance it will be held open is not revocable, for lack of consideration, during the time stated or, if no time is stated, for a reasonable time, but in no event may the period of irrevocability exceed 3 months. Any such term of assurance on a form supplied by the offeree must be separately signed by the offeror.

§ 2A-206. Offer and Acceptance in Formation of Lease Contract.

(1) Unless otherwise unambiguously indicated by the language or circumstances, an offer to make a lease contract must be construed as inviting acceptance in any manner and by any medium reasonable in the circumstances.

(2) If the beginning of a requested performance is a reasonable mode of acceptance, an offeror who is not notified of acceptance within a reasonable time may treat the offer as having lapsed before acceptance.

§ 2A-207. Course of Performance or Practical Construction.

(1) If a lease contract involves repeated occasions for performance by either party with knowledge of the nature of the performance and opportunity for objection to it by the other, any course of performance accepted or acquiesced in without objection is relevant to determine the meaning of the lease agreement.

(2) The express terms of a lease agreement and any course of performance, as well as any course of dealing and usage of trade, must be construed whenever reasonable as consistent with each other; but if that construction is unreasonable, express terms control course of performance, course of performance controls both course of dealing and usage of trade, and course of dealing controls usage of trade.

(3) Subject to the provisions of Section 2A–208 on modification and waiver, course of performance is relevant to show a waiver or modification of any term inconsistent with the course of performance.

§ 2A-208. Modification, Rescission and Waiver.

(1) An agreement modifying a lease contract needs no consideration to be binding.

(2) A signed lease agreement that excludes modification or rescission except by a signed writing may not be otherwise modified or rescinded, but, except as between merchants, such a requirement on a form supplied by a merchant must be separately signed by the other party.

(3) Although an attempt at modification or rescission does not satisfy the requirements of subsection (2), it may operate as a waiver.

(4) A party who has made a waiver affecting an executory portion of a lease contract may retract the waiver by reasonable notification received by the other party that strict performance will be required of any term waived, unless the retraction would be unjust in view of a material change of position in reliance on the waiver.

§ 2A-209. Lessee under Finance Lease as Beneficiary of Supply Contract.

(1) The benefit of the supplier's promises to the lessor under the supply contract and of all warranties, whether express or implied, including those of any third party provided in connection with or as part of the supply contract, extends to the lessee to the extent of the lessee's leasehold interest under a finance lease related to the supply contract, but is subject to the terms warranty and of the supply contract and all defenses or claims arising therefrom.

(2) The extension of the benefit of supplier's promises and of warranties to the lessee (Section 2A–209(1)) does not: (i) modify the rights and obligations of the parties to the supply contract, whether arising therefrom or otherwise, or (ii) impose any duty or liability under the supply contract on the lessee.

(3) Any modification or rescission of the supply contract by the supplier and the lessor is effective between the supplier and the lessee unless, before the modification or rescission, the supplier has received notice that the lessee has entered into a finance lease related to the supply contract. If the modification or rescission is effective between the supplier and the lessee, the lessor is deemed to have assumed, in addition to the obligations of the lessor to the lessee under the lease contract, promises of the supplier to the lessor and warranties that were so modified or rescinded as they existed and were available to the lessee before modification or rescission.

(4) In addition to the extension of the benefit of the supplier's promises and of warranties to the lessee under subsection (1), the lessee retains all rights that the lessee may have against the supplier which arise from an agreement between the lessee and the supplier or under other law.

As amended in 1990.

§ 2A-210. Express Warranties.

(1) Express warranties by the lessor are created as follows:

(a) Any affirmation of fact or promise made by the lessor to the lessee which relates to the goods and becomes part of the basis of the bargain creates an express warranty that the goods will conform to the affirmation or promise.

(b) Any description of the goods which is made part of the basis of the bargain creates an express warranty that the goods will conform to the description.

(c) Any sample or model that is made part of the basis of the bargain creates an express warranty that the whole of the goods will conform to the sample or model.

(2) It is not necessary to the creation of an express warranty that the lessor use formal words, such as "warrant" or "guarantee," or that the lessor have a specific intention to make a warranty, but an affirmation merely of the value of the goods or a statement purporting to be merely the lessor's opinion or commendation of the goods does not create a warranty.

§ 2A-211. Warranties Against Interference and Against Infringement; Lessee's Obligation Against Infringement.

(1) There is in a lease contract a warranty that for the lease term no person holds a claim to or interest in the goods that arose from an act or omission of the lessor, other than a claim by way of infringement or the like, which will interfere with the lessee's enjoyment of its leasehold interest.

(2) Except in a finance lease there is in a lease contract by a lessor who is a merchant regularly dealing in goods of the kind a warranty that the goods are delivered free of the rightful claim of any person by way of infringement or the like.

(3) A lessee who furnishes specifications to a lessor or a supplier shall hold the lessor and the supplier harmless against any claim by way of infringement or the like that arises out of compliance with the specifications.

§ 2A–212. Implied Warranty of Merchantability.

(1) Except in a finance lease, a warranty that the goods will be merchantable is implied in a lease contract if the lessor is a merchant with respect to goods of that kind.

(2) Goods to be merchantable must be at least such as

(a) pass without objection in the trade under the description in the lease agreement;

(b) in the case of fungible goods, are of fair average quality within the description;

(c) are fit for the ordinary purposes for which goods of that type are used;

(d) run, within the variation permitted by the lease agreement, of even kind, quality, and quantity within each unit and among all units involved;

(e) are adequately contained, packaged, and labeled as the lease agreement may require; and

(f) conform to any promises or affirmations of fact made on the container or label.

(3) Other implied warranties may arise from course of dealing or usage of trade.

§ 2A–213. Implied Warranty of Fitness for Particular Purpose.

Except in a finance of lease, if the lessor at the time the lease contract is made has reason to know of any particular purpose for which the goods are required and that the lessee is relying on the lessor's skill or judgment to select or furnish suitable goods, there is in the lease contract an implied warranty that the goods will be fit for that purpose.

§ 2A–214. Exclusion or Modification of Warranties.

(1) Words or conduct relevant to the creation of an express warranty and words or conduct tending to negate or limit a warranty must be construed wherever reasonable as consistent with each other; but, subject to the provisions of Section 2A–202 on parol or extrinsic evidence, negation or limitation is inoperative to the extent that the construction is unreasonable.

(2) Subject to subsection (3), to exclude or modify the implied warranty of merchantability or any part of it the language must mention "merchantability", be by a writing, and be conspicuous. Subject to subsection (3), to exclude or modify any implied warranty of fitness the exclusion must be by a writing and be conspicuous. Language to exclude all implied warranties of fitness is sufficient if it is in writing, is conspicuous and states, for example, "There is no warranty that the goods will be fit for a particular purpose".

(3) Notwithstanding subsection (2), but subject to subsection (4),

(a) unless the circumstances indicate otherwise, all implied warranties are excluded by expressions like "as is" or "with all faults" or by other language that in common understanding calls the lessee's attention to the exclusion of warranties and makes plain that there is no implied warranty, if in writing and conspicuous;

(b) if the lessee before entering into the lease contract has examined the goods or the sample or model as fully as desired or has refused to examine the goods, there is no implied warranty with regard to defects that an examination ought in the circumstances to have revealed; and

(c) an implied warranty may also be excluded or modified by course of dealing, course of performance, or usage of trade.

(4) To exclude or modify a warranty against interference or against infringement (Section 2A–211) or any part of it, the language must be specific, be by a writing, and be conspicuous, unless the circumstances, including course of performance, course of dealing, or usage of trade, give the lessee reason to know that the goods are being leased subject to a claim or interest of any person.

§ 2A–215. Cumulation and Conflict of Warranties Express or Implied.

Warranties, whether express or implied, must be construed as consistent with each other and as cumulative, but if that construction is unreasonable, the intention of the parties determines which warranty is dominant. In ascertaining that intention the following rules apply:

(a) Exact or technical specifications displace an inconsistent sample or model or general language of description.

(b) A sample from an existing bulk displaces inconsistent general language of description.

(c) Express warranties displace inconsistent implied warranties other than an implied warranty of fitness for a particular purpose.

§ 2A–216. Third-Party Beneficiaries of Express and Implied Warranties.

Alternative A A warranty to or for the benefit of a lessee under this Article, whether express or implied, extends to any natural person who is in the family or household of the lessee or who is a guest in the lessee's home if it is reasonable to expect that such person may use, consume, or be affected by the goods and who is injured in person by breach of the warranty. This section does not displace principles of law and equity that extend a warranty to or for the benefit of a lessee to other persons. The operation of this section may not be excluded, modified, or limited, but an exclusion, modification, or limitation of the warranty, including any with respect to rights and remedies, effective against the lessee is also effective against any beneficiary designated under this section.

Alternative B A warranty to or for the benefit of a lessee under this Article, whether express or implied, extends to any natural person who may reasonably be expected to use, consume, or be affected by the goods and who is injured in person by breach of the warranty. This section does not displace principles of law and equity that extend a warranty to or for the benefit of a lessee to other persons. The operation of this section may not be excluded, modified, or limited, but an exclusion, modification, or limitation of the warranty, including any with respect to rights and remedies, effective against the lessee is also effective against the beneficiary designated under this section.

Alternative C A warranty to or for the benefit of a lessee under this Article, whether express or implied, extends to any person who may reasonably be expected to use, consume, or be affected by the goods and who is injured by breach of the warranty. The operation of this section may not be excluded, modified, or limited with respect to injury to the person of an individual to whom the warranty extends, but an exclusion, modification, or limitation of the warranty, including any with respect to rights and remedies, effective against the lessee is also effective against the beneficiary designated under this section.

§ 2A–217. Identification.

Identification of goods as goods to which a lease contract refers may be made at any time and in any manner explicitly agreed to by the parties. In the absence of explicit agreement, identification occurs:

(a) when the lease contract is made if the lease contract is for a lease of goods that are existing and identified;

(b) when the goods are shipped, marked, or otherwise designated by the lessor as goods to which the lease contract refers, if the lease contract is for a lease of goods that are not existing and identified; or

(c) when the young are conceived, if the lease contract is for a lease of unborn young of animals.

§ 2A–218. Insurance and Proceeds.

(1) A lessee obtains an insurable interest when existing goods are identified to the lease contract even though the goods identified are nonconforming and the lessee has an option to reject them.

(2) If a lessee has an insurable interest only by reason of the lessor's identification of the goods, the lessor, until default or insolvency or notification to the lessee that identification is final, may substitute other goods for those identified.

(3) Notwithstanding a lessee's insurable interest under subsections (1) and (2), the lessor retains an insurable interest until an option to buy has been exercised by the lessee and risk of loss has passed to the lessee.

(4) Nothing in this section impairs any insurable interest recognized under any other statute or rule of law.

(5) The parties by agreement may determine that one or more parties have an obligation to obtain and pay for insurance covering the goods and by agreement may determine the beneficiary of the proceeds of the insurance.

§ 2A–219. Risk of Loss.

(1) Except in the case of a finance lease, risk of loss is retained by the lessor and does not pass to the lessee. In the case of a finance lease, risk of loss passes to the lessee.

(2) Subject to the provisions of this Article on the effect of default on risk of loss (Section 2A–220), if risk of loss is to pass to the lessee and the time of passage is not stated, the following rules apply:

(a) If the lease contract requires or authorizes the goods to be shipped by carrier

(i) and it does not require delivery at a particular destination, the risk of loss passes to the lessee when the goods are duly delivered to the carrier; but

(ii) if it does require delivery at a particular destination and the goods are there duly tendered while in the possession of the carrier, the risk of loss passes to the lessee when the goods are there duly so tendered as to enable the lessee to take delivery.

(b) If the goods are held by a bailee to be delivered without being moved, the risk of loss passes to the lessee on acknowledgment by the bailee of the lessee's right to possession of the goods.

(c) In any case not within subsection (a) or (b), the risk of loss passes to the lessee on the lessee's receipt of the goods if the lessor, or, in the case of a finance lease, the supplier, is a merchant; otherwise the risk passes to the lessee on tender of delivery.

§ 2A–220. Effect of Default on Risk of Loss.

(1) Where risk of loss is to pass to the lessee and the time of passage is not stated:

(a) If a tender or delivery of goods so fails to conform to the lease contract as to give a right of rejection, the risk of their loss remains with the lessor, or, in the case of a finance lease, the supplier, until cure or acceptance.

(b) If the lessee rightfully revokes acceptance, he [or she], to the extent of any deficiency in his [or her] effective insurance coverage, may treat the risk of loss as having remained with the lessor from the beginning.

(2) Whether or not risk of loss is to pass to the lessee, if the lessee as to conforming goods already identified to a lease contract repudiates or is otherwise in default under the lease contract, the lessor, or, in the case of a finance lease, the supplier, to the extent of any deficiency in his [or her] effective insurance coverage may treat the risk of loss as resting on the lessee for a commercially reasonable time.

§ 2A–221. Casualty to Identified Goods.

If a lease contract requires goods identified when the lease contract is made, and the goods suffer casualty without fault of the lessee, the lessor or the supplier before delivery, or the goods suffer casualty before risk of loss passes to the lessee pursuant to the lease agreement or Section 2A–219, then:

(a) if the loss is total, the lease contract is avoided; and

(b) if the loss is partial or the goods have so deteriorated as to no longer conform to the lease contract, the lessee may nevertheless demand inspection and at his [or her] option either treat the lease contract as avoided or, except in a finance lease that is not a consumer lease, accept the goods with due allowance from the rent payable for the balance of the lease term for the deterioration or the deficiency in quantity but without further right against the lessor.

PART 3 Effect of Lease Contract

§ 2A–301. Enforceability of Lease Contract.

Except as otherwise provided in this Article, a lease contract is effective and enforceable according to its terms between the parties, against purchasers of the goods and against creditors of the parties.

§ 2A–302. Title to and Possession of Goods.

Except as otherwise provided in this Article, each provision of this Article applies whether the lessor or a third party has title to the goods, and whether the lessor, the lessee, or a third party has possession of the goods, notwithstanding any statute or rule of law that possession or the absence of possession is fraudulent.

§ 2A–303. Alienability of Party's Interest Under Lease Contract or of Lessor's Residual Interest in Goods; Delegation of Performance; Transfer of Rights.

(1) As used in this section, "creation of a security interest" includes the sale of a lease contract that is subject to Article 9, Secured Transactions, by reason of Section 9–109(a)(3).

(2) Except as provided in subsections (3) and Section 9–407, a provision in a lease agreement which (i) prohibits the voluntary or involuntary transfer, including a transfer by sale, sublease, creation or enforcement of a security interest, or attachment, levy, or other judicial process, of an interest of a party under the lease contract or of the lessor's residual interest in the goods, or (ii) makes such a transfer an event of default, gives rise to the rights and remedies provided in subsection (4), but a transfer that is prohibited or is an event of default under the lease agreement is otherwise effective.

(3) A provision in a lease agreement which (i) prohibits a transfer of a right to damages for default with respect to the whole lease contract or of a right to payment arising out of the transferor's due performance of the transferor's entire obligation, or (ii) makes such a transfer an event of default, is not enforceable, and such a transfer is not a transfer that materially impairs the propsect of obtaining return performance by, materially changes the duty of, or materially increases the burden or risk imposed on, the other party to the lease contract within the purview of subsection (4).

(4) Subject to subsection (3) and Section 9–407:

(a) if a transfer is made which is made an event of default under a lease agreement, the party to the lease contract not making the transfer, unless that party waives the default or otherwise agrees, has the rights and remedies described in Section 2A–501(2);

(b) if paragraph (a) is not applicable and if a transfer is made that (i) is prohibited under a lease agreement or (ii) materially impairs the prospect of obtaining return performance by, materially changes the duty of, or materially increases the burden or risk imposed on, the other party to the lease contract, unless the party not making the transfer agrees at any time to the transfer in the lease contract or otherwise, then, except as limited by contract, (i) the transferor is liable to the party not making the transfer for damages caused by the transfer to the extent that the damages could not reasonably be prevented by the party not making the transfer and (ii) a court having jurisdiction may grant other appropriate relief, including cancellation of the lease contract or an injunction against the transfer.

(5) A transfer of "the lease" or of "all my rights under the lease", or a transfer in similar general terms, is a transfer of rights and, unless the language or the circumstances, as in a transfer for security, indicate the contrary, the transfer is a delegation of duties by the transferor to the transferee. Acceptance by the transferee constitutes a promise by the transferee to perform those duties. The promise is enforceable by either the transferor or the other party to the lease contract.

(6) Unless otherwise agreed by the lessor and the lessee, a delegation of performance does not relieve the transferor as against the other party of any duty to perform or of any liability for default.

(7) In a consumer lease, to prohibit the transfer of an interest of a party under the lease contract or to make a transfer an event of default, the language must be specific, by a writing, and conspicuous.

As amended in 1990 and 1999.

§ 2A–304. Subsequent Lease of Goods by Lessor.

(1) Subject to Section 2A–303, a subsequent lessee from a lessor of goods under an existing lease contract obtains, to the extent of the leasehold interest transferred, the leasehold interest in the goods that the lessor had or had power to transfer, and except as provided in subsection (2) and Section 2A–527(4), takes subject to the existing lease contract. A lessor with voidable title has power to transfer a good leasehold interest to a good faith subsequent lessee for value, but only to the extent set forth in the preceding sentence. If goods have been delivered under a transaction of purchase the lessor has that power even though:

(a) the lessor's transferor was deceived as to the identity of the lessor;

(b) the delivery was in exchange for a check which is later dishonored;

(c) it was agreed that the transaction was to be a "cash sale"; or

(d) the delivery was procured through fraud punishable as larcenous under the criminal law.

(2) A subsequent lessee in the ordinary course of business from a lessor who is a merchant dealing in goods of that kind to whom the goods were entrusted by the existing lessee of that lessor before the interest of the subsequent lessee became enforceable against that lessor obtains, to the extent of the leasehold interest transferred, all of that lessor's and the existing lessee's rights to the goods, and takes free of the existing lease contract.

(3) A subsequent lessee from the lessor of goods that are subject to an existing lease contract and are covered by a certificate of title issued under a statute of this State or of another jurisdiction takes no greater rights than those provided both by this section and by the certificate of title statute.

As amended in 1990.

§ 2A–305. Sale or Sublease of Goods by Lessee.

(1) Subject to the provisions of Section 2A–303, a buyer or sublessee from the lessee of goods under an existing lease contract obtains, to the extent of the interest transferred, the leasehold interest in the goods that the lessee had or had power to transfer, and except as provided in subsection (2) and Section 2A–511(4), takes subject to the existing lease contract. A lessee with a voidable leasehold interest has power to transfer a good leasehold interest to a good faith buyer for value or a good faith sublessee for value, but only to the extent set forth in the preceding sentence. When goods have been delivered under a transaction of lease the lessee has that power even though:

(a) the lessor was deceived as to the identity of the lessee;

(b) the delivery was in exchange for a check which is later dishonored; or

(c) the delivery was procured through fraud punishable as larcenous under the criminal law.

(2) A buyer in the ordinary course of business or a sublessee in the ordinary course of business from a lessee who is a merchant dealing in goods of that kind to whom the goods were entrusted by the lessor obtains, to the extent of the interest transferred, all of the lessor's and lessee's rights to the goods, and takes free of the existing lease contract.

(3) A buyer or sublessee from the lessee of goods that are subject to an existing lease contract and are covered by a certificate of title issued under a statute of this State or of another jurisdiction takes no greater rights than those provided both by this section and by the certificate of title statute.

§ 2A–306. Priority of Certain Liens Arising by Operation of Law.

If a person in the ordinary course of his [or her] business furnishes services or materials with respect to goods subject to a lease contract, a lien upon those goods in the possession of that person given by statute or rule of law for those materials or services takes priority over any interest of the lessor or lessee under the lease contract or this Article unless the lien is created by statute and the statute provides otherwise or unless the lien is created by rule of law and the rule of law provides otherwise.

§ 2A–307. Priority of Liens Arising by Attachment or Levy on, Security Interests in, and Other Claims to Goods.

(1) Except as otherwise provided in Section 2A–306, a creditor of a lessee takes subject to the lease contract.

(2) Except as otherwise provided in subsection (3) and in Sections 2A–306 and 2A–308, a creditor of a lessor takes subject to the lease contract unless the creditor holds a lien that attached to the goods before the lease contract became enforceable.

(3) Except as otherwise provided in Sections 9–317, 9–321, and 9–323, a lessee takes a leasehold interest subject to a security interest held by a creditor of the lessor.

As amended in 1990 and 1999.

§ 2A–308. Special Rights of Creditors.

(1) A creditor of a lessor in possession of goods subject to a lease contract may treat the lease contract as void if as against the creditor retention of possession by the lessor is fraudulent under any statute or rule of law, but retention of possession in good faith and current course of trade by the lessor for a commercially reasonable time after the lease contract becomes enforceable is not fraudulent.

(2) Nothing in this Article impairs the rights of creditors of a lessor if the lease contract (a) becomes enforceable, not in current course of trade but in satisfaction of or as security for a pre-existing claim for money, security, or the like, and (b) is made under circumstances which under any statute or rule of law apart from this Article would constitute the transaction a fraudulent transfer or voidable preference.

(3) A creditor of a seller may treat a sale or an identification of goods to a contract for sale as void if as against the creditor retention of possession by the seller is fraudulent under any statute or rule of law, but retention of possession of the goods pursuant to a lease contract entered into by the seller as lessee and the buyer as lessor in connection with the sale or identification of the goods is not fraudulent if the buyer bought for value and in good faith.

§ 2A–309. Lessor's and Lessee's Rights When Goods Become Fixtures.

(1) In this section:

(a) goods are "fixtures" when they become so related to particular real estate that an interest in them arises under real estate law;

(b) a "fixture filing" is the filing, in the office where a mortgage on the real estate would be filed or recorded, of a financing statement covering goods that are or are to become

fixtures and conforming to the requirements of Section 9–502(a) and (b);

(c) a lease is a "purchase money lease" unless the lessee has possession or use of the goods or the right to possession or use of the goods before the lease agreement is enforceable;

(d) a mortgage is a "construction mortgage" to the extent it secures an obligation incurred for the construction of an improvement on land including the acquisition cost of the land, if the recorded writing so indicates; and

(e) "encumbrance" includes real estate mortgages and other liens on real estate and all other rights in real estate that are not ownership interests.

(2) Under this Article a lease may be of goods that are fixtures or may continue in goods that become fixtures, but no lease exists under this Article of ordinary building materials incorporated into an improvement on land.

(3) This Article does not prevent creation of a lease of fixtures pursuant to real estate law.

(4) The perfected interest of a lessor of fixtures has priority over a conflicting interest of an encumbrancer or owner of the real estate if:

(a) the lease is a purchase money lease, the conflicting interest of the encumbrancer or owner arises before the goods become fixtures, the interest of the lessor is perfected by a fixture filing before the goods become fixtures or within ten days thereafter, and the lessee has an interest of record in the real estate or is in possession of the real estate; or

(b) the interest of the lessor is perfected by a fixture filing before the interest of the encumbrancer or owner is of record, the lessor's interest has priority over any conflicting interest of a predecessor in title of the encumbrancer or owner, and the lessee has an interest of record in the real estate or is in possession of the real estate.

(5) The interest of a lessor of fixtures, whether or not perfected, has priority over the conflicting interest of an encumbrancer or owner of the real estate if:

(a) the fixtures are readily removable factory or office machines, readily removable equipment that is not primarily used or leased for use in the operation of the real estate, or readily removable replacements of domestic appliances that are goods subject to a consumer lease, and before the goods become fixtures the lease contract is enforceable; or

(b) the conflicting interest is a lien on the real estate obtained by legal or equitable proceedings after the lease contract is enforceable; or

(c) the encumbrancer or owner has consented in writing to the lease or has disclaimed an interest in the goods as fixtures; or

(d) the lessee has a right to remove the goods as against the encumbrancer or owner. If the lessee's right to remove terminates, the priority of the interest of the lessor continues for a reasonable time.

(6) Notwithstanding paragraph (4)(a) but otherwise subject to subsections (4) and (5), the interest of a lessor of fixtures, including the lessor's residual interest, is subordinate to the conflicting interest of an encumbrancer of the real estate under a construction mortgage recorded before the goods become fixtures if the goods become fixtures before the completion of the construction. To the extent given to refinance a construction mortgage, the conflicting interest of an encumbrancer of the real estate under a mortgage has this priority to the same extent as the encumbrancer of the real estate under the construction mortgage.

(7) In cases not within the preceding subsections, priority between the interest of a lessor of fixtures, including the lessor's residual interest, and the conflicting interest of an encumbrancer or owner of the real estate who is not the lessee is determined by the priority rules governing conflicting interests in real estate.

(8) If the interest of a lessor of fixtures, including the lessor's residual interest, has priority over all conflicting interests of all owners and encumbrancers of the real estate, the lessor or the lessee may (i) on default, expiration, termination, or cancellation of the lease agreement but subject to the agreement and this Article, or (ii) if necessary to enforce other rights and remedies of the lessor or lessee under this Article, remove the goods from the real estate, free and clear of all conflicting interests of all owners and encumbrancers of the real estate, but the lessor or lessee must reimburse any encumbrancer or owner of the real estate who is not the lessee and who has not otherwise agreed for the cost of repair of any physical injury, but not for any diminution in value of the real estate caused by the absence of the goods removed or by any necessity of replacing them. A person entitled to reimbursement may refuse permission to remove until the party seeking removal gives adequate security for the performance of this obligation.

(9) Even though the lease agreement does not create a security interest, the interest of a lessor of fixtures, including the lessor's residual interest, is perfected by filing a financing statement as a fixture filing for leased goods that are or are to become fixtures in accordance with the relevant provisions of the Article on Secured Transactions (Article 9).

As amended in 1990 and 1999.

§ 2A–310. Lessor's and Lessee's Rights When Goods Become Accessions.

(1) Goods are "accessions" when they are installed in or affixed to other goods.

(2) The interest of a lessor or a lessee under a lease contract entered into before the goods became accessions is superior to all interests in the whole except as stated in subsection (4).

(3) The interest of a lessor or a lessee under a lease contract entered into at the time or after the goods became accessions is superior to all subsequently acquired interests in the whole except as stated in subsection (4) but is subordinate to interests in the whole existing at the time the lease contract was made unless the holders of such interests in the whole have in writing consented to the lease or disclaimed an interest in the goods as part of the whole.

(4) The interest of a lessor or a lessee under a lease contract described in subsection (2) or (3) is subordinate to the interest of

(a) a buyer in the ordinary course of business or a lessee in the ordinary course of business of any interest in the whole acquired after the goods became accessions; or

(b) a creditor with a security interest in the whole perfected before the lease contract was made to the extent that the creditor makes subsequent advances without knowledge of the lease contract.

(5) When under subsections (2) or (3) and (4) a lessor or a lessee of accessions holds an interest that is superior to all interests in the whole, the lessor or the lessee may (a) on default, expiration, termination, or cancellation of the lease contract by the other party but subject to the provisions of the lease contract and this Article, or (b) if necessary to enforce his [or her] other rights and remedies under this Article, remove the goods from the whole, free and clear of all interests in the whole, but he [or she] must reimburse any holder of an interest in the whole who is not the lessee and who has not otherwise agreed for the cost of repair of any physical injury but not for any diminution in value of the whole caused by the absence of the goods removed or by any necessity for replacing them. A person entitled to reimbursement may refuse permission to remove until the party seeking removal gives adequate security for the performance of this obligation.

§ 2A–311. Priority Subject to Subordination.

Nothing in this Article prevents subordination by agreement by any person entitled to priority.

As added in 1990.

PART 4 Performance of Lease Contract: Repudiated, Substituted and Excused

§ 2A–401. Insecurity: Adequate Assurance of Performance.

(1) A lease contract imposes an obligation on each party that the other's expectation of receiving due performance will not be impaired.

(2) If reasonable grounds for insecurity arise with respect to the performance of either party, the insecure party may demand in writing adequate assurance of due performance. Until the insecure party receives that assurance, if commercially reasonable the insecure party may suspend any performance for which he [or she] has not already received the agreed return.

(3) A repudiation of the lease contract occurs if assurance of due performance adequate under the circumstances of the particular case is not provided to the insecure party within a reasonable time, not to exceed 30 days after receipt of a demand by the other party.

(4) Between merchants, the reasonableness of grounds for insecurity and the adequacy of any assurance offered must be determined according to commercial standards.

(5) Acceptance of any nonconforming delivery or payment does not prejudice the aggrieved party's right to demand adequate assurance of future performance.

§ 2A–402. Anticipatory Repudiation.

If either party repudiates a lease contract with respect to a performance not yet due under the lease contract, the loss of which performance will substantially impair the value of the lease contract to the other, the aggrieved party may:

(a) for a commercially reasonable time, await retraction of repudiation and performance by the repudiating party;

(b) make demand pursuant to Section 2A–401 and await assurance of future performance adequate under the circumstances of the particular case; or

(c) resort to any right or remedy upon default under the lease contract or this Article, even though the aggrieved party has notified the repudiating party that the aggrieved party would await the repudiating party's performance and assurance and has urged retraction. In addition, whether or not the aggrieved party is pursuing one of the foregoing remedies, the aggrieved party may suspend performance or, if the aggrieved party is the lessor, proceed in accordance with the provisions of this Article on the lessor's right to identify goods to the lease contract notwithstanding default or to salvage unfinished goods (Section 2A–524).

§ 2A–403. Retraction of Anticipatory Repudiation.

(1) Until the repudiating party's next performance is due, the repudiating party can retract the repudiation unless, since the repudiation, the aggrieved party has cancelled the lease contract or materially changed the aggrieved party's position or otherwise indicated that the aggrieved party considers the repudiation final.

(2) Retraction may be by any method that clearly indicates to the aggrieved party that the repudiating party intends to perform under the lease contract and includes any assurance demanded under Section 2A–401.

(3) Retraction reinstates a repudiating party's rights under a lease contract with due excuse and allowance to the aggrieved party for any delay occasioned by the repudiation.

§ 2A–404. Substituted Performance.

(1) If without fault of the lessee, the lessor and the supplier, the agreed berthing, loading, or unloading facilities fail or the agreed type of carrier becomes unavailable or the agreed manner of delivery otherwise becomes commercially impracticable, but a commercially reasonable substitute is available, the substitute performance must be tendered and accepted.

(2) If the agreed means or manner of payment fails because of domestic or foreign governmental regulation:

(a) the lessor may withhold or stop delivery or cause the supplier to withhold or stop delivery unless the lessee provides

a means or manner of payment that is commercially a substantial equivalent; and

(b) if delivery has already been taken, payment by the means or in the manner provided by the regulation discharges the lessee's obligation unless the regulation is discriminatory, oppressive, or predatory.

§ 2A–405. Excused Performance.

Subject to Section 2A–404 on substituted performance, the following rules apply:

(a) Delay in delivery or nondelivery in whole or in part by a lessor or a supplier who complies with paragraphs (b) and (c) is not a default under the lease contract if performance as agreed has been made impracticable by the occurrence of a contingency the nonoccurrence of which was a basic assumption on which the lease contract was made or by compliance in good faith with any applicable foreign or domestic governmental regulation or order, whether or not the regulation or order later proves to be invalid.

(b) If the causes mentioned in paragraph (a) affect only part of the lessor's or the supplier's capacity to perform, he [or she] shall allocate production and deliveries among his [or her] customers but at his [or her] option may include regular customers not then under contract for sale or lease as well as his [or her] own requirements for further manufacture. He [or she] may so allocate in any manner that is fair and reasonable.

(c) The lessor seasonably shall notify the lessee and in the case of a finance lease the supplier seasonably shall notify the lessor and the lessee, if known, that there will be delay or nondelivery and, if allocation is required under paragraph (b), of the estimated quota thus made available for the lessee.

§ 2A–406. Procedure on Excused Performance.

(1) If the lessee receives notification of a material or indefinite delay or an allocation justified under Section 2A–405, the lessee may by written notification to the lessor as to any goods involved, and with respect to all of the goods if under an installment lease contract the value of the whole lease contract is substantially impaired (Section 2A–510):

(a) terminate the lease contract (Section 2A–505(2)); or

(b) except in a finance lease that is not a consumer lease, modify the lease contract by accepting the available quota in substitution, with due allowance from the rent payable for the balance of the lease term for the deficiency but without further right against the lessor.

(2) If, after receipt of a notification from the lessor under Section 2A–405, the lessee fails so to modify the lease agreement within a reasonable time not exceeding 30 days, the lease contract lapses with respect to any deliveries affected.

§ 2A–407. Irrevocable Promises: Finance Leases.

(1) In the case of a finance lease that is not a consumer lease the lessee's promises under the lease contract become irrevocable and independent upon the lessee's acceptance of the goods.

(2) A promise that has become irrevocable and independent under subsection (1):

(a) is effective and enforceable between the parties, and by or against third parties including assignees of the parties, and

(b) is not subject to cancellation, termination, modification, repudiation, excuse, or substitution without the consent of the party to whom the promise runs.

(3) This section does not affect the validity under any other law of a covenant in any lease contract making the lessee's promises irrevocable and independent upon the lessee's acceptance of the goods.

As amended in 1990.

PART 5 Default

A. In General

§ 2A–501. Default: Procedure.

(1) Whether the lessor or the lessee is in default under a lease contract is determined by the lease agreement and this Article.

(2) If the lessor or the lessee is in default under the lease contract, the party seeking enforcement has rights and remedies as provided in this Article and, except as limited by this Article, as provided in the lease agreement.

(3) If the lessor or the lessee is in default under the lease contract, the party seeking enforcement may reduce the party's claim to judgment, or otherwise enforce the lease contract by self-help or any available judicial procedure or nonjudicial procedure, including administrative proceeding, arbitration, or the like, in accordance with this Article.

(4) Except as otherwise provided in Section 1–106(1) or this Article or the lease agreement, the rights and remedies referred to in subsections (2) and (3) are cumulative.

(5) If the lease agreement covers both real property and goods, the party seeking enforcement may proceed under this Part as to the goods, or under other applicable law as to both the real property and the goods in accordance with that party's rights and remedies in respect of the real property, in which case this Part does not apply.

As amended in 1990.

§ 2A–502. Notice After Default.

Except as otherwise provided in this Article or the lease agreement, the lessor or lessee in default under the lease contract is not entitled to notice of default or notice of enforcement from the other party to the lease agreement.

§ 2A–503. Modification or Impairment of Rights and Remedies.

(1) Except as otherwise provided in this Article, the lease agreement may include rights and remedies for default in

addition to or in substitution for those provided in this Article and may limit or alter the measure of damages recoverable under this Article.

(2) Resort to a remedy provided under this Article or in the lease agreement is optional unless the remedy is expressly agreed to be exclusive. If circumstances cause an exclusive or limited remedy to fail of its essential purpose, or provision for an exclusive remedy is unconscionable, remedy may be had as provided in this Article.

(3) Consequential damages may be liquidated under Section 2A–504, or may otherwise be limited, altered, or excluded unless the limitation, alteration, or exclusion is unconscionable. Limitation, alteration, or exclusion of consequential damages for injury to the person in the case of consumer goods is prima facie unconscionable but limitation, alteration, or exclusion of damages where the loss is commercial is not prima facie unconscionable.

(4) Rights and remedies on default by the lessor or the lessee with respect to any obligation or promise collateral or ancillary to the lease contract are not impaired by this Article.

As amended in 1990.

§ 2A-504. Liquidation of Damages.

(1) Damages payable by either party for default, or any other act or omission, including indemnity for loss or diminution of anticipated tax benefits or loss or damage to lessor's residual interest, may be liquidated in the lease agreement but only at an amount or by a formula that is reasonable in light of the then anticipated harm caused by the default or other act or omission.

(2) If the lease agreement provides for liquidation of damages, and such provision does not comply with subsection (1), or such provision is an exclusive or limited remedy that circumstances cause to fail of its essential purpose, remedy may be had as provided in this Article.

(3) If the lessor justifiably withholds or stops delivery of goods because of the lessee's default or insolvency (Section 2A–525 or 2A–526), the lessee is entitled to restitution of any amount by which the sum of his [or her] payments exceeds:

(a) the amount to which the lessor is entitled by virtue of terms liquidating the lessor's damages in accordance with subsection (1); or

(b) in the absence of those terms, 20 percent of the then present value of the total rent the lessee was obligated to pay for the balance of the lease term, or, in the case of a consumer lease, the lesser of such amount or $500.

(4) A lessee's right to restitution under subsection (3) is subject to offset to the extent the lessor establishes:

(a) a right to recover damages under the provisions of this Article other than subsection (1); and

(b) the amount or value of any benefits received by the lessee directly or indirectly by reason of the lease contract.

§ 2A-505. Cancellation and Termination and Effect of Cancellation, Termination, Rescission, or Fraud on Rights and Remedies.

(1) On cancellation of the lease contract, all obligations that are still executory on both sides are discharged, but any right based on prior default or performance survives, and the cancelling party also retains any remedy for default of the whole lease contract or any unperformed balance.

(2) On termination of the lease contract, all obligations that are still executory on both sides are discharged but any right based on prior default or performance survives.

(3) Unless the contrary intention clearly appears, expressions of "cancellation," "rescission," or the like of the lease contract may not be construed as a renunciation or discharge of any claim in damages for an antecedent default.

(4) Rights and remedies for material misrepresentation or fraud include all rights and remedies available under this Article for default.

(5) Neither rescission nor a claim for rescission of the lease contract nor rejection or return of the goods may bar or be deemed inconsistent with a claim for damages or other right or remedy.

§ 2A-506. Statute of Limitations.

(1) An action for default under a lease contract, including breach of warranty or indemnity, must be commenced within 4 years after the cause of action accrued. By the original lease contract the parties may reduce the period of limitation to not less than one year.

(2) A cause of action for default accrues when the act or omission on which the default or breach of warranty is based is or should have been discovered by the aggrieved party, or when the default occurs, whichever is later. A cause of action for indemnity accrues when the act or omission on which the claim for indemnity is based is or should have been discovered by the indemnified party, whichever is later.

(3) If an action commenced within the time limited by subsection (1) is so terminated as to leave available a remedy by another action for the same default or breach of warranty or indemnity, the other action may be commenced after the expiration of the time limited and within 6 months after the termination of the first action unless the termination resulted from voluntary discontinuance or from dismissal for failure or neglect to prosecute.

(4) This section does not alter the law on tolling of the statute of limitations nor does it apply to causes of action that have accrued before this Article becomes effective.

§ 2A-507. Proof of Market Rent: Time and Place.

(1) Damages based on market rent (Section 2A–519 or 2A–528) are determined according to the rent for the use of the goods concerned for a lease term identical to the remaining lease term of the original lease agreement and prevailing at the times specified in Sections 2A–519 and 2A–528.

(2) If evidence of rent for the use of the goods concerned for a lease term identical to the remaining lease term of the original lease agreement and prevailing at the times or places described in this Article is not readily available, the rent prevailing within any reasonable time before or after the time described or at any other place or for a different lease term which in commercial judgment or under usage of trade would serve as a reasonable substitute for the one described may be used, making any proper allowance for the difference, including the cost of transporting the goods to or from the other place.

(3) Evidence of a relevant rent prevailing at a time or place or for a lease term other than the one described in this Article offered by one party is not admissible unless and until he [or she] has given the other party notice the court finds sufficient to prevent unfair surprise.

(4) If the prevailing rent or value of any goods regularly leased in any established market is in issue, reports in official publications or trade journals or in newspapers or periodicals of general circulation published as the reports of that market are admissible in evidence. The circumstances of the preparation of the report may be shown to affect its weight but not its admissibility.

As amended in 1990.

B. Default by Lessor

§ 2A–508. Lessee's Remedies.

(1) If a lessor fails to deliver the goods in conformity to the lease contract (Section 2A–509) or repudiates the lease contract (Section 2A–402), or a lessee rightfully rejects the goods (Section 2A–509) or justifiably revokes acceptance of the goods (Section 2A–517), then with respect to any goods involved, and with respect to all of the goods if under an installment lease contract the value of the whole lease contract is substantially impaired (Section 2A–510), the lessor is in default under the lease contract and the lessee may:

(a) cancel the lease contract (Section 2A–505(1));

(b) recover so much of the rent and security as has been paid and is just under the circumstances;

(c) cover and recover damages as to all goods affected whether or not they have been identified to the lease contract (Sections 2A–518 and 2A–520), or recover damages for nondelivery (Sections 2A–519 and 2A–520);

(d) exercise any other rights or pursue any other remedies provided in the lease contract.

(2) If a lessor fails to deliver the goods in conformity to the lease contract or repudiates the lease contract, the lessee may also:

(a) if the goods have been identified, recover them (Section 2A–522); or

(b) in a proper case, obtain specific performance or replevy the goods (Section 2A–521).

(3) If a lessor is otherwise in default under a lease contract, the lessee may exercise the rights and pursue the remedies provided in the lease contract, which may include a right to cancel the lease, and in Section 2A–519(3).

(4) If a lessor has breached a warranty, whether express or implied, the lessee may recover damages (Section 2A–519(4)).

(5) On rightful rejection or justifiable revocation of acceptance, a lessee has a security interest in goods in the lessee's possession or control for any rent and security that has been paid and any expenses reasonably incurred in their inspection, receipt, transportation, and care and custody and may hold those goods and dispose of them in good faith and in a commercially reasonable manner, subject to Section 2A–527(5).

(6) Subject to the provisions of Section 2A–407, a lessee, on notifying the lessor of the lessee's intention to do so, may deduct all or any part of the damages resulting from any default under the lease contract from any part of the rent still due under the same lease contract.

As amended in 1990.

§ 2A–509. Lessee's Rights on Improper Delivery; Rightful Rejection.

(1) Subject to the provisions of Section 2A–510 on default in installment lease contracts, if the goods or the tender or delivery fail in any respect to conform to the lease contract, the lessee may reject or accept the goods or accept any commercial unit or units and reject the rest of the goods.

(2) Rejection of goods is ineffective unless it is within a reasonable time after tender or delivery of the goods and the lessee seasonably notifies the lessor.

§ 2A–510. Installment Lease Contracts: Rejection and Default.

(1) Under an installment lease contract a lessee may reject any delivery that is nonconforming if the nonconformity substantially impairs the value of that delivery and cannot be cured or the nonconformity is a defect in the required documents; but if the nonconformity does not fall within subsection (2) and the lessor or the supplier gives adequate assurance of its cure, the lessee must accept that delivery.

(2) Whenever nonconformity or default with respect to one or more deliveries substantially impairs the value of the installment lease contract as a whole there is a default with respect to the whole. But, the aggrieved party reinstates the installment lease contract as a whole if the aggrieved party accepts a nonconforming delivery without seasonably notifying of cancellation or brings an action with respect only to past deliveries or demands performance as to future deliveries.

§ 2A–511. Merchant Lessee's Duties as to Rightfully Rejected Goods.

(1) Subject to any security interest of a lessee (Section 2A–508(5)), if a lessor or a supplier has no agent or place of business at the market of rejection, a merchant lessee, after rejection of goods in his [or her] possession or control, shall follow any

reasonable instructions received from the lessor or the supplier with respect to the goods. In the absence of those instructions, a merchant lessee shall make reasonable efforts to sell, lease, or otherwise dispose of the goods for the lessor's account if they threaten to decline in value speedily. Instructions are not reasonable if on demand indemnity for expenses is not forthcoming.

(2) If a merchant lessee (subsection (1)) or any other lessee (Section 2A–512) disposes of goods, he [or she] is entitled to reimbursement either from the lessor or the supplier or out of the proceeds for reasonable expenses of caring for and disposing of the goods and, if the expenses include no disposition commission, to such commission as is usual in the trade, or if there is none, to a reasonable sum not exceeding 10 percent of the gross proceeds.

(3) In complying with this section or Section 2A–512, the lessee is held only to good faith. Good faith conduct hereunder is neither acceptance or conversion nor the basis of an action for damages.

(4) A purchaser who purchases in good faith from a lessee pursuant to this section or Section 2A–512 takes the goods free of any rights of the lessor and the supplier even though the lessee fails to comply with one or more of the requirements of this Article.

§ 2A–512. Lessee's Duties as to Rightfully Rejected Goods.

(1) Except as otherwise provided with respect to goods that threaten to decline in value speedily (Section 2A–511) and subject to any security interest of a lessee (Section 2A–508(5)):

(a) the lessee, after rejection of goods in the lessee's possession, shall hold them with reasonable care at the lessor's or the supplier's disposition for a reasonable time after the lessee's seasonable notification of rejection;

(b) if the lessor or the supplier gives no instructions within a reasonable time after notification of rejection, the lessee may store the rejected goods for the lessor's or the supplier's account or ship them to the lessor or the supplier or dispose of them for the lessor's or the supplier's account with reimbursement in the manner provided in Section 2A–511; but

(c) the lessee has no further obligations with regard to goods rightfully rejected.

(2) Action by the lessee pursuant to subsection (1) is not acceptance or conversion.

§ 2A–513. Cure by Lessor of Improper Tender or Delivery; Replacement.

(1) If any tender or delivery by the lessor or the supplier is rejected because nonconforming and the time for performance has not yet expired, the lessor or the supplier may seasonably notify the lessee of the lessor's or the supplier's intention to cure and may then make a conforming delivery within the time provided in the lease contract.

(2) If the lessee rejects a nonconforming tender that the lessor or the supplier had reasonable grounds to believe would be acceptable with or without money allowance, the lessor or the supplier may have a further reasonable time to substitute a conforming tender if he [or she] seasonably notifies the lessee.

§ 2A–514. Waiver of Lessee's Objections.

(1) In rejecting goods, a lessee's failure to state a particular defect that is ascertainable by reasonable inspection precludes the lessee from relying on the defect to justify rejection or to establish default:

(a) if, stated seasonably, the lessor or the supplier could have cured it (Section 2A–513); or

(b) between merchants if the lessor or the supplier after rejection has made a request in writing for a full and final written statement of all defects on which the lessee proposes to rely.

(2) A lessee's failure to reserve rights when paying rent or other consideration against documents precludes recovery of the payment for defects apparent on the face of the documents.

§ 2A–515. Acceptance of Goods.

(1) Acceptance of goods occurs after the lessee has had a reasonable opportunity to inspect the goods and

(a) the lessee signifies or acts with respect to the goods in a manner that signifies to the lessor or the supplier that the goods are conforming or that the lessee will take or retain them in spite of their nonconformity; or

(b) the lessee fails to make an effective rejection of the goods (Section 2A–509(2)).

(2) Acceptance of a part of any commercial unit is acceptance of that entire unit.

§ 2A–516. Effect of Acceptance of Goods; Notice of Default; Burden of Establishing Default after Acceptance; Notice of Claim or Litigation to Person Answerable Over.

(1) A lessee must pay rent for any goods accepted in accordance with the lease contract, with due allowance for goods rightfully rejected or not delivered.

(2) A lessee's acceptance of goods precludes rejection of the goods accepted. In the case of a finance lease, if made with knowledge of a nonconformity, acceptance cannot be revoked because of it. In any other case, if made with knowledge of a nonconformity, acceptance cannot be revoked because of it unless the acceptance was on the reasonable assumption that the nonconformity would be seasonably cured. Acceptance does not of itself impair any other remedy provided by this Article or the lease agreement for nonconformity.

(3) If a tender has been accepted:

(a) within a reasonable time after the lessee discovers or should have discovered any default, the lessee shall notify the lessor and the supplier, if any, or be barred from any remedy against the party notified;

(b) except in the case of a consumer lease, within a reasonable time after the lessee receives notice of litigation for infringement or the like (Section 2A–211) the lessee shall notify the lessor or be barred from any remedy over for liability established by the litigation; and

(c) the burden is on the lessee to establish any default.

(4) If a lessee is sued for breach of a warranty or other obligation for which a lessor or a supplier is answerable over the following apply:

(a) The lessee may give the lessor or the supplier, or both, written notice of the litigation. If the notice states that the person notified may come in and defend and that if the person notified does not do so that person will be bound in any action against that person by the lessee by any determination of fact common to the two litigations, then unless the person notified after seasonable receipt of the notice does come in and defend that person is so bound.

(b) The lessor or the supplier may demand in writing that the lessee turn over control of the litigation including settlement if the claim is one for infringement or the like (Section 2A–211) or else be barred from any remedy over. If the demand states that the lessor or the supplier agrees to bear all expense and to satisfy any adverse judgment, then unless the lessee after seasonable receipt of the demand does turn over control the lessee is so barred.

(5) Subsections (3) and (4) apply to any obligation of a lessee to hold the lessor or the supplier harmless against infringement or the like (Section 2A–211).

As amended in 1990.

§ 2A–517. Revocation of Acceptance of Goods.

(1) A lessee may revoke acceptance of a lot or commercial unit whose nonconformity substantially impairs its value to the lessee if the lessee has accepted it:

(a) except in the case of a finance lease, on the reasonable assumption that its nonconformity would be cured and it has not been seasonably cured; or

(b) without discovery of the nonconformity if the lessee's acceptance was reasonably induced either by the lessor's assurances or, except in the case of a finance lease, by the difficulty of discovery before acceptance.

(2) Except in the case of a finance lease that is not a consumer lease, a lessee may revoke acceptance of a lot or commercial unit if the lessor defaults under the lease contract and the default substantially impairs the value of that lot or commercial unit to the lessee.

(3) If the lease agreement so provides, the lessee may revoke acceptance of a lot or commercial unit because of other defaults by the lessor.

(4) Revocation of acceptance must occur within a reasonable time after the lessee discovers or should have discovered the ground for it and before any substantial change in condition of the goods which is not caused by the nonconformity. Revocation is not effective until the lessee notifies the lessor.

(5) A lessee who so revokes has the same rights and duties with regard to the goods involved as if the lessee had rejected them.

As amended in 1990.

§ 2A–518. Cover; Substitute Goods.

(1) After a default by a lessor under the lease contract of the type described in Section 2A–508(1), or, if agreed, after other default by the lessor, the lessee may cover by making any purchase or lease of or contract to purchase or lease goods in substitution for those due from the lessor.

(2) Except as otherwise provided with respect to damages liquidated in the lease agreement (Section 2A–504) or otherwise determined pursuant to agreement of the parties (Sections 1–102(3) and 2A–503), if a lessee's cover is by lease agreement substantially similar to the original lease agreement and the new lease agreement is made in good faith and in a commercially reasonable manner, the lessee may recover from the lessor as damages (i) the present value, as of the date of the commencement of the term of the new lease agreement, of the rent under the new lease agreement applicable to that period of the new lease term which is comparable to the then remaining term of the original lease agreement minus the present value as of the same date of the total rent for the then remaining lease term of the original lease agreement, and (ii) any incidental or consequential damages, less expenses saved in consequence of the lessor's default.

(3) If a lessee's cover is by lease agreement that for any reason does not qualify for treatment under subsection (2), or is by purchase or otherwise, the lessee may recover from the lessor as if the lessee had elected not to cover and Section 2A–519 governs.

As amended in 1990.

§ 2A–519. Lessee's Damages for Non-Delivery, Repudiation, Default, and Breach of Warranty in Regard to Accepted Goods.

(1) Except as otherwise provided with respect to damages liquidated in the lease agreement (Section 2A–504) or otherwise determined pursuant to agreement of the parties (Sections 1–102(3) and 2A–503), if a lessee elects not to cover or a lessee elects to cover and the cover is by lease agreement that for any reason does not qualify for treatment under Section 2A–518(2), or is by purchase or otherwise, the measure of damages for non-delivery or repudiation by the lessor or for rejection or revocation of acceptance by the lessee is the present value, as of the date of the default, of the then market rent minus the present value as of the same date of the original rent, computed for the remaining lease term of the original lease

agreement, together with incidental and consequential damages, less expenses saved in consequence of the lessor's default.

(2) Market rent is to be determined as of the place for tender or, in cases of rejection after arrival or revocation of acceptance, as of the place of arrival.

(3) Except as otherwise agreed, if the lessee has accepted goods and given notification (Section 2A–516(3)), the measure of damages for non-conforming tender or delivery or other default by a lessor is the loss resulting in the ordinary course of events from the lessor's default as determined in any manner that is reasonable together with incidental and consequential damages, less expenses saved in consequence of the lessor's default.

(4) Except as otherwise agreed, the measure of damages for breach of warranty is the present value at the time and place of acceptance of the difference between the value of the use of the goods accepted and the value if they had been as warranted for the lease term, unless special circumstances show proximate damages of a different amount, together with incidental and consequential damages, less expenses saved in consequence of the lessor's default or breach of warranty.

As amended in 1990.

§ 2A–520. Lessee's Incidental and Consequential Damages.

(1) Incidental damages resulting from a lessor's default include expenses reasonably incurred in inspection, receipt, transportation, and care and custody of goods rightfully rejected or goods the acceptance of which is justifiably revoked, any commercially reasonable charges, expenses or commissions in connection with effecting cover, and any other reasonable expense incident to the default.

(2) Consequential damages resulting from a lessor's default include:

(a) any loss resulting from general or particular requirements and needs of which the lessor at the time of contracting had reason to know and which could not reasonably be prevented by cover or otherwise; and

(b) injury to person or property proximately resulting from any breach of warranty.

§ 2A–521. Lessee's Right to Specific Performance or Replevin.

(1) Specific performance may be decreed if the goods are unique or in other proper circumstances.

(2) A decree for specific performance may include any terms and conditions as to payment of the rent, damages, or other relief that the court deems just.

(3) A lessee has a right of replevin, detinue, sequestration, claim and delivery, or the like for goods identified to the lease contract if after reasonable effort the lessee is unable to effect cover for those goods or the circumstances reasonably indicate that the effort will be unavailing.

§ 2A–522. Lessee's Right to Goods on Lessor's Insolvency.

(1) Subject to subsection (2) and even though the goods have not been shipped, a lessee who has paid a part or all of the rent and security for goods identified to a lease contract (Section 2A–217) on making and keeping good a tender of any unpaid portion of the rent and security due under the lease contract may recover the goods identified from the lessor if the lessor becomes insolvent within 10 days after receipt of the first installment of rent and security.

(2) A lessee acquires the right to recover goods identified to a lease contract only if they conform to the lease contract.

C. Default by Lessee

§ 2A–523. Lessor's Remedies.

(1) If a lessee wrongfully rejects or revokes acceptance of goods or fails to make a payment when due or repudiates with respect to a part or the whole, then, with respect to any goods involved, and with respect to all of the goods if under an installment lease contract the value of the whole lease contract is substantially impaired (Section 2A–510), the lessee is in default under the lease contract and the lessor may:

(a) cancel the lease contract (Section 2A–505(1));

(b) proceed respecting goods not identified to the lease contract (Section 2A–524);

(c) withhold delivery of the goods and take possession of goods previously delivered (Section 2A–525);

(d) stop delivery of the goods by any bailee (Section 2A–526);

(e) dispose of the goods and recover damages (Section 2A–527), or retain the goods and recover damages (Section 2A–528), or in a proper case recover rent (Section 2A–529)

(f) exercise any other rights or pursue any other remedies provided in the lease contract.

(2) If a lessor does not fully exercise a right or obtain a remedy to which the lessor is entitled under subsection (1), the lessor may recover the loss resulting in the ordinary course of events from the lessee's default as determined in any reasonable manner, together with incidental damages, less expenses saved in consequence of the lessee's default.

(3) If a lessee is otherwise in default under a lease contract, the lessor may exercise the rights and pursue the remedies provided in the lease contract, which may include a right to cancel the lease. In addition, unless otherwise provided in the lease contract:

(a) if the default substantially impairs the value of the lease contract to the lessor, the lessor may exercise the rights and pursue the remedies provided in subsections (1) or (2); or

(b) if the default does not substantially impair the value of the lease contract to the lessor, the lessor may recover as provided in subsection (2).

As amended in 1990.

§ 2A–524. Lessor's Right to Identify Goods to Lease Contract.

(1) After default by the lessee under the lease contract of the type described in Section 2A–523(1) or 2A–523(3)(a) or, if agreed, after other default by the lessee, the lessor may:

(a) identify to the lease contract conforming goods not already identified if at the time the lessor learned of the default they were in the lessor's or the supplier's possession or control; and

(b) dispose of goods (Section 2A–527(1)) that demonstrably have been intended for the particular lease contract even though those goods are unfinished.

(2) If the goods are unfinished, in the exercise of reasonable commercial judgment for the purposes of avoiding loss and of effective realization, an aggrieved lessor or the supplier may either complete manufacture and wholly identify the goods to the lease contract or cease manufacture and lease, sell, or otherwise dispose of the goods for scrap or salvage value or proceed in any other reasonable manner.

As amended in 1990.

§ 2A–525. Lessor's Right to Possession of Goods.

(1) If a lessor discovers the lessee to be insolvent, the lessor may refuse to deliver the goods.

(2) After a default by the lessee under the lease contract of the type described in Section 2A–523(1) or 2A–523(3)(a) or, if agreed, after other default by the lessee, the lessor has the right to take possession of the goods. If the lease contract so provides, the lessor may require the lessee to assemble the goods and make them available to the lessor at a place to be designated by the lessor which is reasonably convenient to both parties. Without removal, the lessor may render unusable any goods employed in trade or business, and may dispose of goods on the lessee's premises (Section 2A–527).

(3) The lessor may proceed under subsection (2) without judicial process if that can be done without breach of the peace or the lessor may proceed by action.

As amended in 1990.

§ 2A–526. Lessor's Stoppage of Delivery in Transit or Otherwise.

(1) A lessor may stop delivery of goods in the possession of a carrier or other bailee if the lessor discovers the lessee to be insolvent and may stop delivery of carload, truckload, planeload, or larger shipments of express or freight if the lessee repudiates or fails to make a payment due before delivery, whether for rent, security or otherwise under the lease contract, or for any other reason the lessor has a right to withhold or take possession of the goods.

(2) In pursuing its remedies under subsection (1), the lessor may stop delivery until

(a) receipt of the goods by the lessee;

(b) acknowledgment to the lessee by any bailee of the goods, except a carrier, that the bailee holds the goods for the lessee; or

(c) such an acknowledgment to the lessee by a carrier via reshipment or as warehouseman.

(3) (a) To stop delivery, a lessor shall so notify as to enable the bailee by reasonable diligence to prevent delivery of the goods.

(b) After notification, the bailee shall hold and deliver the goods according to the directions of the lessor, but the lessor is liable to the bailee for any ensuing charges or damages.

(c) A carrier who has issued a nonnegotiable bill of lading is not obliged to obey a notification to stop received from a person other than the consignor.

§ 2A–527. Lessor's Rights to Dispose of Goods.

(1) After a default by a lessee under the lease contract of the type described in Section 2A–523(1) or 2A–523(3)(a) or after the lessor refuses to deliver or takes possession of goods (Section 2A–525 or 2A–526), or, if agreed, after other default by a lessee, the lessor may dispose of the goods concerned or the undelivered balance thereof by lease, sale, or otherwise.

(2) Except as otherwise provided with respect to damages liquidated in the lease agreement (Section 2A–504) or otherwise determined pursuant to agreement of the parties (Sections 1–102(3) and 2A–503), if the disposition is by lease agreement substantially similar to the original lease agreement and the new lease agreement is made in good faith and in a commercially reasonable manner, the lessor may recover from the lessee as damages (i) accrued and unpaid rent as of the date of the commencement of the term of the new lease agreement, (ii) the present value, as of the same date, of the total rent for the then remaining lease term of the original lease agreement minus the present value, as of the same date, of the rent under the new lease agreement applicable to that period of the new lease term which is comparable to the then remaining term of the original lease agreement, and (iii) any incidental damages allowed under Section 2A–530, less expenses saved in consequence of the lessee's default.

(3) If the lessor's disposition is by lease agreement that for any reason does not qualify for treatment under subsection (2), or is by sale or otherwise, the lessor may recover from the lessee as if the lessor had elected not to dispose of the goods and Section 2A–528 governs.

(4) A subsequent buyer or lessee who buys or leases from the lessor in good faith for value as a result of a disposition under this section takes the goods free of the original lease contract and any rights of the original lessee even though the lessor fails to comply with one or more of the requirements of this Article.

(5) The lessor is not accountable to the lessee for any profit made on any disposition. A lessee who has rightfully rejected or justifiably revoked acceptance shall account to the lessor for any excess over the amount of the lessee's security interest (Section 2A–508(5)).

As amended in 1990.

§ 2A–528. Lessor's Damages for Non-acceptance, Failure to Pay, Repudiation, or Other Default.

(1) Except as otherwise provided with respect to damages liquidated in the lease agreement (Section 2A–504) or otherwise determined pursuant to agreement of the parties (Section 1–102(3) and 2A–503), if a lessor elects to retain the goods or a lessor elects to dispose of the goods and the disposition is by lease agreement that for any reason does not qualify for treatment under Section 2A–527(2), or is by sale or otherwise, the lessor may recover from the lessee as damages for a default of the type described in Section 2A–523(1) or 2A–523(3)(a), or if agreed, for other default of the lessee, (i) accrued and unpaid rent as of the date of the default if the lessee has never taken possession of the goods, or, if the lessee has taken possession of the goods, as of the date the lessor repossesses the goods or an earlier date on which the lessee makes a tender of the goods to the lessor, (ii) the present value as of the date determined under clause (i) of the total rent for the then remaining lease term of the original lease agreement minus the present value as of the same date of the market rent as the place where the goods are located computed for the same lease term, and (iii) any incidental damages allowed under Section 2A–530, less expenses saved in consequence of the lessee's default.

(2) If the measure of damages provided in subsection (1) is inadequate to put a lessor in as good a position as performance would have, the measure of damages is the present value of the profit, including reasonable overhead, the lessor would have made from full performance by the lessee, together with any incidental damages allowed under Section 2A–530, due allowance for costs reasonably incurred and due credit for payments or proceeds of disposition.

As amended in 1990.

§ 2A–529. Lessor's Action for the Rent.

(1) After default by the lessee under the lease contract of the type described in Section 2A–523(1) or 2A–523(3)(a) or, if agreed, after other default by the lessee, if the lessor complies with subsection (2), the lessor may recover from the lessee as damages:

(a) for goods accepted by the lessee and not repossessed by or tendered to the lessor, and for conforming goods lost or damaged within a commercially reasonable time after risk of loss passes to the lessee (Section 2A–219), (i) accrued and unpaid rent as of the date of entry of judgment in favor of the lessor (ii) the present value as of the same date of the rent for the then remaining lease term of the lease agreement, and (iii) any incidental damages allowed under Section 2A–530, less expenses saved in consequence of the lessee's default; and

(b) for goods identified to the lease contract if the lessor is unable after reasonable effort to dispose of them at a reasonable price or the circumstances reasonably indicate that effort will be unavailing, (i) accrued and unpaid rent as of the date of entry of judgment in favor of the lessor, (ii) the present value as of the same date of the rent for the then remaining lease term of the lease agreement, and (iii) any incidental damages allowed under Section 2A–530, less expenses saved in consequence of the lessee's default.

(2) Except as provided in subsection (3), the lessor shall hold for the lessee for the remaining lease term of the lease agreement any goods that have been identified to the lease contract and are in the lessor's control.

(3) The lessor may dispose of the goods at any time before collection of the judgment for damages obtained pursuant to subsection (1). If the disposition is before the end of the remaining lease term of the lease agreement, the lessor's recovery against the lessee for damages is governed by Section 2A–527 or Section 2A–528, and the lessor will cause an appropriate credit to be provided against a judgment for damages to the extent that the amount of the judgment exceeds the recovery available pursuant to Section 2A–527 or 2A–528.

(4) Payment of the judgment for damages obtained pursuant to subsection (1) entitles the lessee to the use and possession of the goods not then disposed of for the remaining lease term of and in accordance with the lease agreement.

(5) After default by the lessee under the lease contract of the type described in Section 2A–523(1) or Section 2A–523(3)(a) or, if agreed, after other default by the lessee, a lessor who is held not entitled to rent under this section must nevertheless be awarded damages for non-acceptance under Sections 2A–527 and 2A–528.

As amended in 1990.

§ 2A–530. Lessor's Incidental Damages.

Incidental damages to an aggrieved lessor include any commercially reasonable charges, expenses, or commissions incurred in stopping delivery, in the transportation, care and custody of goods after the lessee's default, in connection with return or disposition of the goods, or otherwise resulting from the default.

§ 2A–531. Standing to Sue Third Parties for Injury to Goods.

(1) If a third party so deals with goods that have been identified to a lease contract as to cause actionable injury to a party to the lease contract (a) the lessor has a right of action against the third party, and (b) the lessee also has a right of action against the third party if the lessee:

(i) has a security interest in the goods;

(ii) has an insurable interest in the goods; or

(iii) bears the risk of loss under the lease contract or has since the injury assumed that risk as against the lessor and the goods have been converted or destroyed.

(2) If at the time of the injury the party plaintiff did not bear the risk of loss as against the other party to the lease contract and there is no arrangement between them for disposition of the recovery,

his [or her] suit or settlement, subject to his [or her] own interest, is as a fiduciary for the other party to the lease contract.

(3) Either party with the consent of the other may sue for the benefit of whom it may concern.

§ 2A–532. Lessor's Rights to Residual Interest.

In addition to any other recovery permitted by this Article or other law, the lessor may recover from the lessee an amount that will fully compensate the lessor for any loss of or damage to the lessor's residual interest in the goods caused by the default of the lessee.

As added in 1990.

REVISED ARTICLE III
NEGOTIABLE INSTRUMENTS

PART 1 General Provisions and Definitions

§ 3–101. Short Title.

This Article may be cited as Uniform Commercial Code–Negotiable Instruments.

§ 3–102. Subject Matter.

(a) This Article applies to negotiable instruments. It does not apply to money, to payment orders governed by Article 4A, or to securities governed by Article 8.

(b) If there is conflict between this Article and Article 4 or 9, Articles 4 and 9 govern.

(c) Regulations of the Board of Governors of the Federal Reserve System and operating circulars of the Federal Reserve Banks supersede any inconsistent provision of this Article to the extent of the inconsistency.

§ 3–103. Definitions.

(a) In this Article:

(1) "Acceptor" means a drawee who has accepted a draft.

(2) "Drawee" means a person ordered in a draft to make payment.

(3) "Drawer" means a person who signs or is identified in a draft as a person ordering payment.

(4) "Good faith" means honesty in fact and the observance of reasonable commercial standards of fair dealing.

(5) "Maker" means a person who signs or is identified in a note as a person undertaking to pay.

(6) "Order" means a written instruction to pay money signed by the person giving the instruction. The instruction may be addressed to any person, including the person giving the instruction, or to one or more persons jointly or in the alternative but not in succession. An authorization to pay is not an order unless the person authorized to pay is also instructed to pay.

(7) "Ordinary care" in the case of a person engaged in business means observance of reasonable commercial standards, prevailing in the area in which the person is located, with respect to the business in which the person is engaged. In the case of a bank that takes an instrument for processing for collection or payment by automated means, reasonable commercial standards do not require the bank to examine the instrument if the failure to examine does not violate the bank's prescribed procedures and the bank's procedures do not vary unreasonably from general banking usage not disapproved by this Article or Article 4.

(8) "Party" means a party to an instrument.

(9) "Promise" means a written undertaking to pay money signed by the person undertaking to pay. An acknowledgment of an obligation by the obligor is not a promise unless the obligor also undertakes to pay the obligation.

(10) "Prove" with respect to a fact means to meet the burden of establishing the fact (Section 1–201(8)).

(11) "Remitter" means a person who purchases an instrument from its issuer if the instrument is payable to an identified person other than the purchaser.

(b) [Other definitions' section references deleted.]

(c) [Other definitions' section references deleted.]

(d) In addition, Article 1 contains general definitions and principles of construction and interpretation applicable throughout this Article.

§ 3–104. Negotiable Instrument.

(a) Except as provided in subsections (c)and (d), "negotiable instrument" means an unconditional promise or order to pay a fixed amount of money, with or without interest or other charges described in the promise or order, if it:

(1) is payable to bearer or to order at the time it is issued or first comes into possession of a holder;

(2) is payable on demand or at a definite time; and

(3) does not state any other undertaking or instruction by the person promising or ordering payment to do any act in addition to the payment of money, but the promise or order may contain (i) an undertaking or power to give, maintain, or protect collateral to secure payment, (ii) an authorization or power to the holder to confess judgment or realize on or dispose of collateral, or (iii) a waiver of the benefit of any law intended for the advantage or protection of an obligor.

(b) "Instrument" means a negotiable instrument.

(c) An order that meets all of the requirements of subsection (a), except paragraph (1), and otherwise falls within the definition of "check" in subsection (f) is a negotiable instrument and a check.

(d) A promise or order other than a check is not an instrument if, at the time it is issued or first comes into

possession of a holder, it contains a conspicuous statement, however expressed, to the effect that the promise or order is not negotiable or is not an instrument governed by this Article.

(e) An instrument is a "note" if it is a promise and is a "draft" if it is an order. If an instrument falls within the definition of both "note" and "draft," a person entitled to enforce the instrument may treat it as either.

(f) "Check" means (i) a draft, other than a documentary draft, payable on demand and drawn on a bank or (ii) a cashier's check or teller's check. An instrument may be a check even though it is described on its face by another term, such as "money order."

(g) "Cashier's check" means a draft with respect to which the drawer and drawee are the same bank or branches of the same bank.

(h) "Teller's check" means a draft drawn by a bank (i) on anoth- er bank, or (ii) payable at or through a bank.

(i) "Traveler's check" means an instrument that (i) is payable on demand, (ii) is drawn on or payable at or through a bank, (iii) is designated by the term "traveler's check" or by a substantially similar term, and (iv) requires, as a condition to payment, a countersignature by a person whose specimen signature appears on the instrument.

(j) "Certificate of deposit" means an instrument containing an acknowledgment by a bank that a sum of money has been received by the bank and a promise by the bank to repay the sum of money. A certificate of deposit is a note of the bank.

§ 3–105. Issue of Instrument.

(a) "Issue" means the first delivery of an instrument by the maker or drawer, whether to a holder or nonholder, for the purpose of giving rights on the instrument to any person.

(b) An unissued instrument, or an unissued incomplete instrument that is completed, is binding on the maker or drawer, but nonissuance is a defense. An instrument that is conditionally issued or is issued for a special purpose is binding on the maker or drawer, but failure of the condition or special purpose to be fulfilled is a defense.

(c) "Issuer" applies to issued and unissued instruments and means a maker or drawer of an instrument.

§ 3–106. Unconditional Promise or Order.

(a) Except as provided in this section, for the purposes of Section 3–104(a), a promise or order is unconditional unless it states (i) an express condition to payment, (ii) that the promise or order is subject to or governed by another writing, or (iii) that rights or obligations with respect to the promise or order are stated in another writing. A reference to another writing does not of itself make the promise or order conditional.

(b) A promise or order is not made conditional (i) by a reference to another writing for a statement of rights with respect to collateral, prepayment, or acceleration, or (ii) because payment is limited to resort to a particular fund or source.

(c) If a promise or order requires, as a condition to payment, a countersignature by a person whose specimen signature appears on the promise or order, the condition does not make the promise or order conditional for the purposes of Section 3–104(a). If the person whose specimen signature appears on an instrument fails to countersign the instrument, the failure to countersign is a defense to the obligation of the issuer, but the failure does not prevent a transferee of the instrument from becoming a holder of the instrument.

(d) If a promise or order at the time it is issued or first comes into possession of a holder contains a statement, required by applicable statutory or administrative law, to the effect that the rights of a holder or transferee are subject to claims or defenses that the issuer could assert against the original payee, the promise or order is not thereby made conditional for the purposes of Section 3–104(a); but if the promise or order is an instrument, there cannot be a holder in due course of the instrument.

§ 3–107. Instrument Payable in Foreign Money.

Unless the instrument otherwise provides, an instrument that states the amount payable in foreign money may be paid in the foreign money or in an equivalent amount in dollars calculated by using the current bank-offered spot rate at the place of payment for the purchase of dollars on the day on which the instrument is paid.

§ 3–108. Payable on Demand or at Definite Time.

(a) A promise or order is "payable on demand" if it (i) states that it is payable on demand or at sight, or otherwise indicates that it is payable at the will of the holder, or (ii) does not state any time of payment.

(b) A promise or order is "payable at a definite time" if it is payable on elapse of a definite period of time after sight or acceptance or at a fixed date or dates or at a time or times readily ascertainable at the time the promise or order is issued, subject to rights of (i) prepayment, (ii) acceleration, (iii) extension at the option of the holder, or (iv) extension to a further definite time at the option of the maker or acceptor or automatically upon or after a specified act or event.

(c) If an instrument, payable at a fixed date, is also payable upon demand made before the fixed date, the instrument is payable on demand until the fixed date and, if demand for payment is not made before that date, becomes payable at a definite time on the fixed date.

§ 3–109. Payable to Bearer or to Order.

(a) A promise or order is payable to bearer if it:

(1) states that it is payable to bearer or to the order of bearer or otherwise indicates that the person in possession of the promise or order is entitled to payment;

(2) does not state a payee; or

(3) states that it is payable to or to the order of cash or otherwise indicates that it is not payable to an identified person.

(b) A promise or order that is not payable to bearer is payable to order if it is payable (i) to the order of an identified person or (ii) to an identified person or order. A promise or order that is payable to order is payable to the identified person.

(c) An instrument payable to bearer may become payable to an identified person if it is specially indorsed pursuant to Section 3–205(a). An instrument payable to an identified person may become payable to bearer if it is indorsed in blank pursuant to Section 3–205(b).

§ 3–110. Identification of Person to Whom Instrument Is Payable.

(a) The person to whom an instrument is initially payable is determined by the intent of the person, whether or not authorized, signing as, or in the name or behalf of, the issuer of the instrument. The instrument is payable to the person intended by the signer even if that person is identified in the instrument by a name or other identification that is not that of the intended person. If more than one person signs in the name or behalf of the issuer of an instrument and all the signers do not intend the same person as payee, the instrument is payable to any person intended by one or more of the signers.

(b) If the signature of the issuer of an instrument is made by automated means, such as a check-writing machine, the payee of the instrument is determined by the intent of the person who supplied the name or identification of the payee, whether or not authorized to do so.

(c) A person to whom an instrument is payable may be identified in any way, including by name, identifying number, office, or account number. For the purpose of determining the holder of an instrument, the following rules apply:

(1) If an instrument is payable to an account and the account is identified only by number, the instrument is payable to the person to whom the account is payable. If an instrument is payable to an account identified by number and by the name of a person, the instrument is payable to the named person, whether or not that person is the owner of the account identified by number.

(2) If an instrument is payable to:

(i) a trust, an estate, or a person described as trustee or representative of a trust or estate, the instrument is payable to the trustee, the representative, or a successor of either, whether or not the beneficiary or estate is also named;

(ii) a person described as agent or similar representative of a named or identified person, the instrument is payable to the represented person, the representative, or a successor of the representative;

(iii) a fund or organization that is not a legal entity, the instrument is payable to a representative of the members of the fund or organization; or

(iv) an office or to a person described as holding an office, the instrument is payable to the named person, the incumbent of the office, or a successor to the incumbent.

(d) If an instrument is payable to two or more persons alternatively, it is payable to any of them and may be negotiated, discharged, or enforced by any or all of them in possession of the instrument. If an instrument is payable to two or more persons not alternatively, it is payable to all of them and may be negotiated, discharged, or enforced only by all of them. If an instrument payable to two or more persons is ambiguous as to whether it is payable to the persons alternatively, the instrument is payable to the persons alternatively.

§ 3–111. Place of Payment.

Except as otherwise provided for items in Article 4, an instrument is payable at the place of payment stated in the instrument. If no place of payment is stated, an instrument is payable at the address of the drawee or maker stated in the instrument. If no address is stated, the place of payment is the place of business of the drawee or maker. If a drawee or maker has more than one place of business, the place of payment is any place of business of the drawee or maker chosen by the person entitled to enforce the instrument. If the drawee or maker has no place of business, the place of payment is the residence of the drawee or maker.

§ 3–112. Interest.

(a) Unless otherwise provided in the instrument, (i) an instrument is not payable with interest, and (ii) interest on an interest-bearing instrument is payable from the date of the instrument.

(b) Interest may be stated in an instrument as a fixed or variable amount of money or it may be expressed as a fixed or variable rate or rates. The amount or rate of interest may be stated or described in the instrument in any manner and may require reference to information not contained in the instrument. If an instrument provides for interest, but the amount of interest payable cannot be ascertained from the description, interest is payable at the judgment rate in effect at the place of payment of the instrument and at the time interest first accrues.

§ 3–113. Date of Instrument.

(a) An instrument may be antedated or postdated. The date stated determines the time of payment if the instrument is payable at a fixed period after date. Except as provided in Section 4–401(c), an instrument payable on demand is not payable before the date of the instrument.

(b) If an instrument is undated, its date is the date of its issue or, in the case of an unissued instrument, the date it first comes into possession of a holder.

§ 3–114. Contradictory Terms of Instrument.

If an instrument contains contradictory terms, typewritten terms prevail over printed terms, handwritten terms prevail over both, and words prevail over numbers.

§ 3–115. Incomplete Instrument.

(a) "Incomplete instrument" means a signed writing, whether or not issued by the signer, the contents of which show at the time of signing that it is incomplete but that the signer intended it to be completed by the addition of words or numbers.

(b) Subject to subsection (c), if an incomplete instrument is an instrument under Section 3–104, it may be enforced according to its terms if it is not completed, or according to its terms as augmented by completion. If an incomplete instrument is not an instrument under Section 3–104, but, after completion, the requirements of Section 3–104 are met, the instrument may be enforced according to its terms as augmented by completion.

(c) If words or numbers are added to an incomplete instrument without authority of the signer, there is an alteration of the incomplete instrument under Section 3–407.

(d) The burden of establishing that words or numbers were added to an incomplete instrument without authority of the signer is on the person asserting the lack of authority.

§ 3–116. Joint and Several Liability; Contribution.

(a) Except as otherwise provided in the instrument, two or more persons who have the same liability on an instrument as makers, drawers, acceptors, indorsers who indorse as joint payees, or anomalous indorsers are jointly and severally liable in the capacity in which they sign.

(b) Except as provided in Section 3–419(e) or by agreement of the affected parties, a party having joint and several liability who pays the instrument is entitled to receive from any party having the same joint and several liability contribution in accordance with applicable law.

(c) Discharge of one party having joint and several liability by a person entitled to enforce the instrument does not affect the right under subsection (b) of a party having the same joint and several liability to receive contribution from the party discharged.

§ 3–117. Other Agreements Affecting Instrument.

Subject to applicable law regarding exclusion of proof of contemporaneous or previous agreements, the obligation of a party to an instrument to pay the instrument may be modified, supplemented, or nullified by a separate agreement of the obligor and a person entitled to enforce the instrument, if the instrument is issued or the obligation is incurred in reliance on the agreement or as part of the same transaction giving rise to the agreement. To the extent an obligation is modified, supplemented, or nullified by an agreement under this section, the agreement is a defense to the obligation.

§ 3–118. Statute of Limitations.

(a) Except as provided in subsection (e), an action to enforce the obligation of a party to pay a note payable at a definite time must be commenced within six years after the due date or dates stated in the note or, if a due date is accelerated, within six years after the accelerated due date.

(b) Except as provided in subsection (d) or (e), if demand for payment is made to the maker of a note payable on demand, an action to enforce the obligation of a party to pay the note must be commenced within six years after the demand. If no demand for payment is made to the maker, an action to enforce the note is barred if neither principal nor interest on the note has been paid for a continuous period of 10 years.

(c) Except as provided in subsection (d), an action to enforce the obligation of a party to an unaccepted draft to pay the draft must be commenced within three years after dishonor of the draft or 10 years after the date of the draft, whichever period expires first.

(d) An action to enforce the obligation of the acceptor of a certified check or the issuer of a teller's check, cashier's check, or traveler's check must be commenced within three years after demand for payment is made to the acceptor or issuer, as the case may be.

(e) An action to enforce the obligation of a party to a certificate of deposit to pay the instrument must be commenced within six years after demand for payment is made to the maker, but if the instrument states a due date and the maker is not required to pay before that date, the six-year period begins when a demand for payment is in effect and the due date has passed.

(f) An action to enforce the obligation of a party to pay an accepted draft, other than a certified check, must be commenced (i) within six years after the due date or dates stated in the draft or acceptance if the obligation of the acceptor is payable at a definite time, or (ii) within six years after the date of the acceptance if the obligation of the acceptor is payable on demand.

(g) Unless governed by other law regarding claims for indemnity or contribution, an action (i) for conversion of an instrument, for money had and received, or like action based on conversion, (ii) for breach of warranty, or (iii) to enforce an obligation, duty, or right arising under this Article and not governed by this section must be commenced within three years after the [cause of action] accrues.

§ 3–119. Notice of Right to Defend Action.

In an action for breach of an obligation for which a third person is answerable over pursuant to this Article or Article 4, the defendant may give the third person written notice of the litigation, and the person notified may then give similar notice to any other person who is answerable over. If the notice states (i) that the person notified may come in and defend and (ii) that failure to do so will bind the person notified in an action later brought by the person giving the notice as to any determination of fact common to the two litigations, the person notified is so bound unless after seasonable receipt of the notice the person notified does come in and defend.

PART 2 Negotiation, Transfer, and Indorsement

§ 3–201. Negotiation.

(a) "Negotiation" means a transfer of possession, whether voluntary or involuntary, of an instrument by a person other than the issuer to a person who thereby becomes its holder.

(b) Except for negotiation by a remitter, if an instrument is payable to an identified person, negotiation requires transfer of possession of the instrument and its indorsement by the holder. If an instrument is payable to bearer, it may be negotiated by transfer of possession alone.

§ 3–202. Negotiation Subject to Rescission.

(a) Negotiation is effective even if obtained (i) from an infant, a corporation exceeding its powers, or a person without capacity, (ii) by fraud, duress, or mistake, or (iii) in breach of duty or as part of an illegal transaction.

(b) To the extent permitted by other law, negotiation may be rescinded or may be subject to other remedies, but those remedies may not be asserted against a subsequent holder in due course or a person paying the instrument in good faith and without knowledge of facts that are a basis for rescission or other remedy.

§ 3–203. Transfer of Instrument; Rights Acquired by Transfer.

(a) An instrument is transferred when it is delivered by a person other than its issuer for the purpose of giving to the person receiving delivery the right to enforce the instrument.

(b) Transfer of an instrument, whether or not the transfer is a negotiation, vests in the transferee any right of the transferor to enforce the instrument, including any right as a holder in due course, but the transferee cannot acquire rights of a holder in due course by a transfer, directly or indirectly, from a holder in due course if the transferee engaged in fraud or illegality affecting the instrument.

(c) Unless otherwise agreed, if an instrument is transferred for value and the transferee does not become a holder because of lack of indorsement by the transferor, the transferee has a specifically enforceable right to the unqualified indorsement of the transferor, but negotiation of the instrument does not occur until the indorsement is made.

(d) If a transferor purports to transfer less than the entire instrument, negotiation of the instrument does not occur. The transferee obtains no rights under this Article and has only the rights of a partial assignee.

§ 3–204. Indorsement.

(a) "Indorsement" means a signature, other than that of a signer as maker, drawer, or acceptor, that alone or accompanied by other words is made on an instrument for the purpose of (i) negotiating the instrument, (ii) restricting payment of the instrument, or (iii) incurring indorser's liability on the instrument, but regardless of the intent of the signer, a signature and its accompanying words is an indorsement unless the accompanying words, terms of the instrument, place of the signature, or other circumstances unambiguously indicate that the signature was made for a purpose other than indorsement. For the purpose of determining whether a signature is made on an instrument, a paper affixed to the instrument is a part of the instrument.

(b) "Indorser" means a person who makes an indorsement.

(c) For the purpose of determining whether the transferee of an instrument is a holder, an indorsement that transfers a security interest in the instrument is effective as an unqualified indorsement of the instrument.

(d) If an instrument is payable to a holder under a name that is not the name of the holder, indorsement may be made by the holder in the name stated in the instrument or in the holder's name or both, but signature in both names may be required by a person paying or taking the instrument for value or collection.

§ 3–205. Special Indorsement; Blank Indorsement; Anomalous Indorsement.

(a) If an indorsement is made by the holder of an instrument, whether payable to an identified person or payable to bearer, and the indorsement identifies a person to whom it makes the instrument payable, it is a "special indorsement." When specially indorsed, an instrument becomes payable to the identified person and may be negotiated only by the indorsement of that person. The principles stated in Section 3–110 apply to special indorsements.

(b) If an indorsement is made by the holder of an instrument and it is not a special indorsement, it is a "blank indorsement." When indorsed in blank, an instrument becomes payable to bearer and may be negotiated by transfer of possession alone until specially indorsed.

(c) The holder may convert a blank indorsement that consists only of a signature into a special indorsement by writing, above the signature of the indorser, words identifying the person to whom the instrument is made payable.

(d) "Anomalous indorsement" means an indorsement made by a person who is not the holder of the instrument. An anomalous indorsement does not affect the manner in which the instrument may be negotiated.

§ 3–206. Restrictive Indorsement.

(a) An indorsement limiting payment to a particular person or otherwise prohibiting further transfer or negotiation of the instrument is not effective to prevent further transfer or negotiation of the instrument.

(b) An indorsement stating a condition to the right of the indorsee to receive payment does not affect the right of the indorsee to enforce the instrument. A person paying the instrument or taking it for value or collection may disregard the condition, and the rights and liabilities of that person are not affected by whether the condition has been fulfilled.

(c) If an instrument bears an indorsement (i) described in Section 4–201(b), or (ii) in blank or to a particular bank using the words "for deposit," "for collection," or other words indicating a purpose of having the instrument collected by a bank for the indorser or for a particular account, the following rules apply:

(1) A person, other than a bank, who purchases the instrument when so indorsed converts the instrument unless the amount paid for the instrument is received by the indorser or applied consistently with the indorsement.

(2) A depositary bank that purchases the instrument or takes it for collection when so indorsed converts the instrument unless the amount paid by the bank with respect to the instrument is received by the indorser or applied consistently with the indorsement.

(3) A payor bank that is also the depositary bank or that takes the instrument for immediate payment over the counter from a person other than a collecting bank converts the instrument unless the proceeds of the instrument are received by the indorser or applied consistently with the indorsement.

(4) Except as otherwise provided in paragraph (3), a payor bank or intermediary bank may disregard the indorsement and is not liable if the proceeds of the instrument are not received by the indorser or applied consistently with the indorsement.

(d) Except for an indorsement covered by subsection (c), if an instrument bears an indorsement using words to the effect that payment is to be made to the indorsee as agent, trustee, or other fiduciary for the benefit of the indorser or another person, the following rules apply:

(1) Unless there is notice of breach of fiduciary duty as provided in Section 3–307, a person who purchases the instrument from the indorsee or takes the instrument from the indorsee for collection or payment may pay the proceeds of payment or the value given for the instrument to the indorsee without regard to whether the indorsee violates a fiduciary duty to the indorser.

(2) A subsequent transferee of the instrument or person who pays the instrument is neither given notice nor otherwise affected by the restriction in the indorsement unless the transferee or payor knows that the fiduciary dealt with the instrument or its proceeds in breach of fiduciary duty.

(e) The presence on an instrument of an indorsement to which this section applies does not prevent a purchaser of the instrument from becoming a holder in due course of the instrument unless the purchaser is a converter under subsection (c) or has notice or knowledge of breach of fiduciary duty as stated in subsection (d).

(f) In an action to enforce the obligation of a party to pay the instrument, the obligor has a defense if payment would violate an indorsement to which this section applies and the payment is not permitted by this section.

§ 3–207. Reacquisition.

Reacquisition of an instrument occurs if it is transferred to a former holder, by negotiation or otherwise. A former holder who reacquires the instrument may cancel indorsements made after the reacquirer first became a holder of the instrument. If the cancellation causes the instrument to be payable to the reacquirer or to bearer, the reacquirer may negotiate the instrument. An indorser whose indorsement is canceled is discharged, and the discharge is effective against any subsequent holder.

PART 3 Enforcement of Instruments

§ 3–301. Person Entitled to Enforce Instrument.

"Person entitled to enforce" an instrument means (i) the holder of the instrument, (ii) a nonholder in possession of the instrument who has the rights of a holder, or (iii) a person not in possession of the instrument who is entitled to enforce the instrument pursuant to Section 3–309 or 3–418(d). A person may be a person entitled to enforce the instrument even though the person is not the owner of the instrument or is in wrongful possession of the instrument.

§ 3–302. Holder in Due Course.

(a) Subject to subsection (c) and Section 3–106(d), "holder in due course" means the holder of an instrument if:

(1) the instrument when issued or negotiated to the holder does not bear such apparent evidence of forgery or alteration or is not otherwise so irregular or incomplete as to call into question its authenticity; and

(2) the holder took the instrument (i) for value, (ii) in good faith, (iii) without notice that the instrument is overdue or has been dishonored or that there is an uncured default with respect to payment of another instrument issued as part of the same series, (iv) without notice that the instrument contains an unauthorized signature or has been altered, (v) without notice of any claim to the instrument described in Section 3–306, and (vi) without notice that any party has a defense or claim in recoupment described in Section 3–305(a).

(b) Notice of discharge of a party, other than discharge in an insolvency proceeding, is not notice of a defense under subsection (a), but discharge is effective against a person who became a holder in due course with notice of the discharge. Public filing or recording of a document does not of itself constitute notice of a defense, claim in recoupment, or claim to the instrument.

(c) Except to the extent a transferor or predecessor in interest has rights as a holder in due course, a person does not acquire rights of a holder in due course of an instrument taken (i) by legal process or by purchase in an execution, bankruptcy, or creditor's sale or similar proceeding, (ii) by purchase as part of a bulk transaction not in ordinary course of business of the transferor, or (iii) as the successor in interest to an estate or other organization.

(d) If, under Section 3–303(a)(1), the promise of performance that is the consideration for an instrument has been partially performed, the holder may assert rights as a holder in due course of the instrument only to the fraction of the amount payable under the instrument equal to the value of the partial performance divided by the value of the promised performance.

(e) If (i) the person entitled to enforce an instrument has only a security interest in the instrument and (ii) the person obliged to pay the instrument has a defense, claim in recoupment, or claim to the instrument that may be asserted against the person who granted the security interest, the person entitled to enforce the instrument may assert rights as a holder in due course only to an amount payable under the instrument which, at the time of enforcement of the instrument, does not exceed the amount of the unpaid obligation secured.

(f) To be effective, notice must be received at a time and in a manner that gives a reasonable opportunity to act on it.

(g) This section is subject to any law limiting status as a holder in due course in particular classes of transactions.

§ 3-303. Value and Consideration.

(a) An instrument is issued or transferred for value if:

(1) the instrument is issued or transferred for a promise of performance, to the extent the promise has been performed;

(2) the transferee acquires a security interest or other lien in the instrument other than a lien obtained by judicial proceeding;

(3) the instrument is issued or transferred as payment of, or as security for, an antecedent claim against any person, whether or not the claim is due;

(4) the instrument is issued or transferred in exchange for a negotiable instrument; or

(5) the instrument is issued or transferred in exchange for the incurring of an irrevocable obligation to a third party by the person taking the instrument.

(b) "Consideration" means any consideration sufficient to support a simple contract. The drawer or maker of an instrument has a defense if the instrument is issued without consideration. If an instrument is issued for a promise of performance, the issuer has a defense to the extent performance of the promise is due and the promise has not been performed. If an instrument is issued for value as stated in subsection (a), the instrument is also issued for consideration.

§ 3-304. Overdue Instrument.

(a) An instrument payable on demand becomes overdue at the earliest of the following times:

(1) on the day after the day demand for payment is duly made;

(2) if the instrument is a check, 90 days after its date; or

(3) if the instrument is not a check, when the instrument has been outstanding for a period of time after its date which is unreasonably long under the circumstances of the particular case in light of the nature of the instrument and usage of the trade.

(b) With respect to an instrument payable at a definite time the following rules apply:

(1) If the principal is payable in installments and a due date has not been accelerated, the instrument becomes overdue upon default under the instrument for nonpayment of an installment, and the instrument remains overdue until the default is cured.

(2) If the principal is not payable in installments and the due date has not been accelerated, the instrument becomes overdue on the day after the due date.

(3) If a due date with respect to principal has been accelerated, the instrument becomes overdue on the day after the accelerated due date.

(c) Unless the due date of principal has been accelerated, an instrument does not become overdue if there is default in payment of interest but no default in payment of principal.

§ 3-305. Defenses and Claims in Recoupment.

(a) Except as stated in subsection (b), the right to enforce the obligation of a party to pay an instrument is subject to the following:

(1) a defense of the obligor based on (i) infancy of the obligor to the extent it is a defense to a simple contract, (ii) duress, lack of legal capacity, or illegality of the transaction which, under other law, nullifies the obligation of the obligor, (iii) fraud that induced the obligor to sign the instrument with neither knowledge nor reasonable opportunity to learn of its character or its essential terms, or (iv) discharge of the obligor in insolvency proceedings;

(2) a defense of the obligor stated in another section of this Article or a defense of the obligor that would be available if the person entitled to enforce the instrument were enforcing a right to payment under a simple contract; and

(3) a claim in recoupment of the obligor against the original payee of the instrument if the claim arose from the transaction that gave rise to the instrument; but the claim of the obligor may be asserted against a transferee of the instrument only to reduce the amount owing on the instrument at the time the action is brought.

(b) The right of a holder in due course to enforce the obligation of a party to pay the instrument is subject to defenses of the obligor stated in subsection (a)(1), but is not subject to defenses of the obligor stated in subsection (a)(2) or claims in recoupment stated in subsection (a)(3) against a person other than the holder.

(c) Except as stated in subsection (d), in an action to enforce the obligation of a party to pay the instrument, the obligor may not assert against the person entitled to enforce the instrument a defense, claim in recoupment, or claim to the instrument (Section 3-306) of another person, but the other person's claim to the instrument may be asserted by the obligor if the other person is joined in the action and personally asserts the claim against the person entitled to enforce the instrument. An obligor is not obliged to pay the instrument if the person seeking enforcement of the instrument does not have rights of a holder in due course and the obligor proves that the instrument is a lost or stolen instrument.

(d) In an action to enforce the obligation of an accommodation party to pay an instrument, the accommodation party may assert against the person entitled to enforce the

instrument any defense or claim in recoupment under subsection (a) that the accommodated party could assert against the person entitled to enforce the instrument, except the defenses of discharge in insolvency proceedings, infancy, and lack of legal capacity.

§ 3–306. Claims to an Instrument.

A person taking an instrument, other than a person having rights of a holder in due course, is subject to a claim of a property or possessory right in the instrument or its proceeds, including a claim to rescind a negotiation and to recover the instrument or its proceeds. A person having rights of a holder in due course takes free of the claim to the instrument.

§ 3–307. Notice of Breach of Fiduciary Duty.

(a) In this section:

(1) "Fiduciary" means an agent, trustee, partner, corporate officer or director, or other representative owing a fiduciary duty with respect to an instrument.

(2) "Represented person" means the principal, beneficiary, partnership, corporation, or other person to whom the duty stated in paragraph (1) is owed.

(b) If (i) an instrument is taken from a fiduciary for payment or collection or for value, (ii) the taker has knowledge of the fiduciary status of the fiduciary, and (iii) the represented person makes a claim to the instrument or its proceeds on the basis that the transaction of the fiduciary is a breach of fiduciary duty, the following rules apply:

(1) Notice of breach of fiduciary duty by the fiduciary is notice of the claim of the represented person.

(2) In the case of an instrument payable to the represented person or the fiduciary as such, the taker has notice of the breach of fiduciary duty if the instrument is (i) taken in payment of or as security for a debt known by the taker to be the personal debt of the fiduciary, (ii) taken in a transaction known by the taker to be for the personal benefit of the fiduciary, or (iii) deposited to an account other than an account of the fiduciary, as such, or an account of the represented person.

(3) If an instrument is issued by the represented person or the fiduciary as such, and made payable to the fiduciary personally, the taker does not have notice of the breach of fiduciary duty unless the taker knows of the breach of fiduciary duty.

(4) If an instrument is issued by the represented person or the fiduciary as such, to the taker as payee, the taker has notice of the breach of fiduciary duty if the instrument is (i) taken in payment of or as security for a debt known by the taker to be the personal debt of the fiduciary, (ii) taken in a transaction known by the taker to be for the personal benefit of the fiduciary, or (iii) deposited to an account other than an account of the fiduciary, as such, or an account of the represented person.

§ 3–308. Proof of Signatures and Status as Holder in Due Course.

(a) In an action with respect to an instrument, the authenticity of, and authority to make, each signature on the instrument is admitted unless specifically denied in the pleadings. If the validity of a signature is denied in the pleadings, the burden of establishing validity is on the person claiming validity, but the signature is presumed to be authentic and authorized unless the action is to enforce the liability of the purported signer and the signer is dead or incompetent at the time of trial of the issue of validity of the signature. If an action to enforce the instrument is brought against a person as the undisclosed principal of a person who signed the instrument as a party to the instrument, the plaintiff has the burden of establishing that the defendant is liable on the instrument as a represented person under Section 3–402(a).

(b) If the validity of signatures is admitted or proved and there is compliance with subsection (a), a plaintiff producing the instrument is entitled to payment if the plaintiff proves entitlement to enforce the instrument under Section 3–301, unless the defendant proves a defense or claim in recoupment. If a defense or claim in recoupment is proved, the right to payment of the plaintiff is subject to the defense or claim, except to the extent the plaintiff proves that the plaintiff has rights of a holder in due course which are not subject to the defense or claim.

§ 3–309. Enforcement of Lost, Destroyed, or Stolen Instrument.

(a) A person not in possession of an instrument is entitled to enforce the instrument if (i) the person was in possession of the instrument and entitled to enforce it when loss of possession occurred, (ii) the loss of possession was not the result of a transfer by the person or a lawful seizure, and (iii) the person cannot reasonably obtain possession of the instrument because the instrument was destroyed, its whereabouts cannot be determined, or it is in the wrongful possession of an unknown person or a person that cannot be found or is not amenable to service of process.

(b) A person seeking enforcement of an instrument under subsection (a) must prove the terms of the instrument and the person's right to enforce the instrument. If that proof is made, Section 3–308 applies to the case as if the person seeking enforcement had produced the instrument. The court may not enter judgment in favor of the person seeking enforcement unless it finds that the person required to pay the instrument is adequately protected against loss that might occur by reason of a claim by another person to enforce the instrument. Adequate protection may be provided by any reasonable means.

§ 3–310. Effect of Instrument on Obligation for Which Taken.

(a) Unless otherwise agreed, if a certified check, cashier's check, or teller's check is taken for an obligation, the obligation is discharged to the same extent discharge would result if an

amount of money equal to the amount of the instrument were taken in payment of the obligation. Discharge of the obligation does not affect any liability that the obligor may have as an indorser of the instrument.

(b) Unless otherwise agreed and except as provided in subsection (a), if a note or an uncertified check is taken for an obligation, the obligation is suspended to the same extent the obligation would be discharged if an amount of money equal to the amount of the instrument were taken, and the following rules apply:

(1) In the case of an uncertified check, suspension of the obligation continues until dishonor of the check or until it is paid or certified. Payment or certification of the check results in discharge of the obligation to the extent of the amount of the check.

(2) In the case of a note, suspension of the obligation continues until dishonor of the note or until it is paid. Payment of the note results in discharge of the obligation to the extent of the payment.

(3) Except as provided in paragraph (4), if the check or note is dishonored and the obligee of the obligation for which the instrument was taken is the person entitled to enforce the instrument, the obligee may enforce either the instrument or the obligation. In the case of an instrument of a third person which is negotiated to the obligee by the obligor, discharge of the obligor on the instrument also discharges the obligation.

(4) If the person entitled to enforce the instrument taken for an obligation is a person other than the obligee, the obligee may not enforce the obligation to the extent the obligation is suspended. If the obligee is the person entitled to enforce the instrument but no longer has possession of it because it was lost, stolen, or destroyed, the obligation may not be enforced to the extent of the amount payable on the instrument, and to that extent the obligee's rights against the obligor are limited to enforcement of the instrument.

(c) If an instrument other than one described in subsection (a) or (b) is taken for an obligation, the effect is (i) that stated in subsection (a) if the instrument is one on which a bank is liable as maker or acceptor, or (ii) that stated in subsection (b) in any other case.

§ 3–311. Accord and Satisfaction by Use of Instrument.

(a) If a person against whom a claim is asserted proves that (i) that person in good faith tendered an instrument to the claimant as full satisfaction of the claim, (ii) the amount of the claim was unliquidated or subject to a bona fide dispute, and (iii) the claimant obtained payment of the instrument, the following subsections apply.

(b) Unless subsection (c) applies, the claim is discharged if the person against whom the claim is asserted proves that the instrument or an accompanying written communication contained a conspicuous statement to the effect that the instrument was tendered as full satisfaction of the claim.

(c) Subject to subsection (d), a claim is not discharged under subsection (b) if either of the following applies:

(1) The claimant, if an organization, proves that (i) within a reasonable time before the tender, the claimant sent a conspicuous statement to the person against whom the claim is asserted that communications concerning disputed debts, including an instrument tendered as full satisfaction of a debt, are to be sent to a designated person, office, or place, and (ii) the instrument or accompanying communication was not received by that designated person, office, or place.

(2) The claimant, whether or not an organization, proves that within 90 days after payment of the instrument, the claimant tendered repayment of the amount of the instrument to the person against whom the claim is asserted. This paragraph does not apply if the claimant is an organization that sent a statement complying with paragraph (1)(i).

(d) A claim is discharged if the person against whom the claim is asserted proves that within a reasonable time before collection of the instrument was initiated, the claimant, or an agent of the claimant having direct responsibility with respect to the disputed obligation, knew that the instrument was tendered in full satisfaction of the claim.

§ 3–312. Lost, Destroyed, or Stolen Cashier's Check, Teller's Check, or Certified Check.*

(a) In this section:

(1) "Check" means a cashier's check, teller's check, or certified check.

(2) "Claimant" means a person who claims the right to receive the amount of a cashier's check, teller's check, or certified check that was lost, destroyed, or stolen.

(3) "Declaration of loss" means a written statement, made under penalty of perjury, to the effect that (i) the declarer lost possession of a check, (ii) the declarer is the drawer or payee of the check, in the case of a certified check, or the remitter or payee of the check, in the case of a cashier's check or teller's check, (iii) the loss of possession was not the result of a transfer by the declarer or a lawful seizure, and (iv) the declarer cannot reasonably obtain possession of the check because the check was destroyed, its whereabouts cannot be determined, or it is in the wrongful possession of an unknown person or a person that cannot be found or is not amenable to service of process.

(4) "Obligated bank" means the issuer of a cashier's check or teller's check or the acceptor of a certified check.

(b) A claimant may assert a claim to the amount of a check by a communication to the obligated bank describing the check with reasonable certainty and requesting payment of the amount of the check, if (i) the claimant is the drawer or payee of a certified check or the remitter or payee of a cashier's check or teller's check, (ii) the communication contains or is accompanied by a declaration of loss of the claimant with respect to the check, (iii) the communication is received at a time and in a manner affording the bank a reasonable time to act on it before the

check is paid, and (iv) the claimant provides reasonable identification if requested by the obligated bank. Delivery of a declaration of loss is a warranty of the truth of the statements made in the declaration. If a claim is asserted in compliance with this subsection, the following rules apply:

(1) The claim becomes enforceable at the later of (i) the time the claim is asserted, or (ii) the 90th day following the date of the check, in the case of a cashier's check or teller's check, or the 90th day following the date of the acceptance, in the case of a certified check.

(2) Until the claim becomes enforceable, it has no legal effect and the obligated bank may pay the check or, in the case of a teller's check, may permit the drawee to pay the check. Payment to a person entitled to enforce the check discharges all liability of the obligated bank with respect to the check.

(3) If the claim becomes enforceable before the check is presented for payment, the obligated bank is not obliged to pay the check.

(4) When the claim becomes enforceable, the obligated bank becomes obliged to pay the amount of the check to the claimant if payment of the check has not been made to a person entitled to enforce the check. Subject to Section 4–302(a)(1), payment to the claimant discharges all liability of the obligated bank with respect to the check.

(c) If the obligated bank pays the amount of a check to a claimant under subsection (b)(4) and the check is presented for payment by a person having rights of a holder in due course, the claimant is obliged to (i) refund the payment to the obligated bank if the check is paid, or (ii) pay the amount of the check to the person having rights of a holder in due course if the check is dishonored.

(d) If a claimant has the right to assert a claim under subsection (b) and is also a person entitled to enforce a cashier's check, teller's check, or certified check which is lost, destroyed, or stolen, the claimant may assert rights with respect to the check either under this section or Section 3–309.

Added in 1991.

PART 4 Liability of Parties

§ 3–401. Signature.

(a) A person is not liable on an instrument unless (i) the person signed the instrument, or (ii) the person is represented by an agent or representative who signed the instrument and the signature is binding on the represented person under Section 3–402.

(b) A signature may be made (i) manually or by means of a device or machine, and (ii) by the use of any name, including a trade or assumed name, or by a word, mark, or symbol executed or adopted by a person with present intention to authenticate a writing.

§ 3–402. Signature by Representative.

(a) If a person acting, or purporting to act, as a representative signs an instrument by signing either the name of the represented person or the name of the signer, the represented person is bound by the signature to the same extent the represented person would be bound if the signature were on a simple contract. If the represented person is bound, the signature of the representative is the "authorized signature of the represented person" and the represented person is liable on the instrument, whether or not identified in the instrument.

(b) If a representative signs the name of the representative to an instrument and the signature is an authorized signature of the represented person, the following rules apply:

(1) If the form of the signature shows unambiguously that the signature is made on behalf of the represented person who is identified in the instrument, the representative is not liable on the instrument.

(2) Subject to subsection (c), if (i) the form of the signature does not show unambiguously that the signature is made in a representative capacity or (ii) the represented person is not identified in the instrument, the representative is liable on the instrument to a holder in due course that took the instrument without notice that the representative was not intended to be liable on the instrument. With respect to any other person, the representative is liable on the instrument unless the representative proves that the original parties did not intend the representative to be liable on the instrument.

(c) If a representative signs the name of the representative as drawer of a check without indication of the representative status and the check is payable from an account of the represented person who is identified on the check, the signer is not liable on the check if the signature is an authorized signature of the represented person.

§ 3–403. Unauthorized Signature.

(a) Unless otherwise provided in this Article or Article 4, an unauthorized signature is ineffective except as the signature of the unauthorized signer in favor of a person who in good faith pays the instrument or takes it for value. An unauthorized signature may be ratified for all purposes of this Article.

(b) If the signature of more than one person is required to constitute the authorized signature of an organization, the signature of the organization is unauthorized if one of the required signatures is lacking.

(c) The civil or criminal liability of a person who makes an unauthorized signature is not affected by any provision of this Article which makes the unauthorized signature effective for the purposes of this Article.

§ 3–404. Impostors; Fictitious Payees.

(a) If an impostor, by use of the mails or otherwise, induces the issuer of an instrument to issue the instrument to the impostor, or to a person acting in concert with the impostor, by impersonating the payee of the instrument or a person authorized to act for the payee, an indorsement of the instrument by any person in the name of the payee is effective as the indorsement of

the payee in favor of a person who, in good faith, pays the instrument or takes it for value or for collection.

(b) If (i) a person whose intent determines to whom an instrument is payable (Section 3–110(a) or (b)) does not intend the person identified as payee to have any interest in the instrument, or (ii) the person identified as payee of an instrument is a fictitious person, the following rules apply until the instrument is negotiated by special indorsement:

(1) Any person in possession of the instrument is its holder.
(2) An indorsement by any person in the name of the payee stated in the instrument is effective as the indorsement of the payee in favor of a person who, in good faith, pays the instrument or takes it for value or for collection.

(c) Under subsection (a) or (b), an indorsement is made in the name of a payee if (i) it is made in a name substantially similar to that of the payee or (ii) the instrument, whether or not indorsed, is deposited in a depositary bank to an account in a name substantially similar to that of the payee.

(d) With respect to an instrument to which subsection (a) or (b) applies, if a person paying the instrument or taking it for value or for collection fails to exercise ordinary care in paying or taking the instrument and that failure substantially contributes to loss resulting from payment of the instrument, the person bearing the loss may recover from the person failing to exercise ordinary care to the extent the failure to exercise ordinary care contributed to the loss.

§ 3–405. Employer's Responsibility for Fraudulent Indorsement by Employee.

(a) In this section:

(1) "Employee" includes an independent contractor and employee of an independent contractor retained by the employer.
(2) "Fraudulent indorsement" means (i) in the case of an instrument payable to the employer, a forged indorsement purporting to be that of the employer, or (ii) in the case of an instrument with respect to which the employer is the issuer, a forged indorsement purporting to be that of the person identified as payee.
(3) "Responsibility" with respect to instruments means authority (i) to sign or indorse instruments on behalf of the employer, (ii) to process instruments received by the employer for bookkeeping purposes, for deposit to an account, or for other disposition, (iii) to prepare or process instruments for issue in the name of the employer, (iv) to supply information determining the names or addresses of payees of instruments to be issued in the name of the employer, (v) to control the disposition of instruments to be issued in the name of the employer, or (vi) to act otherwise with respect to instruments in a responsible capacity. "Responsibility" does not include authority that merely allows an employee to have access to instruments or blank or incomplete instrument forms that are being stored or transported or are part of incoming or outgoing mail, or similar access.

(b) For the purpose of determining the rights and liabilities of a person who, in good faith, pays an instrument or takes it for value or for collection, if an employer entrusted an employee with responsibility with respect to the instrument and the employee or a person acting in concert with the employee makes a fraudulent indorsement of the instrument, the indorsement is effective as the indorsement of the person to whom the instrument is payable if it is made in the name of that person. If the person paying the instrument or taking it for value or for collection fails to exercise ordinary care in paying or taking the instrument and that failure substantially contributes to loss resulting from the fraud, the person bearing the loss may recover from the person failing to exercise ordinary care to the extent the failure to exercise ordinary care contributed to the loss.

(c) Under subsection (b), an indorsement is made in the name of the person to whom an instrument is payable if (i) it is made in a name substantially similar to the name of that person or (ii) the instrument, whether or not indorsed, is deposited in a depositary bank to an account in a name substantially similar to the name of that person.

§ 3–406. Negligence Contributing to Forged Signature or Alteration of Instrument.

(a) A person whose failure to exercise ordinary care substantially contributes to an alteration of an instrument or to the making of a forged signature on an instrument is precluded from asserting the alteration or the forgery against a person who, in good faith, pays the instrument or takes it for value or for collection.

(b) Under subsection (a), if the person asserting the preclusion fails to exercise ordinary care in paying or taking the instrument and that failure substantially contributes to loss, the loss is allocated between the person precluded and the person asserting the preclusion according to the extent to which the failure of each to exercise ordinary care contributed to the loss.

(c) Under subsection (a), the burden of proving failure to exercise ordinary care is on the person asserting the preclusion. Under subsection (b), the burden of proving failure to exercise ordinary care is on the person precluded.

§ 3–407. Alteration.

(a) "Alteration" means (i) an unauthorized change in an instrument that purports to modify in any respect the obligation of a party, or (ii) an unauthorized addition of words or numbers or other change to an incomplete instrument relating to the obligation of a party.

(b) Except as provided in subsection (c), an alteration fraudulently made discharges a party whose obligation is affected by the alteration unless that party assents or is precluded from asserting the alteration. No other alteration discharges a party, and the instrument may be enforced according to its original terms.

(c) A payor bank or drawee paying a fraudulently altered instrument or a person taking it for value, in good faith and without notice of the alteration, may enforce rights with respect

to the instrument (i) according to its original terms, or (ii) in the case of an incomplete instrument altered by unauthorized completion, according to its terms as completed.

§ 3–408. Drawee Not Liable on Unaccepted Draft.

A check or other draft does not of itself operate as an assignment of funds in the hands of the drawee available for its payment, and the drawee is not liable on the instrument until the drawee accepts it.

§ 3–409. Acceptance of Draft; Certified Check.

(a) "Acceptance" means the drawee's signed agreement to pay a draft as presented. It must be written on the draft and may consist of the drawee's signature alone. Acceptance may be made at any time and becomes effective when notification pursuant to instructions is given or the accepted draft is delivered for the purpose of giving rights on the acceptance to any person.

(b) A draft may be accepted although it has not been signed by the drawer, is otherwise incomplete, is overdue, or has been dishonored.

(c) If a draft is payable at a fixed period after sight and the acceptor fails to date the acceptance, the holder may complete the acceptance by supplying a date in good faith.

(d) "Certified check" means a check accepted by the bank on which it is drawn. Acceptance may be made as stated in subsection (a) or by a writing on the check which indicates that the check is certified. The drawee of a check has no obligation to certify the check, and refusal to certify is not dishonor of the check.

§ 3–410. Acceptance Varying Draft.

(a) If the terms of a drawee's acceptance vary from the terms of the draft as presented, the holder may refuse the acceptance and treat the draft as dishonored. In that case, the drawee may cancel the acceptance.

(b) The terms of a draft are not varied by an acceptance to pay at a particular bank or place in the United States, unless the acceptance states that the draft is to be paid only at that bank or place.

(c) If the holder assents to an acceptance varying the terms of a draft, the obligation of each drawer and indorser that does not expressly assent to the acceptance is discharged.

§ 3–411. Refusal to Pay Cashier's Checks, Teller's Checks, and Certified Checks.

(a) In this section, "obligated bank" means the acceptor of a certified check or the issuer of a cashier's check or teller's check bought from the issuer.

(b) If the obligated bank wrongfully (i) refuses to pay a cashier's check or certified check, (ii) stops payment of a teller's check, or (iii) refuses to pay a dishonored teller's check, the person asserting the right to enforce the check is entitled to compensation for expenses and loss of interest resulting from the nonpayment and may recover consequential damages if the obligated bank refuses to pay after receiving notice of particular circumstances giving rise to the damages.

(c) Expenses or consequential damages under subsection (b) are not recoverable if the refusal of the obligated bank to pay occurs because (i) the bank suspends payments, (ii) the obligated bank asserts a claim or defense of the bank that it has reasonable grounds to believe is available against the person entitled to enforce the instrument, (iii) the obligated bank has a reasonable doubt whether the person demanding payment is the person entitled to enforce the instrument, or (iv) payment is prohibited by law.

§ 3–412. Obligation of Issuer of Note or Cashier's Check.

The issuer of a note or cashier's check or other draft drawn on the drawer is obliged to pay the instrument (i) according to its terms at the time it was issued or, if not issued, at the time it first came into possession of a holder, or (ii) if the issuer signed an incomplete instrument, according to its terms when completed, to the extent stated in Sections 3–115 and 3–407. The obligation is owed to a person entitled to enforce the instrument or to an indorser who paid the instrument under Section 3–415.

§ 3–413. Obligation of Acceptor.

(a) The acceptor of a draft is obliged to pay the draft (i) according to its terms at the time it was accepted, even though the acceptance states that the draft is payable "as originally drawn" or equivalent terms, (ii) if the acceptance varies the terms of the draft, according to the terms of the draft as varied, or (iii) if the acceptance is of a draft that is an incomplete instrument, according to its terms when completed, to the extent stated in Sections 3–115 and 3–407. The obligation is owed to a person entitled to enforce the draft or to the drawer or an indorser who paid the draft under Section 3–414 or 3–415.

(b) If the certification of a check or other acceptance of a draft states the amount certified or accepted, the obligation of the acceptor is that amount. If (i) the certification or acceptance does not state an amount, (ii) the amount of the instrument is subsequently raised, and (iii) the instrument is then negotiated to a holder in due course, the obligation of the acceptor is the amount of the instrument at the time it was taken by the holder in due course.

§ 3–414. Obligation of Drawer.

(a) This section does not apply to cashier's checks or other drafts drawn on the drawer.

(b) If an unaccepted draft is dishonored, the drawer is obliged to pay the draft (i) according to its terms at the time it

was issued or, if not issued, at the time it first came into possession of a holder, or (ii) if the drawer signed an incomplete instrument, according to its terms when completed, to the extent stated in Sections 3–115 and 3–407. The obligation is owed to a person entitled to enforce the draft or to an indorser who paid the draft under Section 3–415.

(c) If a draft is accepted by a bank, the drawer is discharged, regardless of when or by whom acceptance was obtained.

(d) If a draft is accepted and the acceptor is not a bank, the obligation of the drawer to pay the draft if the draft is dishonored by the acceptor is the same as the obligation of an indorser under Section 3–415(a) and (c).

(e) If a draft states that it is drawn "without recourse" or otherwise disclaims liability of the drawer to pay the draft, the drawer is not liable under subsection (b) to pay the draft if the draft is not a check. A disclaimer of the liability stated in subsection (b) is not effective if the draft is a check.

(f) If (i) a check is not presented for payment or given to a depositary bank for collection within 30 days after its date, (ii) the drawee suspends payments after expiration of the 30-day period without paying the check, and (iii) because of the suspension of payments, the drawer is deprived of funds maintained with the drawee to cover payment of the check, the drawer to the extent deprived of funds may discharge its obligation to pay the check by assigning to the person entitled to enforce the check the rights of the drawer against the drawee with respect to the funds.

§ 3–415. Obligation of Indorser.

(a) Subject to subsections (b), (c), and (d) and to Section 3–419(d), if an instrument is dishonored, an indorser is obliged to pay the amount due on the instrument (i) according to the terms of the instrument at the time it was indorsed, or (ii) if the indorser indorsed an incomplete instrument, according to its terms when completed, to the extent stated in Sections 3–115 and 3–407. The obligation of the indorser is owed to a person entitled to enforce the instrument or to a subsequent indorser who paid the instrument under this section.

(b) If an indorsement states that it is made "without recourse" or otherwise disclaims liability of the indorser, the indorser is not liable under subsection (a) to pay the instrument.

(c) If notice of dishonor of an instrument is required by Section 3–503 and notice of dishonor complying with that section is not given to an indorser, the liability of the indorser under subsection (a) is discharged.

(d) If a draft is accepted by a bank after an indorsement is made, the liability of the indorser under subsection (a) is discharged.

(e) If an indorser of a check is liable under subsection (a) and the check is not presented for payment, or given to a depositary bank for collection, within 30 days after the day the indorsement was made, the liability of the indorser under subsection (a) is discharged.

As amended in 1993.

§ 3–416. Transfer Warranties.

(a) A person who transfers an instrument for consideration warrants to the transferee and, if the transfer is by indorsement, to any subsequent transferee that:

(1) the warrantor is a person entitled to enforce the instrument;
(2) all signatures on the instrument are authentic and authorized;
(3) the instrument has not been altered;
(4) the instrument is not subject to a defense or claim in recoupment of any party which can be asserted against the warrantor; and
(5) the warrantor has no knowledge of any insolvency proceeding commenced with respect to the maker or acceptor or, in the case of an unaccepted draft, the drawer.

(b) A person to whom the warranties under subsection (a) are made and who took the instrument in good faith may recover from the warrantor as damages for breach of warranty an amount equal to the loss suffered as a result of the breach, but not more than the amount of the instrument plus expenses and loss of interest incurred as a result of the breach.

(c) The warranties stated in subsection (a) cannot be disclaimed with respect to checks. Unless notice of a claim for breach of warranty is given to the warrantor within 30 days after the claimant has reason to know of the breach and the identity of the warrantor, the liability of the warrantor under subsection (b) is discharged to the extent of any loss caused by the delay in giving notice of the claim.

(d) A [cause of action] for breach of warranty under this section accrues when the claimant has reason to know of the breach.

§ 3–417. Presentment Warranties.

(a) If an unaccepted draft is presented to the drawee for payment or acceptance and the drawee pays or accepts the draft, (i) the person obtaining payment or acceptance, at the time of presentment, and (ii) a previous transferor of the draft, at the time of transfer, warrant to the drawee making payment or accepting the draft in good faith that:

(1) the warrantor is, or was, at the time the warrantor transferred the draft, a person entitled to enforce the draft or authorized to obtain payment or acceptance of the draft on behalf of a person entitled to enforce the draft;
(2) the draft has not been altered; and
(3) the warrantor has no knowledge that the signature of the drawer of the draft is unauthorized.

(b) A drawee making payment may recover from any warrantor damages for breach of warranty equal to the amount paid by the drawee less the amount the drawee received or is entitled to receive from the drawer because of the payment. In addition, the drawee is entitled to compensation for expenses and loss of interest resulting from the breach. The right of the drawee to recover damages under this subsection is not affected by any failure of the drawee to exercise ordinary care in making payment. If the drawee accepts the draft, breach of warranty is a defense to the obligation of the acceptor. If the acceptor makes

payment with respect to the draft, the acceptor is entitled to recover from any warrantor for breach of warranty the amounts stated in this subsection.

(c) If a drawee asserts a claim for breach of warranty under subsection (a) based on an unauthorized indorsement of the draft or an alteration of the draft, the warrantor may defend by proving that the indorsement is effective under Section 3–404 or 3–405 or the drawer is precluded under Section 3–406 or 4–406 from asserting against the drawee the unauthorized indorsement or alteration.

(d) If (i) a dishonored draft is presented for payment to the drawer or an indorser or (ii) any other instrument is presented for payment to a party obliged to pay the instrument, and (iii) payment is received, the following rules apply:

(1) The person obtaining payment and a prior transferor of the instrument warrant to the person making payment in good faith that the warrantor is, or was, at the time the warrantor transferred the instrument, a person entitled to enforce the instrument or authorized to obtain payment on behalf of a person entitled to enforce the instrument.
(2) The person making payment may recover from any warrantor for breach of warranty an amount equal to the amount paid plus expenses and loss of interest resulting from the breach.

(e) The warranties stated in subsections (a) and (d) cannot be disclaimed with respect to checks. Unless notice of a claim for breach of warranty is given to the warrantor within 30 days after the claimant has reason to know of the breach and the identity of the warrantor, the liability of the warrantor under subsection (b) or (d) is discharged to the extent of any loss caused by the delay in giving notice of the claim.

(f) A [cause of action] for breach of warranty under this section accrues when the claimant has reason to know of the breach.

§ 3–418. Payment or Acceptance by Mistake.

(a) Except as provided in subsection (c), if the drawee of a draft pays or accepts the draft and the drawee acted on the mistaken belief that (i) payment of the draft had not been stopped pursuant to Section 4–403 or (ii) the signature of the drawer of the draft was authorized, the drawee may recover the amount of the draft from the person to whom or for whose benefit payment was made or, in the case of acceptance, may revoke the acceptance. Rights of the drawee under this subsection are not affected by failure of the drawee to exercise ordinary care in paying or accepting the draft.

(b) Except as provided in subsection (c), if an instrument has been paid or accepted by mistake and the case is not covered by subsection (a), the person paying or accepting may, to the extent permitted by the law governing mistake and restitution, (i) recover the payment from the person to whom or for whose benefit payment was made or (ii) in the case of acceptance, may revoke the acceptance.

(c) The remedies provided by subsection (a) or (b) may not be asserted against a person who took the instrument in good faith and for value or who in good faith changed position in reliance on the payment or acceptance. This subsection does not limit remedies provided by Section 3–417 or 4–407.

(d) Notwithstanding Section 4–215, if an instrument is paid or accepted by mistake and the payor or acceptor recovers payment or revokes acceptance under subsection (a) or (b), the instrument is deemed not to have been paid or accepted and is treated as dishonored, and the person from whom payment is recovered has rights as a person entitled to enforce the dishonored instrument.

§ 3–419. Instruments Signed for Accommodation.

(a) If an instrument is issued for value given for the benefit of a party to the instrument ("accommodated party") and another party to the instrument ("accommodation party") signs the instrument for the purpose of incurring liability on the instrument without being a direct beneficiary of the value given for the instrument, the instrument is signed by the accommodation party "for accommodation."

(b) An accommodation party may sign the instrument as maker, drawer, acceptor, or indorser and, subject to subsection (d), is obliged to pay the instrument in the capacity in which the accommodation party signs. The obligation of an accommodation party may be enforced notwithstanding any statute of frauds and whether or not the accommodation party receives consideration for the accommodation.

(c) A person signing an instrument is presumed to be an accommodation party and there is notice that the instrument is signed for accommodation if the signature is an anomalous indorsement or is accompanied by words indicating that the signer is acting as surety or guarantor with respect to the obligation of another party to the instrument. Except as provided in Section 3–605, the obligation of an accommodation party to pay the instrument is not affected by the fact that the person enforcing the obligation had notice when the instrument was taken by that person that the accommodation party signed the instrument for accommodation.

(d) If the signature of a party to an instrument is accompanied by words indicating unambiguously that the party is guaranteeing collection rather than payment of the obligation of another party to the instrument, the signer is obliged to pay the amount due on the instrument to a person entitled to enforce the instrument only if (i) execution of judgment against the other party has been returned unsatisfied, (ii) the other party is insolvent or in an insolvency proceeding, (iii) the other party cannot be served with process, or (iv) it is otherwise apparent that payment cannot be obtained from the other party.

(e) An accommodation party who pays the instrument is entitled to reimbursement from the accommodated party and is entitled to enforce the instrument against the accommodated party. An accommodated party who pays the instrument has no right of recourse against, and is not entitled to contribution from, an accommodation party.

§ 3–420. Conversion of Instrument.

(a) The law applicable to conversion of personal property applies to instruments. An instrument is also converted if it is taken by transfer, other than a negotiation, from a person not entitled to enforce the instrument or a bank makes or obtains payment with respect to the instrument for a person not entitled to enforce the instrument or receive payment. An action for conversion of an instrument may not be brought by (i) the issuer or acceptor of the instrument or (ii) a payee or indorsee who did not receive delivery of the instrument either directly or through delivery to an agent or a co-payee.

(b) In an action under subsection (a), the measure of liability is presumed to be the amount payable on the instrument, but recovery may not exceed the amount of the plaintiff's interest in the instrument.

(c) A representative, other than a depositary bank, who has in good faith dealt with an instrument or its proceeds on behalf of one who was not the person entitled to enforce the instrument is not liable in conversion to that person beyond the amount of any proceeds that it has not paid out.

PART 5 Dishonor

§ 3–501. Presentment.

(a) "Presentment" means a demand made by or on behalf of a person entitled to enforce an instrument (i) to pay the instrument made to the drawee or a party obliged to pay the instrument or, in the case of a note or accepted draft payable at a bank, to the bank, or (ii) to accept a draft made to the drawee.

(b) The following rules are subject to Article 4, agreement of the parties, and clearing-house rules and the like:

(1) Presentment may be made at the place of payment of the instrument and must be made at the place of payment if the instrument is payable at a bank in the United States; may be made by any commercially reasonable means, including an oral, written, or electronic communication; is effective when the demand for payment or acceptance is received by the person to whom presentment is made; and is effective if made to any one of two or more makers, acceptors, drawees, or other payors.

(2) Upon demand of the person to whom presentment is made, the person making presentment must (i) exhibit the instrument, (ii) give reasonable identification and, if presentment is made on behalf of another person, reasonable evidence of authority to do so, and (…) sign a receipt on the instrument for any payment made or surrender the instrument if full payment is made.

(3) Without dishonoring the instrument, the party to whom presentment is made may (i) return the instrument for lack of a necessary indorsement, or (ii) refuse payment or acceptance for failure of the presentment to comply with the terms of the instrument, an agreement of the parties, or other applicable law or rule.

(4) The party to whom presentment is made may treat presentment as occurring on the next business day after the day of presentment if the party to whom presentment is made has established a cut-off hour not earlier than 2 P.M. for the receipt and processing of instruments presented for payment or acceptance and presentment is made after the cut-off hour.

§ 3–502. Dishonor.

(a) Dishonor of a note is governed by the following rules:

(1) If the note is payable on demand, the note is dishonored if presentment is duly made to the maker and the note is not paid on the day of presentment.

(2) If the note is not payable on demand and is payable at or through a bank or the terms of the note require presentment, the note is dishonored if presentment is duly made and the note is not paid on the day it becomes payable or the day of presentment, whichever is later.

(3) If the note is not payable on demand and paragraph (2) does not apply, the note is dishonored if it is not paid on the day it becomes payable.

(b) Dishonor of an unaccepted draft other than a documentary draft is governed by the following rules:

(1) If a check is duly presented for payment to the payor bank otherwise than for immediate payment over the counter, the check is dishonored if the payor bank makes timely return of the check or sends timely notice of dishonor or nonpayment under Section 4–301 or 4–302, or becomes accountable for the amount of the check under Section 4–302.

(2) If a draft is payable on demand and paragraph (1) does not apply, the draft is dishonored if presentment for payment is duly made to the drawee and the draft is not paid on the day of presentment.

(3) If a draft is payable on a date stated in the draft, the draft is dishonored if (i) presentment for payment is duly made to the drawee and payment is not made on the day the draft becomes payable or the day of presentment, whichever is later, or (ii) presentment for acceptance is duly made before the day the draft becomes payable and the draft is not accepted on the day of presentment.

(4) If a draft is payable on elapse of a period of time after sight or acceptance, the draft is dishonored if presentment for acceptance is duly made and the draft is not accepted on the day of presentment.

(c) Dishonor of an unaccepted documentary draft occurs according to the rules stated in subsection (b)(2), (3), and (4), except that payment or acceptance may be delayed without dishonor until no later than the close of the third business day of the drawee following the day on which payment or acceptance is required by those paragraphs.

(d) Dishonor of an accepted draft is governed by the following rules:

(1) If the draft is payable on demand, the draft is dishonored if presentment for payment is duly made to the acceptor and the draft is not paid on the day of presentment.

(2) If the draft is not payable on demand, the draft is dishonored if presentment for payment is duly made to the acceptor and

payment is not made on the day it becomes payable or the day of presentment, whichever is later.

(e) In any case in which presentment is otherwise required for dishonor under this section and presentment is excused under Section 3–504, dishonor occurs without presentment if the instrument is not duly accepted or paid.

(f) If a draft is dishonored because timely acceptance of the draft was not made and the person entitled to demand acceptance consents to a late acceptance, from the time of acceptance the draft is treated as never having been dishonored.

§ 3–503. Notice of Dishonor.

(a) The obligation of an indorser stated in Section 3–415(a) and the obligation of a drawer stated in Section 3–414(d) may not be enforced unless (i) the indorser or drawer is given notice of dishonor of the instrument complying with this section or (ii) notice of dishonor is excused under Section 3–504(b).

(b) Notice of dishonor may be given by any person; may be given by any commercially reasonable means, including an oral, written, or electronic communication; and is sufficient if it reasonably identifies the instrument and indicates that the instrument has been dishonored or has not been paid or accepted. Return of an instrument given to a bank for collection is sufficient notice of dishonor.

(c) Subject to Section 3–504(c), with respect to an instrument taken for collection by a collecting bank, notice of dishonor must be given (i) by the bank before midnight of the next banking day following the banking day on which the bank receives notice of dishonor of the instrument, or (ii) by any other person within 30 days following the day on which the person receives notice of dishonor. With respect to any other instrument, notice of dishonor must be given within 30 days following the day on which dishonor occurs.

§ 3–504. Excused Presentment and Notice of Dishonor.

(a) Presentment for payment or acceptance of an instrument is excused if (i) the person entitled to present the instrument cannot with reasonable diligence make presentment, (ii) the maker or acceptor has repudiated an obligation to pay the instrument or is dead or in insolvency proceedings, (iii) by the terms of the instrument presentment is not necessary to enforce the obligation of indorsers or the drawer, (iv) the drawer or indorser whose obligation is being enforced has waived presentment or otherwise has no reason to expect or right to require that the instrument be paid or accepted, or (v) the drawer instructed the drawee not to pay or accept the draft or the drawee was not obligated to the drawer to pay the draft.

(b) Notice of dishonor is excused if (i) by the terms of the instrument notice of dishonor is not necessary to enforce the obligation of a party to pay the instrument, or (ii) the party whose obligation is being enforced waived notice of dishonor. A waiver of presentment is also a waiver of notice of dishonor.

(c) Delay in giving notice of dishonor is excused if the delay was caused by circumstances beyond the control of the person giving the notice and the person giving the notice exercised reasonable diligence after the cause of the delay ceased to operate.

§ 3–505. Evidence of Dishonor.

(a) The following are admissible as evidence and create a presumption of dishonor and of any notice of dishonor stated:

(1) a document regular in form as provided in subsection (b) which purports to be a protest;

(2) a purported stamp or writing of the drawee, payor bank, or presenting bank on or accompanying the instrument stating that acceptance or payment has been refused unless reasons for the refusal are stated and the reasons are not consistent with dishonor;

(3) a book or record of the drawee, payor bank, or collecting bank, kept in the usual course of business which shows dishonor, even if there is no evidence of who made the entry.

(b) A protest is a certificate of dishonor made by a United States consul or vice consul, or a notary public or other person authorized to administer oaths by the law of the place where dishonor occurs. It may be made upon information satisfactory to that person. The protest must identify the instrument and certify either that presentment has been made or, if not made, the reason why it was not made, and that the instrument has been dishonored by nonacceptance or nonpayment. The protest may also certify that notice of dishonor has been given to some or all parties.

PART 6 Discharge and Payment

§ 3–601. Discharge and Effect of Discharge.

(a) The obligation of a party to pay the instrument is discharged as stated in this Article or by an act or agreement with the party which would discharge an obligation to pay money under a simple contract.

(b) Discharge of the obligation of a party is not effective against a person acquiring rights of a holder in due course of the instrument without notice of the discharge.

§ 3–602. Payment.

(a) Subject to subsection (b), an instrument is paid to the extent payment is made (i) by or on behalf of a party obliged to pay the instrument, and (ii) to a person entitled to enforce the instrument. To the extent of the payment, the obligation of the party obliged to pay the instrument is discharged even though payment is made with knowledge of a claim to the instrument under Section 3–306 by another person.

(b) The obligation of a party to pay the instrument is not discharged under subsection (a) if:

(1) a claim to the instrument under Section 3–306 is enforceable against the party receiving payment and (i) payment is made

with knowledge by the payor that payment is prohibited by injunction or similar process of a court of competent jurisdiction, or (ii) in the case of an instrument other than a cashier's check, teller's check, or certified check, the party making payment accepted, from the person having a claim to the instrument, indemnity against loss resulting from refusal to pay the person entitled to enforce the instrument; or

(2) the person making payment knows that the instrument is a stolen instrument and pays a person it knows is in wrongful possession of the instrument.

§ 3–603. Tender of Payment.

(a) If tender of payment of an obligation to pay an instrument is made to a person entitled to enforce the instrument, the effect of tender is governed by principles of law applicable to tender of payment under a simple contract.

(b) If tender of payment of an obligation to pay an instrument is made to a person entitled to enforce the instrument and the tender is refused, there is discharge, to the extent of the amount of the tender, of the obligation of an indorser or accommodation party having a right of recourse with respect to the obligation to which the tender relates.

(c) If tender of payment of an amount due on an instrument is made to a person entitled to enforce the instrument, the obligation of the obligor to pay interest after the due date on the amount tendered is discharged. If presentment is required with respect to an instrument and the obligor is able and ready to pay on the due date at every place of payment stated in the instrument, the obligor is deemed to have made tender of payment on the due date to the person entitled to enforce the instrument.

§ 3–604. Discharge by Cancellation or Renunciation.

(a) A person entitled to enforce an instrument, with or without consideration, may discharge the obligation of a party to pay the instrument (i) by an intentional voluntary act, such as surrender of the instrument to the party, destruction, mutilation, or cancellation of the instrument, cancellation or striking out of the party's signature, or the addition of words to the instrument indicating discharge, or (ii) by agreeing not to sue or otherwise renouncing rights against the party by a signed writing.

(b) Cancellation or striking out of an indorsement pursuant to subsection (a) does not affect the status and rights of a party derived from the indorsement.

§ 3–605. Discharge of Indorsers and Accommodation Parties.

(a) In this section, the term "indorser" includes a drawer having the obligation described in Section 3–414(d).

(b) Discharge, under Section 3–604, of the obligation of a party to pay an instrument does not discharge the obligation of an indorser or accommodation party having a right of recourse against the discharged party.

(c) If a person entitled to enforce an instrument agrees, with or without consideration, to an extension of the due date of the obligation of a party to pay the instrument, the extension discharges an indorser or accommodation party having a right of recourse against the party whose obligation is extended to the extent the indorser or accommodation party proves that the extension caused loss to the indorser or accommodation party with respect to the right of recourse.

(d) If a person entitled to enforce an instrument agrees, with or without consideration, to a material modification of the obligation of a party other than an extension of the due date, the modification discharges the obligation of an indorser or accommodation party having a right of recourse against the person whose obligation is modified to the extent the modification causes loss to the indorser or accommodation party with respect to the right of recourse. The loss suffered by the indorser or accommodation party as a result of the modification is equal to the amount of the right of recourse unless the person enforcing the instrument proves that no loss was caused by the modification or that the loss caused by the modification was an amount less than the amount of the right of recourse.

(e) If the obligation of a party to pay an instrument is secured by an interest in collateral and a person entitled to enforce the instrument impairs the value of the interest in collateral, the obligation of an indorser or accommodation party having a right of recourse against the obligor is discharged to the extent of the impairment. The value of an interest in collateral is impaired to the extent (i) the value of the interest is reduced to an amount less than the amount of the right of recourse of the party asserting discharge, or (ii) the reduction in value of the interest causes an increase in the amount by which the amount of the right of recourse exceeds the value of the interest. The burden of proving impairment is on the party asserting discharge.

(f) If the obligation of a party is secured by an interest in collateral not provided by an accommodation party and a person entitled to enforce the instrument impairs the value of the interest in collateral, the obligation of any party who is jointly and severally liable with respect to the secured obligation is discharged to the extent the impairment causes the party asserting discharge to pay more than that party would have been obliged to pay, taking into account rights of contribution, if impairment had not occurred. If the party asserting discharge is an accommodation party not entitled to discharge under subsection (e), the party is deemed to have a right to contribution based on joint and several liability rather than a right to reimbursement. The burden of proving impairment is on the party asserting discharge.

(g) Under subsection (e) or (f), impairing value of an interest in collateral includes (i) failure to obtain or maintain perfection or recordation of the interest in collateral, (ii) release of collateral without substitution of collateral of equal value, (iii) failure to perform a duty to preserve the value of collateral owed, under Article 9 or other law, to a debtor or surety or other person secondarily liable, or (iv) failure to comply with applicable law in disposing of collateral.

(h) An accommodation party is not discharged under subsection (c), (d), or (e) unless the person entitled to enforce the instrument knows of the accommodation or has notice under Section 3–419(c) that the instrument was signed for accommodation.

(i) A party is not discharged under this section if (i) the party asserting discharge consents to the event or conduct that is the basis of the discharge, or (ii) the instrument or a separate agreement of the party provides for waiver of discharge under this section either specifically or by general language indicating that parties waive defenses based on suretyship or impairment of collateral.

ADDENDUM TO REVISED ARTICLE III

Notes to Legislative Counsel

1. If revised Article 3 is adopted in your state, the reference in Section 2–511 to Section 3–802 should be changed to Section 3–310.

2. If revised Article 3 is adopted in your state and the Uniform Fiduciaries Act is also in effect in your state, you may want to consider amending Uniform Fiduciaries Act § 9 to conform to Section 3–307(b)(2)(iii) and (4)(iii). See Official Comment 3 to Section 3–307.

REVISED ARTICLE IV

BANK DEPOSITS AND COLLECTIONS

PART 1 General Provisions and Definitions

§ 4–101. Short Title.

This Article may be cited as Uniform Commercial Code—Bank Deposits and Collections.

As amended in 1990.

§ 4–102. Applicability.

(a) To the extent that items within this Article are also within Articles 3 and 8, they are subject to those Articles. If there is conflict, this Article governs Article 3, but Article 8 governs this Article.

(b) The liability of a bank for action or non-action with respect to an item handled by it for purposes of presentment, payment, or collection is governed by the law of the place where the bank is located. In the case of action or non-action by or at a branch or separate office of a bank, its liability is governed by the law of the place where the branch or separate office is located.

§ 4–103. Variation by Agreement; Measure of Damages; Action Constituting Ordinary Care.

(a) The effect of the provisions of this Article may be varied by agreement, but the parties to the agreement cannot disclaim a bank's responsibility for its lack of good faith or failure to exercise ordinary care or limit the measure of damages for the lack or failure. However, the parties may determine by agreement the standards by which the bank's responsibility is to be measured if those standards are not manifestly unreasonable.

(b) Federal Reserve regulations and operating circulars, clearing-house rules, and the like have the effect of agreements under subsection (a), whether or not specifically assented to by all parties interested in items handled.

(c) Action or non-action approved by this Article or pursuant to Federal Reserve regulations or operating circulars is the exercise of ordinary care and, in the absence of special instructions, action or non-action consistent with clearing-house rules and the like or with a general banking usage not disapproved by this Article, is prima facie the exercise of ordinary care.

(d) The specification or approval of certain procedures by this Article is not disapproval of other procedures that may be reasonable under the circumstances.

(e) The measure of damages for failure to exercise ordinary care in handling an item is the amount of the item reduced by an amount that could not have been realized by the exercise of ordinary care. If there is also bad faith it includes any other damages the party suffered as a proximate consequence.

As amended in 1990.

§ 4–104. Definitions and Index of Definitions.

(a) In this Article, unless the context otherwise requires:

(1) "Account" means any deposit or credit account with a bank, including a demand, time, savings, passbook, share draft, or like account, other than an account evidenced by a certificate of deposit;

(2) "Afternoon" means the period of a day between noon and midnight;

(3) "Banking day" means the part of a day on which a bank is open to the public for carrying on substantially all of its banking functions;

(4) "Clearing house" means an association of banks or other payors regularly clearing items;

(5) "Customer" means a person having an account with a bank or for whom a bank has agreed to collect items, including a bank that maintains an account at another bank;

(6) "Documentary draft" means a draft to be presented for acceptance or payment if specified documents, certificated securities (Section 8–102) or instructions for uncertificated securities (Section 8–102), or other certificates, statements, or the like are to be received by the drawee or other payor before acceptance or payment of the draft;

(7) "Draft" means a draft as defined in Section 3–104 or an item, other than an instrument, that is an order;

(8) "Drawee" means a person ordered in a draft to make payment;

(9) "Item" means an instrument or a promise or order to pay money handled by a bank for collection or payment. The term does not include a payment order governed by Article 4A or a credit or debit card slip;

(10) "Midnight deadline" with respect to a bank is midnight on its next banking day following the banking day on which it receives the relevant item or notice or from which the time for taking action commences to run, whichever is later;

(11) "Settle" means to pay in cash, by clearing-house settlement, in a charge or credit or by remittance, or otherwise as agreed. A settlement may be either provisional or final;

(12) "Suspends payments" with respect to a bank means that it has been closed by order of the supervisory authorities, that a public officer has been appointed to take it over, or that it ceases or refuses to make payments in the ordinary course of business.

(b) [Other definitions' section references deleted.]

(c) [Other definitions' section references deleted.]

(d) In addition, Article 1 contains general definitions and principles of construction and interpretation applicable throughout this Article.

§ 4–105. "Bank"; "Depositary Bank"; "Payor Bank"; "Intermediary Bank"; "Collecting Bank"; "Presenting Bank".

In this Article:

(1) "Bank" means a person engaged in the business of banking, including a savings bank, savings and loan association, credit union, or trust company;

(2) "Depositary bank" means the first bank to take an item even though it is also the payor bank, unless the item is presented for immediate payment over the counter;

(3) "Payor bank" means a bank that is the drawee of a draft;

(4) "Intermediary bank" means a bank to which an item is transferred in course of collection except the depositary or payor bank;

(5) "Collecting bank" means a bank handling an item for collection except the payor bank;

(6) "Presenting bank" means a bank presenting an item except a payor bank.

§ 4–106. Payable Through or Payable at Bank: Collecting Bank.

(a) If an item states that it is "payable through" a bank identified in the item, (i) the item designates the bank as a collecting bank and does not by itself authorize the bank to pay the item, and (ii) the item may be presented for payment only by or through the bank.

Alternative A (b) If an item states that it is "payable at" a bank identified in the item, the item is equivalent to a draft drawn on the bank.

Alternative B (b) If an item states that it is "payable at" a bank identified in the item, (i) the item designates the bank as a collecting bank and does not by itself authorize the bank to pay the item, and (ii) the item may be presented for payment only by or through the bank.

(c) If a draft names a nonbank drawee and it is unclear whether a bank named in the draft is a co-drawee or a collecting bank, the bank is a collecting bank.

As added in 1990.

§ 4–107. Separate Office of Bank.

A branch or separate office of a bank is a separate bank for the purpose of computing the time within which and determining the place at or to which action may be taken or notices or orders shall be given under this Article and under Article 3.

As amended in 1962 and 1990.

§ 4–108. Time of Receipt of Items.

(a) For the purpose of allowing time to process items, prove balances, and make the necessary entries on its books to determine its position for the day, a bank may fix an afternoon hour of 2 P.M. or later as a cutoff hour for the handling of money and items and the making of entries on its books.

(b) An item or deposit of money received on any day after a cutoff hour so fixed or after the close of the banking day may be treated as being received at the opening of the next banking day.

As amended in 1990.

§ 4–109. Delays.

(a) Unless otherwise instructed, a collecting bank in a good faith effort to secure payment of a specific item drawn on a payor other than a bank, and with or without the approval of any person involved, may waive, modify, or extend time limits imposed or permitted by this [act] for a period not exceeding two additional banking days without discharge of drawers or indorsers or liability to its transferor or a prior party.

(b) Delay by a collecting bank or payor bank beyond time limits prescribed or permitted by this [act] or by instructions is excused if (i) the delay is caused by interruption of communication or computer facilities, suspension of payments by another bank, war, emergency conditions, failure of

equipment, or other circumstances beyond the control of the bank, and (ii) the bank exercises such diligence as the circumstances require.

§ 4–110. Electronic Presentment.

(a) "Agreement for electronic presentment" means an agreement, clearing-house rule, or Federal Reserve regulation or operating circular, providing that presentment of an item may be made by transmission of an image of an item or information describing the item ("presentment notice") rather than delivery of the item itself. The agreement may provide for procedures governing retention, presentment, payment, dishonor, and other matters concerning items subject to the agreement.

(b) Presentment of an item pursuant to an agreement for presentment is made when the presentment notice is received.

(c) If presentment is made by presentment notice, a reference to "item" or "check" in this Article means the presentment notice unless the context otherwise indicates.

As added in 1990.

§ 4–111. Statute of Limitations.

An action to enforce an obligation, duty, or right arising under this Article must be commenced within three years after the [cause of action] accrues.

As added in 1990.

PART 2 Collection of Items: Depositary and Collecting Banks

§ 4–201. Status of Collecting Bank as Agent and Provisional Status of Credits; Applicability of Article; Item Indorsed "Pay Any Bank".

(a) Unless a contrary intent clearly appears and before the time that a settlement given by a collecting bank for an item is or becomes final, the bank, with respect to an item, is an agent or sub-agent of the owner of the item and any settlement given for the item is provisional. This provision applies regardless of the form of indorsement or lack of indorsement and even though credit given for the item is subject to immediate withdrawal as of right or is in fact withdrawn; but the continuance of ownership of an item by its owner and any rights of the owner to proceeds of the item are subject to rights of a collecting bank, such as those resulting from outstanding advances on the item and rights of recoupment or setoff. If an item is handled by banks for purposes of presentment, payment, collection, or return, the relevant provisions of this Article apply even though action of the parties clearly establishes that a particular bank has purchased the item and is the owner of it.

(b) After an item has been indorsed with the words "pay any bank" or the like, only a bank may acquire the rights of a holder until the item has been:

(1) returned to the customer initiating collection; or

(2) specially indorsed by a bank to a person who is not a bank.

As amended in 1990.

§ 4–202. Responsibility for Collection or Return; When Action Timely.

(a) A collecting bank must exercise ordinary care in:

(1) presenting an item or sending it for presentment;

(2) sending notice of dishonor or nonpayment or returning an item other than a documentary draft to the bank's transferor after learning that the item has not been paid or accepted, as the case may be;

(3) settling for an item when the bank receives final settlement; and

(4) notifying its transferor of any loss or delay in transit within a reasonable time after discovery thereof.

(b) A collecting bank exercises ordinary care under subsection (a) by taking proper action before its midnight deadline following receipt of an item, notice, or settlement. Taking proper action within a reasonably longer time may constitute the exercise of ordinary care, but the bank has the burden of establishing timeliness.

(c) Subject to subsection (a)(1), a bank is not liable for the insolvency, neglect, misconduct, mistake, or default of another bank or person or for loss or destruction of an item in the possession of others or in transit.

As amended in 1990.

§ 4–203. Effect of Instructions.

Subject to Article 3 concerning conversion of instruments (Section 3–420) and restrictive indorsements (Section 3–206), only a collecting bank's transferor can give instructions that affect the bank or constitute notice to it, and a collecting bank is not liable to prior parties for any action taken pursuant to the instructions or in accordance with any agreement with its transferor.

§ 4–204. Methods of Sending and Presenting; Sending Directly to Payor Bank.

(a) A collecting bank shall send items by a reasonably prompt method, taking into consideration relevant instructions, the nature of the item, the number of those items on hand, the cost of collection involved, and the method generally used by it or others to present those items.

(b) A collecting bank may send:

(1) an item directly to the payor bank;

(2) an item to a nonbank payor if authorized by its transferor; and

(3) an item other than documentary drafts to a nonbank payor, if authorized by Federal Reserve regulation or operating circular, clearing-house rule, or the like.

(c) Presentment may be made by a presenting bank at a place where the payor bank or other payor has requested that presentment be made.

As amended in 1990.

§ 4–205. Depositary Bank Holder of Unindorsed Item.

If a customer delivers an item to a depositary bank for collection:

(1) the depositary bank becomes a holder of the item at the time it receives the item for collection if the customer at the time of delivery was a holder of the item, whether or not the customer indorses the item, and, if the bank satisfies the other requirements of Section 3–302, it is a holder in due course; and

(2) the depositary bank warrants to collecting banks, the payor bank or other payor, and the drawer that the amount of the item was paid to the customer or deposited to the customer's account.

As amended in 1990.

§ 4–206. Transfer Between Banks.

Any agreed method that identifies the transferor bank is sufficient for the item's further transfer to another bank.

As amended in 1990.

§ 4–207. Transfer Warranties.

(a) A customer or collecting bank that transfers an item and receives a settlement or other consideration warrants to the transferee and to any subsequent collecting bank that:

(1) the warrantor is a person entitled to enforce the item;

(2) all signatures on the item are authentic and authorized;

(3) the item has not been altered;

(4) the item is not subject to a defense or claim in recoupment (Section 3–305(a)) of any party that can be asserted against the warrantor; and

(5) the warrantor has no knowledge of any insolvency proceeding commenced with respect to the maker or acceptor or, in the case of an unaccepted draft, the drawer.

(b) If an item is dishonored, a customer or collecting bank transferring the item and receiving settlement or other consideration is obliged to pay the amount due on the item (i) according to the terms of the item at the time it was transferred, or (ii) if the transfer was of an incomplete item, according to its terms when completed as stated in Sections 3–115 and 3–407. The obligation of a transferor is owed to the transferee and to any subsequent collecting bank that takes the item in good faith. A transferor cannot disclaim its obligation under this subsection by an indorsement stating that it is made "without recourse" or otherwise disclaiming liability.

(c) A person to whom the warranties under subsection (a) are made and who took the item in good faith may recover from the warrantor as damages for breach of warranty an amount equal to the loss suffered as a result of the breach, but not more than the amount of the item plus expenses and loss of interest incurred as a result of the breach.

(d) The warranties stated in subsection (a) cannot be disclaimed with respect to checks. Unless notice of a claim for breach of warranty is given to the warrantor within 30 days after the claimant has reason to know of the breach and the identity of the warrantor, the warrantor is discharged to the extent of any loss caused by the delay in giving notice of the claim.

(e) A cause of action for breach of warranty under this section accrues when the claimant has reason to know of the breach.

As amended in 1990.

§ 4–208. Presentment Warranties.

(a) If an unaccepted draft is presented to the drawee for payment or acceptance and the drawee pays or accepts the draft, (i) the person obtaining payment or acceptance, at the time of presentment, and (ii) a previous transferor of the draft, at the time of transfer, warrant to the drawee that pays or accepts the draft in good faith that:

(1) the warrantor is, or was, at the time the warrantor transferred the draft, a person entitled to enforce the draft or authorized to obtain payment or acceptance of the draft on behalf of a person entitled to enforce the draft;

(2) the draft has not been altered; and

(3) the warrantor has no knowledge that the signature of the purported drawer of the draft is unauthorized.

(b) A drawee making payment may recover from a warrantor damages for breach of warranty equal to the amount paid by the drawee less the amount the drawee received or is entitled to receive from the drawer because of the payment. In addition, the drawee is entitled to compensation for expenses and loss of interest resulting from the breach. The right of the drawee to recover damages under this subsection is not affected by any failure of the drawee to exercise ordinary care in making payment. If the drawee accepts the draft (i) breach of warranty is a defense to the obligation of the acceptor, and (ii) if the acceptor makes payment with respect to the draft, the acceptor is entitled to recover from a warrantor for breach of warranty the amounts stated in this subsection.

(c) If a drawee asserts a claim for breach of warranty under subsection (a) based on an unauthorized indorsement of the draft or an alteration of the draft, the warrantor may defend by proving that the indorsement is effective under Section 3–404 or 3–405 or the drawer is precluded under Section 3–406 or 4–406 from asserting against the drawee the unauthorized indorsement or alteration.

(d) If (i) a dishonored draft is presented for payment to the drawer or an indorser or (ii) any other item is presented for payment to a party obliged to pay the item, and the item is paid, the person obtaining payment and a prior transferor of the item

warrant to the person making payment in good faith that the warrantor is, or was, at the time the warrantor transferred the item, a person entitled to enforce the item or authorized to obtain payment on behalf of a person entitled to enforce the item. The person making payment may recover from any warrantor for breach of warranty an amount equal to the amount paid plus expenses and loss of interest resulting from the breach.

(e) The warranties stated in subsections (a) and (d) cannot be disclaimed with respect to checks. Unless notice of a claim for breach of warranty is given to the warrantor within 30 days after the claimant has reason to know of the breach and the identity of the warrantor, the warrantor is discharged to the extent of any loss caused by the delay in giving notice of the claim.

(f) A cause of action for breach of warranty under this section accrues when the claimant has reason to know of the breach.

As amended in 1990.

§ 4-209. Encoding and Retention Warranties.

(a) A person who encodes information on or with respect to an item after issue warrants to any subsequent collecting bank and to the payor bank or other payor that the information is correctly encoded. If the customer of a depositary bank encodes, that bank also makes the warranty.

(b) A person who undertakes to retain an item pursuant to an agreement for electronic presentment warrants to any subsequent collecting bank and to the payor bank or other payor that retention and presentment of the item comply with the agreement. If a customer of a depositary bank undertakes to retain an item, that bank also makes this warranty.

(c) A person to whom warranties are made under this section and who took the item in good faith may recover from the warrantor as damages for breach of warranty an amount equal to the loss suffered as a result of the breach, plus expenses and loss of interest incurred as a result of the breach.

As added in 1990.

§ 4-210. Security Interest of Collecting Bank in Items, Accompanying Documents and Proceeds.

(a) A collecting bank has a security interest in an item and any accompanying documents or the proceeds of either:

(1) in case of an item deposited in an account, to the extent to which credit given for the item has been withdrawn or applied;

(2) in case of an item for which it has given credit available for withdrawal as of right, to the extent of the credit given, whether or not the credit is drawn upon or there is a right of charge-back; or

(3) if it makes an advance on or against the item.

(b) If credit given for several items received at one time or pursuant to a single agreement is withdrawn or applied in part, the security interest remains upon all the items, any accompanying documents or the proceeds of either. For the purpose of this section, credits first given are first withdrawn.

(c) Receipt by a collecting bank of a final settlement for an item is a realization on its security interest in the item, accompanying documents, and proceeds. So long as the bank does not receive final settlement for the item or give up possession of the item or accompanying documents for purposes other than collection, the security interest continues to that extent and is subject to Article 9, but:

(1) no security agreement is necessary to make the security interest enforceable (Section 9–203(1)(a));

(2) no filing is required to perfect the security interest; and

(3) the security interest has priority over conflicting perfected security interests in the item, accompanying documents, or proceeds.

As amended in 1990 and 1999.

§ 4-211. When Bank Gives Value for Purposes of Holder in Due Course.

For purposes of determining its status as a holder in due course, a bank has given value to the extent it has a security interest in an item, if the bank otherwise complies with the requirements of Section 3–302 on what constitutes a holder in due course.

As amended in 1990.

§ 4-212. Presentment by Notice of Item Not Payable by, Through, or at Bank; Liability of Drawer or Indorser.

(a) Unless otherwise instructed, a collecting bank may present an item not payable by, through, or at a bank by sending to the party to accept or pay a written notice that the bank holds the item for acceptance or payment. The notice must be sent in time to be received on or before the day when presentment is due and the bank must meet any requirement of the party to accept or pay under Section 3–501 by the close of the bank's next banking day after it knows of the requirement.

(b) If presentment is made by notice and payment, acceptance, or request for compliance with a requirement under Section 3–501 is not received by the close of business on the day after maturity or, in the case of demand items, by the close of business on the third banking day after notice was sent, the presenting bank may treat the item as dishonored and charge any drawer or indorser by sending it notice of the facts.

As amended in 1990.

§ 4-213. Medium and Time of Settlement by Bank.

(a) With respect to settlement by a bank, the medium and time of settlement may be prescribed by Federal Reserve regulations or circulars, clearing-house rules, and the like, or agreement. In the absence of such prescription:

(1) the medium of settlement is cash or credit to an account in a Federal Reserve bank of or specified by the person to receive settlement; and

(2) the time of settlement is:

(i) with respect to tender of settlement by cash, a cashier's check, or teller's check, when the cash or check is sent or delivered;

(ii) with respect to tender of settlement by credit in an account in a Federal Reserve Bank, when the credit is made;

(iii) with respect to tender of settlement by a credit or debit to an account in a bank, when the credit or debit is made or, in the case of tender of settlement by authority to charge an account, when the authority is sent or delivered; or

(iv) with respect to tender of settlement by a funds transfer, when payment is made pursuant to Section 4A–406(a) to the person receiving settlement.

(b) If the tender of settlement is not by a medium authorized by subsection (a) or the time of settlement is not fixed by subsection (a), no settlement occurs until the tender of settlement is accepted by the person receiving settlement.

(c) If settlement for an item is made by cashier's check or teller's check and the person receiving settlement, before its midnight deadline:

(1) presents or forwards the check for collection, settlement is final when the check is finally paid; or

(2) fails to present or forward the check for collection, settlement is final at the midnight deadline of the person receiving settlement.

(d) If settlement for an item is made by giving authority to charge the account of the bank giving settlement in the bank receiving settlement, settlement is final when the charge is made by the bank receiving settlement if there are funds available in the account for the amount of the item.

As amended in 1990.

§ 4–214. Right of Charge-Back or Refund; Liability of Collecting Bank: Return of Item.

(a) If a collecting bank has made provisional settlement with its customer for an item and fails by reason of dishonor, suspension of payments by a bank, or otherwise to receive settlement for the item which is or becomes final, the bank may revoke the settlement given by it, charge back the amount of any credit given for the item to its customer's account, or obtain refund from its customer, whether or not it is able to return the item, if by its midnight deadline or within a longer reasonable time after it learns the facts it returns the item or sends notification of the facts. If the return or notice is delayed beyond the bank's midnight deadline or a longer reasonable time after it learns the facts, the bank may revoke the settlement, charge back the credit, or obtain refund from its customer, but it is liable for any loss resulting from the delay. These rights to revoke, charge back, and obtain refund terminate if and when a settlement for the item received by the bank is or becomes final.

(b) A collecting bank returns an item when it is sent or delivered to the bank's customer or transferor or pursuant to its instructions.

(c) A depositary bank that is also the payor may charge back the amount of an item to its customer's account or obtain refund in accordance with the section governing return of an item received by a payor bank for credit on its books (Section 4–301).

(d) The right to charge back is not affected by:

(1) previous use of a credit given for the item; or

(2) failure by any bank to exercise ordinary care with respect to the item, but a bank so failing remains liable.

(e) A failure to charge back or claim refund does not affect other rights of the bank against the customer or any other party.

(f) If credit is given in dollars as the equivalent of the value of an item payable in foreign money, the dollar amount of any charge-back or refund must be calculated on the basis of the bank-offered spot rate for the foreign money prevailing on the day when the person entitled to the charge-back or refund learns that it will not receive payment in ordinary course.

As amended in 1990.

§ 4–215. Final Payment of Item by Payor Bank; When Provisional Debits and Credits Become Final; When Certain Credits Become Available for Withdrawal.

(a) An item is finally paid by a payor bank when the bank has first done any of the following:

(1) paid the item in cash;

(2) settled for the item without having a right to revoke the settlement under statute, clearing-house rule, or agreement; or

(3) made a provisional settlement for the item and failed to revoke the settlement in the time and manner permitted by statute, clearing-house rule, or agreement.

(b) If provisional settlement for an item does not become final, the item is not finally paid.

(c) If provisional settlement for an item between the presenting and payor banks is made through a clearing house or by debits or credits in an account between them, then to the extent that provisional debits or credits for the item are entered in accounts between the presenting and payor banks or between the presenting and successive prior collecting banks seriatim, they become final upon final payment of the item by the payor bank.

(d) If a collecting bank receives a settlement for an item which is or becomes final, the bank is accountable to its customer for the amount of the item and any provisional credit given for the item in an account with its customer becomes final.

(e) Subject to (i) applicable law stating a time for availability of funds and (ii) any right of the bank to apply the credit to an obligation of the customer, credit given by a bank for an item in a customer's account becomes available for withdrawal as of right:

(1) if the bank has received a provisional settlement for the item, when the settlement becomes final and the bank has had a reasonable time to receive return of the item and the item has not been received within that time;

(2) if the bank is both the depositary bank and the payor bank, and the item is finally paid, at the opening of the bank's second banking day following receipt of the item.

(f) Subject to applicable law stating a time for availability of funds and any right of a bank to apply a deposit to an obligation of the depositor, a deposit of money becomes available for withdrawal as of right at the opening of the bank's next banking day after receipt of the deposit.

As amended in 1990.

§ 4-216. Insolvency and Preference.

(a) If an item is in or comes into the possession of a payor or collecting bank that suspends payment and the item has not been finally paid, the item must be returned by the receiver, trustee, or agent in charge of the closed bank to the presenting bank or the closed bank's customer.

(b) If a payor bank finally pays an item and suspends payments without making a settlement for the item with its customer or the presenting bank which settlement is or becomes final, the owner of the item has a preferred claim against the payor bank.

(c) If a payor bank gives or a collecting bank gives or receives a provisional settlement for an item and thereafter suspends payments, the suspension does not prevent or interfere with the settlement's becoming final if the finality occurs automatically upon the lapse of certain time or the happening of certain events.

(d) If a collecting bank receives from subsequent parties settlement for an item, which settlement is or becomes final and the bank suspends payments without making a settlement for the item with its customer which settlement is or becomes final, the owner of the item has a preferred claim against the collecting bank.

As amended in 1990.

PART 3 Collection of Items: Payor Banks

§ 4-301. Deferred Posting; Recovery of Payment by Return of Items; Time of Dishonor; Return of Items by Payor Bank.

(a) If a payor bank settles for a demand item other than a documentary draft presented otherwise than for immediate payment over the counter before midnight of the banking day of receipt, the payor bank may revoke the settlement and recover the settlement if, before it has made final payment and before its midnight deadline, it

(1) returns the item; or

(2) sends written notice of dishonor or nonpayment if the item is unavailable for return.

(b) If a demand item is received by a payor bank for credit on its books, it may return the item or send notice of dishonor and may revoke any credit given or recover the amount thereof withdrawn by its customer, if it acts within the time limit and in the manner specified in subsection (a).

(c) Unless previous notice of dishonor has been sent, an item is dishonored at the time when for purposes of dishonor it is returned or notice sent in accordance with this section.

(d) An item is returned:

(1) as to an item presented through a clearing house, when it is delivered to the presenting or last collecting bank or to the clearing house or is sent or delivered in accordance with clearing-house rules; or

(2) in all other cases, when it is sent or delivered to the bank's customer or transferor or pursuant to instructions.

As amended in 1990.

§ 4-302. Payor Bank's Responsibility for Late Return of Item.

(a) If an item is presented to and received by a payor bank, the bank is accountable for the amount of:

(1) a demand item, other than a documentary draft, whether properly payable or not, if the bank, in any case in which it is not also the depositary bank, retains the item beyond midnight of the banking day of receipt without settling for it or, whether or not it is also the depositary bank, does not pay or return the item or send notice of dishonor until after its midnight deadline; or

(2) any other properly payable item unless, within the time allowed for acceptance or payment of that item, the bank either accepts or pays the item or returns it and accompanying documents.

(b) The liability of a payor bank to pay an item pursuant to subsection (a) is subject to defenses based on breach of a presentment warranty (Section 4–208) or proof that the person seeking enforcement of the liability presented or transferred the item for the purpose of defrauding the payor bank.

As amended in 1990.

§ 4-303. When Items Subject to Notice, Stop-Payment Order, Legal Process, or Setoff; Order in Which Items May Be Charged or Certified.

(a) Any knowledge, notice, or stop-payment order received by, legal process served upon, or setoff exercised by a payor bank comes too late to terminate, suspend, or modify the bank's right or duty to pay an item or to charge its customer's account

for the item if the knowledge, notice, stop-payment order, or legal process is received or served and a reasonable time for the bank to act thereon expires or the setoff is exercised after the earliest of the following:

(1) the bank accepts or certifies the item;

(2) the bank pays the item in cash;

(3) the bank settles for the item without having a right to revoke the settlement under statute, clearing-house rule, or agreement;

(4) the bank becomes accountable for the amount of the item under Section 4–302 dealing with the payor bank's responsibility for late return of items; or

(5) with respect to checks, a cutoff hour no earlier than one hour after the opening of the next banking day after the banking day on which the bank received the check and no later than the close of that next banking day or, if no cutoff hour is fixed, the close of the next banking day after the banking day on which the bank received the check.

(b) Subject to subsection (a), items may be accepted, paid, certified, or charged to the indicated account of its customer in any order.

As amended in 1990.

PART 4 Relationship Between Payor Bank and Its Customer

§ 4–401. When Bank May Charge Customer's Account.

(a) A bank may charge against the account of a customer an item that is properly payable from the account even though the charge creates an overdraft. An item is properly payable if it is authorized by the customer and is in accordance with any agreement between the customer and bank.

(b) A customer is not liable for the amount of an overdraft if the customer neither signed the item nor benefited from the proceeds of the item.

(c) A bank may charge against the account of a customer a check that is otherwise properly payable from the account, even though payment was made before the date of the check, unless the customer has given notice to the bank of the postdating describing the check with reasonable certainty. The notice is effective for the period stated in Section 4–403(b) for stop-payment orders, and must be received at such time and in such manner as to afford the bank a reasonable opportunity to act on it before the bank takes any action with respect to the check described in Section 4–303. If a bank charges against the account of a customer a check before the date stated in the notice of postdating, the bank is liable for damages for the loss resulting from its act. The loss may include damages for dishonor of subsequent items under Section 4–402.

(d) A bank that in good faith makes payment to a holder may charge the indicated account of its customer according to:

(1) the original terms of the altered item; or

(2) the terms of the completed item, even though the bank knows the item has been completed unless the bank has notice that the completion was improper.

As amended in 1990.

§ 4–402. Bank's Liability to Customer for Wrongful Dishonor; Time of Determining Insufficiency of Account.

(a) Except as otherwise provided in this Article, a payor bank wrongfully dishonors an item if it dishonors an item that is properly payable, but a bank may dishonor an item that would create an overdraft unless it has agreed to pay the overdraft.

(b) A payor bank is liable to its customer for damages proximately caused by the wrongful dishonor of an item. Liability is limited to actual damages proved and may include damages for an arrest or prosecution of the customer or other consequential damages. Whether any consequential damages are proximately caused by the wrongful dishonor is a question of fact to be determined in each case.

(c) A payor bank's determination of the customer's account balance on which a decision to dishonor for insufficiency of available funds is based may be made at any time between the time the item is received by the payor bank and the time that the payor bank returns the item or gives notice in lieu of return, and no more than one determination need be made. If, at the election of the payor bank, a subsequent balance determination is made for the purpose of reevaluating the bank's decision to dishonor the item, the account balance at that time is determinative of whether a dishonor for insufficiency of available funds is wrongful.

As amended in 1990.

§ 4–403. Customer's Right to Stop Payment; Burden of Proof of Loss.

(a) A customer or any person authorized to draw on the account if there is more than one person may stop payment of any item drawn on the customer's account or close the account by an order to the bank describing the item or account with reasonable certainty received at a time and in a manner that affords the bank a reasonable opportunity to act on it before any action by the bank with respect to the item described in Section 4–303. If the signature of more than one person is required to draw on an account, any of these persons may stop payment or close the account.

(b) A stop-payment order is effective for six months, but it lapses after 14 calendar days if the original order was oral and was not confirmed in writing within that period. A stop-payment order may be renewed for additional six-month periods by a writing given to the bank within a period during which the stop-payment order is effective.

(c) The burden of establishing the fact and amount of loss resulting from the payment of an item contrary to a stop-payment order or order to close an account is on the customer.

The loss from payment of an item contrary to a stop-payment order may include damages for dishonor of subsequent items under Section 4–402.

As amended in 1990.

§ 4–404. Bank Not Obliged to Pay Check More Than Six Months Old.

A bank is under no obligation to a customer having a checking account to pay a check, other than a certified check, which is presented more than six months after its date, but it may charge its customer's account for a payment made thereafter in good faith.

§ 4–405. Death or Incompetence of Customer.

(a) A payor or collecting bank's authority to accept, pay, or collect an item or to account for proceeds of its collection, if otherwise effective, is not rendered ineffective by incompetence of a customer of either bank existing at the time the item is issued or its collection is undertaken if the bank does not know of an adjudication of incompetence. Neither death nor incompetence of a customer revokes the authority to accept, pay, collect, or account until the bank knows of the fact of death or of an adjudication of incompetence and has reasonable opportunity to act on it.

(b) Even with knowledge, a bank may for 10 days after the date of death pay or certify checks drawn on or before the date unless ordered to stop payment by a person claiming an interest in the account.

As amended in 1990.

§ 4–406. Customer's Duty to Discover and Report Unauthorized Signature or Alteration.

(a) A bank that sends or makes available to a customer a statement of account showing payment of items for the account shall either return or make available to the customer the items paid or provide information in the statement of account sufficient to allow the customer reasonably to identify the items paid. The statement of account provides sufficient information if the item is described by item number, amount, and date of payment.

(b) If the items are not returned to the customer, the person retaining the items shall either retain the items or, if the items are destroyed, maintain the capacity to furnish legible copies of the items until the expiration of seven years after receipt of the items. A customer may request an item from the bank that paid the item, and that bank must provide in a reasonable time either the item or, if the item has been destroyed or is not otherwise obtainable, a legible copy of the item.

(c) If a bank sends or makes available a statement of account or items pursuant to subsection (a), the customer must exercise reasonable promptness in examining the statement or the items to determine whether any payment was not authorized because of an alteration of an item or because a purported signature by or on behalf of the customer was not authorized. If, based on the statement or items provided, the customer should reasonably have discovered the unauthorized payment, the customer must promptly notify the bank of the relevant facts.

(d) If the bank proves that the customer failed, with respect to an item, to comply with the duties imposed on the customer by subsection (c), the customer is precluded from asserting against the bank:

(1) the customer's unauthorized signature or any alteration on the item, if the bank also proves that it suffered a loss by reason of the failure; and

(2) the customer's unauthorized signature or alteration by the same wrongdoer on any other item paid in good faith by the bank if the payment was made before the bank received notice from the customer of the unauthorized signature or alteration and after the customer had been afforded a reasonable period of time, not exceeding 30 days, in which to examine the item or statement of account and notify the bank.

(e) If subsection (d) applies and the customer proves that the bank failed to exercise ordinary care in paying the item and that the failure substantially contributed to loss, the loss is allocated between the customer precluded and the bank asserting the preclusion according to the extent to which the failure of the customer to comply with subsection (c) and the failure of the bank to exercise ordinary care contributed to the loss. If the customer proves that the bank did not pay the item in good faith, the preclusion under subsection (d) does not apply.

(f) Without regard to care or lack of care of either the customer or the bank, a customer who does not within one year after the statement or items are made available to the customer (subsection (a)) discover and report the customer's unauthorized signature on or any alteration on the item is precluded from asserting against the bank the unauthorized signature or alteration. If there is a preclusion under this subsection, the payor bank may not recover for breach or warranty under Section 4–208 with respect to the unauthorized signature or alteration to which the preclusion applies.

As amended in 1990.

§ 4–407. Payor Bank's Right to Subrogation on Improper Payment.

If a payor has paid an item over the order of the drawer or maker to stop payment, or after an account has been closed, or otherwise under circumstances giving a basis for objection by the drawer or maker, to prevent unjust enrichment and only to the extent necessary to prevent loss to the bank by reason of its payment of the item, the payor bank is subrogated to the rights

(1) of any holder in due course on the item against the drawer or maker;

(2) of the payee or any other holder of the item against the drawer or maker either on the item or under the transaction out of which the item arose; and

(3) of the drawer or maker against the payee or any other holder of the item with respect to the transaction out of which the item arose.

As amended in 1990.

PART 5 Collection of Documentary Drafts

§ 4-501. Handling of Documentary Drafts; Duty to Send for Presentment and to Notify Customer of Dishonor.

A bank that takes a documentary draft for collection shall present or send the draft and accompanying documents for presentment and, upon learning that the draft has not been paid or accepted in due course, shall seasonably notify its customer of the fact even though it may have discounted or bought the draft or extended credit available for withdrawal as of right.

As amended in 1990.

§ 4-502. Presentment of "On Arrival" Drafts.

If a draft or the relevant instructions require presentment "on arrival", "when goods arrive" or the like, the collecting bank need not present until in its judgment a reasonable time for arrival of the goods has expired. Refusal to pay or accept because the goods have not arrived is not dishonor; the bank must notify its transferor of the refusal but need not present the draft again until it is instructed to do so or learns of the arrival of the goods.

§ 4-503. Responsibility of Presenting Bank for Documents and Goods; Report of Reasons for Dishonor; Referee in Case of Need.

Unless otherwise instructed and except as provided in Article 5, a bank presenting a documentary draft:

(1) must deliver the documents to the drawee on acceptance of the draft if it is payable more than three days after presentment, otherwise, only on payment; and

(2) upon dishonor, either in the case of presentment for acceptance or presentment for payment, may seek and follow instructions from any referee in case of need designated in the draft or, if the presenting bank does not choose to utilize the referee's services, it must use diligence and good faith to ascertain the reason for dishonor, must notify its transferor of the dishonor and of the results of its effort to ascertain the reasons therefor, and must request instructions.

However, the presenting bank is under no obligation with respect to goods represented by the documents except to follow any reasonable instructions seasonably received; it has a right to reimbursement for any expense incurred in following instructions and to prepayment of or indemnity for those expenses.

As amended in 1990.

§ 4-504. Privilege of Presenting Bank to Deal With Goods; Security Interest for Expenses.

(a) A presenting bank that, following the dishonor of a documentary draft, has seasonably requested instructions but does not receive them within a reasonable time may store, sell, or otherwise deal with the goods in any reasonable manner.

(b) For its reasonable expenses incurred by action under subsection (a) the presenting bank has a lien upon the goods or their proceeds, which may be foreclosed in the same manner as an unpaid seller's lien.

As amended in 1990.

REVISED ARTICLE IX SECURED TRANSACTIONS

PART 1 General Provisions

[Subpart 1. Short Title, Definitions, and General Concepts]

§ 9-101. Short Title.

This article may be cited as Uniform Commercial Code—Secured Transactions.

§ 9-102. Definitions and Index of Definitions.

(a) In this article:

(1) "Accession" means goods that are physically united with other goods in such a manner that the identity of the original goods is not lost.

(2) "Account", except as used in "account for", means a right to payment of a monetary obligation, whether or not earned by performance, (i) for property that has been or is to be sold, leased, licensed, assigned, or otherwise disposed of, (ii) for services rendered or to be rendered, (iii) for a policy of insurance issued or to be issued, (iv) for a secondary obligation incurred or to be incurred, (v) for energy provided or to be provided, (vi) for the use or hire of a vessel under a charter or other contract, (vii) arising out of the use of a credit or charge card or information contained on or for use with the card, or (viii) as winnings in a lottery or other game of chance operated or sponsored by a State, governmental unit of a State, or person licensed or authorized to operate the game by a State or governmental unit of a State. The term includes health-care insurance receivables. The term does not include (i) rights to payment evidenced by chattel paper or an instrument, (ii) commercial tort claims, (iii) deposit accounts, (iv) investment property, (v) letter-of-credit rights or letters of credit, or (vi) rights to payment for money or funds advanced or

sold, other than rights arising out of the use of a credit or charge card or information contained on or for use with the card.

(3) "Account debtor" means a person obligated on an account, chattel paper, or general intangible. The term does not include persons obligated to pay a negotiable instrument, even if the instrument constitutes part of chattel paper.

(4) "Accounting", except as used in "accounting for", means a record:

(A) authenticated by a secured party;

(B) indicating the aggregate unpaid secured obligations as of a date not more than 35 days earlier or 35 days later than the date of the record; and

(C) identifying the components of the obligations in reasonable detail.

(5) "Agricultural lien" means an interest, other than a security interest, in farm products:

(A) which secures payment or performance of an obligation for:

(i) goods or services furnished in connection with a debtor's farming operation; or

(ii) rent on real property leased by a debtor in connection with its farming operation;

(B) which is created by statute in favor of a person that:

(i) in the ordinary course of its business furnished goods or services to a debtor in connection with a debtor's farming operation; or

(ii) leased real property to a debtor in connection with the debtor's farming operation; and

(C) whose effectiveness does not depend on the person's possession of the personal property.

(6) "As-extracted collateral" means:

(A) oil, gas, or other minerals that are subject to a security interest that:

(i) is created by a debtor having an interest in the minerals before extraction; and

(ii) attaches to the minerals as extracted; or

(B) accounts arising out of the sale at the wellhead or minehead of oil, gas, or other minerals in which the debtor had an interest before extraction.

(7) "Authenticate" means:

(A) to sign; or

(B) to execute or otherwise adopt a symbol, or encrypt or similarly process a record in whole or in part, with the present intent of the authenticating person to identify the person and adopt or accept a record.

(8) "Bank" means an organization that is engaged in the business of banking. The term includes savings banks, savings and loan associations, credit unions, and trust companies.

(9) "Cash proceeds" means proceeds that are money, checks, deposit accounts, or the like.

(10) "Certificate of title" means a certificate of title with respect to which a statute provides for the security interest in question to be indicated on the certificate as a condition or result of the security interest's obtaining priority over the rights of a lien creditor with respect to the collateral.

(11) "Chattel paper" means a record or records that evidence both a monetary obligation and a security interest in specific goods, a security interest in specific goods and software used in the goods, a security interest in specific goods and license of software used in the goods, a lease of specific goods, or a lease of specific goods and license of software used in the goods. In this paragraph, "monetary obligation" means a monetary obligation secured by the goods or owed under a lease of the goods and includes a monetary obligation with respect to software used in the goods. The term does not include (i) charters or other contracts involving the use or hire of a vessel or (ii) records that evidence a right to payment arising out of the use of a credit or charge card or information contained on or for use with the card. If a transaction is evidenced by records that include an instrument or series of instruments, the group of records taken together constitutes chattel paper.

(12) "Collateral" means the property subject to a security interest or agricultural lien. The term includes:

(A) proceeds to which a security interest attaches;

(B) accounts, chattel paper, payment intangibles, and promissory notes that have been sold; and

(C) goods that are the subject of a consignment.

(13) "Commercial tort claim" means a claim arising in tort with respect to which:

(A) the claimant is an organization; or

(B) the claimant is an individual and the claim:

(i) arose in the course of the claimant's business or profession; and

(ii) does not include damages arising out of personal injury to or the death of an individual.

(14) "Commodity account" means an account maintained by a commodity intermediary in which a commodity contract is carried for a commodity customer.

(15) "Commodity contract" means a commodity futures contract, an option on a commodity futures contract, a commodity option, or another contract if the contract or option is:

(A) traded on or subject to the rules of a board of trade that has been designated as a contract market for such a contract pursuant to federal commodities laws; or

(B) traded on a foreign commodity board of trade, exchange, or market, and is carried on the books of a commodity intermediary for a commodity customer.

(16) "Commodity customer" means a person for which a commodity intermediary carries a commodity contract on its books.

(17) "Commodity intermediary" means a person that:

(A) is registered as a futures commission merchant under federal commodities law; or

(B) in the ordinary course of its business provides clearance or settlement services for a board of trade that has been designated as a contract market pursuant to federal commodities law.

(18) "Communicate" means:

(A) to send a written or other tangible record;

(B) to transmit a record by any means agreed upon by the persons sending and receiving the record; or

(C) in the case of transmission of a record to or by a filing office, to transmit a record by any means prescribed by filing-office rule.

(19) "Consignee" means a merchant to which goods are delivered in a consignment.

(20) "Consignment" means a transaction, regardless of its form, in which a person delivers goods to a merchant for the purpose of sale and:

(A) the merchant:

(i) deals in goods of that kind under a name other than the name of the person making delivery;

(ii) is not an auctioneer; and

(iii) is not generally known by its creditors to be substantially engaged in selling the goods of others;

(B) with respect to each delivery, the aggregate value of the goods is $1,000 or more at the time of delivery;

(C) the goods are not consumer goods immediately before delivery; and

(D) the transaction does not create a security interest that secures an obligation.

(21) "Consignor" means a person that delivers goods to a consignee in a consignment.

(22) "Consumer debtor" means a debtor in a consumer transaction.

(23) "Consumer goods" means goods that are used or bought for use primarily for personal, family, or household purposes.

(24) "Consumer goods transaction" means a consumer transaction in which:

(A) an individual incurs an obligation primarily for personal, family, or household purposes; and

(B) a security interest in consumer goods secures the obligation.

(25) "Consumer obligor" means an obligor who is an individual and who incurred the obligation as part of a transaction entered into primarily for personal, family, or household purposes.

(26) "Consumer transaction" means a transaction in which (i) an individual incurs an obligation primarily for personal, family, or household purposes, (ii) a security interest secures the obligation, and (iii) the collateral is held or acquired primarily for personal, family, or household purposes. The term includes consumer-goods transactions.

(27) "Continuation statement" means an amendment of a financing statement which:

(A) identifies, by its file number, the initial financing statement to which it relates; and

(B) indicates that it is a continuation statement for, or that it is filed to continue the effectiveness of, the identified financing statement.

(28) "Debtor" means:

(A) a person having an interest, other than a security interest or other lien, in the collateral, whether or not the person is an obligor;

(B) a seller of accounts, chattel paper, payment intangibles, or promissory notes; or

(C) a consignee.

(29) "Deposit account" means a demand, time, savings, passbook, or similar account maintained with a bank. The term does not include investment property or accounts evidenced by an instrument.

(30) "Document" means a document of title or a receipt of the type described in Section 7–201(2).

(31) "Electronic chattel paper" means chattel paper evidenced by a record or records consisting of information stored in an electronic medium.

(32) "Encumbrance" means a right, other than an ownership interest, in real property. The term includes mortgages and other liens on real property.

(33) "Equipment" means goods other than inventory, farm products, or consumer goods.

(34) "Farm products" means goods, other than standing timber, with respect to which the debtor is engaged in a farming operation and which are:

(A) crops grown, growing, or to be grown, including:

(i) crops produced on trees, vines, and bushes; and

(ii) aquatic goods produced in aquacultural operations;

(B) livestock, born or unborn, including aquatic goods produced in aquacultural operations;

(C) supplies used or produced in a farming operation; or

(D) products of crops or livestock in their unmanufactured states.

(35) "Farming operation" means raising, cultivating, propagating, fattening, grazing, or any other farming, livestock, or aquacultural operation.

(36) "File number" means the number assigned to an initial financing statement pursuant to Section 9–519(a).

(37) "Filing office" means an office designated in Section 9–501 as the place to file a financing statement.

(38) "Filing-office rule" means a rule adopted pursuant to Section 9–526.

(39) "Financing statement" means a record or records composed of an initial financing statement and any filed record relating to the initial financing statement.

(40) "Fixture filing" means the filing of a financing statement covering goods that are or are to become fixtures and satisfying Section 9–502(a) and (b). The term includes the filing of a

financing statement covering goods of a transmitting utility which are or are to become fixtures.

(41) "Fixtures" means goods that have become so related to particular real property that an interest in them arises under real property law.

(42) "General intangible" means any personal property, including things in action, other than accounts, chattel paper, commercial tort claims, deposit accounts, documents, goods, instruments, investment property, letter-of-credit rights, letters of credit, money, and oil, gas, or other minerals before extraction. The term includes payment intangibles and software.

(43) "Good faith" means honesty in fact and the observance of reasonable commercial standards of fair dealing.

(44) "Goods" means all things that are movable when a security interest attaches. The term includes (i) fixtures, (ii) standing timber that is to be cut and removed under a conveyance or contract for sale, (iii) the unborn young of animals, (iv) crops grown, growing, or to be grown, even if the crops are produced on trees, vines, or bushes, and (v) manufactured homes. The term also includes a computer program embedded in goods and any supporting information provided in connection with a transaction relating to the program if (i) the program is associated with the goods in such a manner that it customarily is considered part of the goods, or (ii) by becoming the owner of the goods, a person acquires a right to use the program in connection with the goods. The term does not include a computer program embedded in goods that consist solely of the medium in which the program is embedded. The term also does not include accounts, chattel paper, commercial tort claims, deposit accounts, documents, general intangibles, instruments, investment property, letter-of-credit rights, letters of credit, money, or oil, gas, or other minerals before extraction.

(45) "Governmental unit" means a subdivision, agency, department, county, parish, municipality, or other unit of the government of the United States, a State, or a foreign country. The term includes an organization having a separate corporate existence if the organization is eligible to issue debt on which interest is exempt from income taxation under the laws of the United States.

(46) "Health-care-insurance receivable" means an interest in or claim under a policy of insurance which is a right to payment of a monetary obligation for health-care goods or servies provided.

(47) "Instrument" means a negotiable instrument or any other writing that evidences a right to the payment of a monetary obligation, is not itself a security agreement or lease, and is of a type that in ordinary course of business is transferred by delivery with any necessary indorsement or assignment. The term does not include (i) investment property, (ii) letters of credit, or (iii) writings that evidence a right to payment arising out of the use of a credit or charge card or information contained on or for use with the card.

(48) "Inventory" means goods, other than farm products, which:

(A) are leased by a person as lessor;

(B) are held by a person for sale or lease or to be furnished under a contract of service;

(C) are furnished by a person under a contract of service; or

(D) consist of raw materials, work in process, or materials used or consumed in a business.

(49) "Investment property" means a security, whether certificated or uncertificated, security entitlement, securities account, commodity contract, or commodity account.

(50) "Jurisdiction of organization", with respect to a registered organization, means the jurisdiction under whose law the organization is organized.

(51) "Letter-of-credit right" means a right to payment or performance under a letter of credit, whether or not the beneficiary has demanded or is at the time entitled to demand payment or performance. The term does not include the right of a beneficiary to demand payment or performance under a letter of credit.

(52) "Lien creditor" means:

(A) a creditor that has acquired a lien on the property involved by attachment, levy, or the like;

(B) an assignee for benefit of creditors from the time of assignment;

(C) a trustee in bankruptcy from the date of the filing of the petition; or

(D) a receiver in equity from the time of appointment.

(53) "Manufactured home" means a structure, transportable in one or more sections, which, in the traveling mode, is eight body feet or more in width or 40 body feet or more in length, or, when erected on site, is 320 or more square feet, and which is built on a permanent chassis and designed to be used as a dwelling with or without a permanent foundation when connected to the required utilities, and includes the plumbing, heating, air-conditioning, and electrical systems contained therein. The term includes any structure that meets all of the requirements of this paragraph except the size requirements and with respect to which the manufacturer voluntarily files a certification required by the United States Secretary of Housing and Urban Development and complies with the standards established under Title 42 of the United States Code.

(54) "Manufactured-home transaction" means a secured transaction:

(A) that creates a purchase-money security interest in a manufactured home, other than a manufactured home held as inventory; or

(B) in which a manufactured home, other than a manufactured home held as inventory, is the primary collateral.

(55) "Mortgage" means a consensual interest in real property, including fixtures, which secures payment or performance of an obligation.

(56) "New debtor" means a person that becomes bound as debtor under Section 9–203(d) by a security agreement previously entered into by another person.

(57) "New value" means (i) money, (ii) money's worth in property, services, or new credit, or (iii) release by a transferee of an interest in property previously transferred to the transferee.

The term does not include an obligation substituted for another obligation.

(58) "Noncash proceeds" means proceeds other than cash proceeds.

(59) "Obligor" means a person that, with respect to an obligation secured by a security interest in or an agricultural lien on the collateral, (i) owes payment or other performance of the obligation, (ii) has provided property other than the collateral to secure payment or other performance of the obligation, or (iii) is otherwise accountable in whole or in part for payment or other performance of the obligation. The term does not include issuers or nominated persons under a letter of credit.

(60) "Original debtor", except as used in Section 9–310(c), means a person that, as debtor, entered into a security agreement to which a new debtor has become bound under Section 9–203(d).

(61) "Payment intangible" means a general intangible under which the account debtor's principal obligation is a monetary obligation.

(62) "Person related to", with respect to an individual, means:

(A) the spouse of the individual;

(B) a brother, brother-in-law, sister, or sister-in-law of the individual;

(C) an ancestor or lineal descendant of the individual or the individual's spouse; or

(D) any other relative, by blood or marriage, of the individual or the individual's spouse who shares the same home with the individual.

(63) "Person related to", with respect to an organization, means:

(A) a person directly or indirectly controlling, controlled by, or under common control with the organization;

(B) an officer or director of, or a person performing similar functions with respect to, the organization;

(C) an officer or director of, or a person performing similar functions with respect to, a person described in subparagraph (A);

(D) the spouse of an individual described in subparagraph (A), (B), or (C); or

(E) an individual who is related by blood or marriage to an individual described in subparagraph (A), (B), (C), or (D) and shares the same home with the individual.

(64) "Proceeds", except as used in Section 9–609(b), means the following property:

(A) whatever is acquired upon the sale, lease, license, exchange, or other disposition of collateral;

(B) whatever is collected on, or distributed on account of, collateral;

(C) rights arising out of collateral;

(D) to the extent of the value of collateral, claims arising out of the loss, nonconformity, or interference with the use of, defects or infringement of rights in, or damage to, the collateral; or (E) to the extent of the value of collateral and to the extent payable to the debtor or the secured party, insurance payable by reason of the loss or nonconformity of, defects or infringement of rights in, or damage to, the collateral.

(65) "Promissory note" means an instrument that evidences a promise to pay a monetary obligation, does not evidence an order to pay, and does not contain an acknowledgment by a bank that the bank has received for deposit a sum of money or funds.

(66) "Proposal" means a record authenticated by a secured party which includes the terms on which the secured party is willing to accept collateral in full or partial satisfaction of the obligation it secures pursuant to Sections 9–620, 9–621, and 9–622.

(67) "Public-finance transaction" means a secured transaction in connection with which:

(A) debt securities are issued;

(B) all or a portion of the securities issued have an initial stated maturity of at least 20 years; and

(C) the debtor, obligor, secured party, account debtor or other person obligated on collateral, assignor or assignee of a secured obligation, or assignor or assignee of a security interest is a State or a governmental unit of a State.

(68) "Pursuant to commitment", with respect to an advance made or other value given by a secured party, means pursuant to the secured party's obligation, whether or not a subsequent event of default or other event not within the secured party's control has relieved or may relieve the secured party from its obligation.

(69) "Record", except as used in "for record", "of record", "record or legal title", and "record owner", means information that is inscribed on a tangible medium or which is stored in an electronic or other medium and is retrievable in perceivable form.

(70) "Registered organization" means an organization organized solely under the law of a single State or the United States and as to which the State or the United States must maintain a public record showing the organization to have been organized.

(71) "Secondary obligor" means an obligor to the extent that:

(A) the obligor's obligation is secondary; or

(B) the obligor has a right of recourse with respect to an obligation secured by collateral against the debtor, another obligor, or property of either.

(72) "Secured party" means:

(A) a person in whose favor a security interest is created or provided for under a security agreement, whether or not any obligation to be secured is outstanding;

(B) a person that holds an agricultural lien;

(C) a consignor;

(D) a person to which accounts, chattel paper, payment intangibles, or promissory notes have been sold;

(E) a trustee, indenture trustee, agent, collateral agent, or other representative in whose favor a security interest or agricultural lien is created or provided for; or

(F) a person that holds a security interest arising under Section 2–401, 2–505, 2–711(3), 2A–508(5), 4–210, or 5–118.

(73) "Security agreement" means an agreement that creates or provides for a security interest.

(74) "Send", in connection with a record or notification, means:

(A) to deposit in the mail, deliver for transmission, or transmit by any other usual means of communication, with postage or cost of transmission provided for, addressed to any address reasonable under the circumstances; or

(B) to cause the record or notification to be received within the timce that it would have been received if properly sent under subparagraph (A).

(75) "Software" means a computer program and any supporting information provided in connection with a transaction relating to the program. The term does not include a computer program that is included in the definition of goods.

(76) "State" means a State of the United States, the District of Columbia, Puerto Rico, the United States Virgin Islands, or any territory or insular possession subject to the jurisdiction of the United States.

(77) "Supporting obligation" means a letter-of-credit right or secondary obligation that supports the payment or performance of an account, chattel paper, a document, a general intangible, an instrument, or investment property.

(78) "Tangible chattel paper" means chattel paper evidenced by a record or records consisting of information that is inscribed on a tangible medium.

(79) "Termination statement" means an amendment of a financing statement which:

(A) identifies, by its file number, the initial financing statement to which it relates; and

(B) indicates either that it is a termination statement or that the identified financing statement is no longer effective.

(80) "Transmitting utility" means a person primarily engaged in the business of:

(A) operating a railroad, subway, street railway, or trolley bus;

(B) transmitting communications electrically, electromagnetically, or by light;

(C) transmitting goods by pipeline or sewer; or

(D) transmitting or producing and transmitting electricity, steam, gas, or water.

(c) Article 1 contains general definitions and principles of construction and interpretation applicable throughout this article.

Amended in 1999 and 2000.

§ 9–103. Purchase-Money Security Interest; Application of Payments; Burden of Establishing.

(a) In this section:

(1) "purchase-money collateral" means goods or software that secures a purchase-money obligation incurred with respect to that collateral; and

(2) "purchase-money obligation" means an obligation of an obligor incurred as all or part of the price of the collateral or for value given to enable the debtor to acquire rights in or the use of the collateral if the value is in fact so used.

(b) A security interest in goods is a purchase-money security interest:

(1) to the extent that the goods are purchase-money collateral with respect to that security interest;

(2) if the security interest is in inventory that is or was purchase-money collateral, also to the extent that the security interest secures a purchase-money obligation incurred with respect to other inventory in which the secured party holds or held a purchase-money security interest; and

(3) also to the extent that the security interest secures a purchase-money obligation incurred with respect to software in which the secured party holds or held a purchase-money security interest.

(c) A security interest in software is a purchase-money security interest to the extent that the security interest also secures a purchase-money obligation incurred with respect to goods in which the secured party holds or held a purchase-money security interest if:

(1) the debtor acquired its interest in the software in an integrated transaction in which it acquired an interest in the goods; and

(2) the debtor acquired its interest in the software for the principal purpose of using the software in the goods.

(d) The security interest of a consignor in goods that are the subject of a consignment is a purchase-money security interest in inventory.

(e) In a transaction other than a consumer-goods transaction, if the extent to which a security interest is a purchase-money security interest depends on the application of a payment to a particular obligation, the payment must be applied:

(1) in accordance with any reasonable method of application to which the parties agree;

(2) in the absence of the parties' agreement to a reasonable method, in accordance with any intention of the obligor manifested at or before the time of payment; or

(3) in the absence of an agreement to a reasonable method and a timely manifestation of the obligor's intention, in the following order:

(A) to obligations that are not secured; and

(B) if more than one obligation is secured, to obligations secured by purchase-money security interests in the order in which those obligations were incurred.

(f) In a transaction other than a consumer-goods transaction, a purchase-money security interest does not lose its status as such, even if:

(1) the purchase-money collateral also secures an obligation that is not a purchase-money obligation;

(2) collateral that is not purchase-money collateral also secures the purchase-money obligation; or

(3) the purchase-money obligation has been renewed, refinanced, consolidated, or restructured.

(g) In a transaction other than a consumer-goods transaction, a secured party claiming a purchase-money security interest has the burden of establishing the extent to which the security interest is a purchase-money security interest.

(h) The limitation of the rules in subsections (e), (f), and (g) to transactions other than consumer-goods transactions is intended to leave to the court the determination of the proper rules in consumer-goods transactions. The court may not infer from that limitation the nature of the proper rule in consumer-goods transactions and may continue to apply established approaches.

§ 9–104. Control of Deposit Account.

(a) A secured party has control of a deposit account if:

(1) the secured party is the bank with which the deposit account is maintained;

(2) the debtor, secured party, and bank have agreed in an authenticated record that the bank will comply with instructions originated by the secured party directing disposition of the funds in the deposit account without further consent by the debtor; or

(3) the secured party becomes the bank's customer with respect to the deposit account.

(b) A secured party that has satisfied subsection (a) has control, even if the debtor retains the right to direct the disposition of funds from the deposit account.

§ 9–105. Control of Electronic Chattel Paper.

A secured party has control of electronic chattel paper if the record or records comprising the chattel paper are created, stored, and assigned in such a manner that:

(1) a single authoritative copy of the record or records exists which is unique, identifiable and, except as otherwise provided in paragraphs (4), (5), and (6), unalterable;

(2) the authoritative copy identifies the secured party as the assignee of the record or records;

(3) the authoritative copy is communicated to and maintained by the secured party or its designated custodian;

(4) copies or revisions that add or change an identified assignee of the authoritative copy can be made only with the participation of the secured party;

(5) each copy of the authoritative copy and any copy of a copy is readily identifiable as a copy that is not the authoritative copy; and

(6) any revision of the authoritative copy is readily identifiable as an authorized or unauthorized revision.

§ 9–106. Control of Investment Property.

(a) A person has control of a certificated security, uncertificated security, or security entitlement as provided in Section 8–106.

(b) A secured party has control of a commodity contract if:

(1) the secured party is the commodity intermediary with which the commodity contract is carried; or

(2) the commodity customer, secured party, and commodity intermediary have agreed that the commodity intermediary will apply any value distributed on account of the commodity contract as directed by the secured party without further consent by the commodity customer.

(c) A secured party having control of all security entitlements or commodity contracts carried in a securities account or commodity account has control over the securities account or commodity account.

§ 9–107. Control of Letter-of-Credit Right.

A secured party has control of a letter-of-credit right to the extent of any right to payment or performance by the issuer or any nominated person if the issuer or nominated person has consented to an assignment of proceeds of the letter of credit under Section 5–114(c) or otherwise applicable law or practice.

§ 9–108. Sufficiency of Description.

(a) Except as otherwise provided in subsections (c), (d), and (e), a description of personal or real property is sufficient, whether or not it is specific, if it reasonably identifies what is described.

(b) Except as otherwise provided in subsection (d), a description of collateral reasonably identifies the collateral if it identifies the collateral by:

(1) specific listing;

(2) category;

(3) except as otherwise provided in subsection (e), a type of collateral defined in [the Uniform Commercial Code];

(4) quantity;

(5) computational or allocational formula or procedure; or

(6) except as otherwise provided in subsection (c), any other method, if the identity of the collateral is objectively determinable.

(c) A description of collateral as "all the debtor's assets" or "all the debtor's personal property" or using words of similar import does not reasonably identify the collateral.

(d) Except as otherwise provided in subsection (e), a description of a security entitlement, securities account, or commodity account is sufficient if it describes:

(1) the collateral by those terms or as investment property; or

(2) the underlying financial asset or commodity contract.

(e) A description only by type of collateral defined in [the Uniform Commercial Code] is an insufficient description of:

(1) a commercial tort claim; or

(2) in a consumer transaction, consumer goods, a security entitlement, a securities account, or a commodity account.

[Subpart 2. Applicability of Article]

§ 9–109. Scope.

(a) Except as otherwise provided in subsections (c) and (d), this article applies to:

(1) a transaction, regardless of its form, that creates a security interest in personal property or fixtures by contract;

(2) an agricultural lien;

(3) a sale of accounts, chattel paper, payment intangibles, or promissory notes;

(4) a consignment;

(5) a security interest arising under Section 2–401, 2–505, 2–711 (3), or 2A–508(5), as provided in Section 9–110; and

(6) a security interest arising under Section 4–210 or 5–118.

(b) The application of this article to a security interest in a secured obligation is not affected by the fact that the obligation is itself secured by a transaction or interest to which this article does not apply.

(c) This article does not apply to the extent that:

(1) a statute, regulation, or treaty of the United States preempts this article;

(2) another statute of this State expressly governs the creation, perfection, priority, or enforcement of a security interest created by this State or a governmental unit of this State;

(3) a statute of another State, a foreign country, or a governmental unit of another State or a foreign country, other than a statute generally applicable to security interests, expressly governs creation, perfection, priority, or enforcement of a security interest created by the State, country, or governmental unit; or

(4) the rights of a transferee beneficiary or nominated person under a letter of credit are independent and superior under Section 5–114.

(d) This article does not apply to:

(1) a landlord's lien, other than an agricultural lien;

(2) a lien, other than an agricultural lien, given by statute or other rule of law for services or materials, but Section 9–333 applies with respect to priority of the lien;

(3) an assignment of a claim for wages, salary, or other compensation of an employee;

(4) a sale of accounts, chattel paper, payment intangibles, or promissory notes as part of a sale of the business out of which they arose;

(5) an assignment of accounts, chattel paper, payment intangibles, or promissory notes which is for the purpose of collection only;

(6) an assignment of a right to payment under a contract to an assignee that is also obligated to perform under the contract;

(7) an assignment of a single account, payment intangible, or promissory note to an assignee in full or partial satisfaction of a preexisting indebtedness;

(8) a transfer of an interest in or an assignment of a claim under a policy of insurance, other than an assignment by or to a health-care provider of a health-care-insurance receivable and any subsequent assignment of the right to payment, but Sections 9–315 and 9–322 apply with respect to proceeds and priorities in proceeds;

(9) an assignment of a right represented by a judgment, other than a judgment taken on a right to payment that was collateral;

(10) a right of recoupment or set-off, but:

(A) Section 9–340 applies with respect to the effectiveness of rights of recoupment or set-off against deposit accounts; and

(B) Section 9–404 applies with respect to defenses or claims of an account debtor;

(11) the creation or transfer of an interest in or lien on real property, including a lease or rents thereunder, except to the extent that provision is made for:

(A) liens on real property in Sections 9–203 and 9–308;

(B) fixtures in Section 9–334;

(C) fixture filings in Sections 9–501, 9–502, 9–512, 9–516, and 9–519; and

(D) security agreements covering personal and real property in Section 9–604;

(12) an assignment of a claim arising in tort, other than a commercial tort claim, but Sections 9–315 and 9–322 apply with respect to proceeds and priorities in proceeds; or

(13) an assignment of a deposit account in a consumer transaction, but Sections 9–315 and 9–322 apply with respect to proceeds and priorities in proceeds.

§ 9–110. Security Interests Arising under Article 2 or 2A.

A security interest arising under Section 2–401, 2–505, 2–711(3), or 2A–508(5) is subject to this article. However, until the debtor obtains possession of the goods:

(1) the security interest is enforceable, even if Section 9–203(b)(3) has not been satisfied;

(2) filing is not required to perfect the security interest;

(3) the rights of the secured party after default by the debtor are governed by Article 2 or 2A; and

(4) the security interest has priority over a conflicting security interest created by the debtor.

PART 2 Effectiveness of Security Agreement; Attachment of Security Interest; Rights of Parties to Security Agreement

[Subpart 1. Effectiveness and Attachment]

§ 9–201. General Effectiveness of Security Agreement.

(a) Except as otherwise provided in [the Uniform Commercial Code], a security agreement is effective according to its terms between the parties, against purchasers of the collateral, and against creditors.

(b) A transaction subject to this article is subject to any applicable rule of law which establishes a different rule for consumers and [insert reference to (i) any other statute or regulation that regulates the rates, charges, agreements, and practices for loans, credit sales, or other extensions of credit and (ii) any consumer-protection statute or regulation].

(c) In case of conflict between this article and a rule of law, statute, or regulation described in subsection (b), the rule of law, statute, or regulation controls. Failure to comply with a statute or regulation described in subsection (b) has only the effect the statute or regulation specifies.

(d) This article does not:

(1) validate any rate, charge, agreement, or practice that violates a rule of law, statute, or regulation described in subsection (b); or

(2) extend the application of the rule of law, statute, or regulation to a transaction not otherwise subject to it.

§ 9–202. Title to Collateral Immaterial.

Except as otherwise provided with respect to consignments or sales of accounts, chattel paper, payment intangibles, or promissory notes, the provisions of this article with regard to rights and obligations apply whether title to collateral is in the secured party or the debtor.

§ 9–203. Attachment and Enforceability of Security Interest; Proceeds; Supporting Obligations; Formal Requisites.

(a) A security interest attaches to collateral when it becomes enforceable against the debtor with respect to the collateral, unless an agreement expressly postpones the time of attachment.

(b) Except as otherwise provided in subsections (c) through (i), a security interest is enforceable against the debtor and third parties with respect to the collateral only if:

(1) value has been given;

(2) the debtor has rights in the collateral or the power to transfer rights in the collateral to a secured party; and

(3) one of the following conditions is met:

(A) the debtor has authenticated a security agreement that provides a description of the collateral and, if the security interest covers timber to be cut, a description of the land concerned;

(B) the collateral is not a certificated security and is in the possession of the secured party under Section 9–313 pursuant to the debtor's security agreement;

(C) the collateral is a certificated security in registered form and the security certificate has been delivered to the secured party under Section 8–301 pursuant to the debtor's security agreement; or

(D) the collateral is deposit accounts, electronic chattel paper, investment property, or letter-of-credit rights, and the secured party has control under Section 9–104, 9–105, 9–106, or 9–107 pursuant to the debtor's security agreement.

(c) Subsection (b) is subject to Section 4–210 on the security interest of a collecting bank, Section 5–118 on the security interest of a letter-of-credit issuer or nominated person, Section 9–110 on a security interest arising under Article 2 or 2A, and Section 9–206 on security interests in investment property.

(d) A person becomes bound as debtor by a security agreement entered into by another person if, by operation of law other than this article or by contract:

(1) the security agreement becomes effective to create a security interest in the person's property; or

(2) the person becomes generally obligated for the obligations of the other person, including the obligation secured under the security agreement, and acquires or succeeds to all or substantially all of the assets of the other person.

(e) If a new debtor becomes bound as debtor by a security agreement entered into by another person:

(1) the agreement satisfies subsection (b)(3) with respect to existing or after-acquired property of the new debtor to the extent the property is described in the agreement; and

(2) another agreement is not necessary to make a security interest in the property enforceable.

(f) The attachment of a security interest in collateral gives the secured party the rights to proceeds provided by Section 9–315 and is also attachment of a security interest in a supporting obligation for the collateral.

(g) The attachment of a security interest in a right to payment or performance secured by a security interest or other lien on personal or real property is also attachment of a security interest in the security interest, mortgage, or other lien.

(h) The attachment of a security interest in a securities account is also attachment of a security interest in the security entitlements carried in the securities account.

(i) The attachment of a security interest in a commodity account is also attachment of a security interest in the commodity contracts carried in the commodity account.

§ 9–204. After-Acquired Property; Future Advances.

(a) Except as otherwise provided in subsection (b), a security agreement may create or provide for a security interest in after-acquired collateral.

(b) A security interest does not attach under a term constituting an after-acquired property clause to:

(1) consumer goods, other than an accession when given as additional security, unless the debtor acquires rights in them within 10 days after the secured party gives value; or

(2) a commercial tort claim.

(c) A security agreement may provide that collateral secures, or that accounts, chattel paper, payment intangibles, or promissory notes are sold in connection with, future advances or other value, whether or not the advances or value are given pursuant to commitment.

§ 9–205. Use or Disposition of Collateral Permissible.

(a) A security interest is not invalid or fraudulent against creditors solely because:

(1) the debtor has the right or ability to:

(A) use, commingle, or dispose of all or part of the collateral, including returned or repossessed goods;

(B) collect, compromise, enforce, or otherwise deal with collateral;

(C) accept the return of collateral or make repossessions; or

(D) use, commingle, or dispose of proceeds; or

(2) the secured party fails to require the debtor to account for proceeds or replace collateral.

(b) This section does not relax the requirements of possession if attachment, perfection, or enforcement of a security interest depends upon possession of the collateral by the secured party.

§ 9–206. Security Interest Arising in Purchase or Delivery of Financial Asset.

(a) A security interest in favor of a securities intermediary attaches to a person's security entitlement if:

(1) the person buys a financial asset through the securities intermediary in a transaction in which the person is obligated to

pay the purchase price to the securities intermediary at the time of the purchase; and

(2) the securities intermediary credits the financial asset to the buyer's securities account before the buyer pays the securities intermediary.

(b) The security interest described in subsection (a) secures the person's obligation to pay for the financial asset.

(c) A security interest in favor of a person that delivers a certificated security or other financial asset represented by a writing attaches to the security or other financial asset if:

(1) the security or other financial asset:

(A) in the ordinary course of business is transferred by delivery with any necessary indorsement or assignment; and

(B) is delivered under an agreement between persons in the business of dealing with such securities or financial assets; and

(2) the agreement calls for delivery against payment.

(d) The security interest described in subsection (c) secures the obligation to make payment for the delivery.

[Subpart 2. Rights and Duties]

§ 9–207. Rights and Duties of Secured Party Having Possession or Control of Collateral.

(a) Except as otherwise provided in subsection (d), a secured party shall use reasonable care in the custody and preservation of collateral in the secured party's possession. In the case of chattel paper or an instrument, reasonable care includes taking necessary steps to preserve rights against prior parties unless otherwise agreed.

(b) Except as otherwise provided in subsection (d), if a secured party has possession of collateral:

(1) reasonable expenses, including the cost of insurance and payment of taxes or other charges, incurred in the custody, preservation, use, or operation of the collateral are chargeable to the debtor and are secured by the collateral;

(2) the risk of accidental loss or damage is on the debtor to the extent of a deficiency in any effective insurance coverage;

(3) the secured party shall keep the collateral identifiable, but fungible collateral may be commingled; and

(4) the secured party may use or operate the collateral:

(A) for the purpose of preserving the collateral or its value;

(B) as permitted by an order of a court having competent jurisdiction; or

(C) except in the case of consumer goods, in the manner and to the extent agreed by the debtor.

(c) Except as otherwise provided in subsection (d), a secured party having possession of collateral or control of collateral under Section 9–104, 9–105, 9–106, or 9–107:

(1) may hold as additional security any proceeds, except money or funds, received from the collateral;

(2) shall apply money or funds received from the collateral to reduce the secured obligation, unless remitted to the debtor; and

(3) may create a security interest in the collateral.

(d) If the secured party is a buyer of accounts, chattel paper, payment intangibles, or promissory notes or a consignor:

(1) subsection (a) does not apply unless the secured party is entitled under an agreement:

(A) to charge back uncollected collateral; or

(B) otherwise to full or limited recourse against the debtor or a secondary obligor based on the nonpayment or other default of an account debtor or other obligor on the collateral; and

(2) subsections (b) and (c) do not apply.

§ 9–208. Additional Duties of Secured Party Having Control of Collateral.

(a) This section applies to cases in which there is no outstanding secured obligation and the secured party is not committed to make advances, incur obligations, or otherwise give value.

(b) Within 10 days after receiving an authenticated demand by the debtor:

(1) a secured party having control of a deposit account under Section 9–104(a)(2) shall send to the bank with which the deposit account is maintained an authenticated statement that releases the bank from any further obligation to comply with instructions originated by the secured party;

(2) a secured party having control of a deposit account under Section 9–104(a)(3) shall:

(A) pay the debtor the balance on deposit in the deposit account; or

(B) transfer the balance on deposit into a deposit account in the debtor's name;

(3) a secured party, other than a buyer, having control of electronic chattel paper under Section 9–105 shall:

(A) communicate the authoritative copy of the electronic chattel paper to the debtor or its designated custodian;

(B) if the debtor designates a custodian that is the designated custodian with which the authoritative copy of the electronic chattel paper is maintained for the secured party, communicate to the custodian an authenticated record releasing the designated custodian from any further obligation to comply with instructions originated by the secured party and instructing

the custodian to comply with instructions originated by the debtor; and

(C) take appropriate action to enable the debtor or its designated custodian to make copies of or revisions to the authoritative copy which add or change an identified assignee of the authoritative copy without the consent of the secured party;

(4) a secured party having control of investment property under Section 8–106(d)(2) or 9–106(b) shall send to the securities intermediary or commodity intermediary with which the security entitlement or commodity contract is maintained an authenticated record that releases the securities intermediary or commodity intermediary from any further obligation to comply with entitlement orders or directions originated by the secured party; and

(5) a secured party having control of a letter-of-credit right under Section 9–107 shall send to each person having an unfulfilled obligation to pay or deliver proceeds of the letter of credit to the secured party an authenticated release from any further obligation to pay or deliver proceeds of the letter of credit to the secured party.

§ 9–209. Duties of Secured Party If Account Debtor Has Been Notified of Assignment.

(a) Except as otherwise provided in subsection (c), this section applies if:

(1) there is no outstanding secured obligation; and

(2) the secured party is not committed to make advances, incur obligations, or otherwise give value.

(b) Within 10 days after receiving an authenticated demand by the debtor, a secured party shall send to an account debtor that has received notification of an assignment to the secured party as assignee under Section 9–406(a) an authenticated record that releases the account debtor from any further obligation to the secured party.

(c) This section does not apply to an assignment constituting the sale of an account, chattel paper, or payment intangible.

§ 9–210. Request for Accounting; Request Regarding List of Collateral or Statement of Account.

(a) In this section:

(1) "Request" means a record of a type described in paragraph (2), (3), or (4).

(2) "Request for an accounting" means a record authenticated by a debtor requesting that the recipient provide an accounting of the unpaid obligations secured by collateral and reasonably identifying the transaction or relationship that is the subject of the request.

(3) "Request regarding a list of collateral" means a record authenticated by a debtor requesting that the recipient approve or correct a list of what the debtor believes to be the collateral securing an obligation and reasonably identifying the transaction or relationship that is the subject of the request.

(4) "Request regarding a statement of account" means a record authenticated by a debtor requesting that the recipient approve or correct a statement indicating what the debtor believes to be the aggregate amount of unpaid obligations secured by collateral as of a specified date and reasonably identifying the transaction or relationship that is the subject of the request.

(b) Subject to subsections (c), (d), (e), and (f), a secured party, other than a buyer of accounts, chattel paper, payment intangibles, or promissory notes or a consignor, shall comply with a request within 14 days after receipt:

(1) in the case of a request for an accounting, by authenticating and sending to the debtor an accounting; and

(2) in the case of a request regarding a list of collateral or a request regarding a statement of account, by authenticating and sending to the debtor an approval or correction.

(c) A secured party that claims a security interest in all of a particular type of collateral owned by the debtor may comply with a request regarding a list of collateral by sending to the debtor an authenticated record including a statement to that effect within 14 days after receipt.

(d) A person that receives a request regarding a list of collateral, claims no interest in the collateral when it receives the request, and claimed an interest in the collateral at an earlier time shall comply with the request within 14 days after receipt by sending to the debtor an authenticated record:

(1) disclaiming any interest in the collateral; and

(2) if known to the recipient, providing the name and mailing address of any assignee of or successor to the recipient's interest in the collateral.

(e) A person that receives a request for an accounting or a request regarding a statement of account, claims no interest in the obligations when it receives the request, and claimed an interest in the obligations at an earlier time shall comply with the request within 14 days after receipt by sending to the debtor an authenticated record:

(1) disclaiming any interest in the obligations; and

(2) if known to the recipient, providing the name and mailing address of any assignee of or successor to the recipient's interest in the obligations.

(f) A debtor is entitled without charge to one response to a request under this section during any six-month period. The secured party may require payment of a charge not exceeding $25 for each additional response.

As amended in 1999.

PART 3 Perfection and Priority

[Subpart 1. Law Governing Perfection and Priority]

§ 9–301. Law Governing Perfection and Priority of Security Interests.

Except as otherwise provided in Sections 9–303 through 9–306, the following rules determine the law governing perfection, the effect of perfection or nonperfection, and the priority of a security interest in collateral:

(1) Except as otherwise provided in this section, while a debtor is located in a jurisdiction, the local law of that jurisdiction governs perfection, the effect of perfection or nonperfection, and the priority of a security interest in collateral.

(2) While collateral is located in a jurisdiction, the local law of that jurisdiction governs perfection, the effect of perfection or nonperfection, and the priority of a possessory security interest in that collateral.

(3) Except as otherwise provided in paragraph (4), while negotiable documents, goods, instruments, money, or tangible chattel paper is located in a jurisdiction, the local law of that jurisdiction governs:

(A) perfection of a security interest in the goods by filing a fixture filing;

(B) perfection of a security interest in timber to be cut; and

(C) the effect of perfection or nonperfection and the priority of a nonpossessory security interest in the collateral.

(4) The local law of the jurisdiction in which the wellhead or minehead is located governs perfection, the effect of perfection or nonperfection, and the priority of a security interest in as-extracted collateral.

§ 9–302. Law Governing Perfection and Priority of Agricultural Liens.

While farm products are located in a jurisdiction, the local law of that jurisdiction governs perfection, the effect of perfection or nonperfection, and the priority of an agricultural lien on the farm products.

§ 9–303. Law Governing Perfection and Priority of Security Interests in Goods Covered by a Certificate of Title.

(a) This section applies to goods covered by a certificate of title, even if there is no other relationship between the jurisdiction under whose certificate of title the goods are covered and the goods or the debtor.

(b) Goods become covered by a certificate of title when a valid application for the certificate of title and the applicable fee are delivered to the appropriate authority. Goods cease to be covered by a certificate of title at the earlier of the time the certificate of title ceases to be effective under the law of the issuing jurisdiction or the time the goods become covered subsequently by a certificate of title issued by another jurisdiction.

(c) The local law of the jurisdiction under whose certificate of title the goods are covered governs perfection, the effect of perfection or nonperfection, and the priority of a security interest in goods covered by a certificate of title from the time the goods become covered by the certificate of title until the goods cease to be covered by the certificate of title.

§ 9–304. Law Governing Perfection and Priority of Security Interests in Deposit Accounts.

(a) The local law of a bank's jurisdiction governs perfection, the effect of perfection or nonperfection, and the priority of a security interest in a deposit account maintained with that bank.

(b) The following rules determine a bank's jurisdiction for purposes of this part:

(1) If an agreement between the bank and the debtor governing the deposit account expressly provides that a particular jurisdiction is the bank's jurisdiction for purposes of this part, this article, or [the Uniform Commercial Code], that jurisdiction is the bank's jurisdiction.

(2) If paragraph (1) does not apply and an agreement between the bank and its customer governing the deposit account expressly provides that the agreement is governed by the law of a particular jurisdiction, that jurisdiction is the bank's jurisdiction.

(3) If neither paragraph (1) nor paragraph (2) applies and an agreement between the bank and its customer governing the deposit account expressly provides that the deposit account is maintained at an office in a particular jurisdiction, that jurisdiction is the bank's jurisdiction.

(4) If none of the preceding paragraphs applies, the bank's jurisdiction is the jurisdiction in which the office identified in an account statement as the office serving the customer's account is located.

(5) If none of the preceding paragraphs applies, the bank's jurisdiction is the jurisdiction in which the chief executive office of the bank is located.

§ 9–305. Law Governing Perfection and Priority of Security Interests in Investment Property.

(a) Except as otherwise provided in subsection (c), the following rules apply:

(1) While a security certificate is located in a jurisdiction, the local law of that jurisdiction governs perfection, the

effect of perfection or nonperfection, and the priority of a security interest in the certificated security represented thereby.

(2) The local law of the issuer's jurisdiction as specified in Section 8–110(d) governs perfection, the effect of perfection or nonperfection, and the priority of a security interest in an uncertificated security.

(3) The local law of the securities intermediary's jurisdiction as specified in Section 8–110(e) governs perfection, the effect of perfection or nonperfection, and the priority of a security interest in a security entitlement or securities account.

(4) The local law of the commodity intermediary's jurisdiction governs perfection, the effect of perfection or nonperfection, and the priority of a security interest in a commodity contract or commodity account.

(b) The following rules determine a commodity intermediary's jurisdiction for purposes of this part:

(1) If an agreement between the commodity intermediary and commodity customer governing the commodity account expressly provides that a particular jurisdiction is the commodity intermediary's jurisdiction for purposes of this part, this article, or [the Uniform Commercial Code], that jurisdiction is the commodity intermediary's jurisdiction.

(2) If paragraph (1) does not apply and an agreement between the commodity intermediary and commodity customer governing the commodity account expressly provides that the agreement is governed by the law of a particular jurisdiction, that jurisdiction is the commodity intermediary's jurisdiction.

(3) If neither paragraph (1) nor paragraph (2) applies and an agreement between the commodity intermediary and commodity customer governing the commodity account expressly provides that the commodity account is maintained at an office in a particular jurisdiction, that jurisdiction is the commodity intermediary's jurisdiction.

(4) If none of the preceding paragraphs applies, the commodity intermediary's jurisdiction is the jurisdiction in which the office identified in an account statement as the office serving the commodity customer's account is located.

(5) If none of the preceding paragraphs applies, the commodity intermediary's jurisdiction is the jurisdiction in which the chief executive office of the commodity intermediary is located.

(c) The local law of the jurisdiction in which the debtor is located governs:

(1) perfection of a security interest in investment property by filing;

(2) automatic perfection of a security interest in investment property created by a broker or securities intermediary; and

(3) automatic perfection of a security interest in a commodity contract or commodity account created by a commodity intermediary.

§ 9–306. Law Governing Perfection and Priority of Security Interests in Letter-of-Credit Rights.

(a) Subject to subsection (c), the local law of the issuer's jurisdiction or a nominated person's jurisdiction governs perfection, the effect of perfection or nonperfection, and the priority of a security interest in a letter-of-credit right if the issuer's jurisdiction or nominated person's jurisdiction is a State.

(b) For purposes of this part, an issuer's jurisdiction or nominated person's jurisdiction is the jurisdiction whose law governs the liability of the issuer or nominated person with respect to the letter-of-credit right as provided in Section 5–116.

(c) This section does not apply to a security interest that is perfected only under Section 9–308(d).

§ 9–307. Location of Debtor.

(a) In this section, "place of business" means a place where a debtor conducts its affairs.

(b) Except as otherwise provided in this section, the following rules determine a debtor's location:

(1) A debtor who is an individual is located at the individual's principal residence.

(2) A debtor that is an organization and has only one place of business is located at its place of business.

(3) A debtor that is an organization and has more than one place of business is located at its chief executive office.

(c) Subsection (b) applies only if a debtor's residence, place of business, or chief executive office, as applicable, is located in a jurisdiction whose law generally requires information concerning the existence of a nonpossessory security interest to be made generally available in a filing, recording, or registration system as a condition or result of the security interest's obtaining priority over the rights of a lien creditor with respect to the collateral. If subsection (b) does not apply, the debtor is located in the District of Columbia.

(d) A person that ceases to exist, have a residence, or have a place of business continues to be located in the jurisdiction specified by subsections (b) and (c).

(e) A registered organization that is organized under the law of a State is located in that State.

(f) Except as otherwise provided in subsection (i), a registered organization that is organized under the law of the United Statesand a branch or agency of a bank that is not organized under the law of the United States or a State are located:

(1) in the State that the law of the United States designates, if the law designates a State of location;

(2) in the State that the registered organization, branch, or agency designates, if the law of the United States authorizes the

registered organization, branch, or agency to designate its State of location; or

(3) in the District of Columbia, if neither paragraph (1) nor paragraph (2) applies.

(g) A registered organization continues to be located in the jurisdiction specified by subsection (e) or (f) notwithstanding:

(1) the suspension, revocation, forfeiture, or lapse of the registered organization's status as such in its jurisdiction of organization; or

(2) the dissolution, winding up, or cancellation of the existence of the registered organization.

(h) The United States is located in the District of Columbia.

(i) A branch or agency of a bank that is not organized under the law of the United States or a State is located in the State in which the branch or agency is licensed, if all branches and agencies of the bank are licensed in only one State.

(j) A foreign air carrier under the Federal Aviation Act of 1958, as amended, is located at the designated office of the agent upon which service of process may be made on behalf of the carrier.

(k) This section applies only for purposes of this part.

[Subpart 2. Perfection]

§ 9–308. When Security Interest or Agricultural Lien Is Perfected; Continuity of Perfection.

(a) Except as otherwise provided in this section and Section 9–309, a security interest is perfected if it has attached and all of the applicable requirements for perfection in Sections 9–310 through 9–316 have been satisfied. A security interest is perfected when it attaches if the applicable requirements are satisfied before the security interest attaches.

(b) An agricultural lien is perfected if it has become effective and all of the applicable requirements for perfection in Section 9–310 have been satisfied. An agricultural lien is perfected when it becomes effective if the applicable requirements are satisfied before the agricultural lien becomes effective.

(c) A security interest or agricultural lien is perfected continuously if it is originally perfected by one method under this article and is later perfected by another method under this article, without an intermediate period when it was unperfected.

(d) Perfection of a security interest in collateral also perfects a security interest in a supporting obligation for the collateral.

(e) Perfection of a security interest in a right to payment or performance also perfects a security interest in a security interest, mortgage, or other lien on personal or real property securing the right.

(f) Perfection of a security interest in a securities account also perfects a security interest in the security entitlements carried in the securities account.

(g) Perfection of a security interest in a commodity account also perfects a security interest in the commodity contracts carried in the commodity account.

Legislative Note: Any statute conflicting with subsection (e) must be made expressly subject to that subsection.

§ 9–309. Security Interest Perfected upon Attachment.

The following security interests are perfected when they attach:

(1) a purchase-money security interest in consumer goods, except as otherwise provided in Section 9–311(b) with respect to consumer goods that are subject to a statute or treaty described in Section 9–311(a);

(2) an assignment of accounts or payment intangibles which does not by itself or in conjunction with other assignments to the same assignee transfer a significant part of the assignor's outstanding accounts or payment intangibles;

(3) a sale of a payment intangible;

(4) a sale of a promissory note;

(5) a security interest created by the assignment of a health-care-insurance receivable to the provider of the health-care goods or services;

(6) a security interest arising under Section 2–401, 2–505, 2–711 (3), or 2A–508(5), until the debtor obtains possession of the collateral;

(7) a security interest of a collecting bank arising under Section 4–210;

(8) a security interest of an issuer or nominated person arising under Section 5–118;

(9) a security interest arising in the delivery of a financial asset under Section 9–206(c);

(10) a security interest in investment property created by a broker or securities intermediary;

(11) a security interest in a commodity contract or a commodity account created by a commodity intermediary;

(12) an assignment for the benefit of all creditors of the transferor and subsequent transfers by the assignee thereunder; and

(13) a security interest created by an assignment of a beneficial interest in a decedent's estate; and

(14) a sale by an individual of an account that is a right to payment of winnings in a lottery or other game of chance.

§ 9–310. When Filing Required to Perfect Security Interest or Agricultural Lien; Security Interests and Agricultural Liens to Which Filing Provisions Do Not Apply.

(a) Except as otherwise provided in subsection (b) and Section 9–312(b), a financing statement must be filed to perfect all security interests and agricultural liens.

(b) The filing of a financing statement is not necessary to perfect a security interest:

(1) that is perfected under Section 9–308(d), (e), (f), or (g);

(2) that is perfected under Section 9–309 when it attaches;

(3) in property subject to a statute, regulation, or treaty described in Section 9–311(a);

(4) in goods in possession of a bailee which is perfected under Section 9–312(d)(1) or (2);

(5) in certificated securities, documents, goods, or instruments which is perfected without filing or possession under Section 9–312(e), (f), or (g);

(6) in collateral in the secured party's possession under Section 9–313;

(7) in a certificated security which is perfected by delivery of the security certificate to the secured party under Section 9–313;

(8) in deposit accounts, electronic chattel paper, investment property, or letter-of-credit rights which is perfected by control under Section 9–314;

(9) in proceeds which is perfected under Section 9–315; or

(10) that is perfected under Section 9–316.

(c) If a secured party assigns a perfected security interest or agricultural lien, a filing under this article is not required to continue the perfected status of the security interest against creditors of and transferees from the original debtor.

§ 9–311. Perfection of Security Interests in Property Subject to Certain Statutes, Regulations, and Treaties.

(a) Except as otherwise provided in subsection (d), the filing of a financing statement is not necessary or effective to perfect a security interest in property subject to:

(1) a statute, regulation, or treaty of the United States whose requirements for a security interest's obtaining priority over the rights of a lien creditor with respect to the property preempt Section 9–310(a);

(2) [list any certificate-of-title statute covering automobiles, trailers, mobile homes, boats, farm tractors, or the like, which provides for a security interest to be indicated on the certificate as a condition or result of perfection, and any non-Uniform Commercial Code central filing statute]; or

(3) a certificate-of-title statute of another jurisdiction which provides for a security interest to be indicated on the certificate as a condition or result of the security interest's obtaining priority over the rights of a lien creditor with respect to the property.

(b) Compliance with the requirements of a statute, regulation, or treaty described in subsection (a) for obtaining priority over the rights of a lien creditor is equivalent to the filing of a financing statement under this article. Except as otherwise provided in subsection (d) and Sections 9–313 and 9–316(d) and (e) for goods covered by a certificate of title, a security interest in property subject to a statute, regulation, or treaty described in subsection (a) may be perfected only by compliance with those requirements, and a security interest so perfected remains perfected notwithstanding a change in the use or transfer of possession of the collateral.

(c) Except as otherwise provided in subsection (d) and Section 9–316(d) and (e), duration and renewal of perfection of a security interest perfected by compliance with the requirements prescribed by a statute, regulation, or treaty described in subsection (a) are governed by the statute, regulation, or treaty. In other respects, the security interest is subject to this article.

(d) During any period in which collateral subject to a statute specified in subsection (a)(2) is inventory held for sale or lease by a person or leased by that person as lessor and that person is in the business of selling goods of that kind, this section does not apply to a security interest in that collateral created by that person.

Legislative Note: This Article contemplates that perfection of a security interest in goods covered by a certificate of title occurs upon receipt by appropriate State officials of a properly tendered application for a certificate of title on which the security interest is to be indicated, without a relation back to an earlier time. States whose certificate-of-title statutes provide for perfection at a different time or contain a relation-back provision should amend the statutes accordingly.

§ 9–312. Perfection of Security Interests in Chattel Paper, Deposit Accounts, Documents, Goods Covered by Documents, Instruments, Investment Property, Letter-of-Credit Rights, and Money; Perfection by Permissive Filing; Temporary Perfection without Filing or Transfer of Possession.

(a) A security interest in chattel paper, negotiable documents, instruments, or investment property may be perfected by filing.

(b) Except as otherwise provided in Section 9–315(c) and (d) for proceeds:

(1) a security interest in a deposit account may be perfected only by control under Section 9–314;

(2) and except as otherwise provided in Section 9–308(d), a security interest in a letter-of-credit right may be perfected only by control under Section 9–314; and

(3) a security interest in money may be perfected only by the secured party's taking possession under Section 9–313.

(c) While goods are in the possession of a bailee that has issued a negotiable document covering the goods:

(1) a security interest in the goods may be perfected by perfecting a security interest in the document; and

(2) a security interest perfected in the document has priority over any security interest that becomes perfected in the goods by another method during that time.

(d) While goods are in the possession of a bailee that has issued a nonnegotiable document covering the goods, a security interest in the goods may be perfected by:

(1) issuance of a document in the name of the secured party;

(2) the bailee's receipt of notification of the secured party's interest; or

(3) filing as to the goods.

(e) A security interest in certificated securities, negotiable documents, or instruments is perfected without filing or the taking of possession for a period of 20 days from the time it attaches to the extent that it arises for new value given under an authenticated security agreement.

(f) A perfected security interest in a negotiable document or goods in possession of a bailee, other than one that has issued a negotiable document for the goods, remains perfected for 20 days without filing if the secured party makes available to the debtor the goods or documents representing the goods for the purpose of:

(1) ultimate sale or exchange; or

(2) loading, unloading, storing, shipping, transshipping, manufacturing, processing, or otherwise dealing with them in a manner preliminary to their sale or exchange.

(g) A perfected security interest in a certificated security or instrument remains perfected for 20 days without filing if the secured party delivers the security certificate or instrument to the debtor for the purpose of:

(1) ultimate sale or exchange; or

(2) presentation, collection, enforcement, renewal, or registration of transfer.

(h) After the 20-day period specified in subsection (e), (f), or (g) expires, perfection depends upon compliance with this article.

§ 9–313. When Possession by or Delivery to Secured Party Perfects Security Interest without Filing.

(a) Except as otherwise provided in subsection (b), a secured party may perfect a security interest in negotiable documents, goods, instruments, money, or tangible chattel paper by taking possession of the collateral. A secured party may perfect a security interest in certificated securities by taking delivery of the certificated securities under Section 8–301.

(b) With respect to goods covered by a certificate of title issued by this State, a secured party may perfect a security interest in the goods by taking possession of the goods only in the circumstances described in Section 9–316(d).

(c) With respect to collateral other than certificated securities and goods covered by a document, a secured party takes possession of collateral in the possession of a person other than the debtor, the secured party, or a lessee of the collateral from the debtor in the ordinary course of the debtor's business, when:

(1) the person in possession authenticates a record acknowledging that it holds possession of the collateral for the secured party's benefit; or

(2) the person takes possession of the collateral after having authenticated a record acknowledging that it will hold possession of collateral for the secured party's benefit.

(d) If perfection of a security interest depends upon possession of the collateral by a secured party, perfection occurs no earlier than the time the secured party takes possession and continues only while the secured party retains possession.

(e) A security interest in a certificated security in registered form is perfected by delivery when delivery of the certificated security occurs under Section 8–301 and remains perfected by delivery until the debtor obtains possession of the security certificate.

(f) A person in possession of collateral is not required to acknowledge that it holds possession for a secured party's benefit.

(g) If a person acknowledges that it holds possession for the secured party's benefit:

(1) the acknowledgment is effective under subsection (c) or Section 8–301(a), even if the acknowledgment violates the rights of a debtor; and

(2) unless the person otherwise agrees or law other than this article otherwise provides, the person does not owe any duty to the secured party and is not required to confirm the acknowledgment to another person.

(h) A secured party having possession of collateral does not relinquish possession by delivering the collateral to a person other than the debtor or a lessee of the collateral from the debtor in the ordinary course of the debtor's business if the person was instructed before the delivery or is instructed contemporaneously with the delivery:

(1) to hold possession of the collateral for the secured party's benefit; or

(2) to redeliver the collateral to the secured party.

(i) A secured party does not relinquish possession, even if a delivery under subsection (h) violates the rights of a debtor. A person to which collateral is delivered under subsection (h) does not owe any duty to the secured party and is not required to confirm the delivery to another person unless the person otherwise agrees or law other than this article otherwise provides.

§ 9–314. Perfection by Control.

(a) A security interest in investment property, deposit accounts, letter-of-credit rights, or electronic chattel paper may be perfected by control of the collateral under Section 9–104, 9–105, 9–106, or 9–107.

(b) A security interest in deposit accounts, electronic chattel paper, or letter-of-credit rights is perfected by control under Section 9–104, 9–105, or 9–107 when the secured party obtains control and remains perfected by control only while the secured party retains control.

(c) A security interest in investment property is perfected by control under Section 9–106 from the time the secured party obtains control and remains perfected by control until:

(1) the secured party does not have control; and

(2) one of the following occurs:

(A) if the collateral is a certificated security, the debtor has or acquires possession of the security certificate;

(B) if the collateral is an uncertificated security, the issuer has registered or registers the debtor as the registered owner; or

(C) if the collateral is a security entitlement, the debtor is or becomes the entitlement holder.

§ 9–315. Secured Party's Rights on Disposition of Collateral and in Proceeds.

(a) Except as otherwise provided in this article and in Section 2–403(2):

(1) a security interest or agricultural lien continues in collateral notwithstanding sale, lease, license, exchange, or other disposition thereof unless the secured party authorized the disposition free of the security interest or agricultural lien; and

(2) a security interest attaches to any identifiable proceeds of collateral.

(b) Proceeds that are commingled with other property are identifiable proceeds:

(1) if the proceeds are goods, to the extent provided by Section 9–336; and

(2) if the proceeds are not goods, to the extent that the secured party identifies the proceeds by a method of tracing, including application of equitable principles, that is permitted under law other than this article with respect to commingled property of the type involved.

(c) A security interest in proceeds is a perfected security interest if the security interest in the original collateral was perfected.

(d) A perfected security interest in proceeds becomes unperfected on the 21st day after the security interest attaches to the proceeds unless:

(1) the following conditions are satisfied:

(A) a filed financing statement covers the original collateral;

(B) the proceeds are collateral in which a security interest may be perfected by filing in the office in which the financing statement has been filed; and

(C) the proceeds are not acquired with cash proceeds;

(2) the proceeds are identifiable cash proceeds; or

(3) the security interest in the proceeds is perfected other than under subsection (c) when the security interest attaches to the proceeds or within 20 days thereafter.

(e) If a filed financing statement covers the original collateral, a security interest in proceeds which remains perfected under subsection (d)(1) becomes unperfected at the later of:

(1) when the effectiveness of the filed financing statement lapses under Section 9–515 or is terminated under Section 9–513; or

(2) the 21st day after the security interest attaches to the proceeds.

§ 9–316. Continued Perfection of Security Interest Following Change in Governing Law.

(a) A security interest perfected pursuant to the law of the jurisdiction designated in Section 9–301(1) or 9–305(c) remains perfected until the earliest of:

(1) the time perfection would have ceased under the law of that jurisdiction;

(2) the expiration of four months after a change of the debtor's location to another jurisdiction; or

(3) the expiration of one year after a transfer of collateral to a person that thereby becomes a debtor and is located in another jurisdiction.

(b) If a security interest described in subsection (a) becomes perfected under the law of the other jurisdiction before the earliest time or event described in that subsection, it remains

perfected thereafter. If the security interest does not become perfected under the law of the other jurisdiction before the earliest time or event, it becomes unperfected and is deemed never to have been perfected as against a purchaser of the collateral for value.

(c) A possessory security interest in collateral, other than goods covered by a certificate of title and as-extracted collateral consisting of goods, remains continuously perfected if:

(1) the collateral is located in one jurisdiction and subject to a security interest perfected under the law of that jurisdiction;

(2) thereafter the collateral is brought into another jurisdiction; and

(3) upon entry into the other jurisdiction, the security interest is perfected under the law of the other jurisdiction.

(d) Except as otherwise provided in subsection (e), a security interest in goods covered by a certificate of title which is perfected by any method under the law of another jurisdiction when the goods become covered by a certificate of title from this State remains perfected until the security interest would have become unperfected under the law of the other jurisdiction had the goods not become so covered.

(e) A security interest described in subsection (d) becomes unperfected as against a purchaser of the goods for value and is deemed never to have been perfected as against a purchaser of the goods for value if the applicable requirements for perfection under Section 9–311(b) or 9–313 are not satisfied before the earlier of:

(1) the time the security interest would have become unperfected under the law of the other jurisdiction had the goods not become covered by a certificate of title from this State; or

(2) the expiration of four months after the goods had become so covered.

(f) A security interest in deposit accounts, letter-of-credit rights, or investment property which is perfected under the law of the bank's jurisdiction, the issuer's jurisdiction, a nominated person's jurisdiction, the securities intermediary's jurisdiction, or the commodity intermediary's jurisdiction, as applicable, remains perfected until the earlier of:

(1) the time the security interest would have become unperfected under the law of that jurisdiction; or

(2) the expiration of four months after a change of the applicable jurisdiction to another jurisdiction.

(g) If a security interest described in subsection (f) becomes perfected under the law of the other jurisdiction before the earlier of the time or the end of the period described in that subsection, it remains perfected thereafter. If the security interest does not become perfected under the law of the other jurisdiction before the earlier of that time or the end of that period, it becomes unperfected and is deemed never to have been perfected as against a purchaser of the collateral for value.

[Subpart 3. Priority]

§ 9–317. Interests That Take Priority over or Take Free of Security Interest or Agricultural Lien.

(a) A security interest or agricultural lien is subordinate to the rights of:

(1) a person entitled to priority under Section 9–322; and

(2) except as otherwise provided in subsection (e), a person that becomes a lien creditor before the earlier of the time:

(A) the security interest or agricultural lien is perfected; or

(B) one of the conditions specified in Section 9–203(b)(3) is met and a financing statement covering the collateral is filed.

(b) Except as otherwise provided in subsection (e), a buyer, other than a secured party, of tangible chattel paper, documents, goods, instruments, or a security certificate takes free of a security interest or agricultural lien if the buyer gives value and receives delivery of the collateral without knowledge of the security interest or agricultural lien and before it is perfected.

(c) Except as otherwise provided in subsection (e), a lessee of goods takes free of a security interest or agricultural lien if the lessee gives value and receives delivery of the collateral without knowledge of the security interest or agricultural lien and before it is perfected.

(d) A licensee of a general intangible or a buyer, other than a secured party, of accounts, electronic chattel paper, general intangibles, or investment property other than a certificated security takes free of a security interest if the licensee or buyer gives value without knowledge of the security interest and before it is perfected.

(e) Except as otherwise provided in Sections 9–320 and 9–321, if a person files a financing statement with respect to a purchase-money security interest before or within 20 days after the debtor receives delivery of the collateral, the security interest takes priority over the rights of a buyer, lessee, or lien creditor which arise between the time the security interest attaches and the time of filing.

As amended in 2000.

§ 9–318. No Interest Retained in Right to Payment That Is Sold; Rights and Title of Seller of Account or Chattel Paper with Respect to Creditors and Purchasers.

(a) A debtor that has sold an account, chattel paper, payment intangible, or promissory note does not retain a legal or equitable interest in the collateral sold.

(b) For purposes of determining the rights of creditors of, and purchasers for value of an account or chattel paper from, a debtor that has sold an account or chattel paper, while the buyer's security interest is unperfected, the debtor is deemed to have rights and title to the account or chattel paper identical to those the debtor sold.

§ 9–319. Rights and Title of Consignee with Respect to Creditors and Purchasers.

(a) Except as otherwise provided in subsection (b), for purposes of determining the rights of creditors of, and purchasers for value of goods from, a consignee, while the goods are in the possession of the consignee, the consignee is deemed to have rights and title to the goods identical to those the consignor had or had power to transfer.

(b) For purposes of determining the rights of a creditor of a consignee, law other than this article determines the rights and title of a consignee while goods are in the consignee's possession if, under this part, a perfected security interest held by the consignor would have priority over the rights of the creditor.

§ 9–320. Buyer of Goods.

(a) Except as otherwise provided in subsection (e), a buyer in ordinary course of business, other than a person buying farm products from a person engaged in farming operations, takes free of a security interest created by the buyer's seller, even if the security interest is perfected and the buyer knows of its existence.

(b) Except as otherwise provided in subsection (e), a buyer of goods from a person who used or bought the goods for use primarily for personal, family, or household purposes takes free of a security interest, even if perfected, if the buyer buys:

(1) without knowledge of the security interest;

(2) for value;

(3) primarily for the buyer's personal, family, or household purposes; and

(4) before the filing of a financing statement covering the goods.

(c) To the extent that it affects the priority of a security interest over a buyer of goods under subsection (b), the period of effectiveness of a filing made in the jurisdiction in which the seller is located is governed by Section 9–316(a) and (b).

(d) A buyer in ordinary course of business buying oil, gas, or other minerals at the wellhead or minehead or after extraction takes free of an interest arising out of an encumbrance.

(e) Subsections (a) and (b) do not affect a security interest in goods in the possession of the secured party under Section 9–313.

§ 9–321. Licensee of General Intangible and Lessee of Goods in Ordinary Course of Business.

(a) In this section, "licensee in ordinary course of business" means a person that becomes a licensee of a general intangible in good faith, without knowledge that the license violates the rights of another person in the general intangible, and in the ordinary course from a person in the business of licensing general intangibles of that kind. A person becomes a licensee in the ordinary course if the license to the person comports with the usual or customary practices in the kind of business in which the licensor is engaged or with the licensor's own usual or customary practices.

(b) A licensee in ordinary course of business takes its rights under a nonexclusive license free of a security interest in the general intangible created by the licensor, even if the security interest is perfected and the licensee knows of its existence.

(c) A lessee in ordinary course of business takes its leasehold interest free of a security interest in the goods created by the lessor, even if the security interest is perfected and the lessee knows of its existence.

§ 9–322. Priorities among Conflicting Security Interests in and Agricultural Liens on Same Collateral.

(a) Except as otherwise provided in this section, priority among conflicting security interests and agricultural liens in the same collateral is determined according to the following rules:

(1) Conflicting perfected security interests and agricultural liens rank according to priority in time of filing or perfection. Priority dates from the earlier of the time a filing covering the collateral is first made or the security interest or agricultural lien is first perfected, if there is no period thereafter when there is neither filing nor perfection.

(2) A perfected security interest or agricultural lien has priority over a conflicting unperfected security interest or agricultural lien.

(3) The first security interest or agricultural lien to attach or become effective has priority if conflicting security interests and agricultural liens are unperfected.

(b) For the purposes of subsection (a)(1):

(1) the time of filing or perfection as to a security interest in collateral is also the time of filing or perfection as to a security interest in proceeds; and

(2) the time of filing or perfection as to a security interest in collateral supported by a supporting obligation is also the time of filing or perfection as to a security interest in the supporting obligation.

(c) Except as otherwise provided in subsection (f), a security interest in collateral which qualifies for priority over a

conflicting security interest under Section 9–327, 9–328, 9–329, 9–330, or 9–331 also has priority over a conflicting security interest in:

(1) any supporting obligation for the collateral; and

(2) proceeds of the collateral if:

(A) the security interest in proceeds is perfected;

(B) the proceeds are cash proceeds or of the same type as the collateral; and

(C) in the case of proceeds that are proceeds of proceeds, all intervening proceeds are cash proceeds, proceeds of the same type as the collateral, or an account relating to the collateral.

(d) Subject to subsection (e) and except as otherwise provided in subsection (f), if a security interest in chattel paper, deposit accounts, negotiable documents, instruments, investment property, or letter-of-credit rights is perfected by a method other than filing, conflicting perfected security interests in proceeds of the collateral rank according to priority in time of filing.

(e) Subsection (d) applies only if the proceeds of the collateral are not cash proceeds, chattel paper, negotiable documents, instruments, investment property, or letter-of-credit rights.

(f) Subsections (a) through (e) are subject to:

(1) subsection (g) and the other provisions of this part;

(2) Section 4–210 with respect to a security interest of a collecting bank;

(3) Section 5–118 with respect to a security interest of an issuer or nominated person; and

(4) Section 9–110 with respect to a security interest arising under Article 2 or 2A.

(g) A perfected agricultural lien on collateral has priority over a conflicting security interest in or agricultural lien on the same collateral if the statute creating the agricultural lien so provides.

§ 9–323. Future Advances.

(a) Except as otherwise provided in subsection (c), for purposes of determining the priority of a perfected security interest under Section 9–322(a)(1), perfection of the security interest dates from the time an advance is made to the extent that the security interest secures an advance that:

(1) is made while the security interest is perfected only:

(A) under Section 9–309 when it attaches; or

(B) temporarily under Section 9–312(e), (f), or (g); and

(2) is not made pursuant to a commitment entered into before or while the security interest is perfected by a method other than under Section 9–309 or 9–312(e), (f), or (g).

(b) Except as otherwise provided in subsection (c), a security interest is subordinate to the rights of a person that becomes a lien creditor to the extent that the security interest secures an advance made more than 45 days after the person becomes a lien creditor unless the advance is made:

(1) without knowledge of the lien; or

(2) pursuant to a commitment entered into without knowledge of the lien.

(c) Subsections (a) and (b) do not apply to a security interest held by a secured party that is a buyer of accounts, chattel paper, payment intangibles, or promissory notes or a consignor.

(d) Except as otherwise provided in subsection (e), a buyer of goods other than a buyer in ordinary course of business takes free of a security interest to the extent that it secures advances made after the earlier of:

(1) the time the secured party acquires knowledge of the buyer's purchase; or

(2) 45 days after the purchase.

(e) Subsection (d) does not apply if the advance is made pursuant to a commitment entered into without knowledge of the buyer's purchase and before the expiration of the 45-day period.

(f) Except as otherwise provided in subsection (g), a lessee of goods, other than a lessee in ordinary course of business, takes the leasehold interest free of a security interest to the extent that it secures advances made after the earlier of:

(1) the time the secured party acquires knowledge of the lease; or

(2) 45 days after the lease contract becomes enforceable.

(g) Subsection (f) does not apply if the advance is made pursuant to a commitment entered into without knowledge of the lease and before the expiration of the 45-day period.

As amended in 1999.

§ 9–324. Priority of Purchase-Money Security Interests.

(a) Except as otherwise provided in subsection (g), a perfected purchase-money security interest in goods other than inventory or livestock has priority over a conflicting security interest in the same goods, and, except as otherwise provided in Section 9–327, a perfected security interest in its identifiable proceeds also has priority, if the purchase-money security interest is perfected when the debtor receives possession of the collateral or within 20 days thereafter.

(b) Subject to subsection (c) and except as otherwise provided in subsection (g), a perfected purchase-money security interest in inventory has priority over a conflicting security interest in the same inventory, has priority over a conflicting security interest in chattel paper or an instrument constituting proceeds of the inventory and in proceeds of the chattel paper, if so provided in Section 9–330, and, except as otherwise provided in Section 9–327, also has priority in

identifiable cash proceeds of the inventory to the extent the identifiable cash proceeds are received on or before the delivery of the inventory to a buyer, if:

(1) the purchase-money security interest is perfected when the debtor receives possession of the inventory;

(2) the purchase-money secured party sends an authenticated notification to the holder of the conflicting security interest;

(3) the holder of the conflicting security interest receives the notification within five years before the debtor receives possession of the inventory; and

(4) the notification states that the person sending the notification has or expects to acquire a purchase-money security interest in inventory of the debtor and describes the inventory.

(c) Subsections (b)(2) through (4) apply only if the holder of the conflicting security interest had filed a financing statement covering the same types of inventory:

(1) if the purchase-money security interest is perfected by filing, before the date of the filing; or

(2) if the purchase-money security interest is temporarily perfected without filing or possession under Section 9–312(f), before the beginning of the 20-day period thereunder.

(d) Subject to subsection (e) and except as otherwise provided in subsection (g), a perfected purchase-money security interest in livestock that are farm products has priority over a conflicting security interest in the same livestock, and, except as otherwise provided in Section 9–327, a perfected security interest in their identifiable proceeds and identifiable products in their unmanufactured states also has priority, if:

(1) the purchase-money security interest is perfected when the debtor receives possession of the livestock;

(2) the purchase-money secured party sends an authenticated notification to the holder of the conflicting security interest;

(3) the holder of the conflicting security interest receives the notification within six months before the debtor receives possession of the livestock; and

(4) the notification states that the person sending the notification has or expects to acquire a purchase-money security interest in livestock of the debtor and describes the livestock.

(e) Subsections (d)(2) through (4) apply only if the holder of the conflicting security interest had filed a financing statement covering the same types of livestock:

(1) if the purchase-money security interest is perfected by filing, before the date of the filing; or

(2) if the purchase-money security interest is temporarily perfected without filing or possession under Section 9–312(f), before the beginning of the 20-day period thereunder.

(f) Except as otherwise provided in subsection (g), a perfected purchase-money security interest in software has priority over a conflicting security interest in the same collateral, and, except as otherwise provided in Section 9–327, a perfected security interest in its identifiable proceeds also has priority, to the extent that the purchase-money security interest in the goods in which the software was acquired for use has priority in the goods and proceeds of the goods under this section.

(g) If more than one security interest qualifies for priority in the same collateral under subsection (a), (b), (d), or (f):

(1) a security interest securing an obligation incurred as all or part of the price of the collateral has priority over a security interest securing an obligation incurred for value given to enable the debtor to acquire rights in or the use of collateral; and

(2) in all other cases, Section 9–322(a) applies to the qualifying security interests.

§ 9–325. Priority of Security Interests in Transferred Collateral.

(a) Except as otherwise provided in subsection (b), a security interest created by a debtor is subordinate to a security interest in the same collateral created by another person if:

(1) the debtor acquired the collateral subject to the security interest created by the other person;

(2) the security interest created by the other person was perfected when the debtor acquired the collateral; and

(3) there is no period thereafter when the security interest is unperfected.

(b) Subsection (a) subordinates a security interest only if the security interest:

(1) otherwise would have priority solely under Section 9–322(a) or 9–324; or

(2) arose solely under Section 2–711(3) or 2A–508(5).

§ 9–326. Priority of Security Interests Created by New Debtor.

(a) Subject to subsection (b), a security interest created by a new debtor which is perfected by a filed financing statement that is effective solely under Section 9–508 in collateral in which a new debtor has or acquires rights is subordinate to a security interest in the same collateral which is perfected other than by a filed financing statement that is effective solely under Section 9–508.

(b) The other provisions of this part determine the priority among conflicting security interests in the same collateral perfected by filed financing statements that are effective solely under Section 9–508. However, if the security agreements to which a new debtor became bound as debtor were not entered

into by the same original debtor, the conflicting security interests rank according to priority in time of the new debtor's having become bound.

§ 9–327. Priority of Security Interests in Deposit Account.

The following rules govern priority among conflicting security interests in the same deposit account:

(1) A security interest held by a secured party having control of the deposit account under Section 9–104 has priority over a conflicting security interest held by a secured party that does not have control.

(2) Except as otherwise provided in paragraphs (3) and (4), security interests perfected by control under Section 9–314 rank according to priority in time of obtaining control.

(3) Except as otherwise provided in paragraph (4), a security interest held by the bank with which the deposit account is maintained has priority over a conflicting security interest held by another secured party.

(4) A security interest perfected by control under Section 9–104 (a)(3) has priority over a security interest held by the bank with which the deposit account is maintained.

§ 9–328. Priority of Security Interests in Investment Property.

The following rules govern priority among conflicting security interests in the same investment property:

(1) A security interest held by a secured party having control of investment property under Section 9–106 has priority over a security interest held by a secured party that does not have control of the investment property.

(2) Except as otherwise provided in paragraphs (3) and (4), conflicting security interests held by secured parties each of which has control under Section 9–106 rank according to priority in time of:

(A) if the collateral is a security, obtaining control;

(B) if the collateral is a security entitlement carried in a securities account and:

(i) if the secured party obtained control under Section 8–106(d)(1), the secured party's becoming the person for which the securities account is maintained;

(ii) if the secured party obtained control under Section 8–106(d)(2), the securities intermediary's agreement to comply with the secured party's entitlement orders with respect to security entitlements carried or to be carried in the securities account; or

(iii) if the secured party obtained control through another person under Section 8–106(d)(3), the time on which priority would be based under this paragraph if the other person were the secured party; or

(C) if the collateral is a commodity contract carried with a commodity intermediary, the satisfaction of the requirement for control specified in Section 9–106(b)(2) with respect to commodity contracts carried or to be carried with the commodity intermediary.

(3) A security interest held by a securities intermediary in a security entitlement or a securities account maintained with the securities intermediary has priority over a conflicting security interest held by another secured party.

(4) A security interest held by a commodity intermediary in a commodity contract or a commodity account maintained with the commodity intermediary has priority over a conflicting security interest held by another secured party.

(5) A security interest in a certificated security in registered form which is perfected by taking delivery under Section 9–313(a) and not by control under Section 9–314 has priority over a conflicting security interest perfected by a method other than control.

(6) Conflicting security interests created by a broker, securities intermediary, or commodity intermediary which are perfected without control under Section 9–106 rank equally.

(7) In all other cases, priority among conflicting security interests in investment property is governed by Sections 9–322 and 9–323.

§ 9–329. Priority of Security Interests in Letter-of-Credit Right.

The following rules govern priority among conflicting security interests in the same letter-of-credit right:

(1) A security interest held by a secured party having control of the letter-of-credit right under Section 9–107 has priority to the extent of its control over a conflicting security interest held by a secured party that does not have control.

(2) Security interests perfected by control under Section 9–314 rank according to priority in time of obtaining control.

§ 9–330. Priority of Purchaser of Chattel Paper or Instrument.

(a) A purchaser of chattel paper has priority over a security interest in the chattel paper which is claimed merely as proceeds of inventory subject to a security interest if:

(1) in good faith and in the ordinary course of the purchaser's business, the purchaser gives new value and takes possession of the chattel paper or obtains control of the chattel paper under Section 9–105; and

(2) the chattel paper does not indicate that it has been assigned to an identified assignee other than the purchaser.

(b) A purchaser of chattel paper has priority over a security interest in the chattel paper which is claimed other than merely as proceeds of inventory subject to a security interest if the purchaser gives new value and takes possession of the chattel paper or obtains control of the chattel paper under Section 9–105 in good faith, in the ordinary course of the purchaser's business, and without knowledge that the purchase violates the rights of the secured party.

(c) Except as otherwise provided in Section 9–327, a purchaser having priority in chattel paper under subsection (a) or (b) also has priority in proceeds of the chattel paper to the extent that:

(1) Section 9–322 provides for priority in the proceeds; or

(2) the proceeds consist of the specific goods covered by the chattel paper or cash proceeds of the specific goods, even if the purchaser's security interest in the proceeds is unperfected.

(d) Except as otherwise provided in Section 9–331(a), a purchaser of an instrument has priority over a security interest in the instrument perfected by a method other than possession if the purchaser gives value and takes possession of the instrument in good faith and without knowledge that the purchase violates the rights of the secured party.

(e) For purposes of subsections (a) and (b), the holder of a purchase-money security interest in inventory gives new value for chattel paper constituting proceeds of the inventory.

(f) For purposes of subsections (b) and (d), if chattel paper or an instrument indicates that it has been assigned to an identified secured party other than the purchaser, a purchaser of the chattel paper or instrument has knowledge that the purchase violates the rights of the secured party.

§ 9–331. Priority of Rights of Purchasers of Instruments, Documents, and Securities under Other Articles; Priority of Interests in Financial Assets and Security Entitlements under Article 8.

(a) This article does not limit the rights of a holder in due course of a negotiable instrument, a holder to which a negotiable document of title has been duly negotiated, or a protected purchaser of a security. These holders or purchasers take priority over an earlier security interest, even if perfected, to the extent provided in Articles 3, 7, and 8.

(b) This article does not limit the rights of or impose liability on a person to the extent that the person is protected against the assertion of a claim under Article 8.

(c) Filing under this article does not constitute notice of a claim or defense to the holders, or purchasers, or persons described in subsections (a) and (b).

§ 9–332. Transfer of Money; Transfer of Funds from Deposit Account.

(a) A transferee of money takes the money free of a security interest unless the transferee acts in collusion with the debtor in violating the rights of the secured party.

(b) A transferee of funds from a deposit account takes the funds free of a security interest in the deposit account unless the transferee acts in collusion with the debtor in violating the rights of the secured party.

§ 9–333. Priority of Certain Liens Arising by Operation of Law.

(a) In this section, "possessory lien" means an interest, other than a security interest or an agricultural lien:

(1) which secures payment or performance of an obligation for services or materials furnished with respect to goods by a person in the ordinary course of the person's business;

(2) which is created by statute or rule of law in favor of the person; and

(3) whose effectiveness depends on the person's possession of the goods.

(b) A possessory lien on goods has priority over a security interest in the goods unless the lien is created by a statute that expressly provides otherwise.

§ 9–334. Priority of Security Interests in Fixtures and Crops.

(a) A security interest under this article may be created in goods that are fixtures or may continue in goods that become fixtures. A security interest does not exist under this article in ordinary building materials incorporated into an improvement on land.

(b) This article does not prevent creation of an encumbrance upon fixtures under real property law.

(c) In cases not governed by subsections (d) through (h), a security interest in fixtures is subordinate to a conflicting interest of an encumbrancer or owner of the related real property other than the debtor.

(d) Except as otherwise provided in subsection (h), a perfected security interest in fixtures has priority over a conflicting interest of an encumbrancer or owner of the real property if the debtor has an interest of record in or is in possession of the real property and:

(1) the security interest is a purchase-money security interest;

(2) the interest of the encumbrancer or owner arises before the goods become fixtures; and

(3) the security interest is perfected by a fixture filing before the goods become fixtures or within 20 days thereafter.

(e) A perfected security interest in fixtures has priority over a conflicting interest of an encumbrancer or owner of the real property if:

(1) the debtor has an interest of record in the real property or is in possession of the real property and the security interest:

(A) is perfected by a fixture filing before the interest of the encumbrancer or owner is of record; and

(B) has priority over any conflicting interest of a predecessor in title of the encumbrancer or owner;

(2) before the goods become fixtures, the security interest is perfected by any method permitted by this article and the fixtures are readily removable:

(A) factory or office machines;

(B) equipment that is not primarily used or leased for use in the operation of the real property; or

(C) replacements of domestic appliances that are consumer goods;

(3) the conflicting interest is a lien on the real property obtained by legal or equitable proceedings after the security interest was perfected by any method permitted by this article; or

(4) the security interest is:

(A) created in a manufactured home in a manufactured-home transaction; and

(B) perfected pursuant to a statute described in Section 9–311(a)(2).

(f) A security interest in fixtures, whether or not perfected, has priority over a conflicting interest of an encumbrancer or owner of the real property if:

(1) the encumbrancer or owner has, in an authenticated record, consented to the security interest or disclaimed an interest in the goods as fixtures; or

(2) the debtor has a right to remove the goods as against the encumbrancer or owner.

(g) The priority of the security interest under paragraph (f)(2) continues for a reasonable time if the debtor's right to remove the goods as against the encumbrancer or owner terminates.

(h) A mortgage is a construction mortgage to the extent that it secures an obligation incurred for the construction of an improvement on land, including the acquisition cost of the land, if a recorded record of the mortgage so indicates. Except as otherwise provided in subsections (e) and (f), a security interest in fixtures is subordinate to a construction mortgage if a record of the mortgage is recorded before the goods become fixtures and the goods become fixtures before the completion of the construction. A mortgage has this priority to the same extent as a construction mortgage to the extent that it is given to refinance a construction mortgage.

(i) A perfected security interest in crops growing on real property has priority over a conflicting interest of an encumbrancer or owner of the real property if the debtor has an interest of record in or is in possession of the real property.

(j) Subsection (i) prevails over any inconsistent provisions of the following statutes:

[List here any statutes containing provisions inconsistent with subsection (i).]

Legislative Note: States that amend statutes to remove provisions inconsistent with subsection (i) need not enact subsection (j).

§ 9–335. Accessions.

(a) A security interest may be created in an accession and continues in collateral that becomes an accession.

(b) If a security interest is perfected when the collateral becomes an accession, the security interest remains perfected in the collateral.

(c) Except as otherwise provided in subsection (d), the other provisions of this part determine the priority of a security interest in an accession.

(d) A security interest in an accession is subordinate to a security interest in the whole which is perfected by compliance with the requirements of a certificate-of-title statute under Section 9–311(b).

(e) After default, subject to Part 6, a secured party may remove an accession from other goods if the security interest in the accession has priority over the claims of every person having an interest in the whole.

(f) A secured party that removes an accession from other goods under subsection (e) shall promptly reimburse any holder of a security interest or other lien on, or owner of, the whole or of the other goods, other than the debtor, for the cost of repair of any physical injury to the whole or the other goods. The secured party need not reimburse the holder or owner for any diminution in value of the whole or the other goods caused by the absence of the accession removed or by any necessity for replacing it. A person entitled to reimbursement may refuse permission to remove until the secured party gives adequate assurance for the performance of the obligation to reimburse.

§ 9–336. Commingled Goods.

(a) In this section, "commingled goods" means goods that are physically united with other goods in such a manner that their identity is lost in a product or mass.

(b) A security interest does not exist in commingled goods as such. However, a security interest may attach to a product or mass that results when goods become commingled goods.

(c) If collateral becomes commingled goods, a security interest attaches to the product or mass.

(d) If a security interest in collateral is perfected before the collateral becomes commingled goods, the security interest that attaches to the product or mass under subsection (c) is perfected.

(e) Except as otherwise provided in subsection (f), the other provisions of this part determine the priority of a security interest that attaches to the product or mass under subsection (c).

(f) If more than one security interest attaches to the product or mass under subsection (c), the following rules determine priority:

(1) A security interest that is perfected under subsection (d) has priority over a security interest that is unperfected at the time the collateral becomes commingled goods.

(2) If more than one security interest is perfected under subsection (d), the security interests rank equally in proportion to the value of the collateral at the time it became commingled goods.

§ 9–337. Priority of Security Interests in Goods Covered by Certificate of Title.

If, while a security interest in goods is perfected by any method under the law of another jurisdiction, this State issues a certificate of title that does not show that the goods are subject to the security interest or contain a statement that they may be subject to security interests not shown on the certificate:

(1) a buyer of the goods, other than a person in the business of selling goods of that kind, takes free of the security interest if the buyer gives value and receives delivery of the goods after issuance of the certificate and without knowledge of the security interest; and

(2) the security interest is subordinate to a conflicting security interest in the goods that attaches, and is perfected under Section 9–311(b), after issuance of the certificate and without the conflicting secured party's knowledge of the security interest.

§ 9–338. Priority of Security Interest or Agricultural Lien Perfected by Filed Financing Statement Providing Certain Incorrect Information.

If a security interest or agricultural lien is perfected by a filed financing statement providing information described in Section 9–516(b)(5) which is incorrect at the time the financing statement is filed:

(1) the security interest or agricultural lien is subordinate to a conflicting perfected security interest in the collateral to the extent that the holder of the conflicting security interest gives value in reasonable reliance upon the incorrect information; and

(2) a purchaser, other than a secured party, of the collateral takes free of the security interest or agricultural lien to the extent that, in reasonable reliance upon the incorrect information, the purchaser gives value and, in the case of chattel paper, documents, goods, instruments, or a security certificate, receives delivery of the collateral.

§ 9–339. Priority Subject to Subordination.

This article does not preclude subordination by agreement by a person entitled to priority.

[Subpart 4. Rights of Bank]

§ 9–340. Effectiveness of Right of Recoupment or Set-Off against Deposit Account.

(a) Except as otherwise provided in subsection (c), a bank with which a deposit account is maintained may exercise any right of recoupment or set-off against a secured party that holds a security interest in the deposit account.

(b) Except as otherwise provided in subsection (c), the application of this article to a security interest in a deposit account does not affect a right of recoupment or set-off of the secured party as to a deposit account maintained with the secured party.

(c) The exercise by a bank of a set-off against a deposit account is ineffective against a secured party that holds a security interest in the deposit account which is perfected by control under Section 9–104(a)(3), if the set-off is based on a claim against the debtor.

§ 9–341. Bank's Rights and Duties with Respect to Deposit Account.

Except as otherwise provided in Section 9–340(c), and unless the bank otherwise agrees in an authenticated record, a bank's rights and duties with respect to a deposit account maintained with the bank are not terminated, suspended, or modified by:

(1) the creation, attachment, or perfection of a security interest in the deposit account;

(2) the bank's knowledge of the security interest; or

(3) the bank's receipt of instructions from the secured party.

§ 9-342. Bank's Right to Refuse to Enter into or Disclose Existence of Control Agreement.

This article does not require a bank to enter into an agreement of the kind described in Section 9–104(a)(2), even if its customer so requests or directs. A bank that has entered into such an agreement is not required to confirm the existence of the agreement to another person unless requested to do so by its customer.

PART 4 Rights of Third Parties

§ 9-401. Alienability of Debtor's Rights.

(a) Except as otherwise provided in subsection (b) and Sections 9–406, 9–407, 9–408, and 9–409, whether a debtor's rights in collateral may be voluntarily or involuntarily transferred is governed by law other than this article.

(b) An agreement between the debtor and secured party which prohibits a transfer of the debtor's rights in collateral or makes the transfer a default does not prevent the transfer from taking effect.

§ 9-402. Secured Party Not Obligated on Contract of Debtor or in Tort.

The existence of a security interest, agricultural lien, or authority given to a debtor to dispose of or use collateral, without more, does not subject a secured party to liability in contract or tort for the debtor's acts or omissions.

§ 9-403. Agreement Not to Assert Defenses against Assignee.

(a) In this section, "value" has the meaning provided in Section 3–303(a).

(b) Except as otherwise provided in this section, an agreement between an account debtor and an assignor not to assert against an assignee any claim or defense that the account debtor may have against the assignor is enforceable by an assignee that takes an assignment:

(1) for value;

(2) in good faith;

(3) without notice of a claim of a property or possessory right to the property assigned; and

(4) without notice of a defense or claim in recoupment of the type that may be asserted against a person entitled to enforce a negotiable instrument under Section 3–305(a).

(c) Subsection (b) does not apply to defenses of a type that may be asserted against a holder in due course of a negotiable instrument under Section 3–305(b).

(d) In a consumer transaction, if a record evidences the account debtor's obligation, law other than this article requires that the record include a statement to the effect that the rights of an assignee are subject to claims or defenses that the account debtor could assert against the original obligee, and the record does not include such a statement:

(1) the record has the same effect as if the record included such a statement; and

(2) the account debtor may assert against an assignee those claims and defenses that would have been available if the record included such a statement.

(e) This section is subject to law other than this article which establishes a different rule for an account debtor who is an individual and who incurred the obligation primarily for personal, family, or household purposes.

(f) Except as otherwise provided in subsection (d), this section does not displace law other than this article which gives effect to an agreement by an account debtor not to assert a claim or defense against an assignee.

§ 9-404. Rights Acquired by Assignee; Claims and Defenses against Assignee.

(a) Unless an account debtor has made an enforceable agreement not to assert defenses or claims, and subject to subsections (b) through (e), the rights of an assignee are subject to:

(1) all terms of the agreement between the account debtor and assignor and any defense or claim in recoupment arising from the transaction that gave rise to the contract; and

(2) any other defense or claim of the account debtor against the assignor which accrues before the account debtor receives a notification of the assignment authenticated by the assignor or the assignee.

(b) Subject to subsection (c) and except as otherwise provided in subsection (d), the claim of an account debtor against an assignor may be asserted against an assignee under subsection (a) only to reduce the amount the account debtor owes.

(c) This section is subject to law other than this article which establishes a different rule for an account debtor who is an individual and who incurred the obligation primarily for personal, family, or household purposes.

(d) In a consumer transaction, if a record evidences the account debtor's obligation, law other than this article requires that the record include a statement to the effect that the account debtor's recovery against an assignee with respect to claims and defenses against the assignor may not exceed amounts paid by the account debtor under the record, and the record does not include such a statement, the extent to which a claim of an

account debtor against the assignor may be asserted against an assignee is determined as if the record included such a statement.

(e) This section does not apply to an assignment of a health-care-insurance receivable.

§ 9–405. Modification of Assigned Contract.

(a) A modification of or substitution for an assigned contract is effective against an assignee if made in good faith. The assignee acquires corresponding rights under the modified or substituted contract. The assignment may provide that the modification or substitution is a breach of contract by the assignor. This subsection is subject to subsections (b) through (d).

(b) Subsection (a) applies to the extent that:

(1) the right to payment or a part thereof under an assigned contract has not been fully earned by performance; or

(2) the right to payment or a part thereof has been fully earned by performance and the account debtor has not received notification of the assignment under Section 9–406(a).

(c) This section is subject to law other than this article which establishes a different rule for an account debtor who is an individual and who incurred the obligation primarily for personal, family, or household purposes.

(d) This section does not apply to an assignment of a health-care-insurance receivable.

§ 9–406. Discharge of Account Debtor; Notification of Assignment; Identification and Proof of Assignment; Restrictions on Assignment of Accounts, Chattel Paper, Payment Intangibles, and Promissory Notes Ineffective.

(a) Subject to subsections (b) through (i), an account debtor on an account, chattel paper, or a payment intangible may discharge its obligation by paying the assignor until, but not after, the account debtor receives a notification, authenticated by the assignor or the assignee, that the amount due or to become due has been assigned and that payment is to be made to the assignee. After receipt of the notification, the account debtor may discharge its obligation by paying the assignee and may not discharge the obligation by paying the assignor.

(b) Subject to subsection (h), notification is ineffective under subsection (a):

(1) if it does not reasonably identify the rights assigned;

(2) to the extent that an agreement between an account debtor and a seller of a payment intangible limits the account debtor's duty to pay a person other than the seller and the limitation is effective under law other than this article; or

(3) at the option of an account debtor, if the notification notifies the account debtor to make less than the full amount of any installment or other periodic payment to the assignee, even if:

(A) only a portion of the account, chattel paper, or payment intangible has been assigned to that assignee;

(B) a portion has been assigned to another assignee; or

(C) the account debtor knows that the assignment to that assignee is limited.

(c) Subject to subsection (h), if requested by the account debtor, an assignee shall seasonably furnish reasonable proof that the assignment has been made. Unless the assignee complies, the account debtor may discharge its obligation by paying the assignor, even if the account debtor has received a notification under subsection (a).

(d) Except as otherwise provided in subsection (e) and Sections 2A–303 and 9–407, and subject to subsection (h), a term in an agreement between an account debtor and an assignor or in a promissory note is ineffective to the extent that it:

(1) prohibits, restricts, or requires the consent of the account debtor or person obligated on the promissory note to the assignment or transfer of, or the creation, attachment, perfection, or enforcement of a security interest in, the account, chattel paper, payment intangible, or promissory note; or

(2) provides that the assignment or transfer or the creation, attachment, perfection, or enforcement of the security interest may give rise to a default, breach, right of recoupment, claim, defense, termination, right of termination, or remedy under the account, chattel paper, payment intangible, or promissory note.

(e) Subsection (d) does not apply to the sale of a payment intangible or promissory note.

(f) Except as otherwise provided in Sections 2A–303 and 9–407 and subject to subsections (h) and (i), a rule of law, statute, or regulation that prohibits, restricts, or requires the consent of a government, governmental body or official, or account debtor to the assignment or transfer of, or creation of a security interest in, an account or chattel paper is ineffective to the extent that the rule of law, statute, or regulation:

(1) prohibits, restricts, or requires the consent of the government, governmental body or official, or account debtor to the assignment or transfer of, or the creation, attachment, perfection, or enforcement of a security interest in the account or chattel paper; or

(2) provides that the assignment or transfer or the creation, attachment, perfection, or enforcement of the security interest

may give rise to a default, breach, right of recoupment, claim, defense, termination, right of termination, or remedy under the account or chattel paper.

(g) Subject to subsection (h), an account debtor may not waive or vary its option under subsection (b)(3).

(h) This section is subject to law other than this article which establishes a different rule for an account debtor who is an individual and who incurred the obligation primarily for personal, family, or household purposes.

(i) This section does not apply to an assignment of a health-care-insurance receivable.

(j) This section prevails over any inconsistent provisions of the following statutes, rules, and regulations:

[List here any statutes, rules, and regulations containing provisions inconsistent with this section.]

Legislative Note: States that amend statutes, rules, and regulations to remove provisions inconsistent with this section need not enact subsection (j).

As amended in 1999 and 2000.

§ 9–407. Restrictions on Creation or Enforcement of Security Interest in Leasehold Interest or in Lessor's Residual Interest.

(a) Except as otherwise provided in subsection (b), a term in a lease agreement is ineffective to the extent that it:

(1) prohibits, restricts, or requires the consent of a party to the lease to the assignment or transfer of, or the creation, attachment, perfection, or enforcement of a security interest in an interest of a party under the lease contract or in the lessor's residual interest in the goods; or

(2) provides that the assignment or transfer or the creation, attachment, perfection, or enforcement of the security interest may give rise to a default, breach, right of recoupment, claim, defense, termination, right of termination, or remedy under the lease.

(b) Except as otherwise provided in Section 2A–303(7), a term described in subsection (a)(2) is effective to the extent that there is:

(1) a transfer by the lessee of the lessee's right of possession or use of the goods in violation of the term; or

(2) a delegation of a material performance of either party to the lease contract in violation of the term.

(c) The creation, attachment, perfection, or enforcement of a security interest in the lessor's interest under the lease contract or the lessor's residual interest in the goods is not a transfer that materially impairs the lessee's prospect of obtaining return performance or materially changes the duty of or materially increases the burden or risk imposed on the lessee within the purview of Section 2A–303(4) unless, and then only to the extent that, enforcement actually results in a delegation of material performance of the lessor.

As amended in 1999.

§ 9–408. Restrictions on Assignment of Promissory Notes, Health-Care-Insurance Receivables, and Certain General Intangibles Ineffective.

(a) Except as otherwise provided in subsection (b), a term in a promissory note or in an agreement between an account debtor and a debtor which relates to a health-care-insurance receivable or a general intangible, including a contract, permit, license, or franchise, and which term prohibits, restricts, or requires the consent of the person obligated on the promissory note or the account debtor to, the assignment or transfer of, or creation, attachment, or perfection of a security interest in, the promissory note, health-care-insurance receivable, or general intangible, is ineffective to the extent that the term:

(1) would impair the creation, attachment, or perfection of a security interest; or

(2) provides that the assignment or transfer or the creation, attachment, or perfection of the security interest may give rise to a default, breach, right of recoupment, claim, defense, termination, right of termination, or remedy under the promissory note, health-care-insurance receivable, or general intangible.

(b) Subsection (a) applies to a security interest in a payment intangible or promissory note only if the security interest arises out of a sale of the payment intangible or promissory note.

(c) A rule of law, statute, or regulation that prohibits, restricts, or requires the consent of a government, governmental body or official, person obligated on a promissory note, or account debtor to the assignment or transfer of, or creation of a security interest in, a promissory note, health-care-insurance receivable, or general intangible, including a contract, permit, license, or franchise between an account debtor and a debtor, is ineffective to the extent that the rule of law, statute, or regulation:

(1) would impair the creation, attachment, or perfection of a security interest; or

(2) provides that the assignment or transfer or the creation, attachment, or perfection of the security interest may give rise to a default, breach, right of recoupment, claim, defense, termination, right of termination, or remedy under the promissory note, health-care-insurance receivable, or general intangible.

(d) To the extent that a term in a promissory note or in an agreement between an account debtor and a debtor which

relates to a health-care-insurance receivable or general intangible or a rule of law, statute, or regulation described in subsection (c) would be effective under law other than this article but is ineffective under subsection (a) or (c), the creation, attachment, or perfection of a security interest in the promissory note, health-care-insurance receivable, or general intangible:

(1) is not enforceable against the person obligated on the promissory note or the account debtor;

(2) does not impose a duty or obligation on the person obligated on the promissory note or the account debtor;

(3) does not require the person obligated on the promissory note or the account debtor to recognize the security interest, pay or render performance to the secured party, or accept payment or performance from the secured party;

(4) does not entitle the secured party to use or assign the debtor's rights under the promissory note, health-care-insurance receivable, or general intangible, including any related information or materials furnished to the debtor in the transaction giving rise to the promissory note, health-care-insurance receivable, or general intangible;

(5) does not entitle the secured party to use, assign, possess, or have access to any trade secrets or confidential information of the person obligated on the promissory note or the account debtor; and

(6) does not entitle the secured party to enforce the security interest in the promissory note, health-care-insurance receivable, or general intangible.

(e) This section prevails over any inconsistent provisions of the following statutes, rules, and regulations:

[List here any statutes, rules, and regulations containing provisions inconsistent with this section.]

Legislative Note: States that amend statutes, rules, and regulations to remove provisions inconsistent with this section need not enact subsection (e).

As amended in 1999.

§ 9–409. Restrictions on Assignment of Letter-of-Credit Rights Ineffective.

(a) A term in a letter of credit or a rule of law, statute, regulation, custom, or practice applicable to the letter of credit which prohibits, restricts, or requires the consent of an applicant, issuer, or nominated person to a beneficiary's assignment of or creation of a security interest in a letter-of-credit right is ineffective to the extent that the term or rule of law, statute, regulation, custom, or practice:

(1) would impair the creation, attachment, or perfection of a security interest in the letter-of-credit right; or

(2) provides that the assignment or the creation, attachment, or perfection of the security interest may give rise to a default, breach, right of recoupment, claim, defense, termination, right of termination, or remedy under the letter-of-credit right.

(b) To the extent that a term in a letter of credit is ineffective under subsection (a) but would be effective under law other than this article or a custom or practice applicable to the letter of credit, to the transfer of a right to draw or otherwise demand performance under the letter of credit, or to the assignment of a right to proceeds of the letter of credit, the creation, attachment, or perfection of a security interest in the letter-of-credit right:

(1) is not enforceable against the applicant, issuer, nominated person, or transferee beneficiary;

(2) imposes no duties or obligations on the applicant, issuer, nominated person, or transferee beneficiary; and

(3) does not require the applicant, issuer, nominated person, or transferee beneficiary to recognize the security interest, pay or render performance to the secured party, or accept payment or other performance from the secured party.

As amended in 1999.

PART 5 Filing

[Subpart 1. Filing Office; Contents and Effectiveness of Financing Statement]

§ 9–501. Filing Office.

(a) Except as otherwise provided in subsection (b), if the local law of this State governs perfection of a security interest or agricultural lien, the office in which to file a financing statement to perfect the security interest or agricultural lien is:

(1) the office designated for the filing or recording of a record of a mortgage on the related real property, if:

(A) the collateral is as-extracted collateral or timber to be cut; or

(B) the financing statement is filed as a fixture filing and the collateral is goods that are or are to become fixtures; or

(2) the office of [ ] [or any office duly authorized by [ ]], in all other cases, including a case in which the collateral is goods that are or are to become fixtures and the financing statement is not filed as a fixture filing.

(b) The office in which to file a financing statement to perfect a security interest in collateral, including fixtures, of a transmitting utility is the office of [ ]. The financing statement also constitutes a fixture filing as to the collateral indicated in the financing statement which is or is to become fixtures.

Legislative Note: The State should designate the filing office where the brackets appear. The filing office may be that of a governmental official (e.g., the Secretary of State) or a private party that maintains the State's filing system.

§ 9–502. Contents of Financing Statement; Record of Mortgage as Financing Statement; Time of Filing Financing Statement.

(a) Subject to subsection (b), a financing statement is sufficient only if it:

(1) provides the name of the debtor;

(2) provides the name of the secured party or a representative of the secured party; and

(3) indicates the collateral covered by the financing statement.

(b) Except as otherwise provided in Section 9–501(b), to be sufficient, a financing statement that covers as-extracted collateral or timber to be cut, or which is filed as a fixture filing and covers goods that are or are to become fixtures, must satisfy subsection (a) and also:

(1) indicate that it covers this type of collateral;

(2) indicate that it is to be filed [for record] in the real property records;

(3) provide a description of the real property to which the collateral is related [sufficient to give constructive notice of a mortgage under the law of this State if the description were contained in a record of the mortgage of the real property]; and

(4) if the debtor does not have an interest of record in the real property, provide the name of a record owner.

(c) A record of a mortgage is effective, from the date of recording, as a financing statement filed as a fixture filing or as a financing statement covering as-extracted collateral or timber to be cut only if:

(1) the record indicates the goods or accounts that it covers;

(2) the goods are or are to become fixtures related to the real property described in the record or the collateral is related to the real property described in the record and is as-extracted collateral or timber to be cut;

(3) the record satisfies the requirements for a financing statement in this section other than an indication that it is to be filed in the real property records; and

(4) the record is [duly] recorded.

(d) A financing statement may be filed before a security agreement is made or a security interest otherwise attaches.

Legislative Note: Language in brackets is optional. Where the State has any special recording system for real property other than the usual grantor-grantee index (as, for instance, a tract system or a title registration or Torrens system) local adaptations of subsection (b) and Section 9–519(d) and (e) may be necessary. See, e.g., Mass. Gen. Laws Chapter 106, Section 9–410.

§ 9–503. Name of Debtor and Secured Party.

(a) A financing statement sufficiently provides the name of the debtor:

(1) if the debtor is a registered organization, only if the financing statement provides the name of the debtor indicated on the public record of the debtor's jurisdiction of organization which shows the debtor to have been organized;

(2) if the debtor is a decedent's estate, only if the financing statement provides the name of the decedent and indicates that the debtor is an estate;

(3) if the debtor is a trust or a trustee acting with respect to property held in trust, only if the financing statement:

(A) provides the name specified for the trust in its organic documents or, if no name is specified, provides the name of the settlor and additional information sufficient to distinguish the debtor from other trusts having one or more of the same settlors; and

(B) indicates, in the debtor's name or otherwise, that the debtor is a trust or is a trustee acting with respect to property held in trust; and

(4) in other cases:

(A) if the debtor has a name, only if it provides the individual or organizational name of the debtor; and

(B) if the debtor does not have a name, only if it provides the names of the partners, members, associates, or other persons comprising the debtor.

(b) A financing statement that provides the name of the debtor in accordance with subsection (a) is not rendered ineffective by the absence of:

(1) a trade name or other name of the debtor; or

(2) unless required under subsection (a)(4)(B), names of partners, members, associates, or other persons comprising the debtor.

(c) A financing statement that provides only the debtor's trade name does not sufficiently provide the name of the debtor.

(d) Failure to indicate the representative capacity of a secured party or representative of a secured party does not affect the sufficiency of a financing statement.

(e) A financing statement may provide the name of more than one debtor and the name of more than one secured party.

§ 9–504. Indication of Collateral.

A financing statement sufficiently indicates the collateral that it covers if the financing statement provides:

(1) a description of the collateral pursuant to Section 9–108; or

(2) an indication that the financing statement covers all assets or all personal property.

As amended in 1999.

§ 9-505. Filing and Compliance with Other Statutes and Treaties for Consignments, Leases, Other Bailments, and Other Transactions.

(a) A consignor, lessor, or other bailor of goods, a licensor, or a buyer of a payment intangible or promissory note may file a financing statement, or may comply with a statute or treaty described in Section 9–311(a), using the terms "consignor", "consignee", "lessor", "lessee", "bailor", "bailee", "licensor", "licensee", "owner", "registered owner", "buyer", "seller", or words of similar import, instead of the terms "secured party" and "debtor".

(b) This part applies to the filing of a financing statement under subsection (a) and, as appropriate, to compliance that is equivalent to filing a financing statement under Section 9–311 (b), but the filing or compliance is not of itself a factor in determining whether the collateral secures an obligation. If it is determined for another reason that the collateral secures an obligation, a security interest held by the consignor, lessor, bailor, licensor, owner, or buyer which attaches to the collateral is perfected by the filing or compliance.

§ 9-506. Effect of Errors or Omissions.

(a) A financing statement substantially satisfying the requirements of this part is effective, even if it has minor errors or omissions, unless the errors or omissions make the financing statement seriously misleading.

(b) Except as otherwise provided in subsection (c), a financing statement that fails sufficiently to provide the name of the debtor in accordance with Section 9–503(a) is seriously misleading.

(c) If a search of the records of the filing office under the debtor's correct name, using the filing office's standard search logic, if any, would disclose a financing statement that fails sufficiently to provide the name of the debtor in accordance with Section 9–503(a), the name provided does not make the financing statement seriously misleading.

(d) For purposes of Section 9–508(b), the "debtor's correct name" in subsection (c) means the correct name of the new debtor.

§ 9-507. Effect of Certain Events on Effectiveness of Financing Statement.

(a) A filed financing statement remains effective with respect to collateral that is sold, exchanged, leased, licensed, or otherwise disposed of and in which a security interest or agricultural lien continues, even if the secured party knows of or consents to the disposition.

(b) Except as otherwise provided in subsection (c) and Section 9–508, a financing statement is not rendered ineffective if, after the financing statement is filed, the information provided in the financing statement becomes seriously misleading under Section 9–506.

(c) If a debtor so changes its name that a filed financing statement becomes seriously misleading under Section 9–506:

(1) the financing statement is effective to perfect a security interest in collateral acquired by the debtor before, or within four months after, the change; and

(2) the financing statement is not effective to perfect a security interest in collateral acquired by the debtor more than four months after the change, unless an amendment to the financing statement which renders the financing statement not seriously misleading is filed within four months after the change.

§ 9-508. Effectiveness of Financing Statement If New Debtor Becomes Bound by Security Agreement.

(a) Except as otherwise provided in this section, a filed financing statement naming an original debtor is effective to perfect a security interest in collateral in which a new debtor has or acquires rights to the extent that the financing statement would have been effective had the original debtor acquired rights in the collateral.

(b) If the difference between the name of the original debtor and that of the new debtor causes a filed financing statement that is effective under subsection (a) to be seriously misleading under Section 9–506:

(1) the financing statement is effective to perfect a security interest in collateral acquired by the new debtor before, and within four months after, the new debtor becomes bound under Section 9B–203(d); and

(2) the financing statement is not effective to perfect a security interest in collateral acquired by the new debtor more than four months after the new debtor becomes bound under Section 9–203(d) unless an initial financing statement providing the name of the new debtor is filed before the expiration of that time.

(c) This section does not apply to collateral as to which a filed financing statement remains effective against the new debtor under Section 9–507(a).

§ 9-509. Persons Entitled to File a Record.

(a) A person may file an initial financing statement, amendment that adds collateral covered by a financing statement, or amendment that adds a debtor to a financing statement only if:

(1) the debtor authorizes the filing in an authenticated record or pursuant to subsection (b) or (c); or

(2) the person holds an agricultural lien that has become effective at the time of filing and the financing statement covers only collateral in which the person holds an agricultural lien.

(b) By authenticating or becoming bound as debtor by a security agreement, a debtor or new debtor authorizes the filing of an initial financing statement, and an amendment, covering:

(1) the collateral described in the security agreement; and

(2) property that becomes collateral under Section 9–315(a)(2), whether or not the security agreement expressly covers proceeds.

(c) By acquiring collateral in which a security interest or agricultural lien continues under Section 9–315(a)(1), a debtor authorizes the filing of an initial financing statement, and an amendment, covering the collateral and property that becomes collateral under Section 9–315(a)(2).

(d) A person may file an amendment other than an amendment that adds collateral covered by a financing statement or an amendment that adds a debtor to a financing statement only if:

(1) the secured party of record authorizes the filing; or

(2) the amendment is a termination statement for a financing statement as to which the secured party of record has failed to file or send a termination statement as required by Section 9–513(a) or (c), the debtor authorizes the filing, and the termination statement indicates that the debtor authorized it to be filed.

(e) If there is more than one secured party of record for a financing statement, each secured party of record may authorize the filing of an amendment under subsection (d).

As amended in 2000.

§ 9–510. Effectiveness of Filed Record.

(a) A filed record is effective only to the extent that it was filed by a person that may file it under Section 9–509.

(b) A record authorized by one secured party of record does not affect the financing statement with respect to another secured party of record.

(c) A continuation statement that is not filed within the six-month period prescribed by Section 9–515(d) is ineffective.

§ 9–511. Secured Party of Record.

(a) A secured party of record with respect to a financing statement is a person whose name is provided as the name of the secured party or a representative of the secured party in an initial financing statement that has been filed. If an initial financing statement is filed under Section 9–514(a), the assignee named in the initial financing statement is the secured party of record with respect to the financing statement.

(b) If an amendment of a financing statement which provides the name of a person as a secured party or a representative of a secured party is filed, the person named in the amendment is a secured party of record. If an amendment is filed under Section 9–514(b), the assignee named in the amendment is a secured party of record.

(c) A person remains a secured party of record until the filing of an amendment of the financing statement which deletes the person.

§ 9–512. Amendment of Financing Statement.

[Alternative A]

(a) Subject to Section 9–509, a person may add or delete collateral covered by, continue or terminate the effectiveness of, or, subject to subsection (e), otherwise amend the information provided in, a financing statement by filing an amendment that:

(1) identifies, by its file number, the initial financing statement to which the amendment relates; and

(2) if the amendment relates to an initial financing statement filed [or recorded] in a filing office described in Section 9–501(a)(1), provides the information specified in Section 9–502(b).

[Alternative B]

(a) Subject to Section 9–509, a person may add or delete collateral covered by, continue or terminate the effectiveness of, or, subject to subsection (e), otherwise amend the information provided in, a financing statement by filing an amendment that:

(1) identifies, by its file number, the initial financing statement to which the amendment relates; and

(2) if the amendment relates to an initial financing statement filed [or recorded] in a filing office described in Section 9–501(a)(1), provides the date [and time] that the initial financing statement was filed [or recorded] and the information specified in Section 9–502(b).

[End of Alternatives]

(b) Except as otherwise provided in Section 9–515, the filing of an amendment does not extend the period of effectiveness of the financing statement.

(c) A financing statement that is amended by an amendment that adds collateral is effective as to the added collateral only from the date of the filing of the amendment.

(d) A financing statement that is amended by an amendment that adds a debtor is effective as to the added debtor only from the date of the filing of the amendment.

(e) An amendment is ineffective to the extent it:

(1) purports to delete all debtors and fails to provide the name of a debtor to be covered by the financing statement; or

(2) purports to delete all secured parties of record and fails to provide the name of a new secured party of record.

Legislative Note: States whose real-estate filing offices require additional information in amendments and cannot search their records by both the name of the debtor and the file number should enact Alternative B to Sections 9–512(a), 9–518(b), 9–519(f), and 9–522(a).

§ 9–513. Termination Statement.

(a) A secured party shall cause the secured party of record for a financing statement to file a termination statement for the financing statement if the financing statement covers consumer goods and:

(1) there is no obligation secured by the collateral covered by the financing statement and no commitment to make an advance, incur an obligation, or otherwise give value; or

(2) the debtor did not authorize the filing of the initial financing statement.

(b) To comply with subsection (a), a secured party shall cause the secured party of record to file the termination statement:

(1) within one month after there is no obligation secured by the collateral covered by the financing statement and no commitment to make an advance, incur an obligation, or otherwise give value; or

(2) if earlier, within 20 days after the secured party receives an authenticated demand from a debtor.

(c) In cases not governed by subsection (a), within 20 days after a secured party receives an authenticated demand from a debtor, the secured party shall cause the secured party of record for a financing statement to send to the debtor a termination statement for the financing statement or file the termination statement in the filing office if:

(1) except in the case of a financing statement covering accounts or chattel paper that has been sold or goods that are the subject of a consignment, there is no obligation secured by the collateral covered by the financing statement and no commitment to make an advance, incur an obligation, or otherwise give value;

(2) the financing statement covers accounts or chattel paper that has been sold but as to which the account debtor or other person obligated has discharged its obligation;

(3) the financing statement covers goods that were the subject of a consignment to the debtor but are not in the debtor's possession; or

(4) the debtor did not authorize the filing of the initial financing statement.

(d) Except as otherwise provided in Section 9–510, upon the filing of a termination statement with the filing office, the financing statement to which the termination statement relates ceases to be effective. Except as otherwise provided in Section 9–510, for purposes of Sections 9–519(g), 9–522(a), and 9–523 (c), the filing with the filing office of a termination statement relating to a financing statement that indicates that the debtor is a transmitting utility also causes the effectiveness of the financing statement to lapse.

As amended in 2000.

§ 9–514. Assignment of Powers of Secured Party of Record.

(a) Except as otherwise provided in subsection (c), an initial financing statement may reflect an assignment of all of the secured party's power to authorize an amendment to the financing statement by providing the name and mailing address of the assignee as the name and address of the secured party.

(b) Except as otherwise provided in subsection (c), a secured party of record may assign of record all or part of its power to authorize an amendment to a financing statement by filing in the filing office an amendment of the financing statement which:

(1) identifies, by its file number, the initial financing statement to which it relates;

(2) provides the name of the assignor; and

(3) provides the name and mailing address of the assignee.

(c) An assignment of record of a security interest in a fixture covered by a record of a mortgage which is effective as a financing statement filed as a fixture filing under Section 9–502(c) may be made only by an assignment of record of the mortgage in the manner provided by law of this State other than [the Uniform Commercial Code].

§ 9–515. Duration and Effectiveness of Financing Statement; Effect of Lapsed Financing Statement.

(a) Except as otherwise provided in subsections (b), (e), (f), and (g), a filed financing statement is effective for a period of five years after the date of filing.

(b) Except as otherwise provided in subsections (e), (f), and (g), an initial financing statement filed in connection with a public-finance transaction or manufactured-home transaction is effective for a period of 30 years after the date of filing if it indicates that it is filed in connection with a public-finance transaction or manufactured-home transaction.

(c) The effectiveness of a filed financing statement lapses on the expiration of the period of its effectiveness unless before the lapse a continuation statement is filed pursuant to subsection (d). Upon lapse, a financing statement ceases to be effective and any security interest or agricultural lien that was perfected by the financing statement becomes unperfected, unless the security interest is perfected otherwise. If the security interest or agricultural lien becomes unperfected upon lapse, it is deemed never to have been perfected as against a purchaser of the collateral for value.

(d) A continuation statement may be filed only within six months before the expiration of the five-year period specified in subsection (a) or the 30-year period specified in subsection (b), whichever is applicable.

(e) Except as otherwise provided in Section 9–510, upon timely filing of a continuation statement, the effectiveness of the initial financing statement continues for a period of five years commencing on the day on which the financing statement would have become ineffective in the absence of the filing. Upon the expiration of the five-year period, the financing statement lapses in the same manner as provided in subsection (c), unless, before the lapse, another continuation statement is filed pursuant to subsection (d). Succeeding continuation statements may be filed in the same manner to continue the effectiveness of the initial financing statement.

(f) If a debtor is a transmitting utility and a filed financing statement so indicates, the financing statement is effective until a termination statement is filed.

(g) A record of a mortgage that is effective as a financing statement filed as a fixture filing under Section 9–502(c) remains effective as a financing statement filed as a fixture filing until the mortgage is released or satisfied of record or its effectiveness otherwise terminates as to the real property.

§ 9–516. What Constitutes Filing; Effectiveness of Filing.

(a) Except as otherwise provided in subsection (b), communication of a record to a filing office and tender of the filing fee or acceptance of the record by the filing office constitutes filing.

(b) Filing does not occur with respect to a record that a filing office refuses to accept because:

(1) the record is not communicated by a method or medium of communication authorized by the filing office;

(2) an amount equal to or greater than the applicable filing fee is not tendered;

(3) the filing office is unable to index the record because:

(A) in the case of an initial financing statement, the record does not provide a name for the debtor;

(B) in the case of an amendment or correction statement, the record:

(i) does not identify the initial financing statement as required by Section 9–512 or 9–518, as applicable; or

(ii) identifies an initial financing statement whose effectiveness has lapsed under Section 9–515;

(C) in the case of an initial financing statement that provides the name of a debtor identified as an individual or an amendment that provides a name of a debtor identified as an individual which was not previously provided in the financing statement to which the record relates, the record does not identify the debtor's last name; or

(D) in the case of a record filed [or recorded] in the filing office described in Section 9–501(a)(1), the record does not provide a sufficient description of the real property to which it relates;

(4) in the case of an initial financing statement or an amendment that adds a secured party of record, the record does not provide a name and mailing address for the secured party of record;

(5) in the case of an initial financing statement or an amendment that provides a name of a debtor which was not previously provided in the financing statement to which the amendment relates, the record does not:

(A) provide a mailing address for the debtor;

(B) indicate whether the debtor is an individual or an organization; or

(C) if the financing statement indicates that the debtor is an organization, provide:

(i) a type of organization for the debtor;

(ii) a jurisdiction of organization for the debtor; or

(iii) an organizational identification number for the debtor or indicate that the debtor has none;

(6) in the case of an assignment reflected in an initial financing statement under Section 9–514(a) or an amendment filed under Section 9–514(b), the record does not provide a name and mailing address for the assignee; or

(7) in the case of a continuation statement, the record is not filed within the six-month period prescribed by Section 9–515(d).

(c) For purposes of subsection (b):

(1) a record does not provide information if the filing office is unable to read or decipher the information; and

(2) a record that does not indicate that it is an amendment or identify an initial financing statement to which it relates, as required by Section 9–512, 9–514, or 9–518, is an initial financing statement.

(d) A record that is communicated to the filing office with tender of the filing fee, but which the filing office refuses to accept for a reason other than one set forth in subsection (b), is effective as a filed record except as against a purchaser of the collateral which gives value in reasonable reliance upon the absence of the record from the files.

§ 9–517. Effect of Indexing Errors.

The failure of the filing office to index a record correctly does not affect the effectiveness of the filed record.

§ 9–518. Claim Concerning Inaccurate or Wrongfully Filed Record.

(a) A person may file in the filing office a correction statement with respect to a record indexed there under the person's name if the person believes that the record is inaccurate or was wrongfully filed.

[Alternative A]

(b) A correction statement must:
(1) identify the record to which it relates by the file number assigned to the initial financing statement to which the record relates;

(2) indicate that it is a correction statement; and

(3) provide the basis for the person's belief that the record is inaccurate and indicate the manner in which the person believes the record should be amended to cure any inaccuracy or provide the basis for the person's belief that the record was wrongfully filed.

[Alternative B]

(b) A correction statement must:
(1) identify the record to which it relates by:

(A) the file number assigned to the initial financing statement to which the record relates; and

(B) if the correction statement relates to a record filed [or recorded] in a filing office described in Section 9–501(a)(1), the date [and time] that the initial financing statement was filed [or recorded] and the information specified in Section 9–502(b);

(2) indicate that it is a correction statement; and

(3) provide the basis for the person's belief that the record is inaccurate and indicate the manner in which the person believes the record should be amended to cure any inaccuracy or provide the basis for the person's belief that the record was wrongfully filed.

[End of Alternatives]

(c) The filing of a correction statement does not affect the effectiveness of an initial financing statement or other filed record.
Legislative Note: States whose real-estate filing offices require additional information in amendments and cannot search their records by both the name of the debtor and the file number should enact Alternative B to Sections 9–512(a), 9–518(b), 9–519(f), and 9–522(a).

[Subpart 2. Duties and Operation of Filing Office]

§ 9-519. Numbering, Maintaining, and Indexing Records; Communicating Information Provided in Records.

(a) For each record filed in a filing office, the filing office shall:

(1) assign a unique number to the filed record;

(2) create a record that bears the number assigned to the filed record and the date and time of filing;

(3) maintain the filed record for public inspection; and

(4) index the filed record in accordance with subsections (c), (d), and (e).

(b) A file number [assigned after January 1, 2002,] must include a digit that:

(1) is mathematically derived from or related to the other digits of the file number; and

(2) aids the filing office in determining whether a number communicated as the file number includes a single-digit or transpositional error.

(c) Except as otherwise provided in subsections (d) and (e), the filing office shall:

(1) index an initial financing statement according to the name of the debtor and index all filed records relating to the initial financing statement in a manner that associates with one another an initial financing statement and all filed records relating to the initial financing statement; and

(2) index a record that provides a name of a debtor which was not previously provided in the financing statement to which the record relates also according to the name that was not previously provided.

(d) If a financing statement is filed as a fixture filing or covers as-extracted collateral or timber to be cut, [it must be filed for record and] the filing office shall index it:

(1) under the names of the debtor and of each owner of record shown on the financing statement as if they were the mortgagors under a mortgage of the real property described; and

(2) to the extent that the law of this State provides for indexing of records of mortgages under the name of the mortgagee, under the name of the secured party as if the secured party were the mortgagee thereunder, or, if indexing is by description, as if the financing statement were a record of a mortgage of the real property described.

(e) If a financing statement is filed as a fixture filing or covers as-extracted collateral or timber to be cut, the filing office shall index an assignment filed under Section 9–514(a) or an amendment filed under Section 9–514(b):

(1) under the name of the assignor as grantor; and

(2) to the extent that the law of this State provides for indexing a record of the assignment of a mortgage under the name of the assignee, under the name of the assignee.

[Alternative A]

(f) The filing office shall maintain a capability:
(1) to retrieve a record by the name of the debtor and by the file number assigned to the initial financing statement to which the record relates; and

(2) to associate and retrieve with one another an initial financing statement and each filed record relating to the initial financing statement.

[Alternative B]

(f) The filing office shall maintain a capability:
(1) to retrieve a record by the name of the debtor and:

(A) if the filing office is described in Section 9–501(a)(1), by the file number assigned to the initial financing statement to which

the record relates and the date [and time] that the record was filed [or recorded]; or

(B) if the filing office is described in Section 9–501(a)(2), by the file number assigned to the initial financing statement to which the record relates; and

(2) to associate and retrieve with one another an initial financing statement and each filed record relating to the initial financing statement.

[End of Alternatives]

(g) The filing office may not remove a debtor's name from the index until one year after the effectiveness of a financing statement naming the debtor lapses under Section 9–515 with respect to all secured parties of record.

(h) The filing office shall perform the acts required by subsections (a) through (e) at the time and in the manner prescribed by filing-office rule, but not later than two business days after the filing office receives the record in question.

[(i) Subsection[s] [(b)] [and] [(h)] do[es] not apply to a filing office described in Section 9–501(a)(1).]

Legislative Notes:

1. States whose filing offices currently assign file numbers that include a verification number, commonly known as a "check digit," or can implement this requirement before the effective date of this Article should omit the bracketed language in subsection (b).

2. In States in which writings will not appear in the real property records and indices unless actually recorded the bracketed language in subsection (d) should be used.

3. States whose real-estate filing offices require additional information in amendments and cannot search their records by both the name of the debtor and the file number should enact Alternative B to Sections 9–512 (a), 9–518(b), 9–519(f), and 9–522(a).

4. A State that elects not to require real-estate filing offices to comply with either or both of subsections (b) and (h) may adopt an applicable variation of subsection (i) and add "Except as otherwise provided in subsection (i)," to the appropriate subsection or subsections.

§ 9–520. Acceptance and Refusal to Accept Record.

(a) A filing office shall refuse to accept a record for filing for a reason set forth in Section 9–516(b) and may refuse to accept a record for filing only for a reason set forth in Section 9–516(b).

(b) If a filing office refuses to accept a record for filing, it shall communicate to the person that presented the record the fact of and reason for the refusal and the date and time the record would have been filed had the filing office accepted it. The communication must be made at the time and in the manner prescribed by filing-office rule but [, in the case of a filing office described in Section 9–501(a)(2),] in no event more than two business days after the filing office receives the record.

(c) A filed financing statement satisfying Section 9–502(a) and (b) is effective, even if the filing office is required to refuse to accept it for filing under subsection (a). However, Section 9–338 applies to a filed financing statement providing information described in Section 9–516(b)(5) which is incorrect at the time the financing statement is filed.

(d) If a record communicated to a filing office provides information that relates to more than one debtor, this part applies as to each debtor separately.

Legislative Note: A State that elects not to require real-property filing offices to comply with subsection (b) should include the bracketed language.

§ 9–521. Uniform Form of Written Financing Statement and Amendment.

(a) A filing office that accepts written records may not refuse to accept a written initial financing statement in the following form and format except for a reason set forth in Section 9–516(b):

[NATIONAL UCC FINANCING STATEMENT (FORM UCC1)(REV. 7/29/98)]

[NATIONAL UCC FINANCING STATEMENT ADDENDUM (FORM UCC1Ad)(REV. 07/29/98)]

(b) A filing office that accepts written records may not refuse to accept a written record in the following form and format except for a reason set forth in Section 9–516(b):

[NATIONAL UCC FINANCING STATEMENT AMENDMENT (FORM UCC3)(REV. 07/29/98)]

[NATIONAL UCC FINANCING STATEMENT AMENDMENT ADDENDUM (FORM UCC3Ad)(REV. 07/29/98)]

§ 9–522. Maintenance and Destruction of Records.

[Alternative A]

(a) The filing office shall maintain a record of the information provided in a filed financing statement for at least one year after the effectiveness of the financing statement has lapsed under Section 9–515 with respect to all secured parties of record. The record must be retrievable by using the name of the debtor and by using the file number assigned to the initial financing statement to which the record relates.

[Alternative B]

(a) The filing office shall maintain a record of the information provided in a filed financing statement for at least one year after the effectiveness of the financing statement has lapsed under Section 9–515 with respect to all secured parties of record. The record must be retrievable by using the name of the debtor and:

(1) if the record was filed [or recorded] in the filing office described in Section 9–501(a)(1), by using the file number assigned to the initial financing statement to which the record relates and the date [and time] that the record was filed [or recorded]; or

(2) if the record was filed in the filing office described in Section 9–501(a)(2), by using the file number assigned to the initial financing statement to which the record relates.

[End of Alternatives]

(b) Except to the extent that a statute governing disposition of public records provides otherwise, the filing office immediately may destroy any written record evidencing a financing statement. However, if the filing office destroys a written record, it shall maintain another record of the financing statement which complies with subsection (a).

Legislative Note: States whose real-estate filing offices require additional information in amendments and cannot search their records by both the name of the debtor and the file number should enact Alternative B to Sections 9–512(a), 9–518(b), 9–519(f), and 9–522(a).

§ 9-523. Information from Filing Office; Sale or License of Records.

(a) If a person that files a written record requests an acknowledgment of the filing, the filing office shall send to the person an image of the record showing the number assigned to the record pursuant to Section 9–519(a)(1) and the date and time of the filing of the record. However, if the person furnishes a copy of the record to the filing office, the filing office may instead:

(1) note upon the copy the number assigned to the record pursuant to Section 9–519(a)(1) and the date and time of the filing of the record; and

(2) send the copy to the person.

(b) If a person files a record other than a written record, the filing office shall communicate to the person an acknowledgment that provides:

(1) the information in the record;

(2) the number assigned to the record pursuant to Section 9–519(a)(1); and

(3) the date and time of the filing of the record.

(c) The filing office shall communicate or otherwise make available in a record the following information to any person that requests it:

(1) whether there is on file on a date and time specified by the filing office, but not a date earlier than three business days before the filing office receives the request, any financing statement that:

(A) designates a particular debtor [or, if the request so states, designates a particular debtor at the address specified in the request];

(B) has not lapsed under Section 9–515 with respect to all secured parties of record; and

(C) if the request so states, has lapsed under Section 9–515 and a record of which is maintained by the filing office under Section 9–522(a);

(2) the date and time of filing of each financing statement; and

(3) the information provided in each financing statement.

(d) In complying with its duty under subsection (c), the filing office may communicate information in any medium. However, if requested, the filing office shall communicate information by issuing [its written certificate] [a record that can be admitted into evidence in the courts of this State without extrinsic evidence of its authenticity].

(e) The filing office shall perform the acts required by subsections (a) through (d) at the time and in the manner prescribed by filing-office rule, but not later than two business days after the filing office receives the request.

(f) At least weekly, the [insert appropriate official or governmental agency] [filing office] shall offer to sell or license to the public on a nonexclusive basis, in bulk, copies of all records filed in it under this part, in every medium from time to time available to the filing office.

Legislative Notes:

1. States whose filing office does not offer the additional service of responding to search requests limited to a particular address should omit the bracketed language in subsection (c)(1)(A).

2. A State that elects not to require real-estate filing offices to comply with either or both of subsections (e) and (f) should specify in the appropriate subsection(s) only the filing office described in Section 9–501(a)(2).

§ 9-524. Delay by Filing Office.

Delay by the filing office beyond a time limit prescribed by this part is excused if:

(1) the delay is caused by interruption of communication or computer facilities, war, emergency conditions, failure of equipment, or other circumstances beyond control of the filing office; and

(2) the filing office exercises reasonable diligence under the circumstances.

§ 9-525. Fees.

(a) Except as otherwise provided in subsection (e), the fee for filing and indexing a record under this part, other than an initial financing statement of the kind described in subsection (b), is [the amount specified in subsection (c), if applicable, plus]:

(1) $[X] if the record is communicated in writing and consists of one or two pages;

(2) $[2X] if the record is communicated in writing and consists of more than two pages; and

(3) $[1/2X] if the record is communicated by another medium authorized by filing-office rule.

(b) Except as otherwise provided in subsection (e), the fee for filing and indexing an initial financing statement of the

following kind is [the amount specified in subsection (c), if applicable, plus]:

(1) $——— if the financing statement indicates that it is filed in connection with a public-finance transaction;

(2) $——— if the financing statement indicates that it is filed in connection with a manufactured-home transaction.

[Alternative A]

(c) The number of names required to be indexed does not affect the amount of the fee in subsections (a) and (b).

[Alternative B]

(c) Except as otherwise provided in subsection (e), if a record is communicated in writing, the fee for each name more than two required to be indexed is $———.

[End of Alternatives]

(a) The fee for responding to a request for information from the filing office, including for [issuing a certificate showing] [communicating] whether there is on file any financing statement naming a particular debtor, is:

(1) $——— if the request is communicated in writing; and

(2) $——— if the request is communicated by another medium authorized by filing-office rule.

(e) This section does not require a fee with respect to a record of a mortgage which is effective as a financing statement filed as a fixture filing or as a financing statement covering as-extracted collateral or timber to be cut under Section 9–502(c). However, the recording and satisfaction fees that otherwise would be applicable to the record of the mortgage apply.

Legislative Notes:

1. To preserve uniformity, a State that places the provisions of this section together with statutes setting fees for other services should do so without modification.

2. A State should enact subsection (c), Alternative A, and omit the bracketed language in subsections (a) and (b) unless its indexing system entails a substantial additional cost when indexing additional names.

As amended in 2000.

§ 9–526. Filing-Office Rules.

(a) The [insert appropriate governmental official or agency] shall adopt and publish rules to implement this article. The filing-office rules must be[:

(1) consistent with this article[; and

(2) adopted and published in accordance with the [insert any applicable state administrative procedure act]].

(b) To keep the filing-office rules and practices of the filing office in harmony with the rules and practices of filing offices in other jurisdictions that enact substantially this part, and to keep the technology used by the filing office compatible with the technology used by filing offices in other jurisdictions that enact substantially this part, the [insert appropriate governmental official or agency], so far as is consistent with the purposes, policies, and provisions of this article, in adopting, amending, and repealing filing-office rules, shall:

(1) consult with filing offices in other jurisdictions that enact substantially this part; and

(2) consult the most recent version of the Model Rules promulgated by the International Association of Corporate Administrators or any successor organization; and

(3) take into consideration the rules and practices of, and the technology used by, filing offices in other jurisdictions that enact substantially this part.

§ 9–527. Duty to Report.

The [insert appropriate governmental official or agency] shall report [annually on or before ———] to the [Governor and Legislature] on the operation of the filing office. The report must contain a statement of the extent to which:

(1) the filing-office rules are not in harmony with the rules of filing offices in other jurisdictions that enact substantially this part and the reasons for these variations; and

(2) the filing-office rules are not in harmony with the most recent version of the Model Rules promulgated by the International Association of Corporate Administrators, or any successor organization, and the reasons for these variations.

PART 6 Default

[Subpart 1. Default and Enforcement of Security Interest]

§ 9–601. Rights after Default; Judicial Enforcement; Consignor or Buyer of Accounts, Chattel Paper, Payment Intangibles, or Promissory Notes.

(a) After default, a secured party has the rights provided in this part and, except as otherwise provided in Section 9–602, those provided by agreement of the parties.
A secured party:

(1) may reduce a claim to judgment, foreclose, or otherwise enforce the claim, security interest, or agricultural lien by any available judicial procedure; and

(2) if the collateral is documents, may proceed either as to the documents or as to the goods they cover.

(b) A secured party in possession of collateral or control of collateral under Section 9–104, 9–105, 9–106, or 9–107 has the rights and duties provided in Section 9–207.

(c) The rights under subsections (a) and (b) are cumulative and may be exercised simultaneously.

(d) Except as otherwise provided in subsection (g) and Section 9–605, after default, a debtor and an obligor have the rights provided in this part and by agreement of the parties.

(e) If a secured party has reduced its claim to judgment, the lien of any levy that may be made upon the collateral by virtue of an execution based upon the judgment relates back to the earliest of:

(1) the date of perfection of the security interest or agricultural lien in the collateral;

(2) the date of filing a financing statement covering the collateral; or

(3) any date specified in a statute under which the agricultural lien was created.

(f) A sale pursuant to an execution is a foreclosure of the security interest or agricultural lien by judicial procedure within the meaning of this section. A secured party may purchase at the sale and thereafter hold the collateral free of any other requirements of this article.

(g) Except as otherwise provided in Section 9–607(c), this part imposes no duties upon a secured party that is a consignor or is a buyer of accounts, chattel paper, payment intangibles, or promissory notes.

§ 9-602. Waiver and Variance of Rights and Duties.

Except as otherwise provided in Section 9–624, to the extent that they give rights to a debtor or obligor and impose duties on a secured party, the debtor or obligor may not waive or vary the rules stated in the following listed sections:

(1) Section 9–207(b)(4)(C), which deals with use and operation of the collateral by the secured party;

(2) Section 9–210, which deals with requests for an accounting and requests concerning a list of collateral and statement of account;

(3) Section 9–607(c), which deals with collection and enforcement of collateral;

(4) Sections 9–608(a) and 9–615(c) to the extent that they deal with application or payment of noncash proceeds of collection, enforcement, or disposition;

(5) Sections 9–608(a) and 9–615(d) to the extent that they require accounting for or payment of surplus proceeds of collateral;

(6) Section 9–609 to the extent that it imposes upon a secured party that takes possession of collateral without judicial process the duty to do so without breach of the peace;

(7) Sections 9–610(b), 9–611, 9–613, and 9–614, which deal with disposition of collateral;

(8) Section 9–615(f), which deals with calculation of a deficiency or surplus when a disposition is made to the secured party, a person related to the secured party, or a secondary obligor;

(9) Section 9–616, which deals with explanation of the calculation of a surplus or deficiency;

(10) Sections 9–620, 9–621, and 9–622, which deal with acceptance of collateral in satisfaction of obligation;

(11) Section 9–623, which deals with redemption of collateral;

(12) Section 9–624, which deals with permissible waivers; and

(13) Sections 9–625 and 9–626, which deal with the secured party's liability for failure to comply with this article.

§ 9-603. Agreement on Standards Concerning Rights and Duties.

(a) The parties may determine by agreement the standards measuring the fulfillment of the rights of a debtor or obligor and the duties of a secured party under a rule stated in Section 9–602 if the standards are not manifestly unreasonable.

(b) Subsection (a) does not apply to the duty under Section 9–609 to refrain from breaching the peace.

§ 9-604. Procedure If Security Agreement Covers Real Property or Fixtures.

(a) If a security agreement covers both personal and real property, a secured party may proceed:

(1) under this part as to the personal property without prejudicing any rights with respect to the real property; or

(2) as to both the personal property and the real property in accordance with the rights with respect to the real property, in which case the other provisions of this part do not apply.

(b) Subject to subsection (c), if a security agreement covers goods that are or become fixtures, a secured party may proceed:

(1) under this part; or

(2) in accordance with the rights with respect to real property, in which case the other provisions of this part do not apply.

(c) Subject to the other provisions of this part, if a secured party holding a security interest in fixtures has priority over all owners and encumbrancers of the real property, the secured party, after default, may remove the collateral from the real property.

(d) A secured party that removes collateral shall promptly reimburse any encumbrancer or owner of the real property, other than the debtor, for the cost of repair of any physical injury caused by the removal. The secured party need not reimburse the encumbrancer or owner for any diminution in value of the real property caused by the absence of the goods removed or by any necessity of replacing them. A person entitled to reimbursement may refuse permission to remove until the secured party gives adequate assurance for the performance of the obligation to reimburse.

§ 9–605. Unknown Debtor or Secondary Obligor.

A secured party does not owe a duty based on its status as secured party:

(1) to a person that is a debtor or obligor, unless the secured party knows:

(A) that the person is a debtor or obligor;

(B) the identity of the person; and

(C) how to communicate with the person; or

(2) to a secured party or lienholder that has filed a financing statement against a person, unless the secured party knows:

(A) that the person is a debtor; and

(B) the identity of the person.

§ 9–606. Time of Default for Agricultural Lien.

For purposes of this part, a default occurs in connection with an agricultural lien at the time the secured party becomes entitled to enforce the lien in accordance with the statute under which it was created.

§ 9–607. Collection and Enforcement by Secured Party.

(a) If so agreed, and in any event after default, a secured party:

(1) may notify an account debtor or other person obligated on collateral to make payment or otherwise render performance to or for the benefit of the secured party;

(2) may take any proceeds to which the secured party is entitled under Section 9–315;

(3) may enforce the obligations of an account debtor or other person obligated on collateral and exercise the rights of the debtor with respect to the obligation of the account debtor or other person obligated on collateral to make payment or otherwise render performance to the debtor, and with respect to any property that secures the obligations of the account debtor or other person obligated on the collateral;

(4) if it holds a security interest in a deposit account perfected by control under Section 9–104(a)(1), may apply the balance of the deposit account to the obligation secured by the deposit account; and

(5) if it holds a security interest in a deposit account perfected by control under Section 9–104(a)(2) or (3), may instruct the bank to pay the balance of the deposit account to or for the benefit of the secured party.

(b) If necessary to enable a secured party to exercise under subsection (a)(3) the right of a debtor to enforce a mortgage nonjudicially, the secured party may record in the office in which a record of the mortgage is recorded:

(1) a copy of the security agreement that creates or provides for a security interest in the obligation secured by the mortgage; and

(2) the secured party's sworn affidavit in recordable form stating that:

(A) a default has occurred; and

(B) the secured party is entitled to enforce the mortgage nonjudicially.

(c) A secured party shall proceed in a commercially reasonable manner if the secured party:

(1) undertakes to collect from or enforce an obligation of an account debtor or other person obligated on collateral; and

(2) is entitled to charge back uncollected collateral or otherwise to full or limited recourse against the debtor or a secondary obligor.

(d) A secured party may deduct from the collections made pursuant to subsection (c) reasonable expenses of collection and enforcement, including reasonable attorney's fees and legal expenses incurred by the secured party.

(e) This section does not determine whether an account debtor, bank, or other person obligated on collateral owes a duty to a secured party.

As amended in 2000.

§ 9–608. Application of Proceeds of Collection or Enforcement; Liability for Deficiency and Right to Surplus.

(a) If a security interest or agricultural lien secures payment or performance of an obligation, the following rules apply:

(1) A secured party shall apply or pay over for application the cash proceeds of collection or enforcement under Section 9–607 in the following order to:

(A) the reasonable expenses of collection and enforcement and, to the extent provided for by agreement and not prohibited by law, reasonable attorney's fees and legal expenses incurred by the secured party;

(B) the satisfaction of obligations secured by the security interest or agricultural lien under which the collection or enforcement is made; and

(C) the satisfaction of obligations secured by any subordinate security interest in or other lien on the collateral subject to the security interest or agricultural lien under which the collection or enforcement is made if the secured party receives an authenticated demand for proceeds before distribution of the proceeds is completed.

(2) If requested by a secured party, a holder of a subordinate security interest or other lien shall furnish reasonable proof of the interest or lien within a reasonable time. Unless the holder complies, the secured party need not comply with the holder's demand under paragraph (1)(C).

(3) A secured party need not apply or pay over for application noncash proceeds of collection and enforcement under Section 9–607 unless the failure to do so would be commercially unreasonable. A secured party that applies or pays over for

application noncash proceeds shall do so in a commercially reasonable manner.

(4) A secured party shall account to and pay a debtor for any surplus, and the obligor is liable for any deficiency.

(b) If the underlying transaction is a sale of accounts, chattel paper, payment intangibles, or promissory notes, the debtor is not entitled to any surplus, and the obligor is not liable for any deficiency.

As amended in 2000.

§ 9–609. Secured Party's Right to Take Possession after Default.

(a) After default, a secured party:

(1) may take possession of the collateral; and

(2) without removal, may render equipment unusable and dispose of collateral on a debtor's premises under Section 9–610.

(b) A secured party may proceed under subsection (a):

(1) pursuant to judicial process; or

(2) without judicial process, if it proceeds without breach of the peace.

(c) If so agreed, and in any event after default, a secured party may require the debtor to assemble the collateral and make it available to the secured party at a place to be designated by the secured party which is reasonably convenient to both parties.

§ 9–610. Disposition of Collateral after Default.

(a) After default, a secured party may sell, lease, license, or otherwise dispose of any or all of the collateral in its present condition or following any commercially reasonable preparation or processing.

(b) Every aspect of a disposition of collateral, including the method, manner, time, place, and other terms, must be commercially reasonable. If commercially reasonable, a secured party may dispose of collateral by public or private proceedings, by one or more contracts, as a unit or in parcels, and at any time and place and on any terms.

(c) A secured party may purchase collateral:

(1) at a public disposition; or

(2) at a private disposition only if the collateral is of a kind that is customarily sold on a recognized market or the subject of widely distributed standard price quotations.

(d) A contract for sale, lease, license, or other disposition includes the warranties relating to title, possession, quiet enjoyment, and the like which by operation of law accompany a voluntary disposition of property of the kind subject to the contract.

(e) A secured party may disclaim or modify warranties under subsection (d):

(1) in a manner that would be effective to disclaim or modify the warranties in a voluntary disposition of property of the kind subject to the contract of disposition; or

(2) by communicating to the purchaser a record evidencing the contract for disposition and including an express disclaimer or modification of the warranties.

(f) A record is sufficient to disclaim warranties under subsection (e) if it indicates "There is no warranty relating to title, possession, quiet enjoyment, or the like in this disposition" or uses words of similar import.

§ 9–611. Notification before Disposition of Collateral.

(a) In this section, "notification date" means the earlier of the date on which:

(1) a secured party sends to the debtor and any secondary obligor an authenticated notification of disposition; or

(2) the debtor and any secondary obligor waive the right to notification.

(b) Except as otherwise provided in subsection (d), a secured party that disposes of collateral under Section 9–610 shall send to the persons specified in subsection (c) a reasonable authenticated notification of disposition.

(c) To comply with subsection (b), the secured party shall send an authenticated notification of disposition to:

(1) the debtor;

(2) any secondary obligor; and

(3) if the collateral is other than consumer goods:

(A) any other person from which the secured party has received, before the notification date, an authenticated notification of a claim of an interest in the collateral;

(B) any other secured party or lienholder that, 10 days before the notification date, held a security interest in or other lien on the collateral perfected by the filing of a financing statement that:

(i) identified the collateral;

(ii) was indexed under the debtor's name as of that date; and

(iii) was filed in the office in which to file a financing statement against the debtor covering the collateral as of that date; and

(C) any other secured party that, 10 days before the notification date, held a security interest in the collateral perfected by compliance with a statute, regulation, or treaty described in Section 9–311(a).

(d) Subsection (b) does not apply if the collateral is perishable or threatens to decline speedily in value or is of a type customarily sold on a recognized market.

(e) A secured party complies with the requirement for notification prescribed by subsection (c)(3)(B) if:

(1) not later than 20 days or earlier than 30 days before the notification date, the secured party requests, in a commercially reasonable manner, information concerning financing statements indexed under the debtor's name in the office indicated in subsection (c)(3)(B); and

(2) before the notification date, the secured party:

(A) did not receive a response to the request for information; or

(B) received a response to the request for information and sent an authenticated notification of disposition to each secured party or other lienholder named in that response whose financing statement covered the collateral.

§ 9–612. Timeliness of Notification before Disposition of Collateral.

(a) Except as otherwise provided in subsection (b), whether a notification is sent within a reasonable time is a question of fact.

(b) In a transaction other than a consumer transaction, a notification of disposition sent after default and 10 days or more before the earliest time of disposition set forth in the notification is sent within a reasonable time before the disposition.

§ 9–613. Contents and Form of Notification before Disposition of Collateral: General.

Except in a consumer-goods transaction, the following rules apply:

(1) The contents of a notification of disposition are sufficient if the notification:

(A) describes the debtor and the secured party;

(B) describes the collateral that is the subject of the intended disposition;

(C) states the method of intended disposition;

(D) states that the debtor is entitled to an accounting of the unpaid indebtedness and states the charge, if any, for an accounting; and

(E) states the time and place of a public disposition or the time after which any other disposition is to be made.

(2) Whether the contents of a notification that lacks any of the information specified in paragraph (1) are nevertheless sufficient is a question of fact.

(3) The contents of a notification providing substantially the information specified in paragraph (1) are sufficient, even if the notification includes:

(A) information not specified by that paragraph; or

(b) minor errors that are not seriously misleading.

(4) A particular phrasing of the notification is not required.

(5) The following form of notification and the form appearing in Section 9–614(3), when completed, each provides sufficient information:

NOTIFICATION OF DISPOSITION OF COLLATERAL

To: [*Name of debtor, obligor, or other person to which the notification is sent*]

From: [*Name, address, and telephone number of secured party*]

Name of Debtor(s): [*Include only if debtor(s) are not an addressee*]

[*For a public disposition:*]

We will sell [or lease or license, *as applicable*] the [*describe collateral*] [to the highest qualified bidder] in public as follows:

Day and Date: _______

Time: _______

Place: _______

[*For a private disposition:*]

We will sell [or lease or license, *as applicable*] the [*describe collateral*] privately sometime after [*day and date*].

You are entitled to an accounting of the unpaid indebted ness secured by the property that we intend to sell [or lease or license as *applicable*] [for a charge of $_______]. You may request an accounting by calling us at [*telephone number*].

[End of Form]

As amended in 2000.

§ 9–614. Contents and Form of Notification before Disposition of Collateral: Consumer-Goods Transaction.

In a consumer-goods transaction, the following rules apply:

(1) A notification of disposition must provide the following information:

(A) the information specified in Section 9–613(1);

(B) a description of any liability for a deficiency of the person to which the notification is sent;

(C) a telephone number from which the amount that must be paid to the secured party to redeem the collateral under Section 9–623 is available; and

(D) a telephone number or mailing address from which additional information concerning the disposition and the obligation secured is available.

(2) A particular phrasing of the notification is not required.

(3) The following form of notification, when completed, provides sufficient information:

[*Name and address of secured party*]

[*Date*]

NOTICE OF OUR PLAN TO SELL PROPERTY

[*Name and address of any obligor who is also a debtor*]

Subject: [*Identification of Transaction*]

We have your [*describe collateral*], because you broke promises in our agreement.

[*For a public disposition:*]

We will sell [*describe collateral*] at public sale. A sale could include a lease or license. The sale will be held as follows:

Date: _______

Time: _______

Place: _______

You may attend the sale and bring bidders if you want.

[*For a private disposition:*]

We will sell [*describe collateral*] at private sale sometime after [*date*]. A sale could include a lease or license.

The money that we get from the sale (after paying our costs) will reduce the amount you owe. If we get less money than you owe, you [*will or will not, as applicable*] still owe us the difference. If we get more money than you owe, you will get the extra money, unless we must pay it to someone else.

You can get the property back at any time before we sell it by paying us the full amount you owe (not just the past due payments), including our expenses. To learn the exact amount you must pay, call us at [*telephone number*].

If you want us to explain to you in writing how we have figured the amount that you owe us, you may call us at [*telephone number*] [or write us at [*secured party's address*]] and request a written explanation. [We will charge you $_______ for the explanation if we sent you another written explanation of the amount you owe us within the last six months.]

If you need more information about the sale call us at [*telephone number*] [or write us at [*secured party's address*]].

We are sending this notice to the following other people who have an interest in [*describe collateral*] or who owe money under your agreement:

[*Names of all other debtors and obligors, if any*]

[End of Form]

(4) A notification in the form of paragraph (3) is sufficient, even if additional information appears at the end of the form.

(5) A notification in the form of paragraph (3) is sufficient, even if it includes errors in information not required by paragraph (1), unless the error is misleading with respect to rights arising under this article.

(6) If a notification under this section is not in the form of paragraph (3), law other than this article determines the effect of including information not required by paragraph (1).

§ 9–615. Application of Proceeds of Disposition; Liability for Deficiency and Right to Surplus.

(a) A secured party shall apply or pay over for application the cash proceeds of disposition under Section 9–610 in the following order to:

(1) the reasonable expenses of retaking, holding, preparing for disposition, processing, and disposing, and, to the extent provided for by agreement and not prohibited by law, reasonable attorney's fees and legal expenses incurred by the secured party;

(2) the satisfaction of obligations secured by the security interest or agricultural lien under which the disposition is made;

(3) the satisfaction of obligations secured by any subordinate security interest in or other subordinate lien on the collateral if:

(A) the secured party receives from the holder of the subordinate security interest or other lien an authenticated demand for proceeds before distribution of the proceeds is completed; and

(B) in a case in which a consignor has an interest in the collateral, the subordinate security interest or other lien is senior to the interest of the consignor; and

(4) a secured party that is a consignor of the collateral if the secured party receives from the consignor an authenticated demand for proceeds before distribution of the proceeds is completed.

(b) If requested by a secured party, a holder of a subordinate security interest or other lien shall furnish reasonable proof of the interest or lien within a reasonable time. Unless the holder does so, the secured party need not comply with the holder's demand under subsection (a)(3).

(c) A secured party need not apply or pay over for application noncash proceeds of disposition under Section 9–610 unless the failure to do so would be commercially unreasonable. A secured party that applies or pays over for application noncash proceeds shall do so in a commercially reasonable manner.

(d) If the security interest under which a disposition is made secures payment or performance of an obligation, after making the payments and applications required by subsection (a) and permitted by subsection (c):

(1) unless subsection (a)(4) requires the secured party to apply or pay over cash proceeds to a consignor, the secured party shall account to and pay a debtor for any surplus; and

(2) the obligor is liable for any deficiency.

(e) If the underlying transaction is a sale of accounts, chattel paper, payment intangibles, or promissory notes:

(1) the debtor is not entitled to any surplus; and

(2) the obligor is not liable for any deficiency.

(f) The surplus or deficiency following a disposition is calculated based on the amount of proceeds that would have been realized in a disposition complying with this part to a

transferee other than the secured party, a person related to the secured party, or a secondary obligor if:

(1) the transferee in the disposition is the secured party, a person related to the secured party, or a secondary obligor; and

(2) the amount of proceeds of the disposition is significantly below the range of proceeds that a complying disposition to a person other than the secured party, a person related to the secured party, or a secondary obligor would have brought.

(g) A secured party that receives cash proceeds of a disposition in good faith and without knowledge that the receipt violates the rights of the holder of a security interest or other lien that is not subordinate to the security interest or agricultural lien under which the disposition is made:

(1) takes the cash proceeds free of the security interest or other lien;

(2) is not obligated to apply the proceeds of the disposition to the satisfaction of obligations secured by the security interest or other lien; and

(3) is not obligated to account to or pay the holder of the security interest or other lien for any surplus.

As amended in 2000.

§ 9–616. Explanation of Calculation of Surplus or Deficiency.

(a) In this section:

(1) "Explanation" means a writing that:

(A) states the amount of the surplus or deficiency;

(B) provides an explanation in accordance with subsection (c) of how the secured party calculated the surplus or deficiency;

(C) states, if applicable, that future debits, credits, charges, including additional credit service charges or interest, rebates, and expenses may affect the amount of the surplus or deficiency; and

(D) provides a telephone number or mailing address from which additional information concerning the transaction is available.

(2) "Request" means a record:

(A) authenticated by a debtor or consumer obligor;

(B) requesting that the recipient provide an explanation; and

(C) sent after disposition of the collateral under Section 9–610.

(b) In a consumer-goods transaction in which the debtor is entitled to a surplus or a consumer obligor is liable for a deficiency under Section 9–615, the secured party shall:

(1) send an explanation to the debtor or consumer obligor, as applicable, after the disposition and:

(A) before or when the secured party accounts to the debtor and pays any surplus or first makes written demand on the consumer obligor after the disposition for payment of the deficiency; and

(B) within 14 days after receipt of a request; or

(2) in the case of a consumer obligor who is liable for a deficiency, within 14 days after receipt of a request, send to the consumer obligor a record waiving the secured party's right to a deficiency.

(c) To comply with subsection (a)(1)(B), a writing must provide the following information in the following order:

(1) the aggregate amount of obligations secured by the security interest under which the disposition was made, and, if the amount reflects a rebate of unearned interest or credit service charge, an indication of that fact, calculated as of a specified date:

(A) if the secured party takes or receives possession of the collateral after default, not more than 35 days before the secured party takes or receives possession; or

(B) if the secured party takes or receives possession of the collateral before default or does not take possession of the collateral, not more than 35 days before the disposition;

(2) the amount of proceeds of the disposition;

(3) the aggregate amount of the obligations after deducting the amount of proceeds;

(4) the amount, in the aggregate or by type, and types of expenses, including expenses of retaking, holding, preparing for disposition, processing, and disposing of the collateral, and attorney's fees secured by the collateral which are known to the secured party and relate to the current disposition;

(5) the amount, in the aggregate or by type, and types of credits, including rebates of interest or credit service charges, to which the obligor is known to be entitled and which are not reflected in the amount in paragraph (1); and

(6) the amount of the surplus or deficiency.

(d) A particular phrasing of the explanation is not required. An explanation complying substantially with the requirements of subsection (a) is sufficient, even if it includes minor errors that are not seriously misleading.

(e) A debtor or consumer obligor is entitled without charge to one response to a request under this section during any six-month period in which the secured party did not send to the debtor or consumer obligor an explanation pursuant to subsection (b)(1). The secured party may require payment of a charge not exceeding $25 for each additional response.

§ 9–617. Rights of Transferee of Collateral.

(a) A secured party's disposition of collateral after default:

(1) transfers to a transferee for value all of the debtor's rights in the collateral;

(2) discharges the security interest under which the disposition is made; and

(3) discharges any subordinate security interest or other subordinate lien [other than liens created under [cite acts or statutes providing for liens, if any, that are not to be discharged]].

(b) A transferee that acts in good faith takes free of the rights and interests described in subsection (a), even if the secured party fails to comply with this article or the requirements of any judicial proceeding.

(c) If a transferee does not take free of the rights and interests described in subsection (a), the transferee takes the collateral subject to:

(1) the debtor's rights in the collateral;

(2) the security interest or agricultural lien under which the disposition is made; and

(3) any other security interest or other lien.

§ 9–618. Rights and Duties of Certain Secondary Obligors.

(a) A secondary obligor acquires the rights and becomes obligated to perform the duties of the secured party after the secondary obligor:

(1) receives an assignment of a secured obligation from the secured party;

(2) receives a transfer of collateral from the secured party and agrees to accept the rights and assume the duties of the secured party; or

(3) is subrogated to the rights of a secured party with respect to collateral.

(b) An assignment, transfer, or subrogation described in subsection (a):

(1) is not a disposition of collateral under Section 9–610; and

(2) relieves the secured party of further duties under this article.

§ 9–619. Transfer of Record or Legal Title.

(a) In this section, "transfer statement" means a record authenticated by a secured party stating:

(1) that the debtor has defaulted in connection with an obligation secured by specified collateral;

(2) that the secured party has exercised its post-default remedies with respect to the collateral;

(3) that, by reason of the exercise, a transferee has acquired the rights of the debtor in the collateral; and

(4) the name and mailing address of the secured party, debtor, and transferee.

(b) A transfer statement entitles the transferee to the transfer of record of all rights of the debtor in the collateral specified in the statement in any official filing, recording, registration, or certificate-of-title system covering the collateral. If a transfer statement is presented with the applicable fee and request form to the official or office responsible for maintaining the system, the official or office shall:

(1) accept the transfer statement;

(2) promptly amend its records to reflect the transfer; and

(3) if applicable, issue a new appropriate certificate of title in the name of the transferee.

(c) A transfer of the record or legal title to collateral to a secured party under subsection (b) or otherwise is not of itself a disposition of collateral under this article and does not of itself relieve the secured party of its duties under this article.

§ 9–620. Acceptance of Collateral in Full or Partial Satisfaction of Obligation; Compulsory Disposition of Collateral.

(a) Except as otherwise provided in subsection (g), a secured party may accept collateral in full or partial satisfaction of the obligation it secures only if:

(1) the debtor consents to the acceptance under subsection (c);

(2) the secured party does not receive, within the time set forth in subsection (d), a notification of objection to the proposal authenticated by:

(A) a person to which the secured party was required to send a proposal under Section 9–621; or

(B) any other person, other than the debtor, holding an interest in the collateral subordinate to the security interest that is the subject of the proposal;

(3) if the collateral is consumer goods, the collateral is not in the possession of the debtor when the debtor consents to the acceptance; and

(4) subsection (e) does not require the secured party to dispose of the collateral or the debtor waives the requirement pursuant to Section 9–624.

(b) A purported or apparent acceptance of collateral under this section is ineffective unless:

(1) the secured party consents to the acceptance in an authenticated record or sends a proposal to the debtor; and

(2) the conditions of subsection (a) are met.

(c) For purposes of this section:

(1) a debtor consents to an acceptance of collateral in partial satisfaction of the obligation it secures only if the debtor agrees to the terms of the acceptance in a record authenticated after default; and

(2) a debtor consents to an acceptance of collateral in full satisfaction of the obligation it secures only if the debtor agrees to the terms of the acceptance in a record authenticated after default or the secured party:

(A) sends to the debtor after default a proposal that is unconditional or subject only to a condition that collateral not in the possession of the secured party be preserved or maintained;

(B) in the proposal, proposes to accept collateral in full satisfaction of the obligation it secures; and

(C) does not receive a notification of objection authenticated by the debtor within 20 days after the proposal is sent.

(d) To be effective under subsection (a)(2), a notification of objection must be received by the secured party:

(1) in the case of a person to which the proposal was sent pursuant to Section 9–621, within 20 days after notification was sent to that person; and

(2) in other cases:

(A) within 20 days after the last notification was sent pursuant to Section 9–621; or

(B) if a notification was not sent, before the debtor consents to the acceptance under subsection (c).

(e) A secured party that has taken possession of collateral shall dispose of the collateral pursuant to Section 9–610 within the time specified in subsection (f) if:

(1) 60 percent of the cash price has been paid in the case of a purchase-money security interest in consumer goods; or

(2) 60 percent of the principal amount of the obligation secured has been paid in the case of a non-purchase-money security interest in consumer goods.

(f) To comply with subsection (e), the secured party shall dispose of the collateral:

(1) within 90 days after taking possession; or

(2) within any longer period to which the debtor and all secondary obligors have agreed in an agreement to that effect entered into and authenticated after default.

(g) In a consumer transaction, a secured party may not accept collateral in partial satisfaction of the obligation it secures.

§ 9-621. Notification of Proposal to Accept Collateral.

(a) A secured party that desires to accept collateral in full or partial satisfaction of the obligation it secures shall send its proposal to:

(1) any person from which the secured party has received, before the debtor consented to the acceptance, an authenticated notification of a claim of an interest in the collateral;

(2) any other secured party or lienholder that, 10 days before the debtor consented to the acceptance, held a security interest in or other lien on the collateral perfected by the filing of a financing statement that:

(A) identified the collateral;

(B) was indexed under the debtor's name as of that date; and

(C) was filed in the office or offices in which to file a financing statement against the debtor covering the collateral as of that date; and

(3) any other secured party that, 10 days before the debtor consented to the acceptance, held a security interest in the collateral perfected by compliance with a statute, regulation, or treaty described in Section 9–311(a).

(b) A secured party that desires to accept collateral in partial satisfaction of the obligation it secures shall send its proposal to any secondary obligor in addition to the persons described in subsection (a).

§ 9-622. Effect of Acceptance of Collateral.

(a) A secured party's acceptance of collateral in full or partial satisfaction of the obligation it secures:

(1) discharges the obligation to the extent consented to by the debtor;

(2) transfers to the secured party all of a debtor's rights in the collateral;

(3) discharges the security interest or agricultural lien that is the subject of the debtor's consent and any subordinate security interest or other subordinate lien; and

(4) terminates any other subordinate interest.

(b) A subordinate interest is discharged or terminated under subsection (a), even if the secured party fails to comply with this article.

§ 9-623. Right to Redeem Collateral.

(a) A debtor, any secondary obligor, or any other secured party or lienholder may redeem collateral.

(b) To redeem collateral, a person shall tender:

(1) fulfillment of all obligations secured by the collateral; and

(2) the reasonable expenses and attorney's fees described in Section 9–615(a)(1).

(c) A redemption may occur at any time before a secured party:

(1) has collected collateral under Section 9–607;

(2) has disposed of collateral or entered into a contract for its disposition under Section 9–610; or

(3) has accepted collateral in full or partial satisfaction of the obligation it secures under Section 9–622.

§ 9-624. Waiver.

(a) A debtor or secondary obligor may waive the right to notification of disposition of collateral under Section 9–611 only by an agreement to that effect entered into and authenticated after default.

(b) A debtor may waive the right to require disposition of collateral under Section 9–620(e) only by an agreement to that effect entered into and authenticated after default.

(c) Except in a consumer-goods transaction, a debtor or secondary obligor may waive the right to redeem collateral under Section 9–623 only by an agreement to that effect entered into and authenticated after default.

[Subpart 2. Noncompliance with Article]

§ 9–625. Remedies for Secured Party's Failure to Comply with Article.

(a) If it is established that a secured party is not proceeding in accordance with this article, a court may order or restrain collection, enforcement, or disposition of collateral on appropriate terms and conditions.

(b) Subject to subsections (c), (d), and (f), a person is liable for damages in the amount of any loss caused by a failure to comply with this article. Loss caused by a failure to comply may include loss resulting from the debtor's inability to obtain, or increased costs of, alternative financing.

(c) Except as otherwise provided in Section 9–628:

(1) a person that, at the time of the failure, was a debtor, was an obligor, or held a security interest in or other lien on the collateral may recover damages under subsection (b) for its loss; and

(2) if the collateral is consumer goods, a person that was a debtor or a secondary obligor at the time a secured party failed to comply with this part may recover for that failure in any event an amount not less than the credit service charge plus 10 percent of the principal amount of the obligation or the time-price differential plus 10 percent of the cash price.

(d) A debtor whose deficiency is eliminated under Section 9–626 may recover damages for the loss of any surplus. However, a debtor or secondary obligor whose deficiency is eliminated or reduced under Section 9–626 may not otherwise recover under subsection (b) for noncompliance with the provisions of this part relating to collection, enforcement, disposition, or acceptance.

(e) In addition to any damages recoverable under subsection (b), the debtor, consumer obligor, or person named as a debtor in a filed record, as applicable, may recover $500 in each case from a person that:

(1) fails to comply with Section 9–208;

(2) fails to comply with Section 9–209;

(3) files a record that the person is not entitled to file under Section 9–509(a);

(4) fails to cause the secured party of record to file or send a termination statement as required by Section 9–513(a) or (c);

(5) fails to comply with Section 9–616(b)(1) and whose failure is part of a pattern, or consistent with a practice, of noncompliance; or

(6) fails to comply with Section 9–616(b)(2).

(f) A debtor or consumer obligor may recover damages under subsection (b) and, in addition, $500 in each case from a person that, without reasonable cause, fails to comply with a request under Section 9–210. A recipient of a request under Section 9–210 which never claimed an interest in the collateral or obligations that are the subject of a request under that section has a reasonable excuse for failure to comply with the request within the meaning of this subsection.

(g) If a secured party fails to comply with a request regarding a list of collateral or a statement of account under Section 9–210, the secured party may claim a security interest only as shown in the list or statement included in the request as against a person that is reasonably misled by the failure.

As amended in 2000.

§ 9–626. Action in Which Deficiency or Surplus Is in Issue.

(a) In an action arising from a transaction, other than a consumer transaction, in which the amount of a deficiency or surplus is in issue, the following rules apply:

(1) A secured party need not prove compliance with the provisions of this part relating to collection, enforcement, disposition, or acceptance unless the debtor or a secondary obligor places the secured party's compliance in issue.

(2) If the secured party's compliance is placed in issue, the secured party has the burden of establishing that the collection, enforcement, disposition, or acceptance was conducted in accordance with this part.

(3) Except as otherwise provided in Section 9–628, if a secured party fails to prove that the collection, enforcement, disposition, or acceptance was conducted in accordance with the provisions of this part relating to collection, enforcement, disposition, or acceptance, the liability of a debtor or a secondary obligor for a deficiency is limited to an amount by which the sum of the secured obligation, expenses, and attorney's fees exceeds the greater of:

(A) the proceeds of the collection, enforcement, disposition, or acceptance; or

(B) the amount of proceeds that would have been realized had the noncomplying secured party proceeded in accordance with the provisions of this part relating to collection, enforcement, disposition, or acceptance.

(4) For purposes of paragraph (3)(B), the amount of proceeds that would have been realized is equal to the sum of the secured obligation, expenses, and attorney's fees unless the secured party proves that the amount is less than that sum.

(5) If a deficiency or surplus is calculated under Section 9–615(f), the debtor or obligor has the burden of establishing that the amount of proceeds of the disposition is significantly below the range of prices that a complying disposition to a person other than the secured party, a person related to the secured party, or a secondary obligor would have brought.

(b) The limitation of the rules in subsection (a) to transactions other than consumer transactions is intended to leave to the court the determination of the proper rules in consumer transactions. The court may not infer from that

limitation the nature of the proper rule in consumer transactions and may continue to apply established approaches.

§ 9–627. Determination of Whether Conduct Was Commercially Reasonable.

(a) The fact that a greater amount could have been obtained by a collection, enforcement, disposition, or acceptance at a different time or in a different method from that selected by the secured party is not of itself sufficient to preclude the secured party from establishing that the collection, enforcement, disposition, or acceptance was made in a commercially reasonable manner.

(b) A disposition of collateral is made in a commercially reasonable manner if the disposition is made:

(1) in the usual manner on any recognized market;

(2) at the price current in any recognized market at the time of the disposition; or

(3) otherwise in conformity with reasonable commercial practices among dealers in the type of property that was the subject of the disposition.

(c) A collection, enforcement, disposition, or acceptance is commercially reasonable if it has been approved:

(1) in a judicial proceeding;

(2) by a bona fide creditors' committee;

(3) by a representative of creditors; or

(4) by an assignee for the benefit of creditors.

(d) Approval under subsection (c) need not be obtained, and lack of approval does not mean that the collection, enforcement, disposition, or acceptance is not commercially reasonable.

§ 9–628. Nonliability and Limitation on Liability of Secured Party; Liability of Secondary Obligor.

(a) Unless a secured party knows that a person is a debtor or obligor, knows the identity of the person, and knows how to communicate with the person:

(1) the secured party is not liable to the person, or to a secured party or lienholder that has filed a financing statement against the person, for failure to comply with this article; and

(2) the secured party's failure to comply with this article does not affect the liability of the person for a deficiency.

(b) A secured party is not liable because of its status as secured party:

(1) to a person that is a debtor or obligor, unless the secured party knows:

(A) that the person is a debtor or obligor;

(B) the identity of the person; and

(C) how to communicate with the person; or

(2) to a secured party or lienholder that has filed a financing statement against a person, unless the secured party knows:

(A) that the person is a debtor; and

(B) the identity of the person.

(c) A secured party is not liable to any person, and a person's liability for a deficiency is not affected, because of any act or omission arising out of the secured party's reasonable belief that a transaction is not a consumer-goods transaction or a consumer transaction or that goods are not consumer goods, if the secured party's belief is based on its reasonable reliance on:

(1) a debtor's representation concerning the purpose for which collateral was to be used, acquired, or held; or

(2) an obligor's representation concerning the purpose for which a secured obligation was incurred.

(d) A secured party is not liable to any person under Section 9–625(c)(2) for its failure to comply with Section 9–616.

(e) A secured party is not liable under Section 9–625(c)(2) more than once with respect to any one secured obligation.

PART 7 Transition

§ 9–701. Effective Date.

This [Act] takes effect on July 1, 2001.

§ 9–702. Savings Clause.

(a) Except as otherwise provided in this part, this [Act] applies to a transaction or lien within its scope, even if the transaction or lien was entered into or created before this [Act] takes effect.

(b) Except as otherwise provided in subsection (c) and Sections 9–703 through 9–709:

(1) transactions and liens that were not governed by [former Article 9], were validly entered into or created before this [Act] takes effect, and would be subject to this [Act] if they had been entered into or created after this [Act] takes effect, and the rights, duties, and interests flowing from those transactions and liens remain valid after this [Act] takes effect; and

(2) the transactions and liens may be terminated, completed, consummated, and enforced as required or permitted by this [Act] or by the law that otherwise would apply if this [Act] had not taken effect.

(c) This [Act] does not affect an action, case, or proceeding commenced before this [Act] takes effect.

As amended in 2000.

§ 9–703. Security Interest Perfected before Effective Date.

(a) A security interest that is enforceable immediately before this [Act] takes effect and would have priority over the rights of a person that becomes a lien creditor at that time is a

perfected security interest under this [Act] if, when this [Act] takes effect, the applicable requirements for enforceability and perfection under this [Act] are satisfied without further action.

(b) Except as otherwise provided in Section 9–705, if, immediately before this [Act] takes effect, a security interest is enforceable and would have priority over the rights of a person that becomes a lien creditor at that time, but the applicable requirements for enforceability or perfection under this [Act] are not satisfied when this [Act] takes effect, the security interest:

(1) is a perfected security interest for one year after this [Act] takes effect;

(2) remains enforceable thereafter only if the security interest becomes enforceable under Section 9–203 before the year expires; and

(3) remains perfected thereafter only if the applicable requirements for perfection under this [Act] are satisfied before the year expires.

§ 9–704. Security Interest Unperfected before Effective Date.

A security interest that is enforceable immediately before this [Act] takes effect but which would be subordinate to the rights of a person that becomes a lien creditor at that time:

(1) remains an enforceable security interest for one year after this [Act] takes effect;

(2) remains enforceable thereafter if the security interest becomes enforceable under Section 9–203 when this [Act] takes effect or within one year thereafter; and

(3) becomes perfected:

(A) without further action, when this [Act] takes effect if the applicable requirements for perfection under this [Act] are satisfied before or at that time; or

(B) when the applicable requirements for perfection are satisfied if the requirements are satisfied after that time.

§ 9–705. Effectiveness of Action Taken before Effective Date.

(a) If action, other than the filing of a financing statement, is taken before this [Act] takes effect and the action would have resulted in priority of a security interest over the rights of a person that becomes a lien creditor had the security interest become enforceable before this [Act] takes effect, the action is effective to perfect a security interest that attaches under this [Act] within one year after this [Act] takes effect. An attached security interest becomes unperfected one year after this [Act] takes effect unless the security interest becomes a perfected security interest under this [Act] before the expiration of that period.

(b) The filing of a financing statement before this [Act] takes effect is effective to perfect a security interest to the extent the filing would satisfy the applicable requirements for perfection under this [Act].

(c) This [Act] does not render ineffective an effective financing statement that, before this [Act] takes effect, is filed and satisfies the applicable requirements for perfection under the law of the jurisdiction governing perfection as provided in [former Section 9–103]. However, except as otherwise provided in subsections (d) and (e) and Section 9–706, the financing statement ceases to be effective at the earlier of:

(1) the time the financing statement would have ceased to be effective under the law of the jurisdiction in which it is filed; or

(2) June 30, 2006.

(d) The filing of a continuation statement after this [Act] takes effect does not continue the effectiveness of the financing statement filed before this [Act] takes effect. However, upon the timely filing of a continuation statement after this [Act] takes effect and in accordance with the law of the jurisdiction governing perfection as provided in Part 3, the effectiveness of a financing statement filed in the same office in that jurisdiction before this [Act] takes effect continues for the period provided by the law of that jurisdiction.

(e) Subsection (c)(2) applies to a financing statement that, before this [Act] takes effect, is filed against a transmitting utility and satisfies the applicable requirements for perfection under the law of the jurisdiction governing perfection as provided in [former Section 9–103] only to the extent that Part 3 provides that the law of a jurisdiction other than the jurisdiction in which the financing statement is filed governs perfection of a security interest in collateral covered by the financing statement.

(f) A financing statement that includes a financing statement filed before this [Act] takes effect and a continuation statement filed after this [Act] takes effect is effective only to the extent that it satisfies the requirements of Part 5 for an initial financing statement.

§ 9–706. When Initial Financing Statement Suffices to Continue Effectiveness of Financing Statement.

(a) The filing of an initial financing statement in the office specified in Section 9–501 continues the effectiveness of a financing statement filed before this [Act] takes effect if:

(1) the filing of an initial financing statement in that office would be effective to perfect a security interest under this [Act];

(2) the pre-effective-date financing statement was filed in an office in another State or another office in this State; and

(3) the initial financing statement satisfies subsection (c).

(b) The filing of an initial financing statement under subsection (a) continues the effectiveness of the pre-effective-date financing statement:

(1) if the initial financing statement is filed before this [Act] takes effect, for the period provided in [former Section 9–403] with respect to a financing statement; and

(2) if the initial financing statement is filed after this [Act] takes effect, for the period provided in Section 9–515 with respect to an initial financing statement.

(c) To be effective for purposes of subsection (a), an initial financing statement must:

(1) satisfy the requirements of Part 5 for an initial financing statement;

(2) identify the pre-effective-date financing statement by indicating the office in which the financing statement was filed and providing the dates of filing and file numbers, if any, of the financing statement and of the most recent continuation statement filed with respect to the financing statement; and

(3) indicate that the pre-effective-date financing statement remains effective.

§ 9–707. Amendment of Pre-Effective-Date Financing Statement.

(a) In this section, "Pre-effective-date financing statement" means a financing statement filed before this [Act] takes effect.

(b) After this [Act] takes effect, a person may add or delete collateral covered by, continue or terminate the effectiveness of, or otherwise amend the information provided in, a pre-effective-date financing statement only in accordance with the law of the jurisdiction governing perfection as provided in Part 3. However, the effectiveness of a pre-effective-date financing statement also may be terminated in accordance with the law of the jurisdiction in which the financing statement is filed.

(c) Except as otherwise provided in subsection (d), if the law of this State governs perfection of a security interest, the information in a pre-effective-date financing statement may be amended after this [Act] takes effect only if:

(1) the pre-effective-date financing statement and an amendment are filed in the office specified in Section 9–501;

(2) an amendment is filed in the office specified in Section 9–501 concurrently with, or after the filing in that office of, an initial financing statement that satisfies Section 9–706(c); or

(3) an initial financing statement that provides the information as amended and satisfies Section 9–706(c) is filed in the office specified in Section 9–501.

(d) If the law of this State governs perfection of a security interest, the effectiveness of a pre-effective-date financing statement may be continued only under Section 9–705(d) and (f) or 9–706.

(e) Whether or not the law of this State governs perfection of a security interest, the effectiveness of a pre-effective-date financing statement filed in this State may be terminated after this [Act] takes effect by filing a termination statement in the office in which the pre-effective-date financing statement is filed, unless an initial financing statement that satisfies Section 9–706(c) has been filed in the office specified by the law of the jurisdiction governing perfection as provided in Part 3 as the office in which to file a financing statement.

As amended in 2000.

§ 9–708. Persons Entitled to File Initial Financing Statement or Continuation Statement.

A person may file an initial financing statement or a continuation statement under this part if:

(1) the secured party of record authorizes the filing; and

(2) the filing is necessary under this part:

(A) to continue the effectiveness of a financing statement filed before this [Act] takes effect; or

(B) to perfect or continue the perfection of a security interest.

As amended in 2000.

§ 9–709. Priority.

(a) This [Act] determines the priority of conflicting claims to collateral. However, if the relative priorities of the claims were established before this [Act] takes effect, [former Article 9] determines priority.

(b) For purposes of Section 9–322(a), the priority of a security interest that becomes enforceable under Section 9–203 of this [Act] dates from the time this [Act] takes effect if the security interest is perfected under this [Act] by the filing of a financing statement before this [Act] takes effect which would not have been effective to perfect the security interest under [former Article 9]. This subsection does not apply to conflicting security interests each of which is perfected by the filing of such a financing statement.

A

Abatement An order to the owner of a property to eliminate a nuisance. (Chapter 45)

Absolute privilege Exists in courtrooms and legislative hearings. Anyone speaking there, such as a witness in a court, can say anything and never be sued for defamation. (Chapter 6)

Acceptance Retention of the collateral by a secured party as full or partial satisfaction of a debt. (Chapter 24, 25)

Accepted check A check that the drawee bank has signed. This signature is a promise that the bank will pay the check out of its own funds. (Chapter 26)

Accession The use of labor and/or materials to add value to the personal property of another. (Chapter 44)

Accommodated party Someone who receives a benefit from an accommodation party. (Chapter 26)

Accommodation party Someone who does not benefit from an instrument but agrees to guarantee its payment. (Chapter 26)

Accord and satisfaction An agreement to settle a debt for less than the sum claimed. (Chapter 12)

Accounts Any right to receive payment for goods sold or leased, other than rights covered by chattel paper or instruments. (Chapter 24)

Accredited investor Under the Securities Act of 1933, an accredited investor is an institution (such as a bank or insurance company) or any individual with a net worth of more than $1 million or an annual income of more than $200,000. (Chapter 36)

Acquit To find the defendant not guilty of the crime for which he was tried. (Chapter 8)

Act Any action that a party was not legally required to take in the first place. (Chapter 12)

Act of State doctrine A rule requiring American courts to abstain from cases if a court order would interfere with the ability of the President or Congress to conduct foreign policy. (Chapter 9)

Actual authority An agent is authorized to act for a principal. (Chapter 28)

Ad valorem According to the value of the goods. (Chapter 9)

Additional terms Those terms that raise issues not covered in an offer. (Chapter 20)

Adhesion contract A standard form contract prepared by one party and presented to the other on a "take it or leave it" basis. (Chapter 13)

Adjudicate To hold a formal hearing in a disputed matter and issue an official decision. (Chapter 4)

Administrative law Concerns all agencies, boards, commissions, and other entities created by a federal or state legislature and charged with investigating, regulating, and adjudicating a particular industry or issue. (Chapter 1)

Administrative law judge An agency employee who acts as an impartial decision maker. (Chapter 4)

Administrator A person appointed by the court to oversee the probate process for someone who has died intestate (that is, without a will). (Chapter 45)

Administratrix A female administrator. (Chapter 45)

Adverse possession A means of gaining ownership of land belonging to another by entering upon the property, openly and notoriously, and claiming exclusive use of it for a period of years. (Chapter 43)

Affidavit A written statement signed under oath. (Chapter 8)

Affirm A decision by an appellate court to uphold the judgment of a lower court. (Chapter 1)

Affirmative action A plan introduced in a workplace for the purpose of either remedying the effects of past discrimination or achieving equitable representation of minorities and women. (Chapter 29)

After-acquired property Items that a debtor obtains after making a security agreement with the secured party. (Chapter 24)

Agent A person who acts for a principal. (Chapter 28)

Alternative dispute resolution Any method of resolving a legal conflict other than litigation, such as: negotiation, arbitration, mediation, mini-trials, and summary jury trials. (Chapter 3)

Amendment Any addition to a legal document. The constitutional amendments, the first ten of which are known collectively as the Bill of Rights, secure numerous liberties and protections directly for the people. (Chapter 1)

Annual report Each year, public companies must send their shareholders an annual report that contains detailed financial data. (Chapter 35)

Annuity Payment to a beneficiary during his lifetime. (Chapter 45)

Answer The pleading, filed by the defendant in court and served on the plaintiff, which responds to each allegation in the plaintiff's complaint. (Chapter 3)

Antitrust laws Make it illegal to destroy competition and capture an entire market. (Chapter 9)

Apparent authority A situation in which conduct of a principal causes a third party to believe that the principal consents to have an act done on his behalf by a person purporting to act for him when, in fact, that person is not acting for the principal. (Chapter 29)

Appellant The party who appeals a lower court decision to a higher court. (Chapter 3)

Appellate court Any court in a state or federal system that reviews cases that have already been tried. (Chapter 3)

Appellee The party opposing an appeal from a lower court to a higher court. (Chapter 3)

Arbitration A form of alternative dispute resolution in which the parties hire a neutral third party to hear their respective arguments, receive evidence, and then make a binding decision. (Chapter 30)

Arson Malicious use of fire or explosives to damage or destroy real estate or personal property. (Chapter 8)

Artisan's lien A security interest in personal property. (Chapter 24)

Assault An intentional act that causes the plaintiff to fear an imminent battery. (Chapter 6)

Assignee The party who receives an assignment of contract rights from a party to the contract. (Chapter 16)

Assignment The act by which a party transfers contract rights to a third person. (Chapter 16)

Assignment of rights Transferring contract rights. (Chapter 16)

Assignor The party who assigns contract rights to a third person. (Chapter 16)

Assisted suicide The process of hastening death for a terminally ill patient at the request of this patient. (Chapter 49)

Attachment A court order seizing property of a party to a civil action, so that there will be sufficient assets available to pay the judgment. (Chapter 24)

Authorized and unissued stock Stock that has been approved by the corporation's charter, but has not yet been sold. (Chapter 33)

Authorized and issued stock Stock that has been approved by the corporation's charter and subsequently sold. (Chapter 33)

Automatic stay Prohibits creditors from collecting debts that the bankrupt incurred before the bankruptcy petition was filed. (Chapter 37)

B

Bailee A person who rightfully possesses goods belonging to another. (Chapter 13, 21)

Bailment Giving possession and control of personal property to another person. (Chapter 13, 44)

Bailor One who creates a bailment by delivering goods to another. (Chapter 13, 21)

Bait and switch A practice where sellers advertise products that are not generally available but are being used to draw interested parties in so that they will buy other products. (Chapter 39)

Bankrupt Another term for debtor. (Chapter 37)

Bankruptcy estate The new legal entity created when a debtor files a bankruptcy petition. All of the debtor's existing assets pass into the estate. (Chapter 37)

Battery The intentional touching of another person in a way that is unwanted or offensive. (Chapter 6)

Bearer paper An instrument payable "to bearer." Any holder in due course can demand payment. (Chapter 25)

Best efforts underwriting When the underwriter does not buy the stock but instead acts as the company's agent in selling it. (Chapter 36)

Beyond a reasonable doubt The government's burden in a criminal prosecution. (Chapter 3)

Bilateral contract A binding agreement in which each party has made a promise to the other. (Chapter 10)

Bilateral mistake Occurs when both parties negotiate based on the same factual error. (Chapter 14)

Bill A proposed statute that has been submitted for consideration to Congress or a state legislature. (Chapter 4)

Bill of lading A receipt for goods, given by a carrier such as a ship, that minutely describes the merchandise being shipped. A **negotiable** bill of lading may be transferred to other parties, and entitles any holder to collect the goods. (Chapter 9)

Bill of Rights The first ten amendments to the Constitution. (Chapter 5)

Blue sky laws State securities laws. (Chapter 36)

Bona fide occupational qualification (BFOQ) A job requirement that would otherwise be discriminatory is permitted in situations in which it is *essential* to the position in question. (Chapter 29)

Bona fide purchaser Someone who buys goods in good faith, for value, typically from a seller who has merely voidable title. (Chapter 21)

Bonds Long-term debt secured by some of the issuing company's assets. (Chapter 33)

Brief The written legal argument that an attorney files with an appeal court. (Chapter 3)

Burden of proof The allocation of which party must prove its case. In a civil case, the plaintiff has the burden of proof to persuade the factfinder of every element of her case. In a

criminal case, the government has the burden of proof. (Chapter 3)

Business judgment rule A common law rule that protects managers from liability if they are acting without a conflict of interest and make informed decisions that have a rational business purpose. (Chapter 34)

Buyer in ordinary course of business (BIOC) Someone who buys goods in good faith from a seller who routinely deals in such goods. (Chapter 21, 24)

Bylaws A document that specifies the organizational rules of a corporation or other organization, such as the date of the annual meeting and the required number of directors. (Chapter 33)

C

Cap and trade A market-based system for reducing emissions. (Chapter 40)

Capacity The legal ability to enter into a contract. (Chapter 10)

Cashier's check A check that is drawn by a bank on itself. (Chapter 25, 26)

Certificate of deposit An instrument issued by a bank which promises to repay a deposit, with interest, on a specified date. (Chapter 25)

Certified check A check that the drawee bank has signed. This signature is a promise that the bank will pay the check out of its own funds. (Chapter 26)

***Certiorari*, writ of** Formal notice from the United States Supreme Court that it will accept a case for review. (Chapter 3)

Challenge for cause An attorney's request, during *voir dire,* to excuse a prospective juror because of apparent bias. (Chapter 3)

Charging order A court order granting the creditor of a partner the right to receive that partner's share of partnership profits. (Chapter 32)

Chattel paper Any writing that indicates two things: (1) a debtor owes money and (2) a secured party has a security interest in specific goods. The most common chattel paper is a document indicating a consumer sale on credit. (Chapter 24)

Check An instrument in which the drawer orders the drawee bank to pay money to the payee. (Chapter 25)

Check card Another name for a debit card. (Chapter 39)

Check kiting Moving funds between bank accounts to take advantage of the float. (Chapter 26)

Chicago School A theory of antitrust law first developed at the University of Chicago. Adherents to this theory believe that antitrust enforcement should focus on promoting efficiency and should not generally be concerned about the size or number of competitors in any market. (Chapter 38)

Choice of forum provisions Determine the state in which any litigation would take place. (Chapter 19)

Choice of law provisions Determine which state's laws will be used to interpret the contract. (Chapter 19)

CISG See Convention on Contracts for the International Sale of Goods. (Chapter 9)

Civil law The large body of law concerning the rights and duties between parties. It is distinguished from criminal law, which concerns behavior outlawed by a government. (Chapter 1)

Claim in recoupment An issuer subtracts (i.e., "sets off") any other claims he has against the initial payee from the amount he owes on an instrument. (Chapter 25)

Class action A method of litigating a civil lawsuit in which one or more plaintiffs (or occasionally defendants) seek to represent an entire group of people with similar claims against a common opponent. (Chapter 3)

Classification The process by which the Customs Service decides what label to attach to imported merchandise, and therefore what level of tariff to impose. (Chapter 9)

Close corporation A corporation with a small number of shareholders. Its stock is not publicly traded. Also known as a *closely held corporation.* (Chapter 31)

Codicil An amendment to a will. (Chapter 45)

Collateral The property subject to a security interest. (Chapter 24)

Collateral promise A promise to pay the debt of another person, as a favor to the debtor. (Chapter 15)

Collective bargaining Contract negotiations between an employer and a union. (Chapter 30)

Collective bargaining agreement (CBA) A contract between a union and management. (Chapter 30)

Collective bargaining unit The precisely defined group of employees who are represented by a particular union. (Chapter 30)

Commerce clause One of the powers granted by Article I, §8 of the Constitution, it gives Congress exclusive power to regulate international commerce and concurrent power with the states to regulate domestic commerce. (Chapter 5)

Commercial impracticability After the creation of a contract, an entirely unforeseen event occurs which makes enforcement of the contract extraordinarily unfair. (Chapter 17)

Commercial paper Instruments such as checks and promissory notes that contain a promise to pay money. Commercial paper includes both negotiable and non-negotiable instruments. (Chapter 25)

Commercial speech Communication, such as television advertisements, that has the dominant theme of proposing a commercial transaction. (Chapter 5)

Common carrier A transportation company that makes its services available on a regular basis to the general public. (Chapter 49)

Common law Judge-made law, that is, the body of all decisions made by appellate courts over the years. (Chapter 4)

Common stock Certificates that reflect ownership in a corporation. Owners of this equity security are last in line for corporate pay-outs, such as dividends and liquidation proceeds. (Chapter 33)

Comparative negligence A rule of tort law that permits a plaintiff to recover even when the defendant can show that the plaintiff's own conduct contributed in some way to her harm. (Chapter 7)

Compensatory damages The amount of money that the court thinks will restore the plaintiff to the position he was in before the defendant's conduct caused an injury. (Chapter 6)

Complaint A pleading, filed by the plaintiff, providing a short statement of the claim. (Chapter 3)

Compliance program A plan to prevent and detect criminal conduct at all levels of the company. (Chapter 8)

Concerted action Tactics, such as a strike, used by a union to gain a bargaining advantage. (Chapter 30)

Concurrent estate Two or more people owning property at the same time. (Chapter 43)

Conditional promises Promises that a party agrees to perform only if the other side has first done what it promised. (Chapter 19)

Condition A condition is an event that must occur in order for a party to be obligated under a contract. (Chapter 17)

Condition precedent A condition that must occur before a particular contract duty arises. (Chapter 17)

Condition subsequent A condition that must occur after a particular contract duty arises, or the duty will be discharged. (Chapter 17)

Confiscation Expropriation without adequate compensation of property owned by foreigners. (Chapter 9)

Conforming goods Items that satisfy the contract terms. If a contract calls for blue sailboats, then green sailboats are non-conforming. (Chapter 23)

Conscious parallelism When competitors who do not have an explicit agreement nonetheless all make the same competitive decisions. (Chapter 38)

Consent order An agreement entered into by a wrongdoer and an administrative agency (such as the Securities and Exchange Commission or the Federal Trade Commission) in which the wrongdoer agrees not to violate the law in the future. (Chapter 39)

Consequential damages Those resulting from the unique circumstances of *this injured party*. (Chapter 18)

Consideration In contract law, something of legal value that has been bargained for and given in exchange by the parties. (Chapter 12)

Constitution The supreme law of a political entity. The United States Constitution is the highest law in the country. (Chapter 1)

Constructive insider Anyone who receives confidential information while in an indirect employment relationship with a company, such as employees of the company's auditors or law firm. (Chapter 36)

Consumer Any natural person, that is, not a corporation or business. (Chapter 25)

Consumer credit contract A contract in which a consumer borrows money from a lender to purchase goods and services from a seller who is affiliated with the lender. (Chapter 25)

Contract A legally enforceable promise or set of promises. (Chapter 10)

Contract carrier A transportation company that does not make its services available to the general public but engages in continuing agreements with particular customers. (Chapter 44)

Contributory negligence A rule of tort law that permits a negligent defendant to escape liability if she can demonstrate that the plaintiff's own conduct contributed in any way to the plaintiff's harm. (Chapter 7)

Control security Stock owned by any officer or director of the issuer, or by any shareholder who holds more than 10 percent of a class of stock of the issuer. (Chapter 36)

Covenant A promise in a contract. (Chapter 19)

Convention on Contracts for the International Sale of Goods A United Nations sponsored agreement that creates a neutral body of law for sale of goods contracts between companies from different countries. (Chapter 9)

Conversion A tort committed by taking or using someone else's personal property without his permission. (Chapter 6, 26)

Copyright Under federal law, the holder of a copyright owns a particular expression of an idea, but not the idea itself. This ownership right applies to creative activities such as literature, music, drama, and software. (Chapter 42)

Corporation by estoppel Even if a corporation has not actually been formed, courts will sometimes enforce contracts entered into in the belief that the corporation did indeed exist. (Chapter 33)

Compliance program A plan to prevent and detect criminal conduct at all levels of the company. (Chapter 8)

Constructive insider Anyone who has an indirect employment relationship with a company, such as employees of the company's auditors or law firm. (Chapter 36)

Counter-claim A claim made by the defendant against the plaintiff. (Chapter 3)

Cover The buyer's right to obtain substitute goods when a seller has breached a contract. (Chapter 18)

Creditor beneficiary When one party to a contract intends to benefit a third party to whom he owes a debt, that third party is referred to as a creditor beneficiary. (Chapter 16)

Criminal law Rules that permit a government to punish certain behavior by fine or imprisonment. (Chapter 1, 8)

Criminal procedure The process of investigating, interrogating, and trying a criminal defendant. (Chapter 8)

Cross-examination During a hearing, for a lawyer to question an opposing witness. (Chapter 3)

Cure The seller's right to respond to a buyer's rejection of non-conforming goods; the seller accomplishes this by delivering conforming goods before the contract deadline. (Chapter 23)

D

Damages (1) The harm that a plaintiff complains of at trial, such as an injury to her person, or money lost because of a contract breach. (2) Money awarded by a trial court for injury suffered. (Chapter 6)

***De facto* corporation** Occurs when a promoter makes a good faith effort to incorporate (although fails to complete the process entirely) and uses the corporation to conduct business. The state can challenge the validity of the corporation, but a third party cannot. (Chapter 33)

***De jure* corporation** The promoter of the corporation has substantially complied with the requirements for incorporation, but has made some minor error. No one has the right to challenge the validity of the corporation. (Chapter 33)

Debentures Long-term, unsecured debt, typically issued by a corporation. (Chapter 33)

Debtor A person who owes money or some other obligation to another party. (Chapter 24, 37)

Debtor in possession The debtor acts as trustee in a Chapter 11 bankruptcy. (Chapter 37)

Decedent A person who has died. (Chapter 45)

Deed A document that proves ownership of property. (Chapter 43)

Defamation The act of injuring someone's reputation by stating something false about her to a third person. Libel is defamation done either in writing or by broadcast. *Slander* is defamation done orally. (Chapter 6)

Default The failure to perform an obligation, such as the failure to pay money when due. (Chapter 24)

Default judgment Court order awarding one party everything it requested because the opposing party failed to respond in time. (Chapter 3)

Default rules Under the Uniform Partnership Act, these rules govern the relationship among the partners unless the partners explicitly make a different agreement. (Chapter 32)

Defendant The person being sued. (Chapter 1)

Deficiency Having insufficient funds to pay off a debt. (Chapter 24)

Definiteness A doctrine holding that a contract will only be enforced if its terms are sufficiently precise that a court can determine what the parties meant. (Chapter 11)

Delegation The act by which a party to a contract transfers duties to a third person who is not a party to the contract. (Chapter 16)

Delegation of duties A transfer of obligations in a contract. (Chapter 19)

Deponent The person being questioned in a deposition. (Chapter 3)

Deposition A form of discovery in which a party's attorney has the right to ask oral questions of the other party or of a witness. Answers are given under oath. (Chapter 3)

Derivative action A lawsuit brought by shareholders in the name of the corporation to enforce a right of the corporation. (Chapter 35)

Deterrence Using punishment, such as imprisonment, to discourage criminal behavior. (Chapter 8)

Devisee Someone who inherits under a will. (Chapter 45)

Different terms Terms that contradict those in an offer. (Chapter 20)

Direct damages Are those that flow directly from the contract. (Chapter 18)

Direct examination During a hearing, when a lawyer asks questions of his own witness. (Chapter 3)

Directed verdict The decision by a court to instruct a jury that it must find in favor of a particular party because, in the judge's opinion, no reasonable person could disagree on the outcome. (Chapter 3)

Disabled person Someone with a physical or mental impairment that substantially limits a major life activity, or someone who is regarded as having such an impairment. (Chapter 29)

Disability insurance Replaces the insured's income if he becomes unable to work because of illness or injury. (Chapter 45)

Disaffirm To give notice to the other party to a contract that the party giving the notice refuses to be bound by the agreement. (Chapter 14)

Discharge (1) A party to a contract has no more duties. (2) A party to an instrument is released from liability. (Chapter 17, 26, 37)

Disclaimer A statement that a particular warranty does not apply. (Chapter 22)

Discovery A stage in litigation, after all pleadings have been served, in which each party seeks as much relevant information as possible about the opposing party's case. (Chapter 3)

Dishonor An obligor refuses to pay an instrument that is due. (Chapter 26)

Dismiss To terminate a lawsuit, often on procedural grounds, without reaching the merits of the case. (Chapter 3)

Dissociation A dissociation occurs when a partner leaves a partnership. (Chapter 32)

Diversity jurisdiction One of the two main types of civil cases that a United States district court has the power to hear. It involves a lawsuit between citizens of different states, in which at least one party makes a claim for more than $75,000. (Chapter 3)

Domestic corporation A corporation is a domestic corporation in the state in which it was formed. (Chapter 33)

Donee A person who receives a gift. (Chapter 44)

Donee beneficiary When one party to a contract intends to make a gift to a third party, that third party is referred to as a donee beneficiary. (Chapter 16)

Donor A person who makes a gift to another. (Chapter 44)

Double jeopardy A criminal defendant may be prosecuted only once for a particular criminal offense. (Chapter 8)

Draft The drawer of this instrument orders someone else to pay money. Checks are the most common form of draft. The drawer of a check orders a bank to pay money. (Chapter 25)

Dram acts Make businesses liable for serving drinks to intoxicated customers who later cause harm. (Chapter 7)

Drawee The person who pays a draft. In the case of a check, the bank is the drawee. (Chapter 25, 26)

Drawer The person who issues a draft. (Chapter 25)

Due diligence An investigation of the registration statement by someone who signs it. (Chapter 27, 36)

Due process Requires fundamental fairness at all stages of the case. (Chapter 8)

Due Process Clause Part of the Fifth Amendment. *Procedural due process* ensures that before depriving anyone of liberty or property, the government must go through procedures which ensure that the deprivation is fair. *Substantive due process* holds that certain rights, such as privacy, are so fundamental that the government may not eliminate them. (Chapter 5)

Dumping Selling merchandise at one price in the domestic market and at a cheaper, unfair price in an international market. (Chapter 9)

Durable power of attorney An instrument that permits an attorney-in-fact to act for a principal. A durable power is effective until the principal revokes it or dies. It continues in effect even if the principal becomes incapacitated. (Chapter 45)

Duress (1) A criminal defense in which the defendant shows that she committed the wrongful act because a third person threatened her with imminent physical harm. (2) An improper threat made to force another party to enter into a contract. (Chapter 14)

Duty A tax imposed on imported items. (Chapter 9)

Duty of care The requirement that a manager act with care and in the best interests of the corporation. (Chapter 34)

Duty of loyalty The obligation of a manager to act without a conflict of interest. (Chapter 34)

E

Easement The right to enter land belonging to another and make a limited use of it, without taking anything away. (Chapter 43)

Economic loss doctrine A common law rule holding that when an injury is purely economic, and arises from a contract made between two businesses, the injured party may only sue under the UCC. (Chapter 22)

Element A fact that a party to a lawsuit must prove in order to prevail. (Chapter 6)

Embezzlement Fraudulent conversion of property already in the defendant's possession. (Chapter 8)

Eminent domain The power of the government to take private property for public use. (Chapter 5, 43)

Employee at will A worker whose job does not have a specified duration. (Chapter 29)

Enabling legislation A statute authorizing the creation of a new administrative agency and specifying its powers and duties. (Chapter 4)

Engagement letter A written contract by which a client hires an accountant. (Chapter 27)

Entrapment A criminal defense in which the defendant demonstrates that the government induced him to break the law. (Chapter 8)

Equal dignities rule If an agent is empowered to enter into a contract that must be in writing, then the appointment of the agent must also be written. (Chapter 28)

Equal Protection Clause Part of the Fourteenth Amendment, it generally requires the government to treat equally situated people the same. (Chapter 5)

Error of law A mistake made by a trial judge that concerns a legal issue as opposed to a factual matter. Permitting too many leading questions is a legal error; choosing to believe one witness rather than another is a factual matter. (Chapter 3)

Escalator clause A lease clause allowing the landlord to raise the rent for specified reasons. (Chapter 43)

Estate The legal entity that holds title to assets after the owner dies and before the property is distributed. (Chapter 45)

Estoppel Out of fairness, a person is denied the right to assert a claim. (Chapter 28)

Ethics The study of how people ought to act. (Chapter 2)

Eviction An act that forces a tenant to abandon the property. (Chapter 43)

Evidence, rules of Law governing the proof offered during a trial or formal hearing. These rules limit the questions that may be asked of witnesses and the introduction of physical objects. (Chapter 3)

Exclusionary rule In a criminal trial, a ban on the use of evidence obtained in violation of the Constitution. (Chapter 8)

Exclusive dealing contract A contract in which a distributor or retailer agrees with a supplier not to carry the products of any other supplier. (Chapter 38)

Exculpatory clause A contract provision that attempts to release one party from liability in the event the other party is injured. (Chapter 13, 33, 43, 44)

Executed contract A binding agreement in which all parties have fulfilled all obligations. (Chapter 10)

Executive agency An administrative agency within the executive branch of government. (Chapter 4)

Executive order An order by a president or governor, having the full force of law. (Chapter 1)

Executor A person chosen by the decedent to oversee the probate process. (Chapter 15)

Executory contract A binding agreement in which one or more of the parties has not fulfilled its obligations. (Chapter 10)

Executrix A female executor. (Chapter 45)

Exhaustion of remedies A principle of administrative law that no party may appeal an agency action to a court until she has utilized all available appeals within the agency itself. (Chapter 4)

Expectation damages The money required to put one party in the position she would have been in had the other side performed the contract. (Chapter 18)

Expectation interest A remedy in a contract case that puts the injured party in the position he would have been in had both sides fully performed. (Chapter 18)

Expert witness A witness in a court case who has special training or qualifications to discuss a specific issue, and who is generally permitted to state an opinion. (Chapter 3)

Export To transport goods or services out of a country. (Chapter 9)

Express authority Conduct of a principal that, reasonably interpreted, causes the agent to believe that the principal desires him to do a specific act. (Chapter 28)

Express contract A binding agreement in which the parties explicitly state all important terms. (Chapter 10)

Express warranty A guarantee, created by the words or actions of the seller, that goods will meet certain standards. (Chapter 22)

Expropriation A government's seizure of property or companies owned by foreigners. (Chapter 9)

Externality When people do not bear the full cost of their decisions. (Chapter 40)

F

Factfinder The one responsible, during a trial, for deciding what occurred, that is, who did what to whom, when, how, and why. It is either the jury or, in a jury-waived case, the judge. (Chapter 5)

Fair representation, duty of The union's obligation to act on behalf of all members impartially and in good faith. (Chapter 30)

Fair use doctrine Permits limited use of copyrighted material without permission of the author. (Chapter 22)

False imprisonment The intentional restraint of another person without reasonable cause and without her consent. (Chapter 6)

Federal question jurisdiction One of the two main types of civil cases that a United States district court has the power to hear. It involves a federal statute or a constitutional provision. (Chapter 3)

Federal Sentencing Guidelines Detailed rules that judges must follow when sentencing defendants convicted of crimes in federal court. (Chapter 8)

Federalism A form of national government in which power is shared between one central authority and numerous local authorities. (Chapter 1)

Fee simple absolute The greatest possible ownership right in real property, including the right to possess, use, and dispose of the property in any lawful manner. (Chapter 43)

Fee simple defeasible Ownership interest in real property that may terminate upon the occurrence of some limiting event. (Chapter 43)

Felony The most serious crimes, typically those for which the defendant could be imprisoned for more than a year. (Chapter 8)

Fiduciary duty An obligation to behave in a trustworthy and confidential fashion toward the object of that duty. (Chapter 28)

Financing statement A document that a secured party files to give the general public notice that the secured party has a secured interest in the collateral. (Chapter 24)

Finding statutes Laws that govern found property. Also known as estray statutes. (Chapter 44)

Firm commitment underwriting The underwriter buys stock from the issuer and sells it to the public. (Chapter 36)

Firm offer A contract offer that cannot be withdrawn during a stated period. (Chapter 11)

Fixtures Goods that are attached to real estate. (Chapter 24)

Forbearance Refraining from doing something that one has a legal right to do. (Chapter 12)

Force majeure event A disruptive, unexpected occurrence for which neither party is to blame that prevents one or both parties from complying with a contract. (Chapter 19)

Forced share The percentage of a decendent's estate that a spouse is entitled to claim under state law. Also known as statutory share. (Chapter 45)

Foreign corporation A corporation formed in another state. (Chapter 33)

Foreign Sovereign Immunity Act A federal statute that protects other nations from suit in courts of the United States, except under specified circumstances. (Chapter 9)

Formal rulemaking The process whereby an administrative agency notifies the public of a proposed new rule and then permits a formal hearing, with opportunity for evidence and cross-examination, before promulgating the final rule. (Chapter 4)

Founding Fathers The authors of the United States Constitution, who participated in the Constitutional Convention in Philadelphia in 1787. (Chapter 1)

Framers *See* Founding Fathers. (Chapter 5)

Franchise An arrangement in which the franchisee buys from a franchiser the right to establish a business using the franchiser's trade name and selling the franchiser's products. Typically the franchiser also trains the franchisee in the proper operation of the business. (Chapter 31)

Fraud Deception of another person to obtain money or property. (Chapter 6, 8)

Freedom of Information Act (FOIA) A federal statute giving private citizens and corporations access to many of the documents possessed by an administrative agency. (Chapter 4)

Freehold estate The present right to possess property and to use it in any lawful manner. (Chapter 43)

Fresh start After the termination of a bankruptcy case, creditors cannot make a claim against the debtor for money owed before the initial bankruptcy petition was filed. (Chapter 37)

Frustration of purpose After the creation of a contract, an entirely unforeseen event occurs that eliminates the value of the contract for one of the parties. (Chapter 17)

Fully disclosed principal If the third party in an agency relationship knows the identity of the principal, that principal is fully disclosed. (Chapter 28)

Fundamental rights In constitutional law, those rights that are so basic that any governmental interference with them is suspect and likely to be unconstitutional. (Chapter 5)

G

GAAP Generally accepted accounting principles. Rules set by the Financial Accounting Standards Board to be used in preparing financial statements. (Chapter 27)

GAAS Generally accepted auditing standards. Rules set by the American Institute of Certified Public Accountants (AICPA) to be used in conducting audits. (Chapter 27)

Gap-filler provisions UCC rules for supplying missing terms. (Chapter 11)

Gap period The period between the time that creditors file an involuntary petition and the court issues the order for relief. (Chapter 37)

GATT *See* General Agreement on Tariffs and Trade. (Chapter 9)

General Agreement on Tariffs and Trade (GATT) A massive international treaty, negotiated in stages between the 1940s and 1994 and signed by over 130 nations. (Chapter 9)

General intangibles Potential sources of income such as copyrights, patents, trademarks, goodwill and certain other rights to payment. (Chapter 24)

Gift A voluntary transfer of property from one person to another without consideration. (Chapter 44)

Gift *causa mortis* A gift made in contemplation of approaching death. (Chapter 44)

Good faith An honest effort to meet both the spirit and letter of a contract. (Chapter 19)

Goods Anything movable, except for money, securities, and certain legal rights. (Chapter 20, 24)

Grand jury A group of ordinary citizens that decides whether there is probable cause the defendant committed the crime and should be tried. (Chapter 8)

Gratuitous assignment An assignment made as a gift, for no consideration. (Chapter 16)

Greenmail If a company is threatened with a hostile takeover, its board of directors may offer to buy the stock of the attacker at an above-market price with the hope that the attacker will take her profits and leave the company alone. (Chapter 34)

Grievance A formal complaint alleging a contract violation. (Chapter 30)

Guilty A court's finding that a defendant has committed a crime. (Chapter 8)

H

Hacking Gaining unauthorized access to a computer system. (Chapter 41)

Harmless error A ruling made by a trial court which an appeals court determines was legally wrong but not fatal to the decision. (Chapter 3)

Health care proxy Someone who has authority to make health care decisions for a person who is incompetent. (Chapter 45)

Heir Someone who inherits from a decedent who died intestate (that is, without a will). (Chapter 45)

Holder For order paper, anyone in possession of the instrument if it is payable to or indorsed to her. For bearer paper, anyone in possession. (Chapter 25)

Holder in due course Someone who has given value for an instrument, in good faith, without notice of outstanding claims or other defenses. (Chapter 25)

Holographic will A handwritten will that has not been witnessed. (Chapter 45)

Horizontal agreement or merger An agreement or merger between two potential competitors. (Chapter 38)

Hostile takeover An outsider buys a company in the face of opposition from the target company's board of directors. (Chapter 34)

I

Identify In sales law, to designate the specific goods that are the subject of a contract. (Chapter 23)

IFRS "International Financial Reporting Standards" is a new set of international standard accounting rules, used by over 100 countries, currently being proposed for U.S. companies to follow. (Chapter 27)

Illegal contract An agreement that is void because it violates a statute or public policy. (Chapter 13)

Illusory promise An apparent promise that is unenforceable because the promisor makes no firm commitment. (Chapter 12)

Implied authority When a principal directs an agent to undertake a transaction, the agent has the right to do acts that are incidental to it, usually accompany it, or are reasonably necessary to accomplish it. (Chapter 28)

Implied contract A binding agreement created not by explicit language but by the informal words and conduct of the parties. (Chapter 10)

Implied warranty Guarantees created by the Uniform Commercial Code and imposed on the seller of goods. (Chapter 22)

Implied warranty of fitness for a particular purpose If the seller knows that the buyer plans to use the goods for a particular purpose, the seller generally is held to warrant that the goods are in fact fit for that purpose. (Chapter 11)

Implied warranty of habitability A landlord must meet all standards set by the local building code, or otherwise ensure that the premises are fit for human habitation. (Chapter 43)

Implied warranty of merchantability Requires that goods must be of at least average, passable quality in the trade. (Chapter 11)

Import To transport goods or services into a country. (Chapter 9)

Import ban A prohibition of certain goods. (Chapter 9)

In camera "In the judge's chambers," meaning that the judge does something out of view of the jury and the public. (Chapter 3)

Incidental beneficiary Someone who might have benefited from a contract between two others but has no right to enforce that agreement. (Chapter 16)

Incidental damages The relatively minor costs, such as storage and advertising, that the injured party suffered when responding to a contract breach. (Chapter 18)

Incorporator The person who signs a corporate charter. (Chapter 33)

Indemnification A promise to pay someone else's obligations. (Chapter 33)

Independent agency An administrative agency outside the executive branch of government, such as the Interstate Commerce Commission. (Chapter 4)

Independent contractor Someone who undertakes tasks for others and whose work is not closely controlled. (Chapter 28)

Independent directors Members of the board of directors who are not employees of the company. Also known as outside directors. (Chapter 35)

Indictment The government's formal charge that a defendant has committed a crime. (Chapter 8)

Indorser Anyone, other than the issuer or acceptor, who signs an instrument. (Chapter 26)

Indorsement The signature of a payee. (Chapter 25)

Infliction of emotional distress A tort. It can be the *intentional infliction of emotional distress,* meaning that the defendant behaved outrageously and deliberately caused the plaintiff severe psychological injury, or it can be the *negligent infliction of emotional distress,* meaning that the defendant's conduct violated the rules of negligence. (Chapter 6)

Informal rulemaking The process whereby an administrative agency notifies the public of a proposed new rule and permits comment but is then free to promulgate the final rule without a public hearing. (Chapter 4)

Initial public offering (IPO) A company's first public sale of securities. (Chapter 36)

Injunction A court order that a person either do or stop doing something. (Chapter 18)

Inside directors Members of the board of directors who are also officers of the corporation. (Chapter 35)

Insider Family members of an individual debtor, officers and directors of a corporation, or partners of a partnership. (Chapter 33)

Instructions or charge The explanation given by a judge to a jury, outlining the jury's task in deciding a lawsuit and the underlying rules of law the jury should use in reaching its decision. (Chapter 3)

Instruments Drafts, checks, certificates of deposit and notes. (Chapter 24)

Insurable interest A person has an insurable interest if she would be harmed by the danger that she has insured against. (Chapter 45)

Insured A person whose loss is the subject of an insurance policy. (Chapter 45)

Insurer The person who issues an insurance policy. (Chapter 45)

Integrated contract A writing that the parties intend as the complete and final expression of their agreement. (Chapter 15)

Intended beneficiary Someone who may enforce a contract made between two other parties. (Chapter 16)

Intentional infliction of emotional distress An intentional tort in which the harm results from extreme and outrageous conduct that causes serious emotional'harm. (Chapter 6)

Intentional tort An act deliberately performed that violates a legally imposed duty and injures someone. (Chapter 6)

***Inter vivos* gift** A gift made "during life," that is, when the donor is not under any fear of impending death. (Chapter 44)

***Inter vivos* trust** A trust established while the grantor is still living. (Chapter 45)

Interest A legal right in something, such as ownership or a mortgage or a tenancy. (Chapter 18)

Interference with a contract *See* Tortious interference with a contract. (Chapter 6)

Interference with a prospective advantage *See* Tortious interference with a prospective advantage. (Chapter 6)

Internet An international computer network that connects smaller groups of linked computer networks. (Chapter 41)

Interpretive rules A formal statement by an administrative agency expressing its view of what existing statutes or regulations mean. (Chapter 4)

Interrogatory A form of discovery in which one party sends to an opposing party written questions that must be answered under oath. (Chapter 3)

Intestate Without a will. (Chapter 45)

Intrusion A tort if a reasonable person would find the invasion of her private life offensive. (Chapter 6)

Inventory Goods that the seller is holding for sale or lease in the ordinary course of its business. (Chapter 24)

Investigative Reports Discuss character, reputation or lifestyle. They become obsolete in three months. (Chapter 39)

Involuntary bailment A bailment that occurs without an agreement between the bailor and bailee. (Chapter 44)

Involuntary petition Filed by creditors to initiate a bankruptcy case. (Chapter 37)

Invitee Someone who has the right to be on property, such as a customer in a shop. (Chapter 7)

Issue All direct descendants such as children, grandchildren, and so on. (Chapter 45)

Issuer The maker of a promissory note or the drawer of a draft. (Chapter 25, 36)

J

Joint and several liability All members of a group are liable. They can be sued as a group, or any one of them can be sued individually for the full amount owing. (Chapter 27)

Joint liability All members of a group are liable and must be sued together. (Chapter 32)

Joint tenancy Two or more people holding equal interest in a property, with the right of survivorship. (Chapter 43)

Joint venture A partnership for a limited purpose. (Chapter 31)

Judgment *non obstante veredicto* (n.o.v.) "Judgment notwithstanding the verdict." A trial judge overturns the verdict of the jury and enters a judgment in favor of the opposing party. (Chapter 3)

Judgment rate The interest rate that courts use on court-ordered judgments. (Chapter 25)

Judicial activism The willingness shown by certain courts (and not by others) to decide issues of public policy, such as constitutional questions (free speech, equal protection, etc.) and matters of contract fairness (promissory estoppel, unconscionability, etc.). (Chapter 5)

Judicial restraint A court's preference to abstain from adjudicating major social issues and to leave such matters to legislatures. (Chapter 5)

Judicial review The power of the judicial system to examine, interpret, and even nullify actions taken by another branch of government. (Chapter 4)

Jurisdiction The power of a court to hear a particular dispute, civil or criminal, and to make a binding decision. (Chapter 3)

Jurisprudence The study of the purposes and philosophies of the law, as opposed to particular provisions of the law. (Chapter 1)

L

Labor-Management Relations Act Designed to curb union abuses. (Chapter 30)

Landlord The owner of a freehold estate who allows another person temporarily to live on his property. (Chapter 43)

Larceny Taking personal property with the intention of preventing the owner from ever using it. (Chapter 8)

Law merchant The body of rules and customs developed by traders and businesspersons throughout Europe from roughly the fifteenth to the eighteenth century. (Chapter 20)

Lease A contract creating a landlord-tenant relationship. (Chapter 43)

Legal positivism The legal philosophy holding that law is what the sovereign says it is, regardless of its moral content. (Chapter 1)

Legal realism The legal philosophy holding that what really influences law is who makes and enforces it, not what is put in writing. (Chapter 1)

Legal remedy Generally, money damages. It is distinguished from equitable remedy, which includes injunctions and other non-monetary relief. (Chapter 18)

Legislative history Used by courts to interpret the meaning of a statute, this is the record of hearings, speeches, and explanations that accompanied a statute as it made its way from newly proposed bill to final law. (Chapter 4)

Legislative rules Regulations issued by an administrative agency. (Chapter 4)

Letter of credit A commercial device used to guarantee payment in international trade, usually between parties that have not previously worked together. (Chapter 9)

Letter of intent A letter that summarizes negotiating progress. (Chapter 11)

Liability insurance Reimburses the insured for any liability she incurs by accidentally harming someone else. (Chapter 45)

Libel *See* Defamation. (Chapter 6)

License To grant permission to another person (1) to make or sell something or (2) to enter on property. (Chapter 43

Licensee A person who is on the property of another for her own purposes, but with the owner's permission. A social guest is a typical licensee. (Chapter 7)

Lien A security interest created by rule of law, often based on labor that the secured party has expended on the collateral. (Chapter 24)

Life estate An ownership interest in real property entitling the holder to use the property during his lifetime, but which terminates upon his death. (Chapter 43)

Life insurance Provides for payments to a beneficiary upon the death of the insured. (Chapter 45)

Life tenant A person who has the use of a property during his lifetime only. (Chapter 43)

Limited liability company An organization that has the limited liability of a corporation but is not a taxable entity. (Chapter 31)

Limited liability limited partnership In a limited liability limited partnership, the general partner is not personally liable for the debts of the partnership. (Chapter 31)

Limited partnership A partnership with two types of partners: (1) limited partners who have no personal liability for the debts of the enterprise nor any right to manage the business, and (2) general partners who are responsible for management and personally liable for all debts. (Chapter 31)

Liquidated damages A contract clause specifying how much a party must pay upon breach. (Chapter 18)

Liquidated debt The amount of the indebtedness is not in dispute. (Chapter 12)

Litigation The process of resolving disputes through formal court proceedings. (Chapter 3)

Living trust A trust established while the grantor is alive. *See inter vivos* trust. (Chapter 45)

Living will An instrument that permits adults to refuse medical treatment. It can also appoint a health care proxy to make

medical decisions for a person who has become incompetent. (Chapter 45)

Local A regional union that represents workers at a particular company. (Chapter 30)

Lockout A management tactic, designed to gain a bargaining advantage, in which the company refuses to allow union members to work (and hence deprives them of their pay). (Chapter 30)

M

Mailbox rule A contract doctrine holding that acceptance is effective upon dispatch, that is, when it is mailed or otherwise taken out of the control of the offeree. (Chapter 11)

Maker The issuer of a promissory note. (Chapter 25)

Marital trust A legal entity created for the purpose of reducing a married couple's estate taxes. (Chapter 45)

Material Important or significant. Information that would affect a person's decision if he knew it. (Chapter 36, 45)

Material breach A violation of a contract that defeats an essential purpose of the agreement. (Chapter 19)

Mechanic's lien A security created when a worker improves real property. (Chapter 24)

Mediation The process of using a neutral person to aid in the settlement of a legal dispute. A mediator's decision is non-binding. (Chapter 3)

Meeting of the minds The parties understood each other and intended to reach an agreement. (Chapter 11)

Merchant Someone who routinely deals in the particulars goods involved, or who appears to have special knowledge or skill in those goods, or who uses agents with special knowledge or skill in those goods. (Chapter 20)

Merchantable The goods are fit for the ordinary purposes for which they are used. (Chapter 22)

Merger An acquisition of one company by another. (Chapter 35)

Minor A person under the age of 18. (Chapter 14)

Minority shareholders Shareholders who do not own enough stock to control their corporation. (Chapter 35)

Minute book Records of shareholder meetings and directors' meetings are kept in the corporation's minute book. (Chapter 33)

Mirror image rule A contract doctrine that requires acceptance to be on exactly the same terms as the offer. (Chapter 11)

Misdemeanor A less serious crime, typically one for which the maximum penalty is incarceration for less than a year, often in a jail, as opposed to a prison. (Chapter 8)

Misrepresentation A factually incorrect statement made during contract negotiations. (Chapter 14)

Mitigation One party acts to minimize its losses when the other party breaches a contract. (Chapter 18)

Modify An appellate court order changing a lower court ruling. (Chapter 3)

Money laundering Taking the profits of criminal acts and either (1) using the money to promote more crime or (2) attempting to conceal the money's source. (Chapter 8)

Monopolization A company acquires or maintains a monopoly through the commission of unacceptably aggressive acts. A violation of §2 of the Sherman Act. (Chapter 38)

Mortgage A security interest in real property. (Chapter 43)

Mortgagee A creditor who obtains a security interest in real property, typically in exchange for money given to the mortgagor to buy the property. (Chapter 43)

Mortgagor A debtor who gives a mortgage (security interest) in real property to a creditor, typically in exchange for money used to buy the property. (Chapter 43)

Motion A formal request that a court take some specified step during litigation. A motion to compel discovery is a request that a trial judge order the other party to respond to discovery. (Chapter 3)

Motion for a protective order A request that the court limit discovery. (Chapter 3)

Multinational enterprise A corporation that is doing business in more than one country simultaneously. (Chapter 9)

N

National Labor Relations Act (NLRA) Ensures the right of workers to form unions and encourages management and unions to bargain collectively. (Chapter 30)

National Labor Relations Board (NLRB) The administrative agency charged with overseeing labor law. (Chapter 30)

Nationalization A government's seizure of property or companies. (Chapter 9)

Natural law The theory that an unjust law is no law at all, and that a rule is only legitimate if based on an immutable morality. (Chapter 1)

Negative or dormant aspect of the Commerce Clause The doctrine that prohibits a state from any action that interferes with or discriminates against interstate commerce. (Chapter 5)

Negligence and strict liability Injuries caused by neglect and oversight rather than by deliberate conduct. (Chapter 6)

Negligence per se Violation of a standard of care set by statute. Driving while intoxicated is illegal; thus, if a drunk

driver injures a pedestrian, he has committed negligence per se. (Chapter 7)

Negotiable instrument A type of commercial paper that is freely transferable. (Chapter 25)

Negotiation The transfer of an instrument. To be negotiated, order paper must be indorsed and then delivered to the transferee. For bearer paper, no indorsement is required—it must simply be delivered to the transferee. (Chapter 25)

Nominal damages A token sum, such as one dollar, given to a plaintiff who demonstrates that the defendant breached the contract but cannot prove serious injury. (Chapter 18)

Noncompetition agreement A contract in which one party agrees not to compete with another in a stated type of business. (Chapter 10)

Nonconforming goods Merchandise that differs from that specified in the contract. (Chapter 21)

Non-point source When pollutants are released simultaneously from more than one source. (Chapter 40)

Norris-LaGuardia Act Prohibits federal court injunctions in peaceful labor disputes. (Chapter 40)

North American Free Trade Agreement A commercial association among Canada, the United States, and Mexico designed to eliminate almost all trade barriers. (Chapter 9)

No-strike clause A clause in a CBA that prohibits the union from striking while the CBA is in force. (Chapter 30)

Note An unconditional, written promise that the maker of the instrument will pay a specific amount of money on demand or at a definite time. When issued by a corporation, a note refers to short-term debt, typically payable within five years. (Chapter 33)

Notice to quit A landlord's notice terminating a tenancy. (Chapter 43)

Novation A three-way agreement in which the obligor transfers all rights and duties to a third party. (Chapter 16, 33)

Nuisance An unprivileged interference with a person's use and enjoyment of property. (Chapter 43)

Nuncupative will An oral will. (Chapter 45)

O

Obligee The party to a contract who is entitled to receive performance from the other party. (Chapter 16)

Obligor The party to a contract who is required to do something for the benefit of the other party. (Chapter 16, 24)

Obscenity Constitutional law doctrine holding that some works will receive no First Amendment protection because a court determines they depict sexual matters in an offensive way. (Chapter 5)

Offer In contract law, an act or statement that proposes definite terms and permits the other party to create a contract by accepting those terms. (Chapter 11)

Offeree The party in contract negotiations who receives the first offer. (Chapter 11)

Offeror The party in contract negotiations who makes the first offer. (Chapter 11)

Opinion Because it cannot be proven right or wrong, an opinion is generally a valid defense in defamation cases. (Chapter 6)

Oppression One party uses its superior power to force a contract on the weaker party. (Chapter 13)

Order for relief An official acknowledgment that a debtor is under the jurisdiction of the bankruptcy court. (Chapter 37)

Order paper An instrument that includes the words "pay to the order of" or their equivalent. (Chapter 25)

Output contract An agreement that obligates the seller of goods to sell everything he produces during a stated period to a particular buyer. (Chapter 11)

Outside directors Members of the board of directors who are not employees of the corporation. Also known as independent directors. (Chapter 35)

Override The power of Congress or a state legislature to pass legislation despite a veto by a president or governor. A congressional override requires a two-thirds vote in each house. (Chapter 4)

P

Parol evidence Written or oral evidence, outside the language of a contract, offered by one party to clarify interpretation of the agreement. (Chapter 15)

Parol evidence rule In the case of an integrated contract, neither party may use evidence outside the writing to contradict, vary, or add to its terms. (Chapter 15)

Part performance An exception to the statute of frauds permitting a buyer of real estate to enforce an oral contract if she paid part of the price, entered the property, and made improvements, with the owner's knowledge. (Chapter 15)

Partially disclosed principal If the third party in an agency relationship knows that the agent is acting for a principal, but does not know the identity of the principal, that principal is partially disclosed. (Chapter 28)

Partnership An association of two or more persons to carry on as co-owners of a business for profit. (Chapter 31)

Partnership at will A partnership that has no fixed duration. A partner has the right to resign from the partnership at any time. (Chapter 32)

Partnership by estoppel If a person who is not a partner implies that he is a partner or does not object when other people imply it, he is liable as if he really were a partner. (Chapter 32)

Patent The right to the exclusive use of an invention for 20 years. (Chapter 42)

Patent troll Someone who buys a portfolio of patents for the purpose of making patent infringement claims. (Chapter 42)

Payable on demand The holder of an instrument is entitled to be paid whenever she asks. (Chapter 25)

Payee Someone who is owed money under the terms of an instrument. (Chapter 25)

Per capita Each heir receives the same amount. (Chapter 45)

***Per se* violation of an antitrust law** An automatic breach. Courts will generally not consider mitigating factors. (Chapter 38)

Per stirpes Each branch of the family receives an equal share. (Chapter 45)

Peremptory challenge During *voir dire*, a request by one attorney that a prospective juror be excused for an unstated reason. (Chapter 3)

Perfect tender rule A rule permitting the buyer to reject goods if they fail in any respect to conform to the contract. (Chapter 23)

Perfection A series of steps a secured party must take to protect its rights in collateral against people other than the debtor. (Chapter 24)

Period for years A lease for a fixed period, automatically renewable unless terminated. (Chapter 43)

Periodic tenancy A lease for a fixed period, automatically renewable unless terminated. (Chapter 43)

Perpetual trust A trust that lasts forever. Also known as a dynasty trust. (Chapter 45)

Personal property All property other than real property. (Chapter 44)

Personally identifiable information (PII) Data that identifies a user of a Web site, such as name and address. (Chapter 41)

Personal satisfaction contracts Permit the promisee to make a subjective evaluations of the promisor's performance. (Chapter 17)

Personal services contracts Permits the promisee to make a subjective evaluation of the promisor's performance. (Chapter 17)

Phishing A fraudster sends a message directing the recipient to enter personal information on a website that is an illegal imitation of a legitimate site. (Chapter 41)

Pierce the corporate veil When the court holds shareholders personally liable for the debts of the corporation. (Chapter 33)

Plain meaning rule In statutory interpretation, the premise that words with an ordinary, everyday significance will be so interpreted, unless there is some apparent reason not to. (Chapter 4)

Plaintiff The person who is suing. (Chapter 1)

Plea bargain An agreement in which the defendant pleads guilty to a reduced charge and the prosecution recommends to the judge a relatively lenient sentence. (Chapter 8)

Pleadings The documents that begin a lawsuit: the complaint, the answer, the counter-claim, and reply. (Chapter 3)

Pledge A secured transaction in which a debtor gives collateral to the secured party. (Chapter 24)

Plurality voting To be elected, a candidate only needs to receive more votes than her opponent, not a majority of the votes cast. (Chapter 35)

Point Source A single producer of pollution. (Chapter 40)

Political speech Protected unless it is intended and likely to create imminent lawless action. (Chapter 5)

Positive aspect of the Commerce Clause The power granted to Congress to regulate commerce between the states. (Chapter 5)

Precedent An earlier case that decided the same legal issue as that presently in dispute, and which therefore will control the outcome of the current case. (Chapter 1, 3, 4)

Predatory pricing A violation of §2 of the Sherman Act in which a company lowers its prices below cost to drive competitors out of business. (Chapter 38)

Preemption The doctrine, based on the Supremacy Clause, by which any federal statute takes priority whenever (1) a state statute conflicts or (2) there is no conflict but Congress indicated an intention to control the issue involved. (Chapter 5)

Preference When a debtor unfairly pays creditors immediately before filing a bankruptcy petition. (Chapter 37)

Preferred stock Owners of preferred stock have a right to receive dividends and liquidation proceeds of the company before common shareholders. (Chapter 33)

Preponderance of the evidence The level of proof that a plaintiff must meet to prevail in a civil lawsuit. It means that the plaintiff must offer evidence that, in sum, is slightly more persuasive than the defendant's evidence. (Chapter 3)

Presentment A holder of an instrument makes a demand for payment. (Chapter 26)

Pretermitted child A child omitted from a parent's will. (Chapter 45)

Prima facie "At first sight." A fact or conclusion that is presumed to be true unless someone presents evidence to disprove it. (Chapter 29)

Principal In an agency relationship, the principal is the person for whom the agent is acting. (Chapter 28)

Privacy Act A federal statute prohibiting federal agencies from divulging to other agencies or organizations information about private citizens. (Chapter 4)

Privity The relationship that exists between two parties who make a contract, as opposed to a third party who, though affected by the contract, is not a party to it. (Chapter 21)

Probable cause In a search and seizure case, it means that the information available indicates that it is more likely than not that a search will uncover particular criminal evidence. (Chapter 8)

Probate The process of carrying out the terms of a will. (Chapter 45)

Procedural due process The doctrine which ensures that before the government takes liberty or property, the affected person has a fair chance to oppose the action. (Chapter 5)

Procedural law The rules establishing how the legal system itself is to operate in a particular kind of case. (Chapter 1)

Proceeds Anything that a debtor obtains from the sale or disposition of collateral. Normally, proceeds refers to cash obtained from the sale of the secured property. (Chapter 24)

Production of documents and things A form of discovery in which one party demands that the other furnish original documents or physical things, relating to the suit, for inspection and copying. (Chapter 3)

Product liability The potential responsibility that a manufacturer or seller has for injuries caused by defective goods. (Chapter 22)

Professional corporation A form of organization that permits professionals (such as doctors, lawyers, and accountants) to incorporate. Shareholders are not personally liable for the torts of other shareholders, or for the contract debts of the organization. (Chapter 31)

Profit The right to enter land belonging to another and take something away, such as minerals or timber. (Chapter 43)

Promisee The person to whom a promise is made. (Chapter 16)

Promisor A person who makes a promise. (Chapter 16)

Promissory estoppel A doctrine in which a court may enforce a promise made by the defendant even when there is no contract, if the defendant knew that the plaintiff was likely to rely on the promise, the plaintiff did in fact rely, and enforcement of it is the only way to avoid injustice. (Chapter 10)

Promissory note The maker of the instrument promises to pay a specific amount of money. (Chapter 25)

Promoter The person who creates a corporation by raising capital and undertaking the legal steps necessary for formation. (Chapter 33)

Promulgate To issue a new rule. (Chapter 4)

Proof of claim A form stating the name of an unsecured creditor and the amount of the claim against the debtor. (Chapter 37)

Property insurance Covers physical damage to real estate, personal property, or inventory from causes such as fire, smoke, lightning, wind, riot, vandalism, or theft. (Chapter 45)

Prosecution The government's attempt to convict a defendant of a crime by charging him, trying the case, and forcing him to defend himself. (Chapter 8)

Prospectus Under the Securities Act of 1933, an issuer must provide this document to anyone who purchases a security in a public transaction. The prospectus contains detailed information about the issuer and its business, a description of the stock, and audited financial statements. (Chapter 36)

Protective order A court order limiting one party's discovery. (Chapter 3)

Proxy (1) A person whom the shareholder designates to vote in his place. (2) The written form (typically a card) that the shareholder uses to appoint a designated voter. (Chapter 35)

Proxy statement When a public company seeks proxy votes from its shareholders, it must include a proxy statement. This statement contains information about the company, such as a detailed description of management compensation. (Chapter 35)

Publicly traded corporation A company that (1) has completed a public offering under the Securities Act of 1933, or (2) has securities traded on a national exchange, or (3) has 500 shareholders and $10 million in assets. (Chapter 34)

Punitive damages Money awarded at trial not to compensate the plaintiff for harm but to punish the defendant for conduct that the factfinder considers extreme and outrageous. (Chapter 6)

Purchase money security interest (PMSI) A security interest taken by the person who sells the collateral to the debtor, or by a person who advances money so that the debtor may buy the collateral. (Chapter 24)

Q

Qualified privilege Exists between two people who have a legitimate need to exchange information. (Chapter 29)

Qualifying to do business Registering a corporation in a state in which it is not organized but in which it has an ongoing presence. (Chapter 33)

Quantum meruit "As much as she deserves." The damages awarded in a quasi-contract case. (Chapter 10)

Quasi-contract A legal fiction in which, to avoid injustice, the court awards damages as if a contract had existed, although one did not. (Chapter 10)

Quid pro quo A Latin phrase meaning "this for that." It refers to a form of sexual harassment in which some aspect of a job is made contingent upon sexual activity. (Chapter 39)

Quiet enjoyment A tenant's right to use property without the interference of the landlord. (Chapter 43)

Quorum The number of voters that must be present for a meeting to count. (Chapter 33, 35)

R

Racketeer Influenced and Corrupt Organizations Act (RICO) A powerful federal statute, originally aimed at organized crime, now used in many criminal prosecutions and civil lawsuits. (Chapter 8)

Racketeering acts Any of a long list of specified crimes, such as embezzlement, arson, mail fraud, wire fraud, and so forth. (Chapter 8)

Ratification When someone accepts the benefit of an unauthorized transaction or fails to repudiate it once he has learned of it, he is then bound by it. (Chapter 14)

Reaffirm To promise to pay a debt even after it is discharged. (Chapter 33)

Real property Land, together with certain things associated with it, such as buildings, subsurface rights, air rights, plant life and fixtures. (Chapter 43)

Reasonable Ordinary or usual under the circumstances. (Chapter 19)

Reasonable doubt The level of proof that the government must meet to convict the defendant in a criminal case. The factfinder must be persuaded to a very high degree of certainty that the defendant did what the government alleges. (Chapter 3)

Reciprocal dealing agreement An agreement under which Company *A* will purchase from Company *B* only if Company *B* also buys from Company *A*. These agreements are rule of reason violations of the Sherman Act. (Chapter 38)

Reciprocal promises Promises that are each enforceable independently. (Chapter 19)

Record Information written on paper or stored in an electronic or other medium. (Chapter 26)

Record date To vote at a shareholders meeting, a shareholder must own stock on the record date. (Chapter 36)

Red herring A preliminary prospectus. (Chapter 37)

Redeem To pay the full value of a debt to get the collateral back. (Chapter 24)

Reformation The process by which a court rewrites a contract to ensure its accuracy or viability. (Chapter 18)

Refusal to deal An agreement among competitors that they will not trade with a particular supplier or buyer. Such an agreement is a rule of reason violation of the Sherman Act. (Chapter 38)

Registration statement A document filed with the Securities and Exchange Commission under the Securities Act of 1933 by an issuer seeking to sell securities in a public transaction. (Chapter 36)

Reliance interest A remedy in a contract case that puts the injured party in the position he would have been in had the parties never entered into a contract. (Chapter 18)

Remand The power of an appellate court to return a case to a lower court for additional action. (Chapter 1)

Rent Compensation paid by a tenant to a landlord. (Chapter 43)

Reply A pleading, filed by the plaintiff in response to a defendant's counter-claim. (Chapter 3)

Reporting Company A company registered under the 1934 Act. (Chapter 36)

Repossess A secured party takes collateral because the debtor has defaulted on payments. (Chapter 24)

Representations and warranties Statements of fact about the past or present. (Chapter 19)

Repudiation An indication made by one contracting party to the other that it will not perform. (Chapter 23)

Request for admission A form of discovery in which one party demands that the opposing party either admit or deny particular factual or legal allegations. (Chapter 3)

Requirements contract An agreement that obligates a buyer of specified goods to purchase all of the goods she needs during a stated period from a particular seller. (Chapter 11)

Res ipsa loquitur A doctrine of tort law holding that the facts may imply negligence when the defendant had exclusive control of the thing that caused the harm, the accident would not normally have occurred without negligence, and the plaintiff played no role in causing the injury. (Chapter 7)

Resale price maintenance A *per se* violation of the Sherman Act in which a manufacturer enters into an agreement with retailers about the prices they will charge. (Chapter 38)

Rescind To cancel a contract. (Chapter 14, 17)

Rescission To "undo" a contract and put the parties where they were before they made their agreement. (Chapter 18).

Respondeat superior A rule of agency law holding that a principal is liable when a servant acting within the scope of employment commits a tort that causes physical harm to a person or property. (Chapter 28)

Restitution Restoring an injured party to its original position. (Chapter 8, 14)

Restitution interest A remedy in a contract case that returns to the injured party a benefit that he has conferred on the other

party, which it would be unjust to leave with that person. (Chapter 18)

Restricted security Any stock purchased in a private offering (such as one under Regulation D). (Chapter 36)

Restricted stock Securities purchased strictly for investment purposes. (Chapter 36)

Reverse The power of an appellate court to overrule a lower court and grant judgment for the party that had lost in the lower court. (Chapter 3)

Reverse and remand To nullify the lower decision and return the case for reconsideration or retrial. (Chapter 3)

Reversion The right of an owner (or her heirs) to property upon the death of a life tenant. (Chapter 43)

Revocable trust A trust that can be undone or changed at any time. (Chapter 45)

Revocation The act of disavowing a contract offer, so that the offeree no longer has the power to accept. (Chapter 11)

Rider An amendment or addition to a contract. (Chapter 19)

Rule of reason violation An action that breaches the antitrust laws only if it has an anticompetitive impact. (Chapter 38)

Rulemaking The power of an administrative agency to issue regulations. (Chapter 4)

S

S corporation A corporation that is not a taxable entity. (Chapter 31)

Safe Harbor A set of requirements that, if met, indicate *automatic* compliance with a law. (Chapter 36)

Sale on approval A transfer in which a buyer takes goods intending to use them herself, but has the right to return the goods to the seller. (Chapter 21)

Sale or return A transfer in which the buyer takes the goods intending to resell them, but has the right to return the goods to the original owner. (Chapter 21)

Scienter In a case of securities fraud, the plaintiff must prove that the defendant acted willfully, knowingly, or recklessly. (Chapter 36)

Scrivener's error A typo. (Chapter 19)

Secondary boycott Picketing, directed by a union against a company, designed to force that company to stop doing business with the union's employer. (Chapter 30)

Secondary offering Any public sale of securities by a company after the initial public offering. (Chapter 36)

Secured party A person or company that holds a security interest. (Chapter 24)

Security Any purchase in which the buyer invests money in a common enterprise and expects to earn a profit predominantly from the efforts of others. (Chapter 36)

Security agreement A contract in which the debtor gives a security interest to the secured party. (Chapter 24)

Security interest An interest in personal property or fixtures that secures the performance of some obligation. (Chapter 16, 24)

Separation of powers The principle, established by the first three articles of the Constitution, that authority should be divided among the legislative, executive, and judicial branches. (Chapter 5)

Service mark A type of trademark used to identify services, not products. (Chapter 44)

Settlor Someone who creates a trust. (Chapter 45)

Sexual harassment Unwanted sexual advances, comments or touching, sufficiently severe to violate Title VII of the 1964 Civil Rights Act. (Chapter 29)

Shilling A seller at auction either bids on his own goods or agrees to cross-bid with a group of other sellers. (Chapter 41)

Short-swing trading Under §16 of the Securities Exchange Act, insiders must turn over to the corporation any profits they make from the purchase and sale or sale and purchase of company securities in a six-month period. (Chapter 36)

Signatory A person, company, or nation that has signed a legal document, such as a contract, agreement, or treaty. (Chapter 9)

Signature liability The liability of someone who signs an instrument. (Chapter 26)

Sight draft Payable on demand. (Chapter 25)

Single recovery principle A rule of tort litigation that requires a plaintiff to claim all damages, present and future, at the time of trial, not afterwards. (Chapter 6)

Slander *See* Defamation. (Chapter 6)

Sole discretion A party to a contract has the absolute right to make a decision on that issue. (Chapter 19)

Sole proprietorship An unincorporated business owned by a single person. (Chapter 31)

Sophisticated investor Someone who is able to assess the risk of an offering (Chapter 36)

Sovereign The recognized political power, whom citizens obey. (Chapter 1)

Sovereign immunity The right of a national government to be free of lawsuits brought in foreign courts. (Chapter 9)

Spam Unsolicited commercial or bulk e-mail. ("To spam" is to send such e-mail.) (Chapter 41)

Specific deterrence *See* Deterrence. (Chapter 8)

Specific performance A contract remedy requiring the breaching party to perform the contract, by conveying land or some unique asset, rather than by paying money damages. (Chapter 18)

Spyware A computer program that enters a user's computer without permission and monitors and reports the user's activities. (Chapter 41)

Sole proprietorship An unincorporated business owned by one person. (Chapter 31)

Stakeholders Anyone who is affected by the activities of a corporation, such as employees, customers, creditors, suppliers, shareholders, and neighbors. (Chapter 34)

Stare decisis "Let the decision stand." A basic principle of the common law, it means that precedent is usually binding. (Chapter 4)

Statute A law passed by a legislative body, such as Congress. (Chapter 1)

Statute of frauds This law provides that certain contracts are not enforceable unless in writing. (Chapter 15)

Statute of limitations A statute that determines the period within which a particular kind of lawsuit must be filed. (Chapter 17)

Statute of repose A law that places an absolute limit on when a lawsuit may be filed, regardless of when the defect was discovered. (Chapter 22)

Statutory interpretation A court's power to give meaning to new legislation by clarifying ambiguities, providing limits, and ultimately applying it to a specific fact pattern in litigation. (Chapter 4)

Straight bankruptcy Also known as liquidation, this form of bankruptcy mandates that the bankrupt's assets be sold to pay creditors but the creditor has no obligation to share future earnings. (Chapter 37)

Strict liability A tort doctrine holding to a very high standard all those who engage in ultrahazardous activity (e.g., using explosives) or who manufacture certain products. (Chapter 7)

Strict performance Requires one party to perform its obligations precisely, with no deviation from the contract terms. (Chapter 17)

Strike The ultimate weapon of a labor union, it occurs when all or most employees of a particular plant or employer walk off the job and refuse to work. (Chapter 30)

Sublease A tenant's transfer of *some* of his legal interest in a property. (Chapter 43)

Subpoena An order to appear, issued by a court or government body. (Chapter 4)

Subpoena *duces tecum* An order to produce certain documents or things before a court or government body. (Chapter 4)

Subprime loan A loan that has an above-market interest rate because the borrower is high-risk. (Chapter 49)

Subrogated to The bank can substitute for, or take the place of, a party. (Chapter 25)

Substantial performance The promisor performs contract duties well enough to be entitled to his full contract price, minus the value of any defects. (Chapter 17)

Substantive due process *See* Due Process Clause. (Chapter 5)

Substantive law Rules that establish the rights of parties. For example, the prohibition against slander is substantive law, as opposed to procedural law. (Chapter 1)

Summary judgment The power of a trial court to terminate a lawsuit before a trial has begun, on the grounds that no essential facts are in dispute. (Chapter 3)

Supermajority voting Typically, shareholders can approve charter amendments by a majority vote. However, sometimes corporations require more than a majority of shareholders (e.g., 80 percent) to approve certain charter amendments, such as a merger. These provisions are designed to discourage hostile takeovers. (Chapter 34)

Superseding cause An event that interrupts the chain of causation and relieves a defendant from liability based on her own act. (Chapter 7)

Supremacy Clause From Article VI of the Constitution, it declares that federal statutes and treaties take priority over any state law, if there is a conflict between the two or, even absent a conflict, if Congress manifests an intent to preempt the field. (Chapter 5)

Surplus A sum of money greater than the debt incurred. (Chapter 24)

T

Takings Clause Part of the Fifth Amendment, it ensures that when any governmental unit takes private property for public use, it must compensate the owner. (Chapter 5)

Tariff A duty imposed on imported goods by the government of the importing nation. (Chapter 9)

Tenancy at sufferance A tenancy that exists without the permission of the landlord, after the expiration of a true tenancy. (Chapter 43)

Tenancy at will A tenancy with no fixed duration, which may be terminated by either party at any time. (Chapter 43)

Tenancy by the entirety A form of joint ownership available only to married couples. If one member of the couple dies, the

property goes automatically to the survivor. Creditors cannot attach the property, nor can one owner sell the property without the other's permission. (Chapter 43)

Tenancy for years A lease for a stated, fixed period. (Chapter 43)

Tenancy in common Two or more people holding equal interest in a property, but with no right of survivorship. (Chapter 43)

Tenant A person given temporary possession of the landlord's property. (Chapter 43)

Tender offer A public offer to buy a block of stock directly from shareholders. (Chapter 34)

Term partnership When the partners agree in advance on the duration of a partnership. (Chapter 32)

Termination statement A document indicating that a secured party no longer claims a security interest in the collateral. (Chapter 24)

Testamentary trust A trust created by the grantor's will. (Chapter 45)

Testator Someone who dies having executed a will. (Chapter 45)

Testatrix A female testator. (Chapter 45)

Third party beneficiary Someone who stands to benefit from a contract to which she is not a party. An *intended* beneficiary may enforce such a contract; an *incidental* beneficiary may not. (Chapter 16)

Three-Fifths Clause A clause in Article 1, section 2 of the United States Constitution, now void and regarded as racist, which required that for purposes of taxation and representation, a slave should be counted as three-fifths of a person. (Chapter 5)

Tied product In a tying arrangement, the product that a buyer must purchase as the condition for being allowed to buy another product. (Chapter 38)

Time draft Payable in the future. (Chapter 25)

Time of the essence clauses Clauses that generally make contract dates strictly enforceable. (Chapter 17)

Tort A civil wrong, committed in violation of a duty that the law imposes. (Chapter 6)

Tortious interference with a contract A tort in which the defendant deliberately impedes an existing contract between the plaintiff and another. (Chapter 6)

Tortious interference with a prospective advantage A tort in which the defendant deliberately obstructs a developing venture or advantage that the plaintiff has created. (Chapter 6)

Tracking When an auditor takes an item of original data and tracks it forward to ensure that it has been properly recorded throughout the bookkeeping process. (Chapter 27)

Trade acceptance A draft drawn by a seller of goods on the buyer and payable to the seller or some third party. (Chapter 25)

Trade secret A formula, device, process, method, or compilation of information that, when used in business, gives the owner an advantage over competitors who do not know it. (Chapter 42)

Trademark Any combination of words and symbols that a business uses to identify its products or services and that federal law will protect. (Chapter 42)

Treasury stock Stock that has been bought back by its issuing corporation. (Chapter 33)

Trespass A tort committed by intentionally entering land that belongs to someone else, or remaining on the land after being asked to leave. (Chapter 6)

Trespasser Anyone on a property without consent. (Chapter 7)

Trial court Any court in a state or federal system that holds formal hearings to determine the facts in a civil or criminal case. (Chapter 3)

Trust An entity that separates legal and beneficial ownership. (Chapter 45)

Tying a product In a tying arrangement, the product offered for sale on the condition that another product be purchased as well. (Chapter 38)

Tying arrangement A violation of the Sherman and Clayton Acts in which a seller requires that two distinct products be purchased together. The seller uses its significant power in the market for the tying product to shut out a substantial part of the market for the tied product. (Chapter 38)

U

Ultra vires An activity that is not permitted by a corporation's charter. (Chapter 33)

Ultrahazardous activity Conduct that is lawful yet unusual and much more likely to cause injury than normal commercial activity. (Chapter 7)

Unconscionable contract An agreement that a court refuses to enforce because it is fundamentally unfair as a result of unequal bargaining power by one party. (Chapter 20)

Undisclosed principal If a third party in an agency relationship does not know that the agent is acting for a principal, that principal is undisclosed. (Chapter 28)

Undue influence One party so dominates the thinking of another party to a contract that the dominant party cannot truly consent to the agreement. (Chapter 14)

Unfair labor practice An act, committed by either a union or an employer, that violates the National Labor Relations Act, such as failing to bargain in good faith. (Chapter 30)

Unilateral contract A binding agreement in which one party has made an offer that the other can accept only by action, not words. (Chapter 10)

Unilateral mistake Occurs when only one party enters a contract under a mistaken assumption. (Chapter 14)

Unliquidated debt A claimed debt that is disputed, either because the parties disagree over whether there is in fact a debt or because they disagree over the amount. (Chapter 12)

U.S. Trustee, The Oversees the administration of bankruptcy law in a region. (Chapter 37)

Usury Charging interest at a rate that exceeds legal limits. (Chapter 13)

Utter To pass on an instrument that one knows to be forged. (Chapter 26)

V

Value The holder has *already* done something in exchange for the instrument. (Chapter 25)

Valuation A process by which the Customs Service determines the fair value of goods being imported, for purposes of imposing a duty. (Chapter 9)

Verdict The decision of the factfinder in a case. (Chapter 3)

Vertical agreement or merger An agreement or merger between two companies at different stages of the production process, such as when a company acquires one of its suppliers or distributors. (Chapter 38)

Veto The power of the president to reject legislation passed by Congress, terminating the bill unless Congress votes by a 2/3 majority to override. (Chapter 4)

Vouching Auditors choose a transaction listed in a company's books and check backwards for original data to support it. (Chapter 27)

Void agreement An agreement that neither party may legally enforce, usually because the purpose of the bargain was illegal or because one of the parties lacked capacity to make it. (Chapter 10)

Voidable contract An agreement that, because of some defect, may be terminated by one party, such as a minor, but not by both parties. (Chapter 10)

Voidable title Limited rights in goods, inferior to those of the owner. (Chapter 21)

Voir dire The process of selecting a jury. Attorneys for the parties and the judge may inquire of prospective jurors whether they are biased or incapable of rendering a fair and impartial verdict. (Chapter 3)

Voluntary petition Filed by a debtor to initiate a bankruptcy case. (Chapter 37)

W

Warrant liability The liability of someone who receives payment on an instrument. (Chapter 26)

Warranty A guarantee that goods will meet certain standards. (Chapter 22)

Warranty of fitness for a particular purpose An assurance under the Uniform Commercial Code that the goods are fit for the special purpose for which the buyer intends them and of which the seller is aware. (Chapter 22)

Warranty of merchantability An assurance under the Uniform Commercial Code that the goods are fit for their ordinary purpose. (Chapter 22)

Whistleblower Someone who discloses wrongful behavior. (Chapter 29)

Will A legal document that disposes of the testator's property after death. (Chapter 45)

Winding up The process whereby the assets of a partnership are sold and the proceeds distributed. (Chapter 32)

World Trade Organization (WTO) Created by GATT to stimulate international commerce and resolve trade disputes. (Chapter 9)

World Wide Web A decentralized collection of documents containing text, pictures and sound that is accessible from Internet sites. It is a sub-network of the Internet. (Chapter 41)

Writ An order from a government compelling someone to do a particular thing. (Chapter 1)

Writ of certiorari A petition asking the Supreme Court to hear a case. (Chapter 3)

Wrongful discharge An employer may not fire a worker for a reason that violates basic social rights, duties or responsibilities. (Chapter 29)

INSTRUCTOR'S EDITION

5 Easy Ways to Keep the Price of Textbooks Down!

1. **Create a CUSTOM book or digital solution.** Save your students money by customizing course materials tailor-fit to your course. Learn more at www.cengage.com/custom.

2. **Consider adopting an ALTERNATE FORMAT rather than a standard textbook.** Save your students money with a loose-leaf option, a combination text and digital solution, or low-cost Advantage title. Browse options available at www.cengage.com.

3. **Send your students to CengageBrain.com.** At CengageBrain.com, students select from à la carte supplements and a wide range of digital money-saving options, including the option to buy eBooks and individual chapters.

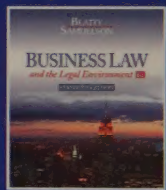
4. **Use eSAMPLING.** View and evaluate electronic chapters of selected titles and associated resources at coursesmart.com. This easy way to narrow down textbook selection saves time and money in shipping and returns.

5. **RECYCLE your unwanted Instructor's Editions.** Send books back to Cengage Learning.

HOW TO RECYCLE YOUR UNWANTED INSTRUCTOR'S EDITIONS

Use the return label included with your Instructor's Edition. Postage is paid. If you can't locate the label, contact your Cengage Learning Representative to pick up your copy or go to www.cengage.com/recycle to print out a return label.

Putting it All Into Practice



Business Law and the Legal Environment, Standard Edition, 6e uses vivid examples and memorable scenarios to lead students through the full breadth of business law. The best way to learn is through hands-on application, and with Beatty/Samuelson, students get plenty of practice through active learning features and practical exercises. Plus, by showing students through practice how legal concepts apply to their future careers, this edition draws students into the material, helping them study more effectively and diligently.

Give your students a price break! Place www.cengagebrain.com on your syllabus and help your students save money on their textbooks and course materials. Students can:

- Buy textbooks at our direct-to-student prices.
- Buy an eBook and save 50%!
- Access free study tools to help them excel in your course.
